Submit Your Bids By Fax | FAX HOTLINE: 214-409-1425

ALL INFORMATION MUST BE COMPLETED AND FORM SIGNED

NAME _____ CLIENT # (if known) _____ BIDDER # _____

ADDRESS _____ E-MAIL ADDRESS _____

CITY/STATE/ZIP _____ CELL PHONE _____

DAYTIME PHONE (_____) _____ EVENING PHONE (_____) _____

Would you like a FAX or e-mail confirming receipt of your bids? If so, please
print your FAX # _____

or e-mail address here: _____

I would like to limit my bidding to a total of \$ _____

at the hammer amount for all lots listed on this bid sheet. I am aware
that by utilizing the Budget Bidding feature all bids on this sheet will be
affected. If I intend to have regular bidding on other lots I will need to
use a separate bid sheet.

Payment by check may result in your property not being released until
purchase funds clear our bank. Checks must be drawn on a U.S. bank.
(Bid in whole dollar amounts only.)

All bids are subject to the applicable Buyer's Premium. See HA.com for details.

Non-Internet bids (including but not limited to, podium, fax, phone and mail
bids) may be submitted at any time and are treated similar to floor bids. These
types of bids must be on-increment or at a half increment (called a cut bid). Any
podium, fax, phone or mail bids that do not conform to a full or half increment
will be rounded up or down to the nearest full or half increment and will be
considered your high bid.

Dear Bidder:

Welcome to FUN! Our annual marquee U.S. Coins auction has attracted more than 11,000 total lots, of which over 4,300 lots will be offered on the auction floor right at the convention, including just over 500 important lots concentrated into our famous Platinum Night evening session.

More than 400 consignors contributed to this magnificent auction, a staggering 22 of them as Featured Collections. They are:

The Big E Collection

Eric John "Big E" Challoner began collecting coins at age eight, when he received a metal detector for his birthday. From coins he found while metal-detecting on playgrounds and in other places, he put together a near-complete set of Lincoln cents. When his father drove him to a coin dealer in Los Angeles so he could buy a 1914-D cent, young Eric spent \$400 on an example – only to discover it was a fake after getting it under a microscope at home. He then had to convince his father to drive him to and from Los Angeles once more to get his refund.

A political science graduate of California Lutheran who also attended law school, Mr. Challoner founded his own business in 1994. His entrepreneurial success gave him the means to pursue larger denominations, including commemorative silver and an uncertified proof 1862 Seated dollar on which he put his sharp (natural 3x magnification up close, according to his optometrist) amateur coin-grading eye to the test. He predicted the coin would grade PR66, and NGC agreed. The PR66 1862 Seated dollar, among others, represents the collection in Platinum Night.

In the last few years of his life, as he battled cancer, Mr. Challoner collected and appreciated silver art bars. Though he died in December 2011 at age 52, the knowledge that he passed on to his wife, Jami, and the collectors who knew him as "Big E" on the Collectors Universe message boards lives on.

The Ives Devos Collection

Ives Devos got his collecting start with stamps at the age of six, followed by the comic books of his native Belgium. His fascination with U.S. coins began when relatives traveled to Belgium, bringing with them silver dollars and a worn 1889 gold dollar. Later in life, he became a professional dealer of antique weapons, focusing on early U.S. firearms, which led to regular trips across the Atlantic.

At one such show in the mid-1980s, Mr. Devos came across a proof 1889 gold dollar and he bought it on the spot. Though U.S. proof gold was too expensive for him to collect while he was starting a family, he assembled a coin library, visited museums, and used the Internet to learn more about the coins. A few years ago, he began building a world-class collection of proof gold dollars with the assistance of several dealers and auctioneers.

Mr. Devos wishes to extend special thanks to Todd Imhof, Douglas Winter, and Mary Sauvain for their assistance in putting together his collection. He and his family are relocating to the United States in 2013, and he is selling the coins to pay for the move and a new home.

The Steve Reed Collection

The Morgan dollars form one of the most popular – and most challenging – U.S. coin series to straddle the 19th and 20th centuries. Steve Reed was more than up to the challenge, as demonstrated by this magnificent collection. From among the half-dozen Steve Reed Collection highlights in the pages of Platinum Night, the 1893-S dollar, MS64 NGC, is a superstar. His 1894-O Morgan dollar, MS65 NGC, is a condition rarity that is persistently underrated because of the many low-mintage dates around it. For absolute rarity, few Morgan dollars can top his specially made branch-mint 1896-O dollar, SP63 NGC, while his 1880-CC dollar, MS67 Prooflike NGC, is a glittering Carson City condition rarity that must have spent decades undisturbed in the Treasury's holdings.

The Richmond Hill Collection

The collector behind The Richmond Hill Collection was born in 1920 in New York City. As a young man, he observed firsthand as the last gold coins used in circulation were discontinued during the Depression. He prized precious metals as a true measure of value, and in the 1970s he used his savings to pursue and acquire better gold and silver numismatic material. He was a true student of coin history.

A veteran, he was in the Merchant Marine service during World War II and established a career as a Fireman with the City of New York. Later, he sailed as a Marine Engineer. Away from work, he enjoyed entertaining people with his one-man band, filming home movies, and gardening. His children are grateful, not only for his service to the nation, but also thankful for the way he preserved a valuable part of U.S. history in some of the rare coins in his collection. His heirs now pass on his collection to others so that a new generation can appreciate and enjoy his numismatic legacy.

The Teich Family Collection

The Teich Family Collection began in 1952, following a chance encounter between Dr. Samuel Teich (and his family) and the coin-collecting owner of their vacation motel. An Indian cent rolling across the floor gave rise to hours of conversation with the Teichs and their three sons – and the result was a lifetime pursuit of these fabulous pieces of history. Serious collecting began a short time later when Dr. Teich and his wife Beatrice met Robert Friedberg in the coin department at Gimbels in New York City. The couple bought albums for themselves and their three sons, and the acquisition of their many treasures began in earnest. The Teichs also worked with other major dealers, and over time became numismatic connoisseurs with an eye for quality.

The sons of Dr. Samuel and Beatrice Teich grew up in the hobby, as their searches graduated from pocket change to thousands of rolls carried back-and-forth from local banks. At this time, even key coins could be found in circulation with diligent searching, and each tantalizing find was placed into their albums with celebration. With increased sophistication came increased pursuit of important rarities at auction or from dealer inventory, but it was always a family adventure – two generations of collecting excitement by the Teich family.

The David Poole Collection of Silver Washington Quarters

The David Poole Collection of Silver Washington Quarters features 93 high-grade regular issues and major varieties, from the inception of the series in 1932 through the last silver issue of 1964. Dr. Poole assembled the set with care and deliberation, beginning in 2001, with significant and critical assistance from major fellow collectors with discerning eyes, including Craig Norris, Warren Segura, Mat Mullen, Tom Schiera, and Tom Bush. It was #1 in the PCGS Registry from 2006 through 2011 and remains among the finest ever assembled, featuring no less than 50 “top pop” coins, including 10 designated by PCGS as (1/0), uniquely finest. Almost every coin has received a CAC label as well. Remarkable toning adorns several pieces, including the 1939-P, the 1941-P, the 1953-S, and particularly the glorious 1949-P. Those fortunate enough to view the set in its entirety before the auction will be treated to an exquisite visual experience. No doubt many of these coins are about to pass into strong hands, not to be seen on the market again for decades.

The Hilltop Collection

The consignor started collecting as an 11-year-old with a friend down the street from his home. He recalls, “We would go to the bank and get rolls of coins to search through. In the 1950s there were lots of wheat cents still available. Our seed money came from mowing lawns, paper routes, fixing cars, and shoveling snow. In a suburb north of Syracuse, New York, there was plenty of that to go around!”

The consignor became a part-time dealer in 1970 and grew to doing shows thereafter. His other job was teaching high-school juniors and seniors precision-engine machine-shop skills, such as grinding and balancing crankshafts, cylinder boring, valve work, and milling blocks and heads. Many of his students had race cars, and together they built many racing engines for upstate New York racing competitors. He was involved with Super Modified racing at Oswego Raceway, building race cars and engines while on a pit crew. Several of his students now have successful engine-building businesses of their own.

The consignor notes: “Coin collecting offered many thrills, good friends, and satisfaction for all these years, but now it’s time to lessen the load and do some traveling or whatever my wife wants to do! I feel like I’ve been very successful as a blue-collar guy!” One look at the coins in The Hilltop Collection, and you will agree.

The Richard P. Ariagno, M.D. Collection

Dr. Richard P. Ariagno became interested in coins at age ten, when his mother gave him a copy of B. Max Mehl’s *Star Rare Coin Encyclopedia* and a few old coins she had saved. Later, he received Wayte Raymond’s *Coins of the World* and various foreign pieces that his father had obtained in the course of business. He set aside his collecting interests during World War II and his subsequent course through college and medical school, but after he began his distinguished career as a Chicago-area plastic surgeon, he began pursuing coins in earnest. The people, places, and events that they represented were a source of great fascination.

Dr. Ariagno collected coins from all around the world, but he also built a considerable cabinet of U.S. coinage. His Round and Octagonal 1915-S Panama-Pacific commemoratives, both graded MS65 PCGS, appear in our Platinum Night session, while his 1907 High Relief double eagle, also a PCGS Gem, is a highlight of this catalog.

Additional Offerings From The Liberty Collection

Heritage's offering of rarities from this exclusive collection continue with a 1796 half dollar, 16 Stars obverse, AU55 PCGS; a 1792 half dime, MS64 PCGS; and a 1797 dime, 16 Stars obverse, MS65 PCGS, the Menjou/Pittman specimen. As always, The Liberty Collection delivers on both selectivity and quality in important early U.S. coinage.

The Atlanta Collection

Elite Franklin half dollars are the cornerstone of The Atlanta Collection, including a 1950 example in PR67 Cameo PCGS and a 1952 in PR67 Ultra Cameo NGC. With the full range of dates to choose from, connoisseurs of mid-20th century coinage will find The Atlanta Collection as sweet as a ripe Georgia peach.

The Douglas Collection

Compact but impressive, The Douglas Collection focuses on rarity of the highest order. It is telling that a PR67 Cameo NGC 1895 Morgan dollar and an MS66 NGC 1907 High Relief, Flat Rim double eagle are among the *more common* items in the collection! The cornerstone of The Douglas Collection is a magnificent NGC-certified 16-piece aluminum proof set of 1868, one of only a handful kept intact, with grades ranging from PR63 to PR67 Cameo.

The Dr. James Olsen Collection

One high-grade 19th century proof set is impressive enough, but two in gold? The Dr. James Olsen Collection offers exactly that. His 1862 proof set is complete in gold, while his 1877 proof set adds minor and silver pieces. The flagship coins of the two proof sets are the impressive double eagles, the 1862 graded PR64 Cameo NGC and the 1877 PR65 Ultra Cameo NGC.

The Flagg Family Collection

The Flagg Family Collection was built over multiple years with both collector rarity and investment potential in mind. The highlight of the collection, an 1881 three dollar gold piece graded PR66 Cameo NGC, has its own page in our prestigious Platinum Night session. Additional Platinum Night highlights include an 1879 three dollar gold piece, MS65 NGC, and an 1811 half eagle with Small 5 reverse, BD-2 variety, MS63 NGC.

The Gensch Numismatic Trust Collection

In addition to an extensive collection of U.S. Currency, The Gensch Numismatic Trust Collection contains U.S. Coins. Type dates, such as the 1908 No Motto and 1927 in the Saint-Gaudens double eagle series, are well-represented. Please see our Currency catalog for more information about The Gensch Numismatic Trust Collection.

The Greensboro Collection, Part II

After a remarkable debut at Heritage's Official Auction of the 2012 National Money Show in Dallas, The Greensboro Collection returns with Part II in the 2013 FUN Auction. For Part II, the focus is on proof half dollars, Bust and Seated, and proof large cents. As with Part I, selected rarities from outside the categories also appear, most notably the SP67 PCGS 1792 Half Disme, previously from the Starr Collection.

The J.D. Tanner Collection

Classic "collector coins" are the heart of The J.D. Tanner Collection. The top copper highlight is a 1969-S Doubled Die Obverse cent, AU55 PCGS; in silver, an 1896-S Barber quarter, MS65 NGC; and in gold, an 1879 Flowing Hair Stella, PR58 PCGS. Additional highlights include an 1895 Morgan dollar, PR60 NGC, and a 1907 High Relief, Wire Rim double eagle, MS63 PCGS.

The John W. Adams Collection

In our 2012 FUN Auction, Heritage had the privilege of presenting The John W. Adams Collection of French and Indian War Medals, a groundbreaking offering of part of a collection more than half a century in the making. This year, we are honored to continue with a collection of Betts and related medals, painstakingly put together with a number of pieces unique or nearly so. In that category is the centerpiece of the collection, the Betts-35 Cecil Calvert Maryland Map Medal, unique with loop and believed to be the first Indian Peace Medal used as such in North America.

The SPQR Collection of CAC Gold Sticker Coins

This fascinating collection of more than 300 certified coins has a noteworthy unifying thread: each piece, from patterns to commemoratives to federal issues, has received a gold sticker from CAC, indicating that each exceeds CAC's standards for the grade on the holder. We expect considerable action and plenty of surprises as collectors vie for these once-underrated pieces.

The Victoria Rose Collection

The Victoria Rose Collection is as elegant as the grandmother for whom its consignor named it. Every one of the 15 coins appears in Platinum Night, and the name Victoria Rose signals quality wherever it appears. Special highlights include an 1879 Flowing Hair Stella in gold, PR66 Cameo NGC, and a 1932 double eagle, MS66 NGC.

The Walter Freeman Collection of Three Cent Silvers

Near-complete collections of both Mint State and proof three cent silvers are more than the sum of their parts, hence our honor in presenting the collection in its own section. An individual highlight is the magnificent 1854 three cent silver, PR65 NGC, formerly of the Garrett Collection.

The Wes Rasmussen Collection

Wes Rasmussen is a name that should need no introduction, but just in case, he is a past President of Early American Coppers who was the 12th person in history to assemble a complete Sheldon-numbered variety set of 1793 to 1814 large cents (excluding Sheldon-79). For collectors of the series, he is a true legend. Heritage was honored to offer his main collection in January 2005, and eight years later, he has returned with selected additional 1793 large cents and other coins. His 1793 Sheldon-1 AMERI. Chain cent, AU53 PCGS, is a highlight emblematic of the all-around quality shown by this continuation of Rasmussen's collecting.

The Western Reserve Collection

A fantastic complete set of Walking Liberty half dollars forms the core of The Western Reserve Collection, currently the #1 Walking Liberty Half Dollars Complete Variety Set, Circulation Strikes. Eight early issues represent the collection in our special Platinum Night catalog, including a 1919-S, MS65 PCGS, and a 1921, MS65 PCGS. In the main catalog, a 1946 Doubled Die Reverse, MS65 PCGS, CAC, holds considerable appeal for variety collectors.

As with all of our auctions, you have many different ways to participate in our fabulous FUN U.S. Coins event: pre-auction bids through HA.com, mail, fax, and e-mail, as well as day-of bidding via telephone and our award-winning online system, Heritage LIVE!™ Of course, if you can make the trip and would like to place your bids in person, then attending the annual FUN Convention is always an educational and worthwhile experience. If you do, remember to stop by our booth on the Bourse and say hello!

If you think you could use a little extra guidance or have any questions about the items being offered herein, you are encouraged to contact us for our most thoughtful and candid advice. You have our best wishes for tremendous success. Good luck!

Sincerely,

Greg Rohan

SESSION ONE

Floor, Telephone, Heritage Live!®, Internet, Fax, and Mail Signature® Auction # 1181
Wednesday, January 9, 2013 | 12:00 PM ET | Orlando | Lots 3001 - 3545

A 17.5% Buyer's Premium (\$14 minimum) Will Be Added To All Lots

To view full descriptions, enlargeable images and bid online, visit HA.com/1181

FLYING EAGLE CENTS

- 3001 1857 MS64 ANACS.** A chestnut-gold near-Gem with satin luster and unabraded surfaces. A good strike except on OF. Minor mint-made strike-throughs are noted above the date. The reverse is misaligned a couple of degrees toward 6:30. NGC ID# 2276, PCGS# 2016, CoinPlex ID# FEC1857
- 3002 1857 MS64 PCGS.** Eagle Eye Photo Seal, card included. A lustrous and boldly struck wheat-gold near-Gem. Devoid of noticeable contact though minute flecks are distributed. Encased in a first generation holder. PCGS# 2016, NGC ID# 2276, CoinPlex ID# FEC1857
- 3003 1857 MS64 NGC.** This meticulously struck near-Gem has pleasing luster and attractive straw-gold toning. Smooth aside from shallow strike-throughs (as produced) inside the wreath.
Ex: Southwest Collection (Heritage, 2/2008), lot 3039, which realized \$1,150. NGC ID# 2276, PCGS# 2016, CoinPlex ID# FEC1857
- 3004 1857 MS64 PCGS.** This near-Gem exhibits attractive golden-copper color on both sides. The obverse displays a spot above the T in CENT. A rim die break appears between 12 o'clock and 3 o'clock on the reverse. That side also reveals die chips at the F in OF and M in AMERICA. PCGS# 2016, NGC ID# 2276, CoinPlex ID# FEC1857
- 3005 1857 MS64 PCGS. CAC.** Trivial surface marks only slightly impact the grade of this near-Gem. The devices are boldly detailed with brilliant reddish-tan surfaces and pale gold toning. Both sides have satin luster with faint field reflectivity.
From The Teich Family Collection. PCGS# 2016, NGC ID# 2276, CoinPlex ID# FEC1857
- 3006 1857 MS64 NGC. CAC.** Yellows, browns, and reds add to the visual appeal of this well-struck near-Gem. The piece displays a few surface marks that are minor in nature. NGC ID# 2276, PCGS# 2016, CoinPlex ID# FEC1857

Gem 1857 Flying Eagle Cent Lustrous Original Surfaces

- 3007 1857 MS65 NGC.** This attractive Gem is sharply detailed on the obverse, but a few elements of the wreath show a touch of softness on the reverse. The surfaces retain their original copper-red color, with no sign of carbon, and vibrant mint luster on both sides. NGC has graded only 14 numerically finer examples (11/12). NGC ID# 2276, PCGS# 2016, CoinPlex ID# FEC1857
- 3008 1857 MS65 NGC. Snow-3, FS-105.** UNITED STATES OF AMERICA is nicely die doubled. Honey-gold and olive-green grace this lustrous and sharply struck Gem. Devoid of contact, though one subtle spot is concealed above the eagle's breast. The variety is undesignated on the former generation holder. NGC ID# 2276, PCGS# 2016, CoinPlex ID# FEC1857

- 3009 1858 Large Letters MS64 PCGS. CAC.** Low Leaves, Open E in ONE. A better reverse subtype for this final Flying Eagle date. Sharply struck and coruscating with a mark-free appearance and rich orange-gold and plum-red color. PCGS# 2019, NGC ID# 2277, CoinPlex ID# FEC1858LL

1858 Flying Eagle Cent, MS65 Large Letters Variant

- 3010 1858 Large Letters MS65 PCGS.** High Leaves, Closed E in ONE. Much of the original "white" color of the copper-nickel alloy remains, but there is also a slight presence of reddish patina on the reverse. The strike details are strong, but not quite complete with the tail feathers of the eagle missing a bit of definition. The Flying Eagle series is a short but completable one for almost any collector.
From The Richard P. Ariagno, M.D. Collection. PCGS# 2019, NGC ID# 2277, CoinPlex ID# FEC1858LL

Gem Large Letters 1858 Cent Well-Struck Surfaces

- 3011 1858 Large Letters MS65 NGC.** High Leaves, Closed E in ONE. Unlike most Flying Eagle cents, the present Gem is well-struck on the cotton leaves and tail feathers. The coruscating apricot-gold surfaces are nearly void of contact, though the obverse shows faint carbon and a small spot at 5 o'clock. NGC ID# 2277, PCGS# 2019, CoinPlex ID# FEC1858LL
- 3012 1858 Small Letters MS64 NGC.** High Leaves Reverse. Closed E in ONE. This final-year apricot-gold type coin is remarkable from the technical perspective, since marks and carbon are essentially absent. The grade is limited solely by the typical strike. NGC ID# 2279, PCGS# 2020, CoinPlex ID# FEC1858SL
- 3013 1858 Small Letters MS64+ NGC.** Low Leaves Reverse. Open E in ONE. A lustrous orange-gold near-Gem. The strike is precise except near the left obverse border. Unimportant contact on the upper reverse field does not appear to limit the grade. NGC ID# 2279, PCGS# 2020, CoinPlex ID# FEC1858SL

- 3014 1858 Small Letters MS64 PCGS. CAC. Low Leaves Reverse. Sun-gold outlines design elements but most of this satiny representative is toned medium brown. No marks are remotely evident though the upper obverse and lower reverse borders are lightly impressed. Encapsulated in an old green label holder. PCGS# 2020, NGC ID# 2279, CoinPlex ID# FEC1858SL**

**Gem Small Letters 1858 Cent
Beautiful Multicolor Toning**

- 3015 1858 Small Letters MS65 PCGS. Low Leaves Reverse. A beautiful Gem that exhibits flashy luster and lovely pumpkin-gold, rose-red, and powder-blue toning. Fully struck and essentially unabraded, though minor mint-made strike-throughs are noted beneath the eagle's tail and near the right ribbon loop. Population: 59 in 65, 9 finer (11/12). From The Richard P. Ariagno, M.D. Collection. PCGS# 2020, NGC ID# 2279, CoinPlex ID# FEC1858SL**

**Small Letters 1858 Cent, MS65
Low Leaves Reverse**

- 3016 1858 Small Letters MS65 NGC. Low Leaves Reverse, Open E in ONE. Incorrectly attributed by NGC as a Large Letters variety due to a die crack between the AM in AMERICA. This piece offers lustrous honey-gold surfaces and a bold strike. Pristine aside from a graze beneath the E in CENT. An issue seldom seen finer than the present Gem. Certified in a prior generation holder. Ex: Long Beach Signature (Heritage, 2/2008), lot 3044, which realized \$3,220. NGC ID# 2279, PCGS# 2020, CoinPlex ID# FEC1858SL**

PROOF FLYING EAGLE CENTS

1856 Flying Eagle Cent, PR25

- 3017 1856 PR25 NGC. Snow-9. A chocolate-brown representative of this numismatic classic. Snow-9 was struck for collector sale but the coin could have been carried as a pocket piece or spent by an heir. All legends are bold and the types are clear, though the eagle's breast and the cotton leaves show expected wear. Minor marks are present but there are no distractions. An affordable example of the first and rarest small cent date. From The Hilltop Collection. NGC ID# 227A, PCGS# 2037, CoinPlex ID# FEP1856**

Snow-9 1856 Flying Eagle Cent Proof Details

- 3018 1856 — Improperly Cleaned — NGC Details. Proof. Snow-9. This sharply struck proof key date cent displays peach-gold and olive-green color and appears high grade when viewed with the unaided eye. Study beneath a loupe shows parallel hairlines on the fields along with minor obverse contact marks. The fame of the 1856 Flying Eagle cent during the late 1850s helped expand the scope of antebellum collecting. NGC ID# 227A, PCGS# 2037, CoinPlex ID# FEP1856**

Rare 1856 Flying Eagle Cent
Snow-9, PR62

- 3019 1856 PR62 PCGS. Snow-9.** A fully struck proof of the famous introductory cent issue. Small cents have been struck every year since 1856, but that date continues to reign as the low-mintage champion of the denomination. The present specimen has a different appearance on each side. The satiny obverse has deep orange-gold patina with glimpses of cherry-red and forest-green. The reverse exhibits greater field reflectivity and displays lighter wheat-gold and olive toning. Both sides are essentially unabraded, though a lens reveals three tiny strike-throughs on the obverse field. Carbon is also nearly absent, relegated to small portions of the interiors of the E and second A in AMERICA.
From The J.D. Tanner Collection. PCGS# 2037, NGC ID# 227A, CoinPlex ID# FEP1856

1856 Flying Eagle Cent, PR64
Snow-9 Restrike

- 3020 1856 PR64 PCGS. CAC. Snow-9.** The 1856 Flying Eagle cent is prized by pattern collectors and small cent specialists alike. The issue is easily the rarest date of the small cent denomination. Initially made as a pattern (Judd-180) to demonstrate the new design and small diameter to Congressmen, additional specimens were produced at later times to satisfy collector demand. The original mintage was mostly, if not entirely, struck from the Snow-3 die pair, while the restrikes were mostly from Snow-9 dies. The total number of pieces struck probably reached 2,000 examples. This well-struck near-Gem specimen displays the faint die line at I in UNITED and the center dot under the serif of N in CENT that identify the Snow-9 dies. The reflective surfaces show a mixture of copper-red and light brown hues, with minimal signs of contact. PCGS has graded 45 numerically finer specimens (11/12).
From The Teich Family Collection. PCGS# 2037, NGC ID# 227A, CoinPlex ID# FEP1856

1858 Large Letters Cent, PR64
Only 50 Pieces Believed Known Today

- 3021 1858 Large Letters PR64 PCGS. CAC. Snow-PR1.** High Leaves, Closed E. The number of proofs is estimated at 100 proofs, primarily based on the 80 silver proof sets sold plus a small number of pattern sets. The depth of mirroring in the fields make this an unmistakable proof, plus the known die markers are present (except for the file mark at 12 o'clock on the reverse). Snow estimates half the mintage exists today, or about 50 pieces. The surfaces exhibit the usual light gray base color, on this coin there is an additional presence of iridescent toning. Population: 20 in 64, 18 finer (12/12). PCGS# 2042, NGC ID# 227C, CoinPlex ID# FEP1858LL

1858 Small Letters Cent, PR64

- 3022 1858 Small Letters PR64 PCGS.** The mirrored tan surfaces of this Choice proof host iridescent toning, subdued by a slight haze. The obverse and reverse surfaces show a few small carbon spots, especially near the date. Every design element is sharply defined. Population: 38 in 64, 8 finer (11/12). From *The Teich Family Collection*. PCGS# 2043, NGC ID# 227D, CoinPlex ID# FEP1858SL

INDIAN CENTS

1859 Indian Cent, MS65
One-Year Type Coin

- 3023 1859 MS65 PCGS.** Housed in a green-label PCGS holder, this Gem Indian cent is a one-year type with no shield at the top of the wreath on the reverse. A stunning specimen, this cent is sharply detailed with complete feather tips in the headdress. Both sides exhibit satiny light tan luster with few carbon flecks. PCGS has only certified 19 finer examples (11/12). PCGS# 2052, NGC ID# 227E, CoinPlex ID# INC1859

Premium Gem 1859 Cent
No Numerically Finer Coins at PCGS or NGC

- 3024 1859 MS66 PCGS.** This golden Premium Gem has great visual appeal, with attractive luster and only a few minor spots. A lint mark appears in the field near the Indian's nose. The feather tips are a trifle weak, with bold details elsewhere. This is an impressive first-year type piece. PCGS has only graded a total of 19 pieces at this level, with only one having received a Plus designation, and neither PCGS nor NGC has assigned a higher numeric grade to a single example (11/12). From *The Richard P. Ariagno, M.D. Collection*. PCGS# 2052, NGC ID# 227E, CoinPlex ID# INC1859

- 3025 1860 MS65 PCGS.** Eagle Eye Photo Seal, card included. A lustrous copper-nickel Gem with tan centers and orange-gold borders. Fully struck and essentially free from contact. Microscopic carbon is confined to the left obverse margin. PCGS# 2058, NGC ID# 227F, CoinPlex ID# INC1860RNBUST
- 3026 1860 MS65 PCGS. CAC.** Eagle Eye Photo Seal, card included. This unabraded and coruscating Gem has a chestnut-gold obverse and a dusky olive-green reverse. The strike is full except on the 0 in the date and the upper right shield corner. In a green label holder. PCGS# 2058, NGC ID# 227F, CoinPlex ID# INC1860RNBUST

**1862 Indian Cent, MS66
Only Eight Finer at PCGS**

- 3027 1862 MS66 PCGS.** The 1862 and 1863 copper-nickel Indian cents are considered the two most common dates in the series. However, even those dates are rare in high grade. This Premium Gem has brilliant golden-tan surfaces with bold details and radiant satin luster. Trivial carbon flecks are only visible with a glass. Population: 62 in 66 (4 in 66+), 8 finer (11/12). PCGS# 2064, NGC ID# 227H, CoinPlex ID# INC1862

**1862 Copper-Nickel Cent, MS66
Original Light Color Intact**

- 3028 1862 MS66 PCGS.** Because of widespread hoarding during the Civil War, numerous examples of the 1862 cent are available today. This is a well-preserved example with the light gray-tan color intact over each side. The surfaces are remarkably well-preserved. Just a bit softly struck on the tips of the feather tips in the headdress, and showing a few minor specks of carbon. Population: 62 in 66 (4 in 66+), 8 finer (12/12).
From The Richard P. Ariagno, M.D. Collection. PCGS# 2064, NGC ID# 227H, CoinPlex ID# INC1862

Premium Gem 1862 Indian Cent

- 3029 1862 MS66 PCGS.** Always in demand because of its Civil War era status, the 1862 Indian cent is very scarce in Premium Gem condition. This spectacular coin features well-detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces show a mix of original red, lilac, and light brown patina. Population: 62 in 66 (4 in 66+), 8 finer (12/12). PCGS# 2064, NGC ID# 227H, CoinPlex ID# INC1862

**1863 Copper-Nickel Cent, MS66
No PCGS-Graded Numerically Finer Examples**

- 3030 1863 MS66 PCGS.** A crisply struck example, this cent displays pleasing mahogany surfaces. A minor die crack extends from the rim near the upper left corner of the shield to the top of the wreath. Two trivial carbon spots appear on the obverse, one in the left field, the other below the lowest feather. Population: 38 in 66 (2 in 66+), 0 finer (11/12). PCGS# 2067, NGC ID# 227J, CoinPlex ID# INC1863

Premium Gem 1863 Indian Cent

- 3031 1863 MS66 PCGS. CAC.** The obverse of this attractively detailed Premium Gem exhibits a green-gold color overall with flecks and minor spots of color also seen. Wheat-gold appears on the reverse. A few scattered minor marks appear on each side. Population: 39 in 66 (2 in 66+), 0 finer (12/12). PCGS# 2067, NGC ID# 227J, CoinPlex ID# INC1863

**1863 Copper-Nickel Cent, MS66
Lovely Color and Overall Surfaces**

- 3032 1863 MS66 PCGS. CAC.** The fields on this example are moderately reflective, and the surfaces overall have a golden cast over the whitish finish of the copper-nickel alloy. A few small specks are seen on the obverse. The strike is a tad soft on the feather tips of the headdress. Population: 39 in 66 (2 in 66+), 0 finer (12/12). PCGS# 2067, NGC ID# 227J, CoinPlex ID# INC1863

**1863 Indian Cent, MS66
In-Demand Civil War Date**

- 3033 1863 MS66 NGC. CAC.** Because silver and gold coinage no longer circulated by 1862, the Philadelphia Mint allocated most of its resources to the production of copper-nickel cents in 1863, which were produced in record numbers. Unfortunately, the cents also stopped circulating by that time. MS66 examples are rare in today's market. This impressive Premium Gem is well-detailed and brightly lustrous, with ample eye appeal. Census: 40 in 66, 2 finer (12/12). NGC ID# 227J, PCGS# 2067, CoinPlex ID# INC1863

**1864 Copper-Nickel Cent, Premium Gem
Only One Finer at PCGS**

- 3034 1864 Copper-Nickel MS66 PCGS.** This transitional issue was minted early in the year, before the composition was changed to bronze. This Premium Gem is a lovely example with bold design motifs and brilliant light tan surfaces showing satin luster. Inconsequential marks and carbon spots are only evident with a glass. Population: 15 in 66, 1 finer (11/12). PCGS# 2070, NGC ID# 227K, CoinPlex ID# INC1864CN

**1864 Copper-Nickel Cent, MS66
Above-Average Eye Appeal**

- 3035 1864 Copper-Nickel MS66 PCGS.** Attractive light grayish-tan luster emanates from both sides of this Premium Gem copper-nickel cent. The design elements are well struck, including relatively strong detail in most of the feather tips. Some minor softness is noted in the upper-right corner of the shield. A couple of minute marks are concealed within the shield. This is one of the most difficult dates in the copper-nickel series to find with attractive eye appeal. Population: 15 in 66, 1 finer (12/12). PCGS# 2070, NGC ID# 227K, CoinPlex ID# INC1864CN

- 3036 1864 Bronze No L MS65 Red PCGS.** Luminous golden-copper color adds to the visual appeal of this attractive Gem. The obverse includes splashes of red, deep pink, and green. Copper spots appear primarily on the reverse. This well-struck example is a wonderful representative of this one-year type. Minor clash marks appear on the reverse. PCGS has awarded higher numeric grades to only 35 pieces (12/12).

From The Richard P. Ariagno, M.D. Collection. PCGS# 2078, NGC ID# 227L, CoinPlex ID# INC1864BRZRD

- 3037 1864 L On Ribbon, Repunched Date MS65 Red and Brown PCGS. Snow-5, FS-2304.** The tops of the 18 exhibit noticeable repunching. Orange-gold illuminates the borders though the motifs and open fields are steel-gray. Nicely struck, satiny, and devoid of abrasions. PCGS# 2080, NGC ID# 227M, CoinPlex ID# INC1864LRB

**Premium Gem Fancy 5 1865 Indian Cent
Tied for Finest Known**

- 3038 1865 Fancy 5 MS66 Red and Brown PCGS. CAC.** Lustrous and unabraded with predominant gold color, although the cheek and left obverse field have partly mellowed in lilac tones. The tips of the headdress feathers and the lower left portion of the wreath exhibit a slightly indistinct strike. Population: 3 in 66 Red and Brown, 0 finer (11/12).

Ex: Dallas Signature (12/2005), lot 103, which realized \$1,495. PCGS# 2083, NGC ID# 227N, CoinPlex ID# INC1865RB

- 3039 1865 Fancy 5 MS65 Red PCGS.** The 1865 Indian cent with a Fancy 5 in the date is a one-year subtype that is quite popular with collectors, despite being seen with more frequency than its Plain 5 counterpart. This Gem displays bright luster and sharply detailed design elements. Small spots appear on each side. Population: 48 in 65 (1 in 65+) Red, 9 finer (12/12). PCGS# 2084, NGC ID# 227N, CoinPlex ID# INC1865RD

- 3040 1866 MS64+ Red PCGS. CAC.** A lovely high-end near-Gem Indian cent, this piece displays vibrant mint luster and sharply detailed design elements. The original red surfaces exhibit just a hint of light brown color. Population: 45 in 64 (2 in 64+) Red, 28 finer (12/12). PCGS# 2087, NGC ID# 227P, CoinPlex ID# INC1866RD

**Red Gem 1866 Cent
Green Label Holder**

- 3041 1866 MS65 Red PCGS.** Rich orange color encompasses this sharply struck, lustrous, and mark-free Gem. Carbon is negligible, and the grade appears limited solely by a hint of lilac toning on the high points. Housed in a green label holder. Population: 23 in 65 Red, 5 finer (11/12).

Ex: Long Beach Signature (Heritage, 2/2007), lot 2210. PCGS# 2087, NGC ID# 227P, CoinPlex ID# INC1866RD

**1867/67 Indian Cent, MS64 Red
Popular Repunched Date, FS-301**

- 3042 1867/67 Repunched Date MS64 Red PCGS. CAC. Snow-1, FS-301.** Well-detailed design elements and original red surfaces are the hallmarks of this popular issue with the dramatic repunched date. Repunching is most noticeable on the last two digits of the date, with the undertype easily visible to the north of the primary numerals. Vibrant mint luster adds to the considerable visual appeal. Population: 1 in 64 Red, 0 finer (11/12).
From The Teich Family Collection. PCGS# 37461

- 3043 1869 MS64 Red and Brown PCGS. CAC.** Tiny, dark sage-green speckles cover large portions of the surface of this lustrous near-Gem and create interesting visual appeal. Areas of iridescent bright pink, yellow, and green appear on ONE CENT when examined closely at a certain angle. "Longacre" doubling is present as clearly seen at UNITED. PCGS# 2095, NGC ID# 227T, CoinPlex ID# INC1869RB

Red Gem 1870 Shallow N Cent

- 3044 1870 MS65 Red NGC. FS-901. Shallow N.** The present lustrous orange-gold Gem is well struck aside from the top of the shield. The color is consistent aside from slight mellowing on the Indian's cheek. Carbon is relegated to a few pinpoint flecks near the E in ONE. Census: 12 in 65 Red, 0 finer (12/12). NGC ID# 227U, PCGS# 2099, CoinPlex ID# INC1870RD

- 3045 1871 MS64 Red and Brown PCGS. Bold N in ONE.** Myriad carbon flecks are visible with a glass on each side of this subdued red near-Gem, showing slightly faded mint color that has turned to light brown. Here is a splendid specimen with excellent eye appeal.
From The Teich Family Collection. PCGS# 2101, NGC ID# 227V, CoinPlex ID# INC1871RB

Red Gem Semikey 1871 Cent

- 3046 1871 MS65 Red PCGS. Eagle Eye Photo Seal, card included. Bold N in ONE.** An intricately impressed and highly lustrous orange-gold Gem. Marks are absent and a lens reveals only inconsequential carbon. The low mintage 1871 is a well known semikey within the widely collected Indian series. Most survivors are well circulated, and few Uncirculated examples qualify as full Red. Population: 16 in 65 Red, 2 finer (11/12). PCGS# 2102, NGC ID# 227V, CoinPlex ID# INC1871RD

- 3047 1872 MS64 Red and Brown NGC. CAC. Snow-11. Bold N.** Rick Snow describes this undesignated variety as "the base of a 1 is visible as a small nub sticking out of the neck beneath the chin." Ample orange-gold is present though the high points and open fields have mellowed to brown. Lustrous and unabraded with a good strike. NGC ID# 227W, PCGS# 2104, CoinPlex ID# INC1872RB

- 3048 1873 Open 3 MS65 Red and Brown NGC.** This better date cent is well struck and exhibits vibrant luster. The orange-red and olive surfaces are slightly mellowed. ONE CENT displays several die lumps, as made. Certified in a former generation holder. NGC ID# 227Y, PCGS# 2107, CoinPlex ID# INC1873OP3RB

- 3049 1873 Doubled LIBERTY, Closed 3 VF30 PCGS. Snow-1, FS-101.** Among the most famous die varieties of the series, superseded only by the 1888/7. Smooth chocolate-brown surfaces show moderate wear but the doubling is still evident on LIBERTY and the Indian's eye.
From The J.D. Tanner Collection. PCGS# 2115, CoinPlex ID# INC1873DBLIBERTYBN

**Famous Snow-1 Doubled LIBERTY
1873 Closed 3 Cent, AU Details**

- 3050 1873 Doubled LIBERTY, Closed 3 — Improperly Cleaned — NGC Details. AU. Snow-1, FS-101.** All letters in LIBERTY are strongly die doubled, which distinguishes FS-101 from the lesser but still desirable FS-102. Liberty's profile and eye also exhibit an impressive spread. Fully defined and satiny. No marks are remotely consequential, though the deep walnut-brown toning was deemed suspicious by NGC. PCGS# 2115, CoinPlex ID# INC1873DBLIBERTYBN

- 3051 1877 VF20 PCGS.** Even wear and attractive color provide this key date example with lovely eye appeal. Only 852,500 Indian Head cents were produced in 1877 and many of them were redeemed due to issues with the economy, leaving fewer survivors than might be expected given the production number. PCGS# 2127, NGC ID# 2284, CoinPlex ID# INC1877BN

- 3052 1877 VF25 NGC.** This is a lovely circulated example at this grade level, with overall even color and wear among the attributes. As expected given this level of circulation, surface marks are present, but they are not overly distracting. *From The Hilltop Collection.* NGC ID# 2284, PCGS# 2127, CoinPlex ID# INC1877BN
- 3053 1877 VF25 NGC.** A lovely representative of the rarest date in the Indian Head series, this coin displays medium brown color and even wear. There are no contact marks worthy of mention. NGC ID# 2284, PCGS# 2127, CoinPlex ID# INC1877BN
- 3054 1877 VF30 NGC.** Although the reverse primarily displays medium brown color, the obverse features a variety of colors. Shades of green, yellow, and orange are visible when the coin is closely examined and rotated under a light source. Numerous contact marks appear, with the obverse displaying more than the reverse. NGC ID# 2284, PCGS# 2127, CoinPlex ID# INC1877BN
- 3055 1877 VF30 NGC.** Mottled shades of brown appear on the obverse while the reverse displays a satiny medium brown. A scratch extends from the lower left tip of the E in UNITED to an area near the base of the Indian's neck. Two small depressions appear near the top portion of the obverse and the reverse includes a few small areas as well. This is a midrange representative of this key-date Indian cent. NGC ID# 2284, PCGS# 2127, CoinPlex ID# INC1877BN
- 3056 1877 XF40 NGC.** Attractive smooth, medium brown surfaces grace both sides of this example that exhibits only grade-consistent marks. The major design elements are clearly visible, although much of the fine detail no longer remains, as expected at this grade level. This is a lovely representative of the rarest date in the series. NGC ID# 2284, PCGS# 2127, CoinPlex ID# INC1877BN
- 3057 1877 XF45 NGC.** A moderately circulated example of this key date Indian Head cent, this piece exhibits medium brown color with a somewhat wood grain appearance on the reverse. A number of contact marks appear on both sides. NGC ID# 2284, PCGS# 2127, CoinPlex ID# INC1877BN
- 3058 1877 — Improperly Cleaned — NGC Details. AU.** Shallow N in ONE. A sharp and unmarked example of the famous low mintage date, but recolored at one time, and displaying rose-red and olive-green shades incompatible with the grade. NGC ID# 2284, PCGS# 2127, CoinPlex ID# INC1877BN

**1877 Indian Cent, AU53
Lowest Philadelphia Mintage**

- 3059 1877 AU53 NGC.** Collectors need no introduction to the 1877 Indian cent, the key issue in the series, and the only Philadelphia Indian cent with a sub-million coin mintage. Only the 1909-S Indian cent had a lower mintage. This pleasing AU specimen has inconsequential marks with attractive chestnut-brown surfaces. NGC ID# 2284, PCGS# 2127, CoinPlex ID# INC1877BN

Choice AU 1877 Key Date Cent

- 3060 1877 AU55 NGC. CAC.** A Choice AU example, this piece displays attractive medium brown surfaces with consistent color throughout that lend eye appeal to this example. The surfaces exhibit minor abrasions. This is a nice representative of the rarest date in the Indian Head series. NGC ID# 2284, PCGS# 2127, CoinPlex ID# INC1877BN

Uncirculated Details 1877 Cent

- 3061 1877 — Improperly Cleaned — NGC Details. Unc.** Shallow N in ONE, characteristic of business strikes for this key date. This satiny and well defined representative shows only unimportant contact, but the surfaces are somewhat glossy. The color is blended and intermediate between orange-gold and gunmetal-gray. NGC ID# 2284, PCGS# 2127, CoinPlex ID# INC1877BN

Red and Brown MS63 1877 Cent

- 3062 1877 MS63 Red and Brown PCGS Secure.** Although slightly over 850,000 cents were struck in 1877, the number of survivors is unusually low. Variegated, iridescent fiery-red and copper-orange colors with hints of teal dominate both sides of this well-struck Select Mint State example. PCGS# 2128, NGC ID# 2284, CoinPlex ID# INC1877RB

**Gem Red and Brown 1877 Cent
Eagle Eye Photo Seal With Card**

- 3063 1877 MS65 Red and Brown PCGS.** Eagle Eye Photo Seal, card included. Shallow N, characteristic of business strikes of this low-mintage key date. This lustrous Gem is well-struck at the centers, while peripheral elements show only minor incompleteness. There are no abrasions, and carbon is surprisingly minimal. One unimportant strike-through is seen just inside the wreath to the left of the O in ONE. Peach-gold color is plentiful, and the coin is certainly more Red than Brown, though a hint of steel-gray toning on the cheek and open obverse field denies a full Red assessment. The MS65 Red and Brown grade provides perhaps the best combination of quality and value for this famous issue. PCGS# 2128, NGC ID# 2284, CoinPlex ID# INC1877RB
-

**1877 Indian Head Cent, MS65 Red and Brown
Prized Key to the Series**

- 3064 1877 MS65 Red and Brown PCGS Secure.** A Gem Red and Brown example of this key-date Indian cent issue, with a modest mintage of 852,500 pieces, is an excellent compromise for many collectors for whom a full Red Gem specimen is simply out of the question for budgetary reasons. (In addition, they are extremely difficult to find, and many are held in strong hands.) The present Red and Brown Gem piece is generally well-struck, displaying areas of original orange, sand-tan, and brown coloration. Only 17 examples have been assigned higher numeric grades by PCGS and NGC combined (11/12). PCGS# 2128, NGC ID# 2284, CoinPlex ID# INC1877RB
-

**1877 Indian Cent, MS65 Red and Brown
Only Three Numerically Finer Coins at PCGS**

3065 1877 MS65 Red and Brown PCGS. CAC. The 1877 Indian cent is the rarest and most sought-after business-strike issue of the series, from a mintage of just 852,500 pieces. The 1877 is actually even more difficult to locate than the small production total suggests, and the low survival rate has caused some numismatists to speculate that some of the coins in the reported mintage were actually dated 1876.

The present coin is a delightful Gem example of this low-mintage key, with sharply detailed design elements and lightly marked original red surfaces that show a few hints of light brown. Vibrant mint luster adds to the outstanding visual appeal. Population: 59 in 65 (1 in 65+) Red and Brown, 3 finer (11/12). From *The Teich Family Collection*. PCGS# 2128, NGC ID# 2284, CoinPlex ID# INC1877RB

3066 1878 MS65 Red PCGS. A boldly struck and coruscating peach-red Gem. Mark-free and exemplary despite one tiny fleck above the cheekbone and a trivial reverse spot at 1 o'clock. Housed in an old green label holder. PCGS# 2132, NGC ID# 2285, CoinPlex ID# INC1878RD

**1879 Indian Cent, MS66 Red
Scarcer Early Issue**

3067 1879 MS66 Red PCGS. Cents from the 1870s are generally not found with such nice color as seen here. Each side displays rich, original red color with an accent of pale lilac at the margins. The strike is especially strong and can be termed full with complete feather tips on the headdress and complete shield lines. Population: 15 in 66 Red, 2 finer (12/12).

From *The Richard P. Ariagno, M.D. Collection*. PCGS# 2135, NGC ID# 2286, CoinPlex ID# INC1879RD

3068 1881 MS65 Red PCGS. CAC. The vibrant red surfaces of this spectacular Gem combine with an exemplary strike to produce outstanding eye appeal. A few minor die clash marks appear on the reverse. In spite of the large mintage of 39 million pieces, the issue is quite scarce in MS65 Red. Population: 73 in 65 (1 in 65+) Red, 28 finer (11/12). PCGS# 2141, NGC ID# 2288, CoinPlex ID# INC1881RD

3069 1883 MS65 Red PCGS. Eagle Eye Photo Seal, card included. An orange-gold Gem. Lustrous and crisply struck with an absence of marks and only minor carbon. One small mint-made strike-through between the EN in CENT. PCGS# 2147, NGC ID# 228A, CoinPlex ID# INC1883RD

3070 1884 MS65 Red PCGS. Eagle Eye Photo Seal, card included. Peach-gold and olive-green shades dominate this lustrous and mark-free Gem. The surfaces have an orange peel texture, as made from long in use dies. Certified in a green label holder. Population: 36 in 65 Red, 16 finer (11/12). PCGS# 2150, NGC ID# 228B, CoinPlex ID# INC1884RD

**1884 Indian Cent, MS66 Red
Pristine Surfaces**

3071 1884 MS66 Red PCGS. A boldly detailed Premium Gem, this 1884 cent is an extraordinary specimen with nearly flawless surfaces, showing brilliant deep orange mint color and satin luster. The fields exhibit faint reflectivity to heighten its eye appeal. Population: 13 in 66 (1 in 66+) Red, 3 finer (11/12).

From *The Richard P. Ariagno, M.D. Collection*. PCGS# 2150, NGC ID# 228B, CoinPlex ID# INC1884RD

3072 1885 MS65 Red PCGS. Eagle Eye Photo Seal, card included. The rich orange-red surfaces teem with luster. The reverse center has a hint of rose color and a couple of tiny freckles of navy-blue. Mark-free and crisply struck with outstanding eye appeal. PCGS# 2153, NGC ID# 228C, CoinPlex ID# INC1885RD

3073 1885 MS65 Red PCGS. Remarkable color for a cent from the 1880s with even red mint luster over both sides. Sharply struck and essentially problem-free with only the slightest specks present. Population: 56 in 65 Red, 10 finer (12/12).
From *The Richard P. Ariagno, M.D. Collection*. PCGS# 2153, NGC ID# 228C, CoinPlex ID# INC1885RD

3074 1887 MS65 Red PCGS. This is an attractive and well-struck Gem. Small areas of iridescent toning appear on ONE CENT. A number of tiny carbon spots are visible on both sides. Population: 57 in 65 Red, 18 finer (11/12).
From *The Richard P. Ariagno, M.D. Collection*. PCGS# 2159, NGC ID# 228F, CoinPlex ID# INC1887RD

3075 1888 MS65 Red PCGS. Eagle Eye Photo Seal, card included. Lustrous and nearly unabraded. Well struck save for unimportant incompleteness on the shield and bust truncation. The fire-red color is seamless throughout, aside from a tiny areas of aqua color on the eyebrow and on the lower right border of the E in ONE. Population: 29 in 65 Red, 13 finer (11/12).
Ex: *Dallas Signature (Heritage, 11/2005)*, lot 219, which realized \$2,875. PCGS# 2168, NGC ID# 228G, CoinPlex ID# INC1888RD

**Very Good 1888/7 Cent
Key Snow-1, FS-301 Overdate**

3076 1888/7 VG8 NGC. Snow-1, FS-301. The key die variety of the Indian cent series. The rare overdate is identified in the present grade by the date location and a vestige of the base of a 7 on the left bottom of the third 8. This olive-brown example has bold peripheral legends and ample line definition on the shield. Moderate marks are noted near the nose and the O in OF NGC ID# 228G, PCGS# 2169, CoinPlex ID# INC188OVR87BN

3077 1889 MS65 Red NGC. This attractive Gem representative displays copper-gold luster. Purple, pink, and blue accents appear on the Indian's eyebrow, nose tip, and ear on the obverse along with areas of the feather tips and OF AMERICA. Portions of the bow at the bottom of the wreath on the reverse display splashes of denim blue. Census: 58 in 65 Red, 2 finer (12/12). NGC ID# 228H, PCGS# 2174, CoinPlex ID# INC1889RD

3078 1890 MS65 Red PCGS. This lustrous and boldly struck Gem is fire-red and uncommonly void of spots or marks. The pedigree of a fine collection further increases its importance. Housed in a green label holder. Population: 45 in 65 Red, 8 finer (11/12).
Ex: *Robert R. Rollins Collection, Part Two (Heritage, 6/2008)*, lot 163, which realized \$1,610. PCGS# 2177, NGC ID# 228J, CoinPlex ID# INC1890RD

3079 1894 MS65 Red PCGS. Eagle Eye Photo Seal, card included. This lustrous orange-gold Gem has a sharp strike and only a few minute obverse flecks. Housed in a green label holder. Population: 65 in 65 (1 in 65+) Red, 24 finer (11/12). PCGS# 2189, NGC ID# 228N, CoinPlex ID# INC1894RD

3080 1894 MS65 Red PCGS. CAC. Vivid deep orange color graces the surfaces of this Gem representative of a popular date in the series. This is a lovely high-grade example exhibiting only a few copper spots and contact marks. Areas of orange peel texture due to the state of the dies when struck appear. Population: 65 in 65 (1 in 65+) Red, 24 finer (12/12).
From *The Richard P. Ariagno, M.D. Collection*. PCGS# 2189, NGC ID# 228N, CoinPlex ID# INC1894RD

3081 1894 Doubled Date MS62 Brown NGC. Snow-1, FS-301. The date is widely repunched with obvious outlines of all four digits from the initial logotype impression. Crisply struck and lustrous with moderate marks. The obverse is mostly sea-green while the reverse is olive-brown with glimpses of lilac-red and orange. PCGS# 92187, CoinPlex ID# INC1894DDBN

3082 1896 MS65 Red PCGS. CAC. This is an attractive, nicely struck Gem example with good color and minimal contact marks. It is easy to see why this piece earned the CAC seal. Population: 49 in 65 Red, 12 finer (12/12).
From *The Richard P. Ariagno, M.D. Collection*. PCGS# 2195, NGC ID# 228R, CoinPlex ID# INC1896RD

3083 1897 MS65 Red PCGS. An attractive bright orange example, this Gem includes splashes of lilac and pink on the obverse. Tiny copper spots appear on both sides. This piece resides in a green label holder. Population: 54 in 65 Red, 16 finer (12/12).
From *The Richard P. Ariagno, M.D. Collection*. PCGS# 2198, NGC ID# 228S, CoinPlex ID# INC1897RD

**1897 One Cent, MS66 Red
Gorgeous Eye Appeal**

3084 1897 MS66 Red PCGS. CAC. The lustrous yellow-gold surfaces of this Premium Gem display whispers of soft crimson and have been impeccably preserved. Crisp definition is apparent on the design elements with the sole exception of the typical weakness in some of the feather tips. This piece exudes gorgeous overall eye appeal. Population: 15 in 66 (1 in 66+) Red, 1 finer (12/12). PCGS# 2198, NGC ID# 228S, CoinPlex ID# INC1897RD

Pleasing MS66 Red 1898 Cent

3085 1898 MS66 Red PCGS. CAC. A deep honey-gold color envelops both sides of this Premium Gem, with a few splashes of russet and deep plum appearing on the reverse. Both sides exhibit a few small copper spots. This lovely coin resides in a green label holder. Population: 55 in 66 (2 in 66+) Red, 8 finer (12/12).
From *The Richard P. Ariagno, M.D. Collection*. PCGS# 2201, NGC ID# 228T, CoinPlex ID# INC1898RD

3086 1899 MS66 Red PCGS. A peach-red Premium Gem that boasts dynamic luster and a bold strike. The cheek displays deep cherry tints. Void of marks, and only minute carbon is present. Housed in a first generation holder. Population: 85 in 66 Red, 12 finer (12/12). PCGS# 2204, NGC ID# 228U, CoinPlex ID# INC1899RD

3087 1899 MS66 Red PCGS. CAC. Eagle Eye Photo Seal. The eye appeal of this cent is undeniable. The coin exhibits a pleasing frosted luster and attractive color. Copper spots appear, but they are tiny other than one spot to the left of the right portion of the wreath. This piece resides in a green label holder. Population: 85 in 66 Red, 12 finer (12/12).

From The Richard P. Ariagno, M.D. Collection. PCGS# 2204, NGC ID# 228U, CoinPlex ID# INC1899RD

3088 1900 MS66 Red PCGS. Brilliant orange color and attractive luster add to the eye appeal of this Premium Gem. A few small spots of red color appear. Large areas of the surfaces on both sides exhibit an as-struck orange-peel texture due to die erosion. A few toning spots occur on the virtually unmarked surfaces. Population: 76 in 66 (6 in 66+) Red, 6 finer (12/12). PCGS# 2207, NGC ID# 228V, CoinPlex ID# INC1900RD

3089 1900 MS66 Red PCGS. CAC. Eagle Eye Photo Seal. As the accolades would indicate, this Premium Gem example displays tremendous eye appeal. The details are sharply defined and both sides exhibit attractive color. This piece resides in a green label holder. Population: 76 in 66 (6 in 66+) Red, 6 finer (12/12).

From The Richard P. Ariagno, M.D. Collection. PCGS# 2207, NGC ID# 228V, CoinPlex ID# INC1900RD

3090 1900 MS66 Red PCGS. CAC. This lovely Premium Gem possesses tremendous eye appeal. The color is almost uniformly a vibrant deep orange on both sides. A few minor surface marks and spots do little to diminish the attractiveness of this piece. Population: 76 in 66 (6 in 66+) Red, 6 finer (12/12). PCGS# 2207, NGC ID# 228V, CoinPlex ID# INC1900RD

3091 1901 MS66 Red PCGS. The quality and beauty of this fully brilliant Premium Gem will appeal to both date and type collectors. Both sides exhibit frosty orange surfaces and excellent design definition. A few small carbon spots appear. Although not a rare date, few finer pieces have been certified. Population: 56 in 66 (3 in 66+) Red, 2 finer (11/12).

Ex: St. Louis Central States Signature (Heritage, 5/2007), lot 1129. PCGS# 2210, NGC ID# 228W, CoinPlex ID# INC1901RD

3092 1903 MS66 Red PCGS. Eagle Eye Photo Seal, card included. A delightful orange-red Premium Gem that boasts potent luster and nearly immaculate preservation. A good strike with only slight blending on the shoulder curl. PCGS# 2216, NGC ID# 228Y, CoinPlex ID# INC1903RD

3093 1903 MS66 Red PCGS. Beautiful pumpkin-gold color is the primary attribute of this lustrous and sharply struck cent. Mark-free though some pinpoint flecks are scattered. Certified in a green label holder. Population: 68 in 66 (3 in 66+) Red, 5 finer (11/12). PCGS# 2216, NGC ID# 228Y, CoinPlex ID# INC1903RD

3094 1905 MS66 Red PCGS. Eagle Eye Photo Seal, card included. Beautiful peach-red color dominates aside from a hint of olive-green on the cheek and the reverse high points. Highly lustrous and carbon-free with only minimal obverse grazes. Population: 40 in 66 Red, none finer (11/12). PCGS# 2222, NGC ID# 2292, CoinPlex ID# INC1905RD

1908-S Cent, MS66 Red and Brown A Scarce and Popular Issue

3095 1908-S MS66 Red and Brown PCGS. Orange-gold luster abounds on this Premium Gem, imbued with a few traces of sky-blue. The design elements are sharply struck except for the usual softness in the feather tips. A minute diagonal mark in the upper shield is mentioned only because it might help identify the coin. This is a scarce and popular issue. Population: 7 in 66 (1 in 66+) Red and Brown, 0 finer (12/12). PCGS# 2233, NGC ID# 2296, CoinPlex ID# INC1908SRB

Gem Red 1908-S Indian Cent

3096 1908-S MS65 Red PCGS. A Gem Red example of the always popular first-year San Francisco Mint small cent, but the 1908-S is perhaps underrated due to the fervent demand for 1909-S cents of both Indian and Lincoln designs. This lovely example displays bright, blazing original orange-red surfaces with a few trivial carbon spots. PCGS# 2234, NGC ID# 2296, CoinPlex ID# INC1908SRD

Radiant Gem 1908-S Cent

3097 1908-S MS65 Red PCGS. A crisply struck Gem with radiant lime-gold and peach toning and virtually unmarked surfaces, save for a couple of tiny nicks near Liberty's nose and chin. The reverse border has a tiny carbon fleck just above 8 o'clock. A low-mintage issue, and also the first branch mint Indian cent. *Ex: Dallas Signature (Heritage, 11/2003), lot 5208; Long Beach Signature (Heritage, 2/2009), lot 319, which realized \$3,450. PCGS# 2234, NGC ID# 2296, CoinPlex ID# INC1908SRD*

Smooth MS65 Red 1908-S Cent

- 3098 1908-S MS65 Red PCGS.** Eagle Eye Photo Seal, card included. The introductory San Francisco cent also ranks among the lowest mintage issues of the series. The present sun-gold Gem is essentially unabraded, and carbon is confined to the field near UNITED. The strike is precise except on the shoulder curl and the upper headdress tips. PCGS# 2234, NGC ID# 2296, CoinPlex ID# INC1908SRD

**Red Gem 1908-S Cent
Semikey Branch Issue**

- 3099 1908-S MS65 Red PCGS.** This low-mintage Gem Red 1908-S cent exhibits beautiful sun-gold luster. Tiny copper spots and a few small contact marks appear. The first branch mint cent, and much scarcer than the immediately preceding Philadelphia issues. Only 38 examples have received higher numeric grades from PCGS (12/12). From *The Richard P. Ariagno, M.D. Collection*. PCGS# 2234, NGC ID# 2296, CoinPlex ID# INC1908SRD

**1908-S Indian Cent, MS65 Red
Bright Mint Luster, Strongly Struck**

- 3100 1908-S MS65 Red PCGS. CAC.** The 1908-S is a popular semikey and the first of only two years in which Indian cents were struck in San Francisco. The mintage was also notably low with only 1.1 million pieces produced. The luster on this Gem resembles that seen on many 1909 cents from San Francisco of both design types, with a pronounced yellow cast to the bronze alloy. This piece is atypically strong for a 1908-S, an issue that is almost always found weak. The serious collector should consider this Gem Red 1908-S. From *The Teich Family Collection*. PCGS# 2234, NGC ID# 2296, CoinPlex ID# INC1908SRD

**MS65 Red 1908-S Cent
Old Green Label Holder**

- 3101 1908-S MS65 Red PCGS. CAC.** A lovely wheat-gold Gem that boasts coruscating luster and a good strike. No marks are visible and only trivial carbon is present. A popular low-mintage branch mint issue. Though NGC and PCGS have certified a combined 377 pieces at the MS65 Red level (as of 11/12), just 27 examples possess a CAC seal. Encased in an old green label holder. PCGS# 2234, NGC ID# 2296, CoinPlex ID# INC1908SRD

- 3102 1909 MS66 Red PCGS.** Final year of the series and more available because it was widely saved as the last of its kind. This piece has vivid red color with a slight undertone of yellow, as seen on 1909 cents of both types. Sharply, but not quite fully struck, the only flaws are a few scattered specks of carbon.

From *The Richard P. Ariagno, M.D. Collection*. PCGS# 2237, NGC ID# 2297, CoinPlex ID# INC1909RD

- 3103 1909-S MS63 Red and Brown NGC.** This Select Mint State S-mint Indian cent displays intermingled orange luster and brown toning along with attractive satin luster. This representative is from the lowest production of Indian Head cents in the entire series. From *The J.D. Tanner Collection*. NGC ID# 2298, PCGS# 2239, CoinPlex ID# INC1909SRB

**Choice 1909-S Indian Cent
Low-Mintage Key With Red Surfaces**

- 3104 1909-S MS64 Red PCGS. CAC.** The 1909-S Indian cent claims the lowest mintage of the series, at a meager 309,000 pieces. This well-detailed Choice example shows the slight softness on the first feather tip always seen on this issue, but the original red surfaces show only minor signs of contact and just a few microscopic specks of carbon.

Ex: *Wilson-Reuter Sale (Stack's, 10/1959)*, lot 56, flip accompanies the lot.

From *The Teich Family Collection*. PCGS# 2240, NGC ID# 2298, CoinPlex ID# INC1909SRD

**Key 1909-S Indian Cent, MS64+ Red
Remarkable, Bright Mint Luster**

- 3105 1909-S MS64+ Red PCGS. CAC.** Bright mint red luster is the dominant visual feature when one sees this attractive near-Gem. The strike details are a bit soft, as is often the case, but the primary deterrent to a higher (possibly much higher) grade is a carbon spot at the top of the fourth feather from the bottom of the headdress. *From The Teich Family Collection.* PCGS# 2240, NGC ID# 2298, CoinPlex ID# INC1909SRD

**Gem Red 1909-S Indian Cent
Low-Mintage Key**

- 3106 1909-S MS65 Red PCGS.** A superior, exceptionally bright example of this popular key date. Original golden-red mint color abounds overall, and there are no mentionable marks or spots. The strike is just a little short on a couple of the feather tips. One of only 309,000 pieces struck in this final year. PCGS has only awarded higher numeric grades to 15 examples (11/12). PCGS# 2240, NGC ID# 2298, CoinPlex ID# INC1909SRD

1909-S Indian Cent, MS65 Red

- 3107 1909-S MS65 Red PCGS.** The rarer of two S-mint Indian cents, from the lowest mintage of any issue, this brilliant Gem has bright orange surfaces with frosty luster and faint violet toning on the obverse device. A few trivial carbon flecks are evident on each side, preventing a finer grade. *From The Richard P. Ariagno, M.D. Collection.* PCGS# 2240, NGC ID# 2298, CoinPlex ID# INC1909SRD

**1909-S Indian Cent, Full Red Gem
Remarkably Well-Preserved**

- 3108 1909-S MS65 Red PCGS. CAC.** The low mintage of only 309,000 pieces has received the attention of collectors since the 1909-S Indian cent was issued. The mint luster on this solid Gem shows the often-seen yellowish tint. The surfaces are remarkably clean, an indication this piece has been carefully preserved for the past 104 years. *From The Teich Family Collection.* PCGS# 2240, NGC ID# 2298, CoinPlex ID# INC1909SRD

PROOF INDIAN CENTS

1859 Indian Cent, Near-Gem Proof Necessary One-Year Type Coin

- 3109 1859 PR64 PCGS.** Always popular as a one-year type, especially so as a proof, the mintage of 1859 cents is much the same as the story for other denominations from this year. The mintage is estimated around 800 proofs, but based on the number of survivors it is believed between 300 and 400 were actually released. This is an obvious proof striking whose surfaces display the lighter colors associated with the copper-nickel composition. In this case, lighter yellow-lime and pale rose are intermixed over each side. The strike is predictably full throughout, and there are only minimal surface imperfections present.

From The Teich Family Collection. PCGS# 2247, NGC ID# 2299, CoinPlex ID# INP1859

Choice Proof 1859 Cent Laurel Wreath Reverse

- 3110 1859 PR64 NGC.** The 1859 Indian cent is a one-year type coin, as the reverse was changed in 1860 to include the federal shield. The estimated proof mintage was a mere 800 pieces, and the issue is always in demand from series enthusiasts and type collectors alike. The surfaces exhibit a variety of colors when examined closely; including red, russet, golden-orange, and splashes of green. A strikethrough appears in the field to the left of the Indian's forehead. Census: 88 in 64, 55 finer (12/12). NGC ID# 2299, PCGS# 2247, CoinPlex ID# INP1859

1859 Cent, PR66 Cameo Exquisite Eye Appeal

- 3111 1859 PR66 Cameo PCGS. CAC.** The 1859 Indian cent is a blue-chip coin for anyone wanting to purchase a type piece of enduring popularity. The issue was only struck in 1859 with the Laurel Wreath Reverse, and seldom are examples seen with the depth of mirrored reflectivity the present piece possesses. The mirrors in the fields are unfathomably deep, and the color is as close as possible to the original "white" appearance these coins had when new. Close examination reveals each side displays a subtle pastel iridescence, but the frosted devices are most immediately apparent, set against the bottomless mirrors in the fields. All design features are exquisitely brought up, further enhancing the coin's eye appeal. A few minuscule flecks scattered about do not detract. Population: 6 in 66 Cameo, 0 finer (12/12).

Ex: Portland Signature (Heritage, 3/2004), lot 5115; FUN Signature(1/2005), lot 30108; Joseph Thomas Collection, Part Two / Long Beach Signature (Heritage, 5/2009), lot 134. PCGS# 82247, CoinPlex ID# INP1859CA

- 3112 1861 PR64 PCGS. CAC.** The deeply reflective fields of this remarkable Choice proof show mixed copper-green and crimson patina, with a few microscopic specks of carbon. The design elements are sharply detailed and eye appeal is outstanding. Population: 59 in 64, 22 finer (11/12).
From The Teich Family Collection. PCGS# 2256, NGC ID# 229B, CoinPlex ID# INP1861

1862 Cent, PR66 Cameo
The Type Coin for the Copper-Nickel Series

- 3113 1862 PR66 Cameo PCGS.** Ex: Richard. Even though the mintage of 550 proofs is not substantially higher than other copper-nickel dates, the 1862 is the usual choice for type purposes. The original "white" color of the copper-nickel alloy has taken on a significant presence of reddish patina, deepening the surfaces overall. The fields are still brightly reflective, and there are only the slightest specks present, most of which are on the obverse.
Ex: *Richard Collection (Heritage, 1/2004)*, lot 4432, which realized \$3,151. PCGS# 82259, CoinPlex ID# INP1862CA

- 3114 1863 PR64 PCGS. CAC.** A sharply detailed Choice proof from a tiny Civil War mintage of 460 pieces, this impressive specimen displays deeply reflective fields with mixed copper-red and crimson patina. Population: 73 in 64, 29 finer (11/12).
Ex: *Stadium-Gardner Collections (Stack's, 2/1965)*, lot 1205, flip accompanies the lot.
From *The Teich Family Collection*. PCGS# 2262, NGC ID# 229D, CoinPlex ID# INP1863

- 3115 1864 Copper-Nickel PR64 PCGS.** This is an attractive near-Gem example from the end of the copper-nickel cent series. The piece displays lovely orange and yellow colors overall, with splashes of red, russet, lime-green, and yellow when examined closely and rotated. A lint mark appears in the field near the upper right corner of E in ONE. PCGS# 2265, NGC ID# 229E, CoinPlex ID# INP1864CN

- 3116 1864 Copper-Nickel PR64+ PCGS. CAC.** Cameo proof copper-nickel cents are infrequently encountered, and this near-Gem is an attractive representative, despite lacking the Cameo designation. Sharply detailed with light tan surfaces and excellent contrast.
From *The Teich Family Collection*. PCGS# 2265, NGC ID# 229E, CoinPlex ID# INP1864CN

1864 Copper-Nickel Cent, PR66 Cameo
Tied for Finest at PCGS

- 3117 1864 Copper Nickel PR66 Cameo PCGS.** An impressive Premium Gem, this copper-nickel proof has excellent contrast with full mirrors around lustrous light tan devices. The strike is bold, and the eye appeal is exceptional. The 1864 copper-nickel Indian cents are relatively plentiful in proof, but contrasted examples are rare in high grades. This is a delightful and important example. Population: 5 in 66 Cameo, 0 finer (11/12).
From *The Richard P. Ariagno, M.D. Collection*. PCGS# 82265, CoinPlex ID# INP1864CNCA

1864 Copper-Nickel Cent, PR65 Deep Cameo
Seldom Seen This Nice

- 3118 1864 Copper Nickel PR65 Deep Cameo PCGS.** This is a splendid Gem Deep Cameo proof of this last copper-nickel cent issue, produced to the extent of some 370 coins. Both sides display copper-orange color. Intense contrast and pristine surfaces are two of its many charms, with no visible impairments of any kind. The design elements are well-impressed, including sharp definition on the feather tips. Seldom seen in such fine preservation and with such a degree of contrast. The reverse is rotated about 15 to 20 degrees counterclockwise. Population: 3 in 65 Deep Cameo, 3 finer (12/12).
Ex: *T.W. Brown Collection / Long Beach Signature (Heritage, 9/2010)*, lot 5070. PCGS# 92265, CoinPlex ID# INP1864CNDC

**1864 No L Bronze Indian Cent, PR65 Red and Brown
Scarce With Remaining Mint Red**

- 3119 1864 Bronze No L PR65 Red and Brown PCGS.** As Rick Snow points out in his series reference, "A popular issue as a one year only type, as the only bronze issue from the 1860-1864 design ... " It is estimated that only 300 pieces were struck of this first-year bronze issue. Bright mirrors on each side of this piece serve to enhance the slightly mellowed reddish-brown color. Attractive and a good value. Population: 32 in 65 Red and Brown, 14 finer (11/12).
From The Teich Family Collection. PCGS# 2277, NGC ID# 229F, CoinPlex ID# INP1864BRZRB

**1864 Bronze Cent, PR66 Red Ultra Cameo
The Only Coin So Graded**

- 3120 1864 Bronze No L PR66 Red Ultra Cameo NGC.** Beginning in July 1864, the Mint substituted bronze cents for their copper-nickel counterparts in proof sets. Including the limited number of singles that were also delivered, the original mintage of the proof 1864 bronze Indian cent is believed to be in the neighborhood of just 150 pieces. There are precious few examples extant at the PR66 Red grade level, especially deeply cameoed. Simply phenomenal quality and eye appeal, the mirrored reflectivity in the fields just could not be any deeper. Set against the illimitable depth in the fields is the frost that covers the devices on each side. The only surface flaw is a cluster of tiny darker specks of color in the left obverse field. Census: 1 in 66 Ultra Cameo, 0 finer (12/12).
Ex: Alex Highland Collection (Heritage, 6/2002), lot 5201, which realized \$18,400. PCGS# 92278, CoinPlex ID# INP1864BRZRDDC

**1866 Gem Red Cameo Indian Cent
Brightly Mirrored Fields, Great Color**

- 3121 1866 PR65 Red Cameo PCGS.** Unbelievable depth of mirrored reflectivity flashes in the fields on each side. In fact, the depth of mirroring sets up such a strong contrast with the devices, we are of the opinion this coin might just as easily be called a Deep Cameo. Bright, original orange-red color covers each side, and there are virtually no blemishes present. This is a special coin for the Indian cent collector as so few early dates remain with intact mint color. Population: 8 in 65 Cameo, 3 finer (12/12). PCGS# 82287, CoinPlex ID# INP1866RDCA

- 3122 1868 PR64 Cameo PCGS.** From an original production of approximately 600 coins, this near-Gem displays light apricot color, with the obverse displaying several spots. It has been estimated that 15% of these display die rotation of 170 degrees, however this example exhibits rotation that is approximately 15 degrees counterclockwise. Population: 3 in 64 Cameo, 5 finer (12/12). PCGS# 82293, CoinPlex ID# INP1868RDCA

**Gem Proof Red 1870 Indian Cent
No Finer Cameo Coins at PCGS**

- 3123 1870 PR65 Cameo PCGS.** Shallow N in ONE. Nicely mirrored with attractive golden-orange and apricot surfaces, accompanied by subtle peach and lemon-yellow highlights. Intricately struck, and boldly contrasted. Population: 3 in 65 Cameo, 0 finer (12/12).
Ex: *Pittsburgh Signature* (Heritage, 8/2004), lot 5221. PCGS# 82299, CoinPlex ID# INP1870RDCA

**PR65 Red Cameo
Shallow N 1871 Cent**

- 3124 1871 PR65 Red Cameo PCGS. CAC.** Eagle Eye Photo Seal, card not included. Shallow N in ONE. A precisely struck Gem with radiant pumpkin-orange color and only a whisper of carbon across each side. Interesting lintmarks on NIT in UNITED will identify this piece in any future sales. One of the lowest-mintage business strikes in the series, and proofs are also very popular. Population: 2 in 65 Cameo, 1 finer (12/12).
Ex: *Long Beach Signature* (Heritage, 6/2004), lot 7048; *Orlando FUN Signature* (Heritage, 1/2008), lot 389, which realized \$6,900. PCGS# 82302, CoinPlex ID# INP1871RDCA

**PR66 Red 1872 Cent
Fully Struck**

- 3125 1872 PR66 Red PCGS. CAC.** Bold N in ONE. This intricately struck Premium Gem displays rich to subtle shades of peach-red and sun-gold with a hint of olive-green near STATES. Contact is absent and carbon is microscopic. A better date, both as a proof and business strike. Population: 6 in 66 Red, 0 finer (12/12). PCGS# 2305, NGC ID# 229R, CoinPlex ID# INP1872RD

**1872 Proof Indian Cent
Choice Red Cameo Example**

- 3126 1872 PR64 Cameo PCGS.** A substantial proof mintage of 950 pieces was struck in 1872, but few surviving examples can match the appeal of this Choice Red Cameo specimen. The blazing red fields of this piece are deeply mirrored and the frosty design elements provide uncommon field-device contrast. Richard Snow notes "examples with full cameo contrast are rare." The obverse surface displays the streaky orange-gold and red color often seen on proofs of this era. Population: 1 in 64 Cameo, 2 finer (12/12). PCGS# 82305, CoinPlex ID# INP1872RDCA

**1874 One Cent, PR65 Red Cameo
Gorgeous Color and Sharply Struck**

- 3127 1874 PR65 Red Cameo PCGS. CAC.** A gorgeous specimen that displays lovely light orange color with blushes of green and crimson on each side. It is sharply struck and the cameo contrast readily obvious. The diagonal of the digit 4 extends below the left end of the crossbar, which David Bowers (2009) says is “a defect on the date numeral 4, which in the past has been erroneously described as a repunched date.” Population: 3 in 65 Red Cameo, 2 finer (12/12). PCGS# 82311, CoinPlex ID# INP1874RDCA

**1875 Indian Cent, PR65 Red
Only 700 Coins Struck**

- 3128 1875 PR65 Red PCGS.** Production of proof Indian Cents barely topped 700 pieces in 1875, making this one of the scarcer proof deliveries from the decade of the 1870s. This piece is deeply mirrored and shows brick-red coloration over each side. Population: 12 in 65 Red, 2 finer (12/12).
Ex: *Central States Signature* (Heritage, 4/2002), lot 5160. PCGS# 2314, NGC ID# 229U, CoinPlex ID# INP1875RD

**Gem Proof 1875 Indian Cent
Rare Cameo Example With Red Surfaces**

- 3129 1875 PR65 Red Cameo PCGS.** Only 700 proof Indian cents were struck in 1875, and Rick Snow notes, “Full Red examples are rare. Cameo examples are prohibitively rare.” This well-struck Gem defies Snow’s rule on both counts, exhibiting fiery orange-red surfaces and reflective fields that contrast boldly with the frosty devices. No mentionable defects are present, except a tiny planchet flaw (as struck) above Liberty’s necklace. This piece is currently tied with just two other 1875 Indian cents as the finest-known Cameo examples at PCGS (12/12). PCGS# 82314, CoinPlex ID# INP1875RDCA

**1876 Cent, PR65 Red Cameo
Strong Field-Device Contrast**

- 3130 1876 PR65 Red Cameo PCGS.** Few proof Indian cents combine fully Red surfaces with the strong contrast necessary for a Cameo designation. This is a wonderful Gem with brilliant copper-orange surfaces characterized by deeply mirrored fields and frosty devices. Powerful eye appeal. Population: 7 in 65 Red Cameo, 1 finer (12/12).
Ex: *Long Beach Signature* (Heritage Auctions, 5-6/2007), lot 195; *Baltimore Signature* (Heritage Auctions, 7-8/2008), lot 1151. PCGS# 82317, CoinPlex ID# INP1876RDCA

- 3131 1877 — Improperly Cleaned — NGC Details. Proof.** Bold N. Recolored to appear full Red, but the blended rose, orange, and aquamarine shades are nonetheless attractive. Well struck and glossy with no sign of carbon.
From *The J.D. Tanner Collection*. NGC ID# 229W, PCGS# 2318, CoinPlex ID# INP1877BN

**1877 Cent, PR64 Red and Brown
Sharply Struck**

- 3132 1877 PR64 Red and Brown PCGS.** Only 900 proof Indian cents were struck in 1877. This delightful Choice example exhibits sharply detailed design elements and slightly reflective surfaces that retain most of their original red color, with a few hints of light brown. A few small carbon flecks are scattered about. PCGS# 2319, NGC ID# 229W, CoinPlex ID# INP1877RB

**Red and Brown PR64 1877 Cent
Low-Mintage Key**

- 3133 1877 PR64 Red and Brown PCGS.** Eagle Eye Photo Seal, card included. Bold N, characteristic of proofs. The flashy fields display orange-red, steel-blue, and sea-green. The motifs are olive-brown. A needle-sharp Choice specimen of this coveted series key. The surfaces are unperturbed by contact or carbon. PCGS# 2319, NGC ID# 229W, CoinPlex ID# INP1877RB

**1877 Cent, PR65 Red and Brown
The Most Popular Proof Date in the Series**

- 3134 1877 PR65 Red and Brown PCGS.** The exact number of proof cents from 1877 is not possible to state as Mint records are incomplete from that year. The highest number that is possible is 910 pieces, but 140 pieces are unaccounted for (perhaps melted?). The date pressure is considerable for proofs because of the rarity of high-grade business strikes. This moderately reflective proof displays lime-green interspersed with reddish-brown in the centers and deeper color around the margins.
From The Teich Family Collection. PCGS# 2319, NGC ID# 229W, CoinPlex ID# INP1877RB

**1877 Cent, PR65 Red Cameo
Very Rare in This Grade**

- 3135 1877 PR65 Red Cameo PCGS. CAC.** The mintage of the 1877 proof cent is in dispute. Walter Breen in his *Complete Encyclopedia* gives a figure of 510+ produced. Research by R.W. Julian revised the estimate to 900. The 900+ figure given by David Bowers in his *Flying Eagle and Indian Cent* book is based on his contention that at least 1,500 were produced, with unsold pieces being destroyed or released into circulation.

The present Gem Cameo offering is a simply beautiful specimen with fully original copper-orange color. The razor-sharp strike is far superior to that often seen on business strikes in this series, and the fields glow with an intense reflectivity that could only have been imparted by proof production methods. A great representative of the ever-popular 1877 Indian cent in proof format. Population: 2 in 65 Cameo, 2 finer (12/12). PCGS# 82320, CoinPlex ID# INP1877RDCA

- 3136 1878 PR65 Red PCGS.** Lovely pumpkin-gold color and lustrous surfaces provide this piece with an attractive appearance. The reverse includes deep orange highlights near the center. Copper spots and small grazes appear. Population: 36 in 65 Red, 9 finer (12/12).
From The Richard P. Ariagno, M.D. Collection. PCGS# 2323, NGC ID# 229X, CoinPlex ID# INP1878RD

**1878 Cent, PR66 Red Cameo
Sharply Struck**

- 3137 1878 PR66 Red Cameo PCGS. CAC.** This is a simply splendid proof 1878 Indian cent with outstanding eye appeal; few survivors display such noteworthy cameo contrast. The design elements are sharply struck, and the obverse displays intermingled peach, rose, deep-purple and lime-green coloration. Impressively preserved and free of surface distractions. A small, unobtrusive planchet flake on the neck may identify the piece. Population: 5 in 66 Red Cameo, 0 finer (12/12).
Ex: FUN Signature (Heritage, 1/2009), lot 407. PCGS# 82323, CoinPlex ID# INP1878RDCA

Gorgeous PR66 Red 1879 Cent

- 3138 1879 PR66 Red PCGS. CAC.** Fresh copper-orange luster with minimal spotting. Occasional variations into yellow and peach also are present. Between the green CAC sticker and the green insert on the PCGS holder, it is clear that this coin's Red Premium Gem proof designation has stood the test of time. Population: 25 in 66 Red, 9 finer (12/12). PCGS# 2326, NGC ID# 229Y, CoinPlex ID# INP1879RD

**PR67 Red and Brown 1880 Indian
Only One Numerically Finer PCGS Example**

- 3139 1880 PR67 Red and Brown PCGS. CAC.** Although proofs from the 1880s are relatively obtainable, the high degree of preservation sets this coin apart. Both sides retain significant red color with even mellowing and subtle underlying iridescence. There are no mentionable contact marks. Population: 3 in 67 (1 in 67+) Red and Brown, 1 finer (12/12). PCGS# 2328, NGC ID# 229Z, CoinPlex ID# INP1880RB

**1880 Cent, PR66 Red Cameo
Fully Struck**

- 3140 1880 PR66 Red Cameo PCGS.** Every design element is boldly rendered on this beautiful Premium Gem proof. The surfaces are fully brilliant with light copper-orange color that is only slightly subdued by a trace of toning over part of the obverse. The fields on both sides are deeply mirrored and contrast nicely with the lustrous devices. Moderate carbon streaks are visible above the ear. Population: 5 in 66 Red Cameo, 2 finer (12/12).
Ex: Long Beach Signature (Heritage, 5-6/2007), lot 197. PCGS# 82329, CoinPlex ID# INP1880RDCA

- 3141 1881 PR66 Red PCGS.** This well-struck Premium Gem displays tremendous eye appeal, with tan and sunset-orange in the centers of each side ceding to glimpses of cherry near the rims. A loupe reveals some jade accents and a few flecks on the obverse. Population: 23 in 66 Red, 3 finer (12/12). PCGS# 2332, NGC ID# 22A2, CoinPlex ID# INP1881RD

**1881 Indian Cent
PR66 Red Cameo Specimen**

- 3142 1881 PR66 Red Cameo PCGS.** The 1881 Indian cent claims a large proof mintage of 3,575 pieces, making the date reasonably available in high grade and a popular choice for type collectors. This delightful Gem displays reflective red surfaces with few signs of contact. Field-device contrast is bold and eye appeal is outstanding. Population: 3 in 66 Cameo, 0 finer (12/12). PCGS# 82332, CoinPlex ID# INP1881RDCA

**Superb Gem Brown Proof
1882 Cent**

- 3143 1882 PR67 Brown PCGS.** Ocean-blue and chestnut-brown bathe this pristine and coruscating Superb Gem. The strike is needle-sharp, and the sole imperfection is a tiny mint-made lint mark on the cheekbone. 1882 proof cents are readily available but most are spotted. Examples with the undisturbed rich colors of the present lot are highly elusive. An unsurpassable numeric grade for the proof date. PCGS# 2333, NGC ID# 22A3, CoinPlex ID# INP1882BN

- 3144 1882 PR65 Red PCGS.** Gorgeous shades of color emanate from this brilliant Gem and include brilliant straw-gold, gold, sunset-orange, and fiery red. Small flecks of green appear near the center of the reverse. The coin exhibits a bold strike and has tremendous eye appeal. Population: 16 in 65 Red, 17 finer (12/12). PCGS# 2335, NGC ID# 22A3, CoinPlex ID# INP1882RD

- 3145 1884 PR65 Cameo PCGS.** A fully brilliant and highly attractive Gem cameo proof, this piece displays exquisite design details and deeply mirrored fields. The surfaces on both sides exhibit bright orange mint color, with a few tiny spots on the obverse. Population: 2 in 65 Cameo, 3 finer (12/12). PCGS# 82341, CoinPlex ID# INP1884RDCA

- 3146 1885 PR66 Brown PCGS. Snow-PR3. Ex: Eagle Eye Photo Seal.** The first 8 and the 5 in the date are repunched. The variety is undesignated on the holder. Ocean-blue dominates the reverse and most of the obverse, though the obverse margin displays cherry-red. A pristine and razor-sharp Premium Gem. PCGS# 2342, NGC ID# 22A6, CoinPlex ID# INP1885BN

- 3147 1885 PR66 Brown PCGS.** Although the appearance of this coin is striking at a quick glance, rotating it under a light source reveals an even deeper level of toning that provides this Premium Gem with extraordinary visual allure. Various hues of greens, purples, blues, and bright copper appear. The Indian's headdress and much of the wreath are covered in a lovely green patina. Small specks appear on both sides and there is a scratch to the right of E in ONE. Population: 56 in 66 (2 in 66+) Brown, 10 finer (12/12). PCGS# 2342, NGC ID# 22A6, CoinPlex ID# INP1885BN

- 3148 1886 Type One PR65 Red PCGS.** Richly toned on both sides, this coin possesses fantastic eye appeal. The obverse displays iridescent shades of yellow-green, fuchsia, and deep electric-blue. The reverse is particularly stunning with vivid, bold orange encircling the coin and highlights of deep pink and bright gold appearing on portions of the wreath. Only a few minor surface marks are visible on this well-struck coin. Population: 19 in 65 Red, 12 finer (12/12). *From The Richard P. Ariagno, M.D. Collection.* PCGS# 2347, NGC ID# 22A7, CoinPlex ID# INP1886TY1RD

**1887 Cent, PR64 Red Cameo
Nicely Preserved**

- 3149 1887 PR64 Red Cameo PCGS.** A satiny orange-red Choice proof with glimpses of straw-gold and fire-red here and there. A good strike with only trivial inexactness on the shoulder curl and headdress tips. This is a nicely preserved piece devoid of mentionable marks and spots. Population: 1 in 64 Red Cameo, 1 finer (12/12). PCGS# 82350, CoinPlex ID# INP1887RDCA

- 3150 1889 PR65 Red PCGS.** Reflective surfaces, bold colors, and nicely detailed design elements combine to provide excellent eye appeal to this Gem. Die clashing is visible on both sides. Population: 15 in 65 Red, 8 finer (12/12).

From The Richard P. Ariagno, M.D. Collection. PCGS# 2356, NGC ID# 2732, CoinPlex ID# INP1889RD

- 3151 1891 PR65 Red PCGS.** The reflective fields, frosty devices, and deep orange and red colors combine to provide this Gem with an attractive appearance. A lint mark appears to the left of the left portion of the bow. The surfaces exhibit a few tiny copper spots. Population: 15 in 65 Red, 4 finer (12/12).

From The Richard P. Ariagno, M.D. Collection. PCGS# 2362, NGC ID# 22AD, CoinPlex ID# INP1891RD

- 3152 1891 PR64 Cameo PCGS.** This needle-sharp Indian cent exhibits pleasing contrast. The coloration is an appealing combination of maroon and steel-green. Scattered obverse carbon specks limit the grade. The 89 in the date is repunched. Population: 3 in 64 Cameo, 3 finer (12/12). PCGS# 82362, CoinPlex ID# INP1891RDCA

**1894 Cent, PR66 Red Cameo
Sharply Struck**

- 3153 1894 PR66 Red Cameo PCGS. CAC.** A lemon-gold Premium Gem with swaths of rich rose-red near the date and shield. Sharply struck and void of contact with an exemplary obverse and a few tiny flyspecks in the vicinity of the denomination. Population: 2 in 66 Red Cameo, 0 finer (12/12).

Ex: Baltimore Signature (Heritage, 7-8/2008), lot 1170. PCGS# 82371, CoinPlex ID# INP1894RDCA

- 3154 1895 PR65 Cameo PCGS.** The devices shimmer against the reflective fields on this deep golden-apricot Gem. Areas of iridescent fuchsia appear on the reverse near the lower portion of the wreath and in the nearby field. Both sides exhibit copper spots. Population: 4 in 65 Cameo, 1 finer (12/12). PCGS# 82374, CoinPlex ID# INP1895RDCA

Cameo Red Gem Proof 1897 Cent

- 3155 1897 PR65 Red Cameo PCGS.** Ex: Richard. Vibrant orange and lemon hues endow this well struck and exceptionally preserved Gem. The portrait has splendid cameo contrast with the reflective field. PCGS has encapsulated only eight pieces of this date as Red Cameo, and even full Red examples are very scarce. Population: 3 in 65 Cameo, 4 finer (12/12).

Ex: *Richard Collection (Heritage, 1/2004)*, lot 4547, which realized \$2,415. PCGS# 82380, CoinPlex ID# INP1897RDCA

- 3156 1899 PR65 Cameo PCGS.** A large splash of brilliant red-orange appears near the center of the obverse on this largely straw-gold Gem. The reverse exhibits large areas of intense orange color near the center providing an attractive look against the surrounding lighter-colored areas. Toning spots appear on the obverse of this well-struck piece. Population: 1 in 65 Cameo, 4 finer (12/12). PCGS# 82386, CoinPlex ID# INP1899RDCA

- 3157 1900 PR64 Cameo PCGS.** The devices and the brightly mirrored fields exhibit attractive contrast on this near-Gem. Splashes of red appear in the fields at the center of the reverse upon close examination. Both sides exhibit small toning spots, with a grouping near 12 o'clock on the obverse. Few contact marks appear, and they are minor in nature. Population: 2 in 64 Cameo, 3 finer (12/12). PCGS# 82389, CoinPlex ID# INP1900RDCA

Appealing PR66 Red 1901 Indian Cent Only 7 Numerically Finer PCGS-Graded Examples

- 3158 1901 PR66 Red PCGS. CAC.** There is a blush of lilac iridescence over the right obverse of this otherwise golden-orange representative. Every element of the design is fully brought up, and the devices appear to float atop shimmering brightness in the fields. A premium quality and conditionally scarce Premium Gem that would do justice to even the most advanced collection of Indian Cents. The number of PCGS-graded numerically finer examples has not changed since this piece was offered in 2003. Population: 25 in 66 Red, 7 finer (12/12).

Ex: *FUN Signature (Heritage, 1/2003)*, lot 4519.

From *The Richard P. Ariagno, M.D. Collection*. PCGS# 2392, NGC ID# 22AP, CoinPlex ID# INP1901RD

1901 Cent, PR66 Cameo Intense Obverse Color

- 3159 1901 PR66 Cameo PCGS.** The obverse peripheries are greenish-tan, with a central mélange of magenta, gold, and lime-green. Despite the intense color, the field-device contrast is sufficient for the Cameo designation. The reverse offers a more moderate color palette. A sharp, alluring, near-carbon-free specimen. Population: 3 in 66 Cameo, 0 finer (12/12). PCGS# 82392, CoinPlex ID# INP1901RDCA

- 3160 1902 PR65 Red PCGS.** Rich honey-gold color overall with areas of vibrant red-pink and deep orange along with splashes of denim blue adding to the attractiveness, this Gem exhibits a lovely combination of reflective and matte surfaces. The design elements exhibit strong detail. Population: 50 in 65 Red, 37 finer (12/12).

Ex: *Santa Clara Signature (Heritage, 11/2002)*, lot 5941.

From *The Richard P. Ariagno, M.D. Collection*. PCGS# 2395, NGC ID# 22AR, CoinPlex ID# INP1902RD

1902 Cent, PR66 Red Cameo Beautiful Color

- 3161 1902 PR66 Red Cameo PCGS. CAC.** Both sides of this Premium Gem display beautiful yellow-gold color imbued with subtle hints of light green. A solid strike imparts sharp definition to the design elements save for minor softness on a couple of the feather tips. Both sides are wonderfully preserved. Population: 3 in 66 Red Cameo, 1 finer (12/12). PCGS# 82395, CoinPlex ID# INP1902RDCA

- 3162 1904 PR65 Red PCGS. CAC.** Eagle Eye Photo Seal sticker, though no card is included with this green-insert piece. Great copper-orange eye appeal with only a touch of lavender near the margins and minimal spotting. Strongly struck. Population: 21 in 65 Red, 6 finer (12/12).

From *The Richard P. Ariagno, M.D. Collection*. PCGS# 2401, NGC ID# 22AT, CoinPlex ID# INP1904RD

**1905 Premium Gem Proof Indian Cent
With Red Cameo Surfaces**

- 3163 1905 PR65 Red Cameo PCGS Secure.** a remarkable Gem, with sharply detailed frosty devices that provide dramatic contrast with the deeply mirrored fields. The original orange-gold surfaces of this remarkable piece are free of mentionable distractions. Eye appeal is terrific. Population: 3 in 65 Cameo, 2 finer (12/12). PCGS# 82404, CoinPlex ID# INP1905RDCA

**1906 Proof Indian Cent
Premium Gem Red Cameo Specimen**

- 3164 1906 PR66 Red Cameo PCGS.** This lower-mintage proof (1,725 coins) is difficult to locate in full Red Gem Cameo, as can be seen from the population figures below. Deeply mirrored yellow-gold fields highlight the sharply struck copper-gold motifs. Both sides exhibit well preserved surfaces, but for complete accuracy we mention a light spot at the rim between the 1 and 9 of the date. Population: 3 in 66 Cameo, 1 finer (12/12).
Ex: FUN Signature (Heritage, 1/2008), lot 428. PCGS# 82407, CoinPlex ID# INP1906RDCA

LINCOLN CENTS

- 3165 1909-S VDB MS64 Brown NGC.** This near-Gem with rich satiny surfaces displays attractive eye appeal on both sides. Hints of red appear near the top of the reverse. Minor contact marks are confined almost entirely to the obverse. NGC ID# 22B2, PCGS# 2426, CoinPlex ID# LIC1909SVDBBN
- 3166 1909-S VDB MS64 Brown PCGS. CAC.** This near-Gem displays a honey-brown color overall though vestiges of the initial brick-red largely frame Lincoln's portrait and appear near the date and most of the legends. PCGS# 2426, NGC ID# 22B2, CoinPlex ID# LIC1909SVDBBN
- 3167 1909-S VDB MS63 Red and Brown NGC.** This Select Mint State example is lustrous with minimally mellowed honey-gold and peach-red surfaces. A few contact marks appear, including two near the top of the reverse. NGC ID# 22B2, PCGS# 2427, CoinPlex ID# LIC1909SVDBRB
- 3168 1909-S VDB MS63 Red and Brown NGC.** A lovely Select Mint State example, this piece largely displays vibrant orange color with areas of red, golden-yellow, and gray mixed in. Minor toning spots appear on each side. NGC ID# 22B2, PCGS# 2427, CoinPlex ID# LIC1909SVDBRB

- 3169 1909-S VDB MS64 Red and Brown NGC.** Substantially more Red than Brown, with a vibrant reddish-orange obverse, this near-Gem displays only slightly mellowed coloration on the reverse. The strike is pleasing, and aside from a few stray marks, the preservation is excellent. A great representative of this perpetually in-demand issue. NGC ID# 22B2, PCGS# 2427, CoinPlex ID# LIC1909SVDBRB

- 3170 1909-S VDB MS64 Red and Brown PCGS. CAC.** Sharply detailed with lovely satin orange luster, the mint surfaces only slightly mellowed, resulting in the Red and Brown designation. From The Teich Family Collection. PCGS# 2427, NGC ID# 22B2, CoinPlex ID# LIC1909SVDBRB

- 3171 1909-S VDB MS64 Red and Brown PCGS. CAC.** Numerous hues of orange, red, brown, and green combine to create an attractive look on both sides of this near-Gem. A long mark extends down Lincoln's shoulder. PCGS# 2427, NGC ID# 22B2, CoinPlex ID# LIC1909SVDBRB

**1909-S VDB Lincoln Cent
MS65 Red and Brown**

- 3172 1909-S VDB MS65 Red and Brown NGC.** Hints of light blue patina resided on the mellow orange surfaces of this boldly detailed 1909-S VDB cent, one of the most famous 20th century numismatic keys. This Gem is fully lustrous with satiny surfaces and it is devoid of the pesky carbon flecks that are usually found on these coins. NGC ID# 22B2, PCGS# 2427, CoinPlex ID# LIC1909SVDBRB

**Famous 1909-S VDB Cent
MS65 Red and Brown**

- 3173 1909-S VDB MS65 Red and Brown PCGS.** Even the most casual collector is aware of the low mintage 1909-S VDB cent, the first branch mint variety of the series. The sun-gold and peach-red color is only slightly muted. This intricately struck Gem exhibits potent luster and shows only a couple of pinpoint flecks. No marks are visible, even when studied beneath a lens. Encased in a green label holder. PCGS# 2427, NGC ID# 22B2, CoinPlex ID# LIC1909SVDBRB

1909-S VDB Cent, MS65 Red and Brown
Exquisitely Struck

- 3174 1909-S VDB MS65 Red and Brown PCGS. The obverse essentially displays full copper-orange luster while the reverse shows whispers of light tan patination. The design elements are exquisitely brought up, including the VDB initials. Neither side reveals mentionable marks or spots. PCGS has seen just 31 specimens finer in this color designation. PCGS# 2427, NGC ID# 22B2, CoinPlex ID# LIC1909SVDBRB

- 3175 1909-S VDB MS64 Red PCGS. A fire-red and sun-gold near-Gem of this all-time collector favorite issue. Lustrous and crisply struck with small spots above the UN in UNITED and the 0 in the date. Encapsulated in an old green label holder. PCGS# 2428, NGC ID# 22B2, CoinPlex ID# LIC1909SVDBRD

1909-S VDB Cent, MS64 Red
Boldly Defined

- 3176 1909-S VDB MS64 Red PCGS. The lustrous surfaces of this key-date Gem display pretty copper-gold color and boldly defined design features, including all lines and grains in the wheat ears and initials V.D.B. A few pinpoint flecks preclude full Gem classification. Nevertheless, this is a nice looking near-Gem. PCGS# 2428, NGC ID# 22B2, CoinPlex ID# LIC1909SVDBRD

1909-S VDB Cent, MS65 Red

- 3177 1909-S VDB MS65 Red PCGS. Among casual collectors, few issues are better known than the 1909-S VDB. The purported furor over the "prominent" Brenner initials was perhaps limited to Chief Engraver Charles Barber, but new sans initial dies were promptly issued. After Barber's death in 1917, the initials returned in 1918, though less conspicuously placed on Lincoln's shoulder. This is a wonderful example of the famous '09-S VDB, with booming luster, a precise strike, and undisturbed peach-red surfaces. PCGS# 2428, NGC ID# 22B2, CoinPlex ID# LIC1909SVDBRD

Gem Red 1909-S VDB Cent
A Classic Collectible

- 3178 1909-S VDB MS65 Red PCGS Secure. The 1909-S VDB cent is one of the coins from the Mint that caused an uproar among the common noncollecting public at the time of its release, and a coin issue that did much to spur the subsequent assembling of series by date and mintmark. This Gem Red example boasts highly lustrous yellow-orange surfaces. The strike is sharp as usual — close to full — and a bit of smudging on the reverse is on the slab. PCGS# 2428, NGC ID# 22B2, CoinPlex ID# LIC1909SVDBRD

1909-S VDB Cent, MS65+ Red
Blazing Example of This Archetypal Key

- 3179 1909-S VDB MS65+ Red PCGS Secure. The archetypal key coin even to legions of casual collectors, the S VDB cent in MS65+ Red condition, as here, is a coin that will appeal to die-hard series aficionados as well. The designer's initials and the intervening periods are all sharp on this blazing coin, exhibiting rich luster and excellent eye appeal. The surfaces are a bright yellow-red overall with no evidence of mellowing. PCGS# 2428, NGC ID# 22B2, CoinPlex ID# LIC1909SVDBRD

**1909-S VDB Cent, MS66 Red
Only Nine Finer at PCGS**

- 3180 1909-S VDB MS66 Red PCGS. CAC.** The Lincoln cent was first issued on the 100th anniversary of the late President's birth, and the recent movie about the famous politician may increase interest in the series. Victor David Brenner designed these coins and included his initials on the reverse, an unpopular choice at the time, resulting in the scarce San Francisco variety that is now highly popular with collectors.

This splendid Premium Gem has brilliant orange luster with frosty surfaces that are void of carbon flecks or other blemishes. The strike is bold with strong details on both sides. Given the rarity of finer grade pieces (just nine at PCGS and one at NGC), this example is certain to generate considerable bidding activity. PCGS# 2428, NGC ID# 22B2, CoinPlex ID# LIC1909SVDBRD

**1909 Cent, MS67 Red
First-Year Type Coin**

- 3181 1909 MS67 Red PCGS.** Rich orange color, particularly on the obverse, with touches of peach and a small patch of bright straw-gold within the curve at the top of the reverse adds to the tremendous eye appeal of this Superb Gem. This attractive piece is well-suited to display with either side facing up. Population: 64 in 67 (1 in 67+) Red, 0 finer (11/12). PCGS# 2431, NGC ID# 22B3, CoinPlex ID# LIC1909RD

**1909-S Cent, MS66 Red
Impeccably Preserved**

- 3182 1909-S MS66 Red PCGS. CAC.** Beautiful yellow-gold luster dominates this Premium Gem cent that is impeccably preserved over both sides. The design elements are sharply struck except for inexactness on the lines of the lower-right wheat stalk. PCGS has certified a mere four Red Premium Gems finer. PCGS# 2434, NGC ID# 22B4, CoinPlex ID# LIC1909SRD

**Red Gem 1911-S Cent
Conditionally Rare Branch Issue**

- 3183 1911-S MS65 Red PCGS.** A magnificent peach-red Gem of this conditionally rare early branch mint issue. Fully struck, lustrous, and devoid of marks. The obverse border has a trio of tiny dark specks, and a minute mint-made strike-through is northeast of the date. Certified in a first generation holder. Population: 59 in 65 (2 in 65+) Red, 11 finer (11/12). PCGS# 2449, NGC ID# 22B9, CoinPlex ID# LIC1911SRD

- 3184 1913-S MS64 Red PCGS. CAC.** Large portions of the reverse are bright, particularly Lincoln, on this near-Gem. Areas of brilliant deep orange surround the date and frame portions of the portrait. The reverse displays an attractive frosted luster. An incompleteness of strike occurs at O of ONE and the first several letters in PLURIBUS. Contact marks appear primarily on the obverse. PCGS has only awarded higher numeric grades to 47 examples (12/12). PCGS# 2467, NGC ID# 22BF, CoinPlex ID# LIC1913SRD

**Peach-Red MS66 1914 Cent
Tied for Finest at NGC**

3185 1914 MS66 Red NGC. An orange-red high-grade representative of this early Lincoln issue. Marks are absent and only infrequent minute carbon is evident when viewed beneath a loupe. An important acquisition for the Registry Set collector. Certified in a former generation holder. Census: 12 in 66 Red, none finer (11/12). NGC ID# 22BG, PCGS# 2470, CoinPlex ID# LIC1914RD

3186 1914-D VF20 NGC. An attractive mahogany key date Lincoln cent, this piece displays even wear overall. Although contact marks are present, they pose minimal distraction. This is a lovely representative for the grade. NGC ID# 22BH, PCGS# 2471, CoinPlex ID# LIC1914DBN

Key Date 1914-D Cent, Unc Details

3187 1914-D — Altered Color — NGC Details. Unc. The glossy surfaces of this key-date representative display light brown coloration imbued with hints of lavender, powder-blue, light green, and soft gold. The design elements are well defined, including the date, mintmark, and lines of the wheat stalk. The right side of the right-most stalk is weak, generally typical of the issue. A few minute marks are undistracting. NGC ID# 22BH, PCGS# 2471, CoinPlex ID# LIC1914DBN

**Key 1914-D Cent, MS63 Red and Brown
A Sharply Struck Example**

3188 1914-D MS63 Red and Brown NGC. A blush of soft violet covers the obverse luminous surfaces of this Select key-date representative, while the reverse displays a more orange-violet palette. All design features are well brought up, including the lines and grains of the wheat ears. A bluish toning spot is visible in the upper-right obverse field. NGC ID# 22BH, PCGS# 2472, CoinPlex ID# LIC1914DRB

**Choice 1914-D Lincoln Cent
Key Date With Red Surfaces**

3189 1914-D MS64 Red PCGS. The 1914-D Lincoln cent is a low-mintage issue whose rarity was not appreciated until after World War II. As a result, few high-grade examples were saved by contemporary collectors, and the 1914-D is a condition rarity at the Gem level and a series key. This impressive MS64 specimen displays lustrous original red surfaces and sharply detailed design elements throughout. *Ex: 72nd Anniversary Sale (Stack's, 10/2007), lot 4770, flip accompanies the lot.* From The Teich Family Collection. PCGS# 2473, NGC ID# 22BH, CoinPlex ID# LIC1914DRD

3190 1914-S MS64 Red PCGS. A peach-red near-Gem that boasts vibrant luster and an unmarked appearance. Carbon is minimal, and perhaps the incompleteness of strike on the upper reverse is all that precludes an even finer grade. In a first generation holder. PCGS# 2476, NGC ID# 22BJ, CoinPlex ID# LIC1914SRD

**Near-Gem Red 1915-S Lincoln Cent
Bold Orange-Gold Color**

3191 1915-S MS64 Red PCGS. CAC. Bold orange-gold color appears on both sides of this near-Gem. Portions of the O in ONE and PL in PLURIBUS display softness. A few spots appear, including one in the field to the right of Lincoln's forehead. Population: 57 in 64 Red, 32 finer (12/12). PCGS# 2485, NGC ID# 22BM, CoinPlex ID# LIC1915SRD

3192 1917-S MS64 Red PCGS. Like other early branch mint issues, the 1917-S is a challenge to acquire in full Red. The present peach-gold near-Gem is lustrous and boldly struck with minimal contact. We note a faint slender gray streak from the L in PLURIBUS to the M in AMERICA. Encased in a first generation holder. PCGS# 2503, NGC ID# 22BU, CoinPlex ID# LIC1917SRD

**1918 Cent, MS67 Red
Virtually Pristine**

- 3193 1918 MS67 Red PCGS.** Orange-gold luster cascades over the virtually pristine surfaces of this Premium Gem. A solid strike imparts strong definition to the design elements. PCGS and NGC combined have certified fewer than 20 examples in the Superb Gem Red color designation and one finer. PCGS# 2506, NGC ID# 22BV, CoinPlex ID# LIC1918RD

- 3194 1920-S MS65 Red and Brown NGC. CAC.** The ruby-red and peach-gold shades are slightly mellowed but far from brown. Lustrous and mark-free with a suitable strike and a few tiny flecks near LIBERTY. Housed in a prior generation holder. NGC ID# 22C5, PCGS# 2529, CoinPlex ID# LIC1920SRB

- 3195 1920-S MS64 Red PCGS.** This well struck wheat-gold near-Gem is free from abrasion. We note a few small reverse specks and a slender vertical streak beneath the B in LIBERTY. Certified in a green label holder. Population: 78 in 64 Red, 9 finer (11/12).
Ex: Long Beach Signature (Heritage, 2/2005), lot 5469, which realized \$1,811.25. PCGS# 2530, NGC ID# 22C5, CoinPlex ID# LIC1920SRD

- 3196 1921-S MS64 Red PCGS.** The 1921-S is among the rarest Lincoln issues in full Red. This lustrous near-Gem example exhibits bright coppery-orange patination. Minor carbon spots appear on both sides. The coin is well-struck overall, with some areas of incompleteness noticed, primarily at the center of PLURIBUS. Population: 86 in 64 Red, 17 finer (11/12).
Ex: Long Beach Signature (Heritage, 2/2005), lot 5472. PCGS# 2536, NGC ID# 22C7, CoinPlex ID# LIC1921SRD

**Choice VF Strong Reverse
1922 No D Cent, FS-401**

- 3197 1922 No D Strong Reverse VF35 NGC. FS-401.** Die Pair 2. TRUST and the second 2 in the date are bold relative to the rest of the legends, diagnostics for this coveted die variety. Chocolate-brown throughout aside from a glimpse of dark gray along the lower reverse rim. Free from remotely consequential spots or abrasions. NGC ID# 22C9, PCGS# 3285, CoinPlex ID# LIC1922NODSTRONGBN

1922 No D Cent, AU50, Strong Reverse

- 3198 1922 No D Strong Reverse AU50 PCGS. CAC. FS-401.** Die Pair 2. Although a few tiny ticks are evident, especially one over LIBERTY, this glossy chocolate-brown specimen, housed in a green-label PCGS holder, exhibits satiny luster with minimal wear. The reverse appears virtually Mint State, with bold details in the wheat ears. PCGS# 3285, NGC ID# 22C9, CoinPlex ID# LIC1922NODSTRONGBN

**AU53 1922 No D Cent
Strong Reverse, Die Pair 2**

- 3199 1922 No D Strong Reverse AU53 PCGS. FS-401.** Die Pair 2. Sharp definition on the reverse confirms the high circulated grade, though the obverse appears to have greater wear, as is diagnostic for the variety. Chocolate-brown to medium brown with a couple of moderate marks on the reverse exergue and a tiny struck-in object (as made) near the profile. PCGS# 3285, NGC ID# 22C9, CoinPlex ID# LIC1922NODSTRONGBN

- 3200 1923-S MS64 Red and Brown PCGS.** A lovely near-Gem, this piece includes large areas of green and red overtones, particularly on the reverse. A thin die crack extends from the rim through the A in AMERICA. Small toning spots appear on both sides. PCGS has awarded higher numeric grades to only 16 examples (12/12). PCGS# 2547, NGC ID# 22CB, CoinPlex ID# LIC1923SRB

- 3201 1923-S MS64 Red and Brown PCGS. CAC.** Subtle splashes of deeper golden-orange and red color add to the attractiveness of this near-Gem. Minor surface marks appear along with a few toning spots. Only 16 pieces have received higher numeric grades from PCGS (12/12). PCGS# 2547, NGC ID# 22CB, CoinPlex ID# LIC1923SRB

- 3202 1924-D MS64 Red PCGS.** A lustrous orange-gold near-Gem of this better Denver issue. The strike is good, marks are nearly absent, and only scattered minute carbon limits the grade. Certified in a first generation holder. PCGS# 2554, NGC ID# 22CD, CoinPlex ID# LIC1924DRD

**MS64 Red 1925-S Cent
Conditionally Rare Branch Issue**

3203 1925-S MS64 Red PCGS. The conditionally rare 1925-S is a great rarity in MS65 Red, which causes many collectors to settle for the more affordable and obtainable MS64 Red grade. Nonetheless, Choice examples are also elusive. The present cent has an orange-gold center framed by subtle bands of ruby-red and forest-green. Marks and carbon are inconsequential. Encapsulated in a first generation holder. Population: 56 in 64 Red, 10 finer (11/12). PCGS# 2566, NGC ID# 22CH, CoinPlex ID# LIC1925SRD

3204 1926-S MS64 Red and Brown PCGS. The color of this near-Gem is a lovely apricot-gold overall with a few splashes of other hues scattered throughout. Only 13 examples have been awarded higher numeric grades by PCGS (12/12). PCGS# 2574, NGC ID# 22CL, CoinPlex ID# LIC1926SRB

3205 1927-D MS66 Red and Brown NGC. CAC. An incredible quality 1927-D Lincoln, this piece actually comes close to a full Red designation. Both sides exhibit scintillating luster and only a blush of rose-violet and apple-green iridescence about the obverse periphery affects the original orange-red color. Quite scarce as such. Census: 2 in 66 Red and Brown, 0 finer (12/12). NGC ID# 22CN, PCGS# 2580, CoinPlex ID# LIC1927DRB

3206 1928-S Large S MS65 Brown NGC. FS-501. Per *Cherrypickers'*, the "common mintmark for this date is relatively small" but the "large, trumpet-style S mintmark is very scarce." Lustrous, smooth, and well struck with deep forest-green and rose-red toning. Ex: Auction #2741 (*Teletrade*, 9/2009), lot 1150, which realized \$2,128. NGC ID# 22CT, PCGS# 2591, CoinPlex ID# LIC1928SBN

**1928-S Lincoln Cent, MS65+
With Original Red Surfaces**

3207 1928-S MS65+ Red PCGS. A few dark toning spots on each side of this brilliant Gem limit the grade. The strike is far sharper than usual, and the surfaces are fully brilliant with lovely light orange luster. A remarkable example for the connoisseur. Population: 41 in 65 (1 in 65+) Red, 5 finer (12/12). PCGS# 2593, NGC ID# 22CT, CoinPlex ID# LIC1928SRD

**FS-101 Doubled Die Obverse
1936 Cent, MS63 Red and Brown**

3208 1936 Doubled Die Obverse MS63 Red and Brown PCGS. FS-101. FS-101 is the strongest of the three well-known doubled die obverses for the date. All obverse legends exhibit prominent doubling. Well struck, lustrous, and essentially unabraded with orange-gold, sea-green, and ruby-red shades. The deepest shades are on the upper left obverse. PCGS# 82649

**Doubled Die Obverse 1941 Cent
Bright MS65 Red, FS-101**

3209 1941 Doubled Die Obverse MS65 Red NGC. FS-101. Three different obverse doubled die varieties are listed in *Cherrypickers'* and all are valuable. For FS-101, all obverse legends exhibit doubling, strongest on the B in LIBERTY. The present boldly struck and lustrous Gem is mark-free and displays consistent pumpkin-gold shades. PCGS# 37780

3210 1955 Doubled Die Obverse XF45 NGC. FS-101. This key date cent retains much of its mint shimmer and shows minimal wear on Lincoln's portrait. Sea-green toning dominates through brick-red is also evident. The most prominent doubled die of the century-plus series. From *The J.D. Tanner Collection*. NGC ID# 22FG, PCGS# 2825, CoinPlex ID# LIC1955DDOBN

3211 1955 Doubled Die Obverse AU58 NGC. FS-101. This satiny golden-brown key date cent would pass as Mint State among many collectors, though the portrait high points display a hint of rub. A lightly abraded and sharply struck example of the famous doubled die error. NGC ID# 22FG, PCGS# 2825, CoinPlex ID# LIC1955DDOBN

3212 1955 Doubled Die Obverse AU58 NGC. FS-101. Medium chocolate-brown toning with apple-green undertones enriches this still-lustrous Borderline Uncirculated example. Well struck, spot-free, and moderately abraded. The best known and most imposing of the many DDO varieties within the series. NGC ID# 22FG, PCGS# 2825, CoinPlex ID# LIC1955DDOBN

3213 1955 Doubled Die Obverse — Improperly Cleaned — NGC Details. Unc. FS-101. A satiny and well defined representative of the legendary doubled die variety. Recolored cherry-red and lime-green with a few tiny flecks and a hair-thin line on Lincoln's jaw. From *The Hilltop Collection*. NGC ID# 22FG, PCGS# 2825, CoinPlex ID# LIC1955DDOBN

- 3214 1955 Doubled Die Obverse MS61 Brown NGC. CAC. FS-101.** A coruscating medium brown representative of this popular and remarkable doubled die variety. The high points display glimpses of olive toning, and the fields exhibit distributed minute marks. One faded thin line above LIBERTY. NGC ID# 22FG, PCGS# 2825, CoinPlex ID# LIC1955DDOBN

**Classic Doubled Die Obverse
1955 Cent, MS63 Brown**

- 3215 1955 Doubled Die Obverse MS63 Brown NGC. CAC. FS-101.** Glimpses of the initial orange-red cling to protected areas, though most of this Select Uncirculated example is toned rich olive-brown. Satiny and unabraded with a crisp strike and only trivial carbon. One narrow strike-through, as made, is above the I in LIBERTY. Many doubled die cent varieties have been struck over the years, but none are as spectacular as the FS-101 1955. NGC ID# 22FG, PCGS# 2825, CoinPlex ID# LIC1955DDOBN

**Doubled Die Obverse 1955 Cent
MS64 Brown, Classic Rarity**

- 3216 1955 Doubled Die Obverse MS64 Brown NGC. FS-101.** The 1955 Doubled Die Obverse Lincoln cent is likely the best known die variety of the long-running series, although it has competition from the Strong Reverse 1922 No D. This pleasing Choice example shows remarkably strong doubling on the obverse legends. Crisply struck and satiny with glimpses of light gold color on the open fields, though lilac, olive, and tan shades dominate. NGC ID# 22FG, PCGS# 2825, CoinPlex ID# LIC1955DDOBN

**1955 Doubled Die Obverse Cent
MS64 Red and Brown
Pleasing Eye Appeal**

- 3217 1955 Doubled Die Obverse MS64 Red and Brown PCGS. FS-101. CAC.** Bright orange luster clinging to the interstices of the devices of this popular, rare variety shows through the violet-brown patina tinged with whispers of crimson. Strong doubling on the date and obverse lettering is the hallmark of this variety. This is a nicely struck piece, including all grains and lines in the wheat stalks. A few minuscule marks prevent Gem status. Nevertheless, this coin exudes extremely pleasing eye appeal. Housed in a first generation holder. PCGS# 2826, NGC ID# 22FG, CoinPlex ID# LIC1955DDORB

**Choice Red Doubled Die Obverse
1955 Cent, FS-101**

- 3218 1955 Doubled Die Obverse MS64 Red PCGS. FS-101** Orange-red luster shines forcefully on each side, though streaks of pale violet are also present along with glimpses of lilac on the upper reverse. The most famous Doubled Die Lincoln cent variety, and relatively few examples retain this much vibrancy and mint color. *Ex: Baltimore Signature (Heritage, 7/2003), lot 5707, which realized \$6,612.50.* PCGS# 2827, NGC ID# 22FG, CoinPlex ID# LIC1955DDORD

**Red Doubled Die Obverse, MS64
1955 Cent, FS-101**

- 3219 1955 Doubled Die Obverse MS64 Red PCGS. FS-101.** Most Uncirculated Doubled Die 1955 cents are brown, but this intricately struck near-Gem displays vibrant peach-red color. Speckles of olive-gray are present but mostly confined to the upper obverse. Only inconsequential marks are detected beneath a loupe. PCGS# 2827, NGC ID# 22FG, CoinPlex ID# LIC1955DDORD

**1955 Doubled Die Cent, Red Near-Gem
Widely Collected Lincoln Cent Variety**

- 3220 1955 Doubled Die Obverse MS64 Red PCGS Secure. FS-101.** Red examples of the 1955 Doubled Die cent are always the subject of strong pursuit among the legions of Lincoln cent collectors. Not only are they rare in their own right with Red surfaces, they enjoy a sentimental niche among “old-time collectors” (the present cataloger included) as one of the historic 1950s-1960s issues that helped popularize modern-day variety collecting. This near-Gem shows mostly consistent orange-red on the obverse with some deeper red on the reverse, and the strike is about average. A couple of tiny field ticks account for the grade, but carbon is conspicuously absent, and this bold “naked eye” variety looks just as startling as ever. PCGS has graded only 18 Red coins finer (12/12) PCGS# 2827, NGC ID# 22FG, CoinPlex ID# LIC1955DDORD

- 3221 1960-D Small Date MS67 Red PCGS.** A striking pumpkin-gold Superb Gem representative of this noted Small Date variant. This piece is well-defined with impressive luster and eye appeal. Population: 13 in 67 Red, 0 finer (12/12). PCGS# 2869, NGC ID# 22FX, CoinPlex ID# LIC1960DSDRD

**Doubled Die Obverse FS-101
MS67 Red 1972 Cent**

- 3222 1972 Doubled Die Obverse MS67 Red PCGS. CAC. FS-101.** A number of doubled die 1972 cent varieties are known. In fact, nine of them are listed in *Cherrypickers*¹. But only one variety, FS-101, is listed in the *Guide Book*, and it is by far the strongest doubled die for the date. Many examples were found in sealed Mint bags in Uncirculated grades by dealer John Hamrick, but Superb Gems with seamless orange-red color and mark-free surfaces remain rare. Population: 17 in 67 Red, 1 finer (11/12). PCGS# 2950, NGC ID# 22GU, CoinPlex ID# LIC1972DDORD

- 3223 1983 Doubled Die Reverse MS67 Red PCGS. FS-801.** Very strong die doubling is blatant on all reverse legends, though ONE CENT exhibits the most prominent spread. Booming luster sweeps this nearly pristine orange-red Superb Gem. Population: 33 in 67 Red, 0 finer (11/12). PCGS# 3056, NGC ID# 22HW, CoinPlex ID# LIC1983DDRRD

Rare Close AM 1992-D Cent, AU58

- 3224 1992-D Close AM AU58 PCGS. FS-901.** Proof 1992-S cents all feature a close AM in AMERICA, but that subtype was not intended for business strikes of that year, which show a wide AM in AMERICA. But apparently a single unfinished reverse die of the close AM subtype was sent to Denver. Examples went into circulation and, given their minimal face value, most were likely discarded over time. The present cent is still lustrous and displays ample brick-red. Unabrased with minor tan spotting but no evidence of corrosion. PCGS# 83099, CoinPlex ID# LIC1992DWIDEAMBN

PROOF LINCOLN CENTS

- 3225 1909 PR65 Brown PCGS.** Rich magenta and sea-green shades encompass this fully struck Gem. Carbon-free, and originally toned from the cellophane wrapper that initially housed it. Matte proof Lincoln cents are very scarce. Housed in a green label holder.
Ex: Los Angeles Signature (Heritage, 8/2009), lot 157, which realized \$1,495. PCGS# 3303, NGC ID# 22KS, CoinPlex ID# LIP1909BN

- 3226 1909 PR65 Red and Brown NGC. CAC.** Attractive orange and red shades appear on this lovely Gem, along with shades of light bright-green that are more pronounced on the reverse. This is a well-struck, high-grade first-year representative of the matte proof type. Small copper spots appear on both sides. Census: 46 in 65 Red and Brown, 23 finer (12/12). NGC ID# 22KS, PCGS# 3304, CoinPlex ID# LIP1909RB

**Gold CAC PR65 Red and Brown
1909 Lincoln Cent**

- 3227 1909 PR65 Red and Brown PCGS. CAC Gold Label.** The Gold CAC seal means that this coin exceeds the strict grading standards employed by that service. A sharply struck Gem matte proof, this piece has beautiful fire-red, peach-gold, and emerald-green hues on each side. A strong lens is required to locate the infrequent and nearly microscopic carbon.
From The SPQR Collection of CAC Gold Sticker Coins. PCGS# 3304, NGC ID# 22KS, CoinPlex ID# LIP1909RB

- 3228 1910 PR66 Red and Brown NGC.** *Ex: Eliasberg.* Rich orange and rose shades consume the obverse, though glimpses of apple-green are also present. The reverse is mostly navy-blue and sea-green with a blush of plum-red near the E in CENT.
Ex: Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 671. NGC ID# 22KT, PCGS# 3307, CoinPlex ID# LIP1910RB

- 3229 1911 PR65 Red and Brown PCGS Secure.** Attractively toned on both sides, this Gem displays iridescent shades of the rainbow, with the obverse being particularly striking in appearance. The obverse displays a few minor contact marks. Population: 63 in 65 (2 in 65+) Red and Brown, 19 finer (12/12). PCGS# 3310, NGC ID# 22KU, CoinPlex ID# LIP1911RB

1912 Matte PR66 Red and Brown Cent
Ex: Eliasberg

- 3230 1912 PR66 Red and Brown PCGS.** Ex: Eliasberg. This is one of the few matte proof cents that can boast a long and significant pedigree. Described in the Eliasberg catalog as "One of the finest seen." The surfaces show the granular texture expected of a matte proof, but each side also is covered with a plethora of colors, ranging from pastel blue to dark red and purple. We can only find one out-of-Mint imperfection, a shallow contact mark in the reverse field to the left of the O in ONE. Each side appears to be free from carbon. Housed in an old green holder.
Ex: John Clapp Collection; to Louis Eliasberg in 1942; Eliasberg Collection (Bowers and Merena, 5/1996), lot 676. PCGS# 3313, NGC ID# 22KV, CoinPlex ID# LIP1912RB

- 3231 1914 PR64 Brown PCGS. CAC.** Attractive pale lime toning appears on the brown surfaces of this near-Gem matte proof Lincoln, with splashes of orange mint color. Population: 23 in 64 Brown, 33 finer (11/12).
From The Teich Family Collection. PCGS# 3318, NGC ID# 22KX, CoinPlex ID# LIP1914BN

1914 Lincoln Cent, PR66 Brown
Only One Numerically Finer Coin at PCGS

- 3232 1914 PR66 Brown PCGS.** Hints of violet enhance the pleasing brown surfaces of this remarkable Premium Gem. The design elements exhibit the sharp definition expected of a matte proof issue and the well-preserved surfaces are free of mentionable flaws. From a matte proof mintage of 1,365 pieces. Population: 18 in 66 (2 in 66+) Brown, 1 finer (11/12). PCGS# 3318, NGC ID# 22KX, CoinPlex ID# LIP1914BN

1915 Cent, PR66 Brown
Remarkably Preserved

- 3233 1915 PR66 Brown PCGS.** From a tiny matte proof mintage of 1,150 pieces, this Premium Gem Lincoln cent is a remarkably well preserved example. The design elements are sharply rendered, and the surfaces are toned in attractive shades purple and underlying orange. Both sides yield exceptional eye appeal. Population: 16 in 66 (1 in 66+) Brown, 2 finer (12/12). PCGS# 3321, NGC ID# 22KY, CoinPlex ID# LIP1915BN

Red Gem 1915 Matte Proof Cent
Rare in Full Red

- 3234 1915 PR65 Red PCGS.** The needle-sharp strike, fine-grained surfaces, and mattelike appearance immediately qualify this piece as a proof, with almond-gold centers yielding to peach near the rims. The reverse is fire-red with traces of lavender. Certified in an old green label holder. Population: 18 in 65 Red, 8 finer (12/12). PCGS# 3323, NGC ID# 22KY, CoinPlex ID# LIP1915RD

1916 Cent, PR64 Brown
Expected Bold Strike

- 3235 1916 PR64 Brown PCGS. CAC.** A full strike with bold details is expected on this near-Gem matte proof Lincoln cent. Both sides have satin luster with tinges of faded orange mint color, blended into tan, olive, and blue-green surfaces. Population: 16 in 64 Brown, 16 finer (11/12). PCGS# 3324, NGC ID# 22KZ, CoinPlex ID# LIP1916BN

**1942 Cent, PR66 Red Cameo
Beautiful Color**

3236 1942 PR66 Red Cameo PCGS. Mirrored fields offer pleasing contrast with the satiny devices of this Premium Gem, and the design features are well delineated. Both sides display beautiful orange-gold color with a blush of crimson on Lincoln's cheek. No marks or spots are evident on either side. Population: 4 in 66 Red Cameo, 1 finer (12/12). PCGS# 83353, NGC ID# 22L9, CoinPlex ID# LIP1942RDCA

3237 1957 PR68 Ultra Cameo NGC. Richly contrasted, this wonderful example displays attractive devices and deeply mirrored surfaces. A few tiny spots appear on each side. Neither NGC nor PCGS has awarded a higher numeric grade to a single example, with this piece tied with four others as finest NGC-graded (12/12). NGC ID# 22LH, PCGS# 93380, CoinPlex ID# LIP1957RDCC

3238 1970-S Large Date PR69 Deep Cameo PCGS. Gorgeous orange and red patina covers the surfaces of this example, providing exceptional cameo contrast. A tiny spot appears above the first T in STATES. Neither NGC nor PCGS has certified any pieces finer (11/12). PCGS# 93430, NGC ID# 22M2, CoinPlex ID# LIP1970SLDRDDC

**Rare 1990 No S Proof Cent, FS-101
PR67 Deep Cameo**

3239 1990 No S PR67 Deep Cameo PCGS. FS-101. The 1990 No S is the key to the proof Memorial Reverse series. It is especially rare in high grades, since many examples exhibit green rim verdigris from longtime storage in unduly humid Mint holders. But the present Superb Gem has pristine rims in addition to a needle-sharp strike and blatant cameo contrast. The textured fields are flawless.
*Ex: St. Louis Central States Signature (Heritage, 5/2005), lot 5675.
From The J.D. Tanner Collection. PCGS# 93506, NGC ID# 274B, CoinPlex ID# LIP1990NOSRDDC*

TWO CENT PIECES

3240 1864 Small Motto MS64 Brown PCGS. CAC. FS-401. Hints of golden-brown grace the obverse margin, though the obverse center and the reverse are medium brown with gunmetal-blue undertones. Well struck save for minor blending on TRUST. Small rim breaks are on the upper left obverse. PCGS# 3579, NGC ID# 22N8, CoinPlex ID# 2CM1864SMBN

**Gem Brown 1864 Small Motto Two Cent
In-Demand First-Year Key**

3241 1864 Small Motto MS65 Brown NGC. CAC. FS-401. The first series key, the Small Motto is seldom found in Gem condition, even a Brown example as here, and they are the subject of strong demand when found so fine. The surfaces on this piece are smooth, even milk-chocolate color with little visible carbon or other distractions. A couple of tiny ticks appear in the right (facing) obverse field. A piece sure to find plenty of willing bidders. Census: 35 in 65 Brown, 5 finer (12/12). NGC ID# 22N8, PCGS# 3579, CoinPlex ID# 2CM1864SMBN

**1864 Two Cent Piece, MS64 Red and Brown
Key Small Motto Type**

3242 1864 Small Motto MS64 Red and Brown PCGS. CAC. FS-401. The 1864 two cent piece represents the first year of this odd denomination, and the Small Motto variety is much more difficult to locate than its Large Motto counterpart. This delightful Choice example is sharply detailed, with pleasing surfaces that retain most of their original copper-orange color, highlighted by areas of crimson. Population: 83 in 64 Red and Brown, 44 finer (11/12).
From The Teich Family Collection. PCGS# 3580, NGC ID# 22N8, CoinPlex ID# 2CM1864SMRB

**Widely Sought 1864 Small Motto Two Cent
Gem Red and Brown**

- 3243 1864 Small Motto MS65 Red and Brown PCGS. FS-401.** This well-struck Gem shows a total absence of carbon with excellent eye appeal throughout. The device high points are darker medium-brown but considerable mint orange-red remains in the fields on each side. Portions of the “new” motto, GOD and TRUST, are weakly struck, as often seen on the Small Motto, but the grade is accurate due to the excellent surfaces. Population: 40 in 65 Red and Brown, 4 finer (12/12). PCGS# 3580, NGC ID# 22N8, CoinPlex ID# 2CM1864SMRB

- 3244 1864 Large Motto MS65 Red PCGS.** This Gem example exhibits frosty luster and has brilliant pale orange surfaces that include small areas of fiery red. Only 47 examples have received higher numeric grades from PCGS (12/12). PCGS# 3578, NGC ID# 22N9, CoinPlex ID# 2CM1864LMRD

**1864 Two Cent Piece, MS66 Red
Popular Large Motto Type**

- 3245 1864 Large Motto MS66 Red PCGS. CAC.** The motto IN GOD WE TRUST appeared on a regular-issue U.S. coin for the first time in 1864, on the newly adopted two cent piece, with both Large and Small Motto varieties known for the date. The Large Motto is more available than its Small Motto counterpart. This delightful Premium Gem displays lustrous red surfaces and sharply detailed design elements, with outstanding eye appeal. Population: 46 in 66 Red, 1 finer (12/12). PCGS# 3578, NGC ID# 22N9, CoinPlex ID# 2CM1864LMRD

- 3246 1865 MS65 Red PCGS. Fancy 5.** A peach-red Gem with potent luster and mark-free surfaces. The reverse displays moderate carbon. Struck from widely rotated dies. The obverse die is failing left of the 1 in the date. Certified in an old green label holder. PCGS# 3584, NGC ID# 22NA, CoinPlex ID# 2CM1865RD

- 3247 1867 Doubled Die AU58 PCGS. CAC. FS-101.** *Cherrypickers'* states this *Guide Book* variety is “by far the strongest doubled die known in the two cent series.” Upper obverse elements, especially the motto, exhibit a prominent spread. The present golden-brown near-Mint example has substantial satin luster and is free from abrasions. PCGS# 3594, CoinPlex ID# 2CM1867DDBN

- 3248 1872 XF45 PCGS.** Attractive medium brown color on both sides along with overall even wear add to the attractiveness of this Choice XF piece. Although there are a number of contact marks, they are not overly distracting. Several small die cracks appear near the lower reverse. This was the last business strike of the ill-fated and hugely unpopular two cent series, one that lasted only a single decade and amounts to little more than a footnote in the sweep of U.S. numismatic history. The 1872 saw coinage of a skimpy 65,000 pieces, and many were likely melted shortly after their production. PCGS# 3612, NGC ID# 22NG, CoinPlex ID# 2CM1872BN

- 3249 1872 AU55 NGC. FS-101.** TRUST is lightly die doubled. A die scratch through the upper loop of the S in STATES is diagnostic for the variety. However, any 1872 two cent piece is desirable, since the final year business issue was limited to 64,000 pieces. Toned mahogany-brown with olive-green high points. NGC ID# 22NG, PCGS# 3612, CoinPlex ID# 2CM1872BN

**1872 Two Cent, Doubled Die Obverse
FS-101, MS65 Red and Brown**

- 3250 1872 Doubled Die Obverse MS65 Red and Brown PCGS. CAC. FS-101.** The doubling visible on the obverse was caused when an Obverse of 1870 hub was struck over an Obverse of 1869 hub, producing the doubling most visible on the D of GOD and the two T's in TRUST in the motto; the spread grows from left to right in the motto. The 1872 two cent is a scarce date in any case, but this Gem Doubled Die should spur added interest. The surfaces show some sandy-tan remaining in the fields, mainly closer to the rims, and bright reddish color within and surrounding the devices. The strike is quite sharp, and carbon is absent. A super example of this key date and cool *Cherrypickers'* variety. Population: 3 in 65 Red and Brown, 0 finer (12/12). PCGS# 38293

PROOF TWO CENT PIECES

3251 1864 Large Motto PR63 Red and Brown PCGS. A delightful example of the first two-cent piece, this example shows considerable orange mint color with splashes of violet and brown toning. A few inactive carbon spots are evident.
From The Teich Family Collection. PCGS# 3622, NGC ID# 274T, CoinPlex ID# 2CP1864LMRB

3252 1864 Large Motto PR64+ Red and Brown NGC. An appealing high-end near-Gem, this piece exhibits attractively mirrored fields with contrasting devices. A wide array of colors appears on both sides, including red, pink, fuchsia, green, plum, and russet. Census: 29 in 64 (1 in 64+) Red and Brown, 45 finer (12/12). NGC ID# 274T, PCGS# 3622, CoinPlex ID# 2CP1864LMRB

Proof Red Gem 1865 Two Cent

3253 1865 PR65 Red PCGS. Plain 5. Fully struck and flashy with radiant cherry-red and lime-green surfaces. A few tiny obverse flecks are distributed. Though 1865 business strikes are plentiful, this Civil War date has a proof mintage of just 500+ pieces. Housed in a first generation holder. Population: 15 in 65 Red, 7 finer (11/12). PCGS# 3629, NGC ID# 274U, CoinPlex ID# 2CP1865RD

3254 1870 PR65 Red PCGS. Lovely wheat-gold color envelops both sides of this attractive Gem, with areas of red, plum, and blue covering large portions of the obverse design. A lint mark appears near 9 o'clock on the obverse and die polish lines (as made) are also seen. Although a few copper spots appear, they are minor. This is a lovely, eye-catching representative. Population: 38 in 65 (1 in 65+) Red, 10 finer (12/12).
From The Richard P. Ariagno, M.D. Collection. PCGS# 3644, NGC ID# 274Z, CoinPlex ID# 2CP1870RD

1876 Two Cent Piece, PR66 Red Only Two Finer Red Coins at NGC

3255 1870 PR66 Red NGC. The 1870 proof two cent piece claims a fairly generous mintage of 1,000 pieces, but few survivors can match the appeal of the present Premium Gem. This coin displays deeply mirrored original red surfaces that show few signs of contact. The design elements are sharply detailed and eye appeal is outstanding. Census: 12 in 66 Red, 2 finer (12/12). NGC ID# 274Z, PCGS# 3644, CoinPlex ID# 2CP1870RD

3256 1871 PR64 Red PCGS. The original orange-red surfaces of this impressive Choice example show some areas of light brown and burnt-orange patina, with deeply reflective fields and sharply detailed design elements. Population: 44 in 64 Red, 52 finer (11/12).
From The Teich Family Collection. PCGS# 3647, NGC ID# 22NH, CoinPlex ID# 2CP1871RD

Red PR66 1871 Two Cent Piece No Finer PCGS-Graded Examples

3257 1871 PR66 Red PCGS. CAC. A very attractive example, this coin displays honey-gold, fuchsia, and bright olive-green colors. TRUST is clearly die doubled, a diagnostic for proofs of this date. Full Red specimens are very scarce as the majority of the survivors are Red and Brown. Minuscule carbon spots near the outer edges, primarily on the obverse, do not detract from the eye appeal of this Premium Gem. James B. Longacre included a variation of this shield on his design of the Shield nickels. PCGS has yet to grade a finer example, while NGC has awarded a higher numeric grade to only one coin (11/12). PCGS# 3647, NGC ID# 22NH, CoinPlex ID# 2CP1871RD

3258 1872 PR65 Red and Brown NGC. Splashes of deep orange, fuchsia, and russet decorate both sides of this Gem. This is a better proof date due to the scarceness of business strikes. Census: 75 in 65 Red and Brown, 38 finer (12/12). NGC ID# 2752, PCGS# 3649, CoinPlex ID# 2CP1872RB

**1873 Two Cent Piece, PR64 Red and Brown
Proof-Only Date, Original Closed 3 Type**

- 3259 1873 Closed 3 PR64 Red and Brown NGC.** A proof-only issue struck early in 1873. The two-cent piece of this final year exists solely in proof format from Closed 3 and Open 3 obverse dies. This splendid near-Gem displays a nice blend of light orange luster with splashes of bluish-brown patina. Census: 50 in 64 Red and Brown, 97 finer (12/12). NGC ID# 2753, PCGS# 3652, CoinPlex ID# 2CP1873CL3RB

**PR65 Red and Brown
Closed 3 1873 Two Cent**

- 3260 1873 Closed 3 PR65 Red and Brown NGC.** The two cent denomination began in 1864 with high mintages but ended its 10-year run with a proof-only date. Closed 3 pieces are original strikings while the Open 3 specimens are considered restrikes, though possibly coined the same year. An exquisite orange-gold Gem with just enough mellowing in color to qualify as Red and Brown. A vintage 1960s coin envelope from the Florida firm French's is included with the lot. NGC ID# 2753, PCGS# 3652, CoinPlex ID# 2CP1873CL3RB

**1873 Two Cent Piece, PR65+ Red and Brown
Closed 3 Original, Only 600 Pieces Struck**

- 3261 1873 Closed 3 PR65+ Red and Brown PCGS. CAC.** A small proof-only mintage of 600 two cent pieces was accomplished in 1873, the last year of the denomination. All original proofs have the Closed 3 in the date, but a restrike issue is known, all of the Open 3 type. This high-end Gem is a sharply detailed Closed 3 example with reflective, unmarked fields that retain much of their original copper-red color amid hints of light brown and lemon-yellow. Population: 87 in 65 (1 in 65+) Red and Brown, 18 finer (11/12). From *The Teich Family Collection*. PCGS# 3652, NGC ID# 2753, CoinPlex ID# 2CP1873CL3RB

THREE CENT SILVER

First-Year Gem 1851 Three Cent Silver

- 3262 1851 MS65 NGC.** Delicate patina, gold to olive and the shades in between, graces the peripheral zones on this first-year Gem. The interiors are more silver and sage. Pleasingly detailed for the date and housed in an early NGC holder with "fat" white plastic and an external hologram on the back. From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22YX, PCGS# 3664, CoinPlex ID# 3CS1851

**Premium Gem 1851-O Three Cent Silver
Sole Branch Mint Issue in Series**

- 3263 1851-O MS66 NGC.** The New Orleans Mint, the "other" silver-striking facility in the U.S. Mint system in the 1850s, struck the three cent silver denomination for its 1851 debut but in no other years. This high-end Premium Gem has rich gold, tan, and crimson field patina surrounding the still-silvery star-frost. Housed in a prior-generation holder. Census: 13 in 66, 3 finer (11/12). From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22YY, PCGS# 3665, CoinPlex ID# 3CS1851O

**Gem 1852 Three Cent Silver
Distinctive Patina**

- 3264 1852 MS65 NGC.** Silver at its core with generous luster but also considerable overtones, mainly pale blue on the obverse but with light echoes of the gold-green and sage shadings enriching the reverse. Dapples of indigo stand out to the left of the ornate "C" on the latter side. Housed in a prior-generation holder. From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22YZ, PCGS# 3666, CoinPlex ID# 3CS1852

**Lustrous Gem 1853 Trime
Pleasing Patina**

- 3265 1853 MS65 NGC.** Distinct rose and fainter blue overtones occupy the centers on this subtly frosted silver piece, while the margins have patchy but deep crimson and orange shadings. A noteworthy Gem from an issue that is scarce any better, housed in an early holder with external NGC hologram.
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22Z2, PCGS# 3667, CoinPlex ID# 3CS1853

**Gem 1854 Three Cent Silver
Start of Double-Outline Type**

- 3266 1854 MS65 NGC.** Silver-to-peach on the interiors with richer blues and violets around the margins. Swirling luster is uncommonly lively for the issue and one of this well-preserved Gem's great pleasures. Housed in a prior-generation NGC holder with outer holographic label. Census: 28 in 65, 5 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22Z3, PCGS# 3670, CoinPlex ID# 3CS1854

Richly Toned Gem 1855 Trime

- 3267 1855 MS65 NGC.** This boldly toned beauty shows a rich mix of hues, including peach, green, blue, and violet. Internal detail appears strong, though the tiny stars around the peripheral reverse show isolated softness. Conditionally rare any finer and housed in a prior-generation holder. Census: 10 in 65, 6 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22Z4, PCGS# 3671, CoinPlex ID# 3CS1855

Colorful MS65 1856 Three Cent Silver

- 3268 1856 MS65 NGC.** Silver, gold-gray, and orange shadings are common to each side, but the blue-to-violet hues prominent at the upper and right obverse have only a faint echo on the frosty reverse. Softly struck but boldly lustrous, a Gem housed in an early-generation holder with external sticker. Census: 14 in 65, 4 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22Z5, PCGS# 3672, CoinPlex ID# 3CS1856

**1857 Three Cent Silver, MS65
Multihued Patina**

- 3269 1857 MS65 NGC.** Richly toned with orange and silver-green outer hues that give way to indigo, violet, and plum-rose shadings on the interiors. Great luster and preservation. The older-generation NGC holder has an external, raised NGC logo in gold on the back. Census: 35 in 65, 14 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22Z6, PCGS# 3673, CoinPlex ID# 3CS1857

**MS65 1858 Three Cent Silver
Flashy Obverse, Iridescent Reverse**

- 3270 1858 MS65 NGC.** Clearly silver at the base but with "waves" of gold, green, and blue enriching parts of each side, more notably the reverse. Flashy luster characterizes the obverse, while the other side is more frosty. Great eye appeal for this last double-outline three cent silver issue. Census: 47 in 65, 29 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22Z7, PCGS# 3674, CoinPlex ID# 3CS1858

**Gem 1859 Three Cent Silver
Start of Single-Outline Obverse**

- 3271 1859 MS65 NGC.** The first year of single-outline design around the star on the obverse. Dusky surfaces light up at the correct angle to the light, showing nuance to the lavender, blue, and gold-gray shadings enriching each side. Housed in a prior-generation holder. Census: 37 in 65, 17 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22Z8, PCGS# 3677, CoinPlex ID# 3CS1859

**MS65 1861 Three Cent Silver
Luxurious Patina**

- 3272 1861 MS65 NGC.** Bold sapphire patina covers much of each side, though the hue lightens slightly on the reverse, which has more of the complementary silver-green color. Strong all-around detail and eye appeal to match for this issue struck on the cusp of the Civil War. Housed in a prior-generation holder.
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22ZA, PCGS# 3679, CoinPlex ID# 3CS1861

**1862/1 Overdate Trime
Border-Toned Gem**

- 3273 1862/1 MS65 NGC. FS-301.** The ghost of the underlying 1 at the date is visible through the considerable patina at the borders, dappled blue, pink, and gold. The reverse shows greater coverage of such colors into the silver-based interiors with softly swirling luster. The encapsulation is of an earlier generation with external hologram.
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22ZC, PCGS# 3681, CoinPlex ID# 3CS1862OVR1

Boldly Toned MS65 1862 Three Cent Silver

- 3274 1862 MS65 NGC.** The toning alone almost is worth the price of admission, small silver centers wrapped in narrow peach-orange bands that give way to blue and aqua shadings. Generous luster and impressive preservation complete the eye appeal. Housed in an earlier holder with external sticker.
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22ZB, PCGS# 3680, CoinPlex ID# 3CS1862

**Colorful MS65 1863 Three Cent Silver
Little-Distributed Issue**

- 3275 1863 MS65 NGC.** Starting with the 1863 issue, the mintages were small for the three cent silver, and the dates saw little release to the outside marketplace. This sharply struck and gleaming Gem has enough wateriness to the reflectivity to confirm its Mint State *bona fides*. Bold peach, green, blue, and violet patina enhances the eye appeal. Housed in an earlier holder. Census: 14 in 65, 18 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22ZD, PCGS# 3682, CoinPlex ID# 3CS1863

**Lightly Patinated 1864 Three Cent
Last All-Silver Year for Denomination**

- 3276 1864 MS65 NGC.** Delicate pink-gold, lavender, and violet-blue hues wash over the surfaces of this gleaming Civil War-era three cent silver piece. The Mint State issue for the 1864 was melted *en masse* after the Coinage Act of 1873, and examples such as this are scarce today. Prior-generation holder. Census: 12 in 65, 27 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22ZE, PCGS# 3684, CoinPlex ID# 3CS1864

**Colorful MS65 1865 Three Cent Silver
First Year of Simultaneous Three Cent Coinage**

- 3277 1865 MS65 NGC.** Light green border-toning gives way to deeper cerulean and almost-violet patina at the interiors. Luminous surfaces lack the blazing reflectivity of proofs, though the central detail is appealing. Well-preserved and housed in an earlier-generation holder. Census: 9 in 65, 18 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22ZF, PCGS# 3685, CoinPlex ID# 3CS1865

**Premium Gem 1866 Three Cent Silver
Elusive Mint State Survivor**

- 3278 1866 MS66 NGC.** By 1866, the silver three cent and half dime denominations were being coined alongside their copper-nickel replacements. This trime is one of the few to escape the Mint and subsequent destruction in 1873. Dappled gold, orange, blue, and violet toning enriches much of each side. Housed in a prior-generation holder. Census: 12 in 66, 3 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22ZG, PCGS# 3686, CoinPlex ID# 3CS1866

Generously Toned MS65 1867 Three Cent Silver

- 3279 1867 MS65 NGC.** Lavender-blue and silver-gray patina shows accents in muted gold and orange. This Gem is flashy under the toning and has great all-around quality. Only 4,000 business strikes were produced, and this coin has strong definition. The prior-generation holder has an external hologram. Census: 7 in 65, 4 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22ZH, PCGS# 3687, CoinPlex ID# 3CS1867

**Gem Mint State 1868 Three Cent Silver
Decidedly Prooflike Appearance**

- 3280 1868 MS65 NGC.** This Mint State coin could be mistaken for a proof at first glance, as the piece has strong reflectivity and even cameo contrast on the obverse, which has a silver-frosted star surrounded by bands of pink, blue, and pale green. Similar hues in different orders saturate the reverse. Great all-around appeal. The external hologram on the earlier-generation holder has seen better days. Census: 5 in 65, 2 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22ZJ, PCGS# 3688, CoinPlex ID# 3CS1868

**Superb Gem 1869 Three Cent Silver
Great Preservation and Luster**

- 3281 1869 MS67 NGC.** The single highest-graded example in the collection, and what a coin for it to be! Outer greenish hues yield to blue and eventually rose. Impressively preserved with watery luster. The NGC logo on the back of the old-style holder is embossed gold. Census: 2 in 67, 0 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22ZK, PCGS# 3689, CoinPlex ID# 3CS1869

Deeply Toned MS65 1870 Three Cent Silver

- 3282 1870 MS65 NGC.** The obverse has dusky rose patina with blue-violet framing, while the latter color occupies the reverse interior with a greenish hue around. A charming Mint State Gem from an issue of just 3,000 business strikes, housed in an earlier-generation holder with external sticker. Census: 9 in 65, 6 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22ZL, PCGS# 3691, CoinPlex ID# 3CS1870

**Gem Mint State 1871 Three Cent Silver
Frosted Devices**

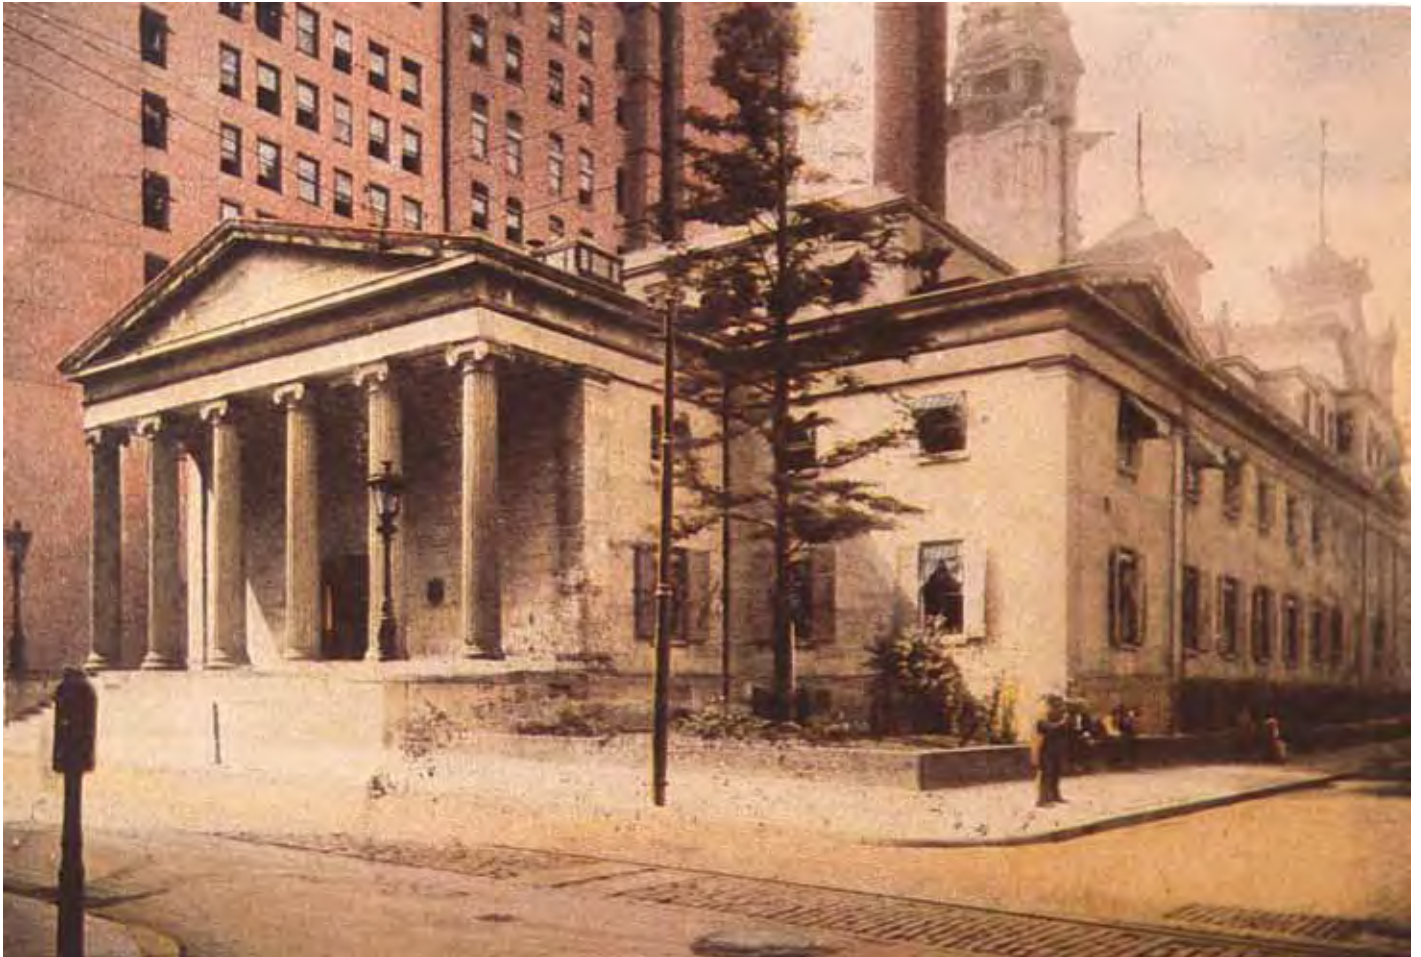

- 3283 1871 MS65 NGC.** Semireflective and lightly contrasted, this piece has a silver base with pink-gold and violet-blue overtones over parts of each side. Impressively preserved for this later issue that saw a business strike mintage of only 3,400 pieces. Prior-generation holder. Census: 18 in 65, 48 finer (11/12).
From The Walter Freeman Collection of Three Cent Silvers. NGC ID# 22ZM, PCGS# 3692, CoinPlex ID# 3CS1871
-

**1872 Three Cent Silver, MS65
From the Last Mint State Issue**

- 3284 1872 MS65 NGC.** The 1872 issue is the last available in Mint State, as the Mint had not gotten around to the annual token business strikes when the Coinage Act of 1873 was passed. In 1872, only 1,000 pieces (nominally) for circulation were produced. This Gem has silver, gold, and orange on each side with additional blue-to-violet elements on the reverse. An attractive piece housed in a prior-generation holder with external hologram. Census: 8 in 65, 3 finer (11/12).
From The Walter Freeman Collection of Three Cent Silvers. NGC ID# 22ZN, PCGS# 3693, CoinPlex ID# 3CS1872

PROOF THREE CENT SILVER

Gem Proof 1854 Three Cent Silver The Magnificent Garrett Specimen

3285 1854 PR65 NGC. The three cent silver pieces of 1854 mark a “treble transition” for the denomination. Not only were such coins made of 90% silver rather than the 75% silver alloy that had ensured the coins would circulate in the pre-1853 monetary environment, the coins underwent design changes on both obverse and reverse. On the obverse, a double outline was placed around the star, while the reverse added an olive branch above and bundled arrows below. This design remained in effect through 1858. The next year, 1859, only a single outline framed the star, and this modified obverse carried through to the end of the series.

Proof Type Two three cent silver coins are notoriously elusive. Only the last issue from 1858 saw regular distribution to collectors, and even that date saw only a couple hundred pieces struck at most. The earlier the year, the more challenging the proof, and the 1854 is at the apex. Very rare at best, the proof 1854 three cent silver has come to Heritage’s auction block just eight times in the past two decades, *this appearance included*.

This Gem specimen formerly was in the Garrett Collection and appeared in the third sale. This cataloger agrees with the description from 1980 of the patina as “iridescent,” though “magenta” overstates the reddish-gold element on otherwise blue-green and sage surfaces. A deep dot above the upper right “arm” of the obverse star allows for plate-matching and future identification. Housed in an early-generation “fat” NGC holder with external hologram label.

Ex: 55th Sale (W. Elliot Woodward, 5/1883), possibly part of lot 1454; T. Harrison Garrett; Robert Garrett; John Work Garrett; Johns Hopkins; Garrett III (Bowers and Ruddy, 10/1980), lot 1551.

From The Walter Freeman Collection of Three Cent Silvers. NGC ID# 27BZ, PCGS# 3701, CoinPlex ID# 3SP1854

**Colorful Gem Proof 1855 Three Cent Silver
Distinct, Unacknowledged Contrast**

- 3286 1855 PR65 NGC.** The 1855 three cent silver proof, never distributed in large quantities, today is a rarity regardless of grade with only 50 or so surviving specimens estimated. In a broader sense, as a representative of the Type Two design in proof, it is also a category rarity as well. This is a gorgeous Gem representative, boldly reflective and semicontrasted under orange, gold, green, and blue patina. All-around eye appeal is magnificent. This PR65 specimen is housed in an early-generation holder with external hologram, which helps explain the lack of consideration for a Cameo designation in the contemporary sense. Census: 9 in 65, 5 finer (11/12).
From The Walter Freeman Collection of Three Cent Silvers. NGC ID# 27C2, PCGS# 3702, CoinPlex ID# 3SP1855

**1856 Three Cent Silver, PR65
Richly Toned**

- 3287 1856 PR65 NGC.** The Type Two three cent silver design was short-lived (1854-1858) and coined mostly in a time when proofs were available only through specific connections, as regular sales did not begin until the final year in the range of five. This Gem specimen from the middle date is a rare high-grade survivor of considerable importance. Flickers of golden-rose patina near the centers give way to rich blue patina, while a few whispers of sea-green are visible at the margins on each side. Housed in a prior-generation NGC holder with external hologram. Census: 5 in 65, 2 finer (11/12).
From The Walter Freeman Collection of Three Cent Silvers. NGC ID# 27C3, PCGS# 3703, CoinPlex ID# 3SP1856

**Gem Proof 1857 Three Cent Silver
Elusive Issue, Rich Patina**

- 3288 1857 PR65 NGC.** An elusive Type Two three cent silver proof struck the year before the U.S. Mint began regular sales of proof sets to collectors. Both sides of this Gem are reflective under rich patina that ranges from pale aqua to deep blue hues that approach violet. Housed in a prior-generation NGC holder that has a gold-embossed NGC logo on the back.
From The Walter Freeman Collection of Three Cent Silvers. NGC ID# 27C4, PCGS# 3704, CoinPlex ID# 3SP1857

Colorful Gem Proof 1858 Three Cent Silver

- 3289 1858 PR65 NGC.** A boldly toned Gem specimen from the last Type Two proof three cent silver issue and the first such date to see wide distribution in U.S. Mint sets. Dappled blue, green, and gold shadings converge to the last hue across the centers. The prior-generation holder has the external hologram largely worn away. *From The Walter Freeman Collection of Three Cent Silvers.* NGC ID# 27C5, PCGS# 3705, CoinPlex ID# 3SP1858

Strongly Toned PR65 1859 Trime

- 3290 1859 PR65 NGC.** Strikingly toned blue, green, and peach, the last color primarily on the reverse. The underlying luster is bold on this PR65 example of the initial Type Three trime issue. Housed in an earlier holder with (largely missing) external hologram. Census: 21 in 65, 11 finer (11/12). *From The Walter Freeman Collection of Three Cent Silvers.* NGC ID# 27C6, PCGS# 3708, CoinPlex ID# 3SP1859

**1860 Three Cent Silver, PR65
Bold Patina**

- 3291 1860 PR65 NGC.** Gloriously toned with a cascade of liquid green-to-blue shadings and a few touches of champagne. The underlying reflectivity remains strong, and the central detail is sharp despite a touch of bluntness on a few outer stars. The external hologram on the back of the prior-generation holder is intact. Census: 11 in 65, 3 finer (11/12). *From The Walter Freeman Collection of Three Cent Silvers.* NGC ID# 27C7, PCGS# 3709, CoinPlex ID# 3SP1860

**PR65 1861 Three Cent Silver
Limpid Fields Under Patina**

- 3292 1861 PR65 NGC.** Attractive periwinkle-to-denim blue shadings dominate the fields on each side. The obverse interior is lavender, while the reverse has peach-to-champagne hues. Excellent reflectivity and all-around quality. Housed in an older holder with external hologram. Census: 15 in 65, 10 finer (11/12). *From The Walter Freeman Collection of Three Cent Silvers.* NGC ID# 27C8, PCGS# 3710, CoinPlex ID# 3SP1861

**PR65 1862 Three Cent Silver
Civil War Issue**

- 3293 1862 PR65 NGC.** One of only 550 proofs minted for the year, this Gem proof gleams strongly through the obverse patina, while the reverse is a touch less reflective. Both sides have rich color, pale green at the outer zones turning deep blue. The external hologram on the reverse is about 1/3 visible. Census: 25 in 65, 17 finer (11/12). *From The Walter Freeman Collection of Three Cent Silvers.* NGC ID# 27C9, PCGS# 3711, CoinPlex ID# 3SP1862

**Colorful PR65 1863/2' Trime
Unusual Variety**

- 3294 1863/2 PR65 NGC.** While contemporary scholars have their doubts about this variety's overdate status, that certain "something" under the 3 in the date is present on this gleaming Gem proof. Bold aqua-blue patina covers the obverse and the outer reverse, while the interior on the latter side has a pale golden hue. Both sides have cameo contrast unacknowledged on the old-style holder. A sizable planchet flaw is noted just off the upper left point of the star. NGC makes no mention of the variety in its *Census Report*. *From The Walter Freeman Collection of Three Cent Silvers.* NGC ID# 22ZP, PCGS# 3713, CoinPlex ID# 3SP1863OVR2
-

PR65 1863 Three Cent Silver
Modest Contrast Through Toning

- 3295 1863 PR65 NGC.** Starting with 1863, the proof issues of three cent silver are more available to today's collectors than their Mint State counterparts, which experienced mass melting in 1873. A lightly toned and gleaming Gem, this specimen has a delightful overlay of lavender, blue, and gold toning. Prior-generation holder, external hologram intact. Census: 18 in 65 (1 in 65+), 21 finer (11/12).
From The Walter Freeman Collection of Three Cent Silvers. NGC ID# 22ZP, PCGS# 3712, CoinPlex ID# 3SP1863

Multihued PR65 1864 Trime

- 3296 1864 PR65 NGC.** Splashes of green and orange through the centers compete for space with the shades of blue that shimmer at the outer zones. Glossy and carefully preserved surfaces remain under the toning. One of just 470 specimens struck, and housed in a prior-generation holder with external hologram sticker. Census: 39 in 65, 23 finer (11/12).
From The Walter Freeman Collection of Three Cent Silvers. NGC ID# 27CA, PCGS# 3714, CoinPlex ID# 3SP1864

Colorful Gem Proof 1865 Three Cent Silver

- 3297 1865 PR65 NGC.** Lovely blue, sea-green, and dusky peach shadings enrich this carefully preserved and gleaming Gem specimen, one of only 500 specimens struck for this final year of the Civil War and the last year in which three cent coins were struck exclusively in silver alloys. Census: 26 in 65, 23 finer (11/12).
From The Walter Freeman Collection of Three Cent Silvers. NGC ID# 27CB, PCGS# 3715, CoinPlex ID# 3SP1865

1866 Three Cent Silver, Gleaming PR65

- 3298 1866 PR65 NGC.** The gleam of reflective luster is uncommonly clear on this Gem specimen despite the richness of the coin's gold, green, blue, and gray patina. Both sides have a considerably contrasted appearance, though the old-style NGC holder with external hologram makes no mention of any Cameo status. Census: 33 in 65, 15 finer (11/12).
From The Walter Freeman Collection of Three Cent Silvers. NGC ID# 27CC, PCGS# 3716, CoinPlex ID# 3SP1866

Gem Proof 1867 Three Cent Silver
Effectively Cameo Obverse

- 3299 1867 PR65 NGC.** The two sides have roughly inverse appearances, with the light gold and peach toning at the center of the obverse and blue-green patina around swapping places on the reverse. The star and gleaming fields offer grand contrast, the other side less so. Census: 50 in 65, 32 finer (11/12).
From The Walter Freeman Collection of Three Cent Silvers. NGC ID# 27CD, PCGS# 3717, CoinPlex ID# 3SP1867

1868 Three Cent Silver, Boldly Toned PR65

- 3300 1868 PR65 NGC.** By 1868, the three cent silver denomination was dead in circulation and dying as a proof coin. This Gem proof, however, comes alive with green, blue, violet, and peach shadings let up by gleaming reflectivity. A charismatic coin housed in a prior-generation holder. Census: 48 in 65, 21 finer (11/12).
From The Walter Freeman Collection of Three Cent Silvers. NGC ID# 27CE, PCGS# 3718, CoinPlex ID# 3SP1868

**Gem Proof 1869 Three Cent Silver
Gorgeous Patina**

- 3301 1869 PR65 NGC.** Blue-to-lavender patina across each side with a narrow band of green around the obverse and a wider crescent accenting the left reverse. Great reflectivity through the patina. This is the last proof issue with a mintage of 600 pieces until the series-capper in 1873. Census: 42 in 65, 26 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22ZR, PCGS# 3719, CoinPlex ID# 3SP1869

**1869/'8' Three Cent Silver, PR65
Colorful Specimen**

- 3302 1869/8 PR65 NGC.** This variety no longer appears in NGC's *Census Report*, but an underlying feature — at one time theorized to be an overdate — appears in the space between loop and ball on the 9 in the date. The obverse shows a progression from outer green to blue and lavender, while the reverse has pale gold at the upper zone with bands of orange, peach, crimson-violet, and blue radiating out.
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 22ZR, PCGS# 3720, CoinPlex ID# 3SP1869OVR8

**1870 Trime, PR65
Dappled Toning**

- 3303 1870 PR65 NGC.** Dappled sea-green and blue luster with a significant silver-gray undertone. This is a grandly reflective and gorgeous Gem with frosted devices, though the contrast is limited. At 1,000 specimens struck, the 1870 three cent issue is tied for the highest mintage in the series, but high-quality examples are scarce. Census: 35 in 65, 30 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 27CF, PCGS# 3721, CoinPlex ID# 3SP1870

**PR65 1871 Three Cent Silver
Target-Toned Obverse**

- 3304 1871 PR65 NGC.** Blue-and-gold on the reverse with more comprehensive "target" toning on the obverse that includes an indigo ring and peach circle centered on the shield within the star. A gleaming and gorgeous specimen, housed in an early holder with external hologram sticker. Census: 31 in 65, 26 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 27CG, PCGS# 3722, CoinPlex ID# 3SP1871

**1872 Three Cent Silver, PR65
Colorful Dappled Patina**

- 3305 1872 PR65 NGC.** The last three cent silver issue struck both as a business strike and proof, the 1872 saw nearly equal mintages between the two at 1,000 "circulating" coins to 950 proof specimens. This gorgeously toned specimen has champagne, gold, green, and blue hues enriching each side and bold underlying reflectivity. Census: 41 in 65 (1 in 65+), 26 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 27CH, PCGS# 3723, CoinPlex ID# 3SP1872

**Proof-Only 1873 Three Cent Silver
Richly Toned Gem**

- 3306 1873 PR65 NGC.** The 1873 three cent silvers, all proofs of the Closed 3 type, number just 600 pieces and act as a coda to the series. This richly toned Gem specimen has great reflectivity with pale emerald patina along much of the margins and bold lapis-blue and amethyst shadings on the interiors. Census: 67 in 65 (1 in 65+), 29 finer (11/12).
From *The Walter Freeman Collection of Three Cent Silvers*. NGC ID# 27CJ, PCGS# 3724, CoinPlex ID# 3SP1873

ADDITIONAL THREE CENT SILVER

Gem 1851-O Three Cent Silver Multicolor Toning

- 3307 1851-O MS65 PCGS. CAC.** Dappled apple-green, ruby-red, straw-gold, and lilac-gray endow this unabraded and satiny Gem. Well struck at the centers though the peripheral stars are softly brought up. The sole branch mint issue of the denomination. Encapsulated in an old green label holder. Population: 41 in 65, 16 finer (12/12). PCGS# 3665, NGC ID# 22YY, CoinPlex ID# 3CS18510

- 3308 1852 MS66 PCGS. CAC.** A satiny yet bright second-year three cent silver with a touch of peach at the central obverse and pale silver-blue shadings elsewhere. Well-struck overall, if a touch soft on certain stars. Housed in a green label holder.
From The Richard P. Ariagno, M.D. Collection. PCGS# 3666, NGC ID# 22YZ, CoinPlex ID# 3CS1852

1852 Three Cent Silver, MS67 No Finer Example Graded by NGC

- 3309 1852 MS67 NGC.** This second-year trime has gold-to-green patina with additional red elements on both sides, with the colors on the obverse being particularly vibrant. This is a lovely, well-struck and carefully preserved Superb Gem with eye appeal. Census: 14 in 67, 0 finer (11/12). NGC ID# 22YZ, PCGS# 3666, CoinPlex ID# 3CS1852

1854 Three Cent Silver, MS65 Scarce Variety Two Design

- 3310 1854 MS65 PCGS.** The double-outlined star is the second and scarcest of the three design subtypes for the series. The present Gem displays light sun-gold toning. The lustrous surfaces appear pristine. Struck from boldly clashed dies. Housed in a green label holder. Population: 49 in 65 (4 in 65+), 8 finer (12/12). PCGS# 3670, NGC ID# 22Z3, CoinPlex ID# 3CS1854

- 3311 1855 MS64 PCGS. Breen-2920.** The date is nicely repunched within the 5s in the date. Satiny and unabraded with dusky stone-gray, golden-brown, and fire-red toning. Well struck at the centers though the peripheral stars are soft. Population: 41 in 64, 19 finer (11/12). PCGS# 3671, NGC ID# 22Z4, CoinPlex ID# 3CS1855

Gem 1856 Three Cent Silver Green Label Holder

- 3312 1856 MS65 PCGS. CAC.** The Type Two or "double-outline" three cent silver design was short-lived and is challenging in Gem condition. On this example, gold and peach patina settles over luminous surfaces that are otherwise pale silver-gray. Housed in a green label holder. Population: 21 in 65, 3 finer (12/12).
From The Richard P. Ariagno, M.D. Collection. PCGS# 3672, NGC ID# 22Z5, CoinPlex ID# 3CS1856

- 3313 1857 MS65 NGC.** Two outlines rings the central obverse star on this Gem 1857 Type Two, among the last 1 million-plus mintages in the series, and thus often sought for type purposes. This is a nicely struck Gem with areas of frosty silver competing against lightly toned pinkish-gray. Note the overlarge date characteristic of the issue. Census: 35 in 65, 14 finer (12/12). NGC ID# 22Z6, PCGS# 3673, CoinPlex ID# 3CS1857

- 3314 1862/1 MS66 NGC. FS-301.** The vertical die crack through the 1 in the date confirms the variety. The upright of the underdigit is clear when studied beneath a loupe. Sharply struck and lustrous with splendid dappled jade-green and rose-red patina. Both sides are boldly clashed. Certified in a former generation holder. Census: 62 in 66, 12 finer (12/12). NGC ID# 22ZC, PCGS# 3681, CoinPlex ID# 3CS1862OVR1

1862 Three Cent Silver, Richly Toned MS67

- 3315 1862 MS67 NGC.** The 343,000 business strikes for the 1862 three cent silver make it the last issue of its kind to be readily available across most grades. "Most grades," however, does not include MS67, where this example is one of 31 pieces tied for numerically finest in the combined certified population (12/12). Both sides are strongly lustrous beneath blankets of multicolored toning, with azure, plum, fire-orange, and rose-gold hues prominent.
Ex: Long Beach Signature (Heritage, 2/2010), lot 215. NGC ID# 22ZB, PCGS# 3680, CoinPlex ID# 3CS1862

Choice 1863 Trime
Popular Civil War Date

- 3316 1863 MS64 PCGS. CAC.** Both sides of this impressive Choice specimen show prooflike reflectivity under attractive shades of champagne-gold toning. The design elements are sharply detailed throughout and eye appeal is quite strong. From a business-strike mintage of 21,000 pieces. Population: 20 in 64, 31 finer (12/12). From *The Richard P. Ariagno, M.D. Collection*. PCGS# 3682, NGC ID# 22ZD, CoinPlex ID# 3CS1863

1865 Three Cent Silver, MS66
Wonderfully Preserved

- 3317 1865 MS66 NGC.** This lovely Premium Gem displays just a hint of gold color at the margins, and a solid strike leaves full delineation on the design elements. This is a wonderfully preserved piece. Clash marks are evident on both sides. Census: 14 in 66, 4 finer (12/12). NGC ID# 22ZF, PCGS# 3685, CoinPlex ID# 3CS1865

- 3318 1871 MS66 NGC. CAC.** Ex: Farris Collection. Cherry-red, cobalt-blue, and sun-gold adorn this prooflike Premium Gem. Incompleteness of strike on the shield confirms the business origin, from a scant mintage of 3,400 pieces. Housed in a former generation holder. Census: 32 in 66, 16 finer (11/12). NGC ID# 22ZM, PCGS# 3692, CoinPlex ID# 3CS1871

Colorful 1871 Three Cent Silver
MS67 Prooflike

- 3319 1871 MS67 Prooflike NGC.** A scant 3,400 commercial strikes were coined, likely to prevent the proofs of the same date from trading for an immediate premium. The present Superb Gem offers jade-green centers and rose-red and butter-gold borders. Well struck and flashy with no visible imperfections. Census: 3 in 67 Prooflike, none finer (12/12). NGC ID# 22ZM, PCGS# 3692, CoinPlex ID# 3CS1871

PROOF THREE CENT SILVER

1855 Three Cent Silver, PR64
Scarce Type Two Proof

- 3320 1855 PR64 PCGS.** An unknown but small number of proofs were struck in 1855. Probably somewhere around 50 pieces are extant today. Only 50 pieces have been certified in all grades and with all degrees of contrast when the population data from both services are combined (12/12). This is a brightly reflective example, whose proof fields are evident even through the deep, speckled blue, violet, and rose toning that covers each side. The strike is completely brought up, a feature that is generally only found on proof strikes. Population: 4 in 64, 6 finer (12/12). PCGS# 3702, NGC ID# 27C2, CoinPlex ID# 3SP1855

- 3321 1861 PR65 NGC.** A medley of iridescent colors covers the majority of both sides of this example, although a few highly reflective untuned silver areas remain. Census: 15 in 65, 10 finer (12/12). NGC ID# 27C8, PCGS# 3710, CoinPlex ID# 3SP1861

- 3322 1863 PR65+ PCGS.** When viewed with a loupe, this high-end Gem reveals a host of vivid colors on both sides that include shades of gold, copper, teal, russet, plum, and deep sky-blue. Population: 24 in 65 (1 in 65+), 9 finer (12/12). PCGS# 3712, NGC ID# 22ZP, CoinPlex ID# 3SP1863

Patinated Proof Premium Gem
1864 Three Cent Silver

- 3323 1864 PR66 PCGS. CAC.** Peach-gold and aquamarine patina graces most of this needle-sharp Premium Gem, though an arc of cherry-red adorns the upper reverse. The flashy surfaces appear flawless. Along with 12,000 business strikes, just 470 proofs were coined for this Civil War date. Encapsulated in a green label holder. PCGS# 3714, NGC ID# 27CA, CoinPlex ID# 3SP1864

- 3324 1865 PR64 PCGS. CAC.** A brightly reflective Choice proof from the last year of the Civil War, this sharply detailed specimen displays a few hints of blue, green, and champagne-gold patina, with exceptional eye appeal. Population: 60 in 64, 42 finer (11/12). From *The Teich Family Collection*. PCGS# 3715, NGC ID# 27CB, CoinPlex ID# 3SP1865

- 3325 1867 PR64+ PCGS. CAC.** Dusky shades of russet, gold, and blue patina grace the well-preserved surfaces of this high-end Choice specimen. Sharply detailed design elements add to the considerable visual appeal. Population: 93 in 64 (1 in 64+), 75 finer (11/12). From *The Teich Family Collection*. PCGS# 3717, NGC ID# 27CD, CoinPlex ID# 3SP1867

3326 1868 PR65 PCGS. This is a boldly struck and attractive Gem specimen. When examined closely, liberal splashes of lovely gold, blue, and mahogany color reveal themselves. The patina partly obscures the deep mirrors. Population: 44 in 65 (1 in 65+), 11 finer (11/12).
Ex: *FUN Signature (Heritage, 1/2007)*, lot 1970. PCGS# 3718, NGC ID# 27CE, CoinPlex ID# 3SP1868

3327 1869 PR64 PCGS. The 1869 proof trime is a low-mintage issue, and this attractive Choice example displays moderately reflective fields and well-detailed design elements, under shades of gray, lavender, and gold patina. Population: 73 in 64, 57 finer (11/12).
Ex: *Public Auction Sale (Stack's, 6/1958)*, lot 1246, flip accompanies the lot.
From *The Teich Family Collection*. PCGS# 3719, NGC ID# 22ZR, CoinPlex ID# 3SP1869

3328 1870 PR65 PCGS. The reverse in particular displays brilliantly mirrored fields on this well-struck Gem that exhibits hints of color. Surviving examples are much scarcer than the reported mintage of 1,000 pieces might suggest since the Mint melted unsold specimens. Population: 29 in 65, 21 finer (12/12). PCGS# 3721, NGC ID# 27CF, CoinPlex ID# 3SP1870

Patinated PR66 1870 Three Cent Silver

3329 1870 PR66 PCGS. CAC. A colorful specimen that boasts a razor-sharp strike and flashy blue-green, fire-red, and lemon-gold toning. A few lavender streaks visit the lower obverse. Per Breen, much of the production of 1,000 proofs was later melted as unsold by the Mint. Housed in a first generation holder. PCGS# 3721, NGC ID# 27CF, CoinPlex ID# 3SP1870

3330 1871 PR64 PCGS. Both sides of this beautiful, richly-toned near-Gem simply pop with color when viewed closely. Gorgeous shades of rich gold, russet, deep aquamarine, and reddish-purple cover the majority of both sides and provide tremendous visual appeal. PCGS# 3722, NGC ID# 27CG, CoinPlex ID# 3SP1871

3331 1871 PR66 NGC. Rich toning provides this Premium Gem with exceptional eye appeal. The central devices are primarily light gold, with the colorful fields providing attractive contrast. The colors include deep iridescent shades of straw-gold, light green, dark aquamarine, fuchsia, dark electric-blue, dark purple, orange, and blue-green. Although the colors appear on both sides, they are more vivid on the obverse. Census: 18 in 66, 8 finer (12/12). NGC ID# 27CG, PCGS# 3722, CoinPlex ID# 3SP1871

3332 1872 PR66 ★ NGC. Iridescent bands of cherry-red, navy-blue, sun-gold, and jade-green endow both sides of this well struck and flashy high grade specimen. From a proof mintage of 950 pieces. Census: 2 in 66 ★, 3 finer with a Star designation (12/12). NGC ID# 27CH, PCGS# 3723, CoinPlex ID# 3SP1872

3333 1873 PR64 PCGS. Large splashes of primarily bright teal color add to the visual allure of both sides of this near-Gem. An attractive, beautifully struck example. Faint hairlines appear on the reverse. PCGS# 3724, NGC ID# 27CJ, CoinPlex ID# 3SP1873

3334 1873 PR64+ PCGS. CAC. A high-end Choice example, from a tiny proof mintage of 600 pieces, this well-detailed specimen exhibits deeply reflective surfaces with accents of champagne-gold and powder-blue toning.
Ex: *Public Auction Sale (Stack's, 5/1957)*, lot 57, flip accompanies the lot.
From *The Teich Family Collection*. PCGS# 3724, NGC ID# 27CJ, CoinPlex ID# 3SP1873

1873 Trime, PR66 Only 600 Pieces Struck

3335 1873 PR66 PCGS. CAC. From a limited proof mintage of just 600 pieces, this sharply detailed Premium Gem is spectacularly toned in shades of lime-green and cerulean-blue. Deeply mirrored fields shine through the toning, highlighting the marvelous play of colors. Eye appeal is extraordinary. Population: 10 in 66, 3 finer (12/12). PCGS# 3724, NGC ID# 27CJ, CoinPlex ID# 3SP1873

THREE CENT NICKELS

1866 Three Cent Nickel, MS66 Interesting Clash Marks

3336 1866 MS66 PCGS. CAC. Both obverse and reverse of this impressive Premium Gem show an extensive network of clash marks, sure to be interesting to the student of die states. The design elements are well-detailed and the well-preserved surfaces show just a few hints of lavender toning. Population: 22 in 66 (2 in 66+), 2 finer (12/12). PCGS# 3732, NGC ID# 22NK, CoinPlex ID# 3CN1866

3337 1867 MS66 PCGS. CAC. Ex: Bruce Scher. A boldly struck Premium Gem with tremendous eye appeal, this coin displays delicate golden patina and outstanding luster for the type. Die clashing is pronounced overall and a few peripheral die cracks indicate early pressure on the dies. Despite a mintage of over 3.9 million pieces, this coin is tied with only 10 other examples for finest certified by PCGS (12/12). PCGS# 3733, NGC ID# 2755, CoinPlex ID# 3CN1867

**1867 Three Cent Nickel, MS67
None Finer at NGC**

3338 1867 MS67 NGC. An untoned, lustrous, and pristine Superb Gem. The strike is generally sharp, although the three denominational columns show occasional softness. More the 3.9 million pieces were coined, but surprisingly few remain in high grades. Struck from multiply clashed dies. Census: 3 in 67, 0 finer (12/12). NGC ID# 2755, PCGS# 3733, CoinPlex ID# 3CN1867

3339 1868 MS66 PCGS. Considerable peach overtones grace nickel-gray surfaces on this luminous Premium Gem struck from strongly clashed dies. Housed in a green-insert holder. Population: 30 in 66, 1 finer (12/12).

From The Richard P. Ariagno, M.D. Collection. PCGS# 3734, NGC ID# 2756, CoinPlex ID# 3CN1868

3340 1869 MS66 PCGS. This Premium Gem is highly lustrous with light gold-gray patina over both sides. The piece displays a bold strike with a near-absence of marks, and is tied for numerically finest known by both PCGS and NGC (12/12). PCGS# 3735, NGC ID# 22NL, CoinPlex ID# 3CN1869

3341 1872 MS66 NGC. CAC. Subtle gold and peach hues add a hint of color to the otherwise pale nickel-gray surfaces. This is an attractive, smooth Premium Gem example with plenty of eye appeal. Neither NGC nor PCGS has assigned a higher numeric grade to a single example, with this piece tied with two others for finest NGC-graded (12/12). NGC ID# 2757, PCGS# 3738, CoinPlex ID# 3CN1872

**1873 Three Cent Nickel, MS66
Scarcer Than the Mintage Would Indicate**

3342 1873 Open 3 MS66 NGC. The 1873 three cent nickel is a surprising condition rarity. The mintage was a hefty 783,000 pieces, but in MS66 only two other pieces have been certified by NGC and none by PCGS (12/12). This is an all-brilliant example that is well struck with complete detailing on the ribbing on the Roman numeral. The only flaw is a small grease stain that was struck into the cheek of Liberty. PCGS# 3740, CoinPlex ID# 3CN1873OP3

3343 1875 MS66 PCGS. CAC. Bright and lustrous, this Premium Gem displays tremendous eye appeal. A few small spots appear and minor clash marks are present near 6 o'clock on the reverse. Population: 17 in 66, 2 finer (11/12). PCGS# 3743, NGC ID# 22NS, CoinPlex ID# 3CN1875

**1883 Three Cent Nickel, MS62
Unquestioned Business Strike**

3344 1883 MS62 PCGS. Among the most overlooked series in the 19th century are business strike three cent nickels and Shield nickels. Observe in our auctions how few business strikes are offered compared to proofs. The 1882 actually has a "large" mintage for the decade, but only 22,000 pieces were struck. The only truly common coin is the 1881. This is an unquestioned strike for circulation. Evidence of planchet flaking can be seen in the right obverse field. There is no reflectivity evident and the coin is mostly brilliant. Population: 9 in 62, 24 finer (12/12). PCGS# 3751, NGC ID# 275E, CoinPlex ID# 3CN1883

**1883 Three Cent Nickel, MS63
Sharply Struck**

3345 1883 MS63 PCGS. Only 4,000 business-strike three cent nickels were struck in 1883, and Mint State example are seldom encountered in today's market. This attractive Select specimen exhibits sharply detailed design elements, with vibrant mint luster on both sides, and pleasing shades of light gold patina. Population: 6 in 63, 18 finer (12/12).
Ex: Philadelphia Signature (Heritage, 8/2012), lot 3114. PCGS# 3751, NGC ID# 275E, CoinPlex ID# 3CN1883

**1883 Three Cent Nickel, MS65
Elusive Business Strike**

3346 1883 MS65 NGC. CAC. A tiny business strike mintage of 4,000 pieces ensures the rarity of Gem Mint State examples relative to readily obtained proofs of the date. Fully struck with vibrant cartwheel luster and delicate ice-blue and almond-gold patina. A few flecks are on the right obverse field. Housed in a former generation holder. Census: 7 in 65, 8 finer (8/12). NGC ID# 275E, PCGS# 3751, CoinPlex ID# 3CN1883

**1885 Three Cent Nickel, MS65
Only Six Finer at NGC**

- 3347 1885 MS65 NGC.** Like many other minor coinage issues, most three cent nickel pieces from the late 1870s and 1880s are only found in proof format. Business strikes are extremely rare and drastically underrated as their true rarity has only recently been recognized. This lovely Gem has satin luster beneath delicate champagne and pale blue toning. The strike is bold with full vertical lines in each element of the denomination. The surfaces are virtually flawless with a single small tick below the rightmost I in the denomination. Census: 5 in 65, 6 finer (11/12). NGC ID# 275G, PCGS# 3753, CoinPlex ID# 3CN1885

**Superb Gem 1888 Three Cent Nickel
Only One Finer Coin at PCGS**

- 3348 1888 MS67 PCGS.** Only 36,501 business-strike three cent nickels were struck in 1888, and the denomination was retired after the following year. This delightful Superb Gem exhibits well-detailed design elements and unmarked nickel-gray surfaces with vibrant satiny mint luster. Population: 35 in 67, 1 finer (12/12). PCGS# 3757, NGC ID# 275H, CoinPlex ID# 3CN1888

PROOF THREE CENT NICKELS

**1866 Proof Three Cent Nickel
Deep Cameo Premium Gem Example**

- 3349 1866 PR66 Deep Cameo PCGS.** Only 725 proof three cent nickels were struck in 1866, and probably no more than half that meager total is still extant today. This sharply detailed Premium Gem displays richly frosted devices that seem to float on the deeply mirrored fields. The surfaces are enlivened by shades of champagne-gold and lavender toning. Population: 9 in 66 Deep Cameo, 2 finer (12/12). PCGS# 93762, CoinPlex ID# 3CP1866DC
- 3350 1868 PR65 PCGS. CAC.** This sharply detailed Gem displays deeply mirrored fields under attractive shades of lavender, green, and champagne-gold toning with exceptional eye appeal. Population: 62 in 65, 7 finer (11/12).
Ex: S.E. Goldsmith Collection (Stack's, 10/1958), lot 1168, flip accompanies the lot.
From The Teich Family Collection. PCGS# 3764, NGC ID# 275N, CoinPlex ID# 3CP1868
- 3351 1870 PR65 NGC.** Bright gold, pink, and green iridescent toning appears along portions of the outer edges on this lovely Gem. A golden patina covers both sides along with areas of buff. An attractive, nicely struck piece. Census: 79 in 65, 18 finer (11/12). NGC ID# 275R, PCGS# 3766, CoinPlex ID# 3CP1870
- 3352 1872 PR66 NGC.** The three cent nickel series is one that has been overlooked by collectors for decades. Scarce and underrated issues abound, making this a highly collectible series. A small spot of toning appears in Liberty's hair on this Premium Gem. Neither NGC nor PCGS has assigned a higher numeric grade to a single example (11/12). NGC ID# 275T, PCGS# 3768, CoinPlex ID# 3CP1872
- 3353 1873 Closed 3 PR66 PCGS.** Vivid shades of violet, lavender, and lime-green toning blanket the mirrored surfaces of this sharply detailed Premium Gem, creating incredible eye appeal. Housed in a green label holder. Population: 13 in 66, 0 finer (12/12).
From The Richard P. Ariagno, M.D. Collection. PCGS# 3769, NGC ID# 275U, CoinPlex ID# 3CP1873CL3
- 3354 1875 PR65 PCGS. CAC.** Both sides of this spectacular Gem are toned in dark shades of green, crimson, champagne-gold, and gray, with well-detailed design elements and deeply mirrored fields. Population: 94 in 65, 14 finer (11/12).
Ex: Frank H. Chase Collection (Stack's, 12/1958), lot 124, flip accompanies the lot.
From The Teich Family Collection. PCGS# 3771, NGC ID# 22NV, CoinPlex ID# 3CP1875

**1876 Proof Three Cent Nickel
Premium Gem Ultra Cameo**

3355 1876 PR66 Ultra Cameo NGC. CAC. This piece is sharply detailed in most areas, but excessive die polishing has resulted in areas of incomplete detail on some leaves in the wreath. The 1876 three cent nickel is seldom encountered with cameo contrast, but this spectacular Premium Gem shows profound contrast between the frosty devices and the deeply mirrored fields. Eye appeal is exceptional. Census: 16 in 66 Ultra Cameo, 2 finer (12/12). PCGS# 93772, CoinPlex ID# 3CP1876DC

3356 1877 — Environmental Damage — PCGS Genuine. Proof, Unc. Details. The proof-only 1877 is the key date of the series. The present pearl-gray specimen is mildly granular and shows reduced field reflectivity. Well struck and devoid of marks. PCGS# 3773, NGC ID# 275X, CoinPlex ID# 3CP1877

**1877 Three Cent Nickel, PR65
Proof-Only Issue**

3357 1877 PR65 PCGS. CAC. A slight haze subdues the mirrored surfaces of this light gray Gem proof. A proof-only issue from a modest mintage of only a few hundred pieces, this date enjoys great demand at all grade points. Hints of champagne toning accent the light cameo contrast of this lovely piece. From *The Teich Family Collection*. PCGS# 3773, NGC ID# 275X, CoinPlex ID# 3CP1877

**Gold CAC Gem Proof-Only
1877 Three Cent Nickel**

3358 1877 PR65 PCGS. CAC Gold Label. Certified in a first generation holder, the present specimen is fully struck and satiny with pastel straw-gold and sky-blue toning. The 1877 is the rarest of the three proof-only dates of the type, and is approximately equal in overall rarity with the 1895 dollar that routinely trades for middle five figures. From *The SPQR Collection of CAC Gold Sticker Coins*. PCGS# 3773, NGC ID# 275X, CoinPlex ID# 3CP1877

Key 1877 Three Cent Nickel, PR64 Cameo

3359 1877 PR64 Cameo NGC. The proof-only 1877 is the key to the three cent nickel series. Faint violet and beige-gold color shows up under magnification, mostly in the fields that highlight the mildly frosted devices. A decisive strike sharpens the design elements, including the lines in the III denomination. A handful of minuscule marks denies Gem status.

Ex: *Long Beach Signature (Heritage, 2/2010)*, lot 227. PCGS# 83773, CoinPlex ID# 3CP1877CA

3360 1878 PR66 PCGS. CAC Gold Label. This proof-only date is more affordable than its 1877 predecessor. Sharply struck and flashy with a hint of consistent almond-gold toning. Void of contact though die lapping affects the wreath ribbon and the bridge of the nose. From *The SPQR Collection of CAC Gold Sticker Coins*. PCGS# 3774, NGC ID# 275Y, CoinPlex ID# 3CP1878

3361 1878 PR67 Cameo NGC. An impressive, contrasting Superb Gem, this piece exhibits brilliant light gray surfaces. This is a wonderful representative of the second consecutive proof-only issue after 1877. Census: 52 in 67 Cameo, 2 finer (12/12). Ex: *Long Beach Signature (Heritage, 2/2010)*, lot 228. PCGS# 83774, CoinPlex ID# 3CP1878CA

3362 1879 PR66 PCGS. CAC. A fully struck and satiny almond-gold high grade example of this readily collectible Longacre type. A few pinpoint flecks near the date provide the sole imperfections. Certified in a green label holder. PCGS# 3775, NGC ID# 275Z, CoinPlex ID# 3CP1879

3363 1880 PR66 Cameo PCGS. CAC. This Premium Gem example exhibits appreciable contrast between the fields and the devices creating lovely eye appeal. Portions of the lower section of the bow are missing due to heavy die polishing, leaving remaining fragments as little islands on the fields in a figurative sense. Population: 35 in 66 (2 in 66+) Cameo, 3 finer (12/12). From *The Richard P. Ariagno, M.D. Collection*. PCGS# 83776, CoinPlex ID# 3CP1880CA

3364 1880 PR66 Cameo PCGS. CAC. Well struck, satiny, and brilliant with one small lint mark near the mouth. As often seen on late date proofs, the ribbon is partial due to Mint lapping. Neither NGC nor PCGS has certified any examples as Deep or Ultra Cameo. Population: 35 in 66 (2 in 66+) Cameo, 3 finer (12/12). PCGS# 83776, CoinPlex ID# 3CP1880CA

3365 1882 PR66 NGC. CAC Gold Label. This razor-sharp high-grade specimen displays lovely apricot-gold and ice-blue toning. Lustrous and immaculate with exceptional eye appeal. Certified in an old prehologram holder. NGC ID# 2764, PCGS# 3778, CoinPlex ID# 3CP1882

3366 1884 PR67 PCGS Secure. CAC. The 1884 is the second proof three-cent nickel issue to have a mintage greater than that of its corresponding business strike. This Superb Gem displays a bold strike. A lint mark appears to the left of E in AMERICA. Population: 37 in 67, 1 finer (12/12). PCGS# 3780, NGC ID# 2766, CoinPlex ID# 3CP1884

**1884 Three Cent Nickel, PR68 Cameo
Tied for Finest Certified**

3367 1884 PR68 Cameo NGC. Brilliant nickel-gray surfaces feature deep mirrored fields around the satiny and sharply detailed devices, with delicate champagne toning on the reverse. This amazing Superb Gem is destined for a high-quality type set or date collection. Census: 8 in 68 Cameo, 0 finer (11/12). PCGS# 83780, CoinPlex ID# 3CP1884CA

3368 1885 PR66 Cameo PCGS. CAC. A beautifully struck example displaying appreciable contrast, this lovely piece exhibits nice eye appeal. Tiny spots and splashes of color appear on the reverse. Population: 39 in 66 Cameo, 8 finer (12/12). *From The Richard P. Ariagno, M.D. Collection.* PCGS# 83781, CoinPlex ID# 3CP1885CA

3369 1888 PR66 Cameo PCGS. Light to medium caramel-gold patina invigorates this needle-sharp Premium Gem. Flashy and devoid of contact with only inconsequential carbon. A lovely type coin from the waning years of the denomination. Population: 50 in 66 Cameo, 8 finer (12/12). PCGS# 83785, CoinPlex ID# 3CP1888CA

**1888 Three Cent Nickel
Superb Gem Proof Cameo**

3370 1888 PR67 Cameo PCGS. Struck in the penultimate year of production for the three cent nickel, the 1888 is only available in proof format. Proof production spiked in 1888 with 4,582 pieces minted, second highest in the series. The bright, mirrorlike surfaces have just a hint of rose toning on each side; there are no obvious contact marks. Field/device contrast is dramatic. Population: 8 in 67 Cameo, 0 finer (12/12). PCGS# 83785, CoinPlex ID# 3CP1888CA

SHIELD NICKELS

3371 1881 MS64 PCGS. CAC Gold Label. The 1881 is more available in business strike format than the 1880, but is nonetheless very scarce due to a little-saved production of 68,800 pieces. Caramel-gold and olive-green toning drapes the lustrous obverse and satiny reverse. Well struck. Certified in a first generation holder. *From The SPQR Collection of CAC Gold Sticker Coins.* PCGS# 3811, NGC ID# 276F, CoinPlex ID# SNM1881

**1881 Shield Nickel, All-White MS66
Popular, Low-Mintage Date**

3372 1881 MS66 NGC. Strongly struck on this late date in the Shield nickel series with glistening white surfaces. This is a scarce business strike Shield nickel that only had a mintage of 68,000 coins. Sharply detailed throughout. Census: 14 in 66, 5 finer (11/12). *Ex: ANA Signature (Heritage, 8/2001), lot 5539.* NGC ID# 276F, PCGS# 3811, CoinPlex ID# SNM1881

**1881 Shield Nickel, MS67
One of Finest Certified**

3373 1881 MS67 NGC. The highly lustrous surfaces of this Superb Gem display hints of light champagne-gold color at the obverse margins and throughout the reverse. The design elements are sharply struck, with just the slightest bit of inexactness in some horizontal lines of the shield. Both sides are very nicely preserved. One of the finest survivors of this late-series Shield nickel emission of only 68,000 pieces. Census: 5 in 67, 0 finer (12/12). NGC ID# 276F, PCGS# 3811, CoinPlex ID# SNM1881

3374 1883/2 XF45 PCGS. FS-302. Traces of a 2 are left of the 3, though the lengthy die crack through the ball of the shield is also diagnostic. A very scarce overdate variety. This lightly circulated representative displays medium walnut-brown toning. *From The J.D. Tanner Collection.* PCGS# 3814, NGC ID# 22PD, CoinPlex ID# SNM1883OVR2

PROOF SHIELD NICKELS

Choice Proof 1866 Shield Nickel Ideal First-Year Type Coin

- 3375 1866 Rays PR64 PCGS. CAC.** The 1866 proof Shield nickel represents the first year of the design, and the reverse was altered in 1867 to remove the distinctive Rays, creating a popular two-year design type. Walter Breen suggested only 125 proofs were struck, but this total seems too small in view of recent population data. The *Guide Book* listing says 600+ examples were minted, and that figure seems more realistic. This sharply detailed Choice example offers nickel-gray reflective surfaces, with hints of champagne-gold and lavender toning.

Ex: The Stadium-Gardner Collections (Stack's, 2/1965), lot 1451, flip accompanies the lot.

From The Teich Family Collection. PCGS# 3817, NGC ID# 276G, CoinPlex ID# SNP1866RAYS

Lightly Toned PR66 Cameo 1866 Nickel

- 3376 1866 Rays PR66 Cameo PCGS.** A high-end proof example of the issue that marked the "beginning of the end" for the silver half dime. Periwinkle-blue and gold-green shadings enrich each side, the former hue more prominent on the obverse and the latter the reverse. Light but distinct frost is key to the cameo effect, contrasting with fields luminous under the patina. Population: 25 in 66 Cameo, 3 finer (12/12).

From The Richard P. Ariagno, M.D. Collection. PCGS# 83817, CoinPlex ID# SNP1866RAYSCA

- 3377 1867 No Rays PR65 Cameo PCGS. CAC.** A lovely example of the new No Rays design that first appeared in 1867. This piece has exquisite surfaces with strong contrast beneath delicate champagne toning. Population: 36 in 65 Cameo, 7 finer (11/12).

From The Teich Family Collection. PCGS# 83821, CoinPlex ID# SNP1867NRCA

- 3378 1868 PR66 PCGS. CAC.** Champagne toning drapes both sides of this lovely Premium Gem, with splashes of golden-yellow color appearing on the obverse. This piece displays a crisp strike. Population: 9 in 66, 0 finer (12/12). PCGS# 3822, NGC ID# 276J, CoinPlex ID# SNP1868

- 3379 1869 PR66 PCGS.** A beautifully preserved proof, this Premium Gem displays whispers of pastel rose and blue color on both sides, with a sharp strike providing strong definition of the design features. This is a very attractive representative. The PCGS population data has not changed since this coin was offered in 2008. Population: 21 in 66, 1 finer (12/12).

Ex: Long Beach Signature (Heritage, 9/2008), lot 628, which realized \$1,437.50. PCGS# 3823, NGC ID# 276K, CoinPlex ID# SNP1869

1870 Shield Nickel, PR66 Cameo Seldom Seen With Contrast

- 3380 1870 PR66 Cameo PCGS. CAC.** From an estimated mintage of 1,000 pieces, the proof 1870 Shield nickel is surprisingly hard to locate in high grade, and examples with cameo contrast are even more elusive. This coin features frosty devices and deeply mirrored fields, with attractive shades of champagne-gold patina. Like many examples seen, excessive die polishing has caused some incomplete detail in some letters in the reverse legend. Population: 17 in 66 (1 in 66+) Cameo, 0 finer (12/12). PCGS# 83824, CoinPlex ID# SNP1870CA

1871 Shield Nickel, PR66 Elusive Cameo Example

- 3381 1871 PR66 Cameo NGC. CAC.** Only 960 proof Shield nickels were struck in 1871, and few survivors have the reflective surfaces needed to establish cameo contrast. This attractive Premium Gem is a happy exception, with frosty design elements and mirrored fields that show accents of champagne-gold patina. Census: 18 in 66 Cameo, 8 finer (12/12). PCGS# 83825, CoinPlex ID# SNP1871CA

**1876 Shield Nickel, PR67 Cameo
Magnificent Eye Appeal**

3382 1876 PR67 Cameo PCGS. Though the 1876 proof Shield nickel is not as famous as its successors, the proof-only 1877 and 1878 issues, the 1876 is elusive in its own way, and certainly far less accessible than its reported mintage of 1,150+ pieces would suggest. Gems and Premium Gems are challenging to locate, and PR67s, of which PCGS has certified only seven and none finer, are highly elusive.

The current PR67 Cameo displays pronounced contrast at all angles. A melange of soft gold, lavender, green, and crimson blushes both sides, and a solid strike imparts full definition to the design features. Close inspection reveals no mentionable marks or spots. These attributes combine to yield magnificent eye appeal, ensuring that this piece will secure a deserving home in a high-grade Shield nickel collection. Population: 5 in 67 Cameo, 0 finer (12/12). PCGS# 83830, CoinPlex ID# SNP1876CA

**1877 Shield Nickel, PR65+
Key Proof-Only Date**

3383 1877 PR65+ PCGS. A mere 510 pieces were struck of the 1877 Shield nickel, all proofs. Curiously, many examples, such as this one, are shallowly mirrored in the fields; odd for an issue with such a low production run. Still, the fields do show proof flash when angled beneath a light. The surfaces are remarkably well-preserved and each side displays light gray and lilac-rose toning over each side, considerably brighter in the centers and deeper at the margins. *From The Teich Family Collection.* PCGS# 3831, NGC ID# 276U, CoinPlex ID# SNP1877

1877 Shield Nickel, PR64 Cameo

3384 1877 PR64 Cameo PCGS. CAC. The proof-only 1877 nickel is a perennial favorite of collectors with its extremely low mintage. This near-Gem exhibits well-defined devices under a light champagne patina. A few toning spots appear on each side. Population: 25 in 64 (1 in 64+) Cameo, 77 finer (12/12). *From The J.D. Tanner Collection.* PCGS# 83831, CoinPlex ID# SNP1877CA

3385 1878 PR65 PCGS. This satiny Gem displays medium blended almond-gold and stone-gray toning. Crisply struck and free from detractors. The final proof-only date of the denomination, unless the unofficial 1913 Liberty nickel counts. In an old green label holder. PCGS# 3832, NGC ID# 276V, CoinPlex ID# SNP1878

3386 1878 PR66 NGC. A lovely Premium Gem, this is an attractive representative from one of the rarest issues in the Shield nickel series. This piece displays a boldly executed strike and subtle shadings of light gold and blue. The few minor surface marks pose little distraction. NGC has assigned higher numeric grades to only 21 examples (12/12). *Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 3972.* *From The J.D. Tanner Collection.* NGC ID# 276V, PCGS# 3832, CoinPlex ID# SNP1878

- 3387 1878 PR66 PCGS. CAC.** The well-preserved fields of this attractive Premium Gem are moderately reflective, with a few wisps of light gold and lavender to accent the predominantly nickel-gray surfaces. Design elements are sharply detailed and eye appeal is outstanding. PCGS has graded only 14 numerically finer coins (11/12). *From The Teich Family Collection.* PCGS# 3832, NGC ID# 276V, CoinPlex ID# SNP1878
- 3388 1878 PR66 NGC. CAC.** This is an attractive mildly contrasted Premium Gem specimen. Pale yellow color highlights portions of the shield design. The reverse exhibits subtle orange-pink color. There are minor retained laminations near IN GOD WE TRUST. NGC has assigned higher numeric grades to a mere 21 examples (12/12). NGC ID# 276V, PCGS# 3832, CoinPlex ID# SNP1878
- 3389 1879 PR65 PCGS. CAC.** Delicate golden-gray shades visit this lustrous and intricately struck Gem. Free from any marks, though a few olive freckles on the reverse show slight granularity. Housed in a green label holder. PCGS# 3833, NGC ID# 22PG, CoinPlex ID# SNP1879
- 3390 1879 PR67 PCGS. CAC.** This magnificent Superb Gem displays pinpoint definition on all design elements, with reflective fields under attractive shades of lavender-blue toning. Population: 15 in 67, 0 finer (11/12).
Ex: T.K. Harvin Collection (Stack's, 6/1959), lot 334, flip accompanies the lot.
From The Teich Family Collection. PCGS# 3833, NGC ID# 22PG, CoinPlex ID# SNP1879
- 3391 1879/8 PR67 PCGS.** This Superb Gem displays outstanding preservation and strong eye appeal. The coin exhibits a bold strike. A large splash of golden-orange color covers a large portion of the shield with a deep champagne color draping the remaining areas. Population: 25 in 67, 7 finer (12/12). PCGS# 3834, NGC ID# 22PG, CoinPlex ID# SNP1879OVR8
- 3392 1880 PR67 PCGS. Fletcher-1.** The second 8 in the date is widely recut within the loops. Sharply struck and pristine, with some noticeable sky-blue accents near the lower peripheries. A lovely Superb Gem proof. Population: 15 in 67, 0 finer (11/12).
Ex: Dallas Signature (Heritage, 4/2007), lot 373, which realized \$2,530. PCGS# 3835, NGC ID# 276W, CoinPlex ID# SNP1880
- 3393 1880 PR67 NGC. CAC.** An attractive copper patina covers much of the obverse and includes shades of iridescent red, green, and plum. The outer areas of the reverse display shades of yellow, copper, russet, and red with the center exhibiting light steel-gray color with splashes of pale yellow-brown. This well-struck Superb Gem exhibits a high degree of eye appeal. Census: 31 in 67, 1 finer (12/12). NGC ID# 276W, PCGS# 3835, CoinPlex ID# SNP1880
- 3394 1881 PR67 PCGS. CAC.** An exquisitely detailed and carefully preserved Superb Gem, this example displays delightful eye appeal. Light golden overtones grace the otherwise nickel-gray surfaces. Population: 22 in 67, 0 finer (12/12). PCGS# 3836, NGC ID# 276X, CoinPlex ID# SNP1881
- 3395 1882 PR67 PCGS.** Wispy gold toning enhances the appearance of this sharply struck Superb Gem proof. The obverse and reverse fields of this example are moderately reflective around frosty devices. Population: 37 in 67, 0 finer (12/12). PCGS# 3837, NGC ID# 276Y, CoinPlex ID# SNP1882

LIBERTY NICKELS

- 3396 1883 No Cents MS67 NGC.** A number of wispy die cracks appear on both sides of this lovely well-struck Superb Gem example. The piece displays nice eye appeal, with attractive color that includes hints of peach along with lightly frosted devices that provide nice contrast. Neither NGC nor PCGS has assigned a higher numeric grade to a single example (12/12). NGC ID# 2772, PCGS# 3841, CoinPlex ID# LBN1883NC

1883 No Cents Liberty Nickel Multicolor Superb Gem

- 3397 1883 No Cents MS67 PCGS.** The ephemeral introductory subtype without CENTS, enticing con artists of the day to gold plate examples and pass them off as half eagles. The present pristine and lustrous piece avoided such a fate, as it displays iridescent aqua and apricot toning. The strike is precise except on the left ear of corn. Certified in a green label holder. Population: 16 in 67, none finer (12/12). PCGS# 3841, NGC ID# 2772, CoinPlex ID# LBN1883NC

1885 Liberty Nickel, MS65 Lovely Key Date Example

- 3398 1885 MS65 NGC.** The perennially popular key to the Liberty nickels, this 1885 is a Gem with excellent eye appeal. The lightly toned surfaces display a great deal of reflectivity. An incompleteness of strike appears on several of the stars on the obverse, as is often the case. The area to the right of Liberty exhibits a number of tiny spots, with a few appearing on the reverse as well. Census: 25 in 65, 14 finer (11/12). NGC ID# 2773, PCGS# 3846, CoinPlex ID# LBN1885

**1885 Liberty Nickel, MS65
Key to the Series**

- 3399 1885 MS65 NGC.** Because of the large mintages in the previous two years, few nickels were needed in 1885. Only 1.4 million pieces were struck and few were set aside, especially in mint condition. This piece is almost brilliant with just a hint of ice-blue patina on each side. The strike details are strong but lack complete high-point definition (as seen on the left ear of corn). The fields are bright with a hint of reflectivity, this brightness explaining the randomly placed and heavy die striations on the reverse. Census: 25 in 65, 14 finer (12/12). NGC ID# 2773, PCGS# 3846, CoinPlex ID# LBN1885

**1885 Nickel, Gem Uncirculated
'First Among Equals' in the Liberty Nickel Series**

- 3400 1885 MS65 NGC.** The 1885 is "first among equals" along with the 1886 and 1912-S as keys to the Liberty nickel series. The pale color seen over each side, the heavy reverse die striations, and the overall strong strike except on the left ear of corn, are all reminiscent of the coin above. They are from the same consignor, and it is easy to speculate about the origins of both of these pieces. NGC ID# 2773, PCGS# 3846, CoinPlex ID# LBN1885

- 3401 1886 MS62 NGC.** This key date Liberty nickel displays booming luster and delicate almond-gold and stone-gray toning. A single faint curved line on the cheek determines the grade. The borders display prominent cracks and the date is lightly repunched. NGC ID# 22PK, PCGS# 3847, CoinPlex ID# LBN1886

Premium Gem 1891 Nickel

- 3402 1891 MS66 PCGS.** This Premium Gem is well-struck overall, but displays softness at the usual trouble spot, the left ear of corn. Subtle iridescent patina shifts between gold, peach and blue on the obverse, depending on the angle to the light. The reverse exhibits a primarily golden-silver tone. A subtle orange peel texture appears. Population: 20 in 66 (1 in 66+), 1 finer (11/12). PCGS# 3852, NGC ID# 2776, CoinPlex ID# LBN1891

- 3403 1894 MS65 PCGS. CAC.** This lovely Gem is boldly impressed in the centers and displays uncommonly vibrant luster for this mid-date issue. Delicate peach patina graces much of the obverse, while the reverse shows less patina. Population: 75 in 65 (11 in 65+), 28 finer (12/12).
Ex: *Dallas Signature (Heritage, 11/2007)*, lot 242. PCGS# 3855, NGC ID# 2779, CoinPlex ID# LBN1894

- 3404 1894 MS66 NGC.** Pastel-gold and champagne-pink iridescence blankets the bright, frosty surfaces of this impeccably preserved Premium Gem. This example exhibits a sharp strike. The few contact marks present are extremely minor. Census: 19 in 66, 2 finer (12/12).
Ex: *Long Beach (Heritage, 10/2000)*, lot 6047. NGC ID# 2779, PCGS# 3855, CoinPlex ID# LBN1894

- 3405 1895 MS65 NGC.** This sharply defined Gem has frosty nickel-gray luster with faint gold and iridescent toning on each side. The surfaces are exceptional, despite a few planchet flakes. There are no post-mint abrasions of any consequence. Census: 39 in 65, 10 finer (12/12). NGC ID# 277A, PCGS# 3856, CoinPlex ID# LBN1895

**Superb Gem 1899 Liberty Nickel
One of the Finest Certified**

- 3406 1899 MS67 NGC.** Striking orange, rose, and olive-gray tints consume the satiny surfaces of this delightful Superb Gem. Overall definition is excellent, though softness is noted at star 1 on the obverse and the lower left ear of corn on the reverse. One of just four MS67 coins graded by NGC with none numerically finer (12/12). NGC ID# 22PR, PCGS# 3860, CoinPlex ID# LBN1899

**1901 Nickel, Flashy MS66+
Among the Few Finest Graded**

- 3407 1901 MS66+ PCGS. CAC.** Radiant mint luster is blatant on both sides of the MS66+ 1901 Liberty nickel, one of two such at PCGS in this grade with only three finer (12/12). The surfaces are grayish-blue with beautiful hints of rose on each side. The strike is incomplete yet quite bold, with many of the star centrils full and the lower-left ear of corn well-detailed on the wreath. The only quibbles are exceedingly minor. A flashy and near-unimprovable example. PCGS# 3862, NGC ID# 277C, CoinPlex ID# LBN1901

**1906 Liberty Nickel, MS66
Tied for Finest Certified**

- 3408 1906 MS66 PCGS. CAC.** Over the years, PCGS has certified 872 examples of the 1906 Liberty nickel, yet only 14 of those grading events equal this piece, and none has been graded finer (11/12). NGC has also never graded a finer 1906 nickel. While this example has the usual flat ear of corn in the left branch, all other design elements are sharp, the surfaces are brilliant with frosty luster, and both sides exhibit gorgeous gold and iridescent toning. PCGS# 3867, NGC ID# 277H, CoinPlex ID# LBN1906

**Lustrous 1910 Nickel, MS66
Virtually Unobtainable Finer**

- 3409 1910 MS66 PCGS.** Soft pastel multicolored toning runs over the highly lustrous surfaces of this Premium Gem, and a solid strike imparts strong detail to the design features. Both sides are exquisitely preserved. Virtually unobtainable any finer. Population: 12 in 66 (1 in 66+), 1 finer (12/12). PCGS# 3871, NGC ID# 277L, CoinPlex ID# LBN1910

- 3410 1912-D MS65 PCGS.** Subtle highlights of ice-blue, pale orange, and lilac appear on this lovely Gem, a representative from the first nickels produced at the Denver Mint. Freckles appear on both sides. PCGS has awarded higher numeric grades to only 29 examples (12/12). PCGS# 3874, NGC ID# 277P, CoinPlex ID# LBN1912D

**Choice 1912-S Nickel
Sole San Francisco Issue**

- 3411 1912-S MS64 PCGS.** A well-struck near-Gem, this lovely piece displays attractive toning in shades of pale brown, red, green, yellow, and blue. Minor surface marks appear, including a die crack to the right of the date. San Francisco waited until the final year of the type to coin examples, which became the lowest mintage business issue of the series. PCGS# 3875, NGC ID# 277R, CoinPlex ID# LBN1912S

**1912-S Liberty Nickel, MS64
Popular Final-Year Type issue**

- 3412 1912-S MS64 PCGS. CAC.** The San Francisco Mint struck only 238,000 Liberty nickels in 1912, the last official year of the design. The issue is an important key for date and type collectors alike. This attractive Choice example is well-detailed and lustrous, with hints of lavender-gray and light gold toning. From The Teich Family Collection. PCGS# 3875, NGC ID# 277R, CoinPlex ID# LBN1912S

**1912-S Nickel, MS64
Highly Lustrous**

- 3413 1912-S MS64 PCGS. CAC.** A delicate veneer of lavender, gold, and ice-blue patina adheres to the highly lustrous surfaces of this near-Gem. A well directed strike imparts sharpness to the design elements, except for the the usual weakness on the corn ear left of the bow knot. A lengthy semi-circular hair-thin mark is visible on the cheek, and another on the temple. PCGS# 3875, NGC ID# 277R, CoinPlex ID# LBN1912S

**Gem 1912-S Nickel
Mintmarked Key to the Series**

- 3414 1912-S MS65 PCGS.** Strong mustard-gold and green-gold outer toning gives way to lighter nickel-gray color at the centers. This lustrous Gem is uncommonly well-defined on the obverse, though the troublesome ear of corn on the reverse shows appreciable softness. PCGS has certified a mere eight finer examples (11/12). Ex: FUN Signature (Heritage, 1/2010), lot 504. PCGS# 3875, NGC ID# 277R, CoinPlex ID# LBN1912S

PROOF LIBERTY NICKELS

PR66 Deep Cameo 1883 No Cents Liberty Nickel Among the Finest Known

- 3415 1883 No Cents PR66 Deep Cameo PCGS.** Although the 1883 No Cents nickel ranks among the most plentiful issues of the entire series, examples at the current level of preservation are nearly impossible to locate. This impressive specimen is brilliant and untoned, with fully detailed devices and pleasing contrast. Population: 4 in 66 (1 in 66+) Deep Cameo, 1 finer (11/12). From *The Richard P. Ariagno, M.D. Collection*. PCGS# 93878, CoinPlex ID# LBP1883NCDC

1883 No Cents Nickel, PR67 Ultra Cameo Exquisitely Struck

- 3416 1883 No Cents PR67 Ultra Cameo NGC.** A solid strike delivers exquisite definition to the design elements of this Superb Gem Ultra Cameo. Excellent contrast is apparent over both sides, each of which is devoid of obvious marks. The obverse is untoned, while the reverse displays some subtle toning in the upper portion. Extremely Rare in this numerical grade with Ultra finish. Census: 2 in 67 Ultra Cameo, 0 finer (12/12). PCGS# 93878, CoinPlex ID# LBP1883NCDC
- 3417 1884 PR67 Cameo NGC.** Fully struck and seemingly pristine, this Superb Gem exhibits reflective fields and no observable handling marks. The piece is bright and essentially untoned overall. Census: 28 in 67 Cameo, 6 finer (12/12). PCGS# 83882, CoinPlex ID# LBP1884CA

1884 Five Cent, PR66 Ultra Cameo Stunning Contrast Rare at This Level

- 3418 1884 PR66 Ultra Cameo NGC.** Proof Liberty Head nickels of 1884 can be located with relatively little difficulty through Gem condition. Pieces with Cameo finish are much more difficult to obtain, and Ultra Cameos are extremely rare. Indeed, NGC has graded only four 1884 Ultra coins — two in PR65 and two in PR66, including the present offering. Stunning white-on-black contrast exudes from both sides, each of which displays crisply struck design elements and remarkably preserved surfaces. PCGS# 93882, CoinPlex ID# LBP1884DC

- 3419 1885 PR63 NGC. CAC Gold Label.** The flag of the 1 is repunched. This key date nickel displays rich orange-gold and gunmetal-blue toning. Sharply struck and satiny with a solitary flan flake within the prominent V. Encased in a pre-hologram holder. From *The SPQR Collection of CAC Gold Sticker Coins*. NGC ID# 277T, PCGS# 3883, CoinPlex ID# LBP1885

- 3420 1885 PR65 PCGS. CAC.** Attractive shades of light gold and lavender toning blanket the well-preserved surfaces of this spectacular Gem. The design elements are sharply rendered and the fields are deeply mirrored, adding to the outstanding eye appeal. From *The Teich Family Collection*. PCGS# 3883, NGC ID# 277T, CoinPlex ID# LBP1885

1885 Five Cent, PR67 Boldly Detailed

- 3421 1885 PR67 PCGS. CAC.** The 1885 Liberty nickel is the premier issue among business strikes, creating additional demand on those proofs that still exist today. This Superb Gem approaches the finest quality that has ever been certified. It is boldly detailed with subtle contrast. The fields are light gray with lovely violet and iridescent toning highlights. Few blemishes are evident on either side, even under a glass. Population: 11 in 67, 1 finer (12/12). PCGS# 3883, NGC ID# 277T, CoinPlex ID# LBP1885

- 3422 1885 PR66 Cameo NGC.** A flashy Premium Gem specimen, delicate orange toning frames the obverse. The only disturbance worthy of mention is a modest as-made lamination above the 8's of the date. Census: 70 in 66 Cameo, 26 finer (12/12). Ex: *Dallas Signature (Heritage, 12/2005), lot 298*. PCGS# 83883, CoinPlex ID# LBP1885CA

1885 'V' Nickel, PR66 Cameo
An Affordable High-Grade Alternative

- 3423 1885 PR66 Cameo PCGS. CAC.** A gleaming specimen, this piece displays moderate mirrors and contrast providing high-end visual appeal. The strike is crisp, and hints of green-to-gold color grace the surfaces. The mintage of 3,790 proofs gives the collector many more chances to acquire a high-grade 1885 nickel than waiting for one of the infrequently offered circulation strikes. Population: 44 in 66 Cameo, 6 finer (11/12). PCGS# 83883, CoinPlex ID# LBP1885CA

Superb Gem Proof 1886 Nickel

- 3424 1886 PR67 PCGS. CAC.** This fully struck key date Superb Gem has satin luster and a mark-free appearance. Light to medium olive-gold toning drapes both sides, which show only infrequent evidence of pinpoint carbon. The 1886 is a better date due to a low mintage for the associate business strikes. Housed in an old green label holder. PCGS# 3884, NGC ID# 277U, CoinPlex ID# LBP1886

- 3425 1891 PR66 Cameo PCGS.** The glassy proof fields are highly reflective, while the devices exhibit excellent mint frost. The piece displays a sharp strike, with only a trace of weakness on the reverse left ear of corn. This lovely Premium Gem is virtually untuned and presents pleasing, notable Cameo contrast on both obverse and reverse. Faint traces of hairlines appear on Liberty's jaw and in the reverse fields, and flyspecks are minute on the reverse. Population: 13 in 66 (2 in 66+) Cameo, 1 finer (12/12).
Ex: FUN Signature (Heritage, 1/2006), lot 1419. PCGS# 83889, CoinPlex ID# LBP1891CA

**1891 Five Cent, PR66+
 Strong Field-Motif Contrast**

- 3426 1891 PR66+ Cameo PCGS. CAC.** Boldly reflective fields provide strong contrast against the frosted devices of this high-end Premium Gem Cameo. A couple of minuscule marks fail to detract from the eye appeal. An attractive, well struck coin. Population: 13 in 66 (2 in 66+) Cameo, 1 finer (12/12). PCGS# 83889, CoinPlex ID# LBP1891CA

1891 Liberty Nickel, PR66
Rare Deep Cameo Example

- 3427 1891 PR66 Deep Cameo PCGS.** Despite a substantial mintage of 2,350 pieces, the 1891 proof Liberty nickel is rarely encountered with Deep Cameo surfaces. This spectacular Premium Gem displays intense cameo contrast between the deeply mirrored fields and the sharply detailed frosty design elements. A few wisps of lime-green toning accent the impeccable surfaces. Population: 6 in 66 (2 in 66+) Deep Cameo, 0 finer (12/12). PCGS# 93889, CoinPlex ID# LBP1891DC

1892 Nickel, PR65 Deep Cameo
Scarce Date to Locate With Strong Contrast

- 3428 1892 PR65 Deep Cameo PCGS. CAC.** The strike details do not waver on either side with fully struck devices throughout (not always the case on this date). Each side is brilliant and the fields are deeply mirrored with sharply contrasted, heavily frosted devices. This date is remarkably scarce as a Deep/Ultra Cameo. Population: 2 in 65 Deep Cameo, 1 finer (12/12). PCGS# 93890, CoinPlex ID# LBP1892DC

- 3429 1893 PR66 Cameo PCGS. CAC.** The surfaces are fully brilliant on this highly attractive Cameo example of this popular proof issue. The fields display illimitable depth of mirrored reflectivity and the devices exhibit noticeable frosting, yielding strong contrast on each side. Few cameo Liberty nickels were struck, and even fewer survive in high grades. Population: 30 in 66 (3 in 66+) Cameo, 10 finer (12/12).

Ex: FUN Signature (Heritage, 1/2010), lot 534. PCGS# 83891, CoinPlex ID# LBP1893CA

- 3430 1893 PR66+ Cameo PCGS. CAC.** Pronounced contrast between the frosty devices and deeply mirrored fields provides this high-end Premium Gem with outstanding eye appeal. A small lint mark appears at the top of the stop between UNITED and CENTS. Population: 30 in 66 (3 in 66+) Cameo, 10 finer (12/12). PCGS# 83891, CoinPlex ID# LBP1893CA

- 3431 1894 PR66 Cameo NGC. CAC.** An exceptional Premium Gem cameo example, this piece displays only the tiniest lint marks when examined with a loupe. Pale blue toning covers each side with light golden at the margins. Census: 20 in 66 Cameo, 12 finer (12/12). PCGS# 83892, CoinPlex ID# LBP1894CA

- 3432 1895 PR66 Cameo NGC.** An attractive, beautifully contrasted piece, this Premium Gem displays a bold strike and subtle champagne color. A few minor surface marks appear. Census: 10 in 66 Cameo, 2 finer (12/12). PCGS# 83893, CoinPlex ID# LBP1895CA

- 3433 1896 PR66 Cameo NGC. CAC.** This bold Cameo proof displays beautifully frosted devices and black mirrors. A hint of pale gold is noted across otherwise untoned surfaces and the strike is needle-sharp. A very attractive late 19th century proof. Census: 18 in 66 Cameo, 8 finer (12/12).
Ex: FUN Signature (Heritage, 1/2008), lot 705; FUN Signature (Heritage, 1/2009), lot 755. PCGS# 83894, CoinPlex ID# LBP1896CA

Cameo PR67 1897 Nickel

- 3434 1897 PR67 Cameo PCGS. CAC.** This is a quicksilver piece with just a bit of light golden toning on Liberty's lower neck. The coin is fully struck, as expected but not always achieved for proofs of the issue. The bold contrast and lack of any visible abrasions further contribute to the exceptional eye appeal. Among the finest certified at PCGS, although a single PR68 non-Cameo is numerically superior. PCGS# 83895, CoinPlex ID# LBP1897CA

- 3435 1899 PR66 PCGS. CAC Gold Label.** Remarkable rose-red and lemon-gold toning graces the obverse. The reverse displays light golden-tan patina. Fully struck and essentially immaculate with one tiny strike-through above the C in CENTS and a hint of granularity above star 12.
From The SPQR Collection of CAC Gold Sticker Coins. PCGS# 3897, NGC ID# 2789, CoinPlex ID# LBP1899

**1899 Liberty Nickel, PR67
Fully Struck**

- 3436 1899 PR67 PCGS. CAC.** While the mirrors are moderate on this gold-tinged specimen, the detail on the devices is exacting, and the preservation is more than a match for the coin's Superb Gem status. This piece displays incredible all-around eye appeal for this issue of 2,031 proofs. Population: 10 in 67, 1 finer (11/12). PCGS# 3897, NGC ID# 2789, CoinPlex ID# LBP1899
- 3437 1900 PR67 NGC.** A lovely, light gold patina envelopes both sides of this bright example. A gorgeous, sharply struck Superb Gem. Census: 28 in 67, 0 finer (11/12). NGC ID# 278A, PCGS# 3898, CoinPlex ID# LBP1900

**1901 Liberty Nickel, Superb Gem Proof
None Certified Finer at PCGS**

- 3438 1901 PR67 PCGS. CAC.** Ex: Compradore Collection. A satiny peach-gold Superb Gem that boasts an exemplary strike and an absence of perceptible carbon or contact. Population: 28 in 67 (1 in 67+), 0 finer (11/12).
Ex: Dallas Signature (Heritage, 11/2005), lot 618; West Palm Beach Signature (Heritage, 6/2008), lot 386; FUN Signature (Heritage, 1/2010), lot 539. PCGS# 3899, NGC ID# 278B, CoinPlex ID# LBP1901

**1901 Liberty Nickel, PR66+
Crisply Defined**

- 3439 1901 PR66+ Cameo PCGS. CAC.** Pastel multicolored toning gravitates to the borders of this high-end Premium Gem Cameo, and a solid strike delivers crisp definition to the design elements. A few minuscule flecks are visible on Liberty's neck. Population: 16 in 66 (2 in 66+) Cameo, 6 finer (12/12). PCGS# 83899, CoinPlex ID# LBP1901CA

PR67 Cameo 1903 Nickel

- 3440 1903 PR67 Cameo NGC.** Boldly impressed and delicately contrasted, an infrequent state for this brilliant-era proof Liberty nickel issue. Delicate sky-blue and canary-gold tints drape the powerful mirrors. The surfaces are impressively preserved, and examination under magnification only reinforces this perception. Census: 22 in 67 Cameo, 4 finer (11/12). PCGS# 83901, CoinPlex ID# LBP1903CA

**1903 Liberty Nickel, PR67 Cameo
Fantastic Eye Appeal**

- 3441** 1903 PR67 Cameo NGC. CAC. Even when held at arm's length, this piece displays tremendous eye appeal. When studied more closely, this Superb Gem Cameo exhibits beautifully struck devices and deeply reflective pristine surfaces. A wonderful representative. Census: 22 in 67 Cameo, 4 finer (12/12). PCGS# 83901, CoinPlex ID# LBP1903CA

Brilliant 1905 Nickel, PR66 Cameo

- 3442** 1905 PR66 Cameo PCGS. CAC. Ice-blue and olive toning graces this flashy and undisturbed Premium Gem. Luminous motifs contrast with the darkly reflective fields. Generally well struck, although the left ear of corn and a few stars are incompletely defined. Population: 5 in 66 Cameo, 1 finer (11/12).
Ex: Tampa FUN (Heritage, 1/2011), lot 4395. PCGS# 83903, CoinPlex ID# LBP1905CA

PR66 Cameo 1905 Nickel

- 3443** 1905 PR66 Cameo PCGS. CAC. An attractive piece, this coin exhibits a bold strike and nice contrast. Three lintmarks appear on the obverse. A retained lamination extends toward the center of the design on the reverse from near the M in AMERICA. Population: 5 in 66 Cameo, 1 finer (12/12). PCGS# 83903, CoinPlex ID# LBP1905CA

Rich PR67 Cameo 1906 Nickel

- 3444** 1906 PR67 Cameo PCGS. CAC. Although contrast is unusual for most 20th century proof Liberty nickel issues, this coin has a pleasing cameo effect despite a dearth of frost on the devices. Light blue patina graces the fields, while the portrait displays subtle mint-green tints. Population: 14 in 67 Cameo, 2 finer (11/12). PCGS# 83904, CoinPlex ID# LBP1906CA

Brilliant PR67 ★ 1907 Liberty Nickel

- 3445** 1907 PR67 ★ NGC. CAC. A brilliant Superb Gem, this example has a cameo reverse, and Liberty's hair is also frosted. The glassy fields appear immaculate, and the strike is complete aside from a few grains on the left ear of corn. The lowest mintage regular proof issue. The census information has not changed since this coin appeared at auction four years ago. Census: 3 in 67 ★, 0 finer (12/12).
Ex: Houston Signature (Heritage, 12/2008), lot 947; Long Beach Signature (Heritage, 2/2010), lot 257, which realized \$5,462.50. NGC ID# 278H, PCGS# 3905, CoinPlex ID# LBP1907

**PR66 Cameo 1907 Liberty Nickel
Low Proof Mintage Issue**

- 3446** 1907 PR66 Cameo PCGS. CAC. Stunningly contrasted with amazing color. With the exception of the clandestine 1913 issue, the 1907 Liberty Head nickel boasts the lowest proof mintage of the series, at 1,475 pieces. The obverse of this piece displays champagne and peach toning around a frosted and nickel-white interior, while the reverse adds a bold outer ring of metallic-blue. Population: 11 in 66 Cameo, 2 finer (11/12). PCGS# 83905, CoinPlex ID# LBP1907CA

- 3447 1908 PR67 PCGS.** Milky golden-brown and powder-blue colors endow this exquisitely struck and unabraded Superb Gem. Only an infrequent carbon fleck denies perfection. The PCGS population data has not changed since this coin appeared at auction in 2004. Population: 9 in 67, 0 finer (12/12).
Ex: Palm Beach Signature (Heritage, 11/2004), lot 5909. PCGS# 3906, NGC ID# 278J, CoinPlex ID# LBP1908

**1908 Liberty Nickel, PR67 Cameo
Tied for Finest PCGS-Graded**

- 3448 1908 PR67 Cameo PCGS.** One of 1,620 pieces coined for this later Liberty nickel issue, this deeply reflective specimen displays pleasing contrast through vivid aqua, sun-gold, and mustard-green patina that graces each side. The overall eye appeal is simply amazing. The population data has not changed since our prior offering of this coin at auction. Population: 4 in 67 Cameo, 0 finer (11/12).
Ex: Long Beach Signature (Heritage, 5/2007), lot 457, which realized \$5,175. PCGS# 83906, CoinPlex ID# LBP1908CA

- 3449 1909 PR67 PCGS. CAC.** This Superb Gem proof displays bold detail and exceptional aesthetic appeal. The fully mirrored fields and mint frost on the central devices suggest the possibility of a Cameo designation. Both sides exhibit light champagne and gray with splashes of rich gold toning. Population: 32 in 67, 2 finer (12/12). PCGS# 3907, NGC ID# 278K, CoinPlex ID# LBP1909

**1910 Liberty Head Nickel, PR67 Cameo
Only Two Finer PCGS-Graded Examples**

- 3450 1910 PR67 Cameo PCGS.** A well-struck Superb Gem Cameo proof with splashes of subdued gray toning on the surfaces and accented by traces of ice blue, lemon, and iridescent toning. Proofs from this year are known for somewhat grainy surfaces. Population: 13 in 67 Cameo, 2 finer (11/12). PCGS# 83908, CoinPlex ID# LBP1910CA

**PR67 Cameo 1911 Nickel
Fully Struck**

- 3451 1911 PR67 Cameo PCGS. CAC.** Blended shades of olive-green and steel-gray adorn the surfaces of this magnificent Superb Gem. The design elements exhibit razor-sharp definition in all areas, and contrast boldly with the deeply reflective fields. Only 1,733 proof Liberty nickels were struck in 1911. Population: 8 in 67 Cameo, 0 finer (11/12). PCGS# 83909, CoinPlex ID# LBP1911CA

BUFFALO NICKELS

- 3452 1913 Type One MS67 PCGS. CAC.** This is a splendid example of the popular Type One Buffalo, close to a full strike with the rough, pebbly field texture that James Earle Fraser designed for the subtype. This Superb Gem is virtually immaculate, with a full strike and virtually pristine surfaces. PCGS has assigned higher numeric grades to only 12 examples (12/12). PCGS# 3915, NGC ID# 22PW, CoinPlex ID# BFN1913TY1

- 3453 1913-S Type One MS66 PCGS.** A well-struck and attractively toned coin, this Premium Gem displays appealing shades of caramel-gold and powder-blue on both sides. PCGS has assigned higher numeric grades to a mere 19 pieces (11/12).
From The Richard P. Ariagno, M.D. Collection. PCGS# 3917, NGC ID# 22PY, CoinPlex ID# BFN1913STY1

- 3454 1913-S Type One MS66 PCGS. CAC.** Medium powder-blue, olive-green, and lavender toning endows coruscating and exemplary surfaces. The strike is good though the mintmark and denomination show softness. Certified in a green label holder. PCGS# 3917, NGC ID# 22PY, CoinPlex ID# BFN1913STY1

- 3455 1913-D Type Two MS65+ NGC.** Soft iridescent accents in shades of pink and mint-green on the obverse add to the visual appeal of this lustrous satiny high-end Gem. A few tiny dark spots and contact marks appear. Census: 82 in 65 (1 in 65+), 19 finer (11/12). NGC ID# 22R2, PCGS# 3922, CoinPlex ID# BFN1913DTY2

- 3456 1913-D Type Two MS66 PCGS.** Lovely light gold toning envelops both sides of this coin, with the obverse exhibiting a slightly iridescent appearance. The coin exhibits sharp details and is beautifully preserved. Population: 51 in 66, 10 finer (12/12).
From The Richard P. Ariagno, M.D. Collection. PCGS# 3922, NGC ID# 22R2, CoinPlex ID# BFN1913DTY2

- 3457 1913-D Type Two MS66 PCGS. CAC.** Subtle hints of color appear on this lustrous Premium Gem example. Higher Mint State coins are elusive, making this attractive representative even more desirable. Population: 51 in 66, 10 finer (12/12). PCGS# 3922, NGC ID# 22R2, CoinPlex ID# BFN1913DTY2

3458 1913-S Type Two MS64 NGC. This attractive near-Gem example of the 1913-S Type Two, a popular key to the series, displays well-struck surfaces with excellent luster and preservation. Hints of light golden-brown appear on the obverse. NGC ID# 22R3, PCGS# 3923, CoinPlex ID# BFN1913STY2

3459 1913-S Type Two MS64 NGC. Iridescent greens, oranges, reds, and yellows appear on both sides of this near-Gem example. A small spot of gray color appears near the bison's shoulder. The surfaces exhibit a few marks. NGC ID# 22R3, PCGS# 3923, CoinPlex ID# BFN1913STY2

**Gem 1913-S Type Two Nickel
Rare Any Finer**

3460 1913-S Type Two MS65 PCGS. Unlike their Type One brethren, the Type Two 1913-S Buffalo nickels were not saved in quantity. As a result, Gems from this issue of just over 1.2 million pieces are scarce and finer coins rare. This MS65 piece has luminous surfaces under gold-gray patina. High-point detail is soft but not worn. Struck from eroded dies.
From The Richard P. Ariagno, M.D. Collection. PCGS# 3923, NGC ID# 22R3, CoinPlex ID# BFN1913STY2

Scarce Select 1914/3 Nickel

3461 1914/3 MS63 PCGS. CAC. FS-101. The crossbar of a 3 is faintly evident on each side of the top of the 4. This shimmering Select representative shows only incidental contact and carbon. Pastel gold, olive, and rose tints contribute further to the eye appeal. The centers and the curve of the tail show inexactness but the date is bold. Population: 10 in 63, 17 finer (12/12). PCGS# 93924, NGC ID# 22R4, CoinPlex ID# BFN1914OVR3

3462 1914-S MS65 PCGS. Light gold and olive-green colors with iridescent properties, along with a small splash of red, add to the attractiveness of this well-struck Gem. Only 29 examples have achieved higher numeric grades from PCGS (11/12). PCGS# 3926, NGC ID# 22R6, CoinPlex ID# BFN1914S

**1914-S Five Cent
Rare in This Grade**

3463 1914-S MS66 NGC. The 1914-S nickel is available in lower grades but is rare at the Premium Gem level. The grayish surfaces of this MS66 example displays splashes of blended gold, green, and crimson. This is a well struck piece that is devoid of mentionable marks or spots. Census: 21 in 66 (1 in 66+), 3 finer (12/12). NGC ID# 22R6, PCGS# 3926, CoinPlex ID# BFN1914S

3464 1915-S MS64 PCGS. Examination under a loupe reveals attractive highlights on this lustrous near-Gem, particularly on the reverse. That surfaces exhibit gold, silver, orange, red and plum. The obverse primarily displays golden-yellow and silver color. PCGS# 3929, NGC ID# 22R9, CoinPlex ID# BFN1915S

**1915-S Buffalo Nickel, MS65
Sharply Detailed, Semikey Example**

3465 1915-S MS65 PCGS. The 1915-S Buffalo nickel claims a modest mintage of 1.5 million pieces, but the issue was well-produced and high-quality survivors are easier to locate than the small production figure would suggest. This impressive Gem is sharply detailed and lustrous, under shades of light gold toning.
From The Wes Rasmussen Collection. PCGS# 3929, NGC ID# 22R9, CoinPlex ID# BFN1915S

Scarce Gem 1915-S Nickel

3466 1915-S MS65 PCGS. Only the presence of the tiny S mintmark on the reverse prevents us from thinking that this boldly defined Gem might be a matte proof. The strike is slightly deficient, but the overall appearance is nearly identical to a Gem proof 1915 nickel from the same collection. PCGS has only certified 31 finer pieces (11/12).
From The Teich Family Collection. PCGS# 3929, NGC ID# 22R9, CoinPlex ID# BFN1915S

- 3467** 1916 MS66+ PCGS. CAC Gold Label. Lemon-gold and lilac-red shades invigorate this lustrous and essentially mark-free high grade nickel. The strike is intricate aside from the usual inexactness above the braid. PCGS has certified only 13 coins finer (11/12). From *The SPQR Collection of CAC Gold Sticker Coins*. PCGS# 3930, NGC ID# 22RA, CoinPlex ID# BFN1916

**1916 Doubled Die Obverse Nickel
AU Sharpness**

- 3468** 1916 Doubled Die Obverse — Improperly Cleaned — NGC Details. AU. FS-101. A key to the series, the 1916 Doubled Die Obverse is several times rarer than the 1918/7-D. The date is widely die doubled, as are the feather tips, and the Indian's profile. LIBERTY shows no obvious doubling and must have been near the "pivot point" for the Mint hubbing mishap. The present lime-green and stone-gray example has a typical strike but only minor wear. Bright and lightly hairlined from cleaning, and we note a couple of pinscratches near the profile. An opportunity to acquire a sharp yet affordable example of this seldom encountered variety. From *The J.D. Tanner Collection*. NGC ID# 2TSS, PCGS# 3931, CoinPlex ID# BFN1916DDO

**Superb Gem 1917 Buffalo Nickel
Only Two Finer Coins at PCGS**

- 3469** 1917 MS67 PCGS. CAC. The 1917 Buffalo nickel was a well-produced issue, and this spectacular Superb Gem is one of the finest surviving examples. The design elements are sharply detailed throughout, and both sides radiate vibrant satiny mint luster. Attractive highlights of champagne-gold and ice-blue toning accent the pristine surfaces. Population: 12 in 67, 2 finer (11/12). From *The Teich Family Collection*. PCGS# 3934, NGC ID# 22RD, CoinPlex ID# BFN1917

**Very Fine 1918/7-D Nickel
Sole Guide Book Overdate**

- 3470** 1918/7-D VF20 NGC. FS-101. A stone-gray representative of the rare *Guide Book* overdate. The thick top and upright of the underdigit 7 is readily identified. The legends are bold and neither side shows any consequential contact. The field near the profile is flow lined, as made from a long-lived die. NGC ID# 22RJ, PCGS# 3939, CoinPlex ID# BFN19187D
- 3471** 1918/7-D — Environmental Damage — NGC Details. XF. FS-101. The shape of the underdigit 7 is all too obvious. A nicely defined representative of this famous and scarce overdate. The olive-green surfaces are minutely and evenly granular. From *The J.D. Tanner Collection*. NGC ID# 22RJ, PCGS# 3939, CoinPlex ID# BFN19187D
- 3472** 1918-D MS64 PCGS. Subtle gold, silver, ice-blue, and sage-green colors add to the eye appeal of this well-struck near-Gem. Minor surface marks held this piece from a higher grade. PCGS# 3938, NGC ID# 22RH, CoinPlex ID# BFN1918D

**1918-D Gem Five Cent
Lightly Toned**

- 3473 1918-D MS65 PCGS.** A thin layer of champagne-gold and ice-blue patina resides on the lustrous surfaces of this Denver-Mint Gem. The design elements are well impressed, save for minor softness in the Indian's hair. This is a very well cared for piece for the MS65 designation. PCGS# 3938, NGC ID# 22RH, CoinPlex ID# BFN1918D

- 3474 1918-S MS62 NGC.** Attractive luster remains on this example that displays hints of gold and blue highlights. Freckles appear on both sides. The centers exhibit the softness of strike that often appears on these examples. NGC ID# 22RK, PCGS# 3940, CoinPlex ID# BFN1918S

- 3475 1919 MS66 PCGS. CAC.** Gorgeous luster and attractive details appear on this brilliant untuned piece. A few minor contact marks do little to diminish the eye appeal of this Premium Gem. Only 9 examples have received higher numeric grades from PCGS (12/12). From *The Richard P. Ariagno, M.D. Collection*. PCGS# 3941, NGC ID# 22RL, CoinPlex ID# BFN1919

- 3476 1920 MS66 PCGS. CAC.** Sharply detailed throughout, with vibrant mint luster, and a few hints of champagne-gold and ice-blue toning. Housed in a green label holder. PCGS has graded only eight numerically finer coins (12/12). From *The Richard P. Ariagno, M.D. Collection*. PCGS# 3944, NGC ID# 22RP, CoinPlex ID# BFN1920

**1920-S Buffalo Nickel, MS64
Rare Issue in Higher Grades**

- 3477 1920-S MS64 PCGS.** The 1920-S Buffalo nickel is an issue that is not difficult to locate in lower grades, but becomes scarce in MS64, and finer coins are quite rare. This well-detailed Choice example displays a better-than-average strike and strong satiny mint luster, with a few hints of gold toning. PCGS has graded 18 numerically finer specimens (12/12). PCGS# 3946, NGC ID# 22RS, CoinPlex ID# BFN1920S

- 3478 1921 MS66 PCGS. CAC.** This is a lovely Premium Gem example from the only year in the entire series that has serifs on the 1s. Attractive satin luster adds to the eye appeal of this piece. Only 18 examples have received higher numeric grades from PCGS (12/12). PCGS# 3947, NGC ID# 22RT, CoinPlex ID# BFN1921

**1923-S Nickel, MS65
Attractive Patina**

- 3479 1923-S MS65 NGC.** A highly attractive veneer of soft violet, gold, and ice-blue patination runs over the lustrous surfaces of this lovely Gem. The design elements are well impressed, including the date, mintmark, and bison's hair. Close inspection reveals no conspicuous marks or spots. Census: 34 in 65, 6 finer (12/12). NGC ID# 22RW, PCGS# 3950, CoinPlex ID# BFN1923S

**Lustrous 1923-S Five Cent, MS65
Virtually Unobtainable Any Finer**

- 3480 1923-S MS65 PCGS.** Soft greenish-gold and rose patina resides on the lustrous surfaces of this Gem, and a well directed strike brings out strong definition on the design elements. This well cared for piece reveals no distracting marks or spots. Mint State pieces are difficult to locate, and Gems are rare. Population: 40 in 65 (1 in 65+), 2 finer (12/12). PCGS# 3950, NGC ID# 22RW, CoinPlex ID# BFN1923S

- 3481 1924-S VF25 NGC.** From a low-mintage issue, these coins are scarce in all dates. This representative displays even color and overall even wear. A few marks are consistent with the grade. This piece retains a very pleasing appearance. NGC ID# 22RZ, PCGS# 3953, CoinPlex ID# BFN1924S

- 3482 1925 MS66+ PCGS. CAC.** The 1925 Buffalo nickel was produced in large numbers, but high-end Premium Gems are scarce today. The devices of this spectacular piece are sharply rendered, displaying intricate detail on the bison's head. The surfaces are deeply lustrous, under subtle shades of ice-blue and ice-gold toning. Population: 227 in 66 (15 in 66+), 8 finer (12/12). PCGS# 3954, NGC ID# 22S2, CoinPlex ID# BFN1925

- 3483 1925-D MS64 PCGS.** Areas of gold and orange highlights add to the attractiveness of this near-Gem. The coin is well-struck overall and has a limited number of minor contact marks. The coin exhibits tiny carbon spots throughout, with a small concentrated area of color observed below the bison's beard. Only 87 examples have received higher numeric grades from PCGS (12/12). PCGS# 3955, NGC ID# 22S3, CoinPlex ID# BFN1925D

**1925-D Buffalo Nickel, MS65
Sharply Detailed and Attractively Toned**

- 3484 1925-D MS65 PCGS. CAC.** The 1925-D Buffalo nickel is a better date in the series, especially in high grade. Sharply detailed Gems, like the present coin, are prized by collectors, as most examples seen are lightly struck. This impressive specimen displays vibrant mint luster, under attractive shades of ice-blue, lavender, and pale gold toning. Eye appeal is terrific. Population: 78 in 65, 7 finer (11/12). From *The Teich Family Collection*. PCGS# 3955, NGC ID# 22S3, CoinPlex ID# BFN1925D

**Choice 1925-S Buffalo Nickel
Attractive Multicolor Toning**

- 3485 1925-S MS64 PCGS. CAC.** The 1925-S Buffalo nickel is known for its generally weak striking details. This well-detailed Choice example shows a touch of softness in the usual areas, but the strike is much better-than-average overall. The lustrous surfaces are enhanced by attractive shades of champagne-gold, ice-blue, and dark green toning. PCGS has graded only 25 coins in higher numeric grades (11/12). From *The Teich Family Collection*. PCGS# 3956, NGC ID# 22S4, CoinPlex ID# BFN1925S

- 3486 1926-D MS64 PCGS.** Brilliant luster emanates from this near-Gem that displays a pronounced softness of strike at the borders. Minute carbon spots exhibit even distribution throughout both sides of this piece, creating an interesting appearance. Slight counter-clockwise rotation is present. PCGS# 3958, NGC ID# 22S6, CoinPlex ID# BFN1926D

- 3487 1926-S AU50 NGC.** A low mintage semikey that is much scarcer than the 1931-S in better circulated grades. The hip displays light wear, but the pearl-gray surfaces percolate with luster and marks are confined to a single faint thin obverse line at 6 o'clock. NGC ID# 22S7, PCGS# 3959, CoinPlex ID# BFN1926S

**Choice AU 1926-S Buffalo Nickel
Low Production, Low Survival Rate**

- 3488 1926-S AU55 PCGS. CAC.** The 1926-S Buffalo nickel claims a low mintage of 970,000 pieces and the coin was overlooked at the time of issue, with few examples saved for numismatic purposes. This attractive Choice AU specimen shows a touch of wear on the well-detailed design elements, with traces of satiny mint luster and accents of light gold and ice-blue toning. PCGS# 3959, NGC ID# 22S7, CoinPlex ID# BFN1926S

- 3489 1927 MS66+ PCGS. CAC.** Brilliant satin luster emanates from both sides of this very attractive high-end Premium Gem. A few splashes of golden-brown color appear, almost entirely on the reverse. A few tiny contact marks are visible. This piece is tied with four others at this grade level at PCGS, with only 6 finer (12/12). PCGS# 3960, NGC ID# 22S8, CoinPlex ID# BFN1927

- 3490 1927-S MS63 PCGS.** A satiny Select Mint State representative of the elusive 1927-S nickel, this piece displays light gray surfaces with subtle champagne toning. The coin is well-struck and possesses lovely eye appeal. PCGS# 3962, NGC ID# 22SA, CoinPlex ID# BFN1927S

Near-Gem 1927-S Nickel

- 3491 1927-S MS64 ANACS.** Olive and rose-gold hues appear on the reverse of this near-Gem. The strike is good given its San Francisco origin, with the usual minor inexactness on the curve of the tail and the hair above the braid. A costly acquisition any finer, with only 37 examples receiving higher grades from PCGS and NGC combined (11/12). NGC ID# 22SA, PCGS# 3962, CoinPlex ID# BFN1927S

**1927-S Buffalo Nickel, MS64
Conditionally Rare in Higher Grades**

- 3492 1927-S MS64 PCGS. CAC.** The 1927-S Buffalo nickel claims a mintage of 3.4 million pieces, a small total in the context of the series. The issue is a condition rarity in grades above the Choice level. This attractive MS64 specimen is well-detailed and brightly lustrous, with pleasing shades of champagne-gold toning blanketing the surfaces. PCGS has graded only 21 numerically finer examples (11/12). *From The Teich Family Collection.* PCGS# 3962, NGC ID# 22SA, CoinPlex ID# BFN1927S

**1927-S Nickel MS64+
Iridescently Toned Surfaces**

- 3493 1927-S MS64+ NGC. CAC.** Attractive iridescent toning in shades of saffron, jade, and fire-red graces each side of this near-Gem Buffalo nickel. This piece shows a decent strike, and only a sprinkling of light marks precludes an even finer grade. NGC has graded 17 examples as MS65 or better (12/12). NGC ID# 22SA, PCGS# 3962, CoinPlex ID# BFN1927S

**Gem 1928-S Nickel
Challenging Branch Mint Issue**

- 3494 1928-S MS65 PCGS.** This better branch mint Gem is virtually pristine. The coruscating surfaces display light ice-blue and straw-gold toning. The obverse is nicely struck, though the reverse die is long in use with minor distortion on the mintmark and an orange-peel texture on the fields near the rim. Housed in a green label holder. Population: 64 in 65, 6 finer (12/12). PCGS# 3965, NGC ID# 22SD, CoinPlex ID# BFN1928S

- 3495 1930 Doubled Die Obverse MS66 PCGS. CAC. FS-101.** The Indian's eye is strongly die doubled south. The 30 also exhibits wide doubling, though the secondary image is faint. Streaks of chestnut-gold overlie lustrous and unblemished surfaces. The centers and tail curve show minor softness. PCGS# 38459

**1934 Buffalo Nickel, MS67+
None Certified Finer**

- 3496 1934 MS67+ NGC. CAC.** The 1934 Buffalo nickel is an available date, from a large mintage of over 20 million pieces, but neither grading service has seen a finer specimen than the coin offered here. This high-end Superb Gem is sharply detailed, with brilliant unmarked fields, and vibrant mint luster. Census: 7 in 67 (1 in 67+), 0 finer (11/12). NGC ID# 22SL, PCGS# 3972, CoinPlex ID# BFN1934

- 3497 1935 MS67 PCGS. CAC.** Although this is a common issue in lower grades, the 1935-P is a condition rarity and quite valuable as a Superb Gem. The mint luster is bright and satiny with an almost metallic sheen, providing this coin with exceptional eye appeal. PCGS has graded only one numerically finer example (11/12). PCGS# 3974, NGC ID# 22SN, CoinPlex ID# BFN1935

- 3498 1935-D MS66 PCGS. CAC.** A bright and fully lustrous Premium Gem, this example displays boldly struck devices. This issue is a true condition rarity for the series that takes a big jump in price as it moves from MS 65 to MS 66. The number of numerically finer PCGS-graded examples has only increased by 2 since this coin appeared at auction in 2003. Population: 139 in 66 (6 in 66+), 5 finer (12/12). *Ex: Baltimore Signature (Heritage, 7/2003), lot 6301.* *From The Richard P. Ariagno, M.D. Collection.* PCGS# 3975, NGC ID# 22SP, CoinPlex ID# BFN1935D

**1936-D FS-901 Nickel, XF40
Three and a Half Legs**

- 3499 1936-D 3 1/2 Legs XF40 NGC. FS-901.** The old number, FS-019, appears on the holder. Although not as famous as its 1937-D Three-Legged counterpart, the 1936-D 3 1/2 Legs variety is far more rare. In fact, Mint State examples are virtually unknown. On the XF40 example offered here, the bison's leftmost foreleg is greatly attenuated. Pearl-gray in color with a bold horn and only moderate highpoint wear. A couple of handling marks on the bison's body do not remove the eye appeal. PCGS# 93978, CoinPlex ID# BFN1936D3HALFLEG

3500 1937-D Three-Legged AU55 PCGS. CAC. FS-901. Rich dove-gray toning encompasses well defined and mark-free surfaces. The faint trail of die dots beneath the flank, in addition to the granular appearance of the back leg, confirm the perennially popular mint error. PCGS# 3982, NGC ID# 22SX, CoinPlex ID# BFN1937D3LEG

3501 1937-D Three-Legged AU58 NGC. CAC. FS-901. Lime-green and rose-gold shades encompass this lightly circulated and unblemished key date nickel. The granular back leg and other variety diagnostics are evident. Housed in a former generation holder. NGC ID# 22SX, PCGS# 3982, CoinPlex ID# BFN1937D3LEG

3502 1937-D Three-Legged AU58 NGC. CAC. FS-901. This coruscating Borderline Uncirculated key date nickel is minimally abraded and possesses medium golden-gray toning. All diagnostics of the popular variety are evident. NGC ID# 22SX, PCGS# 3982, CoinPlex ID# BFN1937D3LEG

Famous Three-Legged 1937-D Nickel MS63, Fully Patinated

3503 1937-D Three-Legged MS63 NGC. FS-901. Rich orange-gold and jade-green toning blankets this shimmering and unabraded Select representative. The 1937-D Three-Legged nickel has for many decades been a collector favorite, though it is technically a die abrasion variety, as is the 1922 No D, Strong Reverse cent. Housed in a former generation holder. NGC ID# 22SX, PCGS# 3982, CoinPlex ID# BFN1937D3LEG

PROOF BUFFALO NICKELS

Type One 1913 Buffalo Nickel, PR67 Great Example of Single-Year Design

3504 1913 Type One PR67 NGC. The rugged original reverse to the Buffalo nickel, with the bison standing atop a bluff with the words FIVE CENTS in raised letters, did not survive its first year of striking; the Mint produced both business strike and proof coins dated 1913 and bearing the revised or Type Two Reverse. (Of course, the main concern behind the design change — the wearing away of the denomination — theoretically does not apply to proofs.) In any event, the sole Type One proof issue is immensely popular with collectors, and the supply of just 1,520 specimens originally struck cannot keep up with demand. This magnificently preserved PR67 example has elegant matte surfaces with light lavender hues. Census: 37 in 67, 1 finer (11/12). NGC ID# 278R, PCGS# 3988, CoinPlex ID# BFP1913TY1

Attractive PR66 1913 Nickel Type Two Reverse

3505 1913 Type Two PR66 PCGS. The 1913 Buffalo Nickel is an important first-year type issue, and the proof mintage for the Type Two design was only 1,514 pieces. This impressive Premium Gem displays razor-sharp definition throughout, with subtle toning on the pristine matte surfaces that includes shades of rose, ice-blue, and golden-yellow. Population: 92 in 66 (2 in 66+), 53 finer (11/12). From The Richard P. Ariagno, M.D. Collection. PCGS# 3990, NGC ID# 278S, CoinPlex ID# BFP1913TY2

Fully Struck Type Two PR67 1913 Buffalo Nickel

3506 1913 Type Two PR67 NGC. CAC. Attractively patinated, with shades of powder-blue and canary-gold on the obverse while the reverse displays fire-red, peach-gold, and sea-green. The strike is razor-sharp. Certified in a former generation holder. Census: 34 in 67, 6 finer (12/12). Ex: Clifford Columbus Collection (Heritage, 6/2005), lot 5657. NGC ID# 278S, PCGS# 3990, CoinPlex ID# BFP1913TY2

3507 1914 PR65 PCGS. Golden-brown and sea-green blend throughout this coruscating and pristine Gem proof nickel. The strike is sharper than on any business strike of the date. Housed in a first generation holder. PCGS# 3991, NGC ID# 278T, CoinPlex ID# BFP1914

1914 PR66 Buffalo Nickel Golden-Toned and Excellent for Type

3508 1914 PR66 PCGS. CAC. The 1914 proof nickels are well-produced and show a finer texture to the matte surfaces than coins struck in the previous year. As such, this date is excellent for type purposes. Pale golden-rose toning is seen over each side with bright underlying mint luster. The surfaces are nearly carbon-free. From The Teich Family Collection. PCGS# 3991, NGC ID# 278T, CoinPlex ID# BFP1914

Coruscating PR67 ★ 1914 Nickel

- 3509 1914 PR67 ★ NGC.** This Superb Gem proof is among the finest and most attractive matte proof nickels we have seen. Fully struck with satiny gray luster and accents of wispy gold and lilac toning that are more vibrant on the reverse. Census: 5 in 67 ★, none finer with a Star designation (11/12).

Ex: Central States Signature (Heritage, 5/2007), lot 1670; Brenda John Collection (Heritage, 7/2010), lot 3401, which realized \$4,312.50. NGC ID# 278T, PCGS# 3991, CoinPlex ID# BFP1914

- 3510 1915 PR65 PCGS. CAC.** An impressive Gem matte proof Buffalo nickel, this piece exhibits bold and complete design elements with satiny gray luster and delicate champagne toning. *From The Teich Family Collection. PCGS# 3992, NGC ID# 278U, CoinPlex ID# BFP1915*

1915 Buffalo Nickel, PR67+ Sharply Detailed and Unusually Lustrous

- 3511 1915 PR67+ NGC.** A stunning proof Buffalo nickel, from a mintage of just 1,050 pieces, this high-end Superb Gem exhibits razor-sharp definition on all design elements. The slightly granular matte surfaces are unusually lustrous and mostly brilliant, with just a wisp of sea-green toning on the reverse. Census: 32 in 67 (1 in 67+), 4 finer (12/12). NGC ID# 278U, PCGS# 3992, CoinPlex ID# BFP1915

Gem Matte Proof 1916 Nickel Last Date in the Matte Proof Series

- 3512 1916 PR65 PCGS.** The 1916 is the low-mintage key to the series, and usually the last date acquired for set builders. This is a remarkably bright example that displays finely granular matte surfaces. Light golden toning covers each side with a very fine (almost microscopic) speckling of carbon present. PCGS# 3993, NGC ID# 278V, CoinPlex ID# BFP1916

1916 Gem Matte Proof Nickel Series Key

- 3513 1916 PR65 PCGS. CAC.** Far and away the key to the matte proof series, only 600 proofs were struck in this final year. Each side displays variegated shades of pale lime-green and rose. The mint luster is bright, giving this Gem a vibrancy and eye appeal often lacking on matte proofs. Light specks of carbon are scattered over each side. *From The Teich Family Collection. PCGS# 3993, NGC ID# 278V, CoinPlex ID# BFP1916*

- 3514 1936 Type One—Satin Finish PR66 PCGS.** The early proof issues from this year are known for their Satin Finish, while later examples exhibited a more mirrored appearance. The satiny surfaces provide tremendous eye appeal to both sides of this well-struck Premium Gem that displays varying shades of champagne color. PCGS# 3994, NGC ID# 278X, CoinPlex ID# BFP1936TY1SATIN

- 3515 1936 Type One—Satin Finish PR66 PCGS. CAC Gold Label.** This lustrous high grade type coin is bathed in lemon-gold and olive-green patina. Nicely struck and free from contact. Microscopic carbon denies an even finer third party assessment. *From The SPQR Collection of CAC Gold Sticker Coins. PCGS# 3994, NGC ID# 278X, CoinPlex ID# BFP1936TY1SATIN*

1936 Satin Finish PR67 Buffalo Nickel One-Year Type for This Finish

- 3516 1936 Type One—Satin Finish PR67 PCGS. CAC.** The Satin Finish proofs of 1936 are a one-year type in the Buffalo nickel series. They are not particularly rare, the mintage estimated at approximately half the total between Satin and Brilliant Finish proofs. The surfaces on this splendid proof are bright and expectantly satiny, with profound striking definition that can only be found on proofs. Much brilliance shows with just a hint of pale yellowish-golden. PCGS# 3994, NGC ID# 278X, CoinPlex ID# BFP1936TY1SATIN

- 3517 1936 Type Two—Brilliant Finish PR65 NGC. CAC Gold Label.** After a two decade gap, proof mintage of Buffalo nickels resumed in 1936. Both satin and brilliant finish proofs are known. The present brilliant finish proof has a good strike and a hint of golden toning. There are no spots or other detractors. *From The SPQR Collection of CAC Gold Sticker Coins. NGC ID# 278Y, PCGS# 3995, CoinPlex ID# BFP1936TY2BRIL*

**1936 Brilliant Finish Nickel, PR66
Green-Label Holder**

- 3518 1936 Type Two—Brilliant Finish PR66 PCGS. CAC.** The Philadelphia Mint coined 4,420 proof Buffalo nickels in 1936, with the first type having a satin finish, and the second type featuring a brilliant finish. There are no contemporary records that might tell how many of each were struck. However, in all grades, PCGS has certified 868 Satin Finish pieces, and 886 Brilliant proofs, suggesting that the mintage of each variety was about 2,200 coins. This Premium Gem has faint champagne toning over its fully brilliant light gray surfaces with only a few microscopic carbon flecks. A highly appealing example. PCGS# 3995, NGC ID# 278Y, CoinPlex ID# BFP1936TY2BRIL

**Blue-Tinged 1936 Buffalo Nickel
PR67, Brilliant Finish**

- 3519 1936 Type Two — Brilliant Finish PR67 PCGS. CAC.** An intensely gleaming beauty with a chrome finish under light, refreshing blue patina. A subtle track of pale apricot color visits the inner portrait. A magnificently preserved specimen of the first brilliant proof five cent striking in decades, one of just two for the Buffalo nickel series.
From The Richard P. Ariagno, M.D. Collection. PCGS# 3995, NGC ID# 278Y, CoinPlex ID# BFP1936TY2BRIL
- 3520 1937 PR64 NGC.** This near-Gem proof Buffalo nickel is almost entirely covered in a bright gold patina with the exception of some of the outer areas on the reverse. A number of spots appear, primarily on the reverse.
From The Richmond Hill Collection. NGC ID# 278Z, PCGS# 3996, CoinPlex ID# BFP1937
- 3521 1937 PR64 PCGS. CAC.** Pastel gunmetal-gray and caramel-gold tints visit this satiny Choice proof. Only the centers exhibit any hint of incompleteness. Minuscule carbon decides the grade. Certified in a first generation holder. PCGS# 3996, NGC ID# 278Z, CoinPlex ID# BFP1937

- 3522 1937 PR65 PCGS. CAC Gold Label.** Faint straw-gold patina visits this satiny and well struck proof type coin. A pristine specimen noteworthy for its coveted gold CAC seal. Encapsulated in an old green label holder.
Ex: New York Signature (Heritage, 6/2005), lot 5306, which realized \$1,380.
From The Western Reserve Collection. PCGS# 3996, NGC ID# 278Z, CoinPlex ID# BFP1937
- 3523 1937 PR65 PCGS. CAC.** Ice-blue and sun-gold hues visit this prominently mirrored and intricately struck Gem. Essentially perfect aside from distributed pinpoint carbon. Encapsulated in a first generation holder.
Ex: Dallas Signature (Heritage, 12/2005), lot 358, which realized \$1,725. PCGS# 3996, NGC ID# 278Z, CoinPlex ID# BFP1937
- 3524 1937 PR65 PCGS. CAC Gold Label.** Pastel gold and lilac tints adorn this nicely struck final year proof type coin. A solitary fleck beneath the bison's beard denies perfection. Certified in an old green label holder.
From The SPQR Collection of CAC Gold Sticker Coins. PCGS# 3996, NGC ID# 278Z, CoinPlex ID# BFP1937
- 3525 1937 PR65 PCGS. CAC Gold Label.** Lilac-red and caramel-gold endow this pristine specimen. The strike is crisp though slightly incomplete on the hair above the braid. Encapsulated in an old green label holder.
From The SPQR Collection of CAC Gold Sticker Coins. PCGS# 3996, NGC ID# 278Z, CoinPlex ID# BFP1937
- 3526 1937 PR66 PCGS.** Brilliant surfaces, hints of color, and a bold strike provide this example with tremendous visual allure. A few tiny, light freckles appear. PCGS# 3996, NGC ID# 278Z, CoinPlex ID# BFP1937
- 3527 1937 PR66 PCGS Secure.** All of the nickel proofs struck in 1937 display mirrored fields. This Premium Gem is an attractive representative, with a bold strike and hints of golden-peach toning. A spot appears in the field near the Indian's nose. PCGS# 3996, NGC ID# 278Z, CoinPlex ID# BFP1937
- 3528 1937 PR66 PCGS. CAC Gold Label.** Lemon-gold, ice-blue, and lilac patina endow this crisply impressed and pristine Buffalo nickel. A beautiful and formidable example of the rugged all-American design type.
From The SPQR Collection of CAC Gold Sticker Coins. PCGS# 3996, NGC ID# 278Z, CoinPlex ID# BFP1937
- 3529 1937 PR67 PCGS.** Attractive toning further enhances the visual allure of this boldly struck Superb Gem. Shimmering iridescent touches of color appear on both sides and include hues of fuchsia, red, golden-orange, brilliant yellow, and electric mint-green. PCGS has awarded higher numeric grades to only 12 pieces (12/12). PCGS# 3996, NGC ID# 278Z, CoinPlex ID# BFP1937
- 3530 1937 PR67 PCGS. CAC.** This extremely flashy Superb Gem remains free of toning and displays bold detail. The surfaces of this example are virtually pristine other than a small depression near the bison's front hooves. Only 12 examples have achieved numerically higher grades from PCGS (12/12).
From The Richard P. Ariagno, M.D. Collection. PCGS# 3996, NGC ID# 278Z, CoinPlex ID# BFP1937
- 3531 1937 PR67+ NGC. CAC.** As the grade would imply, this piece has tremendous eye appeal, with brilliant surfaces and boldly impressed design details. This example is tied with one other at this grade level at NGC, with 39 finer (12/12). NGC ID# 278Z, PCGS# 3996, CoinPlex ID# BFP1937

1937 Buffalo Nickel, MS68
Only One Numerically Finer Coin at PCGS

- 3532 1937 PR68 PCGS.** The 1937 proof Buffalo nickel employed the all-brilliant finish, rather than the unpopular Satin finish used on some coins the year before. This magnificent MS68 example displays razor-sharp definition on all design elements and deeply mirrored fields that are blanketed in shades of champagne-gold and blue toning. Visual appeal is tremendous. Population: 11 in 68, 1 finer (12/12). PCGS# 3996, NGC ID# 278Z, CoinPlex ID# BFP1937

JEFFERSON NICKELS

- 3533 1938-D MS67 Full Steps PCGS.** This Superb Gem displays a frosted satin luster and well-struck devices. Areas of russet and silver-plum toning appear primarily on Jefferson's forehead and the field to the left, with a few other areas of toning noticed. Population: 36 in 67 Full Steps, 0 finer (12/12). PCGS# 84001, NGC ID# 22T5, CoinPlex ID# JFN1938DFS
- 3534 1938-D MS67 Full Steps PCGS.** An attractive golden patina all but fully covers both sides of this attractive well-preserved Superb Gem. The surfaces are lustrous and the coin displays a sharp strike. Population: 36 in 67 Full Steps, 0 finer (12/12). PCGS# 84001, NGC ID# 22T5, CoinPlex ID# JFN1938DFS
- 3535 1940-S MS67 Full Steps PCGS.** Bright lustrous surfaces appear at the center and blend toward a matte finish near the outer edges. Jefferson has a small contact mark on the cheek. The fields exhibit prominent die polish lines (as made). Population: 9 in 67 Full Steps, 0 finer (12/12). PCGS# 84009, NGC ID# 22TF, CoinPlex ID# JFN1940SFS
- 3536 1945-P/P/P Tripled Die Reverse MS67 NGC. FS-804.** Not to be confused with the stronger *Guide Book* FS-801 Doubled Die Reverse variety, FS-804 shows noticeable die tripling on the lower right reverse quadrant. The spread is greatest on the S in CENTS. In addition, the mintmark is repunched. Light green-gold toning visits this lustrous and unmarked Superb Gem. PCGS# 38503
- 3537 1957 MS66 Full Steps PCGS.** Glowing luster exudes from the moderately gold toned surfaces of this Premium Gem that displays minimal abrasions. Die striae appear in the fields. Population: 10 in 66 (1 in 66+) Full Steps, 0 finer (11/12). PCGS# 84061, NGC ID# 22V2, CoinPlex ID# JFN1957FS

SMS JEFFERSON NICKELS

Superb Gem Deep Cameo Jefferson Nickel
Special Mint Set Issue

- 3538 1965 SMS MS67 Deep Cameo PCGS.** If not for the telltale date, this magnificent Special Mint Set Jefferson nickel might well pass for a proof example. The design elements are sharply rendered throughout and the frosted devices stand out against the reflective fields with profound cameo contrast. The mostly brilliant surfaces show a few accents of champagne-gold toning. PCGS# 94197, CoinPlex ID# JFP1965MSDC

Sharp 1966 SMS Nickel, MS68 Cameo

- 3539 1966 SMS MS68 Cameo PCGS.** A veneer of champagne-gold toning resides on the brightly lustrous surfaces of this Superb SMS example. Sharp field-motif contrast is evident, and all design features are well brought up. Nearly pristine throughout. Population: 5 in 68 Cameo, 0 finer (12/12). PCGS# 84198, CoinPlex ID# JFP1966SMSCA

PROOF JEFFERSON NICKELS

- 3540 1939 Reverse of 1938 PR67 NGC.** The design elements display bold definition on this lovely Superb Gem. The cheek displays a minor contact mark. Census: 70 in 67, 2 finer (12/12). NGC ID# 279X, PCGS# 4176, CoinPlex ID# JFP1939
- 3541 1953 PR67 Deep Cameo PCGS.** Heavily frosted devices and richly mirrored fields combine for pronounced contrast on this example. Not surprisingly, this coin has tremendous eye appeal. Population: 6 in 67 Deep Cameo, 1 finer (12/12). PCGS# 94185, NGC ID# 22YE, CoinPlex ID# JFP1953DC

1958 Jefferson Nickel, PR68 Deep Cameo
Tied for Finest PCGS Certified

- 3542 1958 PR68 Deep Cameo PCGS. All six steps are boldly evident as usual on this Superb Gem Deep Cameo proof 1958 Jefferson nickel. The surfaces are brilliant and untuned, with deeply mirrored fields around satiny light gray devices. An exceptional opportunity for the advanced collector. Population: 4 in 68 Deep Cameo, 0 finer (11/12). PCGS# 94190, NGC ID# 27A8, CoinPlex ID# JFP1958DC

- 3543 1959 PR68 Deep Cameo PCGS. Intense contrast provides tremendous visual allure to this high-grade example. The resultant white-on-black appearance is stunning. Population: 13 in 68 Deep Cameo, 1 finer (12/12). PCGS# 94191, NGC ID# 27A9, CoinPlex ID# JFP1959DC

- 3544 1971 No S PR68 Cameo PCGS. This beautifully struck coin displays exquisite details leading to tremendous eye appeal. A light gold patina covers the deeply frosted devices. A few tiny spots appear in the fields. Only 8 pieces have received higher numeric grades from PCGS (12/12). PCGS# 84204, NGC ID# 22YN, CoinPlex ID# JFP1971NOSCA

1971 No S Jefferson Nickel, PR69 Cameo
Estimated Only 1,655 Pieces Struck

- 3545 1971 No S PR69 Cameo PCGS. This popular modern rarity displays stunning field-motif contrast, and both sides reveal immaculate preservation on untuned surfaces. The design elements are fully struck, and eye appeal is tremendous. The chances of finding another example with this coin's combination of high technical grade and superior eye appeal are remote. Population: 8 in 69 Cameo, 0 finer (12/12). PCGS# 84204, NGC ID# 22YN, CoinPlex ID# JFP1971NOSCA

BETTS MEDALS

1556 Philip II Betts-1 in Silver Rare King of the New World Medal

- 3546 Betts-1. 1556 Philip II, King of the New World. Silver, cast, chased. VF+.** 35.4 mm, 1.3 mm thick at lower rim, 13.7 gm. Medal turn. Style of Florence-born engraver Gianpaolo Poggini (1518-ca. 1582), presenting an armored bust left of Philip II with Latin titles King of the Spains (plural) and of the New Western World within a narrow, plain raised rim. The reverse honors his father, Emperor Charles V (who first reigned as Charles I of Spain), with a laureate armored bust right and titles Caesar and Augustus, all within a beaded outer rim. Pleasing silver-gray toning; a faint edge bruise is seen at 5 o'clock. A thoroughly pleasing example of the first medal listed by C. Wyllys Betts.

John W. Adams Commentary

"Cast with fields chased. Unsigned. An especially rare variety, with no appearance in Ford. The plain rim on the obverse is paired with a beaded rim on the reverse, suggesting that two different artisans were at work here. Rounded rims."

Ex: C.O.I.N. '84 (*Ponterio & Associates*, 6/1984), lot 632; CICF (*Ponterio & Associates*, 4/1997), lot 6.

Betts-1 through 12 are collectively known as the NOVI ORBIS, King of the New World medals. Adams writes: "The only comparable offering of NOVI ORBIS medals in modern times was that in Ford XIII. The medals herein are more extensive than Ford and, on balance, of higher quality."

From *The John W. Adams Collection*.

1559 Betts-3 Peace of Cambrai Medal Extremely Rare in Silver

- 3547 Betts-3. 1559 Peace of Cambrai. Silver, struck. XF.** 40.4 mm, 3.3 mm thick at lower rim, 42.7 gm. Medal turn. By Gianpaolo Poggini, with the artist's signature below the truncation of the high-relief armored bust of Philip II, facing left in a circle. Reverse shows a standing draped figure of Peace holding a cornucopia as she ignites a pile of discarded weapons before the closed Temple of Janus within the Latin legend Peace Established on Land and Sea, the Roman numeral date MDLIX (1559) in exergue. Pleasingly thick and heavy planchet; smooth and reflective fields complement the splendidly detailed devices. Describing lot 662 in Part XIII of the John J. Ford Jr. Collection, the cataloger revealed that Ford had only seen one silver specimen, but the medal offered there was bronze. Here is a struck silver specimen of Betts-3 that was not found by the diligent Ford.

John W. Adams Commentary

"Struck on a thick, polished flan (probably rolled). A true work of art, signed 'J. PAVL. POG. F.' Extremely rare in this metal. Rounded edges."

Ex: *Morton & Eden* (4/2002), lot 643.

From *The John W. Adams Collection*.

**Betts-3 1559 Peace of Cambrai Medal
Usual Bronze Composition**

- 3548 Betts-3. 1559 Peace of Cambrai. Bronze, cast, chased. Good VF.** 38.8 mm, 1.9 mm thick at lower rim, 20.2 gm. Coin turn. General type as the preceding but lacking the artist's signature. Thin planchet bears an excellent Philip II portrait and sharp figure of Peace conducting her destruction of the implements of war. The chasing in the reverse field above the temple is slightly distracting to the eye, compensated for by the reddish-brown patina that adds significantly to the outstanding visual appeal.

John W. Adams Commentary

"Cast with the fields chased. Clearly a finer piece of work than the preceding, but unsigned. From a different mold as there are slight differences between the obverse legends on the two. Slim planchet with patterned, roundish rim."

Ex: Auction 343 (*Busso Peus Nachf.*, 4/1995), lot 1330.
From The John W. Adams Collection.

**1559 Peace of Cambrai Medal
Betts-3 Variant, Cast Bronze**

- 3550 Betts-3, variant. 1559 Peace of Cambrai. Bronze, cast, chased. VF.** 37.8 mm, 2.3 to 2.8 mm thick, 26.7 gm. Coin turn. This obverse is from a distinctly different die from the preceding, showing the king's title as PHILIPPVS · II · HISPAN in place of HISPANIAR. Obverse field chasing obliterates most of the fine circle around the bust. Light brown-tan patina contrasts with deeper color of preceding examples but the overall detail is crisp and satisfying.

John W. Adams Commentary

"Cast with fields chased and the rest of the surface granular. Obverse portrait of Philip II signed 'J. PAVL. POG. F.' Reverse depicts Peace burning the trophies of war before the locked gate of the Temple of Janus. Below the date MDLIX or 1559, the Peace of Cambrai. Beaded rim obverse and reverse, with edge slightly rounded."

Ex: Leonard Finn (12/1983).

From The John W. Adams Collection.

**1559 Betts-3 Peace of Cambrai Medal
Cast Bronze Flan**

- 3549 Betts-3. 1559 Peace of Cambrai. Bronze, cast. About VF.** 38.8 mm, thickness varies from 4.0 to 4.5 mm at the thickest point of the rim, 39.0 gm. Coin turn. Dies of the last. Deep reddish-brown, generally strong detail includes a bold armored bust and well-detailed Peace within boldly beaded outer borders. Light copper-red on the highest points emphasizes quality of the reliefs.

John W. Adams Commentary

"Later cast of a holed matrix, with fields lightly chased. Unsigned. Obverse legend as on the preceding silver specimen. Thick planchet with slightly rounded edges."

Ex: Dr. Paul Patterson (6/1986).

From The John W. Adams Collection.

**Betts-5 1559 Marriage Medal
Philip II and Isabella of Valois**

- 3551 Betts-5. 1559 Marriage of Philip II and Isabella of Valois. Bronze, cast. XF.** 38.4 mm, 1.8 mm thick, 15.8 gm. Medal turn. Poggini's Philip II bust is continued from the earlier Peace of Cambrai medals, the reverse portraying Isabella of Valois, bride and marital trophy of the Peace of Cambrai (Cateau-Cambresis). Delightfully high reliefs despite a thin planchet, the cheeks of king and queen showing sharp indentations. Saddle-brown patina shows highlights of red-gold.

John W. Adams Commentary

"Cast in exceptionally high relief and chased. Fine detail. Signed 'J. PAVL. POG. F.' on obverse and reverse. Elizabeth of Valois was the third wife of Philip II; they married in 1559. Indentations on cheeks of both portraits may mark the grip where the piece was held while the edge was patterned or perhaps the edge markings are the seam where two thin shells were joined. Interesting craftsmanship in any event."

Ex: CICF (Ponterio & Associates, 4/1997), lot 9.

From The John W. Adams Collection.

**Betts-5 1559 Philip II Marriage Medal
Struck Bronze**

- 3552 Betts-5. 1559 Marriage of Philip II and Isabella of Valois. Bronze, struck.** XF. 39.0 mm, 2.5 to 2.7 mm thick, 30.9 gm. Medal turn. Well-proportioned busts show a wealth of fine detail, standing out sharply from smooth surrounding fields with a dramatic visual effect. The satisfying thick planchet adds to the medal's undeniable appeal

John W. Adams Commentary

"Struck on a polished flan. Obverse and reverse signed 'J. PAVL. POG. F.' Rims beaded on both sides. Mostly square edges."

Ex: *Morton & Eden* (4/2002), lot 644.

From *The John W. Adams Collection*.

**1570 Betts-8 Marriage Medal
Philip II and Anne**

- 3553 Betts-8. 1570 Marriage of Philip II and Anne of Austria. White Metal, silver-gold rinse.** XF. 38.1 mm, 2 mm thick, 18.3 gm, specific gravity 7.52. Medal turn. The unsigned obverse in almost certainly by Poggini, but shows a finely dotted inner border not present on the Ford specimen, extending under the king's truncation. The queen's portrait bears a square-letter ÆT·ZI on the truncation, title ·ANNA · AVSTRIACA · PHILYPPI CATHOL · A. There is a slight casting defect in the beaded border above IACA, but close study shows this is not evidence of loop removal.

John W. Adams Commentary

"Cast in high relief and chased throughout. Unsigned and, though of exquisite workmanship, probably not Poggini. A different obverse mold than the preceding, with a row of beads below the legend added. Note differences versus the preceding in obverse legend."

Ex: *Jacques Schulman*; *Ted Craige* (1981).

From *The John W. Adams Collection*.

**1570 Philip II and Anne of Austria
Marriage Medal, Betts-8, Variant**

- 3554 Betts-8, variant. 1570 Marriage of Philip II and Anne of Austria. Silver, cast, gilt.** XF, scratched. 38.8 mm, 1.7 mm thick, 22.0 gm. Medal turn. Type of preceding but boasts crisper detail that gives the appearance of higher relief. The fine details in Philip's beard and Anna's pearled cap and lace ruff can only be called exquisite. Integral loop; two ancient field scratches are seen before the queen's face.

John W. Adams Commentary

"Cast in high relief and chased throughout. Unsigned. Loop integral but hanger added. 'AET 21' (aged 21) on Anna's truncation. Anna of Austria and Philip II were married in 1570; his fourth wife, she gave him five children. Whether by Poggini or another (Jonghelinck?), this exquisite piece is clearly contemporary. Beaded borders on both sides with the edge patterned."

Ex: *Richard Margolis* (1/2003).

From *The John W. Adams Collection*.

**Betts-11 1580 Spanish Conquest of Portugal
Extremely Rare Silver Medal
Cast Shells**

**Betts-12 1581 West Indies Commerce Medal
Cast Silver, Likely Circa 1560**

3555 Betts-11. 1580 Spanish Conquest of Portugal. Silver, cast shells, chased. XF. 53.4 mm, 3.5 mm thick, 51.3 gm. Medal turn. Distinctive bearded bust of an aging Philip nearly facing in tall hat and ruff, PHILIPPVS II HISP ET NOVI ORBIS REX, King of Spain and the New World.

The reverse is inscribed RELIQVVM DATVR, the Remainder is Given, union of Spanish and Portuguese possessions. The globe at center is divided at the equator, the Northern hemisphere bearing lines of latitude and longitude with a diagonal zodiacal band ending at the middle. Betts and subsequent writers interpreted this global north-south division as symbolizing the union of Spanish and Portuguese possessions, though the division sanctioned by Pope Alexander VI in the Treaty of Tordesillas divided the New World on a north-south line. Medal is clearly dated 1580, but Betts mistakenly listed it as 1581. No other example of this medal is likely to appear for decades.

John W. Adams Commentary

"Cast shells, elaborately chased, with a very substantial rim added. Obverse features bust of Philip II, mostly facing, with high hat and ruff. Reverse shows a globe, the Southern hemisphere blank and the Northern hemisphere thatched with the usual lines separating Spanish and Portuguese interests. The obverse design is the same as Van Loon I, 282, but the reverse has the date added and markings on the Southern hemisphere removed. The manufacturing technique employed suggests an 18th century date of origin, but this carefully crafted medal is no casual copy. Why and for whom the piece was made must remain conjectural; per Laurens Schulman, the House of Schulman has never handled this medal, so it is undoubtedly rare. It fetched 2400 pounds (\$4,200) when auction by Bonham's on 12.5.99. No example appeared in Ford or any other auction in modern times."

Ex: Bonham's (12/1999), lot 181A.

From The John W. Adams Collection.

3556 Betts-12. 1581 (1560) West Indies Commerce. Silver, cast. XF. 39.1 mm, 2.3 mm thick, 24.3 gm. Medal turn, broad outer rim. Almost certainly the work of medalist Gianpaolo Poggini, this obverse bears that artist's armored bust of Philip II with title II · HISPAN. The reverse bears the Latin legend RELIQVVM DATURA, with INDIA in exergue. Researcher John W. Adams believes that this is a personal commemoration of Philip II, and possibly related to the Treaty of Cambrai (Cateau-Cambresis). C. Wylls Betts and Gerard Van Loon both linked it to the Spanish takeover of the Portuguese possessions in America. The usage INDIA would seem to celebrate the "other India," Portugal's Indian coastal possessions including Goa joining the Spanish empire, but the scene is of the Americas, with 11 oddly hollow-eyed figures following goddess of Commerce holding globe with a nearly blank Southern hemisphere toward three ships. The clincher is the well-drawn llama, described by Betts as a camel. In fact, the llama, vicuña, and guanaco are all New World members of the camel family, though Betts may not have been aware of this.

John W. Adams Commentary

"Cast on an oversized flan, with the fields chased. Wide rims and edges filed flat. Superbly executed but unsigned. Betts dates this medal to 1581 but Philip Attwood, citing Poggini's correspondence, places the work in 1560 and confirms that the design is indeed that of the master. We note variations in diameter for this variety from 37.4 mm to 40.6 mm; both Attwood and Dutch numismatist Dim Verschoor believe that some of the versions are 'Nederlandish,' quite possibly the work of Jonghelinck."

Ex: H.H. Kricheldorf (11/1981), lot 1177.

From The John W. Adams Collection.

**Betts-12 1581 West Indies Commerce Medal
A Second Cast Silver Specimen**

3557 Betts-12. 1581 (1560) West Indies Commerce. Silver, cast. XF. 37.7 mm, 1.8 mm thick, 18.3 gm. Medal turn. This medal at first appears to be a smaller version of the preceding but is actually more finely detailed in every aspect from beaded rims to the 11 figures on the reverse. These now show fully drawn faces and well-defined bodies in higher and crisper relief. Close examination reveals that the globe held by the leading figure shows the blank Southern hemisphere of Betts-11. A desirable example that would be hard to duplicate today.

John W. Adams Commentary

“Cast and chased throughout, hangar removed. Superbly executed and unsigned as the last, to which it seems identical except for being on a smaller flan. It will be a long time, if ever, before two pieces of this variety in silver are seen side by side.”

Ex: Richard Margolis (9/1984).

From The John W. Adams Collection.

**1581 West Indies Commerce Medal
Cast Silver, Gilt, With Ornate Frame
Betts-12 Variant**

3558 Betts-12 Variant. 1581 (1560) West Indies Commerce. Silver, gilt, cast with frame. VF. 42.0 mm, 51.8 mm with frame, 18.9 gm. Medal turn. The obverse of this medal is something of a mystery, showing a cherub holding scales in clouds over an unidentified seaport city, Latin legend NICA NILA, Nothing will Conquer Us. The reverse is that of the preceding RELIQVVM DATURA medals, but in less dramatic relief. The outer border is composed of linked heart-shaped figures, perhaps the stylized fire-steels of Burgundy that are still to be seen in the Order of the Golden Fleece that originated in that dukedom, later part of the Spanish Netherlands. See “A Medal Mystery,” *MCA Advisory*, January 2004, for Adams’ findings on these medals. No example with this obverse appeared in the Ford sales.

John W. Adams Commentary

“Cast with an ornate filigreed frame (an identical frame can be seen on the Charles V medal, 1577, in the collection of the ANS; the design is a symbol of the house of Burgundy). Unlisted obverse: cherub holding the scales of justice flies over a city (The Hague?). It is wholly unclear to what this scene and legend alludes, our best guess being the Peace of Cambrai, 1560. Reverse of Betts-12. In the words of Baldwin’s cataloguer: ‘An excellent and contemporary example with original gilding’; the medal fetched \$3,775 in 2003.”

Ex: A.H. Baldwin (10/2003), lot 2441.

From The John W. Adams Collection.

Betts-15 Raleigh Plantation Token
Circa 1584

- 3559 Betts-15. 1584 Raleigh Plantation Token. Brass, cast. VG-Fine.** 30.5 x 31.3 mm, 2.8 mm thick, 17.0 gm. Full-blown rose within concentric legends, AS · SOONE: AS · WEE · TO · BEE · BEGUNNE:/ * WE · DID · BEGINNE: TO · BE · VNDONNE :. Reverse bears a crude cemetery scene with cherub resting atop a skull, all within an ouroboros, serpent with its tail in its mouth symbolizing eternity. 19th century American coin dealers attempted to connect this English mortuary token with the disastrous end of the adventurous career of Sir Walter Raleigh. Echoes of that identification still reverberate today.

John W. Adams Commentary

"Not a medal but it has a Betts number. The date, origin, and purpose are unknown. Struck on a cast planchet."
Ex: Charles Kirtley (3/1985). Apparently earlier from Richard Picker, whose imprinted cotton liner accompanies this lot.
From The John W. Adams Collection.

Betts-16 1596 Dutch Colonies Silver Medal
Thin Planchet

- 3560 Betts-16. 1596 Dutch Colonies in India, Brazil, and Saint Thomas. Silver. Fine.** 54.6 mm, 1.4 mm thick, 27.4 gm. Medal turn. Hebrew JEHOVAH in clouds over port city on horizon, sea god Neptune rides sea monster in foreground, Latin legend May Neptune's Kingdoms Prosper under Fortunate Stars. Reverse presents Arms of Frisia surrounded by small shields and names of seven Dutch port cities: Alckmaar, Hoorn, Enckhuysen, Medemblick, Edam, Monickendam, and Purmerend. This boldly designed medal is a significant rarity of the early Betts series.

John W. Adams Commentary

"This medal commemorates the Dutch colonies in India, Brazil, and St. Thomas."
Ex: Ted Craige.
From The John W. Adams Collection.

1596 Dutch Colonies Silver Medal
Thick Planchet, A Second Betts-16

- 3561 Betts-16. 1596 Dutch Colonies in India, Brazil, and Saint Thomas. Silver. VF.** 54.9 mm, 2.5 mm thick, 57.3 gm. Medal turn. Hebrew JEHOVAH in clouds over port city on horizon, sea god Neptune rides sea monster in foreground, Latin legend May Neptune's Kingdoms Prosper under Fortunate Stars. Reverse presents Arms of Frisia surrounded by small shields and names of seven Dutch port cities: Alckmaar, Hoorn, Enckhuysen, Medemblick, Edam, Monickendam, and Purmerend. The cataloger of Ford's gilt example compared this medal to the rare multiple talers of this era. The offering of two examples in a single auction is a historic event for modern times.
Ex: Leonard Finn (12/1983).
From The John W. Adams Collection.

Betts-17 1596 American Commerce Medal
Dutch Bronze Jeton

- 3562 Betts-17. 1596 American Commerce. Bronze. VF.** 30.1 mm, 6.0 gm. Ancient sailor Arion carried ashore on a heraldic dolphin after being thrown overboard by hostile shipmates, Latin legend Now in Hope, Now in Fear. Reverse presents the Arms of the Dutch province of Zeeland. A Dutch jeton of the era.
Purchased in December 1990.
From The John W. Adams Collection.

1598 American Voyages Medal
Betts-18 Dutch Bronze Jeton

- 3563 Betts-18. 1598 American Voyages. Bronze. XF.** 30.1 mm, 5.4 gm. Arms of Frisia on crossed anchors, Latin Christ is our Holy Anchor, letters PPP abbreviate Pugno pro Patria, I Fight for the Fatherland (still the motto of the Netherlands Navy). Seven-line reverse inscription comments on tales of returning navigators.
Ex: Skyler Liechty (5/2011).
From The John W. Adams Collection.

Betts-19 1599 Saint Thomas Captured Medal

- 3564 Betts-19. 1599 Capture of Saint Thomas. Silver. XF.** 32.8 mm, 2.5 mm thick, 15.5 gm. Medal turn. Armored bust r. of Maurits Prince of Orange, Count of Nassau and Katzenellenbogen. Marquis of Vere and Flessingen, Count of Frisia and Moers in a finely dotted circle. An exceptionally handsome reverse shows nude Fortuna with her wind-filled sail, with sea god Neptune sailing left in left in a marine car drawn by four sea horses. This modern-appearing, simple design hails the successful capture of Saint Thomas by Admiral Van der Does who promptly died of tropical fever after his victory.

John W. Adams Commentary

"Appears to have been struck flat with rim added."

Ex: Laurens Schulman (4/2001), lot 2279.

From The John W. Adams Collection.

**1599 Van der Does Victories Medal
Betts-20 Dutch Bronze Jeton**

- 3565 Betts-20. 1599 Victories of Admiral Van der Does. Bronze. VF.** 29.1 mm, 5.2 gm. Dutch-style ship of the Argonauts, island landscape with twin Termini, gods of boundaries of islands of Bommel and Thiel, symbolizing halting of Spanish drive for New World dominion. Jeton compares Dutch Admiral Van der Does to ancient Jason of the Golden Fleece. A tan-brown and sharply struck Dutch jeton.
- Ex: King (2008).
From The John W. Adams Collection.

**1599 Betts-20 Van Der Does Medal
Bronze Dutch Jeton**

- 3566 Betts-20. 1599 Victories of Admiral Van der Does. Bronze. VF.** 29.7 mm, 5.8 gm. Dutch-style ship of the Argonauts, island landscape with twin Termini, gods of boundaries of islands of Bommel and Thiel, symbolizing halting of Spanish drive for New World dominion. Jeton bears Hebrew JEHOVAH on both sides, compares Admiral Van der Does to ancient Jason of the Golden Fleece, tan-brown Dutch jeton.
- Ex: Laurens Schulman (11/1991).
From The John W. Adams Collection.

**1599 Admiral Van der Does Medal
Betts-20 Dutch Jeton**

- 3567 Betts-20. 1599 Victories of Admiral Van der Does. Bronze. Fine.** 30.3 mm, 5.3 gm. Dutch-style ship of the Argonauts, island landscape with twin Termini, gods of boundaries of islands of Bommel and Thiel, symbolizing halting of Spanish drive for New World dominion. Hebrew JEHOVAH on both sides of jeton comparing Admiral Van der Does to Jason of the Golden Fleece, tan-brown with faintly wavy planchet.
- Ex: Ted Craig.
From The John W. Adams Collection.

**1602 Betts-21 Cast Silver Medal
Holland Versus Spain**

- 3568 Betts-21. 1602 Rivalry of Holland and Spain. Silver, cast, gilt. VF, once mounted.** 51.8 mm, 2.6 mm thick, 46.9 gm. Obverse depicts the capture of Spanish galleon *Santiago* at St. Helena by two Dutch ships, Latin They Do what Seems Doable. Reverse shows spirited horse symbolizing Philip II springing from globe followed by Zeeland lion, defiant Latin legend, One World does not Suffice, Wherever you Leap, I will Follow. Tournai castle mint mark, loop removed at 12 o'clock.

John W. Adams Commentary

"Horse (Philip II) leaping into the New World, pursued by the lion of Zeeland. The Spanish treasure ship *Sint Jacob* was captured off the island of St. Helena by two merchant ships of the State of Zeeland. This medal was commissioned by the owners of the two ships, who captured over one million guilders in jewels and silks."

Ex: Ted Craig.

From The John W. Adams Collection.

1602 New World Rivalry Medal
Betts-21, Silver

- 3569 Betts-21. 1602 New World Rivalry. Silver. VF.** 50.9 mm, 2.4 mm thick, 45.7 gm. Capture of Spanish galleon *Santiago* off St. Helena by two smaller and more maneuverable Dutch ships, Latin legend, They Do what Seems Possible. Reverse shows a spirited horse symbolizing Philip II springing from globe followed through the waves by the Zeeland lion, Latin One World does not Suffice, Wherever you Leap, I will Follow. Tournai castle mint mark, splendid strike and centering, smooth and reflective fields combine for exceptional beauty. A forceful design that has been superbly executed.
Ex: *Munthandel Verschoor* (9/2009).
From *The John W. Adams Collection*.

1622 Dutch Commerce Medal
Unlisted in Betts

- 3570 Betts-Unlisted. Van L. II, 55. 1622 Dutch Commerce of Frisia. Silver. XF.** 50.6 mm, 2.8 mm thick, 43.4 gm. Coin turn. Unsigned. Three small city shields punctuate VERRIT - TVRBIDA - (arms of Frisia, fleur de lis) NAVTA - ÆQUORA. Reverse presents a farm with peaceful milking scene featuring colonist's wife, cattle and sheep, legend hails the Hope and Faith of Colonists, * AVIDI * SPES * FIDA * COLONI. Sharply struck and richly detailed, high-quality 17th century work of a Dutch master medalist.
Ex: A.H. Baldwin (*privately*, 10/1995).
From *The John W. Adams Collection*.

Betts-22 1624 Dutch Naval Victories Medal

- 3571 Betts-22. 1624 Dutch Naval Victories. Silver. XF.** 69.5 mm, 3.1 mm thick, 85.6 gm. Medal turn. Facing armored bust with name and titles in fine script of Maurits Prince of Orange, Count of Nassau and Governor of the United Provinces within an ornate circle of the Arms of the seven Dutch provinces. Dominating the reverse are the crowned oval Arms of Orange-Nassau within the British Order of the Garter above motto *Je Maintiendray*, and minuscule 16 Cum Privil 24 at base. This medal is a classic of the Dutch historical series. Betts noted that this triumphal design commemorated Dutch naval victories under Admiral L'Hermite off Lima, Peru, and off the coast of Brazil by Admiral Willens. The edge of this specimen bears an incused groove that superficially resembles a seam, but the planchet is solid with proper "ring" and overall weight.
Ex: *Museum of Connecticut History; Coin Galleries* (7/1998), lot 1302.
From *The John W. Adams Collection*.

1624 Dutch Naval Victories
Betts-22 Silver Medal

- 3572 Betts-22. 1624 Dutch Naval Victories. Silver. VF.** 69.0 mm, 3 mm thick, 81.7 gm. Medal turn. Facing armored bust with name and titles in fine script of Maurits Prince of Orange, Count of Nassau and Governor of the United Provinces within an ornate circle of the Arms of the seven Dutch provinces. Reverse displays the crowned oval Arms of Orange-Nassau within the British Order of the Garter above motto *Je Maintiendray*, and minuscule notation 16 Cum Privil 24 at base. This medal records the epic Dutch naval victories under Admiral L'Hermite off Lima, Peru, and by Admiral Willens off the coast of Brazil. The edge of this medal is rounded and unmarked. An imposing and historic design in splendid preservation.
Ex: *Glendining* (11/1989), lot 6.
From *The John W. Adams Collection*.

Betts-23 Matanzas Treasure Medal Splendid Peter Heyn Memento

3573 Betts-23. 1628 Matanzas Treasure. Silver. Mint State. 63.9 mm, 3 mm thick, 82.4 gm. Medal turn. The Latin legend is an excerpt from the Prophet Jeremiah, The Nations shall Serve Him ... surrounding a wonderfully detailed Western hemisphere map showing California as an island and the western coasts of Europe and Africa. The Arctic and Antarctic ice regions are clearly shown. The reverse depicts Admiral Piet Heyn's Dutch fleet bottling up the Spanish treasure fleet in Cuba's Matanzas Bay and capturing the entire year's treasure of New Spain. The legend hails the Threshing of the Daughter of Babylon ... by the Despoilers of the North, the Dutch under the resourceful Heyn. Faint blue-steel toning overlies a razor-sharp strike with its wealth of jewel-like detail. This extraordinary medal is essentially as perfect as the moment it dropped from the dies.

John W. Adams Commentary

"Betts 23-26 - Pieter Heyn was an 'old salt' if ever there was one. He began his sailing career on his father's privateer, later becoming captain of his own merchant fleet. He became a director of the West India Company when it was formed in 1621 and, in 1624, he became a vice-admiral in the West India Company navy. He soon earned his rank, capturing 22 Portuguese ships at San Salvador, Brazil. Four years later, in September 1628, he was placed in charge of 31 warships sent by the Company to intercept the returning Spanish treasure fleet. This he successfully managed and, in a brilliant action, destroyed the Spanish warships and herded the transports into Matanzas Bay, having thwarted their attempt to enter Havana. The gold and silver captured is estimated to have been worth 15 million guilders or 5 million ducats. The booty was in the form of ingots but also struck cobs, one of which is offered below. There are Gem examples of each of these four Betts varieties, making this an offering without precedent."

Ex: Wayte Raymond Estate; John J. Ford, Jr. (Stack's, 1/2006), lot 678; Americana Sale (Stack's, 9/2009), lot 6013.

From The John W. Adams Collection.

**1628 Heyn at Matanzas Medal
Betts-23, Silver**

- 3574 Betts-23. 1628 Matanzas Treasure. Silver. VF.** 64.6 mm, 2.7 mm thick, 83.5 gm. Medal turn. The obverse legend is an excerpt from the Prophet Jeremiah, The Nations shall Serve Him ... around a wonderfully detailed Western hemisphere map showing California as an island and the western coasts of Europe and Africa, Arctic and Antarctic ice regions clearly delineated. The reverse depicts Admiral Piet Heyn's Dutch fleet blockading the Spanish treasure fleet in Cuba's Matanzas Bay and capturing the entire year's treasure of New Spain. The legend hails the Threshing of the Daughter of Babylon ... by the Despoilers of the North, the Dutch raiders led by the resourceful Heyn. Subtle gray and tawny gold toning highlights the wealth of detail.
Ex: Oscar Salbach Sale (Jacques Schulman, 1911), lot 19; later, John J. Ford, Jr. (11/1968); Ted Craige.
From The John W. Adams Collection.

- 3575 Betts-23. 1628 Matanzas Treasure. Bronze, cast. XF.** 64.0 mm, 2.7 mm thick, 63.6 gm. Medal turn. The quality of this cast is exquisite, reproducing with precision the sharp detail of the silver medals. High magnification reveals only the most widely scattered evidence of surface porosity. Light brown patina adds to the dignity of this pleasing example. No bronze example of this historic design appeared in the Ford Collection.
Ex: Munz Zentrum (3/1984), lot 51.
From The John W. Adams Collection.

**1627/6 Felipe IV Eight Reales Cob
Matanzas Treasure Relic**

- 3576 Felipe IV Cob Eight Reales. Mexico City Mint. 1627/6. Pieter Heyn Captures the Spanish Treasure Fleet. VF.** 39.3 x 40.3 mm, 27.4 gm. Typical Cob silver coin shows about half of the obverse shield and reverse cross. The obverse bears an inscription in contemporary Dutch script: "dit is van piet heyns' victorie" (This is from Pieter Heyn's Victory.) The inscription on this remarkable piece indicates that it was an actual part of the Spanish treasure that Admiral Heyn captured at the Cuban Bay of Matanzas. A splendid relic of this great Dutch naval victory.
Ex: Sotheby's (7/1997), lot 181.
From The John W. Adams Collection.

Betts-24 1629 Matanzas Treasure Medal

- 3577 Betts-24. 1629 Matanzas Treasure. Silver. XF.** 58.6 mm, 2.4 mm thick, 56.1 gm. Medal turn. The Dutch naval force comprising 16 ships and 10 launches enters Matanzas Bay below a broken line of hills, surrounded by a mocking Latin legend calling the Spaniards less formidable with the sword than with gold. A tiny, well-formed cross crosslet is poised over a 14-line inscription hailing this bloodless Dutch victory and noting that the medals were struck from captured silver by authority of the Stadtholders of the United Netherlands. This boldly detailed strike is accentuated by flashing silver fields.

John W. Adams Commentary

"On March 9, 1629, Willem Versteegh was given permission to strike these medals for eight years, with the West India Company supplying the silver."

Ex: *Munthandel Verschoor* (9/2005).

From *The John W. Adams Collection*.

1629 Matanzas Treasure Medal Betts-24, Cast Silver

- 3578 Betts-24. 1629 Matanzas Treasure. Silver, cast. VF.** 58.0 mm, 3.1 mm thick, 65.1 gm. Medal turn. The Dutch fleet of 16 ships and 10 launches enters Matanzas Bay, mocking Latin legend calls the Spaniards less formidable with the sword than with gold. A tiny, crudely formed cross crosslet is positioned over the 14-line inscription hailing a bloodless Dutch victory and noting that the medals were struck from captured silver by authority of the Stadtholders of the United Netherlands. Frosty silver overlies microporous surfaces.

Ex: *Dr. Paul Patterson* (6/1986).

From *The John W. Adams Collection*.

1629 Matanzas Treasure Medal Betts-25, Silver

- 3579 Betts-25. 1629 Matanzas Treasure. Silver. Mint State.** 58.3 mm, 2 mm thick, 48.0 gm. Medal turn. Dutch fleet of 19 ships and eight launches crowds into Matanzas Bay, backed by the unbroken line of hills that distinguishes this rare variety from the somewhat similar Betts-24. The precisely defined reverse inscription celebrates the bloodless capture of the Spanish treasure fleet, shorn of its defending naval escort by Admiral Heyn's skilled leadership. This medal boasts a meticulous strike and clear pale gold toning on its reflective fields.

Ex: *Wayte Raymond Estate*; *John J. Ford, Jr. Collection, Part 13* (*Stack's*, 1/2006), lot 683.

From *The John W. Adams Collection*.

**1629 Matanzas Medal
Betts-26, Heyn's Victory**

- 3580 Betts-26. 1629 Heyn Victorious at Matanzas. Silver. XF. 60.1 mm, 3 mm thick, 80.1 gm. Medal turn. Heyn's armored bust $\frac{3}{4}$ right in heavy ruff and five neck chains, Latin title Admiral of the United Netherlands. Reverse shows capture of Spanish ships, one sinking in the foreground, date of the battle, 1628 in exergue. A powerful portrait of this legendary Dutch naval hero focuses this medal on the man rather than solely on the event as do the earlier Betts numbers. No example was offered in Ford Part XIII but this medal was a highlight of the Lucien LaRiviere collection. Subtle gray-gold toning; a faint mark or two can be located with a glass.**
Ex: Dr. Paul Patterson; LaRiviere Collection, Part III (Bowers and Merena), lot 1012.
From The John W. Adams Collection.

Betts-30 1631 Pernambuco Captured Medal

- 3581 Betts-30. 1631 Capture of Pernambuco. Silver. XF. 66.3 mm, 2 mm thick, 67.9 gm. Medal turn. By A.D. Wilge. Mars and Victory support an oval framed bust of Frederick Henry Prince of Orange under Latin tribute, He Has Founded a Golden Age, city view of Hertogenbosch below. Armored Prudence and Constancy flank Netherlands lion, Hebrew JEHOVAH above in clouds, four city views below include PERNAMBUCO, Brazil, whose capture made the Dutch regard themselves as masters of America. The Ford example was cast, and this example shows some microporosity but is strongly detailed. Generally frosty silver surfaces assure maximum visual appeal.**

John W. Adams Commentary

"Betts 30 and 31 - There are several varieties of these medals. The variety is not as important as the history."

Ex: Leonard Finn (12/1983).

From The John W. Adams Collection.

**1631 Betts-31 Silver Medal
Capture of Pernambuco**

- 3582 Betts-31. 1631 Capture of Pernambuco. Silver. XF. 68.6 mm, 2.5 mm, 60.7 gm. Medal turn. By A.D. Wilge. Mars holds shield of Orange-Nassau, supporting with Victory a victor's crown over an oval framed bust of Frederick Henry Prince of Orange under curved script Latin tribute, He Has Founded a Golden Age, city view of Hertogenbosch below. Armored Prudence and Constancy flank Netherlands lion, Hebrew JEHOVAH above in clouds, four diamond-sharp city views below include 1630 PERNAMBUCO, the Brazilian port whose capture made the Dutch congratulate themselves as masters of America. Crisply detailed; splendidly high-relief devices on both sides distinguish this desirable example of an ornate design.**
Ex: Museum of Connecticut History; Coin Galleries (7/1998), lot 1302.
From The John W. Adams Collection.

1632 Bay of All Saints Victory
Betts-32, Spanish Jeton

- 3583 Betts-32. 1631 Bay of All Saints Victory. Bronze. Fine.** 29.9 mm, 6.0 gm. Large armored Philip IV bust left, Roman numeral date below partly off-planchet. Reverse shows Biblical hero Samson (Spain) rending a lion (Holland), punning Latin legend over a battle for sugar, Thus has He Deserved Sweet Joys. Hand mintmark, Antwerp, central reverse detail is somewhat mushy.

John W. Adams Commentary

"(A Spanish jeton). Per van Loon, the Dutch fought extremely well but were overwhelmed by a vastly superior force. The fight was over sugar, which the Dutch had been successfully producing."

Ex: Paul Bosco (1991 ANA).

From The John W. Adams Collection.

- 3584 Betts-32. 1631 Bay of All Saints Victory. Bronze. VF.** 29.7 mm, 5.7 gm. Planchet is off-round but strike is much sharper than the preceding. Large armored Philip IV bust l., Roman numeral date below, reverse shows Biblical hero Samson (Spain) rending a lion (Holland), punning Latin legend over a battle for sugar, Thus has He Deserved Sweet Joys. Jeton style, Antwerp hand mintmark, glossy medium brown.

Ex: King (8/2001).

From The John W. Adams Collection.

1631 New World Victories
Betts-33, Dutch Silver Jeton

- 3585 Betts-33. 1631 Dutch New World Victories. Silver. VF.** 50.5 mm, 2.7 mm thick, 47.3 gm. Medal turn. Lace-collar armored bust of Frederick Henry, Prince of Orange r. Reverse shows Dutch lion overthrowing one of the Pillars of Hercules, a favorite Spanish imperial symbol, symbolizing extending Dutch boundaries beyond Europe and preparing to strike the second pillar as well. There are scattered of contact marks on the Prince's face and nearby field, but the reverse field is far more smooth.

John W. Adams Commentary

"The legends and devices are eloquent."

Ex: Laurens Schulman (3/1988).

From The John W. Adams Collection.

1631 Dutch New World Victories
Betts-33, Silver Medal

- 3586 Betts-33. 1631 Dutch New World Victories. Silver. Fine.** 50.0 mm, 2.9 mm thick, 46.7 gm. Medal turn. Lace-collar armored bust of Frederick Henry, Prince of Orange facing right. Reverse shows Dutch lion overthrowing one of the Pillars of Hercules, a favorite Spanish imperial symbol, extending Dutch boundaries beyond Europe and preparing to strike the second pillar next; splendid symbolism of Dutch defiance of Spain's New World might. Reflective fields show pale gold toning, hairlines and minute contact marks on both sides.

Ex: Jacques Schulman.

1643-44 Betts-35 Cecil Calvert Medal, XF
Maryland Map Medal
The First Indian Peace Medal

3587 Betts-35. 1643-1644 Cecil Calvert Maryland Map Medal. Extremely Fine. Used as an Indian Peace Medal with the Susquehannock Indians. Silver oval, 35.2 x 32.4 mm, 240.1 grains. By Thomas Simon.

Obv. Armored bust l. of Cecil Calvert, Second Lord Baltimore with tiny engraver's signature "S" below. Latin legend + CAECILIUS: BALTEMOREVS. +* C. Wyllys Betts noted, "The rosette after the cross on the obverse of 35 is a mint-mark." A similar rosette was used on coins of King Charles I from 1643-1645 at the Mints of Oxford, Shrewsbury and Worcester.

Rev. Relief map of Maryland and adjoining Virginia (north is to the Viewer's left). This map is virtually identical to one drawn up by Captain John Smith in 1612 and to the 1632 Maryland map by Jerome Hawley and John Lewger (Secretary of the Province of Maryland). A shield bearing the Calvert family Arms crowned with an earl's coronet appears between the Chesapeake and Potomac, just above the site of the colonial capital, Saint Mary's. Stretching across Maryland is the Latin *TERRA MARIAE*, Land of Mary, the name honoring Queen Henrietta Maria, Catholic spouse of King Charles I, born a princess of France. At the left over Virginia is a blazing sun shining upon Maryland. A tiny inscription that may be *VIRGINIAE* appears above the sun at right; to the lower left on the banks of the Potomac Simon has again placed his "S" mark. The surrounding Latin legend states + VT: SOL: LVCEBIS: AMERICA. , As the Sun shall you illuminate America.

Betts called this the Maryland Settled Medal but offered no theory for its possible use. The Ford Collection cataloger in 2006 dated it to the 1650's. More of its actual history was unveiled when this medal last appeared at auction in 2009. There was described as the first known Indian Peace Medal, dating from 1676 or possibly even earlier, 1644. If the obverse rosette were indeed a mintmark, it would date the medal to 1643-1645, matching the history recorded in the Archives of Maryland.

George Calvert, first Lord Baltimore, died just before the granting of a royal charter for Maryland on June 20, 1632. The first Proprietor was therefore his son Cecil, Second Lord

Baltimore, who was to enjoy far-reaching powers including that of coinage. While Catholicism was subject to severe legal penalties in England, Maryland was to be a refuge for persecuted Catholics, the first band arriving on the ships *Ark* and *Dove* on St. Clement's Island, March 26, 1634. The Proprietor enjoined peace with the neighboring Protestant settlers of Virginia and with the Indians, both Powhatan on the south bank of the Potomac and the mighty Susquehannock to the north.

The Susquehannock became famous for their great stature and power, John Smith noting in 1608 "Such great and well-proportioned men are seldom seene, for they seemed like giants to the English yea and to their neighbours, yet seemed of an honest and simple disposition, with much adoe restrained from adoring us as Gods."

Smith described their Chief or Werowance as being nearly seven feet tall and included a drawing of him on his Virginia map, "The picture of the greatest f them is signified in the mape. The calfe of whose leg was three quarters of a yard about, and the rest of his limbes so answerable to that proportion that he seemed the godliest man we ever beheld."

Maryland adopted a prudent policy of avoiding all-out war with the Susquehannock, who were believed to subject captives to lingering torture and cannibalization. By June 18, 1644 all warlike expeditions against this mighty tribe had failed and Provincial Secretary John Lewger instructed the experienced Indian negotiator Captain Henry Fleete to pursue peace with this caution, "If you shall not think best to treat (treaty) or truce with them you are to vse all law full & discreet eanes (means) you can to pillage, or take them, of if shall seeme best to kill them..."

Fleete had negotiated the purchase of the land on which Saint Mary's now stood. His non-violent 1644 agreement was effectively sealed by the presentation of two instruments of peace, a written "passport" for safe passage signed by Provincial Governor Giles Brent and an accompanying "Maryland Medal" suspended from a black and yellow ribbon, the Calvert-Maryland colors. The agreement stipulated that "... the Indian bearer or bearers hereof of the sesquisahanow nation, not

exceeding 3 in number, safe & free passage too & fro through my province without any harme or molestation of any of the English."

This agreement was referred to in the more formal peace treaty of July 5, 1652, which clearly referred back to the medal and passport of 1644, including the requirement that Indians passing through must carry the medal, "the Indians shall come by Water and not by land, that there shall not be above Eight or ten at the most at one tyme, And that they bring with them the token given them by the English for that purpose, by which they may be known and entertained."

However, the great years of the Susquehannock were now past as smallpox and other European diseases decimated them and the aggressive northern the Iroquois attacked them and nearby English settlements, deeds now blamed on the weakened Susquehannock. On June 16, 1674 Maryland formally declared war on the weakened former ally, joined by their hereditary Mattawoman enemies. A Maryland force led by Major Thomas Truman (reportedly an ancestor of Harry S Truman) and a Virginia force under Colonel John Washington (great-grandfather of George Washington) with its Indian allies besieged the Susquehannock fort.

On the evening of Sept. 25, 1675, a delegation of Susquehannock Chiefs emerged from the fort to answer the Virginians' charges and prove their longstanding alliance and friendship with the English. They presented the original 1644 passport and Calvert Medal, complete with its original black-yellow ribbon "as a pledge of peace given and left with them by the former Governor as a token of amity and friendship as long as the sun and moon shall last." The delegation returned to the fort.

The next day five Chiefs prepared to resume their discussion, unaware that Major Truman had determined to implement a final solution to the perceived Susquehannock problem. The bodies of slain Virginia settlers had been brought into the camp and without warning, the Virginians fell on the chiefs, killing five with their own tomahawks. The fort held out another six weeks before the Susquehannock escaped and ravaged the colony in their flight.

Major Truman was tried and condemned to death by the upper and lower Houses of the Maryland legislature for exceeding his authority and not conferring with his colony's governor before murdering the chiefs. He escaped execution and gained a pardon in June 1676.

Two days later this historic "Peace Medal" reappeared, now presented to Maquata, King of the Mattawoman. The medal is finally described in the Archives of Maryland, "hereupon as a mark of his Lordships kindness, and a pledge of friendship, his said Lordship gave onto the King of Mattawoman a medal, with the effigies of his Right Honorable Cecilus, His Lordship's father lately deceased on the one side, and a map of Maryland on the other side with a black and yellow ribbon." In the event, the Mattawoman died out before the decimated Susquehannock but the "medal of destiny" survived both tribes.

Today, only three examples of this medal are known: the present example, one in the British Museum without loop and one in the Maryland Historical Society (this last a different variety and size, without the rosette mint mark). The medal offered here is the only specimen retaining its attached hanger or loop and is almost certainly the piece that spent more than 30 years in the hands of the powerful Susquehannocks, who could have easily overrun the new and under-populated colony of Maryland but for the pledge of peace represented by this historic piece of silver.

Researcher Tony Lopez has written, "To consider this incredible medal as simply an historic medal, or even an Indian Peace Medal - and it was the first Indian Peace medal created specifically for use with the Indians - is to underestimate the

importance and significance of what this magnificent item actually is - something more than a medal. In one way of thinking, this medal is an amulet - a talisman - passed through time; carrying with it promises of friendship and peace, as well as a history of betrayal and murder. The legacy of this medal and its broken trust would be repeated throughout the history with the native peoples for centuries to follow."

From The John W. Adams Collection.

1637 Artischofski Medal
Betts-37, Fort Larrayal Captured

3588 Betts-37. 1637 Artischofski Captures Fort Larrayal, Brazil. Brass, cast, once gilt. VF. 63.2 mm, 55.1 gm. Betts states that the capture of "Larrayal" is the subject of this rare medal, but as John W. Adams and Dim Verschoor point out in "The Artischofski Medal" (*MCA Advisory*, Medal Collectors of America, July-September 2011), the medal's actual purpose was to honor Polish nobleman Christopher Artischofski Arciszewski (born 1592) for his long and heroic service to the Dutch West India Company in the Americas. The medal design is misleading, depicting a commemorative pillar bearing the Portuguese shield that was never actually erected. The Latin legend announces, Having Conquered the Hostile Spaniards, He now Accepts the Laurels of Victory.

The reverse is occupied by a 13-line Latin tribute to Artischofski's bravery, loyalty and achievements in both arms and learning. The Polish nobleman was ousted from Brazil in a dispute with Governor Prince Jan Maurits of Nassau and had to fight to clear his good name. Ultimately he returned to Poland and additional military exploits. Adams and Verschoor have ascertained that four Artischofski medals exist in silver, four in bronze, the latter from two different dies. The present specimen shows the doubled lettering in the reverse inscription depicted in Adams' enlargements, figures 4, 5 and 6. Its gilding is now uneven, but the strike and detail are remarkably bold and full. A major rarity with an even rarer story to tell.

John W. Adams Commentary

"This is the Artischofski medal. It was written up in an extensive article in the *MCA Advisory*."

Ex: Johnson and Jensen (12/1981), lot 525; DNW (7/2011), lot 1731.

From The John W. Adams Collection.

Betts-39 1658 Dampville Medal
Viceroy of America

3589 Betts-39. 1658 Dampville Viceroy of America Medal. Bronze. XF. 50.9 mm, 4 mm thick, 64.6 gm. Medal turn, plain edge is finely filed and slightly rounded. By I. Hardy. Bust r. in ornate armor with name and titles of Francois Christophe de Levy, Duke of Dampville, Peer of France and Viceroy (Prorex) of America). Complex quartered Arms on mantle, legend from the Prophet Micah, For out of Thee shall come a Leader who shall rule my People. Earlier obverse die, splendid deep glossy brown patina add to this historic medal's appeal.

John W. Adams Commentary

"The two Dampville medals in this consignment are from the earlier obverse die, very desirable as such."

Ex: Richard Margolis (12/1993).

From The John W. Adams Collection.

3590 Betts-39. 1658 Dampville Viceroy of America Medal. Bronze. XF. 50.8 mm, 4 mm thick, 64.0 gm. Medal turn, plain edge is more boldly filed and slightly rounded than the preceding. By I. Hardy. Ornately armored bust r. of Francois Christophe de Levy, Duke of Dampville, Peer of France and Viceroy (Prorex) of America). Complex quartered Arms on mantle, legend from the Prophet Micah, For out of Thee shall come a Leader who shall rule my People. Earlier obverse die, both sides show scattered die rust. The left obverse field bears a horizontal band of crude chasing, right field shows eight horizontal waves, each showing a microscopically fine clothlike pattern. A medal whose surface invites in-depth study.

Ex: Dr. Ouellet (4/1984).

From The John W. Adams Collection.

Betts-40 1664 Indies Companies Medal

3591 Betts-40. 1664 Companies of the Indies. Bronze. XF. 41.3 mm x 4.0 mm thick, 36.3 gm, slightly beveled edge. Obverse bears the king's youthful bust by Jean Mauger. The reverse bears a standing figure of commerce god Mercury, name of the Society of Merchants to Both Indies appears in exergue. An early restrike with some die rust but no obverse rim break at 3 o'clock. Glossy medium brown.

John W. Adams Commentary

"Not all medals were made in the year indicated. It can be assumed that any medal with a 41 mm diameter was restruck at one time or another; earlier strikings have beveled and filed edges; later strikings have flat or squared edges. All medals with diameters greater or lesser than 41 mm were probably never restruck. Typically, they are rare and valuable."

Ex: Leonard Finn (12/1983).

From The John W. Adams Collection.

3592 Betts-40. 1664 Companies of the Indies. Bronze. XF. 41.1 mm x 3.7 mm thick, 33.2 gm, sharply squared edge. The obverse rim break at 3 o'clock indicates a later restrike. Mature king's head by Mauger, Mercury standing on reverse. From the Histoire Metallique de Louis le Grand, the official medal series designed to chart and record the victories of the Sun King with stereotypic portraits and classical reverse designs. Light tan-gold.

John W. Adams Commentary

"Over 300 medals with the portrait of Louis XIV were made. These were a deliberate effort to glorify the king, with the designs and legends being managed by a high powered sub-committee of l'Academie des Belles Lettres.

Ex: Ted Craige.

From The John W. Adams Collection.

3593 Betts-42. 1666 Conquest of St. Christopher. Bronze. XF. 41.2 mm x 3.1 mm thick, 32.4 gm, beveled and filed edge. The obverse has a tiny five-pointed star following the legend. The hair and bust tip solidly join the lower border. Three examples of this variety are from different obverse dies, and none of these appear to match any of John Ford's five pieces. Glossy medium brown.

Ex: Christensen (9/1967), lot 161; Ted Craige.

From The John W. Adams Collection.

3594 Betts-42. 1666 Conquest of St. Christopher. Bronze. XF. 41.2 mm x 3.6 mm thick, 35.2 gm, beveled and filed edge. A small pellet follows the legend on this obverse. The hair lightly joins the lower border, and the bust tip is separated; reverse shows two bold rust dots. Deep glossy brown surfaces add to this medal's beauty.

Ex: Spink (11/1981), lot 948.

From The John W. Adams Collection.

3595 Betts-42. 1666 Conquest of St. Christopher. Bronze. Mint State. 40.8 mm, 2.1 to 3.5 mm thick, 32.9 gm, squared edge. A small pellet follows the legend. The hair and bust tip are both separated from the border, and the legend ends distant from the bust. Delightful fiery red-mahogany surfaces lend dramatic appeal to a vivid strike.

From The John W. Adams Collection.

1670 British Colonization Medal

Betts-44, Silver

3596 Betts-44. 1670 British Colonization. Silver. AU. 41.6 mm, 33.6 gm. By Charles Roettier. Mailed bust r. of Charles II accompanied by his young bride Catherine of Braganza r. Reverse is occupied by a globe displaying much of the Western hemisphere as well as Europe, Africa, and Asia, with Latin legend DIFFVSVS · IN · ORBE · BRITANNVS · 1670 ·, the Briton is Dispersed throughout the Globe. Rich silver gleam and high wire rims testify to this medal's amazing quality. The marriage of the worldly wise restored Stuart monarch Charles II and this daughter of Portuguese King Joao IV helped launch the worldwide British Empire, bringing the Indian port of Bombay as part of the bride's dowry.

Ex: Ted Craige.

From The John W. Adams Collection.

3597 Betts-44. 1670 British Colonization. Silver. XF. 41.7 mm, 32.6 gm. By Charles Roettier. Conjoined busts r. of Charles II and his young bride Catherine of Braganza r. Reverse World globe displaying much of the Western hemisphere as well as Europe, Africa, and Asia, with Latin legend DIFFVSVS · IN · ORBE · BRITANNVS · 1670 ·, the Briton is Dispersed throughout the Globe. Rose and gray toning covers this subtly gleaming medal. The 1662 marriage of the restored Stuart monarch Charles II and the young daughter of Portuguese King Joao IV helped create the British Empire, including the Indian port of Bombay as part of the bridal dowry. Although Catherine bore Charles II no children, he fathered quite a number of illegitimate children through various mistresses, whom he acknowledged as his own. Catherine introduced the custom of tea-drinking to England, and the New York borough of Queens is named for her.

Ex: Ted Craige.

1670 British Colonization Medal

Betts-44, Gold

3598 Betts-44. 1670 British Colonization. Gold. VF. 41.6 mm, 57.6 gm, specific gravity 18.58 (96.3% gold). By Charles Roettier. Conjoined busts r. of Charles II and bride Catherine of Braganza r. Reverse World globe displaying much of the Western hemisphere along with Europe, Africa, and Asia, with Latin legend DIFFVSVS · IN · ORBE · BRITANNVS · 1670 ·, the Briton is Dispersed throughout the Globe. The marriage of Charles II and Catherine was destined for conflict due to her steadfast, deep adherence to the Catholic faith, which made her a constant target in England, where the Anglican church barred the participation of Catholics.

Warm honey-gold surfaces bear a few marks. The edge is somewhat rough and shows a couple of rim bumps. This is a significant rarity in the entire Betts medal field, worthy of the most careful examination. Decades may pass before another gold example appears at auction.

Ex: Dr. Paul Patterson; Leonard Finn (12/1983).

Betts-48 1674 Victory at Martinique

- 3599 Betts-48. 1674 Victory at Martinique. Bronze. XF.** 41.2 mm x 3.1 mm thick, 30.3 gm, slightly beveled edge. King's mature bust r. by Mauger. Fame flies over Indian warrior and Dutch captive before ancient galley, exergue Dutch at Martinique slain or put to flight. Deep glossy brown.

Ex: Richard Picker; Dr. Paul Patterson.
From The John W. Adams Collection.

- 3600 Betts-48. 1674 Victory at Martinique. Bronze. XF.** 41.5 mm, 3 to 3.5 mm thick, 29.2 gm, boldly beveled and lightly filed edge. Head by Mauger, handsome glossy brown shows hints of lighter red-gold near the rims, emphasizing this unusually handsome medal's exacting strike.

Ex: Ted Craige.
From The John W. Adams Collection.

- 3601 Betts-48. 1674 Victory at Martinique. Bronze. XF.** 41.5 mm x 3.5 mm thick, 28.9 gm, sharply squared edge. Smaller head of Louis XIV by Dollin, a change not noted by Betts but present in lots 712-717 of Ford XIII. Light brown with a silvery sheen and a faint accession number in reverse field.

Ex: Ted Craige.
From The John W. Adams Collection.

Betts-50 1676 Cayenne Recovered Medal

- 3602 Betts-50. 1676 Recovery of Cayenne. Bronze. VF.** 41.4 mm x 3.1 mm thick, 29.8 gm, beveled and lightly filed edge. Original dies with King's head by Mauger r., verdigris spot on A of MAGNUS. Neptune wields trident and French banner in seahorse-drawn marine car, Latin legend, The Dutch Slain, Cayenne Recovered. Rich saddle-brown.

Ex: Ted Craige.
From The John W. Adams Collection.

- 3603 Betts-50. 1676 Recovery of Cayenne. Bronze. VF, cleaned.** 41.5 mm x 3.0 mm thick, 29.9 gm, beveled and filed edge. Obverse die break circles LUDOV, surfaces are lightly porous. Reverse rim shows filing to remove a cud or extrusion at 3:30. Light reddish-brown, retoning after cleaning long ago.

Purchased in December 1988.
From The John W. Adams Collection.

- 3604 Betts-50. 1676 Recovery of Cayenne. Bronze. XF.** 41.4 mm x 3.2 mm thick, 32.9 gm, beveled and filed edge. Struck from new dies distinguished by different curls on king's shoulder, larger lettering on both sides. Exceptionally smooth deep brown; crispness of strike gives this medal a more modern feel than the preceding examples.

Ex: Ted Craige.
From The John W. Adams Collection.

- 3605 Betts-50. 1676 Recovery of Cayenne. Bronze. XF.** 41.1 mm, 2.8 to 3.3 mm thick, 30.7 gm, beveled and lightly filed edge. Toning spot or old stain appears on the king's neck, overall smooth reddish-brown surfaces provide undeniable visual appeal.

Ex: Leonard Finn (12/1983).
From The John W. Adams Collection.

- 3606 Betts-52. 1677 Victory at Tobago. Bronze. About XF.** 41.1 mm x 3.1 mm thick, 33.0 grams, sharply squared edge. Finely detailed head r. by Mauger, reverse shows an ancient galley with hovering winged Victory holding thunderbolt and palm, Latin Burning of the Dutch Fleet. INS in exergue inscription AD INS TABAGO shows recutting from a T. Louis XIV nursed an undying hatred of the United Netherlands, driving him to glorify any victory, however remote or inconsequential. Reflective surfaces display uneven brown patina.

Ex: Ted Craige.
From The John W. Adams Collection.

- 3607 Betts-52, obverse 1, reverse 1. 1677 Victory at Tobago, Bronze. VF.** 41.3 mm x 3.2 mm thick, 32.5 gm, beveled and filed edge. Patches of reverse porosity give a speckled appearance at UM of BATAVORUM. Beveling makes this medal feel thinner than it actually is. Glossy medium brown.

Ex: Ted Craige.
From The John W. Adams Collection.

- 3608 Betts-52, obverse 2. 1677 Victory at Tobago. Bronze. XF.** 41.2 mm x 3.9 mm thick, 34.6 gm, sharply squared edge. This medal bears a new obverse by J. Dollinger that was not noted by Betts. The artist's name has been largely effaced from the die, leaving only traces of D LLI. Needle-sharp impression of the dies, light reddish-brown patina.

Ex: Ted Craige.
From The John W. Adams Collection.

Betts-52 1677 Tobago Victory Medal

- 3609 Betts-52. 1677 Victory at Tobago. Silver. VF.** 41.0 mm, 32.1 gm, rounded edge. Mauger portrait obverse, ancient galley reverse are the same as the bronze medals including INS in exergue modified from TNS. This silver example shows handling and contact marks consistent with years of pocket-piece use but remains a recognized rarity.

Ex: Leonard Finn.
From The John W. Adams Collection.

Betts-53 1677 Victory at Tobago Medal

- 3610 Betts-53. 1677 Victory at Tobago, Silver.** XF. 69.8 mm, 217.3 gm. This large and spectacular medal was signed by engraver Anton Meybusch and portrays a triumphal Louis XIV as a Roman general with mailed shoulders and ornate cuirass with titles Louis the Great, Most Christian King. Reverse presents an exultant winged Victory on a small ancient galley surrounded by legend INCENSA · BATAVORVM · CLASSE ·, exergue · TABAGO · / · MDCCLXXVII ·. A major medalllic rarity. A bronze strike with a different obverse by Roettiers brought \$6,000 in Ford XIII. Ex: Busso Peus (11/2002), lot 2046, via Christopher Eimer. From The John W. Adams Collection.

1677 Tobago Taken Medal Unlisted in Betts

- 3611 Betts-Unlisted. 1677 Tobago Taken by Assault. Bronze.** XF. 50.6 mm, 39.1 gm. Obverse is signed ANT: MEYBUSCH. FECIT, reverse bears only a "D" probably for J. Dollin. Distinctive small Louis XIV bust r. with title Louis the Great Most Christian King. Reverse offers a dramatic action scene, a shell fired from a French mortar blowing up the Dutch powder magazine within the star-shaped fortification, with two-word Latin VNO ICTV, In One Blow. An old inked accession number can be found in left obverse field; a surface flaw extends from bust point to lowest rim. How such an important medal could have been overlooked by C. Wyllys Betts is simply unknown. Ex: John J. Ford, Jr., Part 13 (Stack's, 1/2006), lot 753. From The John W. Adams Collection.

Betts-57 1677 Tobago Victory Jeton

- 3612 Betts-57. 1677 Victory at Tobago Jeton. Brass. Fine.** 26.0 mm, 4.6 gm. Thin planchet, coin relief obverse bears mature Louis XIV head r. by French die sinker Nyris, reverse presents a reduced version of winged Victory on ancient galley, · INCENSA · BATAVORVM · CLASSE ·. Typical jeton style; design is that of the larger medals hailing the same victory. Ex: Victor Gadoury (8/1983). From The John W. Adams Collection.

- 3613 Betts-57. 1677 Victory at Tobago Jeton. Brass. XF.** 25.4 mm, 5.0 gm. By Lazarus Gottlieb Laufer of Nuremberg. Mature head r. of Louis the Great. Reverse is that of the larger struck medal. Much golden mint luster appears on both sides of this high-quality, boldly struck example. Ex: Henry Christensen; Ted Craige. From The John W. Adams Collection.

Betts-58 1677 Victory at Tobago Gilt Jeton

- 3614 Betts-58. 1677 Victory at Tobago Jeton. Bronze, gilt.** VF. 25.8 mm, 4.2 gm. Thin planchet, coin relief obverse bears mature Louis XIV head r. by French die sinker Nyris, reverse presents a reduced version of winged Victory on ancient galley, · INCENSA · BATAVORVM · CLASSE ·. Typical jeton fabric, some fading red-gold luster lingers around the reliefs and peripheries. Ex: Ted Craige. From The John W. Adams Collection.

1677 Assault of Tobago Medal Betts-59, Obverse 1

- 3615 Betts-59, obverse 1. 1677 Tobago Taken by Assault. Bronze.** XF. 41.1 mm x 3.3 mm thick, 34.1 gm, beveled and filed edge. Signed J. MAVGER. F below bust, reverse is that of the larger unlisted medal by Meybusch with French mortar shell exploding the Dutch powder magazine, TABAGUM EXPUGNATUM, Tobago Taken by Assault. Some porosity is seen on both sides, reflective deep brown surfaces.

John W. Adams Commentary

"I have included six different obverse dies; note that all are provenance to Ted Craige, an avid collector of Betts medals and colonial coinage who died in 1981; he is one of the few, in this country or in France, to take note of die varieties in this series."

Ex: Ted Craige.

From The John W. Adams Collection.

- 3616 Betts-59, obverse 1. 1677 Tobago Taken by Assault. Bronze. XF+.** 41.4 mm x 3.1 mm thick, 32.3 gm, beveled and filed edge. Signed J. MAVGER. F below bust, reverse is that of the larger unlisted medal by Meybusch with French mortar shell exploding the Dutch powder magazine, TABAGUM EXPUGNATUM, Tobago Taken by Assault. Wonderfully reflective deep brown surfaces. Ex: Ted Craige. From The John W. Adams Collection.

3617 Betts-59, obverse 2. 1677 Tobago Taken by Assault. Bronze. XF. 41.2 mm x 4.0 mm thick, 38.9 gm, sharply squared edge. No artist's signature appears below the bust, no curls appear at right of the neck, a tiny star appears after obverse legend. Reverse of exploding powder magazine is that of preceding medals. Light reflective tan-brown.

Ex: Ted Craige

From The John W. Adams Collection.

3618 Betts-59, obverse 3. 1677 Tobago Taken by Assault. Bronze. XF. 41.1 mm, 2.7 to 3.2 mm thick, 29.5 gm, beveled and filed edge. Signed J. MAVGER. F below bust, puff of curls to right of the neck. The reverse continues the exploding fort design noted above. Highly reflective light brown.

Ex: Ted Craige.

From The John W. Adams Collection.

3619 Betts-59, obverse 4. 1677 Tobago Taken by Assault. Bronze. XF. 41.5 mm x 3.1 mm thick, 29.3 gm, beveled and lightly filed edge. Signed J. MAVGER. F below bust, letters J.M appear to be squashed beneath the massive curl. Minor differences in the fine detail of the fort are also observed. Pleasing medium brown.

Ex: Ted Craige.

From The John W. Adams Collection.

3620 Betts-59, obverse 5. 1677 Tobago Taken by Assault. Bronze. XF. 41.3 mm x 3.4 mm thick, 34.6 gm, sharply squared edge. This obverse appears to be unsigned but close study finds that signature of J. Dollin has been effaced, appearing only as very thin J D LI below the bust. Reverse is that of the preceding examples. Smooth light reddish-brown.

Ex: Ted Craige.

From The John W. Adams Collection.

3621 Betts-59, obverse 6. 1677 Tobago Taken by Assault. Bronze. XF. 41.7 mm x 2.3 mm thick, 25.5 gm, beveled and filed edge. A distinctive variant showing only two fully bold letters LI below the bust, letters of the legend appear tall and close together. The exploding fort is fully detailed. though this medal's planchet is almost startlingly thin. Satisfying medium brown covers both sides.

Ex: Ted Craige.

From The John W. Adams Collection.

1676 Dutch West India Company Medal Unlisted in Betts

3622 Betts-Unlisted. Van Loon III, 181. 1676 Dutch West India Company; Jan Root, Director General. White metal. Fair. 85.6 mm, 137.6 gm. Sailing ships tossed by monstrous storm waves, Latin Thus All Things Toss and Turn. Rev. IR over shield with three hunting horns, Partially illegible inscription below on crescent. White metal that has been this thoroughly oxidized forms a dark outer layer or "skin" which may chip off to reveal lighter underlying metal as seen on this specimen, which also exhibits wear and edge bumps.

Ex: James King (8/1982); Isaac Rudman (1993); DNW (7/2011), lot 1736.

From The John W. Adams Collection.

1683 Dutch West Indian Company Betts-64, Silver Medal

3623 Betts-64. 1683 Dutch West India Company, Chamber of Groningen and Ommeland. Silver. VF. 44.9 mm, 2 mm thick, 30.9 gm. Reverse rotated 90 degrees. Monogram of the Geoctroyeerde West Indische Compagnie in circle of directors' family Arms. Reverse shows Elmina with Forts Santiago and Saint George on the Gold Coast of Africa, today's Ghana, that soon became a fulcrum or pivot of the ever-growing African slave trade that populated Brazil with slaves. This thoroughly detailed medal is both beautifully centered and meticulously struck.

Ex: Jacques Schulman (10/1988), lot 1030.

From The John W. Adams Collection.

Betts-66 Lord Albemarle Silver Medal

3624 Betts-66. 1687 Christopher Lord Albemarle. Silver. VF. 46.5 mm, 2.6 to 3.1 mm thick, 39.9 gm. By Embosser in Ordinary George Bower. Richly clad bust r. of the Duke of Albemarle as Lieutenant General and Governor General of Jamaica. Reverse shows sea god Neptune with trident reclining on urn, watching Sir William Phipps' salvage ships on the horizon preparing to raise treasure on Silver Shoals that will bring the duke £90,000 before his death in 1688. Obverse shows a number of short scratches on its reflective surface; the reverse displays gray-gold toning with hints of pale blue.

Ex: Leonard Finn (12/1983).

From The John W. Adams Collection.

1687 Christopher Lord Albemarle
Betts-66, Silver Medal

- 3625 Betts-66. 1687 Christopher Lord Albemarle. Silver. XF.** 46.5 mm, 38.7 gm. By Embosser in Ordinary George Bower. Richly clad bust r. of the Duke of Albemarle as Lieutenant General and Governor General of Jamaica. Sea god Neptune with trident reclines on urn, watching Sir William Phipps' salvage ships on the horizon preparing to raise treasure on Silver Shoals that will bring the duke £90,000 before his death in 1688. Gleaming silver fields show hairlines but visual quality is remarkably high. Faint hairlines, short scratches on its reflective surface, the reverse displays gray-gold toning with hints of pale blue.

Ex: A.H. Baldwin (6/1993).

From The John W. Adams Collection.

1687 Silver Shoals Treasure Medal
Betts-67, Silver

- 3626 Betts-67. 1687 Silver Shoals Treasure Recovery. Silver. VF/XF.** 54.8 mm, 63.6 gm. Draped busts of King James II and Queen Mary of Modena r., reverse shows Sir William Phipps' salvage ship under a cloudless sky, near sunken Spanish treasure ship *Nuestra Señora de la Concepción* off Santo Domingo, in exergue NAUFRAGA REPERTA, shipwreck recovered. Legend is a quote from Roman poet Ovid, SEMPER TIBI PENDEAT HAMUS, Let thy Hook ever Hang, referring to perseverance of Phipps and his crew. The Spanish ship was sunk in relatively shallow water over this reef, and its ribs can be seen protruding above the waves just above the exergue line. Phipps earned a knighthood and wealth from his part in this well-documented and successful treasure salvage operation.

Ex: Spinks.

From The John W. Adams Collection.

1687 Silver Shoals Recovery Medal
Betts-67, Silver

- 3627 Betts-67. 1687 Silver Shoals Treasure Recovery. Silver. VF, rim defect.** 54.7 mm, 66.4 gm. Draped busts of King James II and Queen Mary of Modena r., reverse shows Sir William Phipps' salvage ship near sunken Spanish treasure ship *Nuestra Señora de la Concepción* off Santo Domingo. Exergue is inscribed NAUFRAGA REPERTA, shipwreck recovered. Legend from Roman poet Ovid, SEMPER TIBI PENDEAT HAMUS, Let thy Hook ever Hang, refers to perseverance of Phipps and his crew. The Spanish ship foundered in 1641 in relatively shallow water over the reef that came to be known as Silver Shoals, and its ribs can be seen protruding above the waves just above the exergue line of the medal. Phipps earned a knighthood and wealth from his part in the successful *Concepción* treasure salvage operation. Wide borders; there is an as-made defect in the inner rim at 2 o'clock. Steely toning, scattered hairlines.

Ex: Leonard Finn (12/1983).

From The John W. Adams Collection.

Undated Silver Shoals Treasure Medal
Betts-67, Silver

- 3628 Betts-67. Silver Shoals Treasure Recovery. Silver. XF, hanger.** 54.7 mm, 68.3 grams. Draped busts of King James II and Queen Mary of Modena r., reverse shows Sir William Phipps' salvage ship near sunken Spanish treasure ship *Nuestra Señora de la Concepción* off Santo Domingo. Exergue inscribed NAUFRAGA REPERTA, shipwreck recovered. Legend from Roman poet Ovid, SEMPER TIBI PENDEAT HAMUS, Let thy Hook ever Hang, refers to perseverance of Phipps and his crew. The treasure vessel sank in relatively shallow water in 1641 over the Silver Shoals north of Hispaniola near Santo Domingo, and its ribs protrude above the waves just above the exergue line of the medal. Phipps earned a knighthood and wealth from successful salvage of portions of the *Concepción* treasure. Many silver "cob" coins survive today from the recovery. Fixed loop is soldered to the rim at 12 o'clock. Blue-gray toning, a small as-made planchet edge notch appears at 6:30.

Ex: Dr. Paul Patterson.

From The John W. Adams Collection.

**1687 Silver Shoals Medal
Betts-67, Silver, Gilt
Clouds Variant**

- 3629 Betts-67, clouds variant. 1687 Silver Shoals Treasure Recovery. Silver, gilt. XF.** 52.8 mm, 54.7 gm. A smaller medal from different dies than the preceding offering somewhat similar busts of King James II and Queen Mary of Modena r., reverse shows Sir William Phipps' salvage ship near the horizon under a cloudy sky, but without the many rocks protruding from the waves. Ribs and part of the hull of the sunken Spanish treasure ship *Nuestra Señora de la Concepción* appear just above the exergue line. Exergue inscription and legend are as on the preceding medals. Inner rims are recessed to receive a suspension clasp that is no longer present.
Ex: Daniel Fearon (8/2004).
From The John W. Adams Collection.

**1687 Silver Shoals Medal
Betts-67, Clouds Variant
Silver, Gilt**

- 3630 Betts-67, clouds variant. 1687 Silver Shoals Treasure Recovery. Silver, gilt. VF, hanger.** 52.8 mm, 55.2 gm. Another example of the smaller medal with the same busts of King James II and Queen Mary of Modena r., reverse shows Sir William Phipps' salvage ship near the horizon under a cloudy sky, but without the many rocks protruding from the waves. Ribs and part of the hull of the sunken Spanish treasure ship *Nuestra Señora de la Concepción* appear just above the exergue line. Inner rims are recessed at 12 o'clock to receive a suspension clasp, but this example has a soldered ring for suspension. One obverse scratch, pervasive hairlines from an old cleaning.
Ex: A.H. Baldwin (3/1989).
From The John W. Adams Collection.

Betts-68 1690 Quebec Preserved Medal

- 3631 Betts-68. 1690 Quebec Preserved. Bronze. AU.** 41.6 mm x 3.0 mm thick, 30.9 gm, beveled and filed edge. Louis XIV head r. signed J. MAUGER. F. Quebec city goddess seated on rock with beaver, royal shield, and captured British banner as St. Laurence river god marvels at right. FRANCIA IN NOVO ORBE VICTRIX, France Victor in the New World. Exergue, Quebec Liberated, failure of Sir William Phipps' expedition to seize the city. Exceptionally smooth, reflective medium brown drenches both sides.
Ex: Ted Craige.
From The John W. Adams Collection.

- 3632 Betts-69. 1690 Quebec Preserved. Bronze. XF.** 41.3 mm x 3.0 mm thick, 29.0 gm, beveled and filed edge. Mass of curls surrounds the king's bust, squeezing J. MAUGER. F. This reverse is generally similar to preceding, trace of porosity can be found at the center. Light glossy brown.
Ex: Spink (11/1981), lot 951.
From The John W. Adams Collection.

- 3633 Betts-69. 1690 Quebec Preserved. Bronze, gilt. XF-.** 41.5 mm x 3.1 mm thick, 29.5 gm, beveled and filed edge. Curls are sparse behind the king's head and there are none at right of bust. Some faint graininess can be detected with effort on the reverse, but the gilding is rich and vividly golden on this high-quality example.
Ex: Dr. Hoffman (4/1984).
From The John W. Adams Collection.

Betts-69 1690 Quebec Preserved Silver Medal

- 3634 Betts-69. 1690 Quebec Preserved. Silver. VF-XF.** 40.7 mm, 36.3 gm, squared edges. Masses of heavy curls appear at left, more at right of the king's bust without impinging on tall-letter J. MAUGER. F. Deep ebony toning outlines and dramatizes the boldly defined reliefs. A rim cud can be found at 2 o'clock on the reverse. Some hairlines are visible under a glass, but the overall quality of this example must be called remarkable.
Ex: Legor (6/2002).
From The John W. Adams Collection.

1690 Quebec Preserved Medal
Betts-71, Bronze

- 3635 Betts-71. 1690 Quebec Preserved. Bronze. XF.** 41.3 mm x 3.6 mm thick, 34.0 gm, squared edge. Tall-letter, close-set obverse legend, sharp LI appears below the truncation. Both beaver and river god are exceptionally clear on the reverse. Splendid strike, obverse rim breaks have been filed down, and the entire medal is laved in medium brown patina.
No available provenance.
From The John W. Adams Collection.

- 3636 Betts-71. 1690 Quebec Preserved. Bronze. XF.** 41.1 mm x 3.6 mm thick, 34.8 grams, squared and filed edge. Another example signed only LI, distinguished by dark glossy brown on both sides and showing some widely scattered hints of light die rust.
Ex: Charlton CNA Sale, (7/1968); Ted Craig.
From The John W. Adams Collection.

1690 Quebec Preserved Medal
Betts-72, Bronze Restrike

- 3637 Betts-72. 1690 Quebec Preserved. Bronze restrike. XF.** 41.3 mm x 3.8 mm thick, 33.4 gm, squared edge. Well-proportioned bust signed DOLLIN. F. Reverse of preceding medals. An example of a demonstrably later strike, the edge bearing privy mark Bee CUIVRE (copper, struck 1860-1878). The Paris Mint introduced such marks in the 1830s and has used the Cornucopia mark since 1879. The Mint regards such pieces as "continuing strikes" rather than restrikes.
Purchased at Torex (Jeffrey Hoare Auctions, 1995), lot 1270.
From The John W. Adams Collection.

1690 Quebec Preserved Medal
Betts-73, Bronze

- 3638 Betts-73. 1690 Quebec Preserved. Bronze. Fine.** 41.2 mm x 4.1 mm thick, 38.3 gm, slightly filed edge. Smaller head without artist's signature, no right curl, small-letter legend ends in a small 5-pointed star. Reverse shows somewhat greater wear, suggesting pocket-piece service over the years. Even light brown patina.
Ex: Dr. Ouellet (4/1984); Phillip Flannagan Collection, Bowers & Merena (11/2001), lot 5202.
From The John W. Adams Collection.

1693 Felicitas Domus Augustae Medal
Unlisted in Betts
Obverse of Betts-69, Reverse of Betts-76

- 3639 Betts-unlisted. 1693 Felicitas Domus Augustae. Bronze. Fine-VF.** 41.5 mm x 3.0 mm thick, 29.8 gm, beveled and filed edge. This medal combines the obverse of Betts-69; reverse of Betts-76. Large bust r. with heavy curls resting atop the J in signature J. MAVGER F. Reverse bears four busts of royal offspring, the Serene Dauphin, Louis Duke of Burgundy, Philippe Duke of Anjou (later Philip V of Spain), Charles Duke of Berri, Latin legend hails Happiness of the August House. Large-diameter silver examples were struck and distributed among the Indians in Canada by French officials; otherwise, these smaller medals had no specific American connection. Reddish-brown surfaces show light wear especially on the highest points.
Ex: World Art Medals (11/1982).
From The John W. Adams Collection.

1697 Spanish Treasure Medal, Betts-83

- 3640 Betts-83. 1697 Spanish Treasure and Cartagena Taken. Bronze.** XF. 41.2 mm x 3.3 mm thick, 31.0 gm, squared edge. Heavy curls atop J. in signature, reverse depicts city goddess under palm tree surrendering an urn full of coins and ingots, HISPANORUM THESAURI DIREPTI. This port city in what is now Colombia was a key rendezvous for Spain's treasure fleets and when captured yielded more than \$100 million in the silver and gold to the French attackers. Reflective light brown fields show some reverse haymarks.
Ex: Ted Craige.
From The John W. Adams Collection.

- 3641 Betts-83. 1697 Spanish Treasure and Cartagena Taken. Bronze.** XF+. 41.2 mm x 3.1 mm thick, 28.1 gm, beveled edge. The rims show some filing to remove extruded metal. Fields are pleasing with a faint die bulge at reverse right. Uniform glossy brown surfaces add to the appeal of a meticulous strike.
Ex: Etienne Page; Ted Craige.
From The John W. Adams Collection.

- 3642 Betts-83. 1697 Spanish Treasure and Cartagena Taken. Bronze.** XF. 41.3 mm x 3.0 mm thick, 32.4 gm, beveled and filed edge. Same dies, but a deeper brown example showing minute traces of die rust and the reverse die bulge seen on the preceding example.
Ex: Ted Craige.
From The John W. Adams Collection.

1697 Spanish Treasure Medal Betts-83, Silver Restrike

- 3643 Betts-83, restrike. 1697 Spanish Treasure and Cartagena Taken. Silver.** XF. 41.2 mm, 38.7 gm. This handsome 19th century strike bears edge mark Bee ARGENT (silver) of the time of Napoleon III. Boldly struck, the medal's flashing fields and devices gleam under steely toning of the most delicate beauty.
Ex: Leonard Finn (12/1983).
From The John W. Adams Collection.

- 3644 Betts-83. 1697 Spanish Treasure and Cartagena Taken. Bronze, gilt.** VF. 41.6 mm x 3.1 mm thick, 32.2 gm, beveled and filed edge. Fascinating old gilding distinguishes this bright example, interrupted in the reverse field by scattered flecks that reveal the underlying bronze. The facial features of the city goddess are somewhat indistinct.
Ex: Spink (11/1981), lot 948.
From The John W. Adams Collection.

1697 French Victory Medal Betts-85-86, Bronze

- 3645 Betts-85-86. 1697 Victory the Companion of the French. Bronze.** XF. 41.3 mm x 3.1 mm thick, 28.0 gm, beveled and filed edge. Obverse B in the John J. Ford Jr. variety scheme. Heavy locks are close to signature J. MAVGER. F. Winged Victory inscribes French victories in capital lettering, battles in Spain, Flanders, and Cartagena on three oval shields hanging on a palm tree, VICTORIA COMES FRANCORUM. Roman numeral date in exergue. This deeply glossy brown medal displays immense dignity.
Ex: Ted Craige.
From The John W. Adams Collection.

- 3646 Betts-85-86. 1697 Victory the Companion of the French. Bronze.** XF. 41.2 mm x 3.0 mm thick, 30.5 gm, beveled and lightly filed edge. Obverse D in the John J. Ford Jr. variety scheme. Heavy locks join the J. in signature J. MAVGER. F. Reverse date appears in Arabic numerals; victories are inscribed in elegant script. Rim break circles from 4:30 to 6 o'clock. Light, gleaming red-brown surfaces give distinction.
Ex: Ted Craige.
From The John W. Adams Collection.

- 3647 Betts-85-86. 1697 Victory the Companion of the French. Bronze.** XF. 41.2 mm x 3.0 mm thick, 30.0 gm, beveled and lightly filed edge. Obverse D in the Ford variety scheme. Large bust shows heavy locks as the preceding. Victories are inscribed in script, reverse date is given in Arabic numerals; rim break circles from 4:30 to 6 o'clock. Flashing light brown covers both sides.
Ex: Presidential Coin (12/1991), lot 83.
From The John W. Adams Collection.

- 3648 Betts-85-86. 1697 Victory the Companion of the French. Bronze.** XF. 41.3 mm x 3.9 mm thick, 38.9 gm, beveled and filed edge. Obverse D per Ford variety scheme. Reverse shows victories inscribed in capitals, date in Roman numerals. Heavy planchet and deep brown gleam join for bold beauty.
Ex: Leonard Finn (12/1983).
From The John W. Adams Collection.

- 3649 Betts-85-86. 1697 Victory the Companion of the French. Bronze.** XF. 40.9 mm x 3.3 mm thick, 33.8 gm, beveled and lightly filed edge. Obverse E per Ford variety scheme. Artist's signature and details of the king's locks have been made sketchy by die polishing. Careful examination finds a couple of faint marks and scattered die rust on the deep glossy brown fields. Reverse shows capitals on the shields and date in Roman numerals.
Ex: Ted Craige.
From The John W. Adams Collection.

- 3650 Betts-85-86. 1697 Victory the Companion of the French. Bronze.** XF. 41.1 mm x 3.2 mm thick, 34.3 gm, squared and lightly filed edge. Obverse unlisted in Ford variety scheme, locks circle around the beginning of J. MAVGER. F Reverse shows capitals in the three victory shields, date in Roman numerals. Dark gleaming brown approaches ebony in its pervasive hue for exceptional beauty.
Ex: Ted Craige.
From The John W. Adams Collection.

**1697 French Victories Medal
Bronze, Damascene
Unlisted in Betts**

- 3651 Betts-Unlisted. 1697 Victory the Companion of the French. Bronze, damascene.** XF. 69.6 mm, 125.8 gm. By Joseph Roettiers. This triumphal medal is an expanded version of the 41-mm pieces described above. The obverse is wholly different, presenting Louis the Great, Most Christian King in an ornate cuirass with Medusa head at center and luxuriant locks, laurel crown. The reverse shows the winged Victory of the smaller medals inscribing her three victory shields in script: Barcelona, Spain; Atham, Flanders; and Cartagena in the New World. What makes this medal truly exceptional are its surfaces, copper-red fields and meticulously damascened or parcel-gilt reliefs. Exacting hand work has gilded the tops of the letters in the legends, Arabic date 1697 and all devices with remarkable skill. Some breaks are seen in the lacquered fields. A sharp die crack meanders across the lower part of the bust.
Ex: John J. Ford, Jr., Part 13 (Stack's, 1/2006), lot 790.
From The John W. Adams Collection.

- 3652 Betts-81. (1694) London Elephant Token, Thick Planchet VG8 Uncertified. Hodder 2-B, W-12040, R.2.** The London Elephant token has a dual role, as it is considered an American colonial coin, and is also part of the Betts series of American Historical Medals. The late 17th century copper pieces share an obverse die with others that carry a Carolina or New England inscription. Although well-worn with trivial surface marks, this pleasing dark chocolate example has excellent eye appeal, with a few minuscule rim bruises. Listed on page 46 of the 2013 *Guide Book*.
Ex: Leonard Finn (12/1983).
From the John W. Adams Collection.

**Betts-88 1700 Darien, Scotland Medal
Silver, Cast and Chased**

- 3653 Betts-88. 1700 Scottish Colony at Darien. Silver. Cast and chased.** XF. 56.3 mm, 63.3 gm. By Martin Smeltzing. Grotesque ocean god in nautilus shell helmet and scallop shell mail stands on parapet watching as Alexander Campbell's Scottish forces overrun the Spanish fort of Toubocanti and defeat 1,600 Spaniards below. Banner above bears the Latin *What Not for the Fatherland*. The reverse presents the Arms of the African and Indian Company of Scotland containing a Saint Andrew's Cross with ship, camels, and elephant. Supporters are an African holding an elephant tusk and American Indian holding a cornucopia. Crest is a rising sun crest on facing helmet, Latin motto *Wherever the World Extends, United Strength is More Powerful*. This medal is well-detailed but heavily chased, but is nonetheless a historic rarity eagerly sought in any condition.

In 1700, Scotland and England were separate kingdoms, and this colonization attempt was one of the last ambitious projects that was wholly Scottish. The Darien, Panama, colony was an unmitigated disaster despite a hopeful beginning. The tropical climate, insects, and disease decimated the poorly prepared Scots who were denied any help by the English colonies in the West Indies. Campbell's victory was followed by defeat and flight and few surviving colonists ever made it back to Scotland. Campbell received a grant of Arms and a gold medal nonetheless.

John W. Adams Commentary

"These are very important medals - the only ones that refer specifically to the Scots. The defense of the Darien Colony was heroic but, when the British withheld their promised support, the cause was doomed."

Ex: LaRiviere Collection (Bowers and Merena, 5/2001), lot 1024.
From The John W. Adams Collection.

3654 Betts-88. 1700 Scottish Colony at Darien. White metal, gilt. VF. 56.7 mm, 57.2 gm. Affixed loop for suspension. By Martin Smeltzing. Grotesque ocean god in nautilus shell helmet and scallop shell mail stands on parapet watching as Alexander Campbell's Scottish small forces overrun the Spanish fort of Toubocanti below. Banner above bears the Latin What Not for the Fatherland. The reverse presents the Arms of the African and Indian Company of Scotland consisting of Saint Andrew's Cross dividing ship, camels and elephant, supported by an African holding an elephant tusk and American Indian holding a cornucopia. Crest is a rising sun crest on facing helmet, Latin motto Wherever the World Extends, United Strength is More Powerful. Exacting strike and detail, extraordinary preservation, even brassy gold surfaces add to this medal's appeal.
Ex: *Glendining (1989).*
From *The John W. Adams Collection.*

3655 Betts-93. 1702 American Treasure Captured at Vigo. White metal. XF. 57.2 mm, 55.3 gm. By Martin Smeltzing. Winged Fame atop an ancient rostral column with Spanish and French banners, dividing burning or captured Spanish and French fleets in Spain's Atlantic port of Vigo after defeat by British and Dutch forces and seizure of Spanish-American treasure fleet. Unicorn, eagle, and lion support a massive trophy of ships, fortress and massed banners including those of Spain, the Empire, Britain, France with a Medusa head at center. This is a somewhat tangled design that intermingles emblems of both victors and vanquished. The British and Dutch triumphed, and much of the captured gold and silver was reborn as the VIGO coinage of Queen Anne. Silvery surfaces testify to exceptional preservation of this remarkable piece.
Ex: *Chris Eimer (1/2003).*
From *The John W. Adams Collection.*

Betts-94 1702 Vigo Silver Medal

3656 Betts-94. 1702 Seizure of American Treasure at Vigo. Silver. VF. 47.3 mm, 37.2 gm. By Georg Friedrich Nürnberger, Georg Hautsch, and Martin Brunner. Neptune in his seahorse-drawn car and seacherubs holding British, German, and Dutch shields support a scroll inscribed by Victory with the names of 24 French ships captured in the harbor of Vigo. Reverse nine allied ships advance in tight formation toward the chain stretched across the entrance to Vigo harbor and ships sheltering within. This design incorporates an amazing amount of exquisite detail chronicling a catastrophic Spanish-French defeat. Lost to the British and Dutch was the entire treasure fleet that had survived a perilous transatlantic voyage only to be destroyed in a supposedly secure home port.
Ex: *John J. Ford, Jr., Part 13 (Stack's, 1/2006), lot 792.*
From *The John W. Adams Collection.*

3657 Betts-95 variant. 1702 Vigo Bay. Bronze. VF+. 25.7 mm, 5.1 gm. Large and crude draped Queen Anne bust r. without signature below. Reverse presents a crude aerial view of Vigo harbor. This medal is a Nuremberg counter copied from jetons by Lazarus Gottlieb Laufer, on a thin and wavy planchet. Examples of these Nuremberg pieces offered in Ford Part XIII all brought substantial realizations from \$575 to \$650.
Ex: *Ted Craige.*
From *The John W. Adams Collection.*

3658 Betts-95. 1702 Vigo Bay. Brass. XF. 25.3 mm, 4.4 gm. Obverse 1/ Reverse 2. Crisp artist's signature · LGL · appears in the field below a well-designed and sharply detailed bust of Queen Anne. Reverse presents a jewel-sharp map with British-Dutch fleet, sinking and burning enemy vessels. Deeply toned yet glossy and showing remarkable overall quality.

Ex: Ted Craige.

From The John W. Adams Collection.

3659 Betts-95. 1702 Vigo Bay. Brass. VF. 25.3 mm, 4.5 gm. Obverse 1, Reverse 1. Another · LGL · bust of the queen with Vigo harbor and battle as preceding. Yellow brass patina, a piece that saw its share of use in commerce.

Ex: Ted Craige.

From The John W. Adams Collection.

3660 Betts-95. 1702 Vigo Bay. Bronze. VF. 25.4 mm, 4.6 gm. · LGL · signature is faint and appears topped by a die crack. A crudely struck example with somewhat wavy, golden-brass toned surfaces.

Ex: Ted Craige.

From The John W. Adams Collection.

3661 Betts 95. 1702 Vigo Bay. Bronze. VF. 25.3 mm, 4.6 gm. Scratches. Surfaces are uneven, but all detail is sharply defined. The obverse is covered with crude scratches suggesting an amateurish attempt at chasing; the reverse presents few such marks.

From The John W. Adams Collection.

3662 Betts-96. 1702 American Treasure Captured at Vigo. Silver. VF. 43.7 mm, 39.4 gm. By Jan Boskam. Draped Queen Anne bust l. with lovelock over right shoulder. Reverse a forest of masts of British and Dutch ships attacking harbor filled with burning French and Spanish ships, pillar of fire rising into sky under Latin legend French and Spanish Fleet Taken by Force, Burned or Captured. Light handling, two edge bruises. Low relief causes indistinct reverse detail.

Ex: Spink (11/1965); Leonard Finn (12/1983).

From The John W. Adams Collection.

1702 Vigo Bay Silver Medal Betts-96 Obverse, New Reverse

3663 Betts-96, new reverse. 1702 American Treasure Captured at Vigo. Silver. XF. 44.2 mm, 36.9 gm. By Jan Boskam. Draped Queen Anne bust l. with lovelock over right shoulder. Reverse British and Dutch ships sailing from the left to harbor filled with burning French and Spanish ships, two pillars of fire rising into sky under Latin legend French and Spanish Fleet Taken by Force, Burned or Captured. Prooflike fields with a patch of frosty roughness noted by the Ford Part XIII cataloger, roughness on left reverse rim.

Ex: John J. Ford, Jr., Part 13 (Stack's, 1/2006), lot 801.

From The John W. Adams Collection.

1702 Vigo Bay Gold Medal Betts-97, Nearly Pure Gold

3664 Betts-97. 1702 American Treasure Captured at Vigo. Gold. XF. 36.3 mm, 26.0 gm, specific gravity 19.17 (99.4% gold). Obverse 1, Reverse A. By John Croker. Crowned bust l. of Queen Anne, lovelock across shoulder, cross on the crown points to R in FRA. Reverse presents a cloud sailing gracefully above a wonderfully detailed bird's eye view of narrow-mouth harbor with Anglo-Dutch vessels bottling up burning Spanish and French ships in inner port. Small ship atop the allied flotilla is covered by the tall mast of the larger ship below. Latin legend hails French and Spanish Fleet Captured or Burned. The Adams Collection offers what may be the largest selection of Vigo Treasure medals to appear at public auction.

Ex: John J. Ford, Jr., Part 13 (Stack's, 1/2006).

From The John W. Adams Collection.

3665 Betts-97. 1702 American Treasure Captured at Vigo. Silver. Fine. 36.7 mm, 18.0 gm. By John Croker. Reverse shows small ship atop the allied squadron touched only by tallest mast of the ship below. This medal combines some flashing silver in the fields with light wear on the higher points of John Croker's design, notably on the hills surrounding the harbor of Vigo on the reverse.

Ex: Ted Craige.

From The John W. Adams Collection.

Betts-97 1702 Vigo Bay Medal in Silver

- 3666 Betts-97. 1702 American Treasure Captured at Vigo. Silver. VF.** 36.6 mm, 17.6 gm. By John Croker. Cross on the queen's crown points to R in FRA. The reverse harbor and battle scene are exceptionally vividly detailed, showing small ship atop allied squadron touched by the tall mast of the larger ship below. Visual charm is amplified by flashing fields of unusual beauty.
Ex: Ted Craige; earlier ex Kreisberg Sale (6/1965).
From The John W. Adams Collection.

Betts-97 1702 Vigo Bay Silver Medal

- 3667 Betts-97. 1702 American Treasure Captured at Vigo. Silver. XF.** 36.7 mm, 17.7 gm. Cross on the queen's crown points to R in FRA; smallest allied ship barely touches the tallest mast of the ship below. Flashing smooth silver surfaces accentuate the beauty of an exacting strike.
From The John W. Adams Collection.

- 3668 Betts-97. 1702 American Treasure Captured at Vigo. Silver. VF.** 37.5 mm, 17.8 gm. By John Croker. This is an attractive example of a classic of the Queen Anne series showing the smallest allied ship touched by the tall mast of the larger ship below. Signs of lightest handling on the high points; examination under a glass reveals a scattering of minute contact ticks that have no great visual impact.
Ex: Ted Craige.
From The John W. Adams Collection.

- 3669 Betts-97. 1702 American Treasure Captured at Vigo. Silver. VF.** 36.4 mm, 19.4 gm. Obverse 2, Reverse 2. By John Croker. Crown and field details as preceding. Types as preceding; both sides show effects of pocket-piece wear along with a perceptible number of contact marks on devices and fields.
Ex: Spink (11/1981), lot 922.
From The John W. Adams Collection.

- 3670 Betts-97. 1702 American Treasure Captured at Vigo. Silver. XF.** 37.4 mm, 18.1 gm. This obverse 2 example boasts a sharp and fully detailed strike and a carbon spot in obverse left field. Reverse shows the small ship above the center of the allied fleet covered by the tall mast of the ship below it. A bold die crack crosses the tops of the letters in GAL. ET. on the reverse
Ex: Leonard Finn (12/1983).
From The John W. Adams Collection.

- 3671 Betts-97, obverse splasher, variant. 1702 American Treasure Captured at Vigo. White metal. Fine.** 35.8 mm, 4.4 grams. By John Croker. Cross on the queen's crown points to the left upright of the R in FRA. Lustrous surface is lightly crinkled, particularly in the upper left field. Such White Metal splashes are delicate and easily damaged; there can be few in existence after three centuries. A fascinating splasher that is of considerable rarity.
Ex: Ted Craige.
From The John W. Adams Collection.

- 3672 Betts-97. 1702 American Treasure Captured at Vigo. Bronze. VF.** 37.3 mm, 1.7 mm thick, 17.6 grams. By John Croker. Cross points to left upright of R in FRA, fine die crack crosses tops of GAL. ET, small ship at the top of allied squadron at the harbor mouth is covered by the tallest mast the ship below it. Smoothest glossy medium brown covers both sides of this satisfying example.
Ex: Spinks (11/1981), lot 922.
From The John W. Adams Collection.

- 3673 Betts-97. 1702 American Treasure Captured at Vigo. Bronze. VF.** 37.6 mm, 19.8 grams. By John Croker. Cross points to right side of R in FRA, die crack atop GAL. ET is more advanced, ships are aligned with mast covering the smallest vessel at harbor mouth, Deep glossy brown drenches this flashing example, This issue is elusive in bronze.
Ex: Ted Craige.
From The John W. Adams Collection.

- 3674 Betts-97. 1702 American Treasure Captured at Vigo. Bronze. XF.** 37.9 mm, 17.2 grams. By John Croker. Cross points to left side of R in FRA, die crack atop GAL. ET is fine, ships are aligned with mast covering the smallest vessel at harbor mouth. Flashing medium brown accents this especially sharply struck specimen of the classic Vigo commemorative medals.
Ex: Coin Galleries (6/1966); Ted Craige.
From The John W. Adams Collection.

- 3675 Betts-98. 1702 American Treasure Captured at Vigo. Silver. VF+.** 40.7 mm, 2.4 mm thick, 31.5 grams. By Christian Wermuth. This highly distinctive medal is really a loose copy of the British medals of John Croker. Wermuth's bust of Queen Anne shows a stretched head with protuberant "ski-jump" nose l. within a denticled border. The reverse shows only five allied ships at the narrow harbor mouth, a mountain-like mass of fire and smoke climbing upward from the burning French and Spanish ships. A fascinating example of design adaptation by this noted German satirical medalist, noted for his anti-Louis XIV works,
Ex: Downey-Lepczyk (9/1987), lot 1100.
From The John W. Adams Collection.

- 3676 Betts-98, obverse splasher, variant. 1702 American Treasure Captured at Vigo. White metal. VF.** 45.6 mm, 8.2 grams. Tall Queen half-length bust of Queen Anne l. within large-letter legend NNA · D·G · MAG: BRI. FR: ET HIB. REG: This obverse resembles Betts-97 to a degree but is really a wholly redesigned medal that calls for additional research.
Ex: Ted Craige.
From The John W. Adams Collection.

**1702 Betts-101 Silver Medal, XF+
American Treasure at Vigo**

- 3677 Betts-101. 1702 American Treasure Captured at Vigo. Silver. Plain edge. XF+.** 40.3 mm, 22.2 grams. Unsigned work featuring complex symbolic design, Victory places naval crown, laurel and palm atop naval trophies, SPES ET VIRES HOSTIUM FRACTAE, HISPAN. OPES AMERIC. INTERCEPT., Hope and Strength of the Enemy Broken, Spanish Treasure Intercepted. Reverse legend celebrates Strength of French and Dutch, aerial view of Vigo with battle and flaming ships. Steely toning shows a flavor of pale blue.
Ex: Bosco (11/2000), lot 572.
From The John W. Adams Collection.

1702 Betts-101 Vigo Bay Silver Medal, XF

- 3678 Betts-101. 1702 American Treasure Captured at Vigo. Silver. Lettered edge. XF.** 40.6 mm, 26.3 grams. Winged Victory places naval crown, laurel and palm atop naval trophies, SPES ET VIRES HOSTIUM FRACTAE, HISPAN. OPES AMERIC. INTERCEPT., Hope and Strength of the Enemy Broken, Spanish Treasure Intercepted. Reverse legend hails Strength of French and Dutch, aerial view of Vigo with battle and flaming ships. Raised letter edge inscription presents quote from Roman poet Ovid, +* DECIDIT IN CASSES PRAEDA PETITA MEOS OVID, The Prey Sought for has Fallen into my Net. Bold silver flash with hints of palest gold.
Ex: Ted Craige.
From The John W. Adams Collection.

1702 Betts-101 Vigo Bay Silver Medal, VF

- 3679 Betts-101. 1702 American Treasure Captured at Vigo. Silver. Lettered edge. VF.** 40.6 mm, 25.8 grams. Winged Victory places naval crown, laurel and palm atop naval trophies, SPES ET VIRES HOSTIUM FRACTAE, HISPAN. OPES AMERIC. INTERCEPT., Hope and Strength of the Enemy Broken, Spanish Treasure Intercepted. Reverse legend praises Strength of French and Dutch, aerial view of Vigo shows sea battle and flaming ships. Raised letter edge inscription from Roman poet Ovid, +* DECIDIT IN CASSES PRAEDA PETITA MEOS OVID, The Prey Sought for has Fallen into my Net. Flashing silver has prooflike intensity.
Ex: Downey-Lepczyk (9/1987), lot 1102.
From The John W. Adams Collection.

- 3680 Betts-101. 1702 American Treasure Captured at Vigo. Bronze. Lettered edge. XF, holed.** 40.5 mm, 24.2 grams. Winged Victory places naval crown, laurel and palm over naval trophies, SPES ET VIRES HOSTIUM FRACTAE, HISPAN. OPES AMERIC. INTERCEPT., Hope and Strength of the Enemy Broken, Spanish Treasure Intercepted. Reverse legend, Strength of French and Dutch, aerial view of Vigo with battle and flaming ships. Raised letter edge inscription from Roman poet Ovid, +* DECIDIT IN CASSES PRAEDA PETITA MEOS OVID, The Prey Sought for has Fallen into my Net. Handsome deep red-mahogany patina.
Ex: Glendining (3/1989), lot 415.
From The John W. Adams Collection.

**1759 Betts-417 Guadaloupe Surrenders Medal
Extremely Rare in Silver**

- 3681 Betts-417. 1759 Guadaloupe Surrenders. Silver. MS63 NGC.** 39.7mm, 400 grains. Medium silver-gray toning appears over impeccable, reflective surfaces. The piece displays little to no evidence of handling and is finer than any recently offered pieces to our knowledge. The obverse depicts Britannia helping Guadaloupe to her feet while the reverse displays Victory. The medals were struck to commemorate the fall of the Caribbean island of Guadaloupe, which was a stronghold for French privateers during the French and Indian Wars. These were struck in both copper and silver, with the silver pieces being significantly rarer. An NGC photo-certificate accompanies this lot.
From The Fort Necessity Collection of Betts Medals.

1760 Betts-429 Montreal Taken/Conquest of Canada, MS63

- 3682** Betts-429. 1760 Montreal Taken/Conquest of Canada. Silver. MS63 NGC. 40.7mm, 414 grains. Ex: Baldwin & Sons (7/1971). Brilliant, virtually untuned surfaces with intensely prooflike fields appear on this example that has an as-made appearance. The beading at the periphery exhibits subtle double striking. The Society for Promoting Arts and Commerce medals are among the most popular reminders of the French and Indian War and this design is among the most attractive and rarest of the group. Engraved by John Kirk, this medal features a river-god being accosted by a vicious-looking beaver on the obverse and an inconsolable Canadienne at the foot of a pine tree on the reverse, evoking the Judea Capta issues of ancient Rome. An NGC photo-certificate accompanies this lot. From *The Fort Necessity Collection of Betts Medals*.

1760 Betts-430 Canada Subdued, MS64

- 3683** Betts-430. 1760 Canada Subdued. Silver. MS64 NGC. 39.2mm, 334 grains. Ex: Wayte Raymond. Deep silver gray toning with intense flashes of blue and lilac along with impeccable surfaces and very few handling marks provide this medal with spectacular eye appeal. This piece is rare in silver and is among the finest examples extant. The design features a bust of George II on the obverse and a captive Canadienne at the base of a pine tree on the reverse. John Pingo's dies are an elegant homage to the Judea Capta series of ancient Rome. An NGC photo-certificate accompanies this lot. From *The Fort Necessity Collection of Betts Medals*.

1762 Betts-443 Capture of the Morro Castle
Havana Medal MS62

- 3684** Betts-443. 1762 Capture of the Morro Castle, Havana. Silver. MS62 NGC. 49.4mm, 836.3 grains. Ex: Lucian M. LaRiviere (5/2001). Beautifully toned in gold and russet with fresh luster and very few significant hairlines or marks, this example exhibits an early die state. Later pieces display heavy die cracks over Luis Vicente de Velasco's neck and collar. The Morro Castle is widely considered to be the most artistic Betts medal of the Seven Years War and it certainly is the most dramatic. It was issued by Spain to honor Luis de Velasco and Vincenzo Gonzalez, the commanders of *Castillo de los Tres Reyes Magos del Morro*, the castle which guarded the entrance to Havana Bay in Cuba. In 1762, the British besieged Morro Castle with over 30,000 men. During the siege, Velasco and Gonzalez refused repeated opportunities to surrender, dying alongside their men in hand-to-hand combat after the British successfully undermined one of the fort's bastions and stormed into the breach. The obverse of the medal features busts of the fallen commanders, while the reverse graphically depicts the explosion which essentially ended the conflict. An NGC photo-certificate accompanies this lot. From *The Fort Necessity Collection of Betts Medals*.
-

1763 Betts-447 Gold Medal, MS60
Treaty of Hubertusburg

- 3685 Betts-447. 1763 Treaty of Hubertusburg. Gold. MS60 NGC.** 22.3mm, 53.7 grains. Ex: John J. Ford, Jr. (5/2006). Lustrous yellow gold with a few scattered marks, this is one of only two reported examples of this exceedingly rare and important gold Betts medal. This ducat-sized medal was struck to commemorate the signing of the Treaty of Hubertusburg, which ended the Seven Years War in Europe. Because of its size, this is one of the only collectible issues in the Betts series struck in gold. Oddly, it is actually rarer than several of its larger counterparts. Ford owned both of the known pieces at one time and his lesser duplicate realized \$19,550 as lot 3937 in the Heritage FUN Signature Auction in January 2012. An NGC photo-certificate accompanies this lot.
From The Fort Necessity Collection of Betts Medals.

1795 Betts-530 St. Vincent's Black Corps, MS63

- 3686 Betts-530. 1795 St. Vincent's Black Corps. Copper. MS63 NGC.** 48.4mm, 969 grains. This medal displays lustrous red and brown surfaces with subtle iridescence. A compelling medal, these pieces were apparently struck to be awarded to one of the black soldiers who fought for the British during the Second Carib War (1795-97). These soldiers were presumably freed slaves, trained to fight against the local creoles, who were exiled following the conflict. This is one of only a handful of known survivors. An NGC photo-certificate accompanies this lot.
From The Fort Necessity Collection of Betts Medals.

1783 Betts-608 Silver Medal, PR64
Peace of Versailles

- 3687 Betts-608 1783 Peace of Versailles, Silver PR64 NGC.** The obverse depicts Louis XVI pointing to a shield bearing America's 13 bars hung by Liberty on a pillar, while the reverse shows Athena holding a spear growing into an olive tree and a ribbon linking the shields of France, Britain, Spain, and Holland. The Peace of Versailles, ending the Revolutionary War, was signed on September 3, 1783.

This medal is closely related to the famous Libertas Americana medal, Betts-615, and bears that inscription on the obverse. The reverse bears the inscription COMMUNI CONSENSU (by common consent).

This impressive Choice proof is deeply toned with reflective fields under original gray and iridescent patina. Faint hairlines and trivial contact marks hardly deserve mention.

U.S. PRESIDENTS & STATESMEN

- 3688 Eight Stages of Matte Medal Production.** A special Presidential Art holder contains eight pieces that show the progression of a private John F. Kennedy matte finish inauguration medal from the start of the production process to its conclusion. The eight stages are blank, first strike, second strike, third strike, fourth strike, sandblast, oxidized, and finished. (Total: 8 pieces) PCGS# 661030

ASSAY MEDALS

- 3689** 1941 U.S. Assay Commission Medal, Bronze — Environmental Damage — NGC Details. Unc. JK-AC-86. A rare Assay Commission medal from the Franklin D. Roosevelt era. The present fully struck matte finish medal has a tan-brown obverse aside from glimpses of gunmetal-blue near the edge. The reverse displays remnants of the original color at the margins but the remainder of that side is speckled with dark gray patina.

Bronze 1945 U.S. Assay Medal With Presentation Case JK-AC-90, MS62

- 3690** 1945 U.S. Assay Commission Medal, Bronze MS62 NGC. JK-AC-90. The obverse motif is reminiscent of the famous Libertas Americana medal. The reverse depicts the Great Seal of the United States. Toned light walnut-brown and freckled gunmetal-gray. An original presentation case for the medal is included. The case is dark green aside from a cream-gray inside top. The hinge for the case operates but the corners and sides of the case exhibit wear.

Bronze 1949 U.S. Assay Medal, MS62 JK-AC-94

- 3691** 1949 U.S. Assay Commission Medal, Bronze MS62 NGC. JK-AC-94. The obverse shows three female symbolic figures of Law, Justice, and Commerce. The reverse depicts the north entrance of the Treasury Building with a statue of Albert Gallanting at the base of the steps. Golden-brown overall with steel-gray toning on the high points of the obverse figures.

Scarce 1958 Assay Medal, MS63 With Presentation Box

- 3692** 1958 U.S. Assay Commission Medal MS63 NGC. JK-AC-102. The obverse has a head and shoulders bust of President Eisenhower facing left. Gilroy Roberts was the engraver. The reverse displays the motto ATOMS FOR PEACE along with four symbolic figures and the Statue of Freedom from the top of the Capitol building. A presentation box accompanies the lot. The box is rectangular and dark green with a cardboard exterior and a felt interior. The box has a couple of moderate marks on its top side but the corners show only slight wear.

EXPOSITIONS AND FAIRS

- 3693** 1892 Spain Columbus 400th Anniversary Medal, Eglit-111 and Five Other Medals 1892 Spain Columbus 400th Anniversary Medal, Eglit-111. MS62. Bronze, 70 mm, 176.4 gm. Obverse scene of Columbus' discovery, around rim in ornate letters "Cristobal Colón descubrió el Nuevo Mundo el doce de Octubre de mil cuatrocientos noventa y dos, reinando en Castilla y Aragon Doña Isabel y Don Fernando" ("Christopher Columbus discovered the New World the 12th of October 1492, reigning in Castile and Aragon Queen Isabel and King Ferdinand). Reverse Columbus pays homage to the King and Queen, in exergue "Cuarto centenario" ("Four-hundredth anniversary), with date 1892 in Roman numerals, B. MAURA and MADRID 1892. Lustrous mahogany surfaces with a few rim bumps. The medal resides in what may be the original box. That item displays significant wear.

The other five medals contained in the lot are as follow:

City College of New York, Unissued Elisha Riggs Award Medal for the Best English Composition, Julian SC-17. MS60. Bronze, 39mm. Engraved by William H. Key. The medals were struck at the Mint in 1868 and 1869.

Departmental Trophy For General Excellence in Athletics. AU55. Bronze, 39 x 24mm, rectangular with a loupe at top center. Tiffany & Co.

New Hampshire Agricultural Society, Unissued Award Medal, Julian AM-56. MS62. Bronze, 59mm. Engraved by William Barber.

New Hampshire Agricultural Society, Unissued Award Medal, Julian AM-57. MS60. Bronze, 48mm. Engraved by William Barber.

Tennessee Centennial Exposition, Nashville 1897, Unissued Award Medal. MS64. Silver, 54mm. Engraved by Stief, Nashville. The edge is stamped STERLING. The piece exhibits attractive toning and resides in the original, circular box with B.H. STIEF, Jewelry Col, Nashville, TN in gold letters on the lining of the leather lid. The lid exhibits several cracks. (Total: 6 medals)

Platinum Medal for Francis Scott Key
Memorial Foundation Member #3
World's Fair 1964-1965, MS66

- 3694** (1964-1965) Maryland World's Fair Commission Platinum Medal MS66 NGC. The more familiar version of this "so-called half dollar" design, in bronze, was sold as a souvenir by the Maryland Commission at the New York World's Fair in 1964-1965. This piece, however, is a special medal in platinum presented to a member of the Francis Scott Key Memorial Foundation, who copyrighted the design (inner left obverse). The bottom reverse reads "FOUNDATION MEMBER" in place of "SOUVENIR HALF DOLLAR," and the number 3 appears below Francis Scott Key's name. The identity of Member #3 remains uncertain but is a fascinating puzzle.

COUNTERSTAMP

Rarely Encountered Ben F. Wyant/May Flower Saloon
Memphis, TN Counterstamp

- 3695** 1858-O Seated Half Dollar VF30 NGC. Ben F. Wyant, May Flower Saloon, Memphis, TN Counterstamp. Brunk M-326, Rulau Tenn 102. A rarely encountered counterstamp, both the host coin and the stamp display nice eye appeal on this example. The May Flower Saloon was located at No. 137 Main St. The host coins for this counterstamp are generally half dollars dated 1854-1858. The stamp is boldly impressed onto the host coin. In 2003, coins with this counterstamp were listed with a value of \$400 to \$600 in Hartzog's *Countermarked Coins Price Guide*.

HARD TIMES TOKEN

- 3696** 1837 Feuchtwanger Three Cent, Coat of Arms XF45 NGC. Low-117, HT-262, R.3. A cream-gray representative of this scarce Feuchtwanger denomination. Devoid of marks though the legs of the Justice and Liberty exhibit wear. Listed on page 400 of the 2013 *Guide Book*.

CIVIL WAR TOKENS

- 3697** Mixed Lot of Uncertified Civil War Tokens, Including Patriotics and Storecards. Sixty-Four Items. The tokens contained in this lot range in grade from Fine to Mint State, with a few of the items having been holed or exhibiting other problems. Some of the tokens display evidence of a prior cleaning. The majority of the examples are copper, with a few brass and one copper-nickel piece among the group. Most, if not all, of the tokens are common varieties. The number of Patriotics included is 40 and there are 21 Storecards. A Hard Times Token appears in the lot, a Low-38, Rulau-HT-62 that displays a large hole that has affected the shape of the rim. Also included is an undated merchant token for Wm. Milton & Co. Merchant Tailors, Fanueil Hall Clothes Warehouse, Boston. The final item in the lot is a Julian PR-38, a silver 19mm medal with a right-facing portrait of Lincoln on one side and a broken column on the other. (Total: 64 tokens)

ALASKA TOKENS

- 3698** Eight-Piece Alaska "Bingle" Set AU58 to MS61 NGC. A complete denomination set of Alaska Rural Rehabilitation Corporation Tokens, better known within the hobby as bingles. These were issued by the Federal government during the Great Depression between 1935 and 1936 as a local welfare program. Most pieces were eventually redeemed for regular coinage. As one might expect, the upper denomination bingles are especially scarce. The set includes: One Cent MS60; Five Cent AU58; Ten Cent MS61; 25 Cent AU58; 50 Cent MS61; One Dollar MS60; Five Dollar AU58; and Ten Dollar AU58. (Total: 8 coins) PCGS# 661160
- 3699** Three 1967 Alaska Purchase Centennial Medals NGC. Each medal is 33mm in diameter and bears identical miner and totem pole designs. The serial number 94 is entered on the edge of each piece at 6 o'clock. The platinum and silver examples are graded MS67. The bronze example is certified as MS67 Red. The platinum piece is prooflike and brilliant. The silver piece is satiny and has light golden toning. The bronze example is peach-red and lustrous. (Total: 3 medals)

MILITARY MEDAL

1897 Great Britain Gold Medal, MS62 Capture of Trinidad BHM-3623

3700 1897 Capture of Trinidad Gold Medal. MS62. BHM-3623. 38.6 grams, 39 mm. This British gold medal commemorates the 1797 capture of Trinidad by the British Navy. The obverse depicts a front facing bust of Sir Ralph Abercromby with his name around. The reverse carries the legend TO COMMEMORATE THE CENTENARY OF THE CONQUEST OF TRINIDAD BY THE BRITISH 1797. The British flag is displayed at the Port of Spain on Trinidad, surrounded by warships, with mountains in the background. Beneath, MISERICORDIA PROBAT POPULOS ET FOEDERA JUNGIT (He approves of the mingling of the peoples and their bonds of union).

This beautiful gold medal has rich honey-gold color with orange overtones. The fields are lightly marked and fully prooflike. An impressive historical medal.

3701 No lot.

MEDALS AND TOKENS

3702 1896 Morgan Gardner Bulkeley Medallion. Bronze Cast, 138.5mm. By John Flanagan. Extremely Fine. A frock-coated bust left of Civil War veteran Bulkeley (1837-1922) appears on the obverse. The reverse includes the Roman numeral date 1896 in a palm, oak, laurel, and flower wreath. Bulkeley was a Connecticut business leader (Aetna Insurance), politician (Governor of Connecticut, United States Senator), and sports executive (founder and first president of baseball's National League and early inductee into the Baseball Hall of Fame at Cooperstown, NY). The designer, Flanagan, was also responsible for the Washington quarter. Some casting roughness appears in the left obverse field and a hanger was removed at 12:00. Sold as is, no returns. Estimated shipping charge \$25 to \$35.

3703 1901 Pan American Exposition Medal. International Paper Co. Bronze Goldplate, 63.6mm. By Hermon MacNeil. Struck by Gorham Manufacturing Co. About Uncirculated. The Obverse depicts South and North American Plains Indians exchanging a peace pipe. A garlanded buffalo with a striding nude Liberty appears on the reverse. The exposition was the site of President William McKinley's assassination. MacNeil later designed the Standing Liberty quarter. Edge lettering reads GORHAM CO. and BRONZE. The lot includes the original box from Gorham Manufacturing Co. A few dark spots appear. Sold as is, no returns. Estimated shipping charge \$25 to \$35.

3704 1902 New York State Chamber of Commerce Building Inauguration Medal. Bronze, 77.1mm. By Tiffany & Company. About Uncirculated. An ornate Art Deco façade of the recently completed headquarters near New York's Battery appears on the obverse. The reverse displays an Indian and Columbia clasping hands, with a steam railroad and ship in the background. The intricate strike and rich red-brown patina add to the eye appeal of this piece. Several minor edge bumps appear. Sold as is, no returns. Estimated shipping charge \$25 to \$35.

3705 1906 United States Medal for Life Saving on Railroads. Uniface Cast Bronze, 170mm. By Adolph Alexander Weinman. About Uncirculated. Baxter 173. The design was struck in gilt bronze, bronze, galvano and gilt copper in several different sizes ranging from 43 to 77mm. However, this larger example displays only the obverse design. This medal depicts a nude male with a flaming torch and cape kneeling on a boulder residing on a railroad track with a signal switch at left. Latin and English text reads, "Praise for Virtue, Award of Hero." Weinman designed the Mercury dime and Walking Liberty half dollar. This piece displays a handsome reddish-brown patina. Sold as is, no returns. Estimated shipping charge \$35 to \$45.

3706 1928 Benjamin Franklin Saturday Evening Post Bicentennial Medallion. Bronze, 101.2mm. By Julio Kilenyi. About Uncirculated. GM-140. A mature bust of Franklin facing left, a true Renaissance man known as a printer, scientist, and patriot among many other roles, appears on the obverse which the reverse depicts the *Saturday Evening Post* headquarters. The edge is stamped WHITEHEAD & HOAG. Romanian born Kilenyi (1885-1959) designed numerous medals during his career, including the Lincoln Tunnel Dedication medal. The obverse of this example includes scattered freckling. Sold as is, no returns. Estimated shipping charge \$25 to \$35.

- 3707** Trio of Medallion Art Company Medals. 1928 25th Anniversary Medal. Bronze, 73.3mm. By Claude Dautel. 1950 50th Anniversary Medal. Bronze, 69.6mm. By Bruno Mankowski. 1960 60th Anniversary Medal. Bronze, 70.2mm. By Albert Wein. Choice Extremely Fine to Uncirculated. The Dautel medal displays a technician on the obverse with a Janvier reducing machine above a 5-line incuse advertising message. The reverse features a Statuary reducing machine. The edge bears a cancelled telephone number and a new number. The Mankowski piece includes an obverse winged head over a Janvier machine while the back design includes hands holding a miniature of this medal. A small booklet is included with that example. Wein's design includes a seated ancient holding a coin on the obverse and a nude celator striking a coin on the reverse. Sold as is, no returns. Estimated shipping charge \$25 to \$35. (Total: 3 medals)

**1929 Lloyd Warren Memorial Plaque
Founder of the Beaux-Arts Institute of Design**

- 3708** 1929 Lloyd Warren Memorial Plaque. Octagonal Bronze Foundry Cast, 21 3/8 inches. By Fred B. Clarke. Extremely Fine. As the plaque states, Warren (1868-1922) is known as the founder of the highly acclaimed Beaux-Arts Institute of Design that was located in New York City, a training ground for American architects, sculptors, and mural painters. The institute attracted many immigrant and first generation students and exerted influence over the arts throughout the country. Unfortunately, Warren met a tragic end after falling out of an open window while sleepwalking in his apartment. The recessed field bears a right facing portrait of a mustached man wearing pince-nez glasses, situated within a laurel wreath. Massive screw posts appear on the back along with a wire hanger. Areas of rubbing are present on the golden surfaces along with scratches. Sold as is, no returns. Estimated shipping charge \$45 to \$55.

- 3709** 1932 Whatsoever a Man Soweth. Society of Medalists 5.1. Bronze, 74mm. By Lee Lawrie. Uncirculated. 1970 40th Anniversary Special Issue. Society of Medalists SP2.1. Bronze, Diamond Shape 63.7mm. By Julian Hoke Harris. Uncirculated. The Lawrie medal features an ancient farmer spreading seed on the obverse while the reverse depicts a sickle with wheat and bramble. The patina is a tan-gold. The insert discussing the medal is also contained in this lot. The Harris piece has a lovely diamond shape, with the obverse designs containing miniatures of the earlier grouse design from the series along with the first step on the Moon. The Athenian owl in intaglio-relief adds to the appeal of the reverse. The patina on that piece is also a tan-gold. Sold as is, no returns. Estimated shipping charge \$25 to \$35. (Total: 2 medals)
- 3710** 1932 Aphrodite-Swift Runners. Society of Medalists 6.3. Bronze, 73.3mm. By John Flanagan. Uncirculated. 1959 God Made the Beast. Society of Medalists 60.1. Bronze, 73mm. By Katherine Lane Weems. Uncirculated. Flanagan designed the Washington quarter. This SOM piece includes an elegant beauty on the obverse with a pearl necklace and relay runners passing a torch on the reverse. The deep green-ebony patina is lovely. The Weems medal features a puma in a tree on the obverse and wild geese in flight on the reverse. The patina of that piece is tan-gold. Sold as is, no returns. (Total: 2 medals)

- 3711** 1935 Dr. Mary Chilton Sutton Plaque. Bronze Foundry Cast, 180 x 93mm. By H. Sahler. Uncirculated. The plaque depicts a young girl standing with a spade about to plant a flowering vine. The composition is charming. A deep glossy olive-brown patina adds to the visual appeal. Sold as is, no returns. Estimated shipping charge \$25 to \$35.
- 3712** Circa 1935 Femme Inconnu. Bronze Foundry Cast, 225 x 175mm. By E.K. Nichols. About Uncirculated. A woman's head with a 1930's hairstyle and an intent expression is facing left. The upper corners display curling springs with one fruit each. The field exhibits a criss-cross texture. The patina is a deep glossy brown. Sold as is, no returns. Estimated shipping charge \$35 to \$45.
- 3713** 1935 Charles Weitz New York German Mannerchor 50 Years Service Plaque. Bronze Foundry Cast, 245 x 180mm. By Franz Eue. About Uncirculated. Bust left of the German-American musical great above a 5-line inscription in German hailing the "True Son of his home city... highly honored founder and president in service of German song..." Eue began his career in his native Germany, producing many patriotic medals during World War I, then he migrated to the U.S. where he created designs for the Medallion Art Co. and even placed his name on high-quality play money portraying Franklin Delano Roosevelt. Sold as is, no returns. Estimated shipping charge \$35 to \$45.
- 3714** 1937 Neurologist Henry H. Donaldson, Lenape Club President 80th Birthday Medallion. Bronze Uniface Foundry Cast, 225.6mm. By R. Tait McKenzie. Choice About Uncirculated. The design features the head of the famed neurologist and medical educator. The Lenape Club was a famously exclusive University of Pennsylvania faculty club named for the Delaware Indians. McKenzie was one of America's leading 20th Century sculptors, famous for his studies of athletes. A pleasing glossy olive-brown covers the piece. Sold as is, no returns. Estimated shipping charge is \$35 to \$45.
- 3715** 1938 American Bar Association John Marshall Medal, Two Examples. Cast Bronze, 100.2 and 100.5mm, 5mm Thick. By Laura Gardin Fraser. Extremely Fine to About Uncirculated. A bust of John Marshall, Chief Justice of the U.S. Supreme Court, appears on the obverse of these medals along with the quote, TO THE END MAY IT BE A GOVERNMENT OF LAWS AND NOT OF MEN. A seated Justice wearing a hood, with scales and a sword in her hands, is depicted on the back. The legend above is JUSTITIA. Both examples have plain edges, with the edges being rough on one of the medals. That piece has a green patina on the obverse and mottled browns on the reverse due to partial cleaning. The other example exhibits olive-brown and copper-red patinas on the obverse with areas of green on the reverse. Sold as is, no returns. Estimated shipping charge \$25 to \$35. (Total: 2 medals)
- 3716** 1938 American Bar Association John Marshall Medal, Two Examples. Uniface Cast Bronze, 98.8mm, 3.5mm Thick. By Laura Gardin Fraser. Extremely Fine to About Uncirculated. A bust of John Marshall, Chief Justice of the U.S. Supreme Court, appears on these thinner, uniface medals along with the quote, TO THE END MAY IT BE A GOVERNMENT OF LAWS AND NOT OF MEN. Both examples have plain edges. The pieces display olive-brown and copper-red patinas. Sold as is, no returns. Estimated shipping charge \$25 to \$35. (Total: 2 medals)
- 3717** 1938 Conserve Wildlife. Society of Medalists 18. Silver, 72.5mm. By Gertrude Lathrop. Uncirculated. The obverse design depicts a wood duck while the reverse features a pronghorn (antelope) with a barrel cactus. This is perhaps one of 100 silver pieces struck. The patina is antique. Sold as is, no returns.

1941 Franklin Delano Roosevelt Medallion

1947 Tribute Plaque to Hamilton Fish Armstrong By Paul Manship

3718 1941 Franklin Delano Roosevelt, President of the United States Medallion. Uniface Bronze Cast, 158mm. By Jo Davidson. Uncirculated. A heavy, hammered rim encloses sans-serif name and title while a plain, thin inner rim encloses a distinctive rough-hewn Roosevelt head. The same portrait by Davidson made an appearance on the much smaller 1941 Official Presidential Inaugural Medal, with the intention of suggesting the coinage and sculpture of ancient Greece. Davidson (1883-1952) designed and engraved the FDR Inaugural medals, struck at the U.S. Mint in Philadelphia in 1941 and 1945. This piece displays a deep brown patina and an integral reverse hanger. **Sold as is, no returns. Estimated shipping charge \$25 to \$35.**

3719 1941 National Sculpture Society Lindsey Morris Prize Models for Brenda Putnam's Flight Medal for the Society of Medalists. Plaster, 10 Inch Obverse and Reverse Mounted on a 29 x 14 3/4 Inch Wood Panel. By Brenda Putnam. Extremely Fine. As mounted, the obverse presents a dove flying over clouds with FLIGHT below. The reverse depicts a nude youth with a model airplane and the rising sun at left. Putnam (1890-1975) studied under a number of well-known artists, including Bela Lyon Pratt and James Earle Fraser. She excelled in aviation-related sculptures, including a famous bust of Amelia Earhart. The struck form of these designs became #26 in the Society of Medalists series. In her description of the finished medal, Putnam predicted that air power would determine the outcome of World War II, but emphasized the peaceful images of her medal design. There are two areas of damage at the rim on the reverse that do not impact the design. An attached printed tag identifies these models as Brenda Putnam's entry in the 1943 National Sculpture Society Lindsey Morris Prize competition. **Sold as is, no returns. Estimated shipping charge \$100 to \$150.**

3720 1943 African Watering Hole. Society of Medalists 27.1. Bronze, 73.4mm. By Anna Hyatt Huntington. About Uncirculated. The obverse depicts an elephant feeding. The reverse includes a water hole with zebra, gnu, and warhog present. This is one of the most popular medals from the series. The patina is tan-gold. A few wear marks appear on the reverse. **Sold as is, no returns. Estimated shipping charge \$25 to \$35.**

3721 1946 and 1970 Constance Lindsay Skinner Achievement Awards. Two Examples. Bronze Cast, 99.5mm. Unsigned. About Uncirculated. The obverse of the medals has a free-form, "wind-blown" bust left of Canadian-born writer, critic and poet Skinner. The reverse includes the text, PRESENTED BY THE WOMEN'S NATIONAL BOOK ASSOCIATION, awards in raised letters: AMY LOVMAN 1946 CHARLEMAE H. ROLLINS 1970. Awardees names were integrally cast with the medal. The second example was cleaned around the name. **Sold as is, no returns. Estimated shipping charge \$25 to \$35. (Total: 2 medals)**

3722 1947 Council of Foreign Relations Tribute Plaque to Hamilton Fish Armstrong. Bronze Foundry Cast, 10 1/8 x 8 inches. By Paul Manship. Choice About Uncirculated. The circular roundel bears the logo of the periodical *Foreign Affairs*, a nude horseman with the Latin motto *UBIQUE* which translates as everywhere. A nine-line inscription reads, TO/HAMILTON FISH ARMSTRONG/A TRIBUTE/TO HIS QUARTER CENTURY OF/DISTINGUISHED EDITORSHIP/of FOREIGN AFFAIRS/FROM HIS FRIENDS/IN THE COUNCIL ON/FOREIGN AFFAIRS. Armstrong (1893-1973) began his journalistic career at the *New Republic*. He served as editor of *Foreign Affairs* from 1927-72. Also an author, his numerous books included the best-selling *Hitler's Reich, the First Phase*, published in July 1933. The plaque is mounted on a polished wood base measuring 12 x 9 inches. An identifier on the back indicates this piece was part of the exhibit "Coming Home, a Retrospect of Parrish, Manship, Faulkner, Zorach" at the Cornish Colony Museum in 2006. **Sold as is, no returns. Estimated shipping charge \$35 to \$45.**

Manship (1885-1966) was born in St. Paul, MN on Christmas Day, the son of a Confederate veteran. As was the case with Karl Goetz, Manship preferred the rough finish that resulted from casting medals using the direct casting techniques used for Renaissance medals rather than using the striking method. Many museums and galleries in the U.S. and abroad include his works, including numerous pieces at the Smithsonian American Art Museum. Among his credits is the 1933 Official Inaugural Medal of Franklin Delano Roosevelt.

3723 1948 and 1950 Study Group of D.M. Read Company's Connecticut Yankee Award Medals. Two Bronze Cast Examples and a Plasticene, 77 to 79mm. Unsigned. Uncirculated. The pieces have a common design, with a ragged bust of writer, traveler, critic and wit Mark Twain on the obverse. The reverse contains a cartouche inscribed THE D.M. READ CO., SOUTHERN CONNECTICUT'S LEADING DEPARTMENT STORE. **Sold as is, no returns. Estimated shipping charge \$25 to \$35. (Total: 3 medals)**

3724 1950 Artist's Model for the Obverse of a Medallic Art Company 50th Anniversary Medal. Plaster, 11 3/8 Inches. Unsigned. Uncirculated. A stylized incuse vertical wing appears on a flat field with 10 incuse rays. A modernistic sans-serif 1900-1950 is positioned over the legend, MEDALLIC ART COMPANY below. The plain reverse bears overlapping triangles over REVERSE in blue pencil. The Medallic Art Co. celebrated its 50th birthday in two or more different years based on varying ideas of its actual birth. No medal with this design was actually struck. **Sold as is, no returns. Estimated shipping charge \$100 to \$150.**

- 3725** 1954 Columbia University Bicentennial Presentation Plaque. Bronze, 102.7 x 57.8mm. Unsigned. About Uncirculated. 1967 Columbia University College of Physicians and Surgeons Bicentennial. Bronze Silverplate, 69.8mm. By Abram Belskie. About Uncirculated. The 1954 piece has an obverse featuring learning enthroned, MAN'S RIGHT TO KNOWLEDGE. It was engraved to PERCY URIS '20. The edge reads MEDALLIC ART CO. N.Y. There were four half-ball feet, however one of them is missing. The tan-gold patina displays faint smudges. The 1967 example displays the Goddess Hygeia with a torch and serpent on the obverse and a building façade on the reverse. It is engraved FRITZ J. CRAMER and was struck by the Medallie Art Co. **Sold as is, no returns. Estimated shipping charge \$25 to \$35.**(Total: 2 pieces)
- 3726** 1960 Trio of Mary Ethel Pew-Lankenau Hospital Medals. Bronze and Polygonal Goldplate Uniface, 63.5 and 66mm. By Yarnall. About Uncirculated to Uncirculated. The obverse design is that of the new building of Philadelphia's historic German Hospital, endowed by the Pew family foundation. The reverse of one of the medals includes a stylized tree, HAVING COMPASSION ONE FOR ANOTHER. The other two pieces are uniface, with one displaying the tree design instead of the building. Struck by the Medallie Art Co. An interesting grouping. **Sold as is, no returns. Estimated shipping charge \$25 to \$35.**(Total: 3 medals)
- 3727** Trio of Sports Medals. 1963 International Ice Hockey League World's Championship Medal. Bronze, 59mm. By G. Berard and M. Pineau. Uncirculated. 1975 Broadmoor World Figure Skating Championships Medal. Bronze, 51mm. Medallie Art Co. N.Y. Uncirculated. Undated United States Olympic Committee Medal. Bronze, 50.8mm. Medallie Art Co. N.Y. Uncirculated. The Paris Mint struck the 1963 medal that includes an English and French championship legend. A goalie with a stick in heavy protective gear before a wicket is included in the obverse design. The reverse features the International Ice Hockey League logo. The obverse of the 1975 piece features a view of the Broadmoor, the famed Colorado Springs resort. The reverse has the logo of championships. The undated medal was struck by the Medallie Art Co. The U.S. committee emblem, a shield with Olympic rings appears on the obverse. The back design is that of the Olympic House façade, USOC headquarters. The two older medals are housed in the original boxes. **Sold as is, no returns. Estimated shipping charge \$25 to \$35.**(Total: 3 medals)
- 3728** 1967 Dr. Frank Glenn New York Hospital Plaque. Bronze Uniface, 102.2 x 70mm. By Bryant Baker. Uncirculated. A bust facing ¾ left of the noted cardiovascular specialist Glenn, the first Lewis Atterbury Stimson Professor of Surgery. Stimson performed the first Lister method antiseptic surgery in the U.S. in the 1870s. The piece was struck by the Medallie Art Co. **Sold as is, no returns. Estimated shipping charge \$25 to \$35.**
- 3729** 1971 Damon Runyan Memorial Fund for Cancer Research 25th Anniversary Medal. Nickel-Silver, 63mm. Medallie Art Co. N.Y. Uncirculated. The obverse features a stylized cell along with the inscription below, FOUNDED BY WALTER WINCHELL DEC. 15, 1946. The reverse has a 5-line celebratory inscription. Famed New York writer Runyan (1880-1946) died of throat cancer. The first telethon, hosted in 1949 by Milton Berle, propelled the research foundation. As an award, the recipients of the medals have included Jimmy Breslin, Mike Royko, George Will, and Bob Costas. MEDALLIC ART CO. N.Y. appears on the edge. The medal is housed in the original box. **Sold as is, no returns. Estimated shipping charge is \$25 to \$35.**
- 3730** 1776-1976 Bicentennial Medals, Two Examples. 1967 Washington at Prayer /Pennsylvania Masons. Bronze, 76.2mm. By Donald Harcourt De Lue. Uncirculated. 1972 Home and Country/National Society of the Daughters of the American Revolution. Bronze, 68mm. Uncirculated. A cloaked Washington is praying at Valley Forge on the thick, larger piece. The obverse is high relief. The reverse contains a Masonic symbol at center with two lines of text around the design, including JOHN L. MCCAIN, R.W. GRAND MASTER OF MASONS IN PENNSYLVANIA. The edge includes Medallie Art Co.- Danbury, Conn. A patriot soldier appears in high relief on horseback with HOME and COUNTRY above. He is holding a standing woman's hand while a young boy stands nearby. The reverse design includes a representation of the DAR headquarters, Washington, D.C. The edge displays Medallie Art Co. N.Y. Bronze. **Sold as is, no returns. Estimated shipping charge \$25 to \$35.**(Total: 2 medals)
- 3731** Circa 1976 Daughters of the Cincinnati Medallion and Model. Two Examples. Plaster and Bronze Cast Uniface, 102.4mm, 7.7mm Thick. Unsigned. Uncirculated. The design includes an American eagle with raised wings, a 12-pointed star on the breast bears George Washington's head, the legend DAUGHTERS OF THE CINCINNATI and founding date 1894. The piece has the bold free-form style of the Bicentennial era, 1975-1976. Founded in 1894, membership in this women's group required proof of descent from a Revolutionary War officer qualified for membership in the older Society of the Cincinnati, the organization of veteran officers joined by Washington and Lafayette. The Daughters are still active today with more than 550 members. **Sold as is, no returns. Estimated shipping charge \$25 to \$35.**(Total: 2 pieces)
- 3732** 1915-1960 Introductory Group of American Medals. Sixteen Examples. Bronze, 36.5 to 75.7mm. Extremely Fine to Uncirculated. This lot includes the following pieces: Presidential Inaugural Medals of Eisenhower (2) cleaned, Lincoln cleaned, FDR, and Nixon; Yacht Racing Association of Long Island Sound unissued silver-plated bronze sample with numerous surface disturbances; Virgil Kauffman Medal from the Society of Exploration Geophysicists featuring a high relief portrait of Leonardo Da Vinci on one side and a biplane over mountains on the other side; Pfizer Medical Research Laboratories medal; Canadian International Paper Company (4) unissued 25 and 50 year service medals and loyal service along with a medal in French; Thos. Leeming & Co., Inc. medal; a holed Lucky Penny medal dated 1915 from New York City; an ornately shaped piece with an eagle; and a La Vie Parisienne belt buckle. **Sold as is, no returns. Estimated shipping charge \$35 to \$45.**(Total: 16 medals)
- 3733** 1930-1974 Group of Miscellaneous American Medals. Bronze, 63.5 to 63.5mm. Uncirculated. Medals for Higgins Inks and Adhesives, Cohn-Hall-Marx Company, Instituto de las Espanas, National Association of Manufacturers, Detroit 250th Anniversary, American Legion School Award, First National City Bank 150th Anniversary, Saint Louis University Dubourg Society are contained in this lot. **Sold as is, no returns. Estimated shipping charge \$25 to \$35.**(Total: 8 medals)
- 3734** 1933-1972 Group of American Bronze Medals. Bronze, 63.5 to 76.2mm. Uncirculated. The following five medals are included in this lot: American Watercolor Society Award from 1933 by Georg Lober; Ryan Aeronautical Company 40th Anniversary 1967; American Museum of Natural History Centennial 1969; National Sculpture Society 75th Anniversary 1968 by Thomas LoMedico; and American Eagle, undated, by Marcel Jovine. **Sold as is, no returns. Estimated shipping charge \$25 to \$35.**(Total: 5 medals)

- 3735 1883-1982 American Silver, Bronze and White Metal Medals. Thirteen Examples. 32 to 76mm. About Uncirculated to Uncirculated.** This lot includes the following medals: Brooklyn Bridge, New York 1964 World's Fair in the original box with the descriptive insert, Colorado Springs Centennial, UPS 75th Anniversary in Lucite, three small Hall of Fame for Great Americans at New York University medals (John James Audubon, George Bancroft, and Mark Twain), a reproduced Washington "coin," Presidential Art medals World War II Jimmie Doolittle (.999 silver and bronze), Gen. Curtis LeMay/Hiroshima, and a 1974 MACO Calendar Medal. **Sold as is, no returns. Estimated shipping charge \$35 to \$45.** (Total: 13 medals)

**John Carroll Portrait Medallion
First Catholic Archbishop in the U.S.**

- 3736 Undated Archbishop John Carroll Portrait Medallion. Bronze Foundry Cast, 1 5/8 inches. By J.D. Daley, sc. Choice About Uncirculated.** John Carroll (1735-1815), of Baltimore, MD, served as the first Roman Catholic bishop and archbishop in the United States and founded Georgetown University, the oldest Catholic university in the United States. Archbishop Carroll, depicted in his later years, is wearing clerical garb, with long hair and a stern expression. The medallion exhibits a deep, saddle-brown patina and has a high, three-step rim. The bust is high relief, displaying a boldly sculpted appearance with rugged textured surfaces. Four heavy-duty screw posts, intended for background affixing, appear on the back. **Sold as is, no returns. Estimated shipping charge \$45 to \$55.**

**Undated Europa and the Bull Bronze
by Paul Manship**

- 3737 Undated Europa and the Bull. Uniface Cast Bronze, 145mm. By Paul Manship. Choice About Uncirculated.** Manship created a number of pieces depicting Europa and the Bull, including this example with stylized archaic waves surrounding a recessed center bearing a high-relief scene of three dolphins accompanying the god Zeus in the form of a bull, bearing the nymph Europa across the Mediterranean to Crete. This piece displays pleasing glossy saddle-brown patina. **Sold as is, no returns. Estimated shipping charge \$25 to \$35.**

**Undated Sagittarius in the Hunt Bronze
By Paul Manship**

- 3738 Undated Sagittarius in the Hunt. Uniface Cast Bronze, 147mm. By Paul Manship. Choice About Uncirculated.** Bold, beaded borders enclose a muscular, spirited centaur drawing his bow, with ducks flying overhead and rabbits racing below in inimitable Manship style. The piece exhibits an attractive smooth glossy saddle brown patina. **Sold as is, no returns. Estimated shipping charge \$25 to \$35.**

- 3739 Undated Artist's Models for the George Lane Nichols Medal. Plaster, 9 3/4 to 10 Inches, Mounted on a 24 1/8 x 11 1/2 Wooden Panel. By Alexander Stirling Calder. Extremely Fine.** The obverse shows a boy and dog reclining under a tree. The legend, GEORGE LANE NICHOLS MEDAL, surrounds the design. The reverse bears the legend, RELIABILITY LOYALTY HELPFULNESS COURAGE. Among his many other works, Calder (1870-1945) designed *Dance of Life*, number 17 in the Society of Medalists series. His son was noted modern artist Alexander Calder. A crack extends entirely through the obverse design and a smaller crack also appears. The rims include a few nicks. **Sold as is, no returns. Estimated shipping charge \$100 to \$150.**

Gorgeous Wood Nymph and Ram Plaque

- 3740 Undated Wood Nymph and Ram Plaque. Bronze Foundry Cast, 10 3/4 Inches. Unsigned. About Uncirculated.** A slender nude wood nymph or dryad blows a horn under a gnarled oak, seemingly attracting a running ram with curling horns. The background is mountainous under a rising sun. The plaque displays very high relief and the remarkably heavy gauge metal combines for exceptional eye appeal. The patina is light gold-tan. **Sold as is, no returns. Estimated shipping charge \$35 to \$45.**

- 3741 Undated Woman's Head Medallion. Bronze Foundry Cast, 200mm. By John R. Terken. Uncirculated.** The design features a robust left-facing female head with a distinctly bushy late 1940s or early 1950s hairstyle. The style of the piece is rugged and rough-hewn. The sculptor's career peaked by the early 1960s. The patina is a glossy deep red-brown. **Sold as is, no returns. Estimated shipping charge \$35 to \$45.**

- 3742 Undated Girl's Portrait Head Plaque. Bronze Foundry Cast, 137mm. By Helen Sadler. Extremely Fine.** The wide-eyed young girl's head includes bobbed hair, suggesting the work was performed in the 1930s. The red-tan patina shows some powdery green. **Sold as is, no returns. Estimated shipping charge \$25 to \$35.**

3743 Undated Bearded Rabbi Plaque. Bronze Foundry Cast, 11 ½ x 8 3/8 Inches. By Julia Jones. About Uncirculated. The bust of the right-facing Rabbi in a brimless fur hat and a heavy fur collar displays strong facial features. The incuse signature near the base is only partially legible, and the plaque is otherwise anepigraphic (without a legend or inscription). This is a powerful, relatively high relief portrait of uncertain age with a light brown patina. Sold as is, no returns. Estimated shipping charge \$35 to \$45.

3744 Undated Abraham Lincoln Portrait Plaque. Cast Aluminum, 13 ½ Inches. After George T. Morgan. About Uncirculated. The bearded head facing right from Morgan's Lincoln Presidential Medal of the United States Mint, first struck in 1883, is the design used for this piece. The stippled field accents the high-relief portrait. The back bears integral loops for hanging. Silvery surfaces show a diffuse streak on the forehead. Sold as is, no returns. Estimated shipping charge \$35 to \$45.

3745 Undated Abraham Lincoln Plaque. Bronze Cast, 190 x 145mm Mounted on 220 x 240mm Wooden Shield. Unsigned. About Uncirculated. The bearded right-facing bust of Lincoln in a frock coat is somewhat crudely finished. The wooden shield adds to the attractiveness of the piece. Sold as is, no returns. Estimated shipping charge \$35 to \$45.

**Blood Transfusion Pioneer Dr. Charles R. Drew
By Alida Zilve**

3746 Undated Portrait Plaque of Blood Transfusion Pioneer Dr. Charles R. Drew. Bronze Foundry Cast Rectangle, 13 x 9 ½ Inches, Mounted on a 14 ¼ x 11 ½ Inch Wooden Backing With Heavy Gauge Support Easel. By Alida Zilve. About Uncirculated. Dr. Drew (1904-1950) wearing glasses and a business suit is depicted in a facing bust. He studied at Amherst, McGill, Howard and Columbia Universities. He pioneered perfecting blood transfusions and long-term preservation of blood plasma which he first called "Banked Blood." Dr. Drew established blood banks in the U.S. and England during World War II that saved hundreds of thousands of lives. He died as a result of injuries incurred in an automobile crash in 1950. The persistent story that he was refused medical help by an all-white hospital is an urban legend. Anepigraphic except for the artist's signature. Sold as is, no returns. Estimated shipping charge \$35 to \$45.

3747 France. Bronze Medals of the Second Empire and Republics. Three Examples. About Uncirculated. 1855 Eastern Railway Opening Medal. Bronze, 77.2mm. By Antoine Bovy. Napoleon III's head is facing left on the obverse while the reverse depicts a steam train crossing the Paris-Brest viaduct. A rim ding appears near 6 o'clock on the reverse. 1869 Church of Saint Amboise Inauguration Medal. Bronze, 72.1mm. By Chaplain. The church façade appears on the obverse while the back contains the ornate Arms of Paris. 1874 Palace of Justice Completion Medal. Bronze, 75.1mm. By Lagrange. A bird's eye view of the sprawling complex appears on the obverse. The reverse design features the river goddess with Arms of Paris. All three medals show Bee-CUIVRE edge marks. Also, all display light brown patina and scattered contact marks. Sold as is, no returns. Estimated shipping charge \$25 to \$35. (Total: 3 medals)

3748 1908 Czech Republic Jan Neruda Plaque. Bronze Foundry Cast, 195 x 155mm. By J. Kratina. About Uncirculated. A robust, heavily bearded bust facing in a frock coat of Czech patriotic journalist and writer of brief, pithy feuilletons of the Prague "May School" (1834-1891) appears on this piece. A fervent Czech nationalist, Neruda wrote *Pro starch židovský*, In Fear of the Jews, which echoed the pervasive anti-Semitism of his time. The patina is a deep glossy brown. Sold as is, no returns. Estimated shipping charge \$35 to \$45.

3749 1915 Germany British Copy of the Lusitania Sinking Medal. Kienast 156 Variety. Cast Iron, 55mm. After Karl Goetz. About Uncirculated. Death is selling tickets in the Cunard Line kiosk as a man in the crowd reads a newspaper proclaiming U-BOAT DANGER on the obverse. The German legend BUSINESS BEFORE ALL appears. The reverse displays a steamer loaded with armaments sinking and the legend NO CONTRABAND. Exergue inscription shows the famous British Admiralty error spelling, 5 MAY 1915 in place of the proper MAI. Medalist Goetz initially had the date wrong, but quickly corrected it to 7 MAI. His error was exploited as "proof" that the sinking was premeditated. The medal is housed in the original box showing some handling. The card affixed to the inside cover includes the text, "This indicates the true feeling the War Lords endeavor to stimulate, and is proof positive that such crimes are not merely regarded favourably, but are given every encouragement in the land of Kultur." The medal is lightly oxidized. Sold as is, no returns. Estimated shipping charge \$25 to \$35.

**Judaica
1938 Kristallnacht Medal**

3750 1938 Kristallnacht Medal. Bronze Cast Uniface, 112mm. By Kormis. About Uncirculated. A bearded Jewish victim hangs from a giant swastika bearing the date 1938, year of the "Night of Broken Glass," the nationwide pogrom against German Jews and was also the year of the Anschluss with Austria that was followed by extensive anti-Jewish violence. This highly graphic design was the medallist protest of one of the world's leading Jewish medalists. The piece displays an olive-brown patina with traces of a reverse hanger. Sold as is, no returns. Estimated shipping charge \$25 to \$35.

3751 1980 Finland Tivoli Medal. Bronze, 70.2mm, 6.9mm Thick. By Harry Elstrom. Uncirculated. Storks appear in flight on the obverse while the reverse features a stylized carousel. The edge is inscribed KULTATEOLLISUUS FINLAND UDGIVET AF ANDERS NYBORG A/S DEN 1/5 80 nr. 459/5000. The piece is light gold-tan in color and has a handsome modern style. Elstrom (1906-1993) was a Danish/Belgian sculptor. Sold as is, no returns. Estimated shipping charge \$25 to \$35.

3752 Undated Austria Wolfgang Amadeus Mozart Medallion. Bronze Foundry Cast, 180mm. Unsigned. About Uncirculated. A mature bust facing right of the famed composer in 18th Century garb, an older likeness than usually seen on most medallist portraits of this musical prodigy. A soldered holder is found on the back and traces of edge roughness are noticed. Sold as is, no returns. Estimated shipping charge \$35 to \$45.

3753 Undated Shield of Ancient Warriors. Metallic-Surfaced Plaster, 22 ½ Inches. Extremely Fine. This boldly domed circular shield displays outer and inner circles of ornately linked chain separating a continuous frieze of cavalry, foot soldiers with scimitars and spears, all locked in violent combat from the center with two heroes contending before a turreted castle. The style recalls the Renaissance painters' depiction of Roman soldiers in battle. This commercial reproduction likely dates to the 1940s. The edge displays damage and scattered chips are seen elsewhere. A wire hanger appears on the back. The front is a dull tan-gold and the back is plaster-white. **Sold as is, no returns. Estimated shipping charge \$100 to \$150.**

3754 1888-1950 European Bronze Medals. Five Examples. Extremely Fine-About Uncirculated. 1888 Belgium Nouvel Uccle Festival Medal. Bronze Gilt with Loop, 52mm. The design features a Leopold II head and a severe edge bump appears. 1895 France Uniface Reverse of Louis Pasteur Tribute Medal. Bronze, 68.3mm. 15-line vita. 1900 Poland Cracow Founding 500th Anniversary Medal. Bronze, 67.5mm. By W. Trojanowski. Casimir, Hedwig and Ladislaus appear enthroned with orbs and scepters. The reverse features the Arms of Cracow and two other cities. Olive-brown, struck by the Paris Mint. 1950 Pau Casals and Johann Sebastian Bach Medal. 58mm. By Miquel Paredes. The obverse design is of Casals' head facing left which the reverse has a bust facing in a heavy 18th Century wig. Edge bruises are noticed. 1873-1923 plaquette of Ludwig Newmann. 70 x 55mm. Unsigned. **Sold as is, no returns. Estimated shipping charge \$25 to \$35.** (Total: 5 medals)

3755 Italy. Renaissance Aftercasts and Copies of 16th Century Medals. Five Examples. Bronze, 48.6 to 93.4mm. Fine to Very Fine. This lot contains copies of varying qualities, including heavy medals of Lorenzo the Magnificent of Florence and Giovanni Antonio de Contiguidis, a thin copy of Ercole d'Este II of Ferrara, a Shell of an unidentified ruler, and a crude cast of a Paduan medal of Roman Emperor Pertinax and legionaries. **Sold as is, no returns. Estimated shipping charge \$25 to \$35.** (Total: 5 medals)

COLONIALS

Rare 1662 Oak Tree Twopence Noe-29, W-240, AU53

3756 1662 Oak Tree Twopence AU53 PCGS. CAC. Noe-29, W-240, R.6. The 2 in the date is small and nearly "all loop" with little tail. This diminutive Oak Tree piece has a wavy planchet, but the consistency of detail indicates that the lustrous gold-to-gray surfaces were not bent after striking. The branches of the oak tree are clear. Listed on page 38 of the 2013 *Guide Book*. PCGS# 17

W-530 'Spiny Tree' 1652 Oak Tree Shilling Fine 12, Ephemera Included

3757 1652 Oak Tree Shilling Fine 12 NGC. Noe-14, W-530, Salmon 10-G, R.4. 69.1 gn. A well-worn example of this very scarce type, typically crude edges but great charm on charcoal, violet, and peach surfaces. Faintly luminous with few serious abrasions and interior figures mostly intact. Comes with papers that read: "Aunt Howe (age 78) gave me this Pine Tree [sic] shilling in 1864 or 1865." The unknown writer may be forgiven for the mistaken identity, as the Spiny (Oak) Tree does look remarkably like a Pine Tree device. Listed on page 39 of the 2013 *Guide Book*. PCGS# 20

1652 Oak Tree Shilling, Fine 15 Late Die State Noe-7

3758 1652 Oak Tree Shilling Fine 15 PCGS. Noe-7, W-480, Salmon 5-D, R.5. 66.05 gn. IN at Bottom. A golden-gray and lavender representative. The reverse has pleasing definition throughout. The obverse shows wear on the upper half of the tree due to the natural wave of the rocker press emission. Oval-shaped from mint clips affecting the right obverse and left reverse legends. The die state is late with large right-side breaks, though not as late as Hain:28. The centering allows better study of the breaks near 3 o'clock than is usual for the variety. Listed on page 39 of the 2013 *Guide Book*. PCGS# 20

**Noe-5 1652 Oak Tree Shilling
VF Sharpness, Noe-5**

- 3759** 1652 Oak Tree Shilling — Damaged — NGC Details. VF. Noe-5, W-470, Salmon 3-D, R.2. 70.1 gn. IN at bottom. Once folded diagonally across the trunk of the tree and later straightened. Attractively toned olive-green, caramel-gold, and steel-gray. Mint clips near 7 o'clock give the appearance of a moderately off center strike. The reverse legends are essentially complete. The broad die break at 12 o'clock on the obverse is usual for the Noe variety. Listed on page 39 of the 2013 *Guide Book*. PCGS# 20

**XF45+ 1652 Pine Tree Sixpence
Noe-33, Pellets at Trunk**

- 3760** 1652 Pine Tree Sixpence XF45+ PCGS. Noe-33, W-670, Salmon 2-B, R.3. 68.67 gn. Pellets at trunk. An unabraded walnut-brown and gunmetal-gray example. The tree, date, and denomination are sharp. Somewhat wavy, as coined by a rocker press. Diagnostic for the Noe variety, the obverse is misaligned several degrees toward 12 o'clock. The tops of the reverse peripheral letters are off the flan. A 1960s collector envelope from Florida dealer French's accompanies the lot. Listed on page 39 of the 2013 *Guide Book*. PCGS# 22

**VF30 1652 Pine Tree Shilling
Large Planchet, Noe-10**

- 3761** 1652 Pine Tree Shilling, Large Planchet VF30 PCGS. Noe-10, W-750, Salmon-8 Diii, R.3. 68.67gn. No pellets at trunk. Reversed first N in ENGLAND. An attractive dove-gray example of this 17th century silver type. The peripheral legends are virtually complete, the date and denomination are bold, and the tree shows even detail. Mildly wavy, as made by a rocker press. A 1960s collector envelope from California dealer Abner Kreisberg accompanies the lot. Listed on page 39 of the 2013 *Guide Book*. PCGS# 23

**1652 Large Planchet Pine Tree Shilling
XF, Noe-8.2, Ligatured NE**

- 3762** 1652 Pine Tree Shilling, Large Planchet XF40 PCGS. Noe 8.2, W-740, Salmon 7-E, R.6. 67.90 gn. No pellets at trunk. Ligatured NE, as listed on page 39 of the 2013 *Guide Book*. A late state of Noe-8 with a break beneath the GL in ENGLAND along with other reverse legend crumbling. A pleasing silver-gray example with essentially complete legends and minor edge irregularities, as coined, near 6 and 12 o'clock. Slightly wavy, as produced. An Abner Kreisberg collector envelope accompanies the lot. PCGS# 23

**Midgrade Pine Tree Shilling, VF30
Small Planchet, Noe-19**

- 3763** 1652 Pine Tree Shilling, Small Planchet VF30 PCGS. Noe-19, W-850, Salmon 5-B, R.5. 69.91 gn. This midgrade small planchet shilling exhibits complete legends and mark-free surfaces. Pearl-white at the centers with deeper gray at the peripheries. Crisply struck save for the left-side branches of the tree and the second I in the denomination. Listed on page 39 of the 2013 *Guide Book*. PCGS# 24

**XF Noe-29 Small Planchet
1652 Pine Tree Shilling**

- 3764** 1652 Pine Tree Shilling, Small Planchet XF40 PCGS. Noe-29, W-930, Salmon 11-F, R.3. 68.36 gn. The D in ENGLAND is entered over a reversed D, and the M in repunched. A walnut-brown example with hints of steel-blue along the lower obverse border. The central design elements are bold, though the strike is a bit soft near 6 o'clock on each side where the flan was thinner. Mint-made clips affect the tops of NEW though the legends are otherwise complete. Listed on page 39 of the 2013 *Guide Book*. PCGS# 24

**Rare Lord Baltimore Maryland Sixpence
Choice XF, W-1060**

- 3765 (1659) Lord Baltimore Sixpence XF45 PCGS. CAC. H. 2-C, W-1060, R.5.** Cecil Calvert was the second Lord Baltimore and inherited the Maryland colony. Likely in response to the silver coinage in nearby Massachusetts, Calvert struck four denominations in England circa 1659 for distribution in America. England's Puritan government arrested Calvert on October 4, 1659, and seized his workshop implements. Calvert must have escaped lasting punishment since he lived until 1675, but no more coins were struck for his colony.

Today, surviving examples of the different varieties range from very scarce to extremely rare. On the present piece, the dove-gray fields and devices are framed by apple-green and lilac toning. Luster emerges from the legends and shield. Neither side has any visible marks. An important example of this very scarce Colonial silver type. Listed on page 40 of the 2013 *Guide Book*. Population: 10 in 45, 13 finer (11/12). PCGS# 33

**AU53 Saint Patrick's Farthing
Breen-208, W-11500
Rich Color, Large Splasher**

- 3766 (1670-75) St. Patrick Farthing AU53 NGC. Breen-208, W-11500.** A slightly off-center strike with the uppermost parts of the design missing but all letters readable. Deep brown surfaces are largely unmarked, while the caramel-olive brass splasher reaches from the top ornament of the crown to the harp in the king's hands. A desirable example of this centuries-old issue. Listed on page 41 of the 2013 *Guide Book*. PCGS# 42

**Choice VF St. Patrick Halfpenny
Vlack 1-A**

- 3767 (1670-75) St. Patrick Halfpenny VF35 PCGS. Vlack 1-A, W-11540.** Much scarcer than their farthing counterparts, the St. Patrick halfpennies were struck in England and later imported to New Jersey by Mark Newby in 1681. The present Choice VF piece is high grade for the issue. Even chocolate-brown toning drapes minimally abraded and minutely granular surfaces. The brass splasher overlies the right half of the crown. Listed on page 41 of the 2013 *Guide Book*. Population: 9 in 35, 6 finer (11/12). PCGS# 46

**Thick Planchet London Elephant Token
MS62 Brown, W-12040**

- 3768 (1694) London Elephant Token, Thick Planchet MS62 Brown PCGS. Hodder 2-B, W-12040, R.2.** London Elephant tokens are collected by early American numismatists because of their connection to the very rare Carolina and New England varieties, two of which share the same obverse die. The present evenly struck example has consistent chocolate-brown toning. The pachyderm and legends shimmer with luster. Smooth aside from a few delicate faded marks on the upper obverse field. Listed on page 46 of the 2013 *Guide Book*. PCGS# 55

**Rare LON DON Elephant Token
VF Details, W-12060**

- 3769** (1694) London Elephant Token, LON DON — Smoothed — PCGS Genuine. VF Details. Hodder 2-D, W-12060, High R.6. Much rarer than the usually encountered Hodder 2-B, the “D” reverse is interesting for the removal of any reference to GOD. The chocolate-brown surfaces are glossy from cleaning but there are no obvious areas of smoothing. Unabraded though the edge is flawed near 7:30. Listed on page 46 of the 2013 *Guide Book*. PCGS# 67

- 3770** Undated Rosa Americana Twopence, Label AU55 PCGS. M. 2.1-B.1, W-1322, R.3. An olive-brown example of this early Rosa Americana variety. Satin luster emerges from the devices and margins. The fields are mildly glossy and show minimal contact though occasional minuscule flan voids are present. Listed on page 42 of the 2013 *Guide Book*. PCGS# 92

**1722 Rosa Americana Twopence, W-1326
MS62 Brown, Period After REX**

- 3771** 1722 Rosa Americana, Period After REX MS62 Brown PCGS. M. 3.12-C.2, W-1326, R.3. Stop after REX. The 1722 twopence has only two die varieties and is scarce. The other variety, M. 4.4-C.1, has no stop after REX, so each receives a separate listing on page 43 of the 2013 *Guide Book*. A well struck walnut-brown representative with only a single minor mark, located near the date. As of (11/12), PCGS has certified only two pieces above the MS60 level, the present coin and another MS62 Brown example under PCGS #116. PCGS# 149

**Martin 4.1-E.1 MS62 Brown
1723 Rosa Americana Twopence**

- 3772** 1723 Rosa Americana Twopence MS62 Brown PCGS. M. 4.1-E.1, W-1346, R.4. No stop after REX or the date. An intricately struck medium brown twopence that appears essentially void of marks, though unimportant strike throughs (as coined) are above the right scroll end and near the R in ROSA. Scarcer than the Stop after REX Whitman variety. Listed on page 43 of the 2013 *Guide Book*. PCGS# 128

- 3773** 1773 Virginia Halfpenny, Period MS63 Red and Brown PCGS. CAC. N. 22-S, W-1550, R.5. A rising die crack on the obverse exergue aids the attribution of this better Newman variety. Traces of glowing mint red luster fill protected areas of this otherwise dark brown example. Devoid of abrasions, and listed on page 45 of the 2013 *Guide Book*. PCGS# 241

**Famous 1776 Continental Dollar
CURRENCY, Pewter, N. 2-C**

- 3774** 1776 Continental Dollar, CURRENCY, Pewter PCGS Genuine. Newman 2-C, W-8455, R.3. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has rim damage and scratches. This medium to dark gray example has a small, slightly curved clip at 12 o'clock and there is a trio of faded thin marks near the sundial. Peripheral areas exhibit granularity. A very scarce and important type, likely intended to replace the dollar denomination of continental currency paper money. Listed on page 85 of the 2013 *Guide Book*. PCGS# 794

**1787 Massachusetts Half Cent
Ryder 4-C, MS64 Brown**

- 3775** 1787 Massachusetts Half Cent MS64 Brown PCGS. CAC. Ryder 4-C, W-5940, R.2. This attractive Choice example offers glossy brown surfaces with no mentionable contact marks. The centers of both sides show just a touch of softness, but the coin is well-detailed in most areas. Listed on page 59 of the 2013 *Guide Book*. Population: 20 in 64 Brown, 10 finer (5/12). PCGS# 296

**Rare VF Details 1787 Excelsior Token
Eagle on Globe Facing Left, W-5785**

- 3776** 1787 New York Excelsior Copper, Eagle Left — **Environmental Damage** — PCGS Genuine. VF Details. Breen-980, W-5785, R.6. All Excelsior token varieties are very rare. These are associated with New York, since the obverse depicts the New York Coat of Arms and the reverse eagle is reminiscent of the extremely rare Brasher doubloons. The present olive-brown and copper-red example exhibits substantial design detail but has rough surfaces, particularly on the reverse and the obverse periphery. Listed on page 64 of the 2013 *Guide Book*.
Ex: U.S. Public Auction (Lester Merkin, 11/1968), lot 77. PCGS# 427

**Choice XF 1786 Vermont Copper
VERMONTENSIMUM, Ryder-7**

- 3777** 1786 Vermont Copper, VERMONTENSIMUM XF45 PCGS. RR-7, Bressett 5-E, W-2025, R.3. This chocolate-brown Landscape copper has ideal centering with full, sharp legends. The types are bold with the exception of the plow, which is affected by the sinking obverse die usual for Ryder-7. We note a small obverse rim bump at 3 o'clock and moderate granularity on the reverse and upper right obverse. A few faint thin marks are northwest of the plow and the reverse has a minor flan striation. Listed on page 72 of the 2013 *Guide Book*. PCGS# 545

**AU Cross After Date 1787 Fugio Cent
No Cinquefoils, UNITED STATES, N. 1-B**

- 3778** 1787 Fugio Cent, UNITED STATES, No Cinquefoils AU50 PCGS. N. 1-B, W-6600, R.4. The obverse die, sans cinquefoils but with a cross after the date, previously struck the extremely rare N. 1-CC pattern. It appears the obverse die then became part of the regular inventory. In due course it was paired with a nondescript UNITED STATES reverse to create the present scarce variety. A smooth chocolate-brown example with pleasing sharpness and overlapping sets of bold clash marks on the fields. Listed on page 87 of the 2013 *Guide Book*. PCGS# 880

- 3779** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF40 PCGS. N. 16-N, W-6925, R.3. Mostly walnut-brown with blushes of dark gray along the left obverse border. Essentially unabraded, though minor laminations (as made) are at 1 o'clock on the obverse and 7 o'clock on the reverse. Listed on page 87 of the 2013 *Guide Book*. PCGS# 883

- 3780** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays AU55 PCGS. N. 13-X, W-6855, R.2. Medium brown to chocolate-brown with smooth, problem-free surfaces. The left border is softly brought up due to the die alignment. Struck from clashed dies and housed in a green label holder. Listed on page 87 of the 2013 *Guide Book*. PCGS# 883

- 3781** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays AU55 NGC. N. 8-X, W-6750, R.3. The obverse has lavender toning and the reverse is golden-brown. Sharply struck and unabraded with luster on the motifs and legends. The late die state with an obverse break at 6 o'clock. Listed on page 87 of the 2013 *Guide Book*. PCGS# 883

**MS62 Brown 1787 Fugio Cent, N. 13-X
Pointed Rays, STATES UNITED**

- 3782** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS62 Brown NGC. N. 13-X, W-6855, R.2. A lovely golden-brown representative. Satin luster traverses boldly struck and unblemished surfaces. Planchet striations are nearly absent, though slight granularity is present near ARE and between the rings at 11:30. Almost certainly once part of the Bank of New York holdings. Listed on page 87 of the 2013 *Guide Book*. PCGS# 883

**1787 N. 12-X Fugio Cent, MS64 Brown
Popular Hoard Variety for Type Collectors**

- 3783** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS64 Brown PCGS. CAC. N. 12-X, W-6820, R.3. Clashed dies exhibit delicate die cracks on each side of this impressive Gem. Chocolate-brown surfaces exhibit strong cartwheel luster with considerable original faded orange mint color and hints of iridescence. Certainly a Bank of New York hoard piece. Listed on page 87 of the 2013 *Guide Book*. Population: 70 in 64 (3 in 64+) Brown, 9 finer (12/12). PCGS# 883

**MS64+ Brown 1787 Fugio Cent
Pointed Rays, STATES UNITED, N. 13-X**

- 3784** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS64+ Brown PCGS. CAC. N. 13-X, W-6855, R.2. The deep brown toning offers gunmetal-blue undertones. A crisply struck and satiny near-Gem that boasts remarkably undisturbed surfaces. No marks are visible and any planchet granularity is minor and confined to the lower obverse border. Struck from clashed dies. Listed on page 87 of the 2013 *Guide Book*. PCGS# 883

**MS66 Red and Brown 1787 Fugio Cent
N. 8-B, UNITED STATES, Pointed Rays**

- 3785** 1787 Fugio Cent, UNITED STATES, Cinquefoils MS66 Red and Brown NGC. N. 8-B, W-6740, R.3. Glimpses of mint red fill the legends and sundial and outline the rings. The devices are light chestnut-brown. The lower obverse and upper reverse are not fully struck, which is the situation for most examples seen since the dies were slightly misaligned. A splendidly preserved representative of this interesting die marriage. A curly lintmark (as made) near the AT in STATES will identify this piece in any future auction appearances. Struck from a boldly clashed reverse die, as is usual for the variety. Listed on page 87 of the 2013 *Guide Book*.
Ex: Ft. Lauderdale FUN Signature (Heritage, 1/2005), lot 6942, which realized \$6,037.50. PCGS# 890

- 3786** 1787 Fugio Cent, STATES UNITED, Raised Rim VF30 PCGS. N. 19-Z, W-6975, R.5. The Raised Rim reverse was probably a pattern die as it has a different ring lettering style and was once paired with the Cross after Date pattern obverse (N. 1-Z). Later it went into general use and ended up mated with two regular obverses (12 and 19). The mahogany-brown surfaces are well-detailed but show pitting on the sun and thin marks through WE ARE. Listed on page 87 of the 2013 *Guide Book*. PCGS# 895

**AU 1787 Eight-Pointed Stars Fugio Cent
Conditionally Scarce, Newman 15-Y**

- 3787** 1787 Fugio Cent, STATES UNITED, Eight-Pointed Stars AU50 PCGS. N. 15-Y, W-6915, R.2. The sole die pairing for this departure from stereotypy. Perhaps the die maker could not locate the incuse cinquefoil punch but found a reasonable substitute. A mark-free chocolate-brown example with a good strike except on the obverse border near 10 o'clock and opposite at 8 o'clock. A high grade for the variety. Listed on page 88 of the 2013 *Guide Book*. Population: 8 in 50, 3 finer (11/12). PCGS# 898

**1787 Club Rays, Rounded Ends Fugio Cent
Newman 4-E, AU50**

- 3788** 1787 Fugio Cent, Club Rays, Rounded Ends AU50 NGC. N. 4-E, W-6685, R.3. A dark brown example of this conditionally challenging Fugio type. Well defined, void of marks, and without planchet detractors aside from minor flan granularity on the reverse rings between 10 and 11 o'clock. Struck a few degrees off center toward 3 o'clock. Listed on page 88 of the 2013 *Guide Book*. PCGS# 904

**XF Details 1783 Chalmers Shilling
Short Worm, W-1785**

- 3789** 1783 Chalmers Shilling, Short Worm — Cleaning — PCGS Genuine. XF Details. Breen-1011, W-1785, High R.4. Though designated as cleaned by PCGS, the stone-gray surfaces of this scarce Chalmers variety will nonetheless appeal to many collectors. Marks are minimal and the flan shows only minor imperfections. Maryland silversmith John Chalmers struck a series of silver issues to replace worn-out Spanish-American coinage in commerce. Listed on page 51 of the 2013 *Guide Book*. PCGS# 596

AU Sharpness Bar Cent, W-8520
Mysterious Post-Revolutionary Issue

- 3790** (1785) Bar Copper — Cleaning — PCGS Genuine. AU Details. Breen-1145, W-8520. All diagnostics for this popular early American private issue are present, such as the spur from the end of the second bar, the vertical die crack near the reverse center, and the A over the S over the U. The high points are brown, as expected, but the fields are a shade of bright peach-red incompatible with brief circulation. Listed on page 74 of the 2013 *Guide Book*. PCGS# 599

- 3791** (1792-94) Kentucky Token, Engrailed Edge AU55 PCGS. CAC. Breen-1162, W-8805, R.6. Different references refer to the edge as reeded, gripped, or engrailed. Much rarer than the usual Plain Edge variety. A medium brown piece with slight wear on CAUSE and a trivial fingerprint beneath the scroll. A thin mint-made lamination crosses the obverse between 10:30 and 1:30. The die alignment is close to medal turn. A loupe reveals only minor obverse contact. Ex: Orlando FUN Signature (*Heritage*, 1/2007), lot 220, which realized \$1,380. PCGS# 617

Rare Engrailed Edge Kentucky Token
MS64 Brown, W-8805

- 3792** (1792-94) Kentucky Token, Engrailed Edge MS64 Brown PCGS. CAC. Breen-1162, W-8805, R.6. Diagonal reeding on the edge distinguishes W-8805 from the comparatively common plain edge W-8800. This Choice “cent” token retains its initial orange-gold color within the legends and motifs but the fields and high points are medium brown. One small spot to the right of the scroll. A loupe reveals only minor obverse contact. Listed on page 75 of the 2013 *Guide Book*. PCGS# 617

- 3793** (1792-94) Kentucky Token, LANCASTER Edge MS64 Brown NGC. CAC. Breen-1156, W-8810, R.5. Deep chocolate-brown fields and high points cede to the initial orange-gold color within design elements. Exemplary despite a single horizontal hair-thin obverse flan flaw. Struck with close to medal turn, unusual for the variety. Listed on page 75 of the 2013 *Guide Book*. PCGS# 623

PR65 Red and Brown Fuld-4
1794 Talbot, Allum & Lee Cent

- 3794** 1794 Talbot, Allum & Lee Cent PR65 Red and Brown PCGS. CAC. Fuld-4, W-8590. Small ampersand above YORK. Circulation finish Talbot, Allum & Lee cents are the most available 18th century U.S. merchant tokens, but proofs are seldom encountered, especially with ample mint red. Orange-red fills the legends and the ship's rigging, while the open fields are toned steel-blue. Precisely struck and essentially void of marks. The quality is exceptional despite the occasional subtle russet spot. Listed on page 76 of the 2013 *Guide Book*. Ex: Phoenix ANA Signature (*Heritage*, 3/2008), lot 97, where it brought \$9,775. PCGS# 90635

- 3795** 1796 Castorland Medal, Gold MS60. 24.34gm. The Paris Mint continues to produce restrikes of these medals, which bear edge-stamping reading ARGENT for silver, OR for gold, CUIVRE for copper, and BRONZE for bronze. This piece bears the OR stamp on the plain edge along with what appears to be the cornucopia stamp along with the number 3. The original pieces have an unbroken reeded edge. This example displays a thin die crack extending from the rim near the last A in AMERICANA that curves down to the top of the lettering and then returns back to the rim near the I in COLONIA. A small area of rim and edge damage appears to the left of the Paris Mint stamp near the M in FRUGUM on the reverse. PCGS# 653

PR64 Cameo Silver Restrike
1783 Draped Bust Washington Cent
Engrailed Edge, Baker-3A

- 3796** 1783 Washington & Independence Cent, Draped Bust, No Button, Engrailed Edge, Silver Restrike PR64 Cameo PCGS. Baker-3A, W-10380, R.6. The well-made W.S. Lincoln “No Button, Large 3” silver restrike, produced during the mid-19th century from copy dies with thick legends. They are often confused with the W.J. Taylor restrikes (Baker-3C) of the same era, identified by slender lettering and a Small 3 in the date. The present Baker-3A example has flashy fields and only a hint of gold toning. The portrait shows minute die rust and the field near the chin has a pair of minor flan flaws, all as made. Listed on page 80 of the 2013 *Guide Book*. PCGS# 688

**1791 Washington Cent, MS63 Brown
Baker-15, Large Eagle Reverse**

3797 1791 Washington Large Eagle Cent MS63 Brown PCGS. Baker-15, W-10610, R.2. Glossy surfaces exhibit lovely dark brown toning with splashes of reddish patina. This lovely Select Mint State Washington piece has reflective fields with bold detail, save for the usual weakness in Washington's hair behind the forehead. Listed on page 81 of the 2013 *Guide Book*. Population: 24 in 63 Brown, 29 finer (12/12). PCGS# 702

3798 1791 Washington Small Eagle Cent AU55 NGC. Baker-16, W-10630, R.3. A lightly circulated dark brown representative of this popular British-made Washington variety. A small reverse rim ding at 5:30 provides an identifier. Listed on page 81 of the 2013 *Guide Book*. PCGS# 705

3799 1791 Washington Small Eagle Cent AU55 PCGS. CAC. Baker-16, W-10630, R.3. A sharp medium brown representative that retains ample satin luster. The rims and Washington's collar display subtle marks. A well-made Westwood Mint issue that served as a prototype for the rare Peter Getz patterns. Listed on page 81 of the 2013 *Guide Book*. PCGS# 705

**Rare Plain Edge Liberty and Security
1795 Washington Halfpenny
AU55, Baker-31C**

3800 1795 Washington Liberty & Security Halfpenny, Plain Edge AU55 PCGS. CAC. Baker-31C, W-11000, High R.6. A very scarce Washington variety. Toned medium brown with mahogany undertones. Unabraded and attractive with a typical strike and a few tiny aqua spots. The flan diameter is slightly undersized, as often seen for the issue, with portions of SECURITY and the date off the flan. Listed on page 84 of the 2013 *Guide Book*. Population: 3 in 55, none finer (11/12). PCGS# 752

**George Washington Funeral Urn Medal
White Metal, Baker-166C, AU58**

3801 (1800) Washington Funeral Urn Medal, White Metal AU58 PCGS. Baker-166C, Die Variety 3-C2. Jacob Perkins of Newburyport, Massachusetts, was the engraver for the Funeral Urn medals. These invariably have small holes near 12 o'clock, as they were intended to be worn at George Washington's funeral procession. The present cream-white representative is evenly struck with substantial luster and tiny marks on the right reverse. PCGS# 789

**Bronze Libertas Americana Medal
Betts-615, AU Details**

3802 (1783) Bronze Libertas Americana Medal — Smoothed — PCGS. AU Details. Betts-615. Designated as the #1 item in the 100 *Greatest American Medals and Tokens* reference, the Libertas Americana medal had a remarkable influence on American coinage. The obverse of the 1793 half cent, in particular, is derived from the medal. Commissioned by Benjamin Franklin and struck at the Paris Mint. The present chocolate-brown example possesses substantial eye appeal, but has been cleaned and the right obverse field is smoothed near the trailing curls. Listed on page 90 of the 2013 *Guide Book*. PCGS# 151815

HALF CENTS

Very Fine 1793 Half Cent Cohen-1, First Variety Struck

- 3803** 1793 VF20 NGC. C-1, B-1, High R.3. Manley Die State 2.0. Cohen-1 was the first half cent variety struck, and is also the scarcest of the four die varieties from that initial year. HALF CENT is softly defined, as usual for C-1, but the remainder of the legends are crisp. The medium brown surfaces are only minutely granular and lack any remotely relevant abrasions. Our EAC grade VG10. NGC ID# 2222, PCGS# 1000, CoinPlex ID# HFC1793BN

1793 Half Cent, VF20 C-2, B-2

- 3804** 1793 VF20 NGC. C-2, B-2, R.3. A well-defined deep brown representative of this single-year introductory type. Liberty would face right on the 1794 half cents to match the large cent design. Struck from moderately rotated dies, the present coin is free from the slightest corrosion and has an unabraded reverse. The obverse displays only a few faded hair-thin marks. Our EAC grade VG10. From *The Hilltop Collection*. NGC ID# 2222, PCGS# 1000, CoinPlex ID# HFC1793BN

Very Fine 1794 Half Cent C-4a, B-6b

- 3805** 1794 VF20 PCGS. C-4a, B-6b, R.3. Manley Die State 3.0. The Small Letters Edge subvariety. The usual die state for the variety with prominent clash marks and a sizeable field bulge to the left of the date. Toned tan-brown overall with glimpses of mahogany-red. Void of abrasions, though mildly granular on portions of the right-side margins. Our EAC grade Fine 12. PCGS# 1004, CoinPlex ID# HFC1794RB

- 3806** 1795 Lettered Edge Fine 15 NGC. CAC. C-1, B-1, R.2. Manley Die State 1.0. This medium brown half cent has clear legends, even wear, and generally attractive surfaces. Marks are mostly inconsequential, though we note a tick on the neck and a single thin line near the right ribbon end. Our EAC grade VG8. NGC ID# 2224, PCGS# 1009, CoinPlex ID# HFC1795POLELEBN

- 3807** 1802/0 Reverse of 1802 Good 4 PCGS. C-2, B-2, R.3. Manley Die State 4.0 with die rust at the borders. A dark brown representative of this much better half cent date. The date is bold, including the underdigit 0, which HALF CENT and the numerator are faint, usual for the later die state. A couple of parallel marks noted on the lower bust. Our EAC grade AG3. PCGS# 1057, NGC ID# 222D, CoinPlex ID# HFC1802OVR0R1802BN

1802/0 C-2, B-2 Half Cent, Fine 15 Reverse of 1802, Cohen Plate Coin

- 3808** 1802/0 Reverse of 1802 Fine 15 PCGS. C-2, B-2, R.3. The first edition Cohen plate coin, although not part of the Cohen Collection that Superior sold in February 1992. Even though this coin has been "known" since 1971, we are unable to determine a provenance. This piece has olive and light brown toning with far above-average surfaces and strike for an 1802. Our EAC grade VG10. PCGS# 1057, NGC ID# 222D, CoinPlex ID# HFC1802OVR0R1802BN

- 3809** 1802/0 Reverse of 1802 — Environmental Damage — NGC Details. VF. C-2, B-2, R.3. Manley Die State 2.0. All legends are bold except for the E in CENT. The deep walnut-brown surfaces are intermittently granular and minor field marks are noted near the chin. A much better date. Our EAC grade VG10. NGC ID# 222D, PCGS# 1057, CoinPlex ID# HFC1802OVR0R1802BN

- 3810** 1804 Plain 4, No Stems MS62 Brown NGC. C-13, B-10, R.1. Manley Die State 2.0. A glossy golden-brown representative that has a good strike and only a single remotely mentionable mark, a thin line near the N in UNITED. No Stems varieties are known for the consecutive dates 1804, 1805, and 1806. Our EAC grade AU50. NGC ID# 222F, PCGS# 1063, CoinPlex ID# HFC1804BN

**1804 C-13, B-10 Half Cent, MS65 Brown
Plain 4, No Stems
Tied for Finest at PCGS**

- 3811 1804 Plain 4, No Stems MS65 Brown PCGS. C-13, B-10, R.1.** In addition to the half cent, denominations coined during the year, with the 1804 date, were the large cent, dime, quarter, quarter eagle, half eagle, and eagle. While the half cent is common, all others are scarce or rare. Of course, we didn't mention the silver dollar, as they were not minted until the 1830s.

The Plain 4, No Stems variety is frequently encountered, although Gem specimens are rare. This piece, housed in a green-label PCGS holder, has frosty cartwheel surfaces with olive and chestnut surfaces showing pale blue highlights. The surfaces are pristine. Our EAC grade MS63. Population: 3 in 65 Brown, 0 finer (12/12). PCGS# 1063, NGC ID# 222F, CoinPlex ID# HFC1804BN

- 3812 1804 Crosslet 4, Stems AU58 NGC. C-10, B-9, R.1.** Manley Die State 3.0. Lustrous and sharply struck with glossy deep golden-brown and aquamarine toning. This half cent would likely have received a Mint State designation were it not for a thin vertical mark near the neck and a reverse pinscratch between 9 and 11 o'clock. Housed in a prior generation holder. Our EAC grade VF30. *From The Richmond Hill Collection.* NGC ID# 222F, PCGS# 1069, CoinPlex ID# HFC1804CR4STBN

- 3813 1805 Small 5, Stems — Tooled — NGC Details. VG. C-3, B-3, R.4.** Manley Die State 2.0 with a conspicuous bulge (as struck from a sunken die) on the field near the profile. This well-worn half cent has surprisingly good eye appeal for a low grade piece, and lacks the usual heavy roughness seen on this issue, with only a slight corrosion spot near the date. The surfaces are pleasing despite a few small marks that are expected for the grade, including a minor pedigree mark in the obverse field below the hair ribbon. Both sides exhibit pleasing olive-brown color throughout. The normal die bulge in the right obverse field is minimally advanced, and that is likely the feature that prompted the "Tooled" description from NGC, even though it is as struck. Our EAC grade Good 4. NGC ID# 222H, PCGS# 1087, CoinPlex ID# HFC1805S5STBN

- 3814 1806 Small 6, No Stems MS62 Brown PCGS. C-1, B-3, R.1.** A minimally abraded medium brown representative that displays glimpses of lighter golden-brown toning at the borders. A good strike despite softness on the bust tip and the AM in AMERICA. Struck from clashed dies, as always for Cohen-1. Our EAC grade AU55. PCGS# 1093, NGC ID# 222J, CoinPlex ID# HFC1806S6BN

**1806 C-1, B-3 Half Cent, MS63 Brown
Small 6, No Stems**

- 3815 1806 Small 6, No Stems MS63 Brown NGC. C-1, B-3, R.1.** The sharp strike provides nearly full design motifs with bold hair and drapery details on the obverse, and strong leaf details on the reverse. Satin surfaces combine olive and chocolate patina with hints of pale green toning near the borders. Our EAC grade MS60. NGC ID# 222J, PCGS# 1093, CoinPlex ID# HFC1806S6BN

**MS64+ Brown 1806 Half Cent
No Stems, Small 6, C-1**

- 3816 1806 Small 6, No Stems MS64+ Brown NGC. C-1, B-3, R.1.** A lovely near-Gem that exhibits sweeping luster and undisturbed golden-brown and gunmetal-gray surfaces. The strike is sharp aside from the bust tip and the opposite leaf tips. The sole No Stems variety for the date. An excellent value relative to the few pieces graded finer. Our EAC grade MS60.. NGC ID# 222J, PCGS# 1093, CoinPlex ID# HFC1806S6BN

**Choice Good 1809 Half Cent
Rare C-1 Variety**

- 3817 1809 Good 6 PCGS. C-1, B-2, FS-301, High R.5.** Manley Die State 2.0. This rare variety half cent is toned dark brown and displays bold legends. Minutely granular throughout but no marks are noticeable. The reverse is moderately misaligned toward 1 o'clock. Accompanied by an attribution card by EAC member and numismatic author J.R. Grellman. Our EAC grade Good 5. PCGS# 1123, NGC ID# 222P, CoinPlex ID# HFC1809BN

**1809 C-4, B-1 Half Cent, AU58
Repunched 0**

- 3818 1809 Circle AU58 PCGS. C-4, B-1, R.3.** The two dies were imperfectly aligned in the press, so that the obverse appears properly centered and the reverse appears slightly off center. This lustrous steel and chestnut-brown half cent has excellent eye appeal. Our EAC grade AU50. Population: 1 in 58, 2 finer (11/12). PCGS# 1129, NGC ID# 222P, CoinPlex ID# HFC1809SMOIN0BN

- 3819 1851 MS64 Red NGC. C-1, B-1, R.1.** A lustrous peach-gold Choice type coin. Smooth aside from minor reverse rim marks at 3:30. An outstanding numismatic value when compared with Carson City double eagles. Census: 4 in 64 Red, none finer (12/12). Our EAC grade MS63. NGC ID# 26YW, PCGS# 1226, CoinPlex ID# HFC1851RD

- 3820 1855 MS64 Red PCGS. C-1, B-1, R.1.** The peach-red color is seamless aside from a blush of mauve patina near the BER in LIBERTY. Lustrous and lightly abraded with well struck centers and softly impressed dentils. Certified in an old green label holder. Our EAC grade MS63. PCGS# 1235, NGC ID# 26YZ, CoinPlex ID# HFC1855RD

**Red Gem 1855 Half Cent
C-1, B-1**

- 3821 1855 MS65 Red PCGS. C-1, B-1, R.1.** Remarkably fresh reddish-orange luster characterizes this Red Gem that shows only minor flyspecks. A small abrasion on Liberty's neck is well within the bounds of the grade. An attractive piece that is housed in a green label holder. Our EAC grade MS65. From The Richard P. Ariagno, M.D. Collection. PCGS# 1235, NGC ID# 26YZ, CoinPlex ID# HFC1855RD

LARGE CENTS

**Good Details AMERICA
1793 Chain Cent, S-3**

- 3822 1793 Chain AMERICA — Environmental Damage — Genuine PCGS. Good Details. S-3, B-4, Low R.3.** All four date digits are easily readable on this scarce first-year type coin. STATES OF is faint, but the fraction is clear, and the remaining legends are bold. The deep brown surfaces are granular, as expected for a well circulated Chain cent, but there are no detrimental abrasions. Our EAC grade Good 4. From The Hilltop Collection. PCGS# 1341, NGC ID# 223F, CoinPlex ID# LGC1793CHAINAMERICABN

**VG Details 1793 Chain Cent
AMERICA, Sheldon-3**

- 3823 1793 Chain AMERICA — Rim Damage — PCGS Genuine. VG Details. S-3, B-4, Low R.3.** Blended medium brown and steel-blue embrace this collectible Chain cent. Rim dings near the date and on the obverse at 10 o'clock affirm the PCGS notation. A few faded pin scratches are also noted near the profile and beneath the E in UNITED. Mild granularity is mostly confined to the obverse. The date and LIBERTY are bold, as are all reverse legends aside from OF, which is readable but faint. Our EAC grade Good 4. PCGS# 1341, NGC ID# 223F, CoinPlex ID# LGC1793CHAINAMERICABN

**Head of 1793 S-20b 1794 Cent
VG Details, Large Edge Letters**

- 3824 1794 Head of 1793 — Environmental Damage — PCGS Genuine. VG Details. S-20b, B-4b, High R.4.** The large edge letters are visible through the recent-generation PCGS holder. A granular area between the right ribbon loop and the I in AMERICA corresponds to the PCGS designation. The deep tan brown surfaces are generally attractive though some smoothing is noted near the E in LIBERTY and opposite on the fraction denominator. Our EAC grade good 6. PCGS# 1362, NGC ID# 223N, CoinPlex ID# LGC1794WREATHSTRAWBN

**VF Sharpness Sheldon-18b
1794 Cent, Head of 1793**

- 3825 1794 Head of 1793 — Smoothed — PCGS Genuine. VF Details. S-18b, B-2b, R.4.** The usual Large Edge Letters subvariety. All legends are clear on this scarce Head of 1793 variety. The granular surfaces have been burnished, somewhat blurring the definition. Toned medium brown with strong powder-blue undertones. Our EAC grade VG8. PCGS# 1362, NGC ID# 223N, CoinPlex ID# LGC1794WREATHSTRAWBN

- 3826 1794 Head of 1794 VF20 PCGS. S-54, B-46, R.3.** The types are clear on this mildly glossy tan-brown and steel-gray example. STATES OF is faint but all other legends are crisp. The obverse displays light planchet striations. Our EAC grade VG10. PCGS# 901374, NGC ID# 223P, CoinPlex ID# LGC1794HD1794BN

Sheldon-31 1794 Cent, VF30

- 3827 1794 Head of 1794 VF30 NGC. S-31, B-13, R.1.** The Marred Field obverse, paired with a long fraction bar reverse. A pleasing example with consistent walnut-brown toning. Marks are minor overall, though we note a tick on the N in ONE and a few faded thin lines near the obverse margin at 7:30. Our EAC grade VF20. NGC ID# 223P, PCGS# 901374, CoinPlex ID# LGC1794HD1794BN

- 3828 1794 Head of 1794 — Environmental Damage — PCGS Genuine. XF Details. S-44, B-33, R.1.** This evenly struck Liberty Cap cent has only minimal wear but the dark brown surfaces are consistently granular throughout. A strong loupe locates a few trivial hair-thin obverse marks. All legends are bold except the fraction denominator, which is faint but readable. Our EAC grade VF25. PCGS# 901374, NGC ID# 223P, CoinPlex ID# LGC1794HD1794BN

- 3829 1794 Head of 1794 — Tooled — NGC Details. XF. S-65, B-51, R.1.** Maris' "Shielded Hair" variety. The olive-brown surfaces exhibit splendid detail but are moderately granular. The right obverse field has been smoothed or burnished. Traces of luster cling to design elements. Our EAC grade VF20. NGC ID# 223P, PCGS# 901374, CoinPlex ID# LGC1794HD1794BN

**XF S-44 1794 Cent
Pleasing Brown Surfaces**

- 3830 1794 Head of 1794 XF40 PCGS. S-44, B-33, R.1.** The bold radial reverse die crack at 1 o'clock attributes this available Sheldon variety. The obverse displays a lengthy diagonal crack from the rim through the cap and date to the rim at 6 o'clock. The golden-brown surfaces are pleasing despite one minor reverse rim bump at 2:30. Wear is moderate and evident primarily on the forehead, curls, and leaves. Our EAC grade VF25. PCGS# 901374, NGC ID# 223P, CoinPlex ID# LGC1794HD1794BN

**1794 Shielded Hair Cent, XF40
S-65, B-51, Head of 1794**

- 3831 1794 Head of 1794 XF40 PCGS. S-65, B-51, R.1.** An example of the "Shielded Hair" variety, which lives up to its name as the hair behind the neck has impressive definition. This cent has pleasing medium brown toning that is consistent throughout. The surfaces are smooth and unmarked with excellent eye appeal. Struck slightly off center toward 1 o'clock. Our EAC grade VF30. PCGS# 901374, NGC ID# 223P, CoinPlex ID# LGC1794HD1794BN

**Scarce Choice VF 1795 Cent
Lettered Edge, S-75**

- 3832 1795 Lettered Edge VF35 PCGS. S-75, B-3, R.3.** Though collectible, Lettered Edge 1795 cents are scarcer than their Plain Edge counterparts. Sheldon-75 is promptly attributed by the die line above the O in OF. The present Choice VF example has consistent medium brown toning and shows only minor marks. A recessed area beneath the E in CENT is from a mint-made strike-through. Our EAC grade VF20. PCGS# 1377, NGC ID# 223S, CoinPlex ID# LGC1795LEBN

- 3833 1796 LIHERTY — Damaged, Tooled, Corroded — ANACS. XF40 Details. S-103, B-27, R.4.** Ex: Jules Reiver. Toned deep olive-brown with faded hints of ruby-red. The right obverse field is moderately pitted, and the coin was lightly tooled in the vicinity in an attempt to improve the eye appeal. A thin diagonal mark crosses Liberty's neck, and the right reverse border is granular. The S-103 variety is the scarcer of two varieties that share the blundered obverse die. Our EAC grade Fine 12.
Ex: *George Ramont (8/1980); Jules Reiver Collection (Heritage, 1/2006), lot 19285, which realized \$2,185.* NGC ID# 223X, PCGS# 1413, CoinPlex ID# LGC1796LIHERTYBN

**1797 S-130, B-25 Cent, XF Details
Rotated Double Struck**

- 3834 1797 Reverse of 1797, Stems — Double Struck, Rotated — Corrosion — NGC Details. XF. S-130, B-25, R.2.** This double struck cent rotated 150 degrees between strikes, with LIBERTY boldly visible at the top and the bottom, obliterating the date. Remnants of the drapery are visible behind the hair ribbon, and so is the diagnostic curved die break that appears on S-129, S-130, and @-131, and no others. The curved break is only lightly visible on later states of S-129, and is boldly visible on S-130, and on the Stemless Reverse S-131. The attribution of this piece as S-130 is beyond doubt.

This piece is plated on page 842 of *Walter Breen's Encyclopedia of United States Large Cents*, and may be from the Dupont Collection, where lot 163a was described as: "Sharpness of V.F., medium reddish brown and steel, but lightly and uniformly roughened on both sides. Freak coin, double struck with the strikings about 150° apart so that a second LIBERTY shows where date should be." Our EAC grade Fine 12. NGC ID# 2242, PCGS# 1422, CoinPlex ID# LGC1797R1797STBN

- 3835 1799/8 — Surface Damage — PCGS Genuine. Good Details. S-188, B-2, R.4.** The 1799 is the stopper in a date collection of Sheldon cents, and the 1799/8 overdate is rarer than the S-189 1799 normal date. The present example has a dig at the obverse center and a horizontal scratch beneath the chin. The dark surfaces are rough throughout, and the date area has been lightly tooled from an attempt to remove verdigris. All legends are readable. Our EAC grade Fair 2. PCGS# 1446, NGC ID# 2247, CoinPlex ID# LGC1799OVR8BN

**VG Details S-189 1799 Cent
Key to Sheldon Date Set**

- 3836 1799 — Environmental Damage — PCGS Genuine. VG Details. S-189, B-3, R.2.** Most legends are bold on this key date Draped Bust cent. The tops of UNITED and the bases of the denominator and the date show fading into the rim, though the ball of the second 9 is distinct. The medium brown surfaces are granular but do not affect the sharpness. One slender mark on the portrait is of little consequence. Our EAC grade Good 4.
From *The Hilltop Collection*. PCGS# 1443, NGC ID# 2246, CoinPlex ID# LGC1799BN

**VF25 1800/79 Cent, S-193
Style Two Hair**

- 3837 1800/79 VF25 NGC. S-193, B-7, R.4.** Consistent deep medium brown toning embraces this overdated Style Two Hair cent. The strike is generally bold, though CENT and OF are lighter than the other legends. Faint marks on the lower obverse are visible only beneath a loupe. The die crack through the fraction bar is usual for the Sheldon variety. Our EAC grade Fine 15. NGC ID# 2U57, PCGS# 1455, CoinPlex ID# LGC1800OVR79BN

Bold AU53 1802 Cent, S-232

- 3838 1802 AU53 PCGS. S-232, B-12, R.1.** The T in LIBERTY is punched over a Y, and repunching near the T in CENT completes the attribution. An early die state without any signs of die failure near the second T in STATES. This chocolate-brown example exhibits noticeable luster and is smooth aside from a single minor mark on the jaw. Our EAC grade VF35. PCGS# 1470, NGC ID# 224E, CoinPlex ID# LGC1802BN

- 3839 1803 Small Date, Small Fraction AU53 PCGS. S-255, B-14, R.1.** A chocolate-brown Draped Cent type coin that shows considerable luster within the curls. Moderately granular near the cheek and ONE CENT, with a pair of small flakes absent on the right obverse field. Liberty's profile is strike doubled. Our EAC grade VF30. PCGS# 1482, NGC ID# 224G, CoinPlex ID# LGC1803SDSFBN

**Partly Lustrous 1803 Cent, AU55
Small Date and Fraction, S-254**

- 3840 1803 Small Date, Small Fraction AU55 NGC. S-254, B-13, R.1.** Breen Die State II with three sets of clashed dentils near LIBERTY. A richly detailed medium brown Draped Bust type coin that displays pleasing luster on the portrait, wreath, and legends. Well struck except for the T in CENT and nearby leaves. Close examination locates only faint pinscratches along the profile and above CENT. Our EAC grade XF40. NGC ID# 224G, PCGS# 1482, CoinPlex ID# LGC1803SDSFBN

1803 S-258, B-17 Cent, AU50

- 3841 1803 Small Date, Large Fraction AU50 PCGS. S-258, B-17, R.1.** A diagnostic die crack curves through the left obverse field. Housed in a first-generation PCGS holder, this cent has intermingled maroon, olive, and steel patina with sharp design motifs. Trivial surface marks and tiny spots of corrosion are evident. Our EAC grade VF30. PCGS# 1485, NGC ID# 224G, CoinPlex ID# LGC1803SDLFBN

**Key Date 1804 Cent, VG10
S-266b, Middle Die State**

- 3842 1804 VG10 PCGS. S-266b, B-1, R.2.** The intermediate die state with a break over RTY but no break over MERIC. This key date cent is mildly granular and toned deep mahogany-brown overall with aqua tints at the borders. The obverse is moderately misaligned toward 3 o'clock, and the reverse has a small edge flaw at 12:30. Our EAC grade Good 5. PCGS# 1504, NGC ID# 224H, CoinPlex ID# LGC1804BN

- 3843 1804 Restrike MS64 Brown NGC.** This 19th century production was privately made muling two genuine U.S. Mint dies, the S-261 1803 obverse (altered to 1804) and the N-12 1820 reverse. The chocolate-brown surfaces display the die rust and breaks usual for the issue. Our EAC grade AU55.
Ex: Los Angeles Signature (Heritage, 7/2009), lot 65. PCGS# 45344

**XF 1809 Cent, S-280
Stopper to Classic Date Set**

- 3844 1809 XF40 PCGS. S-280, B-1, R.2.** The only dies for the date, which is a key to the Classic Head series along with the scarce 1811/0 overdate. Most examples of 1809 are well worn or corroded, but the present cent has pleasing definition and the deep brown surfaces are smooth. The right-side stars display darker shades, especially between stars 12 and 13. Our EAC grade VF30. PCGS# 1546, NGC ID# 224R, CoinPlex ID# LGC1809BN

**1810 Cent, Choice XF, S-282
Scarce Classic Design**

- 3845 1810 XF45 PCGS. S-282, B-3, R.2.** The reverse die misalignment toward 2 o'clock helps attribute the variety. This is a deep brown Classic cent that has pleasing definition and an absence of detrimental marks. Mint gloss remains in protected areas. A conditionally challenging type. Our EAC grade XF40. *Ex: FUN Signature (Heritage, 1/2009), lot 250, which realized \$3,737.50. PCGS# 1550, NGC ID# 224S, CoinPlex ID# LGC1810RB*

- 3846 1811 — Environmental Damage — NGC Details. AU. S-287, B-1, R.2.** Classic Head cents are seldom encountered as sharp as the present lot. The curls and leaves show minimal wear but the dark brown surfaces are evenly granular. Our EAC grade Fine 12. NGC ID# 224U, PCGS# 1555, CoinPlex ID# LGC1811BN

**1812 Large Date Cent, MS63 Brown
Late Die State S-288, B-3**

- 3847 1812 Large Date MS63 Brown NGC. S-288, B-3, R.2.** This late die state cent has heavy flow lines that obscure other details, and appears later than anything described in the Breen Large Cent Encyclopedia. The tops of all letters in STATES OF are merged with the rim on this example. The pristine obverse is glossy dark chocolate while the reverse is lightly corroded, blending maroon and olive-brown. Overall, this piece retains excellent eye appeal. Our EAC grade AU55. NGC ID# 224W, PCGS# 1564, CoinPlex ID# LGC1812LDBN

**1813 S-292, B-2 Cent, MS63 Brown
Condition Census Coin**

- 3848 1813 MS63 Brown NGC. S-292, B-2, R.2.** The reverse is slightly off-center on this intermediate die state piece, struck from misaligned dies. Clash marks are mostly polished off the die, while flow lines appear at the right obverse border. Most of the reverse dentils are still visible. A scarce Classic Head cent, 1813 large cents are rarely found in Mint State grades. This example has lovely olive-brown surfaces with considerable cartwheel luster. A splendid specimen, the surfaces are free of marks, exhibiting faint golden overtones. Our EAC grade of AU55 is equal to a fourth-place tie in the Bland census. NGC ID# 224X, PCGS# 1570, CoinPlex ID# LGC1813BN

- 3849 1816 MS64 Brown PCGS. CAC. N-2, R.1.** Noyes Die State B/C with multiple right-side obverse rim die breaks. Pumpkin-gold color clings to design elements though the cheek and fields are light brown. A lens reveals occasional minor marks. Well struck except along the left border. Our EAC grade MS60. PCGS# 1591, NGC ID# 224Z, CoinPlex ID# LGC1816BN

- 3850 1816 MS63 Red and Brown PCGS. CAC. N-2, R.1.** Noyes Die State B/C. Mint Red fills design recesses, especially on the reverse. Impressively unabraded, with only a small tick on the jaw worthy of comment. The left-side stars show minor softness, usual for the Randall Hoard variety. Our EAC grade AU55. PCGS# 1592, NGC ID# 224Z, CoinPlex ID# LGC1816RB

**Red and Brown Choice 1816 Cent
N-2, Repunched Date**

- 3851 1816 MS64 Red and Brown PCGS. CAC. N-2, R.1.** Noyes Die State C/C. The second 1 in the date is multiply punched. This high grade Matron Head type coin displays plentiful brick-red on each side, along with sea-green and steel-blue shades. No marks are noticeable and the sole spot is subtle, minor, and relegated to the reverse at 5 o'clock. Our EAC grade AU55. PCGS# 1592, NGC ID# 224Z, CoinPlex ID# LGC1816RB

- 3852 1817 13 Stars MS64 Red and Brown PCGS. CAC. N-14, R.1.** Noyes Die State B/C. Brick-red and medium brown compete for territory across this satiny and lightly marked near-Gem. Die alignment causes a sharp strike on the left sides while the right sides show incompleteness. Our EAC grade AU55. PCGS# 1595, NGC ID# 2252, CoinPlex ID# LGC181713SRB

- 3853 1820 Large Date MS65 Brown PCGS. N-13, R.1.** Cracked through all stars, usual for this Randall Hoard variety. Spot-free and virtually pristine in terms of contact, the smoothest yet seen by the cataloger. Toned deep olive-brown with glimpses of faded red in protected areas. Certified in a green label holder. Our EAC grade MS60. PCGS# 1615, NGC ID# 2256, CoinPlex ID# LGC1820LDBN

- 3854 1820 Large Date MS65 Brown PCGS. CAC. N-13, R.1.** A gorgeous chocolate-brown Gem type coin. Sharply struck and lustrous with ideal surfaces save for a minor spot near star 3. N-13 with its circular obverse die cracks is closely associated with the Randall Hoard. Our EAC grade MS60. PCGS# 1615, NGC ID# 2256, CoinPlex ID# LGC1820LDBN

- 3855 1820 Large Date MS64 Red and Brown NGC. N. 13, R.1.** A lustrous and smooth example that displays equal portions of fire-red and steel-gray. With lengthy peripheral obverse die cracks, usual for Newcomb-13. The L in LIBERTY is repunched multiple times; above, beneath, and left of the final L. Our EAC grade MS62. NGC ID# 2256, PCGS# 1616, CoinPlex ID# LGC1820LDRB

- 3856 1821 XF40 PCGS. N-1, High R.1.** Deep mahogany-brown and ebony toning drapes this lightly abraded and well defined Matron cent. Only two Newcomb varieties exist for the low mintage date. Certified in a green label holder. Our EAC grade VF25. From *The Richmond Hill Collection*. PCGS# 1621, NGC ID# 2258, CoinPlex ID# LGC1821BN

- 3857 1826 MS64 Brown PCGS. N-7, R.1.** Repunching on the R in LIBERTY and the N in CENT attributes this collectible Matron Head die marriage. A well struck and glossy chocolate-brown cent with hints of lime-green in protected areas. Free from visible marks. A few tan freckles are on the portrait. Housed in a first generation holder. Our EAC grade AU55. PCGS# 1645, NGC ID# 225G, CoinPlex ID# LGC1826BN

- 3858 1835 Small 8 and Stars MS62 Brown NGC. N-6, R.1.** The obverse has a delicate die crack through the base of the date, seen on most examples of this variety. The obverse shows full dentilation with the reverse border partially detailed. Graded MS63 in the 1986 Robinson Brown catalog and tied for fourth finest known, Superior regraded this specimen MS60 in the 2000 March Wells catalog. Considerable faded mint red remains on the obverse with lustrous olive and golden steel-brown surfaces. Minor contact marks, mostly in front of the face, prevent a higher grade. Our EAC grade MS60.

Ex: *Alto Collection* (Stack's, 12/1970), lot 576; *Robinson S. Brown, Jr.* (Superior, 9/1986), lot 773; *March Wells* (Superior, 2/2000), lot 1985; *Dr. Wallace Lee* (Superior, 5/2003), lot 813; *Al Boka Collection* (Heritage, 9/2011), lot 3051. PCGS# 1717, CoinPlex ID# LGC1835S8STARSBN

**Near-Gem Red and Brown
Plain Cords, Small Letters
N-5 1837 Cent**

- 3859 1837 Plain Cords, Small Letters MS64 Red and Brown PCGS. N-5, R.2.** The sole Plain Cords, Small Letters Newcomb variety and thus the recipient of a separate *Guide Book* entry. The present near-Gem has considerable orange-red on both sides. The reverse is more Red than Brown while the portrait and left obverse field are deep gunmetal-gray. The sole Red and Brown example certified by PCGS, with none as graded as full Red by either service. We note a small spot on the F in OF and a small rim mark at 1 o'clock on the reverse. Our EAC grade MS63. PCGS# 1733, CoinPlex ID# LGC1837SLRB

**Gem Red and Brown 1841 Cent
Newcomb-3**

- 3860 1841 MS65 Brown NGC. CAC. N-3, R.2.** Grellman Die State d. Crimson-red outlines the stars, legends, and hair, but the open fields, cheek, and neck are toned deep brown. Well struck and unabraded with only minor carbon. NGC has yet to certify an example as full Red. Housed in a former generation holder. Our EAC grade MS63. NGC ID# 2267, PCGS# 1832, CoinPlex ID# LGC1841BN

**Smooth MS66 Brown 1842 Cent
Large Date, N-6**

- 3861 1842 Large Date MS66 Brown PCGS. N-6, R.1.** Grellman Die State d. Newcomb's variety 10 with a die lump on the field near a leaf and right of the E in ONE. A magnificent olive-brown example that shows traces of faded mint red in design recesses. Well struck at the centers with minor incompleteness at the margins. Pristine aside from a slight obverse rim ding at 5:30. Our EAC grade MS62. PCGS# 1835, NGC ID# 2268, CoinPlex ID# LGC1842LDBN

**1848 N-21 Cent, MS65 Red and Brown
Condition Census**

- 3865 1848 MS65 Red and Brown NGC. CAC. N-21, Low R.4.** Grellman die state d, and one of the finest known examples of this die marriage. Both sides have nearly full red mint color with faint bluish-brown patina on the high points, mostly on the reverse. This piece is comparable to the Holmes and Naftzger specimens, and ranks among the top four or five known examples. Our EAC grade MS64. NGC ID# 226E, PCGS# 1884, CoinPlex ID# LGC1848RB

**40% Off-Center 1843 Cent, VF25
Mature Head, Large Letters**

- 3862 1843 Mature Head, Large Letters — Struck 40% Off Center — VF25 PCGS.** Struck widely off center toward 6 o'clock with the date, the lowest four stars, and STATES OF off the flan. Most of UNITED and STATES is present and the letters show spreading due to collar-unimpeded metal flow. The chocolate-brown surfaces are unabraded and the sole minor spot is near the C in AMERICA. Likely N-6, although definitive attribution is impossible. Our EAC grade Fine 15. PCGS# 1850, CoinPlex ID# LGC1843MATURELLBN

- 3863 1844 MS63 Red and Brown PCGS. N-5, R.1.** Grellman Die State c. The date is lightly repunched. Substantial fire-red glows from the relief transitional areas of this needle-sharp and nearly unabraded Select cent. Our EAC grade MS62. PCGS# 1857, NGC ID# 226A, CoinPlex ID# LGC1844RB

**1846 N-14 Cent, MS63 Brown
Tall Date**

- 3864 1846 Tall Date MS63 Brown PCGS. N-14, R.2.** Grellman Die State a. This satiny and mark-free cent has a mahogany obverse and a medium brown reverse. The strike is bold except on a few stars. Shallow strike-throughs (as coined) are noted behind the neck, above the T in CENT, and above the wreath ribbon. Our EAC grade AU50. Population: 2 in 63 Brown, 3 finer (12/12). PCGS# 1871, CoinPlex ID# LGC1846TALLDTBN

**Red and Brown Gem N-9
1850 Cent, Ex: Holmes, Brown**

- 3866 1850 MS65 Red and Brown PCGS. N-9, R.2.** Grellman Die State c. Close to a Red designation though slight mellowing to steel-blue is here and there. Crisply struck and lustrous with exemplary surfaces. Included with the lot are the Brown and Holmes auction lot cards, and two grading cards from J.R. Grellman, each designating the coin as 65. Described in the Holmes catalog as "tied for CC#1 with one other example in the same die state." Our EAC grade MS65. Ex: Tom Reynolds, 1/1996; Robinson S. Brown, Jr. Third Sale (Superior, 6/2002), lot 805; Dan Holmes Collection (Ira & Larry Goldberg, 1/2011), lot 397, which realized \$3,565. PCGS# 1890, NGC ID# 226G, CoinPlex ID# LGC1850RB

- 3867 1852 MS66 Red and Brown NGC. N-8, R.2.** Grellman Die State d. The obverse is mostly fire-red with mellowing to brown on the cheek and open field. The reverse is blended brick-red and lilac with sea-green on the reverse exergue. Lustrous and essentially mark-free aside from a tick on the reverse rim at 5:30. Our EAC grade MS63. NGC ID# 226J, PCGS# 1899, CoinPlex ID# LGC1852RB

- 3868 1852 MS66 Red and Brown NGC. N-10, High R.2.** Grellman Die State a, described as "rare." Much scarcer than N-11 or N-22 in quality Mint State. The present high grade cent displays considerable peach-red, especially on the reverse, though the portrait is deep gunmetal-blue. The obverse has a prominent wire rim near 1 o'clock. Our EAC grade MS63. NGC ID# 226J, PCGS# 1899, CoinPlex ID# LGC1852RB

**Lustrous Red Gem 1855 Cent
Upright 5s, N-4**

- 3869 1855 Upright 5s MS65 Red PCGS. N-4, R.1.** Grellman Die State a. Two die lumps near the earlobe attribute this Newcomb variety. A brick-red and orange-gold Gem that boasts vibrant luster and excellent eye appeal. Well struck at the centers with minor incompleteness on stars 2 through 9. No marks or spots are evident. Certified in a green label holder. Our EAC grade MS64. From *The Richard P. Ariagno, M.D. Collection*. PCGS# 1909, NGC ID# 226M, CoinPlex ID# LGC1855UP55RD

**Celebrated Knob on Ear 1855 Cent
MS65 Red and Brown, N-9**

- 3870 1855 Knob on Ear MS65 Red and Brown NGC. N-9, R.1.** Slanted 55. Grellman die state f. Fire-red consumes a majority of the obverse field, and also accompanies recesses areas within the portrait and the reverse design. The portrait high points and most of the reverse are steel-gray. This lustrous *Guide Book* variety Gem is well struck and smooth aside from a minor graze on the left obverse field. Our EAC grade MS63. PCGS# 1914, CoinPlex ID# LGC1855KNOBEARRB

**1855 N-9 Cent, MS65 Red and Brown
Knob on Ear**

- 3871 1855 Knob on Ear MS65 Red and Brown PCGS. CAC. N-9, R.1.** Although it is a plentiful variety and actively collected in its various die states, few examples of the 1855 Knob on Ear cent retain any amount of original red mint color. This piece exhibits about one-third of its mint color on the obverse and about half on the reverse. This intermediate die state specimen has a prominent die chip on the ear, with faint cracks in the vicinity. Our EAC grade MS63. Population: 3 in 65 Red and Brown, 0 finer (12/12). PCGS# 1914, CoinPlex ID# LGC1855KNOBEARRB

- 3872 1857 Small Date MS65 Brown NGC. N-4, R.1.** Grellman Die State a, "scarce." Apple-green and peach-red shades fill the fields. The devices are gunmetal-gray. Satiny and unmarked with the usual incompleteness of strike on the stars. Our EAC grade AU55. PCGS# 1931, CoinPlex ID# LGC1857SDBN

PROOF LARGE CENTS

1841 N-1 Cent, PR65 Brown

- 3873 1841 PR65 Brown PCGS. N-1, R.5.** Housed in a green-label PCGS holder, this splendid reddish-brown cent has nearly flawless surfaces with a carbon speck near star 12 and an insignificant planchet void in the left obverse field. The strike is bold as expected, although natural oxidation dulls the surfaces, subduing the mirrored fields. Slight reflectivity remains on each side. When this coin was offered in February 2009, Bob Grellman assigned a grade of PR62, and we agree with his assessment. Our EAC grade PR62. Population: 2 in 65 Brown, 2 finer (6/12). Ex: *Goldberg Coins (2/2009)*, lot 718; *Bowers and Merena (8/2009)*, lot 207. PCGS# 1952, NGC ID# 226S, CoinPlex ID# LGP1841BN

1855 N-10 Cent, PR66 Brown

- 3874 1855 PR66 Brown PCGS. N-10, R.5.** Approximately 60 proof 1855 N-10 cents are known in all grades. The small point from the front edge of the coronet is diagnostic. Curiously, Grellman ignores the die lines from the dentils between stars 2 and 3 that would also identify the variety. This decisively struck Premium Gem displays rose, olive, and gold when the brown surfaces are rotated beneath a light. Flawless aside from a few faint hairlines on the reverse rim between 1 and 3 o'clock. Our EAC grade PR60. Population: 1 in 66 Brown, 0 finer (12/12).

Ex: Bowers and Merena (1/1999), lot 1026; Superior (1/2004), lot 1611; Superior (5/2005), lot 2002; Heritage (4/2008), lot 103; Heritage (1/2012), lot 3042. PCGS# 1994, NGC ID# 2273, CoinPlex ID# LGP1855SL55BN

EARLY HALF DIMES

1794 V-3, LM-3 Half Dime, XF45 Struck in 1795

- 3875 1794 XF45 PCGS. V-3, LM-3, R.4.** This very scarce half dime is a lovely representative of the first issue of that denomination struck within the confines of the fledgling Philadelphia Mint. Although dated 1794, it is doubtful that any were actually struck in 1794. The first delivery of half dimes from the coiner to the Mint treasurer was dated March 30, 1795. Had any coins been struck the previous year, it is almost certain that they would have been delivered that year, before the close of business on December 31.

The obverse die was used for V-2 and V-3, and the reverse die, showing two prominent cracks on this example, was only used for V-3. This Choice XF specimen exhibits lovely pewter-gray surfaces with delicate blue and pale gold overtones. A minor obverse scratch is noted, but overall the surfaces are pleasing and problem free. PCGS# 4250, NGC ID# 22ZT, CoinPlex ID# EHD1794

XF Details 1795 Half Dime Scarce V-2, LM-3 Variety

- 3876 1795 — Improperly Cleaned — NGC Details. XF. V-2, LM-3, R.5.** This scarce Flowing Hair marriage is distinguished by a lengthy vertical die crack across the obverse center to the R in LIBERTY. Lightly toned gunmetal-gray and chestnut-gold with untuned areas at the reverse center and near the profile. The right obverse is hairlined and the left borders show incompleteness of strike but the wings retain glimmers of luster. NGC ID# 22ZV, PCGS# 4251, CoinPlex ID# EHD1795

Choice AU 1795 Half Dime V-4, LM-10, Obverse Cud

- 3877 1795 AU55 PCGS. V-4, LM-10, R.3.** A late die state example with a dramatic obverse cud between 1 and 2 o'clock. Light olive-gold toning visits this nicely struck and partially lustrous Flowing Hair half dime. Close inspection reveals hair-thin marks, mostly on the obverse with only a couple of faint abrasions on the reverse. PCGS# 4251, NGC ID# 22ZV, CoinPlex ID# EHD1795

**Choice Fine 1796 Half Dime
V-1, LM-1, Two-Year Type**

- 3878** 1796 Fine 15 PCGS. V-1, LM-1, R.3. Deep cherry-red, apple-green, and gunmetal-blue toning dominates this nicely defined early half dime. A few letters in STATES OF and LIBERTY are lightly defined but the portrait is sharp for the designated grade. One hair-thin mark extends between star 1 and the E in LIBERTY. The more available of the two known 1796-dated varieties. A challenging two-year type. PCGS# 4254, NGC ID# 22ZW, CoinPlex ID# EHD1796

**1796 Half Dime, Fine 15
LIKERTY Variety, V-1, LM-1**

- 3879** 1796 LIKERTY Fine 15 PCGS. V-1, LM-1, R.3. The hair-thin upper and lower lines on the B in LIBERTY, due to a defective letter punch, are responsible for the LIKERTY nickname. But any Small Eagle Draped Bust half dime is desirable, as this early silver type was coined for just two years. The present piece is mottled cream-gray and golden-brown and has pleasing sharpness on the legends, wings, and hair. Smooth save for a single hairline on the right obverse field. PCGS# 94254, NGC ID# 22ZX, CoinPlex ID# EHD1796LIKERTY

**1796 V-1, LM-1 Half Dime, XF40
'LIKERTY' Obverse**

- 3880** 1796 LIKERTY XF40 NGC. V-1, LM-1, R.3. This is the famous LIKERTY variety with both loops of the B broken at top and bottom, each patched by a thinly engraved line in the die. The other variety of 1796 is a 1796/5 overdate, a second fascinating variety for the year as 1795 half dimes were an entirely different obverse design. The reverse is rotated 30 degrees counterclockwise on this lovely pewter-gray specimen. Both sides have splashes of blue toning. A lovely half dime for an advanced collection. Census: 6 in 40, 49 finer (12/12). NGC ID# 22ZX, PCGS# 94254, CoinPlex ID# EHD1796LIKERTY

**AU Sharpness 1797 Half Dime
15 Stars, V-2, LM-1**

- 3881** 1797 15 Stars — Improperly Cleaned — NGC Details. AU. V-2, LM-1, R.3. This early half dime exhibits considerable luster and is free from consequential abrasions. The centers are lightly brought up but the remainder of the design is crisp. The slightly glossy surfaces are faint caramel-gold aside from a blush of cobalt-blue on the left obverse. The reverse is multiply clashed. The sole 15 Stars 1797 die variety. NGC ID# 22ZZ, PCGS# 4258, CoinPlex ID# EHD179715ST

**Smooth AU 1797 Half Dime
16 Stars, V-4, LM-2**

- 3882** 1797 16 Stars AU50 NGC. V-4, LM-2, R.4. An impressive early half dime that exhibits smooth surfaces and consistent walnut-brown toning. The centers show incompleteness of strike, but the remainder of the designs are bold. The Draped Bust, Small Eagle type is scarcer in better grades than its Flowing Hair predecessor. *From The Hilltop Collection.* NGC ID# 22ZZ, PCGS# 4259, CoinPlex ID# EHD179716ST

BUST HALF DIMES

**Brilliant Gem 1832 Half Dime
V-2, LM-12**

- 3883** 1832 MS65 PCGS. CAC. V-2, LM-12, R.2. This collectible variety is an excellent candidate for a date or type set, featuring satiny surfaces with reflective, nearly prooflike fields. Both sides are close to brilliant despite a few glimpses of golden-gray toning. The top of the shield and the central curls show a soft impression, though peripheral elements are sharply brought up. PCGS# 4279, NGC ID# 232E, CoinPlex ID# EHD1832

1833 V-7, LM-1 Half Dime, MS65**Rare in Mint State**

- 3884 1833 MS65 PCGS. V-7, LM-1, R.3.** The 8 and 3 in the more are the most widely spaced of any pair of digits, and the upper and lower loops of those two digits are equidistant. Stars 7 and 8 (a single point) are repunched. On the reverse the O in OF is centered above the U in UNITED and high relative to the scroll. Logan and McCloskey call this die marriage scarce, noting that examples above XF are difficult to locate. This beautiful, silvery Gem should certainly fill the bill, with no visible distractions and much pleasing contrast between the fields and devices on each side. PCGS# 4280, NGC ID# 232F, CoinPlex ID# EHD1833

- 3885 1834 MS64 NGC. V-1, LM-2, R.1.** V-1 and V-3 share the "Scarface" obverse that features a vertical die crack near Liberty's profile. Sea-green borders encompass rose-gray centers. Crisply struck and coruscating with pristine fields and only a pair of wispy marks on the cheek. NGC ID# 232G, PCGS# 4281, CoinPlex ID# EHD1834

**Lustrous, Mostly White Gem V-1, LM-2
1834 Half Dime**

- 3886 1834 MS65 PCGS. CAC. V-1, LM-2, R.1.** Only a whisper of gold patina visits this highly lustrous Gem Capped Bust type coin. Devoid of contact, and the strike is intricate. The surfaces appear flawless upon initial inspection, and only careful rotation locates the trivial left obverse field grazes that decide the grade. *From The Richard P. Ariagno, M.D. Collection.* PCGS# 4281, NGC ID# 232G, CoinPlex ID# EHD1834

SEATED HALF DIMES

- 3887 1837 No Stars, Small Date (Flat Top 1) MS63 NGC. CAC Gold Label.** Jade-green, plum-mauve, and stone-gray toning endows satiny and minimally marked surfaces. This first year Seated half dime is well struck save for the A in HALF. Housed in a former generation holder.

Ex: Long Beach Signature (Heritage, 9/2010), lot 3575, which realized \$1,495.

From The SPQR Collection of CAC Gold Sticker Coins. NGC ID# 232M, PCGS# 4312, CoinPlex ID# SHD1837NOSTARSD

- 3888 1837 No Stars, Small Date (Flat Top 1) MS64 PCGS.** This is a lustrous and well-impressed near-Gem. The obverse is primarily wheat-gold with areas of russet and silver-gray. Rich golden-brown, copper, red, and several shades of green adorn the reverse. Minor surface marks on both sides account for the grade. Population: 40 in 64 (1 in 64+), 36 finer (12/12). PCGS# 4312, NGC ID# 232M, CoinPlex ID# SHD1837NOSTARSD

- 3889 1840-O No Drapery MS61 NGC.** Large O. Light gold and sky-blue toning visits this nicely struck and lightly abraded example. A reverse cud at 9 o'clock may be of interest to the specialist. Very scarce in Mint State. Census: 4 in 61, 9 finer (11/12).

Ex: Long Beach Signature (Heritage, 9/2006), lot 1219, which realized \$2,070. NGC ID# 232V, PCGS# 4322, CoinPlex ID# SHD1840ONP

**Colorful MS63 1840-O Half Dime
No Drapery, Large O**

- 3890 1840-O No Drapery MS63 PCGS.** Large O. Ruby-red and aquamarine toning graces this coruscating and unabraded Select New Orleans half dime. The strike is generally crisp. Several stars are repunched, especially star 9. Rim die breaks on the upper left reverse may be of interest to the specialist. Surprisingly rare in the present grade. Population: 5 in 63, 4 finer (11/12). PCGS# 4322, NGC ID# 232V, CoinPlex ID# SHD1840ONP

**1841 Seated Liberty Half Dime, MS66
Attractive Luster and Toning**

- 3891 1841 MS66 PCGS. CAC.** From a substantial mintage of 1.1 million pieces, the 1841 Seated Liberty half dime circulated extensively in the 19th century, and few examples were saved for numismatic purposes. This sharply detailed Premium Gem exhibits satiny mint luster under attractive shades of golden-brown toning. Population: 10 in 66, 4 finer (12/12). PCGS# 4328, NGC ID# 232Y, CoinPlex ID# SHD1841

**Superb Gem 1841 Seated Liberty Half Dime
None Certified Finer**

3892 1841 MS67 PCGS. The last 1 in the date is low, and a small lunule appears between stars 10 and 11. Sharply struck, the untoned surfaces have a silvery glow and a rich satiny sheen. Struck from moderately clashed dies, there are a couple of spurs visible inside the M in DIME. The second year of the Drapery subtype is more available than its introductory 1840 counterpart, but surprisingly few pieces have been certified by PCGS in Mint State grades. Population: 4 in 67, 0 finer (12/12). PCGS# 4328, NGC ID# 232Y, CoinPlex ID# SHD1841

3893 1844 MS66+ PCGS. CAC. Areas of toning ring the silver centers on both sides of this high-end Premium Gem. The obverse of this well-struck example includes attractive shades of iridescent green, yellow, and red. The reverse displays deep shades of blue, red, and green. Population: 22 in 66 (2 in 66+), 10 finer (12/12). PCGS# 4333, NGC ID# 2335, CoinPlex ID# SHD1844

**Mint State 1844-O Half Dime
Medium O Mintmark**

3894 1844-O MS61 NGC. CAC. Medium O. A nicely struck Uncirculated example of this underappreciated New Orleans issue. Dusky golden-brown and apple-green toning dominate. One faded thin mark left of the mintmark. Certified in a former generation holder. Census: 2 in 61, 2 finer (12/12).
Ex: ANA Sale (Heritage, 8/1996), lot 6906; Long Beach Signature (Heritage, 2/2003), lot 6163. NGC ID# 2336, PCGS# 4334, CoinPlex ID# SHD1844O

**1844-O Half Dime, MS64
A Key Date in the Series
Seldom Seen Finer**

3895 1844-O MS64 PCGS. The 1844-O, a key date in the Seated half dime series, saw a low initial mintage of only 220,000 pieces in antebellum New Orleans at a time when that city was the "Queen of the Delta," and high-grade examples have proven elusive ever since collectors began collecting coins by mintmark, a phenomenon that was firmly established only much later in the late-19th to early-20th centuries. This near-Gem displays soft, frosted mint luster and is almost brilliant, save for a hint of yellowish patina in the fields. The reverse is rotated 180 degrees with respect to the obverse, making the coin appear struck in medal turn rather than coin turn. The piece is identifiable by a couple of small spots below star 13. An important offering for the Seated half dime collector, seldom seen finer. Population: 3 in 64, 1 finer (12/12). PCGS# 4334, NGC ID# 2336, CoinPlex ID# SHD1844O

Gem 1851-O Seated Half Dime
Nice Toning and Luster

3896 1851-O MS65 NGC. CAC. Lightly toned in attractive shades of golden-tan, violet, and ice-blue, this delightful Gem displays well-preserved lustrous surfaces, with exceptional eye appeal. The design elements are sharply rendered and the toning gives the central figure of Liberty an especially attractive cameo appearance. Census: 10 in 65, 6 finer (12/12). NGC ID# 233J, PCGS# 4348, CoinPlex ID# SHD1851O

3897 1853 Arrows MS65 NGC. An unabraded Gem with a faint golden patina, this Gem exhibits a satin luster. This piece displays clash marks. All 19th century type collectors need an example of this short-lived design type. Census: 76 in 65, 58 finer (12/12). NGC ID# 233Y, PCGS# 4356, CoinPlex ID# SHD1853ARR

3898 1853 Arrows MS65 PCGS. CAC. Medium sea-green and rose-gold toning graces this precisely struck and lustrous Seated type coin. Struck from clashed dies. Surprisingly scarce as a Gem. Population: 55 in 65, 37 finer (11/12).
Ex: FUN Signature (Heritage, 1/2009), lot 2106; Long Beach Signature (Heritage, 9/2010), lot 3587. PCGS# 4356, NGC ID# 233Y, CoinPlex ID# SHD1853ARR

1853 Arrows Half Dime, MS67
Remarkably Lustrous, Among the Finest Known

3899 1853 Arrows MS67 NGC. Although the mintage of 13.2 million for this variety of the 1853 half dimes is high, that number is offset by the need for the three-year Arrows type. The otherwise available 1853 Arrows half dime is remarkably unavailable in Superb Gem condition, with only 11 other pieces have been so graded by NGC, and none have reached the MS68 level at either major service (11/12). Brightly lustrous with lightly clashed fields, this coin displays remarkably thick, frosted mint luster, and just a hint of light rose patina appears on the obverse. NGC ID# 233Y, PCGS# 4356, CoinPlex ID# SHD1853ARR

Premium Gem 1856 Half Dime
Vivid Iridescent Toning

3900 1856 MS66 PCGS. Vivid shades of golden-brown and cobalt-blue toning blanket the surfaces of this stunning Premium Gem. The design elements are sharply detailed, and the well-preserved surfaces exhibit vibrant mint luster throughout. Eye appeal is extraordinary. Population: 12 in 66 (1 in 66+), 0 finer (11/12). PCGS# 4363, NGC ID# 233P, CoinPlex ID# SHD1856

3901 1860 MS66 PCGS. CAC. A lovely Premium Gem, this piece exhibits variegated navy-blue and forest-green toning blanketing this satiny and crisply struck high grade half dime. Immaculate except for tiny ticks on the cheek and right (facing) elbow. Population: 55 in 66 (3 in 66+), 37 finer (12/12). PCGS# 4377, NGC ID# 2347, CoinPlex ID# SHD1860

3902 1862 MS66 NGC. CAC. A straw-gold and sea-green patina covers the surfaces of this Premium Gem, with the sea-green color primarily found on the obverse. Spots of lavender, plum, and copper are scattered throughout the obverse. Heavy clash marks and an as-made planchet flaw appear on the reverse. Census: 42 in 66 (1 in 66+), 27 finer (12/12). NGC ID# 234B, PCGS# 4381, CoinPlex ID# SHD1862

1862 Seated Liberty Half Dime, MS67
Only Three Numerically Finer Coins at PCGS

3903 1862 MS67 PCGS. CAC. Dusky shades of gunmetal-gray patina mix with hues of champagne-gold on the well-preserved surfaces of this attractive Superb Gem. Both sides radiate satiny mint luster and the design elements are well-detailed. From a substantial Civil War mintage of nearly 1.5 million pieces. Population: 25 in 67 (1 in 67+), 3 finer (12/12). PCGS# 4381, NGC ID# 234B, CoinPlex ID# SHD1862

**1863 Seated Half Dime, MS67
Low-Mintage Civil War Date**

- 3904 1863 MS67 PCGS. CAC.** From a business-strike mintage of just 18,000 pieces, this high-end Superb Gem is spectacularly toned in shades of champagne-gold and violet. Vibrant satiny mint luster shines through the patina and the design elements are well-detailed. Eye appeal is outstanding. Population: 15 in 67 (1 in 67+), 3 finer (12/12). PCGS# 4382, NGC ID# 234C, CoinPlex ID# SHD1863
- 3905 1864 AU58 PCGS. CAC.** Deep iridescent colors in shades of the rainbow cover both sides of this half dime. The fields exhibit a number of minor contact marks when the piece is examined closely with a loupe, however they are largely disguised by the toning. PCGS and NGC combined have graded only three other examples at this grade level, making this a rare opportunity to acquire a near-Mint state example. Population: 2 in 58, 44 finer (12/12). PCGS# 4384, NGC ID# 234E, CoinPlex ID# SHD1864
- 3906 1868 MS66 Prooflike NGC.** This well-detailed Premium Gem displays reflective prooflike surfaces on both sides, under shades of sea-green and cerulean-blue toning. The 1868 Seated Liberty half dime is a rare issue in MS66 condition with only 88,600 coins struck. Census: 5 in 66, 6 finer (12/12). NGC ID# 234N, PCGS# 4392, CoinPlex ID# SHD1868

PROOF SEATED HALF DIMES

**Rare 1844 Half Dime, PR64
Razor-Sharp Strike**

- 3907 1844 PR64 PCGS.** Most proof examples of the 1844 half dime come from the Valentine-1 obverse die, as Heritage cataloger Jon Amato showed when cataloging the Phil Kaufman Collection example, a PR67 NGC coin. He also managed to identify only five separate proof coins — four V-1, one V-3 — from among the 13 then-current submissions at NGC and PCGS. Whatever the true number of survivors, it is safe to say that the issue is a great rarity, surviving to the extent of perhaps 10 certified and raw specimens in all.
- The present PR64 PCGS coin also comes from the V-1 obverse, with the date rather high and sloping slightly downward from left to right. This piece features a razor-sharp strike that complements deeply mirrored fields. Alternative waves of golden-russet and powder-gray to bluish toning provide just the right finish on this rare and attractive early proof. Population: 1 in 64, 1 finer (12/12). Ex: *American Numismatic Rarities* (9/2003), lot 218; *Stack's* (1/2007), lot 366; *Stack's* (3/2007), lot 498; *FUN Sale* (Heritage, 1/2012), lot 3119. PCGS# 4420, NGC ID# 235C, CoinPlex ID# SHP1844

**1855 Arrows Half Dime, PR65
Least Rare Date of the Arrows Type**

- 3908 1855 Arrows PR65 NGC.** Beginning in 1858, sales of proof coins to collectors increased dramatically, perhaps a reflection of the number of people who began serious collecting activity. It was about this time that the early coin dealers began operations in this country. Prior to 1858, mintages of proof coins were much smaller, with much less demand for these coins. Although a few individuals were active coin collectors in the earlier 1850s, production of proofs was primarily for presentation purposes to mark special occasions. Such was the case in 1855 when this lovely half dime was minted. As the Mint did not record such things at the time, it is not known how many were struck, but it is certainly the case that the total was limited to just a handful of pieces.

This lovely Gem Proof has iridescent toning over mirrored surfaces with frosty luster on the devices. The obverse has pale gold in the center, with a ring of blue surrounded by pewter-gray near the border. The reverse is mostly light gray with splashes of electric blue and pale olive. The design features are sharply detailed. On the reverse, a small diagonal mark atop the M in DIME is a clash mark, seen on certain other examples of this issue. Although not the finest survivor, this example certainly ranks well within the top 10 proofs of the date. Census: 4 in 65, 7 finer (11/12). NGC ID# 235T, PCGS# 4433, CoinPlex ID# SHP1855ARR

**1859 Half Dime, PR66 Cameo
Only Three Finer NGC Cameo Proofs**

- 3909 1859 PR66 Cameo NGC.** The date is boldly repunched at the base of the 1, and the 9 is also clearly repunched. This Gem specimen is untuned and presents a glittering, snow-white appearance overall. Few proof coins from the 1850s could match the contrast exhibited by this flashy Stars Obverse half dime. Census: 3 in 66 Cameo, 3 finer (11/12). PCGS# 84438, CoinPlex ID# SHP1859CA

- 3910 1860 PR65 NGC.** An attractively toned piece, the obverse displays colorful splashes of bright shades of orange, yellow, green, and red. Similar colors appear on the reverse in smaller quantities. This example is well-struck and exhibits reflective surfaces. Census: 19 in 65, 18 finer (12/12). NGC ID# 235V, PCGS# 4443, CoinPlex ID# SHP1860

- 3911 1860 PR66 PCGS. CAC.** Ocean-blue, gold, and cherry-red endow this colorful specimen. The strike is sharp except for the usual slight blending on the upper left portion of the wreath. A pair of hair-thin obverse marks are noted at 12 and 4 o'clock. This is a lovely representative from the first year of the Legend Obverse type. Population: 9 in 66 (1 in 66+), 3 finer (12/12). Ex: FUN West Palm Beach Signature (Heritage, 7/2007), lot 483. PCGS# 4443, NGC ID# 235V, CoinPlex ID# SHP1860

**1863 Seated Half Dime, PR66
Only 460 Pieces Struck**

- 3912 1863 PR66 NGC.** Only 460 proof Seated Liberty half dimes were struck in 1863, at the height of the Civil War. This impressive Premium Gem displays razor-sharp definition on all design elements, with deeply reflective fields that are blanketed in attractive shades of cerulean-blue and champagne-gold patina. Census: 15 in 66 (1 in 66+), 6 finer (12/12). NGC ID# 235Y, PCGS# 4446, CoinPlex ID# SHP1863

**PR66 Cameo 1865 Half Dime
High Grade Civil War Proof**

- 3913 1865 PR66 Cameo NGC. CAC.** Ex: Richmond Collection. A sharply struck Premium Gem that exhibits flashy fields and light straw-gold toning. Die polish has removed the drapery near the elbow, as coined, but post-strike imperfections are limited to faint contact to the left of Liberty's cap. Just 500 proofs were issued. Census: 6 in 66 Cameo, 1 finer as 66 Ultra Cameo (11/12).
Ex: *Richmond Collection, Part 3 (David Lawrence, 3/2005)*, lot 1103, which realized \$1,955. PCGS# 84448, CoinPlex ID# SHP1865CA

**1868 Seated Liberty Half Dime, PR66
Only One Numerically Finer Cameo Coin at PCGS**

- 3914 1868 PR66 Cameo PCGS. CAC.** The sharply detailed frosty design elements seem to float on the deeply reflective liquid fields of this spectacular Premium Gem. The well preserved surfaces are patinated in light shades of champagne-gold, with no mentionable distractions. Population: 6 in 66 (1 in 66+) Cameo, 1 finer (12/12). PCGS# 84451, CoinPlex ID# SHP1868CA

**Superb Gem Proof 1870 Seated Half Dime
None Certified Finer at PCGS**

- 3915 1870 PR67 PCGS.** A nominal mintage of 1,000 proof Seated Liberty half dimes was achieved in 1870, and few survivors can match the high technical quality and outstanding eye appeal of the present coin. This magnificent Superb Gem displays razor-sharp definition on all design elements and deeply mirrored fields under shades of champagne-gold and cerulean-blue patina. Population: 2 in 67, 0 finer (11/12).
Ex: *George O. Walton Collection (Stack's, 10/1963)*, lot 514, flip accompanies the lot.
From *The Teich Family Collection*. PCGS# 4453, NGC ID# 2367, CoinPlex ID# SHP1870

EARLY DIMES

- 3916 1796 — Repaired, Improperly Cleaned — NCS. VG Details. JR-1, R.3.** The obverse has been whizzed, and both sides are cleaned. A few small marks affect the 9 in the date, star 12, the wings, and the reverse exergue. Toned deep dove-gray with light cream color on the reverse motifs. Slightly wavy. NGC ID# 236B, PCGS# 4461, CoinPlex ID# EDM1796

Midgrade JR-5 1796 Dime, VF30

- 3917 1796 VF30 NGC. JR-5, R.5.** Among the scarcer 1796 die varieties, identified by two lengthy die cracks that intersect above Liberty's jaw. Untoned at the centers with cobalt-blue and golden-brown near the rims. Minimally abraded though we note a strike-through (as coined) above the bust tip. NGC ID# 236B, PCGS# 4461, CoinPlex ID# EDM1796

AU Sharpness 1796 Dime, JR-1

- 3918 1796 — Graffiti — PCGS Genuine. AU Details. JR-1, R.3.** Several moderate obverse pinscratches are noted, some of which form illegible letters on the right field. An attempted puncture is noted to the right of the 6 in the date. The reverse is undisturbed except for a single thin mark above the right (facing) wing. JR-1 is typically identified by the cud near star 1, in an intermediate state on the present coin. Toned olive-gray and cherry-red. Design definition is pleasing. PCGS# 4461, NGC ID# 236B, CoinPlex ID# EDM1796

**1797 JR-2 Dime, Good 6
13 Stars**

- 3919 1797 13 Stars Good 6 PCGS. JR-2, R.4.** The number of obverse stars easily distinguishes the two known die varieties of 1797, with 16 stars on JR-1 and 13 stars on JR-2. The latter variety is marginally rarer than the former. This light to medium gray example has pleasing surfaces with a full obverse border and the tops of letters merged into the reverse border. PCGS# 4463, NGC ID# 236D, CoinPlex ID# EDM179713ST

**1798 JR-3 Dime
Small 8, Four Berries**

- 3920 1798 Small 8 PCGS Genuine. JR-3, R.5.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been tooled and whizzed. This is the rare 1798 Normal Date variety with a Small 8 and four berries in the branch. This piece is sharply detailed with gray-gold patina and iridescent overtones, the surfaces showing trivial evidence of surface alteration. The obverse has heavy adjustment marks PCGS# 4467, NGC ID# 236E, CoinPlex ID# EDM1798SM8

**JR-4 1798 Dime, MS61
Large 8, Five Berries**

- 3921 1798 Large 8 MS61 NGC. JR-4, R.3.** The common Normal Date or Large 8 variety, with five berries in the branch on the reverse. This impressive Mint State specimen has lustrous light silver splashes among intermingled gold, russet, and steel-blue toning, creating a stunning display. Census: 3 in 61, 22 finer (12/12). NGC ID# 236E, PCGS# 4466, CoinPlex ID# EDM1798LG8

**1801 JR-1 Dime, VF30
Plentiful 1801 Die Marriage
Ideal for Date Collectors**

- 3922 1801 VF30 PCGS. JR-1, R.4.** The Draped Bust, Heraldic Eagle dimes were minted from 1798 to 1807, and the series has 22 die marriages, including two varieties of 1801. About two-thirds of all 1801 dimes are examples of the JR-1 die pair. This Choice VF specimen has light silver at the central obverse, with gold, blue, and steel toning. The reverse is almost entirely gold toned. A lovely example with pleasing surfaces for the grade. PCGS# 4471, NGC ID# 236J, CoinPlex ID# EDM1801

**1801 JR-1 Dime, XF45
Retains Considerable Luster**

- 3923 1801 XF45 PCGS. JR-1, R.4.** One of two varieties, both of which share the same obverse. On the JR-1 variety, a spine protrudes from the right shield tip into the field. Traces of luster cling to the design elements on this Choice XF specimen, and light gray-mauve, sky-blue, lavender, and yellow-gold patination covers both sides. Well centered devices reveal sharp definition for a date that is sometimes weakly struck. A few trivial marks are noted under magnification, but none are worthy of individual mention. All in all, a highly attractive early dime that is sure to bring a strong bid. Population: 4 in 45, 10 finer (12/12). PCGS# 4471, NGC ID# 236J, CoinPlex ID# EDM1801

**1802 JR-4 Dime, VF30
Scarce in all Grades**

- 3924 1802 VF30 PCGS. JR-4, R.4.** Although 1802 dimes are seen from time to time, the date is scarce in all grades. The Mint delivered 10,975 dimes on July 22, the only delivery of the year, although additional examples were likely struck in 1803. With about 125 to 150 pieces known, the JR-4 is the most common variety of all 1802-dated dimes. This pleasing piece has light silver devices with gray and iridescent toning in the fields, especially attractive on the reverse. None of the scattered surface marks are consequential. PCGS# 4472, NGC ID# 236K, CoinPlex ID# EDM1802

**1803 JR-3 Dime, VF30
Late Die State**

- 3925 1803 VF30 PCGS. JR-3, R.4.** The 1803 is a scarce date among early dimes, despite a mintage of 33,040 coins, fourth highest of all dates from 1796 to 1807. Likely many of those coins were actually dated 1802. The JR-3 is the most plentiful of the five known 1803 varieties. Light gray surfaces host vivid blue-green and iridescent toning with scattered marks. Both dies exhibit clash marks and die cracks. PCGS# 4473, NGC ID# 236L, CoinPlex ID# EDM1803

3926 1805 4 Berries Fine 15 PCGS. JR-2, R.2. Lavender and canary-gold embrace this unblemished Draped Bust type coin. The reverse is surprisingly sharp for the Choice Fine grade. Certified in a green label holder. PCGS# 4477, NGC ID# 236S, CoinPlex ID# EDM18054BERR

3927 1805 4 Berries VF20 PCGS. JR-2, R.2. Cream-white high points contrast with the dark gray fields. Glimpses of forest-green and golden-brown are also present. All letters in E PLURIBUS UNUM are at least partly evident. No marks are remotely worthy of mention. PCGS# 4477, NGC ID# 236S, CoinPlex ID# EDM18054BERR

**1805 JR-2 Dime, AU53
Four Berries Reverse**

3928 1805 4 Berries AU53 PCGS. JR-2, R.2. The Four Berries variety of 1805 dime is slightly more plentiful than the Five Berries reverse, although neither variety is rare. Minor lamination is noted on the reverse of this satiny and still lustrous example. Both sides have rich sky-blue and pale gold toning. PCGS# 4477, NGC ID# 236S, CoinPlex ID# EDM18054BERR

**Five Berries 1805 Dime, JR-1
AU Details, Attractive Toning**

3929 1805 5 Berries — Improperly Cleaned — NGC Details. AU. JR-1, R.3. The scarcer of the two 1805 dime varieties, though both are collectible. The present lightly circulated representative has attractive peripheral caramel-gold and sea-green toning. The centers show incompleteness of strike customary for the Draped Bust type. Only mildly cleaned. An edge flaw, as made, is at 4 o'clock. PCGS# 4478, CoinPlex ID# EDM18055BERR

**1807 JR-1 Dime, AU58
Quintessential Type Coin
Important Early Die State**

3930 1807 AU58 PCGS. JR-1, R.2. The lone 1807 dime variety is clearly the most plentiful of the series, with enough survivors that the date is also the most plentiful Heraldic Eagle issue. Approximately 30% of all survivors for the type are examples of 1807 JR-1. Although light clash marks are present, this early die state piece shows none of the usual die bulges or other heavy strike anomalies often associated with the issue. Sharply struck, the central obverse is light silver within a thick frame of blue, green, and gold toning. The reverse is entirely toned in a similar presentation with much underlying luster. PCGS# 4480, NGC ID# 236T, CoinPlex ID# EDM1807

BUST DIMES

**1809 JR-1 Dime, MS64+
Census Level Specimen**

3931 1809 MS64+ NGC. JR-1, R.4. Although considered scarce overall, the 1809 dime is rare in Mint State grades. Only one die marriage produced just over 50,000 coins, with the typical survivor falling in the middle VF grades. This Choice Mint State specimen has frosty luster beneath heather and light gray toning, with trivial marks that prevent a higher grade. Census: 6 in 64 (1 in 64+), 4 finer (12/12). NGC ID# 236U, PCGS# 4486, CoinPlex ID# EDM1809

1814 JR-3 Dime, MS64
Large Date; Shattered Reverse

- 3932 1814 Large Date MS64 NGC. JR-3, R.2.** The Large Date obverse is instantly identified as the 4 has a vertical serif at the right end of the crossbar, known as a "Crosslet 4." The Small date lacks that feature and is known as a "Plain 4." Delicate clash marks are evident in the obverse field, with a short crack from the border, nearly reaching the inside point of star 8. The reverse die is shattered, with several die cracks in the shield, and elsewhere. The obverse of this Choice Mint State piece has a few delicate scratches that prevent a higher grade. Both sides have frosty silver luster with no evidence of toning. NGC ID# 236W, PCGS# 4488, CoinPlex ID# EDM1814LD

1820 JR-11 Dime, MS63
Medium 0 Obverse

- 3933 1820 Medium 0 MS63 NGC. JR-11, R.3.** A scarce variety, the 1820 JR-11 is usually found in VF or XF grades, and rarely in Mint State. This Select specimen has gorgeous blue, green, and gold toning around lustrous light silver centers, with exceptional eye appeal. The frosty surfaces are fully lustrous with sharp design motifs. NGC ID# 236X, PCGS# 4492, CoinPlex ID# EDM1820LGO

Select Mint State 1825 Dime, JR-1
Multicolor Patination

- 3934 1825 MS63 PCGS. JR-1, R.4.** The A in STATES is strongly repunched on this attractively toned Select representative. Blue-green, golden-brown, and lilac shades encompass satiny and minimally abraded surfaces. Sharply struck at the centers though a couple of stars and the claws show softness. Population: 9 in 63, 16 finer (11/12). PCGS# 4503, NGC ID# 2374, CoinPlex ID# EDM1825

1825 JR-1 Dime, MS64
Probable Condition Census Specimen

- 3935 1825 MS64 PCGS. JR-1, R.4.** Star 8 appears to touch the upper curve of a dentil, and that is diagnostic for this variety, with a reverse having the A in STATES sharply doubled to the left. The reverse was also used for JR-3, but that variety Star 8 centered between the border and cap.

Although much information in the now 30 year old early dime book is out of date, general comments are still valid. The authors noted that very few examples of this variety grade better than XF45, so an MS64 is clearly an important piece. This Choice Mint State specimen is richly toned in gold and emerald, with full underlying mint luster and sharp design motifs. Population: 8 in 64, 8 finer (11/12) for all 1825 varieties. PCGS# 4503, NGC ID# 2374, CoinPlex ID# EDM1825

1827 JR-12 Dime, MS65
Probable Census Specimen

- 3936 1827 MS65 PCGS. CAC. JR-12, R.1.** While there is no accurate condition census of Capped Bust dimes, we suspect that this piece would rank high in such a list if one existed. Both sides of this Gem have satin luster with reflective fields, all beneath lovely gold, blue, and iridescent toning. Population: 12 in 65, 2 finer (12/12), for all 1827 varieties. PCGS# 4504, NGC ID# 2375, CoinPlex ID# EDM1827

- 3937 1828 Large Date AU53 PCGS. JR-2, R.3.** A briefly circulated example of this better Capped Bust *Guide Book* variety, represented solely by the JR-2 die pair. Mottled apple-green and golden-brown dominates both sides. PCGS# 4506, NGC ID# 2376, CoinPlex ID# EDM1828LD

- 3938 1830 Small 10C MS63 NGC. JR-2, R.1.** The sole Small Denomination die pair. Satiny and crisply struck with deep dove-gray and autumn-gold toning. Smooth save for minor marks on the right obverse field. PCGS# 4517, CoinPlex ID# EDM1830SM10C

- 3939 1832 MS63 PCGS. JR-4, R.3.** A scarcer die marriage, particularly in better Mint State grades. Delicate golden toning visits the obverse, while the reverse is essentially brilliant. The strike is incomplete on the eagle's neck but the remainder of the design is sharp. PCGS# 4521, NGC ID# 237C, CoinPlex ID# EDM1832

**Lustrous Near-Gem 1834 Dime
Small 4, JR-7**

- 3940** 1834 Small 4 MS64 NGC. JR-7, R.2. The long crossbar on the 4 in the date promptly attributes the collectible die variety. This lustrous near-Gem displays merely a wisp of golden toning. Impressively free from marks, and well struck aside from the claws and fletchings. A wonderful souvenir from the Age of Jackson. NGC ID# 237E, PCGS# 4525, CoinPlex ID# EDM1834S4

**1834 JR-5 Dime, MS64
Large, Broken 4**

- 3941** 1834 Large 4 MS64 PCGS. JR-5, R.1. The Large 4 in the date has its crossbar broken right of the upright. Both sides of this Choice Mint State piece, housed in a green-label PCGS holder, have bold design motifs with wisps of champagne toning over frosty silver luster. This common variety is elusive in Mint State grades. Population: 19 in 64 (1 in 64+), 11 finer (12/12), for all 1834 varieties. PCGS# 4526, CoinPlex ID# EDM1834L4

- 3942** 1835 MS64 NGC. JR-1, R.1. Lovely medium autumn-gold toning endows this coruscating and sharply struck near-Gem. Devoid of abrasions, and a delight for either the advanced type or series collector. NGC ID# 237F, PCGS# 4527, CoinPlex ID# EDM1835

- 3943** 1835 MS64 NGC. CAC. JR-5, R.1. A plentiful variety featuring a Block 8 date style. The obverse of this Choice Mint State specimen has ivory luster with speckled golden-brown toning along the border. The reverse has deeper gray-gold toning with russet shades about the periphery. NGC ID# 237F, PCGS# 4527, CoinPlex ID# EDM1835

- 3944** 1836 MS63 PCGS. JR-1, R.3. The 0 in 10 C leans left, a pick-up point for attribution of this moderately scarce die variety. Well struck and coruscating with attractive preservation. Golden-brown and blue-green freckles overlaid cream-gray surfaces. From The Gensch Numismatic Trust Collection. PCGS# 4528, NGC ID# 237G, CoinPlex ID# EDM1836

SEATED DIMES

- 3945** 1837 No Stars, Large Date MS62 NGC. A fully struck and satiny No Stars Seated type coin with medium walnut-brown and stone-gray toning. Only trivial contact is present. The surfaces show minute granularity. NGC ID# 237R, PCGS# 4561, CoinPlex ID# SDM1837NS

**1837 Seated Liberty Dime, MS64
No Stars, Small Date Variety**

- 3946** 1837 No Stars, Small Date MS64 PCGS. The 1837 Seated Liberty dime is always sought-after because of its two-year No Stars design. The Small Date variety is identified by the curved top 3 in the date. The present coin is sharply defined, with satiny mint luster, and attractive pale gold toning. Population: 14 in 64, 9 finer (12/12). PCGS# 4562, NGC ID# 237R, CoinPlex ID# SDM1837NSSMDT

**1837 No Stars Dime, Gem Uncirculated
Small Date Variant**

- 3947** 1837 No Stars, Small Date MS65 PCGS. The Small Date dimes are distinguished from the Large Date by the curved top on the 3 in the date. Both types represent the bulk of the No Stars dimes struck, the only exception being the 1838-O. The mint luster on this piece is frosted and exceptional. Both sides display light gray-golden toning, but much underlying brilliance is also evident. Sharply struck in all areas. Population: 5 in 65, 4 finer (11/12). From The Richard P. Ariagno, M.D. Collection. PCGS# 4562, NGC ID# 237R, CoinPlex ID# SDM1837NSSMDT

**1838-O Seated Liberty Dime, MS61
First O-Mint Issue, No Stars Type**

- 3948** 1838-O No Stars MS61 NGC. Mint records indicate only 406,034 dimes were coined at the New Orleans Mint in 1838, in its first year of operations. This well-detailed Mint State representative represents the popular No Stars design, and the lightly marked surfaces show dusky shades of bluish-gray and golden-brown toning. Census: 3 in 61, 28 finer (12/12). NGC ID# 237T, PCGS# 4564, CoinPlex ID# SDM1838OND

**1839 Seated Liberty Dime, MS65
Popular No Drapery Type**

- 3949 1839 No Drapery MS65 NGC.** A delightful Gem example of the short-lived No Drapery design, always in demand for type purposes. This coin displays vibrant frosty mint luster, under shades of dusky golden-tan toning. The surfaces are well-preserved and the design elements are sharply detailed. Census: 24 in 65 (1 in 65+), 35 finer (12/12). NGC ID# 237X, PCGS# 4571, CoinPlex ID# SDM1839ND

**1851 Seated Liberty Dime, MS65+
Repunched 851, Fortin-105**

- 3950 1851 MS65+ PCGS. Fortin-105, R.4.** The base of the 51 is clearly repunched, and the flag of a 1 is misplaced in the shield. Light golden-brown toning graces this lustrous, nicely struck, and essentially immaculate high-end Gem. Perhaps the single finest example of this obscure but interesting variety. Population: 5 in 65 (1 in 65+), 1 finer (12/12). PCGS# 4595, NGC ID# 238L, CoinPlex ID# SDM1851

- 3951 1853 Arrows MS65 PCGS.** Arrows were placed by the date to signify a weight change in 1853, and the short-lived design is extremely popular with type collectors. This is a nicely struck Gem. A lightly speckled gray patina appears on both sides of this example along with champagne and copper colors. Population: 75 in 65 (2 in 65+), 53 finer (12/12). PCGS# 4603, NGC ID# 2398, CoinPlex ID# SDM1853ARR

**Gem Arrows 1855 Dime
Three-Year Type Coin**

- 3952 1855 Arrows MS65 NGC.** A fully struck Gem that boasts vibrant luster and an unabraded appearance. The obverse displays light to medium lilac and honey-gold toning. The reverse has only a trace of tan patina. Interesting clash marks (as coined) from the drapery are prominent on the central reverse. Census: 4 in 65, 11 finer (11/12). NGC ID# 239C, PCGS# 4607, CoinPlex ID# SDM1855ARR

**1855 Seated Dime, MS65
Last Year With Arrows**

- 3953 1855 Arrows MS65 PCGS. CAC.** This delightful Gem represents the popular Arrows design, a three-year subtype initially struck in 1853 to indicate a weight change in most silver coinage (the silver dollar was excepted). This well-struck example displays vibrant mint luster under attractive pale gold toning. Population: 4 in 65, 7 finer (12/12). PCGS# 4607, NGC ID# 239C, CoinPlex ID# SDM1855ARR

- 3954 1857 MS65 PCGS. CAC.** Although the stars to the left show a touch of softness, the devices are bold. This carefully preserved and frosty silver-gray Philadelphia Gem was struck from lightly clashed dies. Population: 17 in 65, 2 finer (11/12). PCGS# 4614, NGC ID# 238X, CoinPlex ID# SDM1857

**Premium Gem 1859 Seated Dime
Attractive Luster and Toning**

- 3955 1859 MS66 NGC.** A spectacular Premium Gem representative of this popular antebellum issue, this coin displays sharply detailed design elements and vibrant satiny mint luster, under attractive shades of champagne-gold toning. Eye appeal is outstanding. Census: 11 in 66, 16 finer (12/12). PCGS# 4619, NGC ID# 2394, CoinPlex ID# SDM1859

- 3956 1860-O VF30 NGC.** The 1860-O is a scarce key date in the Seated dime series. Only 40,000 pieces were struck, and examples are eagerly sought in all grades. This piece exhibits gunmetal-gray color and overall even wear. Hints of green, yellow, and lilac appear on the obverse. Census: 5 in 30, 16 finer (12/12). NGC ID# 239E, PCGS# 4632, CoinPlex ID# SDM1860O

- 3957 1864 MS63 PCGS. CAC Gold Seal.** Apple-green and golden-brown adorn the margins of this lustrous and nicely struck dime. The dies are strongly clashed. Due to Civil War hoarding, just 11,000 pieces were issued. Certified in a first generation holder. *From The SPQR Collection of CAC Gold Sticker Coins.* PCGS# 4639, NGC ID# 239M, CoinPlex ID# SDM1864

- 3958 1871-CC — Improperly Cleaned — NGC Details. VG.** Five letters in LIBERTY are readable. The date and mintmark are bold. Stone-white with deeper toning on the left reverse and a spot on the wreath near 3:30. Just 20,100 pieces were issued, and survivors are highly elusive regardless of grade. NGC ID# 23A5, PCGS# 4654, CoinPlex ID# SDM1871CC

**1871-CC Dime, AU Details
Low Mintage Rarity**

3959 1871-CC — Environmental Damage — NGC Details. AU. This boldly detailed CC dime has heavy surface roughness with a few splashes of bright gray on each side. The porous obverse is mostly gray-gold and the similar reverse combines gray-gold, steel, and milky-gray patina. An important piece despite its appearance. NGC ID# 23A5, PCGS# 4654, CoinPlex ID# SDM1871CC

3960 1872-CC — Environmental Damage — NGC Details. AU. Mint records state a production of 24,000 pieces but the *Guide Book* reports a mintage of 35,480 coins. Rusty Goe notes that “this increase on paper has not resulted in an increase in surviving specimens.” This bold but moderately granular Carson City example is silver-gray with brown freckles. The obverse rim is filed at 2 o’clock and the reverse field is tooled beneath the M in DIME. NGC ID# 23A8, PCGS# 4657, CoinPlex ID# SDM1872CC

3961 1873-CC Arrows — Environmental Damage, Reverse Scratches — NGC Details. VG. A mintage of 18,791 pieces and an Old West origin combine to ensure the rarity of this early Carson City issue. Peripheral dark charcoal toning shows granularity, and the upper left reverse has a couple of slender marks. NGC ID# 23BH, PCGS# 4666, CoinPlex ID# SDM1873CCARR

3962 1874 Arrows MS64 PCGS. CAC. Light gray surfaces display green and orange accents on this near-Gem example. Minor contact marks held this piece from a higher grade. Population: 53 in 64, 55 finer (12/12). PCGS# 4668, NGC ID# 23BK, CoinPlex ID# SDM1874ARR

3963 1874 Arrows MS64 PCGS. CAC. This near-Gem displays essentially silver-white surfaces with frosty luster. The design elements are generally well brought up, except for the usual weakness on Liberty’s head and on the bow knot. A few small streaks of light brown color appear on the obverse. Population: 53 in 64, 55 finer (12/12). PCGS# 4668, NGC ID# 23BK, CoinPlex ID# SDM1874ARR

1874 Arrows Dime, Highly Lustrous MS66

3964 1874 Arrows MS66 NGC. Lovely color and exemplary surface preservation exist in equal portion on this Premium Gem 1874 Arrows dime, a nice representative of the two-year type. The date is slanting downward running from left to right, but we cannot match it to any of the varieties in www.SeatedDimeVarieties.com. Some interesting die lumps and a crack appear at Liberty’s right (facing) elbow and left thigh. The obverse shows a silver center complementing copper-aqua rim tones, with the reverse a more consistent deep copper. Marks are unworthy of mention. A nice example of the type. NGC ID# 23BK, PCGS# 4668, CoinPlex ID# SDM1874ARR

**1875-S Seated Liberty Dime, MS65+
Mintmark Above Bow**

3965 1875-S Mintmark Above Bow MS65+ PCGS. The 1875-S Seated Liberty dime with the mintmark above the bow is considerably more difficult to locate than the type with the S below the bow. This well-struck high-end Gem shows many die striations in the obverse field and the head and foot of Liberty. The reverse shows an extensive network of die cracks and clash marks. Both sides are completely brilliant, with vibrant mint luster and strong eye appeal. Population: 4 in 65 (1 in 65+), 3 finer (11/12). PCGS# 4677, NGC ID# 23AG, CoinPlex ID# SDM1875SMMABV

3966 1876-CC — Improperly Cleaned — NGC Details. Unc. Fortin-116a. Type One Reverse. Various spindly reverse die cracks allow attribution. Struck from rusted dies. The chestnut-gold surfaces are mildly subdued. Perhaps the most plentiful of all Carson City issues, but still a prized CC-mint type coin in the present grade. NGC ID# 23AJ, PCGS# 4680, CoinPlex ID# SDM1876CC

**Superb Gem 1879 Seated Dime
Prooflike Reflective Surfaces**

3967 1879 MS67 NGC. Only 14,000 business-strike Seated Liberty dimes were struck in 1879, and this magnificent Superb Gem is one of the finest survivors. The design elements are well-detailed and the fields are fully prooflike, under shades of lavender, blue, and champagne-gold patina. Census: 25 in 67, 3 finer (12/12). NGC ID# 23AS, PCGS# 4687, CoinPlex ID# SDM1879

3968 1880 MS66 PCGS. CAC. A rich patina, consisting primarily of shades of peach and brown, covers much of both sides of this Premium Gem. Small splashes of dark teal and fiery russet appear at the date. Population: 22 in 66, 13 finer (11/12). PCGS# 4688, NGC ID# 23AT, CoinPlex ID# SDM1880

3969 1883 MS66+ PCGS. CAC. Vivid toning in hues of sage-green, forest-green, plum, russet, and burnt-orange engulfs the majority of both sides of this high-end Premium Gem. A mark appears to the right of Liberty’s head. Population: 58 in 66 (1 in 66+), 11 finer (12/12). PCGS# 4691, NGC ID# 23AW, CoinPlex ID# SDM1883

3970 1884-S MS64 PCGS. CAC. Well-struck and lustrous, this example is almost entirely untuned other than a few small splashes of color. Minor hairlines and contact marks held this attractive example from a higher grade. Population: 14 in 64 (1 in 64+), 3 finer (12/12). PCGS# 4693, NGC ID# 23AY, CoinPlex ID# SDM1884S

- 3971 1885-S VF35 NGC.** A low-mintage key to the late date Seated Liberty dimes, this piece displays light gray color overall with a hint of champagne toning around outer portions of the obverse. A rim ding is visible near 3 o'clock on the obverse. Census: 2 in 35, 25 finer (12/12). NGC ID# 23B2, PCGS# 4695, CoinPlex ID# SDM1885S

**1886-S Seated Liberty Dime, MS66+
Exceptional Luster and Eye Appeal**

- 3972 1886-S MS66+ PCGS. CAC.** This high-end Premium Gem exhibits well-detailed design elements, with just a touch of softness on the ribbon bow. The brilliant surfaces radiate vibrant cartwheel mint luster on both sides, with just the slightest trace of pale gold toning. Eye appeal is terrific. Population: 6 in 66 (1 in 66+), 5 finer (12/12). PCGS# 4697, NGC ID# 23B4, CoinPlex ID# SDM1886S

**1889-S Seated Liberty Dime, MS65+
Only Two Finer NGC-Graded Examples**

- 3973 1889-S MS65+ NGC.** Shades of russet, yellow, frosted-green, and gray patina appear on large portions of this attractive, well-struck piece. A few light marks are visible when the coin is rotated. Only two examples have achieved higher grades from NGC, with both of those graded MS66. Census: 8 in 65 (1 in 65+), 2 finer (11/12). NGC ID# 23BA, PCGS# 4703, CoinPlex ID# SDM1889S

PROOF SEATED DIMES

**Near-Gem Proof 1856 Small Date Dime
Fully Struck and Richly Toned**

- 3974 1856 Small Date PR64 PCGS. CAC.** The Small Date 1856 dime has a slanted or italic 5 in the date, while the scarcer Large Date much more nearly fills the exergue beneath Liberty's rock and has an upright 5. The proofs are all struck from the Small Date dies, of which perhaps three dozen survive today. This near-Gem shows boldly struck surfaces with copper-amber color prevailing against olive-sage accents in the fields. Die doubling shows most plainly on the lower rock and shield. Population: 7 in 64, 4 finer (12/12). PCGS# 4745, NGC ID# 23CA, CoinPlex ID# SDP1856SD

**1859 Seated Dime, PR66 Cameo
Spectacular Multicolor Toning**

- 3975 1859 PR66 Cameo NGC.** The Mint's first commercial proof coin offering in 1858 was a big success. Accordingly, a substantial mintage of 800 proof Seated Liberty dimes was accomplished in 1859, but it is doubtful that all these coins were distributed. The present coin is a spectacular Premium Gem, with frosty design elements, deeply mirrored fields, and intense cameo contrast. The peripheries are toned in vivid shades of golden-brown and cobalt-blue. Census: 4 in 66 Cameo, 6 finer (11/12). PCGS# 84748, CoinPlex ID# SDP1859CA

- 3976 1860 PR64+ Cameo PCGS. CAC.** Rich mint frost sets off the sharply detailed design elements, which seem to float on the deeply mirrored fields of this high-end Choice Cameo proof. Eye appeal is terrific. Population: 8 in 64 (1 in 64+) Cameo, 16 finer (11/12). *From The Teich Family Collection.* PCGS# 84753, CoinPlex ID# SDP1860CA

- 3977 1861 PR64 Cameo PCGS.** This attractive piece is strongly mirrored with the devices displaying appreciable contrast. Both sides reveal pale gray patina with orange crescents at left. Population: 4 in 64 Cameo, 1 finer (12/12). PCGS# 84754, CoinPlex ID# SDP1861CA

**1864 Seated Liberty Dime, PR66 Cameo
Small Wartime Mintage of 470 Pieces**

3978 1864 PR66 Cameo PCGS. Only 470 proof Seated Liberty dimes were struck in 1864, along with a small wartime business-strike production of just 11,000 pieces. This spectacular Premium Gem displays vivid cameo contrast between the frosty devices and the deeply mirrored fields. The surfaces are graced by irregular areas of light blue, gray, and gold patina. Population: 6 in 66 Cameo, 2 finer (12/12). PCGS# 84757, CoinPlex ID# SDP1864CA

3979 1867 PR65 NGC. CAC. Fortin-101. Ex: Richmond Collection. Fire-red, cobalt-blue, and peach-gold shades enrich the borders of this precisely struck and flashy Gem. Minor die rust near the E in ONE. A scant 625 proofs were issued.
Ex: *Richmond Collection, Part III (David Lawrence, 3/2005)*, lot 1260, which realized \$1,840. NGC ID# 23CR, PCGS# 4760, CoinPlex ID# SDP1867

**Gem Proof 1867 Seated Dime
Spectacular Cameo Example**

3980 1867 PR65 Cameo PCGS. Only 625 proof Seated Liberty dimes were struck in 1867, and high-grade Cameo examples are very rare. This delightful Gem exhibits sharply detailed frosty design elements that contrast boldly with the deeply reflective fields. Hints of champagne-gold and powder-blue toning enhance the considerable eye appeal. Population: 7 in 65 Cameo, 3 finer (12/12). PCGS# 84760, CoinPlex ID# SDP1867CA

**Choice Proof 1867 Seated Liberty Dime
Rare Ultra Cameo Example**

3981 1867 PR64 Ultra Cameo NGC. CAC. Only 625 proof Seated Liberty dimes were produced in 1867, and the business-strike mintage was a paltry 6,000 pieces. This impressive Choice example features deeply mirrored fields that contrast starkly with the sharply detailed frosty design elements to create a stunning cameo effect. Vivid arcs of lime-green and cobalt-blue toning add to the considerable eye appeal. Census: 1 in 64 Ultra Cameo, 1 finer (12/12). PCGS# 94760, CoinPlex ID# SDP1867DC

**Superb Gem Proof 1868 Seated Dime
Finest Cameo Example at PCGS**

3982 1868 PR67 Cameo PCGS. Vivid shades of champagne-gold and violet-blue patina adorn the pristine surfaces of this spectacular Superb Gem, from a low proof mintage of just 600 pieces. The frosty design elements contrast boldly with the deeply mirrored fields in a stunning cameo effect. Population: 1 in 67 Cameo, 0 finer (12/12). PCGS# 84761, CoinPlex ID# SDP1868CA

3983 1869 PR65 Cameo NGC. Ex: Richmond Collection. Ice-white designs compare favorably with glassy fields. A brilliant and unmarked Gem. The strike is crisp except on the wreath opposite the left corner of Liberty's rock. Census: 4 in 65 (1 in 65+) Cameo, 10 finer (11/12).
Ex: *Richmond Collection, Part III (David Lawrence, 3/2005)*, lot 1262, which realized \$1,265. PCGS# 84762, CoinPlex ID# SDP1869CA

**Premium Gem Proof 1869 Seated Dime
High Quality Cameo Specimen**

3984 1869 PR66 Cameo PCGS. This wonderful Premium Gem Cameo proof displays light silver and champagne centers, with a frame of iridescent toning. The sharply detailed devices have frosty luster within fully mirrored fields. Overall eye appeal is terrific. Population: 4 in 66 (1 in 66+) Cameo, 1 finer (12/12). PCGS# 84762, CoinPlex ID# SDP1869CA

3985 1870 PR65 Cameo PCGS. A truly tantalizing Gem, this example is thinly toned silver-gray on the obverse but with a full-on gleam on the reverse. Both sides offer bold contrast and pleasing preservation. Although 1,000 proofs were struck, many sets went unsold and were eventually melted. Population: 7 in 65 (1 in 65+) Cameo, 2 finer (12/12).
Ex: *Long Beach Signature (Heritage, 9/2010)*, lot 5135, which realized \$2,070. PCGS# 84763, CoinPlex ID# SDP1870CA

**1871 Proof Seated Dime
Premium Gem Cameo Specimen**

- 3986 1871 PR66 Cameo PCGS.** The brilliant surfaces of this delightful Premium Gem show just a few hints of pale gold toning and the richly frosted devices stand out boldly against the deeply mirrored fields. The design elements are sharply rendered and eye appeal is extraordinary. Population: 2 in 66 Cameo, 0 finer (12/12). PCGS# 84764, CoinPlex ID# SDP1871CA

**PR66 ★ Cameo 1871 Dime
Repunched Date, Fortin-101**

- 3987 1871 PR66 ★ Cameo NGC, Fortin-101.** Ex: Richmond Collection. Like so many 19th century silver proofs from the Richmond holdings, the present specimen is untoned and exhibits impressive cameo frost. Tiny mint-made lint marks on the upper right obverse field provide identifiers. The 18 in the date is strongly repunched north. Census: 1 in 66 ★ Cameo, 2 finer with a Star designation (11/12). Ex: Richmond Collection, Part III (David Lawrence, 3/2005), lot 1264, which realized \$2,070. PCGS# 84764, CoinPlex ID# SDP1871CA

- 3988 1872 PR65 Cameo PCGS.** The 1872 is a popular, earlier date proof Seated dime with a mintage of 950 pieces. This Gem example exhibits attractive contrast between the frosted devices and the mirrored fields. Population: 6 in 65 Cameo, 5 finer (12/12). PCGS# 84765, CoinPlex ID# SDP1872CA

**PR67+ No Arrows 1873 Dime
Closed 3, Multicolor Toning**

- 3989 1873 No Arrows, Closed 3 PR67+ NGC.** Beautiful toning ensures the eye appeal of this well struck Superb Gem proof. Cherry-red and sun-gold borders frame the jade-green centers. One small light gray spot near the lowered elbow provides the sole imperfection. Census: 6 in 67 (1 in 67+), 1 finer (11/12). NGC ID# 23CX, PCGS# 4766, CoinPlex ID# SDP1873NA

- 3990 1873 No Arrows, Closed 3 PR65 Cameo NGC.** Ex: Richmond Collection. The devices are luminous and the fields are darkly reflective. This fully brilliant Gem is flawless aside from a narrow strike-through (as issued) on the reverse exergue. Census: 3 in 65 Cameo, 13 finer (11/12). Ex: Richmond Collection, Part III (David Lawrence, 3/2005), lot 1266, which realized \$1,265. PCGS# 84766, CoinPlex ID# SDP1873NACL3CA

**1873 Seated Dime, PR65
Short-Lived Arrows Design**

- 3991 1873 Arrows PR65 PCGS.** The weight of most silver coinage was adjusted in 1873, and the engraver placed arrows at the date to signify this change. The 1873 proof Seated Liberty, With Arrows dime claims a mintage of just 800 pieces and well-detailed Gems are quite rare today. This coin features deeply reflective fields under shades of vivid golden-brown and cerulean-blue toning. Population: 16 in 65, 6 finer (12/12). PCGS# 4769, NGC ID# 23DH, CoinPlex ID# SDP1873ARR

- 3992 1874 Arrows PR64 Cameo PCGS. CAC.** A moderately contrasted piece, this coin displays an attractive light gold patina. Light hairlines in the fields account for the grade. A small lint mark appears near the top of the N in ONE. Population: 14 in 64 Cameo, 0 finer (12/12). PCGS# 84770, CoinPlex ID# SDP1874ARRCA

- 3993 1875 PR66 Cameo PCGS.** Sharply detailed throughout, with deeply mirrored fields that contrast boldly with the frosty devices, this spectacular Premium Gem possesses extraordinary eye appeal. Attractive shades of champagne-gold and cerulean-blue patina enliven both sides. Population: 3 in 66 Cameo, 1 finer (11/12). Ex: Samuel W. Wolfson Collection, Part II (Stack's, 5/1963), lot 616, flip accompanies the lot. From The Teich Family Collection. PCGS# 84772, CoinPlex ID# SDP1875CA

**1875 Seated Dime, PR65+
Finest Deep Cameo Coin at PCGS**

- 3994 1875 PR65+ Deep Cameo PCGS.** This stunning Gem proof has exceptional contrast on both sides, with fully mirrored fields and lustrous devices. The surfaces are entirely brilliant and untuned. From a small proof mintage of 700 pieces this Gem specimen is the single finest Deep Cameo proof that PCGS has certified (12/12). PCGS# 94772, CoinPlex ID# SDP1875DC

3995 1876 PR65+ Cameo PCGS. CAC. Attractively toned in shades of champagne-gold and cerulean-blue, this high-end Gem displays delightful cameo contrast between the sharply detailed frosty devices and the deeply mirrored fields. Population: 6 in 65 (1 in 65+) Cameo, 0 finer (11/12).

Ex: Samuel Wolfson Collection, Part II (Stack's, 5/1963), lot 621, flip accompanies the lot.

From The Teich Family Collection. PCGS# 84773, CoinPlex ID# SDP1876CA

3996 1877 PR64 Cameo NGC. CAC. Fortin-101. Ex: Richmond Collection. Type Two Reverse. Frosty motifs rise above the flashy fields. Brilliant and unblemished. The reverse is lightly die doubled, most noticeably on the E in DIME. Census: 5 in 64 Cameo, 7 finer (11/12).

Ex: Richmond Collection, Part III (David Lawrence, 3/2005), lot 1271, which realized \$862.50. PCGS# 84774, CoinPlex ID# SDP1877CA

**1878 Seated Liberty Dime, PR66+
Only Four Finer Coins at NGC**

3997 1878 PR66+ NGC. According to Mint records, 800 proof Seated Liberty dimes were struck in 1878, but some of these probably went unsold and were melted at a later date. This high-end Premium Gem features well-detailed frosty design elements and reflective fields, but the contrast is limited by attractive shades of champagne-gold and powder-blue toning. Census: 10 in 66 (1 in 66+), 4 finer (12/12). NGC ID# 23D3, PCGS# 4775, CoinPlex ID# SDP1878

3998 1879 PR64 PCGS. CAC. Housed in a green-label PCGS holder, this Choice proof deserves further consideration as its field-to-device contrast seems sufficient for a Cameo designation. That is especially true on the brilliant obverse, and may hold for the heather-toned reverse. PCGS# 4776, NGC ID# 23D4, CoinPlex ID# SDP1879

3999 1879 PR66 PCGS. Dusky shades of green, gold, and blue patina grace the well-preserved surfaces of this spectacular Premium Gem. Sharply detailed design elements complement the deeply mirrored fields, ensuring outstanding eye appeal. Population: 16 in 66, 7 finer (11/12).

Ex: Pelletreau Collection (Stack's, 3/1959), lot 640, flip accompanies the lot.

From The Teich Family Collection. PCGS# 4776, NGC ID# 23D4, CoinPlex ID# SDP1879

**1879 Seated Liberty Dime, PR67
None Certified Finer at PCGS**

4000 1879 PR67 PCGS Secure. A generous mintage of 1,100 proof Seated Liberty dimes was accomplished in 1879, but only 14,000 business strikes were coined. This remarkable Superb Gem features well-detailed design elements and reflective fields, under dark shades of lime-green, golden-brown, and cobalt-blue toning. Population: 7 in 67, 0 finer (12/12). PCGS# 4776, NGC ID# 23D4, CoinPlex ID# SDP1879

4001 1879 PR65 Cameo PCGS. CAC. This brilliant example features a wide ring of toning on each side that includes deep shades of orange, russet, aquamarine, and sea-green with the reverse also including shades of red and plum. The centers exhibit a lovely light gold color. Population: 14 in 65 Cameo, 6 finer (12/12). PCGS# 84776, CoinPlex ID# SDP1879CA

**1880 Seated Liberty Dime, PR66
Finest Deep Cameo Example at PCGS**

4002 1880 PR66 Deep Cameo PCGS Secure. The Philadelphia Mint produced a record number of proof Seated Liberty dimes in 1880, with a production total of 1,355 pieces. This remarkable Premium Gem is one of the finest survivors, with richly frosted devices that contrast profoundly with the immaculate mirrored fields. Population: 1 in 66 Deep Cameo, 0 finer (12/12). PCGS# 94777, CoinPlex ID# SDP1880DC

4003 1881 PR66 PCGS. The reflective obverse of this Premium Gem exhibits deep, vivid toning in shades of iridescent frosted sea-green, deep electric-blue, fuchsia, and bright purple. A copper and gold patina covers much of the reverse, with splashes of green, blue, and purple away from the center. A few minor surface marks appear on both sides. Population: 12 in 66, 6 finer (12/12). PCGS# 4778, NGC ID# 23D6, CoinPlex ID# SDP1881

**1881 Seated Dime, PR67 Cameo
None Certified Finer at PCGS**

- 4004 1881 PR67 Cameo PCGS. CAC.** The intensely contrasted reflective fields and sharply detailed frosty devices of this incredible Superb Gem create a bold cameo flash when the coin is tilted in the light. Rare in the present extraordinary quality. Population: 5 in 67 Cameo, 0 finer (12/12). Ex; *FUN Signature (Heritage, 1/2006)*, lot 1786. PCGS# 84778, CoinPlex ID# SDP1881CA

- 4005 1882 PR65 NGC.** A dark patina covers both sides of this example, however the contrast between the fields and devices remains and reflectivity peeks through, particularly on the reverse. Gold, red, and green hues appear on the obverse. Census: 52 in 65, 48 finer (12/12). NGC ID# 23D7, PCGS# 4779, CoinPlex ID# SDP1882

**1882 Seated Liberty Dime, PR67
Only One Finer Coin at PCGS**

- 4006 1882 PR67 PCGS.** From a substantial proof mintage of 1,100 pieces, this remarkable Superb Gem is one of the finest survivors. The deeply mirrored fields are attractively toned in shades of champagne-gold and cerulean-blue and the frosty design elements are sharply detailed throughout. Population: 9 in 67, 1 finer (12/12). PCGS# 4779, NGC ID# 23D7, CoinPlex ID# SDP1882

**1882 Dime, PR66+ Cameo
Borderline Deep Cameo**

- 4007 1882 PR66+ Cameo PCGS. CAC.** It is our opinion that Gem Proof or finer Seated dimes are severely under-valued in today's numismatic marketplace. That is especially true for Cameo proofs. This Premium Gem Cameo proof will make a nice addition to a type set or complete collection. Both sides have highly lustrous devices with deeply mirrored fields and no evidence of toning. Population: 13 in 66 (1 in 66+) Cameo, 4 finer (11/12). PCGS# 84779, CoinPlex ID# SDP1882CA

- 4008 1883 PR66 PCGS.** Both sides of this dime exhibit rich toning. Shades of turquoise, light green, red, plum, and copper appear. The surfaces exhibit a high degree of reflectivity. Population: 37 in 66 (2 in 66+), 11 finer (12/12). PCGS# 4780, NGC ID# 23D8, CoinPlex ID# SDP1883

**Superb Gem Proof 1883 Seated Dime
No Finer Cameo Coins at PCGS**

- 4009 1883 PR67 Cameo PCGS. CAC.** A large proof mintage of 1,039 Seated Liberty dimes was accomplished in 1883, but few survivors display the bold cameo contrast of this coin. The design elements are sharply detailed and richly frosted, and the immaculate fields are deeply reflective, with a few accents of pale gold toning. Population: 5 in 67 Cameo, 0 finer (12/12). PCGS# 84780, CoinPlex ID# SDP1883CA

- 4010 1884 PR66 NGC. CAC.** The business strike 1884 Seated dime production was plentiful at more than 3.3 million pieces, but only 875 proofs were struck, down considerably from some earlier proof mintages in the series. This example displays attractive reflectivity through the rich red and blue toning that covers each side. The only mark of any note is a tiny planchet flaw in the left obverse field. Census: 41 in 66, 21 finer (12/12). NGC ID# 23D9, PCGS# 4781, CoinPlex ID# SDP1884

- 4011 1884 PR65 Cameo PCGS. CAC.** Light champagne color adds to the attractiveness of this example. The piece exhibits solid contrast between the devices and the fields. A few lint marks appear along with a planchet anomaly above the bow on the reverse. Population: 12 in 65 (1 in 65+) Cameo, 30 finer (12/12). PCGS# 84781, CoinPlex ID# SDP1884CA

- 4012 1884 PR66 Cameo PCGS.** A brilliant, untuned example displaying attractive contrast, this piece has lovely eye appeal. Although the business strike mintage was more than 3 million pieces, only 875 proofs were issued. Population: 16 in 66 Cameo, 14 finer (12/12). PCGS# 84781, CoinPlex ID# SDP1884CA

**1884 Seated Dime, PR67
No Finer Cameo Coins at PCGS**

- 4013 1884 PR67 Cameo PCGS.** From a nominal proof mintage of 875 pieces, this magnificent Superb Gem exhibits sharply detailed design elements, with rich frosty luster that contrasts intensely with the deeply mirrored fields. The pristine surfaces are blanketed in shades of vivid cobalt-blue and champagne-gold toning. Population: 14 in 67 Cameo, 0 finer (12/12). PCGS# 84781, CoinPlex ID# SDP1884CA

**1885 Seated Dime, PR68 ★
Bold Cameo Specimen**

- 4014 1885 PR68 ★ Cameo NGC.** The 1885 is common enough as a business strike with 2.5 million pieces struck. As a proof, its availability is much more limited with only 930 pieces produced. However, a surprising number have been preserved in high grade, including this stunning PR68 ★ Cameo specimen. This is an all-brilliant example with generous mint frost over the devices and deeply mirrored fields. Census: 3 in 68 Cameo, 3 in 68 ★ Cameo, 1 finer (12/12). PCGS# 84782, CoinPlex ID# SDP1885CA

- 4015 1886 PR66 ★ Cameo NGC. Fortin-103.** Ex: Pittman / Richmond. A stone-white Premium Gem pedigreed to two famous collections. Satiny and intricately struck. Census: 2 in 66 ★ Cameo, 1 finer with a Star designation (11/12).
Ex: Mike Kolman, 7/1961, lot 602; John Jay Pittman, Part One (David Akers, 10/1997), lot 671; Richmond Collection (David Lawrence, 3/2005), lot 1280, which realized \$1,725. PCGS# 84783, CoinPlex ID# SDP1886CA

**1886 Seated Dime, PR65+
Finest Deep Cameo Specimen at PCGS**

- 4016 1886 PR65+ Deep Cameo PCGS.** This brilliant Gem exhibits the absolute white-on-black contrast expected only on post-1970 proofs. The glassy fields and snowy devices appear flawless except for a tiny spot on an obverse denticle at 7:30. The strike is good with slight blending on the left corner of the rock and on the opposite portion of the wreath. Only 886 proofs were struck. Population: 1 in 65 (1 in 65+) Deep Cameo, 0 finer (12/12). PCGS# 94783, CoinPlex ID# SDP1886DC

**PR66 Cameo 1887 Dime
Beautifully Toned**

- 4017 1887 PR66 Cameo PCGS. CAC.** The attributes of this lovely example include a bold strike and cameo contrast. However, what really sets this piece apart is the gorgeous toning displayed on both sides. The obverse color is primarily an attractive light gold with shades of pink, red, and purple along with splashes of deep teal hugging the outer edges. The reverse has a particularly stunning appearance with brilliant teal color along with splashes of copper-gold highlighting the wreath. Gold, copper, and teal colors also appear in the fields. Population: 5 in 66 Cameo, 1 finer (11/12). PCGS# 84784, CoinPlex ID# SDP1887CA

- 4018 1888 PR64 Cameo PCGS Secure.** A lovely example with great field-to-device contrast with gold, orange, and rose peripheral toning around silvery centers. The strike is a trifle soft on Liberty's figure and the bow of the wreath. Population: 11 in 64, 24 finer (11/12). PCGS# 84785, CoinPlex ID# SDP1888CA

**1888 Seated Dime, PR66
Only Two Finer PCGS Coins**

- 4019 1888 PR66 Cameo PCGS.** Delicate champagne toning enhances the eye appeal of this impressive Premium Gem Cameo proof. Both sides exhibit radiant luster on the sharply detailed devices, floating over a field of deep mirrors. Population: 11 in 66 (1 in 66+) Cameo, 2 finer (11/12).
From The Richard P. Ariagno, M.D. Collection. PCGS# 84785, CoinPlex ID# SDP1888CA

- 4020 1889 PR65 Cameo PCGS. CAC.** Iridescent toning in a variety of attractive colors encircles both sides of this well-struck example. The centers display gold hues and large areas of reflectivity remain visible. The obverse exhibits a few lint marks. Population: 7 in 65 Cameo, 5 finer (12/12). PCGS# 84786, CoinPlex ID# SDP1889CA

- 4021 1889 PR66 Cameo NGC.** This coin exhibits tremendous eye appeal due to pronounced contrast and gorgeous toning. A champagne patina covers both sides, with areas of rainbow toning appearing on the obverse covering approximately half of the periphery. Census: 12 in 66 Cameo, 10 finer (12/12). PCGS# 84786, CoinPlex ID# SDP1889CA

- 4022 1890 PR66+ PCGS.** Subdued iridescent shades of teal-green cover areas of both sides of this high-end Premium Gem proof. Splashes of russet and red appear in the fields on the obverse. The piece exhibits a few minor surface marks. Population: 17 in 66 (1 in 66+), 6 finer (12/12). PCGS# 4787, NGC ID# 23DE, CoinPlex ID# SDP1890

- 4023 1891 PR66 PCGS.** Subdued iridescent rainbow toning creates an attractive look for this lovely example. The mintage of proof 1891 Seated Liberty dimes was a mere 600 pieces. Population: 19 in 66, 8 finer (12/12). PCGS# 4788, NGC ID# 23DG, CoinPlex ID# SDP1891

BARBER DIMES

- 4024 1893 MS66 ★ NGC.** The toning is simply stunning on this attractive Premium Gem, with the reverse being particularly appealing. A brilliant pale-yellow covers the outer peripheries, with iridescent deep aqua, plum, orange-brown, and dark pink among the other colors that appear. The obverse displays orange-brown color largely covering Liberty with deep aqua and a splash of red in the nearby fields adding lovely accents. Census: 16 in 66, 4 finer (12/12). NGC ID# 23DN, PCGS# 4800, CoinPlex ID# BRD1893

Mint State Sharpness Key 1895-O Dime

- 4025 1895-O — Stained — NGC Details. Unc.** Aside from the non-collectible 1894-S, the 1895-O is the unchallenged key to the Barber series. The median certified grade for the issue is VG10, but the present piece offers complete design detail and shows only inconsequential contact. The luster is subdued by deep olive-gray toning. NGC ID# 23DW, PCGS# 4807, CoinPlex ID# BRD1895O
- 4026 1895-S MS64+ PCGS. CAC.** Like many branch-mint issues of the 19th century, the 1895-S Barber dime was not saved in large numbers by collectors, and high-grade examples are rare in today's market. This is a lovely high-end near-Gem example displaying attractive green, gold, and orange toning, with hints of red. Population: 31 in 64 (3 in 64+), 7 finer (12/12). PCGS# 4808, NGC ID# 23DX, CoinPlex ID# BRD1895S
- 4027 1898-O MS64 NGC.** Ex: Pittman. The portrait is primarily stone-gray but the remainder of this New Orleans near-Gem exhibits apple-green, golden-brown, and lilac toning. Intricately struck and coruscating. Census: 9 in 64, 16 finer (12/12).
Ex: *John Jay Pittman Collection, Part One* (David Akers, 10/1997), lot 696. NGC ID# 230000000, PCGS# 4816, CoinPlex ID# BRD1898O
- 4028 1898-S MS64 NGC.** A boldly struck near-Gem, this piece has lustrous surfaces that display deep toning in shades of reddish-golden, russet, and gray color, particularly on the obverse. The only abrasion of note is a thin scratch under the O of ONE on the reverse. Census: 5 in 64, 9 finer (11/12).
Ex: *Dallas Signature* (Heritage, 12/2005), lot 480. NGC ID# 230000000, PCGS# 4817, CoinPlex ID# BRD1898S

1909-O Barber Dime, MS66

Duckor Provenance

- 4029 1909-O MS66 PCGS.** PCGS identifies this coin as "Ex: Duckor," though it does not match our January 2006 offering of the Duckor specimen. Dr. Duckor may have owned this as another example. It has a typical strike for the issue with frosty luster beneath gold and iridescent toning. Population: 13 in 66 (1 in 66+), 2 finer (11/12). PCGS# 4852, NGC ID# 23FD, CoinPlex ID# BRD1909O
- 4030 1915-S MS65 NGC.** Golden-brown patina covers large portions of the lustrous surfaces on this well-preserved Gem. Small splashes of cobalt-blue and deep purple also appear. This piece displays a sharp strike throughout. Census: 13 in 65, 12 finer (12/12).
Ex: *FUN Signature* (Heritage, 1/2008), lot 1042. NGC ID# 23FX, PCGS# 4869, CoinPlex ID# BRD1915S

PROOF BARBER DIMES

- 4031 1892 PR66 PCGS.** This first-year Premium Gem proof Barber dime is a deeply toned beauty, destined for a top Registry set. Both sides have lovely magenta and cobalt-blue toning. Population: 30 in 66, 10 finer (11/12).
From *The Teich Family Collection*. PCGS# 4875, NGC ID# 23G2, CoinPlex ID# BRP1892
- 4032 1892 PR65 Cameo PCGS.** A beautiful cameo, this piece displays fantastic contrast between the deeply mirrored fields and frosty motifs. Luminous surfaces are visited by waves of medium intensity cobalt-blue, lavender, and golden-brown toning on the obverse periphery, yielding to a near-brilliant center, while the reverse displays just a few speckles of evenly distributed light golden-tan color. The design elements are boldly impressed. A couple of minuscule marks on Liberty's cheek and neck, and another on the O of ONE, are not at all distracting. Population: 19 in 65 (1 in 65+) Cameo, 20 finer (11/12).
Ex: *Dallas Signature* (Heritage, 12/2005), lot 494. PCGS# 84875, CoinPlex ID# BRP1892CA
- 4033 1893 PR65 PCGS.** This impressive Gem proof Barber dime exhibits sharply detailed design elements and deeply reflective fields, but the most obvious visual attribute is the spectacular toning. Vivid shades of golden-brown, champagne-gold, and violet patina blanket the surfaces of both sides, with exceptional eye appeal. Population: 29 in 65, 38 finer (11/12).
Ex: *The Powers Collection* (Stack's, 12/1959), lot 322, flip accompanies the lot.
From *The Teich Family Collection*. PCGS# 4877, NGC ID# 23G4, CoinPlex ID# BRP1893
- 4034 1893 PR66+ NGC.** A beautifully struck example, this dime exhibits attractive contrast on the champagne-colored obverse. A matte patina that includes shades of gray and yellow allows the design elements to really stand out, providing a very pleasing appearance. Areas of reflectivity remain on the reverse. Census: 46 in 66 (1 in 66+), 26 finer (12/12). NGC ID# 23G4, PCGS# 4877, CoinPlex ID# BRP1893

**Super Gem Proof 1893 Barber Dime
Attractive Multicolor Toning**

- 4035 1893 PR67 NGC.** A nominal mintage of 792 proof Barber dimes was achieved in 1893, in the second year of the design. This spectacular Superb Gem specimen exhibits sharply detailed design elements and deeply mirrored fields, with attractive shades of champagne-gold and cerulean-blue patina. Census: 21 in 67, 5 finer (12/12). NGC ID# 23G4, PCGS# 4877, CoinPlex ID# BRP1893

**1893 Barber Dime, PR67
Only One Finer Coin at PCGS**

- 4036 1893 PR67 PCGS. CAC.** Second year of issue for the Barber Dime series, and one of only 792 proofs produced. Each side is deeply mirrored with this reflectivity being abundantly evident in spite of the deep sea-green and purple toning that covers each side. Close examination with a magnifier reveals a few faint hairlines on the right obverse field. A pleasing example of a richly toned, high grade, early Barber Dime. Population: 14 in 67, 1 finer (12/12). PCGS# 4877, NGC ID# 23G4, CoinPlex ID# BRP1893

**Superb Gem Proof Cameo Dime
Among the Finest PCGS-Certified**

- 4037 1893 PR67 Cameo PCGS. CAC.** The depth of reflectivity in the fields is extraordinary on this example and the devices are richly frosted. These features combine to create stark cameo contrast, which is readily evident at all angles. Both sides are virtually pristine, with the obverse bathed in varying hues of gold-brown, lavender, and cobalt-blue. The reverse displays whispers of light gold-tan peripheral toning. All of the design features are boldly impressed. Population: 8 in 67 Cameo, 0 finer (11/12). Ex: Dallas Signature (Heritage, 12/2005), lot 495, which realized \$7,475. PCGS# 84877, CoinPlex ID# BRP1893CA

- 4038 1895 PR65 Cameo PCGS.** The 1895 silver proof coins are popular, due to the importance of the proof-only silver dollar. This Gem Cameo proof dime has excellent eye appeal resulting from its gold toning splashed over brilliant mirrored fields and frosty devices. Population: 13 in 65 (1 in 65+) Cameo, 24 finer (11/12). From The Teich Family Collection. PCGS# 84879, CoinPlex ID# BRP1895CA

- 4039 1895 PR66 Cameo PCGS.** The 1895 proof dime is a key issue in the series, not only because of the low mintage of proofs (880 pieces), but also due to the scarcity and low mintage of business strikes with only 690,000 pieces produced. As a result, there is additional date pressure on high-grade 1895 proofs. This spectacular piece exhibits splashes of gold-brown, lavender, and aqua-blue on the obverse, while the reverse displays just a trace of gold color. Sharply struck design elements and exquisitely preserved surfaces combine for tremendous eye appeal. Population: 13 in 66 (1 in 66+) Cameo, 11 finer (11/12). Ex: Dallas Signature (Heritage, 12/2005), lot 497. PCGS# 84879, CoinPlex ID# BRP1895CA

**1895 Ten Cent, PR66 Deep Cameo
Extremely Rare in This Finish**

- 4040 1895 PR66 Deep Cameo PCGS.** The 1895 is one of the most plentiful issues in the Barber dime proof series, and even those with a cameo finish can be located with little difficulty. Deep/Ultra Cameos are extremely rare, however. The reflective fields of this Premium Gem Deep Cameo highlight the frosty motifs, all of which are exquisitely struck. The essentially untuned surfaces are nicely preserved. Population: 1 in 66 Deep Cameo, 2 finer (12/12). From The Richard P. Ariagno, M.D. Collection. PCGS# 94879, CoinPlex ID# BRP1895DC

- 4041 1896 PR65 Cameo NGC. CAC.** Ex: Richmond Collection. The portrait and wreath are frosty, and the mirrored fields are smooth and show only a whisper of golden patina. Census: 12 in 65 Cameo, 30 finer (11/12). Ex: Richmond Collection, Part III (David Lawrence, 3/2005), lot 1368, which realized \$1,265. PCGS# 84880, CoinPlex ID# BRP1896CA

**1897 Dime, PR67 Cameo
Lower Mintage Proof Issue**

- 4042 1897 PR67 Cameo PCGS.** Attractive contrast appears between the devices and the fields on this example, with the frosting more pronounced on the obverse. Exquisitely struck and immaculately preserved. The mintage of 731 pieces is the lowest of the series prior to 1904, not including the 1894-S rarity. Population: 11 in 67 Cameo, 1 finer (11/12). From The Richard P. Ariagno, M.D. Collection. PCGS# 84881, CoinPlex ID# BRP1897CA

**PR67 Cameo 1898 Dime
Beautifully Toned**

- 4043 1898 PR67 Cameo PCGS. CAC.** The obverse displays a band of iridescent toning and the reverse displays aqua and russet near the lower rim. Portions of this deeply reflective, well-contrasted coin remain untoned. This fully struck Superb Gem reveals no sign of contact, even under a loupe. Population: 8 in 67 Cameo, 3 finer (11/12). PCGS# 84882, CoinPlex ID# BRP1898CA

- 4044 1899 PR65 PCGS.** Liberal splashes of russet and blue-green toning cover both sides of this lovely deeply struck dime. Population: 36 in 65, 49 finer (12/12). PCGS# 4883, NGC ID# 23GC, CoinPlex ID# BRP1899

**Superb Gem Proof 1899 Barber Dime
Just One Finer Example at PCGS**

- 4045 1899 PR67 PCGS.** The obverse of this spectacular Superb Gem is lightly toned in attractive shades of champagne-gold and powder-blue, with a few spots of amber. The reverse is blanketed in slightly darker hues of gold and lavender, creating a memorable play of colors. The design elements are sharply detailed and the reflective surfaces shine through the toning, adding to the terrific eye appeal. Population: 14 in 67, 1 finer (11/12).
Ex: The Powers Collection (Stack's, 12/1959), lot 336, flip accompanies the lot.
From The Teich Family Collection. PCGS# 4883, NGC ID# 23GC, CoinPlex ID# BRP1899

**1899 Ten Cent, PR66 Cameo
Popular as Final Year of 19th Century**

- 4046 1899 PR66 Cameo PCGS. CAC.** As the final year for a 19th century type set, the 1899 has always enjoyed a little extra demand from collectors. Hints of soft gold color are visible on both sides of this Premium Gem, and sharply struck frosty devices are highlighted by the mirrored fields. Both sides are impeccably preserved. Population: 11 in 66 (2 in 66+) Cameo, 3 finer (12/12).
From The Richard P. Ariagno, M.D. Collection. PCGS# 84883, CoinPlex ID# BRP1899CA

- 4047 1901 PR66 PCGS.** Vivid toning, primarily iridescent teal in color, covers large portions of the outer edges on both sides of this well-struck dime. Shades of golden-apricot envelop the center of the obverse while gold with a hint of lilac appears on the reverse center. Areas of rainbow color also appear. Population: 28 in 66, 4 finer (12/12). PCGS# 4885, NGC ID# 23GE, CoinPlex ID# BRP1901

**1901 Dime, PR67
Beautifully Struck and Richly Toned**

- 4048 1901 PR67 NGC.** Splashes of orange-red, ocean-blue, and plum-russet color endow the obverse border but cede to brilliance at the center. The reverse is fully toned in apple-green and lilac colors. The strike is pinpoint-sharp, as expected of a proof striking, and hairlines or handling marks are not to be found. A mere 813 pieces were produced. The census data has not changed since the last auction appearance of this coin. Census: 13 in 67, 2 finer (11/12).
Ex: Dallas Signature (Heritage, 12/2005), lot 516. NGC ID# 23GE, PCGS# 4885, CoinPlex ID# BRP1901

- 4049 1904 PR64 PCGS. CAC Gold Label.** Cameo contrast is blatant, though undesignated as such due to the old green label generation of the holder. Fully struck, and brilliant aside from a trace of gold toning near the rims.
From The SPQR Collection of CAC Gold Sticker Coins. PCGS# 4888, NGC ID# 23GH, CoinPlex ID# BRP1904

- 4050 1905 PR65+PCGS.** Extraordinary album toning appears as concentric rings of lemon, teal, blue, violet, and gold on each side of this lovely Gem proof. Population: 43 in 65 (1 in 65+), 52 finer (11/12).
From The Teich Family Collection. PCGS# 4889, NGC ID# 23GJ, CoinPlex ID# BRP1905

**1905 Dime, PR67
Richly Toned**

- 4051 1905 PR67 PCGS. CAC.** This richly toned Superb Gem proof displays deep violet, crimson, and cobalt-blue at the borders and smoky golden-gray in the centers. Both sides yield sharply struck design elements and impeccable preservation. This issue is relatively available in numerical grades through PR66 but is elusive any finer. Population: 13 in 67, 0 finer (12/12). PCGS# 4889, NGC ID# 23GJ, CoinPlex ID# BRP1905

**PR67 Cameo 1905 Barber Dime
Among the Finest Certified**

- 4052 1905 PR67 Cameo NGC.** In addition to the glassy surfaces being brilliant and essentially as struck, they are also endowed with stark contrast between the fields and the devices. The quality of this impeccable Proof is impressive. From a proof mintage of 2,152 coins originally. Census: 16 in 67 Cameo, 2 finer (11/12).
Ex: Dallas Signature (Heritage, 12/2005), lot 519. PCGS# 84889, CoinPlex ID# BRP1905CA

1906 Dime, Richly Toned PR67

- 4053 1906 PR67 PCGS.** As expected of the grade, there is no visible sign of contact on this lovely toned Superb Gem proof 1906 Barber dime. Both sides are richly toned, the obverse largely rose-pink with a blue rim accents, the reverse cobalt-blue with dots of rose. A beautiful example from the mintage of 675 proofs. Population: 10 in 67 (1 in 67+), 1 finer (12/12). PCGS# 4890, NGC ID# 23GK, CoinPlex ID# BRP1906
- 4054 1907 PR66 Cameo PCGS.** Dappled russet and deep blue toning coats much of the obverse, while splashes of milky-tan color accent the reverse. Sharply struck, with no mentionable distractions, this is a lovely Premium Gem. Population: 2 in 66 Cameo, 2 finer (11/12).
Ex: Dallas Signature (Heritage, 12/2005), lot 508. PCGS# 84891, CoinPlex ID# BRP1907CA
- 4055 1909 PR65 PCGS. CAC Gold Label.** Obvious frost on the motifs would ensure a Cameo designation if not for the age of the green label holder. Peach-gold toning visits the lower obverse field. The present consignor has acquired an uncommonly large number of Gold CAC coins, but that designation remains much rarer than the usual Green CAC seal.
From The SPQR Collection of CAC Gold Sticker Coins. PCGS# 4893, NGC ID# 23GP, CoinPlex ID# BRP1909

**Superb Gem Proof 1909 Barber Dime
Only One Finer Coin at PCGS**

- 4056 1909 PR67 PCGS. Ex: Teich Family Collection.** From a small proof mintage of 650 pieces, this stunning Superb Gem Barber dime displays spectacular shades of violet and champagne-gold toning. The design elements are sharply detailed and the pristine fields are deeply mirrored. Population: 20 in 67, 1 finer (12/12). PCGS# 4893, NGC ID# 23GP, CoinPlex ID# BRP1909
- 4057 1910 PR66 NGC. CAC.** The powder-blue obverse center is bounded by butter-gold. The reverse is apricot and cherry-red. This razor-sharp specimen appears flawless aside from a small mint-made strike-through between the ME in AMERICA. Certified in a prior generation holder. NGC ID# 23GR, PCGS# 4894, CoinPlex ID# BRP1910
- 4058 1914 PR65 PCGS. CAC Gold Label.** The 1914 has the lowest proof mintage of the series. Just 425 specimens were issued. The present fully struck Gem displays gorgeous peach-gold and fire-red peripheral toning. The obverse center is gunmetal-gray while the central reverse is lime-green. Encapsulated in a first generation holder. PCGS# 4898, NGC ID# 23GV, CoinPlex ID# BRP1914
- 4059 1914 PR65 Cameo PCGS. Ex: Larry Shapiro.** Attractive gold hues cover large portions of both sides of this example, with liberal amounts of blue-green color appearing near the outer edges. Liberty displays additional accents of color, including teal, lilac, and green. Population: 9 in 65 Cameo, 3 finer (12/12). PCGS# 84898, CoinPlex ID# BRP1914CA
- 4060 1914 PR65 Cameo NGC. CAC. Ex: Richmond Collection.** A deeply mirrored Gem with blatant contrast and undisturbed untuned surfaces. A needle-sharp strike contributes further to the quality. Only 425 proofs were struck. Census: 6 in 65 Cameo, 5 finer (11/12).
Ex: Richmond Collection, Part III (David Lawrence, 3/2005), lot 1386, which realized \$2,070. PCGS# 84898, CoinPlex ID# BRP1914CA

TWENTY CENT PIECES

**1875-CC Twenty Cent Piece, MS62
Only Available CC-Mint issue**

- 4061 1875-CC MS62 PCGS.** This only-collectible-CC-Mint twenty cent piece is better struck than most, with strong definition on Liberty's head and the top of the eagle's wing. The lustrous surfaces are partially subdued by deep gray-rose toning that covers each side. There are no obvious or detracting abrasions on either side. PCGS# 5297, NGC ID# 23R6, CoinPlex ID# TWM1875CC

Multicolor MS65 1875-CC Twenty Cent

- 4062 1875-CC MS65 NGC.** Golden-brown centers are bounded by apple-green borders. Glimpses of cherry-red emerge from the major devices. Virtually free from contact, and nearly unobtainable any finer. The only collectible Carson City issue of the type. Housed in a prior generation holder. Census: 32 in 65, 4 finer (11/12). NGC ID# 23R6, PCGS# 5297, CoinPlex ID# TWM1875CC

1875-CC Twenty Cent Piece, MS65 Above-Average Strike

- 4063 1875-CC MS65 PCGS.** This is the first-year Carson City twenty cent coin, coming from a mintage of 113,290 pieces. Near-Gems can be located with patience and searching, but finer coins are very elusive. A veneer of subtle champagne-gold color resides on the lustrous surfaces of this Gem offering, and an above-average strike leaves sharp definition on most of the design elements, save for the usual softness at the top of the left (facing) wing and the center of the breast. A few minute marks are not out of the ordinary. Population: 20 in 65, 4 finer (12/12).
From *The Richard P. Ariagno, M.D. Collection*. PCGS# 5297, NGC ID# 23R6, CoinPlex ID# TWM1875CC

- 4064 1875-S MS64 PCGS. FS-301.** The top of a misplaced digit is in the dentils beneath the 8 in the date. Lustrous and sharply struck with blushes of golden-brown patina at the obverse margin. This lovely Choice type coin is certified in a green label holder. PCGS# 5298, NGC ID# 23R7, CoinPlex ID# TWM1875S

- 4065 1875-S MS64+ NGC.** The eye appeal of this high-end near-Gem cannot be denied. Attractive toning covers large portions of the outer edges on both sides of this coin. Prooflike areas, clash marks, and minor surface marks appear. NGC ID# 23R7, PCGS# 5298, CoinPlex ID# TWM1875S

Lustrous Premium Gem 1875-S Twenty Cent

- 4066 1875-S MS66 NGC.** A frosty, lustrous silver-white Premium Gem, this is an example of what is by far the most plentiful issue of the short-lived series, likely struck with silver from Nevada's Comstock Lode, whose output peaked in 1876-78. A few areas of darker smoke and charcoal appear under a loupe, along with a few minor grazes and stray marks. Interesting die cracks on the reverse encircle large portions of the periphery. This well-struck piece displays tremendous eye appeal. Census: 53 in 66, 7 finer (11/12). NGC ID# 23R7, PCGS# 5298, CoinPlex ID# TWM1875S

Patinated MS66 1875-S Twenty Cent Prominent Misplaced Date

- 4067 1875-S MS66 PCGS. CAC. MPD-002.** The top of an 8 looms above the dentils, similar to (but significantly more impressive than) the FS-301 misplaced date variety. The MPD-002 attribution is from the handy Kevin Flynn reference *Two Dates are Better Than One*. A pristine type coin with vibrant luster and beautiful golden-brown and aquamarine toning. The right-side stars are incompletely impressed despite a wire rim in the vicinity. PCGS# 5298, NGC ID# 23R7, CoinPlex ID# TWM1875S

1876 Twenty Cent Piece, MS64 ★ Low-Mintage Issue

- 4068 1876 MS64 ★ NGC.** A dazzling Choice example of this odd denomination, from a low mintage of 14,600 pieces. This coin exhibits vivid iridescent toning, in shades of lime-green and powder-blue, with sharply detailed devices and bright mint luster. Census: 82 in 64, 1 in 64 ★, 58 finer (12/12). NGC ID# 23R8, PCGS# 5299, CoinPlex ID# TWM1876

Gem 1876 Twenty Cent Piece

- 4069 1876 MS65 NGC.** A lovely Gem example of Philadelphia's second-year twenty cent business strike. Both sides are nearly untoned, with the fields on the obverse somewhat subdued while the reverse fields display reflectivity. A sharply struck example that would fit well in a short-but-satisfying twenty cent date set. Census: 38 in 65, 19 finer (11/12). NGC ID# 23R8, PCGS# 5299, CoinPlex ID# TWM1876

1876 Twenty Cent, MS65 Just 14,640 Pieces Struck

- 4070 1876 MS65 PCGS. CAC.** The 1876 has a tiny mintage of 14,640 pieces but is overshadowed by the very rare 1876-CC. The present lightly toned Philadelphia Gem has booming luster and a bold strike. The reverse is close to pristine while the obverse field displays only trivial grazes. Encased in an old green label holder. Population: 30 in 65, 14 finer (11/12). PCGS# 5299, NGC ID# 23R8, CoinPlex ID# TWM1876

PROOF TWENTY CENT PIECES

1875 Twenty Cent, PR65 Cameo

- 4071 1875 PR65 Cameo PCGS.** It is an intriguing coincidence that this piece was offered in the Tice Family Collection half a century ago and now appears in the Teich Family Collection. A lovely Gem Cameo proof, this twenty cent piece exhibits splendid contrast with amazing blue and iridescent toning, light silver at the centers. Population: 7 in 65 Cameo, 2 finer (11/12).
Ex: Tice Family Collection (Stack's, 6/1962), lot 687.
From The Teich Family Collection. PCGS# 85303, CoinPlex ID# TWP1875CA

1876 Twenty Cent Piece, PR65 Deeply Reflective Fields

- 4072 1876 PR65 NGC.** The second-year proof mintage of the twenty cent piece was less than half that of the first year — 2,790 coins for the 1875 versus 1,260 for the 1876 — and not even a Centennial Celebration could fan interest in the loathed denomination, which frequently cheated users out of a nickel. This Gem 1876 will spark fonder memories today, with its pristine, well-contrasted surfaces and attractive silver centers ringed with iridescence. Census: 26 in 65, 11 finer (11/12).
Ex: Long Beach Signature (Heritage, 9/2010), lot 3895. NGC ID# 27H3, PCGS# 5304, CoinPlex ID# TWP1876

1876 Twenty Cent Piece, PR63 Cameo

- 4073 1876 PR63 Cameo PCGS. CAC.** This impressive Centennial twenty-cent piece is fully brilliant with no trace of toning on its lovely silver surfaces. Both sides are nicely mirrored around lustrous devices, showing slight weakness at the central obverse. Population: 21 in 63 Cameo, 39 finer (11/12).
From The Teich Family Collection. PCGS# 85304, CoinPlex ID# TWP1876CA

1876 Twenty Cent Piece, PR64 Cameo

- 4074 1876 PR64 Cameo PCGS.** Although close examination with a glass reveals a few faint hairlines, this Choice Cameo proof is a highly attractive double dime, with brilliant silver surfaces that exhibit hints of violet and pale blue toning. Both sides show excellent contrast with deeply mirrored fields around lustrous and sharply detailed devices. Population: 26 in 64 Cameo, 13 finer (11/12).
Ex: Stack's.
From The Teich Family Collection. PCGS# 85304, CoinPlex ID# TWP1876CA

**Choice Proof 1876 Twenty Cent Piece
Stunning Deep Cameo Example**

- 4075 1876 PR64 Deep Cameo PCGS.** The frosty devices are fully defined and provide blatant contrast with the glassy fields. A lightly toned near-Gem of this scarce proof denomination. Unusual die polish lines are noted near stars 12 and 13. STATES exhibits minor die doubling. Population: 2 in 64 Deep Cameo, 2 finer (12/12). PCGS# 95304, CoinPlex ID# TWP1876DC

**1877 Twenty Cent Piece, PR63 Cameo
Proof-Only Issue, 510 Minted**

- 4076 1877 PR63 Cameo PCGS.** This impressive Select Cameo proof twenty-cent piece is fully brilliant with wisps of champagne on otherwise untuned silver surfaces. Both sides have deeply mirrored fields and frosty white devices. Population: 18 in 63 (2 in 63+) Cameo, 32 finer (11/12).
From The Teich Family Collection. PCGS# 85305, CoinPlex ID# TWP1877CA

**Cameo Choice Proof-Only
1877 Twenty Cent**

- 4077 1877 PR64 Cameo NGC.** Only 510 specimens were struck for this proof-only date. The present near-Gem is brilliant and offers contrast between the icy motifs and the flashy fields. Evenly struck and carefully preserved. Accompanied by a 1960s collector envelope from the Florida firm French's. PCGS# 85305, CoinPlex ID# TWP1877CA

**PR62 1878 Twenty Cent
Final Proof-Only Date**

- 4078 1878 PR62 NGC.** A wisp of wheat-gold toning graces the borders. A needle-sharp example of this proof-only date. Thorough rotation beneath a light eventually reveals delicate field hairlines. Moderate cameo contrast is present though undesignated. A 1960s dealer envelope from the Florida firm French's accompanies the lot. NGC ID# 27H5, PCGS# 5306, CoinPlex ID# TWP1878

**1878 Twenty Cent Piece, PR63
Only 600 Pieces Struck**

- 4079 1878 PR63 PCGS. CAC.** Only 600 proof twenty cent pieces were struck in 1878, and some of those may have been melted after June 29 of that year, when the denomination was discontinued. This impressive Select specimen is sharply detailed on the obverse, but the reverse shows the incomplete detail always observed on the eagle's crotch and the leaf stems. Both sides exhibit mostly brilliant reflective fields, with a few accents of champagne-gold and cobalt-blue toning. Eye appeal is outstanding.
From The Teich Family Collection. PCGS# 5306, NGC ID# 27H5, CoinPlex ID# TWP1878

**Gem Proof 1878 Twenty Cent Piece
Final Date in the Series**

- 4080 1878 PR65 NGC.** The twenty cent piece was retired after 1878 and the final proof-only mintage was a meager 600 pieces. This delightful Gem offers deeply reflective surfaces, under shades of blue, gold, and gray patina. Like all examples of this issue, the design elements show incomplete detail in the eagle's feathers, due to excessive die polishing. Census: 27 in 65 (1 in 65+), 24 finer (12/12). NGC ID# 27H5, PCGS# 5306, CoinPlex ID# TWP1878

**Select Proof 1878 Twenty Cent Piece
Scarce Cameo Example**

- 4081 1878 PR63 Cameo NGC.** An attractive Select proof example from the final year of the denomination, this coin exhibits deeply mirrored fields with a few areas of pale gold toning. Sharply detailed in some areas, this coin shows incomplete detail on the eagle's feathers, caused by excessive die polishing. The frosty devices stand out boldly against the reflective fields. Census: 18 in 63 Cameo, 80 finer (12/12). PCGS# 85306, CoinPlex ID# TWP1878CA

EARLY QUARTERS

**Fine Details 1796 Quarter, B-2
Rare Single-Year Type**

- 4082 1796 — Repaired, Whizzed — NGC Details. Fine. B-2, R.3.** The single-year Draped Bust, Small Eagle quarter is the second-rarest silver type, trailing only its half dollar counterpart. The present example has an ivory-white center with medium gray toning at the borders. The portrait is smoothed near the lower left base of the neck, and both sides are whizzed and hairlined. The obverse is granular and the eagle device is heavily worn relative to the rest of the coin. All legends are bold.
From The Hilltop Collection. NGC ID# 23RA, PCGS# 5310, CoinPlex ID# EQU1796

**1805 Quarter, B-3, XF45
Ex: Jules Reiver**

- 4083 1805 XF45 NGC. B-3, R.1. Ex: Jules Reiver.** Tompkins Die State 5/2. The rich forest-green borders also display lavender shades. The central obverse is golden-brown and stone-gray. Fairly well struck for this later die state with no weakness on the devices. One faded abrasion affects reverse star 3.
Ex: purchased from Stack's, 7/1988; Jules Reiver Collection (Heritage, 1/2006), lot 22308. NGC ID# 23RC, PCGS# 5313, CoinPlex ID# EQU1805

- 4084 1806/5 VF20 PCGS. B-1, R.2.** Tompkins Die State 2/3. The underdigit 5 is unmistakable, especially its bottom ball. This straw-gold and stone-gray Bust quarter has a fingerprint near the LIB in LIBERTY and dark granularity near the R in AMERICA. but the well defined surfaces are otherwise appealing. PCGS# 5315, NGC ID# 23RD, CoinPlex ID# EQU1806OVR5

- 4085 1806/5 VF30 ANACS. B-1, R.2.** Tompkins Die State 2/3. An obvious overdate with the lower half of the underdigit 5 visible to the unaided eye. Powder-blue, gunmetal-gray, and almond-gold toning enriches this glossy, unmarked, and lightly hairlined example. Nearly all of E PLURIBUS UNUM is sharp. NGC ID# 23RD, PCGS# 5315, CoinPlex ID# EQU1806OVR5

**1806 B-3 Quarter, XF45
Trace of Underlying Luster**

- 4086 1806 XF45 PCGS. B-3, R.1.** The 1806 is a plentiful date among Draped Bust quarters, and this variety is the second most common of the date. The combination yields an excellent type coin that will also fit nicely in a date or variety collection. This Choice XF example exhibits slate-gray, pale blue, and magenta toning with a trace of underlying luster. PCGS# 5314, NGC ID# 23RD, CoinPlex ID# EQU1806

**Choice XF 1806 B-3 Quarter
Intermediate Die State**

- 4087 1806 XF45 PCGS. B-3, R.1.** Die state c, an intermediate state, minted just prior to replacement of the obverse die for B-4. Additional specimens were also minted after B-4. This Choice XF specimen, likely ranking among the two dozen finest B-3 quarters, has attractive light gray surfaces with splashes of blue, gold, and russet toning near the borders. PCGS# 5314, NGC ID# 23RD, CoinPlex ID# EQU1806

- 4088 1807 VF25 PCGS. B-1, R.2.** The I in AMERICA is missing its right foot, the easiest method of distinguishing B-1 from the other die variety, B-2. The I in UNITED has intact feet, which suggests the letter punch became defective while the die was engraved. This unblemished example exhibits bold wing plumage and deep gunmetal-blue and forest-green toning. PCGS# 5316, NGC ID# 23RF, CoinPlex ID# EQU1807

BUST QUARTERS

1818/5 B-1 Quarter, MS64 Late Die State

- 4089 1818/5 MS64 NGC. B-1, R.2.** Die State e, the latest die state recorded in *Early Quarter Dollars of the United States Mint*. The top dozen examples of this overdate grade MS65 to MS67, with a small number of MS64 examples following close behind. This impressive Choice Mint State quarter has frosty silver luster beneath intense gold toning, with peripheral blue on the reverse. Census: 30 in 64 (1 in 64+), 11 finer (12/12). NGC ID# 23RH, PCGS# 5323, CoinPlex ID# EQU1818OVR5

- 4090 1818 XF45 PCGS. B-4, R.2.** Tompkins Die State 4/4. A sharply detailed Bust type coin with rich mauve-gray toning except on the pearl-white high points. The surfaces are glossy and unmarked.
Ex: *West Palm Beach Signature* (Heritage, 7/2007), lot 7698, which realized \$1,495. PCGS# 5322, NGC ID# 23RH, CoinPlex ID# EQU1818

1818 B-2 Quarter, MS62 Tied for 14th Finest

- 4091 1818 MS62 NGC. B-2, R.1.** Die State c, and typically attributed by the die crack in the obverse field over the cap. This example also has heavy clash marks and a reverse die crack from the right wing to the lower arrow head. This lovely Mint State specimen is tied for 14th in the Rea-Koenings-Haroutunian Census, although those census-takers were unaware of this example. Satin luster shines through the deep iridescent toning on both sides, with trivial and scattered surface marks that fail to limit the grade. NGC ID# 23RH, PCGS# 5322, CoinPlex ID# EQU1818

- 4092 1819 Small 9 XF45 NGC. B-3, R.1.** Tompkins Die State 4/3. Golden-brown and jade-green toning clings to the stars and lettering, but most of this well defined example is pearl-gray. Unmarked and faintly hairlined.
Ex: *Long Beach Signature* (Heritage, 6/2006), lot 1301, which realized \$1,236.25. NGC ID# 23RK, PCGS# 5325, CoinPlex ID# EQU1819S9

Near-Mint 1820 Quarter Small 0, Browning-4

- 4093 1820 Small 0 AU58 NGC. B-4, R.2.** The curls, plumage, and claws show slight wear but substantial mint flash remains. Dappled golden-brown, aquamarine, lilac, and cream-gray embrace this lightly abraded Borderline Uncirculated Bust quarter. B-4 is identified by a small 0 in the date and short lower leaves on the branch.
Ex: *Dallas Signature* (Heritage, 11/2007), lot 531, which realized \$3,450. NGC ID# 23RL, PCGS# 5328, CoinPlex ID# EQU1820S0

Prooflike Borderline Uncirculated B-4 1821 Quarter

- 4094 1821 AU58 Prooflike NGC. B-4, R.3.** The (12/12) NGC Census lists a single example certified as both B-4 and Prooflike. That coin is the present lot, and exhibits flashy fields and bold design definition. Rotation beneath a light reveals ocean-blue borders and slate-gray fields and devices. Minor field marks are consistent with the grade. Struck from clashed dies. NGC ID# 23RM, PCGS# 5331, CoinPlex ID# EQU1821

1821 B-4 Quarter, MS61
Date Collection Candidate

- 4095** 1821 MS61 NGC. B-4, R.3. Four of the six 1821 quarter varieties, including the B-4, are plentiful and represent ideal candidates for date collectors. This pleasing example has generally sharp details with full mint luster, showing satiny silver surfaces with peripheral iridescence. NGC ID# 23RM, PCGS# 5331, CoinPlex ID# EQU1821

Multicolor AU55 1822 Quarter, B-1

- 4096** 1822 AU55 NGC. B-1, R.2. Beautifully toned borders ensure the eye appeal of this lightly circulated Capped Bust type coin. The obverse margin is primarily ocean-blue with shades of autumn-gold and lilac-red. The reverse periphery is mostly caramel-gold but plum-red and cobalt-blue are also present.
Ex: Long Beach Signature (Heritage, 9/2006), lot 1499, which realized \$3,220. NGC ID# 23RN, PCGS# 5332, CoinPlex ID# EQU1822

1822 Quarter Dollar, 25/50C, B-2, VG10
Very Rare Variety
Problem Free

- 4097** 1822 25/50C VG10 PCGS. B-2, R.5. The blundered 25 over 50 reverse ranks among the most dramatic die errors in the Capped Bust quarter dollar series. The engraver started entering 50 C on this reverse die and then realized his mistake, repunching a 25 over the 50 to create the proper 25 C denomination. The B-2 die marriage is very rare and difficult to acquire in any grade.

This Choice Very Good specimen displays medium gray patination which is just slightly lighter on the reverse. The design elements are appropriately defined and centered on the planchet. The clasp shows, though weakly, as do some of the hair curls. About one-half of the eagle's feathers are clear, as are all the shield lines. The reverse dentilation is quite strong, and there are no marks worthy of note. This is a nice problem-free example that has just honest wear. Population: 7 in 10, 9 finer (12/12). PCGS# 5333, NGC ID# 23RH, CoinPlex ID# EQU182225OVR50C

**1824/2 Quarter, B-1, VF20
Beautiful Original Toning**

- 4098 1824/2 VF20 PCGS. B-1, R.3.** The sole die marriage for the year. The bottom loop of the 2 shows beneath the foot of the 4, and the 8 has both loops double-punched. The lighter gray high points on this Very Fine example contrast with slightly deeper gray on the remainder of the devices and lovely blue, green, and copper-gold hues in the fields on the obverse; the reverse is mostly ivory-white and copper-gold. A few scattered scrapes matter little, but the original surfaces should appeal to a wide variety of collectors. Certified in a green-label holder. PCGS# 5335, NGC ID# 23RR, CoinPlex ID# EQU1824OVR2

- 4099 1825/4/3 AU50 PCGS. B-2, R.2.** Substantial luster beckons from the borders and motifs of this sharply struck example. Predominately orange-gold with lilac and powder-blue also present. Thin marks are noted beneath the left scroll end and beneath the beak. PCGS# 5336, NGC ID# 23RU, CoinPlex ID# EQU1825

**1825/4/3 B-2 Quarter, MS63
Perfect Reverse Die**

- 4100 1825/4/3 MS63 PCGS. B-2, R.2.** The early die state from perfect dies is the most common die state of the B-2 marriage. This Select Mint State specimen is a delightful representative with frosty silver luster and beautiful blue, gold, and violet peripheral toning. Trivial hairlines and surface marks are evident on both sides. Population: 18 in 63, 26 finer (12/12), for all 1825 varieties. PCGS# 5336, NGC ID# 23RU, CoinPlex ID# EQU1825

**1831 B-1 Quarter, MS64
Small Letters Reverse**

- 4101 1831 Small Letters MS64 PCGS. B-1, R.3.** Die State b with peripheral reverse die cracks. Although more than 10 MS64 examples appear in the condition census, there are only two clearly finer examples of the 1831 B-1 recorded in that roster. This Choice Mint State piece has frosty silver luster with ivory surfaces and deep gold peripheral toning. A lovely example for the advanced collector. Population: 50 in 64, 19 finer (12/12), for all Small Letters varieties. PCGS# 5348, NGC ID# 23RW, CoinPlex ID# EQU1831

- 4102 1834 AU53 PCGS. CAC Gold Label. B-1, R.1.** Tompkins Die State 4/5. Luster dominates the borders of this briefly circulated Capped Bust quarter. Medium olive-gray toning graces minimally abraded surfaces. Certified in a green label holder. *From The SPQR Collection of CAC Gold Sticker Coins.* PCGS# 5353, NGC ID# 23RZ, CoinPlex ID# EQU1834

**1838 Quarter, MS62, B-1
Last Capped Bust Issue**

- 4103 1838 MS62 ANACS. B-1, R.1.** Die State a-b, with multiple ear bars but no apparent die cracks. The final Capped Bust quarter struck in a transitional year, this issue is always in great demand. The golden-ivory surfaces of this piece host splashes of sky-blue and iridescent toning. NGC ID# 23S5, PCGS# 5357, CoinPlex ID# EQU1838

SEATED QUARTERS

No Drapery 1840-O Quarter Large O, Repunched Date

- 4104** 1840-O No Drapery MS63 NGC. Briggs 1-A. Large O. The base of the 0 is repunched. Dove-gray centers gradually cede to straw-gold margins. Satiny and minimally abraded with a consistent strike. Faint parallel roller marks, as coined, are evident near Liberty's head and the denomination. Census: 6 in 63, 6 finer (11/12). NGC ID# 23SG, PCGS# 5393, CoinPlex ID# SQU1840OND

1842-O Small Date Quarter, VF20

- 4105** 1842-O Small Date VF20 NGC. The Small Date variation is considerably rarer than the Large Date of the same issue, and examples enjoy great demand in all grades. This natural pewter-gray specimen has lighter silver on the devices, with pleasing, mark-free surfaces. Census: 2 in 20, 40 finer (11/12). NGC ID# 23SN, PCGS# 5403, CoinPlex ID# SQU1842OSD
- 4106** 1843-O Large O Fine 12 PCGS. FS-501. Only one die marriage is known of this scarce variety. The difference in the size of the mintmark is obvious. Mahogany-brown toning overlies steel-blue surfaces. Close evaluation reveals a few moderate obverse marks. PCGS# 395927

Large O 1843-O Seated Quarter Still-Lustrous AU53

- 4107** 1843-O Large O AU53 PCGS. FS-501. Large O representatives of the 1843-O quarter are far scarcer than the norm for this antebellum issue. This is a remarkable find for the Seated quarter specialist. The light gray surfaces retain considerable luster, with myriad pricks on each side. A few prominent rust lumps are evident on the reverse. PCGS# 395927

- 4108** 1849-O Good 6 NGC. The mintage of the 1849-O is estimated at only 16,000 pieces. Its actual production number was rolled into the mintage for the 1850-O and thus the mintage figure is an educated guess. It is scarce in all grades, making this piece one of the more affordable options. Even wear and good color provide this example with an attractive appearance and there are no surface marks worthy of mention. Census: 2 in 6, 30 finer (11/12). NGC ID# 23T3, PCGS# 5414, CoinPlex ID# SQU1849O

- 4109** 1851-O VF20 NGC. Only 88,000 of these coins were produced. Though this example certainly spent time in circulation, it retains a very pleasing appearance. The wear is even overall and the piece displays an attractive gray patina. Census: 2 in 20, 15 finer (11/12). NGC ID# 23T7, PCGS# 5418, CoinPlex ID# SQU1851O

Mint State 1851-O Seated Quarter Low-Mintage Condition Rarity

- 4110** 1851-O MS60 NGC. Ex; Richmond Collection. From a mintage of just 88,000 pieces, the 1851-O Seated Liberty quarter is seldom encountered in Mint State condition. This well-detailed MS60 example exhibits lightly marked surfaces with hints of pale gold toning. The field show prooflike reflectivity in sheltered areas. Census: 1 in 60, 3 finer (12/12). NGC ID# 23T7, PCGS# 5418, CoinPlex ID# SQU1851O

Choice AU 1852-O Seated Quarter Only Two Numerically Finer Coins at PCGS

- 4111** 1852-O AU55 PCGS. The bountiful California Gold Rush lowered the traditional gold to silver ratio, driving silver coinage out of circulation. Mintages plummeted. The 1852-O quarter has a production of just 96,000 pieces and many were likely melted by speculators. The present example is mostly pearl-gray with hints of almond-gold. The strike is a bit soft on the upper obverse and lower reverse margins. Lightly hairlined but without bagmarks. Encased in a green label holder. Population: 2 in 55, 2 finer (12/12). PCGS# 5420, NGC ID# 23T9, CoinPlex ID# SQU1852O

**Very Rare Uncirculated Details
1852-O Quarter**

- 4112 1852-O — Improperly Cleaned — NGC Details. Unc.** By 1852, an influx of West Coast gold bullion had changed the traditional gold to silver ratio. Speculators melted many silver coins, and silver depositors became scarce. Thus, only 96,000 1852-O quarters were struck, and undoubtedly many were melted. The median certified grade is VF, and only a few Mint State pieces are known. The present satiny example lacks detrimental abrasions and is toned in subdued steel-blue and chestnut-gold shades. NGC ID# 23T9, PCGS# 5420, CoinPlex ID# SQU1852O

**1853/53 No Arrows Quarter, MS64
Richly Toned Example**

- 4113 1853/53 No Arrows MS64 NGC.** Repunching on the 53 in the date is easily seen with a magnifier. The mintage for the entire No Arrows type for 1853 was a mere 44,200 pieces, and only one die pairing is known. Therefore, all 1853 No Arrows quarters are technically double punched, but not all show it like this piece. The strike details are strong throughout, and the surfaces display deep red and gray patina. Out of 36 coins certified by NGC in all grades, only four other MS64s have been graded with 10 finer (12/12). NGC ID# 23TA, PCGS# 5421, CoinPlex ID# SQU1853OVR53NA

- 4114 1853 Arrows and Rays MS62 NGC.** Although the Arrows and Rays type was only produced for one year, collector demand for this issue is partially satisfied by the considerable mintage of 15.2 million pieces. Gold, gray, russet, and plum shades engulf both sides of this lovely example. The reverse displays a bold strike. A long linear planchet flaw appears within the rays above the eagle. NGC ID# 23U4, PCGS# 5426, CoinPlex ID# SQU1853ARRRAY

**1853 Arrows and Rays Quarter, MS64
Highly Sought After One-Year Type**

- 4115 1853 Arrows and Rays MS64 PCGS.** A dusky silver-gray example of this one-year type, solidly struck and impressively devoid of abrasions. The weight of the half dime through half dollar was reduced in 1853 to return the denominations to circulation. Arrows and rays were added to distinguish the new-tenor quarters and halves from earlier 1853 strikes, though the latter feature was dropped for the 1854 and later issues. PCGS# 5426, NGC ID# 23U4, CoinPlex ID# SQU1853ARRRAY

**1855 Seated Liberty Quarter, MS64
Short-Lived Arrows Design**

- 4116 1855 Arrows MS64 NGC.** The Arrows motif was a three-year design type, introduced in 1853 to indicate a weight change in most silver denominations. This attractive Choice specimen is well-detailed in most areas, but the date and arrows are lightly impressed. Satiny mint luster shines through shades of golden-tan and lavender toning. Census: 13 in 64, 14 finer (12/12). NGC ID# 23U8, PCGS# 5435, CoinPlex ID# SQU1855ARR

**Near-Gem 1855 Arrows Quarter
Only Ten Finer at PCGS**

- 4117 1855 Arrows MS64 PCGS. CAC.** Despite a rather healthy mintage of 2,857,000 pieces, this issue is conditionally rare in grades of MS64 and above. This brilliant near-Gem example exhibits a bold strike along with areas of copper and russet hues at the periphery, particularly near the date. The reverse displays copper-gold patina in the fields that is visible when the coin is rotated, with more pronounced shades appearing at the outer edges, providing an attractive backdrop to the eagle design. Population: 15 in 64 (1 in 64+), 10 finer (11/12). PCGS# 5435, NGC ID# 23U8, CoinPlex ID# SQU1855ARR

- 4118 1855-S Arrows AU53 PCGS.** The first San Francisco quarter issue, and also the only Arrows, No Motto issue from that West Coast facility. Despite a mintage of close to 400,000 pieces, few were saved and partly lustrous survivors are rare. Housed in a green label holder. Population: 4 in 53, 14 finer (12/12). PCGS# 5437, NGC ID# 23UA, CoinPlex ID# SQU1855SARR

**1856 Seated Quarter, MS65
Important Condition Rarity**

- 4119 1856 MS65 NGC.** A condition rarity among No Motto Seated quarters, the 1856 had a mintage exceeding 7 million coins, with only 25 certified by NGC and PCGS as MS65, and just 15 finer coins at the two grading services. This Gem exhibits an uneven strike, the upper obverse and lower reverse showing considerably less detail than elsewhere. Both sides are brilliant with satin luster and delicate champagne toning. Census: 13 in 65, 6 finer (11/12). NGC ID# 23TB, PCGS# 5438, CoinPlex ID# SQU1856

**1856-S Seated Quarter, XF45
Rarely Seen Finer**

- 4120 1856-S XF45 PCGS. CAC. Briggs 3-D.** This variety is characterized by the unusually high placement of the date, and on the reverse the mintmark is partially imbedded in the feather above. In spite of the generous mintage of more than a quarter-million coins, the 1856-S is seldom located in AU or Uncirculated grades. The surfaces of this piece show medium gray patina overall with contrasting near-brilliant high points. The fields are slightly roughened from circulation, but the only singularly mentionable defect is a planchet flake out of the right obverse field. Population: 8 in 45, 20 finer (11/12). PCGS# 5440, NGC ID# 23TD, CoinPlex ID# SQU1856S

Richly Toned MS66 1857 Seated Quarter

- 4121 1857 MS66 NGC.** This richly toned and carefully preserved Philadelphia Seated quarter has bold almost-sunset hues, a mix of interior peach shadings and blue and violet hues along much of the borders. Well-defined with subtly frosted central devices, a gorgeous type piece. Census: 42 in 66 (1 in 66+), 20 finer (12/12). NGC ID# 23TE, PCGS# 5442, CoinPlex ID# SQU1857

**XF40 1859-S Seated Quarter
Pre-Civil War San Francisco
Silver Minor**

- 4122 1859-S XF40 PCGS.** Pre-Civil War silver coinage from San Francisco is scarce almost to an issue, and the 1859-S quarter is no exception. This lightly worn example has deep patina, mostly blue-gray with a few areas of cerulean and deep steel. Old parallel lines at Liberty's stomach and a pinscratch in the right obverse field contribute to the grade. Population: 7 in 40, 12 finer (12/12). PCGS# 5450, NGC ID# 23TN, CoinPlex ID# SQU1859S

1863 Quarter, Deeply Toned Near-Gem

- 4123 1863 MS64 NGC.** Dapple-toned, though distinct areas of blue-green and peach are visible on the reverse. Excellent detail for this Civil War-era issue with swirling underlying luster. Collector focus was on proofs rather than business strikes at the time, but the impulse to save specie rather than spend it helped preserve a number of high-grade quarters from this year. Census: 11 in 64, 18 finer (12/12). NGC ID# 23TX, PCGS# 5458, CoinPlex ID# SQU1863

- 4124 1864-S VF25 PCGS.** A golden-brown patina covers both sides of this scarce piece that displays even wear. There are contact marks as expected given this level of circulation, however there are no marks worthy of mention. During the 1860s, San Francisco struck half dollars in considerable quantity but produced far fewer quarters. The 1864-S has a particularly paltry mintage of just 20,000 pieces. A contemporary absence of West Coast collectors ensured relatively few survivors. Population: 5 in 25, 22 finer (12/12). PCGS# 5460, NGC ID# 23TZ, CoinPlex ID# SQU1864S

- 4125 1866-S VF30 NGC.** The first year Motto San Francisco quarter has a tiny mintage of 28,000 pieces and is rare in all grades. The coin displays even wear and exhibits areas of golden-brown patina on the reverse. As expected at this grade level, contact marks are present; however, there are none worthy of mention. Census: 4 in 30, 7 finer (11/12). NGC ID# 23UC, PCGS# 5469, CoinPlex ID# SQU1866S

- 4126 1867 — Improperly Cleaned — NGC Details. AU.** Even though the Civil War was over by 1867, silver coins continued to be hoarded, due to Federal debt, Gresham's Law, and fractional currency. The 1867 has a mintage of just 20,000 pieces. This is a sharp but hairlined and mildly bright example that has substantial luster and peripheral rose-red toning. NGC ID# 23UD, PCGS# 5470, CoinPlex ID# SQU1867

**1870-CC Seated Quarter, VG Details
Rarest CC-Mint Quarter**

- 4127 1870-CC — Scratch — PCGS Genuine. VG Details.** The Carson City Mint opened in 1870, with a small first-year mintage of 8,340 Seated Liberty quarters. The 1870-CC is considered the rarest Carson City quarter and collectors prize the issue in all grades and conditions. This coin shows a number of fine pinscratches on the figure of Liberty. The design elements are well-worn, but all major outlines are intact. PCGS# 5477, NGC ID# 23UL, CoinPlex ID# SQU1870CC

- 4128 1871-CC — Reverse Scratched — NGC Details. AG.** The low mintage of 10,890 pieces went into western commerce and few if any examples were ever saved by collectors. The date is bold but QUAR. DOL. is nearly worn smooth. The mintmark is free from the rim and readable. One thin mark from a blade is beneath the right scroll end. NGC ID# 23UN, PCGS# 5479, CoinPlex ID# SQU1871CC

**1871-S Quarter, XF40
Condition Rarity**

- 4129 1871-S XF40 NGC.** An important low-mintage Seated quarter issue, the 1871-S survivors are nearly always found in circulated grades. Both sides of this example display light gray fields and deeper peripheral toning. A hint of gold color appears on portions of the legends and design on the reverse. NGC and PCGS combined have graded only 3 pieces at this level (11/12). NGC ID# 23UP, PCGS# 5480, CoinPlex ID# SQU1871S

- 4130 1872-CC — Improperly Cleaned — NGC Details. Fine.** A scant mintage of 22,850 pieces ensures the rarity of this Old West issue. NGC has a Census of 22 pieces in all grades (11/12). All legends are bold but the surfaces are mildly granular and exhibit unnatural rose-red and lilac shades. NGC ID# 23US, PCGS# 5482, CoinPlex ID# SQU1872CC

**Rarely Seen 1872-S Quarter
XF Sharpness**

- 4131 1872-S — Improperly Cleaned — NGC Details. XF.** The mintage of 83,000 pieces implies scarcity, but the 1872-S is even more difficult to locate than that figure suggests. Perhaps a portion of the mintage was melted in 1873 due to the weight change specified in the Act of 1873. NGC has certified a total of only 19 pieces in all grades, excluding the present cream-gray XF example, as it displays faint hairlines throughout both sides, along with a few short thin faded marks. NGC ID# 23UT, PCGS# 5483, CoinPlex ID# SQU1872S

**1873 Quarter, AU Details
No Arrows, Closed 3**

- 4132 1873 Closed 3 — Improperly Cleaned — NGC Details. AU.** The light silver surfaces of this scarce quarter show clear evidence of cleaning, now with delicate gold toning, mostly on the reverse. Just 40,000 Closed 3 quarters were struck in 1873, and survivors are usually in lower grades, if they can be found at all. NGC ID# 23UU, PCGS# 5484, CoinPlex ID# SQU1873CL3

- 4133 1875 MS65 PCGS.** Type One Reverse. A brilliant Gem that boasts potent luster and pleasing preservation. An outstanding addition to the advanced silver type collection. Population: 34 in 65, 22 finer (12/12). PCGS# 5498, NGC ID# 23UX, CoinPlex ID# SQU1875

- 4134 1877-CC MS64+ PCGS. CAC.** Small CC. The obverse displays medium sea-green and apricot-gold. The reverse shows deeper russet-brown and navy-blue patina. Lustrous and well preserved with a crisp strike. A triple set of clash marks, as made, is evident near Liberty's raised arm and above the date. PCGS# 5505, NGC ID# 23V6, CoinPlex ID# SQU1877CC

Colorful MS65+ 1878-CC Quarter

- 4135 1878-CC MS65+ PCGS.** Remarkably well-preserved with a mix of blue-violet and peach shadings, the former hue prevailing on the obverse and the latter the reverse. While the peripheral detail is uneven, the underlying luster is strong and true. An attractive example of one of the more accessible Carson City minor silver issues. Population: 23 in 65 (1 in 65+), 5 finer (12/12). PCGS# 5509, NGC ID# 23V9, CoinPlex ID# SQU1878CC

1879 Quarter, MS66 Beautifully Toned

- 4136 1879 MS66 PCGS Secure.** Only 13,600 Seated Liberty quarters were struck in 1879, but a surprising number of high-grade specimens have survived. This beautifully toned, well-detailed Premium Gem exhibits the often seen touch of softness on Liberty's head. The surfaces include a mixture of satiny mint luster and prooflike reflectivity. The centers primarily display a peach patina, while fiery-orange, fuchsia, dark electric-blue, and deep purple colors appear at the outer edges, providing this coin with tremendous eye appeal. PCGS# 5511, NGC ID# 23VB, CoinPlex ID# SQU1879

Premium Gem 1881 Quarter Attractively Toned

- 4137 1881 MS66 NGC.** From a minuscule mintage of just 12,000 pieces, the 1881 Seated Liberty quarter is rarely encountered in Premium Gem condition. Orange, dove-gray, and lime iridescence embrace this satiny and unusually mark-free Premium Gem. A few of the upper left stars are soft, but the major devices are penetratingly struck. The vertical shield stripes are lightly die doubled. Census: 13 in 66, 10 finer (11/12).
Ex: Dallas Signature (Heritage, 10/2006), lot 920. NGC ID# 23VD, PCGS# 5513, CoinPlex ID# SQU1881

- 4138 1885 MS64 PCGS.** A beautifully toned near-Gem, this piece has an attractive proof-like appearance particularly on the reverse and displays minimal abrasions. The iridescent colors appear on both sides and include shades of bright sage-green and copper-gold. Population: 19 in 64, 31 finer (12/12). PCGS# 5517, NGC ID# 23VH, CoinPlex ID# SQU1885

- 4139 1888 MS64 PCGS.** Areas of golden-brown toning appear on this bright near-Gem example, primarily at the outer edges. The coin displays strong detail overall and exhibits only a few very minor contact marks. PCGS# 5520, NGC ID# 23VL, CoinPlex ID# SQU1888

- 4140 1889 MS65 NGC.** The 1889 is a well-known low mintage issue with only 12,000 business strikes produced. This Gem displays a sharp strike overall, with only minor areas of incompleteness. Both sides exhibit a radiant satin luster, providing tremendous eye appeal. NGC ID# 23VM, PCGS# 5522, CoinPlex ID# SQU1889

1889 Quarter Dollar, MS66 Boldly Struck

- 4141 1889 MS66 PCGS.** The essentially untuned surfaces (save for an occasional wisp of golden-brown) of this Premium Gem Seated quarter display attractive frosty luster, and a solid strike emboldens the design features. A stray mark or two does not detract from the coin's nice overall eye appeal. Population: 41 in 66, 27 finer (12/12).
From The Richard P. Ariagno, M.D. Collection. PCGS# 5522, NGC ID# 23VM, CoinPlex ID# SQU1889

- 4142 1891-O VF20 PCGS.** After a gap of 31 years, the New Orleans Mint resumed coinage of Seated dimes and quarters in 1891. The dimes are plentiful due to a mintage of more than 4.5 million pieces, but the quarters are rare, as only 68,000 pieces were struck. Few were set aside since collectors of the day generally ignored mintmarks. This moderately worn piece displays an attractive patina in various shades of gray. The reverse exhibits a number of contact marks. Population: 6 in 20, 41 finer (12/12). PCGS# 5525, NGC ID# 23VS, CoinPlex ID# SQU1891O

PROOF SEATED QUARTERS

1846 Quarter Dollar, PR64
Among Finest at PCGS

- 4143 1846 PR64 PCGS.** A few years ago Larry Briggs wrote a two-part series in the Coin Dealer Newsletter in which he stated that the 1846 was among the more “common” proofs of the 1840s, “if there is such a thing, with 15-18 pieces.” Perhaps that was the original mintage, but we think such an estimate is far overblown if he meant survival to the present day. In fact, the PCGS population stands at eight submissions in PR64 with none finer, the same as when we last handled this piece eight years ago. Light rose and lilac hues prevail on this lustrous near-Gem, with bright fields forming a perfect backdrop for the sharply defined devices. A few minuscule marks appear in the fields under a loupe. Population: 8 in 64, 0 finer (12/12).
Ex: Rarities Sale (Bowers and Merena (1/2002), lot 407, which realized \$9,200; JFS Collection / Pittsburgh Signature (Heritage, 8/2004), lot 352, which brought \$8,625. PCGS# 5540, NGC ID# 23W9, CoinPlex ID# SQP1846

Pittman's Choice Proof 1856 Quarter
Unknown Low Mintage

- 4144 1856 PR64 PCGS. CAC.** *Ex: Pittman.* An unknown but small number of proofs were struck of the 1856 quarter. In the 1998 Pittman catalog, Akers estimated that 30 pieces were extant of the 1856 quarter. That is probably still a reliable estimate of survivors. The fields are nicely reflective, even through the significant toning seen on each side. The obverse is light golden with deep blue around the margin, while the reverse is even cobalt-blue. Minimal problems for the grade with only light hairlines evident beneath the toning. *Purchased by John Pittman from Wayte Raymond 5/14/1946 for \$25; John Jay Pittman Collection, Part II (David Akers, 5/1998), lot 1333. PCGS# 5552, NGC ID# 23WH, CoinPlex ID# SQP1856*

Deeply Toned PR65 Cameo 1857 Quarter
Tied With Two Others As Finest Known

- 4145 1857 PR65 Cameo NGC.** Not only is this a conditionally scarce coin, it displays magnificent toning that provides a high degree of visual allure. The 1857 quarter is rarely found in proof format with only 15-20 examples believed known. As a Cameo coin, it is even rarer, with the highest PCGS-graded example being a single PR64+. Liberty is toned a shimmering gold color on this example, with iridescent deep teal and vibrant pink highlights near the top of her head and the cap. Those highlights repeat along the outer edges of the coin, with areas of red also present. The reverse displays light gold color primarily, however the outer edges are largely ringed by iridescent teal and orange. Census: 3 in 65 Cameo, 0 finer (11/12). PCGS# 85553, CoinPlex ID# SQP1857CA
- 4146 1858 PR64 PCGS.** Although the estimates vary, it is likely that no more than 100 proof Seated Liberty quarters were struck in 1858. Attractive champagne and deep gold toning covers Liberty, further accentuating the contrast on the obverse. The outer edges display deeper shades of color, including electric-blue, teal, red, and copper. Minor surface marks appear, primarily on the obverse. Population: 13 in 64 (1 in 64+), 4 finer (12/12). PCGS# 5554, NGC ID# 23WK, CoinPlex ID# SQP1858

**1860 Quarter, Nearly Brilliant PR64 Cameo
Good No Motto Type Coin**

- 4147 1860 PR64 Cameo PCGS.** Like the 1859 and 1861, the 1860 proofs were struck in quantities far in excess of actual demand. The official mintage was an even 1,000 pieces, but 458 were melted at year's end. Most of the survivors do not display cameo contrast, as seen on this piece. Much brilliance is seen over each side with just a hint of pale reddish patina present. Population: 12 in 64 Cameo, 10 finer (11/12).
From The Teich Family Collection. PCGS# 85556, CoinPlex ID# SQP1860CA

**1862 Quarter, Gem Proof
Low Mintage of Only 550 Pieces**

- 4148 1862 PR65 NGC.** Proof mintages dropped drastically in 1862 because of the financial stresses of the Civil War. Only 550 proof Seated Liberty quarters were struck. This sharply detailed Gem exhibits attractive shades of bluish-gray and champagne-gold toning over reflective fields that show few signs of contact. Census: 10 in 65, 14 finer (12/12). NGC ID# 23WP, PCGS# 5558, CoinPlex ID# SQP1862
- 4149 1863 PR64 PCGS.** Medium golden-brown centers are encompassed by deep plum-red, sea-green, and cobalt-blue shades. Sharply struck and flashy. A mere 460 proofs were issued. Housed in an old green label holder. PCGS# 5559, NGC ID# 23WR, CoinPlex ID# SQP1863

**Lovely PR64 Deep Cameo 1863 Quarter
Only Two Finer PCGS-Graded Examples**

- 4150 1863 PR64 Deep Cameo PCGS. CAC.** The extreme contrast between the mirrored surfaces and the frosted devices creates fantastic visual allure on this wonderful example. The golden-yellow patina that covers both sides of the coin further enhances the contrast. Areas of deep gold and apricot are visible around the outer rim of the obverse when the piece is examined closely. Population: 1 in 64 Deep Cameo, 2 finer (11/12). PCGS# 95559, CoinPlex ID# SQP1863DC

**Gem Proof 1868 Seated Liberty Quarter
Only Three Numerically Finer Coins at PCGS**

- 4151 1868 PR65 PCGS.** Only 600 proof Seated Liberty quarters were struck in 1868, to accompany a small business-strike emission of just 29,400 pieces. The limited mintage of business strikes has always put considerable pressure on the small supply of proofs from date collectors. This delightful Gem is sharply detailed throughout, except for just a touch of softness on the banner. The deeply mirrored fields are toned in spectacular shades of cobalt-blue, sea-green, and dove-gray, with no mentionable distractions. Population: 9 in 65 (1 in 65+), 3 finer (11/12).
Ex: Tice Family Collection (Stack's, 6/1962), lot 720, flip accompanies the lot.
From The Teich Family Collection. PCGS# 5567, NGC ID# 23WZ, CoinPlex ID# SQP1868

- 4152 1869 PR64 Cameo PCGS.** Both sides of this near-Gem proof display stunning Cameo contrast, along with exquisitely struck design features. Untoned surfaces are nicely preserved. Population: 10 in 64 (1 in 64+) Cameo, 6 finer (12/12).
Ex: Long Beach Signature (Heritage, 2/2009), lot 1113. PCGS# 85568, CoinPlex ID# SQP1869CA

**1873 Arrows Quarter, Near-Gem Cameo
Low-Mintage, Two-Year Type**

- 4153 1873 Arrows PR64 Cameo PCGS.** The production of 540 proofs is nowhere near enough to satisfy collector demand for this two-year type, even if all of them were still extant today (which they are not). This is an exceptionally attractive example, one that is brilliant throughout with stark contrast evident between the deeply mirrored fields and frosted devices. No obvious defects are apparent on either side. Population: 13 in 64 Cameo, 5 finer (11/12).
From The Teich Family Collection. PCGS# 85574, CoinPlex ID# SQP1873ARRCA

1874 Arrows Quarter, PR64+

- 4154 1874 Arrows PR64+ PCGS. CAC.** This impressive Arrows quarter, struck in the second and final year of its design, is a borderline cameo proof with exquisite light gold toning and peripheral cobalt-blue accents. Liberty's upper torso shows slightly indistinct details, bolder elsewhere.
From The Teich Family Collection. PCGS# 5575, NGC ID# 23XS, CoinPlex ID# SQP1874ARR

1874 Arrows Quarter, PR63 Cameo Pursued Two-Year Type Coin

- 4155 1874 Arrows PR63 Cameo PCGS. CAC.** Noticeable field-device contrast is the hallmark of this Select proof 1874 Arrows quarter, from a mintage variously given as either 850 or 700, depending on whether one consults the *Breen Proof Encyclopedia* or the *Guide Book*. But in either case, the Arrows subtype makes the issue in hot demand. The strike is full on this piece, and there are only scattered, minor signs of contact. Population: 6 in 63 Cameo, 27 finer (12/12). PCGS# 85575, CoinPlex ID# SQP1874ARRCA

Deep Cameo PR66 1875 Quarter Ex: Bruce Scher

- 4156 1875 PR66 Deep Cameo PCGS Secure.** Ex: Bruce Scher. While not a commemorative (the late Mr. Scher's series of choice), this specimen shows his remarkable eye for top-quality U.S. coinage. Luster is reflective and contrast intense with only a skiff of ivory toning and hints of champagne. Population: 2 in 66 Deep Cameo, 0 finer (12/12). PCGS# 95576, CoinPlex ID# SQP1875DC

- 4157 1878 PR64 NGC. CAC.** A mere 800 proof Seated Liberty quarters were minted in 1878, as the Mint devoted most of its resources to the first year of Morgan dollar production. When examined closely under a light source, this coin displays an attractive array of colors. The contrast is very pleasing and the majority of the fields remain highly reflective. Census: 56 in 64, 28 finer (12/12). NGC ID# 23XA, PCGS# 5579, CoinPlex ID# SQP1878

- 4158 1879 PR64 PCGS. CAC.** This delightful Choice proof displays sharply detailed design elements and deeply reflective fields, under attractive shades of golden-brown toning. Population: 75 in 64, 44 finer (11/12).
Ex: Pelletreau Collection (Stack's, 3/1959), lot 711, flip accompanies the lot.
From The Teich Family Collection. PCGS# 5580, NGC ID# 23XB, CoinPlex ID# SQP1879

- 4159 1879 PR64 PCGS. CAC.** Ocean-blue, plum-red, and wheat-gold adorn this needle-sharp near-Gem proof Seated quarter. Flashy and undisturbed. Light marks on the outside of the holder have no impact on the coin itself. Certified in a first generation holder. PCGS# 5580, NGC ID# 23XB, CoinPlex ID# SQP1879

1879 Seated Quarter, PR66 Undesignated Cameo Contrast

- 4160 1879 PR66 PCGS. CAC.** The 1879 Seated Liberty quarter claims a generous proof mintage of 1,100 pieces. This spectacular Premium Gem displays brilliant mirrored fields that contrast boldly with the frosty design elements. The surfaces are well-preserved and eye appeal is outstanding. Housed in a green label holder. Population: 16 in 66, 1 finer (12/12). PCGS# 5580, NGC ID# 23XB, CoinPlex ID# SQP1879

- 4161 1880 PR64 Cameo NGC. CAC.** Ex: Richmond Collection. Type One Reverse. Snow-white designs float above mirrored fields. This satiny near-Gem is untuned and displays only trivial hairlines. Increased proof production in 1880 was due to the Trade dollar in the set, unavailable elsewhere.
Ex: Richmond Collection, Part III (David Lawrence, 3/2005), lot 1551, which realized \$1,495. PCGS# 85581, CoinPlex ID# SQP1880CA

- 4162 1881 PR65 NGC.** Gold, rose, and violet hues mingle with the prominent gray shadings on this Gem proof. Attractively detailed and carefully preserved under the toning with hints of past contrast. Census: 39 in 65, 47 finer (12/12).
Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 3599. NGC ID# 23XD, PCGS# 5582, CoinPlex ID# SQP1881

- 4163 1881 PR64+ Cameo PCGS. CAC.** The devices are frosty on this high-end near-Gem, particularly on the reverse, with the mirrored fields providing attractive contrast. A number of very tiny freckles appear on the obverse. Population: 13 in 64 (1 in 64+) Cameo, 45 finer (12/12). PCGS# 85582, CoinPlex ID# SQP1881CA

**1882 Seated Quarter, PR66
Attractive Multicolor Toning**

- 4164 1882 PR66 NGC. CAC.** The fairly generous proof mintage of 1,100 Seated Liberty quarters was accompanied by a tiny business-strike production of 15,200 examples in 1882, putting some pressure on the proof supply from date collectors. This well-detailed Premium Gem displays reflective surfaces under shades of cerulean-blue and champagne-gold patina. Census: 40 in 66 (3 in 66+), 16 finer (12/12). NGC ID# 23XE, PCGS# 5583, CoinPlex ID# SQP1882

**1883 Seated Quarter, PR67
None Finer at PCGS**

- 4165 1883 PR67 PCGS.** This boldly detailed Superb Gem has pale gold and heather toning on both sides, with a splash of steel-blue along the right obverse border and over much of the reverse, with accompanying lime-green. Population: 8 in 67, 0 finer (11/12). *From The Teich Family Collection.* PCGS# 5584, NGC ID# 23XF, CoinPlex ID# SQP1883

White Cameo PR66 1883 Quarter

- 4166 1883 PR66 Cameo NGC.** Ex: Richmond Collection. Frosty devices rise above darkly reflective fields. This brilliant and pristine Premium Gem provides exemplary eye appeal. Only 1,039 proofs were struck, and business production was limited to 14,400 pieces. *Ex: Richmond Collection, Part III (David Lawrence, 3/2005), lot 1554, which realized \$3,565.* PCGS# 85584, CoinPlex ID# SQP1883CA

1887 Quarter, Deeply Mirrored PR67

- 4167 1887 PR67 PCGS.** The obverse of this Superb Gem proof has considerable violet and gold toning with a few splashes of brilliant silver, while the reverse is entirely brilliant and untuned. Both sides display fully and deeply mirrored fields. All design elements are crisply defined. Population: 3 in 67, 0 finer (11/12). PCGS# 5588, NGC ID# 23XK, CoinPlex ID# SQP1887

- 4168 1887 PR65 Cameo NGC.** Ex: Richmond Collection. A brilliant Gem that exhibits exemplary contrast between the icy devices and the glassy fields. The strike is bold except for the stars. One lint mark (as made) in the field near the C in AMERICA. Census: 5 in 65 Cameo, 10 finer (11/12). *Ex: Richmond Collection, Part III (David Lawrence, 3/2005), lot 1558, which realized \$2,185.* PCGS# 85588, CoinPlex ID# SQP1887CA

**1888 Quarter, Deeply Toned PR65
Brightly Mirrored Fields**

- 4169 1888 PR65 PCGS. CAC.** The total mintage of both business strikes and proofs from 1888 was a paltry 10,800 pieces. The 800 proofs are generally well-produced and this is one of the better-preserved Gems. Each side is layered in deep shadings of blue, sea-green, and pale magenta with bright mirrors in the fields underlying and brightening the toning. Population: 18 in 65, 12 finer (11/12). *From The Teich Family Collection.* PCGS# 5589, NGC ID# 23XL, CoinPlex ID# SQP1888

**1888 Seated Quarter, PR65 Cameo
Spectacular Toning**

- 4170 1888 PR65 Cameo PCGS Secure.** Stunning burnt-orange and cobalt-blue toning accents the surfaces of this delightful Gem, from a proof mintage of 832 pieces. The design elements are well-detailed, with a touch of softness on the obverse. The deeply mirrored fields shine through the toning to create bold cameo contrast with the frosty devices. Population: 9 in 65 Cameo, 5 finer (12/12). PCGS# 85589, CoinPlex ID# SQP1888CA

4171 1889 PR65 Cameo NGC. CAC. Ex: Richmond Collection. This white-on-black Gem has a needle-sharp strike and tremendous eye appeal. Only trivial hairlines prevent a finer designation. Census: 15 in 65 Cameo, 17 finer (11/12).
Ex: *Richmond Collection, Part III (David Lawrence, 3/2005), lot 1560, which realized \$2,300.* PCGS# 85590, CoinPlex ID# SQP1889CA

4172 1890 PR65 PCGS Secure. Although this piece exhibits a medium intensity gunmetal-blue and lavender patination overall, closer examination reveals a slew of rich colors, particularly on the reverse, including teal, red, and copper. The design elements are sharply struck. Population: 21 in 65, 39 finer (12/12). PCGS# 5591, NGC ID# 23XN, CoinPlex ID# SQP1890

4173 1891 PR65 NGC. CAC. Magnificent cobalt-blue, plum-red, and olive-gold toning invigorates this flashy Gem. Intricately struck and undisturbed. One of 600 proofs struck. Housed in a prior generation holder. Census: 32 in 65, 36 finer (12/12). NGC ID# 23XP, PCGS# 5592, CoinPlex ID# SQP1891

4174 1891 PR64 Cameo NGC. CAC. Ex: Richmond Collection. A brilliant Choice proof with darkly reflective fields and frosty devices. Well struck. A couple of minor roller marks, as issued, cross Liberty's chest.
Ex: *Richmond Collection, Part III (David Lawrence, 3/2005), lot 1562, which realized \$977.50.* PCGS# 85592, CoinPlex ID# SQP1891CA

1891 Proof Seated Liberty Quarter Superb Gem Cameo Example

4175 1891 PR67 Cameo NGC. Only 600 proof Seated Liberty quarters were struck in 1891, the last year of the design. This magnificent Superb Gem displays richly frosted devices that contrast starkly with the deeply mirrored fields to produce the coveted cameo effect. The surfaces are mostly brilliant, with just a trace of pale gold toning. Eye appeal is outstanding. Census: 20 in 67 Cameo, 2 finer (12/12). PCGS# 85592, CoinPlex ID# SQP1891CA

BARBER QUARTERS

Patinated Superb Gem 1892 Quarter Type One Reverse

4176 1892 MS67 PCGS. CAC. Type One Reverse. Olive-gray toning embraces the obverse with glimpses of brick-red near the rim. The reverse is sea-green and walnut-brown with traces of stone-gray on the field beneath STATES. Pristine and lustrous. The strike is intricate except on the fletchings and nearby claw. Population: 24 in 67, 3 finer (11/12). PCGS# 5601, NGC ID# 23XT, CoinPlex ID# BQU1892

4177 1893 MS65 NGC. As the second year of issue, the 1893 is a high mintage date commonly seen in better grades, although it is elusive in Gem or finer grades as the population data indicates. Copper and teal highlights along with splashes of red appear when this lustrous piece is examined under magnification. Census: 26 in 65, 7 finer (12/12). NGC ID# 23XW, PCGS# 5604, CoinPlex ID# BQU1893

Premium Gem 1893-O Barber Quarter Stunning Prooflike Fields

4178 1893-O MS66 PCGS. CAC. This sharply detailed Premium Gem displays deeply reflective prooflike fields that are seldom encountered in a branch-mint issue. The surfaces are attractively toned in shades of cerulean-blue and champagne-gold, with outstanding eye appeal. Population: 9 in 66, 2 finer (12/12). PCGS# 5605, NGC ID# 23XX, CoinPlex ID# BQU1893O

4179 1896-S — Obverse Scratched, Cleaned — NGC Details. VF. An important low-mintage key, the 1896-S Barber quarter is prized by collectors in all grades and conditions. A long, almost imperceptible, scratch, from the rim at 3 o'clock to the center of the portrait constitutes the noted damage.
From *The J.D. Tanner Collection*. NGC ID# 23Y9, PCGS# 5615, CoinPlex ID# BQU1896S

4180 1896-S — Harshly Cleaned — NGC Details. XF. This sharply detailed key date quarter is thickly hairlined and has a small obverse rim nick at 3 o'clock. Golden-brown and sea-green toning fills the obverse border. Missing from most collections of the series. NGC ID# 23Y9, PCGS# 5615, CoinPlex ID# BQU1896S

XF Details 1896-S Quarter

- 4181 1896-S — Improperly Cleaned — NGC Details. XF.** One of the three keys to the Barber quarter series, the 1896-S is typically encountered in AG to VG grades. The present example shows only light wear but is bright from a wipe and retoned in apricot-gold shades. Luster glimmers from the devices and legends. The cheek has a few unimportant hair-thin marks. NGC ID# 23Y9, PCGS# 5615, CoinPlex ID# BQU1896S

1896-S Quarter, XF Details Well-Defined Key-Date Coin

- 4182 1896-S — Improperly Cleaned — NGC Details. XF.** The first of three San Francisco key dates for the Barber quarter series, offered here as a once-cleaned but retoned example with medium-gray interiors and orange color at the borders. Lightly worn with several scattered nicks on the obverse.
From The J.D. Tanner Collection. NGC ID# 23Y9, PCGS# 5615, CoinPlex ID# BQU1896S

Key-Date 1896-S Quarter, AU55 Choice Coin For a Barber Quarter Set

- 4183 1896-S AU55 PCGS.** Obverse Die #1, with 1 in date almost perfectly centered over denticle and 8 centered over left edge of denticle. Horizontal striations are visible in the ear (a clash from the shield detail on the reverse die). Reverse Die #1, with mintmark centered between R and D.
This Choice AU key-date representative possesses considerable luster and just an occasional hint of light gold color on otherwise untuned surfaces. The design elements are sharply and uniformly struck, and close inspection reveals just a few minute marks from brief circulation. It is very unusual to find the 1896-S in this level of preservation. This will make a wonderful addition to a mid- to high-grade Barber quarter set. Housed in a green label holder. Population: 5 in 55, 35 finer (12/12). PCGS# 5615, NGC ID# 23Y9, CoinPlex ID# BQU1896S

- 4184 1898 MS65 PCGS. CAC.** Dappled golden-brown toning with splashes of turquoise appears on the obverse. Shades of electric-blue, lavender, and gold envelop the reverse, creating stunning eye appeal. A highly lustrous, sharply struck Premium Gem. Population: 28 in 65, 26 finer (12/12). PCGS# 5619, NGC ID# 23YD, CoinPlex ID# BQU1898

- 4185 1900-S MS64 NGC.** Type One Obverse. Type Two Reverse. Stone-white motifs display contrast with medium golden-brown fields. Lustrous and fully struck with exemplary preservation. A couple of tiny strike-throughs, as made, beneath Liberty's chin and on her neck. NGC ID# 23YM, PCGS# 5627, CoinPlex ID# BQU1900S

- 4186 1901-S Fair 2 PCGS.** A key issue in the Barber quarter series, the 1901-S is avidly collected, even in well-worn condition. The rims and peripheral design elements are worn smooth in many places on this FR2 example, however the date, mintmark, and motto remain clearly visible. This piece displays even color on both sides. Not surprisingly at this grade level surface marks appear, including a slanting vertical line across Liberty's face.
From The Wes Rasmussen Collection. PCGS# 5630, NGC ID# 23YR, CoinPlex ID# BQU1901S

Key 1901-S Quarter, Good Details

- 4187 1901-S — Environmental Damage — NGC Details. Good.** The 1901-S is the rarest regular issue 20th century quarter. Most survivors are well circulated, but the present example has full peripheral stars and legends, and shows the L and Y in LIBERTY. Toned walnut-brown with a few speckles of verdigris near the arrows and right-side obverse stars. NGC ID# 23YR, PCGS# 5630, CoinPlex ID# BQU1901S

1901-S Quarter, Good Details

- 4188 1901-S — Cleaning — PCGS Genuine. Good Details.** Light gray surfaces show slate toning on the reverse, with minor hairlines and other evidence that the piece was cleaned. The obverse rim is full and the reverse rim is merged into a few letters of UNITED but otherwise complete. The date is complete and the mintmark is clear. PCGS# 5630, NGC ID# 23YR, CoinPlex ID# BQU1901S

Key-Date 1901-S Quarter
Good 4

- 4189** 1901-S Good 4 PCGS. CAC. The obverse rims are intact, though the reverse shows some merging. The date and mintmark remain clear. Medium-gray surfaces have a faint coffee overtone and blue and green elements scattered in parts of the fields. A quality circulated example of the most prized Barber quarter key date. PCGS# 5630, NGC ID# 23YR, CoinPlex ID# BQU1901S

1901-S Barber Quarter, VG8
Sought-After Issue

- 4190** 1901-S VG8 PCGS. The popularity of the 1901-S never ceases to surprise us. No matter how close to slick it may be, there is always a collector who is delighted to purchase an '01-S as long as the 01 and the S can be seen. This is an evenly worn, original example with pale gray devices and deeper charcoal contrasts in the fields. For the serious collector, this is a problem-free example that shows fully outlined devices and almost complete rims. PCGS# 5630, NGC ID# 23YR, CoinPlex ID# BQU1901S

Key-Date 1901-S Quarter Dollar, XF45
Rare in This Grade

- 4191** 1901-S XF45 PCGS. Obverse B, with both 1s in date centered between denticles. Reverse B, with mintmark high, almost upright, and almost centered between R and D.

The 1901-S quarter, with a low mintage and low survivorship, is sometimes referred to as the "King of all Barber Coinage." It is almost always seen in well-worn condition, as evident from the certified population figures showing hundreds of examples in the Fair to Good range. This issue must not have been recognized as a rarity in the early 1900s and consequently circulated extensively as pocket change. When Barber quarter collecting became popular in the 1930s, most surviving 1901-S survivors were heavily worn.

The present offering represents an infrequent opportunity to obtain a Choice Extremely Fine 1901-S quarter. They just are not seen that often in this level of preservation. Subtle golden-brown and reddish gold patina clings to the margins of this otherwise untuned specimen. The design features are nicely defined; just the upper-right corner of the shield and the wing tips exhibit the usually seen softness. Scattered light marks are in keeping with a coin having experienced a degree of circulation. This piece is sure to see spirited competition for the deserving right to serve as the centerpiece of a mid-to high-grade Barber quarter collection. Population: 4 in 45, 38 finer (12/12). PCGS# 5630, NGC ID# 23YR, CoinPlex ID# BQU1901S

- 4192** 1906-O MS65 PCGS. CAC. A sharply struck Gem, this piece possesses bright satin luster and nearly untuned silver surfaces. Minor die cracks are visible on both sides along with tiny, almost imperceptible grazes. This is a very attractive coin. Population: 33 in 65, 28 finer (11/12). PCGS# 5644, NGC ID# 23Z7, CoinPlex ID# BQU1906O

**Premium Gem 1906-O Quarter
Well-Defined New Orleans Piece**

- 4193 1906-O MS66 PCGS.** The obverse has significant apricot, orange, plum, and blue shadings against a backdrop of pale silver. Toning appears only at the margins on the reverse, where the well-rendered eagle appears in satiny gray glory. A high-grade example from the last years of the New Orleans Mint. Population: 23 in 66 (3 in 66+), 5 finer (12/12). PCGS# 5644, NGC ID# 23Z7, CoinPlex ID# BQU1906O

**Gem 1907-D Barber Quarter
Only Three Finer Coins at NGC**

- 4194 1907-D MS65 NGC.** In its second year of operations, the Denver Mint produced a substantial mintage of nearly 2.5 million Barber quarters. This impressive Gem features well-detailed design elements and vibrant satiny mint luster, with only minor signs of contact. Census: 6 in 65, 3 finer (12/12). NGC ID# 23Z9, PCGS# 5646, CoinPlex ID# BQU1907D
- 4195 1909-O — Cleaning — PCGS Genuine. Unc. Details.** Rich golden-brown toning endows the reverse. The obverse is medium dove-gray with the deepest shades at the periphery. Sharply struck and satiny with good eye appeal and no visible abrasions. PCGS# 5655, NGC ID# 23ZJ, CoinPlex ID# BQU1909O

**MS66+ 1912 Barber Quarter
Only One Finer at PCGS**

- 4196 1912 MS66+ PCGS.** Vibrant luster provides this high-end Premium Gem with lovely eye appeal. Subtle hints of champagne color appear on both sides, with areas of toning at the rim on the obverse including shades of gold, russet, and purple. Faint pink and lavender shades cover portions of the laurel wreath. Population: 19 in 66 (2 in 66+), 1 finer (11/12). PCGS# 5662, NGC ID# 23ZS, CoinPlex ID# BQU1912

- 4197 1912-S MS64 NGC.** A faint champagne patina envelops the lustrous surfaces on this near-Gem. Scattered flecks of color include shades of lilac, yellow-gold, russet, and olive-green. The coin exhibits the usual weakness on the upper-right corner of the shield. A few surface marks appear, primarily on the obverse. Census: 19 in 64, 19 finer (12/12). NGC ID# 23ZT, PCGS# 5663, CoinPlex ID# BQU1912S

- 4198 1913-S VG8 NGC.** The 1913-S Barber quarter was hoarded at the time of issue due to its low mintage of 40,000 pieces, but today the Mint State survivors are out of the reach of most collectors. This example displays natural pewter and dark-gray colors in the fields, while the devices have a slightly lighter appearance. NGC ID# 23ZW, PCGS# 5666, CoinPlex ID# BQU1913S

**1913-S Quarter Dollar, VG 10
Original, Uncleaned Surfaces**

- 4199 1913-S VG10 PCGS.** Of the two mintmark positions on the 1913-S quarter, this Choice VG piece displays the S high and about midway between the R and D. Dark gray patination in the interstices contrasts nicely with the lighter silver-gray of the open areas, and confirms uncleaned surfaces. Liberty's jawline, ear, and eye are strong, and the rims on both sides are complete. The LI and TY of LIBERTY show, as do the letters URIBUS and UN on the reverse ribbon. The only mark of mention is a toned-over hair thin one concealed in Liberty's wreath. This is a nice key-date representative for a low- to mid-grade Barber quarter set. *From The J.D. Tanner Collection.* PCGS# 5666, NGC ID# 23ZW, CoinPlex ID# BQU1913S

Key 1913-S Quarter, VG10

- 4200 1913-S VG10 PCGS. CAC.** The 1913-S was saved in high grade more often than its key-date San Francisco quarter peers, but worn examples are prized by collectors as well. This piece has the LI and TY still visible on Liberty's lightly abraded portrait. The peach-gray hue of the obverse has a considerably deeper counterpart on the reverse. PCGS# 5666, NGC ID# 23ZW, CoinPlex ID# BQU1913S

Key-Date 1913-S Quarter Dollar, Fine 15
A Nice Mid-Grade Original Piece

4201 1913-S Fine 15 PCGS. Two mintmark positions are known on the 1913-S quarter dollar. The present coin shows the S almost centered between R and D, and its bottom on plane with the tops of those letters. A second mintmark is much closer to R and low.

The small mintage of 40,000 pieces was produced at a time when very few people were collecting Barber quarters, and consequently most pieces are well worn and fall in the Fair to Very Good range. Choice Fine examples such as the coin in this lot are infrequently seen. Indeed, PCGS has certified 14 specimens in Fine 15 and NGC has seen a mere two coins thus graded.

Light silver-gray patina displays occasional whispers of light gold and violet, and the design elements are appropriately detailed. All letters in LIBERTY are strong except for the bottom of R, and all letters in E PLURIBUS UNUM are clear. The lines in the shield are clear save for those at the bottom. Both sides are minimally marked for a coin having seen moderate circulation, and each appears to be original. This is a great coin for the grade. PCGS# 5666, NGC ID# 23ZW, CoinPlex ID# BQU1913S

1913-S Quarter, Fine 15
Two-Toned Original Surfaces

4202 1913-S Fine 15 NGC. The mintage of 40,000 pieces is low enough to catch the attention of collectors even if they don't collect Barber quarters. It is, in fact, one of the smallest regular production mintages of the 20th century. For the many collectors of circulated sets of Barber quarters, this original piece would be a welcome addition. The surfaces have that two-toned appearance that ensure originality. Deep, almost charcoal-gray patina in the fields and within the recesses contrast against light gray over the high points. We see no large or mentionable abrasions on either side. NGC ID# 23ZW, PCGS# 5666, CoinPlex ID# BQU1913S

AU Details 1913-S Quarter
Lowest Mintage of Type

4203 1913-S — Improperly Cleaned — NGC Details. AU. Every Barber quarter collector can recite the mintage of the 1913-S as it is only 40,000 pieces, the lowest of the series. The median certified grade is Good 4, and examples with minimal wear are very rare. This stone-gray and almond-gold representative displays considerable luster and is only unobtrusively cleaned. NGC ID# 23ZW, PCGS# 5666, CoinPlex ID# BQU1913S

1913-S Quarter, AU Sharpness
One of 40,000 Pieces

4204 1913-S — Improperly Cleaned — NGC Details. AU. Well-defined overall with only light rub and the usual minor striking softness at the eagle's claws. While the luster is "off," too glossy on the silver portrait and dully reflective in gold-tinged fields, this remains an important survivor from an issue of just 40,000 pieces. From The J.D. Tanner Collection. NGC ID# 23ZW, PCGS# 5666, CoinPlex ID# BQU1913S

Superb Gem 1914-D Quarter
Multicolor Border Toning

4205 1914-D MS67 NGC. CAC. Lemon-gold, rose-red, and apple-green shades invigorate the peripheries of this coruscating and well preserved Superb Gem. The strike is intricate except on the eagle's right (facing) claw. The shield corners show strong definition. Encapsulated in a former generation holder. Census by both services combined: 3 in MS67, none are finer (11/12). Ex: Ft. Lauderdale FUN Signature (Heritage, 1/2005), lot 4167, which realized \$4,600. NGC ID# 23ZY, PCGS# 5668, CoinPlex ID# BQU1914D

4206 1916-D MS66 NGC. A colorful array of sea-green and orange-gold toning, the effect of which is irresistible to those who appreciate the combination of high quality and originality, surround ellipses of brilliance in the centers. This is a simply gorgeous Premium Gem. Census: 46 in 66, 9 finer (11/12).
Ex: Ft. Lauderdale FUN Signature (Heritage, 1/2005), lot 4173, which realized \$2,070. NGC ID# 2426, PCGS# 5674, CoinPlex ID# BQU1916D

4207 1916-D MS66 PCGS Secure. Brilliant lustrous surfaces provide this Premium Gem with excellent eye appeal. This lovely piece displays minimal abrasions. Only 7 examples have received higher grades from PCGS, including one 66+ piece (12/12). PCGS# 5674, NGC ID# 2426, CoinPlex ID# BQU1916D

PROOF BARBER QUARTERS

4208 1892 PR65+ Cameo PCGS. Type One Reverse. An impressive Gem Cameo proof, the obverse featuring intense gold, violet, and blue toning near the border, the reverse offering nearly full untuned brilliance. Population: 12 in 65 (1 in 65+) Cameo, 20 finer (11/12).
From The Teich Family Collection. PCGS# 85678, CoinPlex ID# BQP1892CA

1892 Barber Quarter, PR66+ Cameo Well-Produced, First Year of Issue

4209 1892 PR66+ Cameo PCGS. CAC. Type Two Reverse. First year of Charles Barber's new design, one that was adopted for the dime, quarter, and half dollar. As the first-year issue, more proofs were struck than previous and subsequent years, but collector demand is always strong for the 1892. The nearly brilliant surfaces show just the faintest trace of reddish patina when closely examined. The devices are heavily frosted and present strong contrast against the illimitable depth of reflectivity seen in the proof fields. Population: 11 in 66 (2 in 66+) Cameo, 9 finer (11/12).
From The Teich Family Collection. PCGS# 85678, CoinPlex ID# BQP1892CA

1892 Quarter, PR66+ Cameo Popular First Year of Design

4210 1892 PR66+ Cameo PCGS. CAC. Type Two Reverse. This first-year proof Barber quarter exhibits sharply detailed design elements, with frosty luster that contrasts boldly with the deeply mirrored fields. Vivid shades of champagne-gold and cerulean-blue toning enhance the considerable eye appeal. Population: 11 in 66 (2 in 66+) Cameo, 10 finer (12/12). PCGS# 85678, CoinPlex ID# BQP1892CA

1892 Quarter Dollar, PR66 Deep Cameo White-on-Black Contrast

4211 1892 PR66 Deep Cameo PCGS. Type Two Reverse. First year of issue and brilliant throughout. The heavily frosted devices provide strong contrast against the "blackness" seen in the fields. A shimmering white-on-black example of this popular type coin. Population: 7 in 66 Deep Cameo, 11 finer (12/12).
*Ex: St. Louis (CSNS) Signature Sale (Heritage Auctions, 5/2003), lot 6193.
 From The Richard P. Ariagno, M.D. Collection. PCGS# 95678, CoinPlex ID# BQP1892DC*

4212 1893 PR65 PCGS. CAC. This satiny Gem is close to brilliant but displays a wisp of golden patina at the margins. Precisely struck and devoid of detractors save for a single unimportant graze on the right obverse field. Housed in an old green label holder. PCGS# 5679, NGC ID# 2428, CoinPlex ID# BQP1893

Second-Year 1893 Quarter, PR67 Cameo

4213 1893 PR67 Cameo PCGS. Light glimpses of champagne and apricot patina grace parts of this otherwise silver Cameo Superb Gem proof. The frost on the sharply struck portrait is particularly rewarding, and the obverse would be a candidate for Deep Cameo consideration on its own. Population: 11 in 67 Cameo, 4 finer (12/12). PCGS# 85679, CoinPlex ID# BQP1893CA

1894 Quarter, Moderately Toned PR67

4214 1894 PR67 PCGS. CAC. Gorgeous toning is the hallmark of this Superb Gem proof 1894 quarter, one of the few finest survivors from the original production of 972 pieces. The prevailing colors are rose and amber with tinges of mint-green. The surfaces are still brightly reflective underneath the moderate toning, and the strike falls just short of full. An excellent example for a high-grade type set. Population: 10 in 67, 1 finer (12/12). PCGS# 5680, NGC ID# 2429, CoinPlex ID# BQP1894

4215 1894 PR64 Cameo PCGS. CAC. This lovely Choice Cameo proof exhibits brilliant and untuned silver surfaces with lustrous devices and excellent contrast. Population: 16 in 64 Cameo, 44 finer (11/12). From *The Teich Family Collection*. PCGS# 85680, CoinPlex ID# BQP1894CA

**1894 Barber Quarter, PR67 Cameo
Just Two Numerically Finer Coins at NGC**

4216 1894 PR67 Cameo NGC. CAC. A fairly generous mintage of 972 proof Barber quarters was achieved in 1894, but Superb Gem examples, with the Cameo designation, are quite rare today. This spectacular Superb Gem exhibits sharply detailed frosty devices that contrast dramatically with the brilliant mirrored fields. Census: 22 in 67 (2 in 67+) Cameo, 2 finer (11/12). PCGS# 85680, CoinPlex ID# BQP1894CA

**PR67 ★ Cameo 1894 Quarter
Vibrant Multicolor Toning
Ex: John C. Hugon**

4217 1894 PR67 ★ Cameo NGC. CAC. Vibrant pumpkin-gold, ruby-red, and navy-blue dominate the obverse. The reverse displays similar colors but they are confined to the margin. Cameo contrast is blatant where toning is absent. Census: 2 in 67 ★ Cameo, 2 finer as 67+ ★ Cameo, 1 finer as 69 Cameo without a Star designation (11/12). Ex: *John C. Hugon Collection (Heritage, 1/2005)*, lot 4176, which realized \$7,762.50. PCGS# 85680, CoinPlex ID# BQP1894CA

4218 1895 PR64 Cameo PCGS. CAC. The obverse of this near-Gem Cameo proof is brilliant with only a wisp of gold toning, while the reverse has grayish-gold toning over its mirrored surfaces. Both sides have nice field-to-device contrast. Population: 17 in 64 (1 in 64+) Cameo, 36 finer (11/12). From *The Teich Family Collection*. PCGS# 85681, CoinPlex ID# BQP1895CA

**1895 Quarter, PR67 Cameo
Exceptional Eye Appeal**

4219 1895 PR67 Cameo PCGS. The nearly untuned and frosted centers contrast with the boldly mirrored fields. At the rims, a delicate border of cobalt and mauve frames the cameo. Exceptional eye appeal, with a needle-sharp strike. From the original mintage of 880 pieces, PCGS has graded only nine in PR67 Cameo and four finer (12/12). PCGS# 85681, CoinPlex ID# BQP1895CA

**1895 Barber Quarter, PR67 Deep Cameo
Only One Finer Example at PCGS**

4220 1895 PR67 Deep Cameo PCGS. This magnificent Superb Gem Barber quarter displays vivid shades of burnt-orange and champagne-gold toning, with most of the color on the obverse. The design elements offer razor-sharp definition throughout, with rich mint frost and deeply contrasted mirrored fields. The 880-piece proof mintage of this year is famous for the mysterious proof-only Morgan dollar, but the elusive quarters are prized by discerning collectors as well. Population: 3 in 67 Deep Cameo, 1 finer (11/12). From *The Teich Family Collection*. PCGS# 95681, CoinPlex ID# BQP1895DC

4221 1897 PR65 PCGS. CAC. This intricately struck Gem offers light straw-gold toning and is essentially pristine. Cameo contrast is unmistakable, though the generation of the green label holder precedes the designation for Barber halves. Only 731 proofs were released. PCGS# 5683, NGC ID# 242C, CoinPlex ID# BQP1897

1898 PR67 Cameo Quarter

4222 1898 PR67 Cameo NGC. The surfaces are primarily untuned silver-white, although there are suggestions of champagne on both sides. The surfaces are brilliantly mirrored, with thick mint frost on the devices and wonderful eye appeal. Census: 50 in 67 (2 in 67+) Cameo, 18 finer (11/12). PCGS# 85684, CoinPlex ID# BQP1898CA

**1898 Cameo Quarter, PR67+
Few Finer of This Well-Produced Date**

- 4223 1898 PR67+ Cameo NGC.** This spectacular high-end Premium Gem displays razor-sharp definition on all design elements and the frosty texture of the devices contrasts boldly with the deeply mirrored fields. The surfaces are virtually pristine, with hints of champagne-gold and electric-blue toning. Census: 24 in 67 (1 in 67+) Cameo, 11 finer (12/12). PCGS# 85684, CoinPlex ID# BQP1898CA

**Deep Cameo PR68 1898 Quarter
Stunning Contrast**

- 4224 1898 PR68 Deep Cameo PCGS. CAC.** The frost on the devices is, in a word, *incredible*. The portrait's definition is crystal-sharp, as is the eagle's, and the mirrors are remarkably deep even through light gray patina that turns cloudy at the upper right stars of the reverse. All-around preservation is as excellent as expected for a coin at the PR68 level. The year 1898 marks the end of a seeming "golden age" for proof excellence, and specimens like this one are responsible for extending the definition of that time so far. Population: 6 in 68 (1 in 68+) Deep Cameo, 1 finer (12/12). PCGS# 95684, CoinPlex ID# BQP1898DC

**1899 Barber Quarter, PR66
Popular Last 19th Century Date**

- 4225 1899 PR66 PCGS.** This popular turn-of-the-century Barber quarter claims a nominal proof mintage of 846 pieces. The design elements are sharply detailed throughout and the deeply reflective fields are toned in shades of lime-green and grayish-blue, with outstanding eye appeal. Population: 26 in 66, 5 finer (12/12). PCGS# 5685, NGC ID# 242E, CoinPlex ID# BQP1899

**1899 Quarter, Outstanding PR67+
Beautifully Toned, Deeply Reflective Fields**

- 4226 1899 PR67+ PCGS.** Always a popular date as the final year from the 19th century, only 846 proofs were struck and there are far more collectors who would like to own such a coin, especially in such a superior grade as this one. Both sides are virtually flawless and the strike is complete in all areas. Rich red and blue patina is distributed over both obverse and reverse, and is brightened considerably by the mirrored proof finish in the fields. Population: 5 in 67 (2 in 67+), 0 finer (11/12). *From The Teich Family Collection.* PCGS# 5685, NGC ID# 242E, CoinPlex ID# BQP1899

**Premium Gem Proof 1899 Barber Quarter
Delightful Cameo Example**

- 4227 1899 PR66 Cameo PCGS.** From a mintage of 846 pieces, this turn-of-the-century proof Barber quarter is always in demand from date and type collectors alike. The design elements are fully struck, with rich mint frost that contrasts starkly with the deeply reflective fields. The surfaces are mostly brilliant, with a few wisps of golden-tan and lavender toning, and no mentionable distractions. Population: 4 in 66 Cameo, 3 finer (11/12). *Ex: Jim S. White Collection (Stack's, 2/1960), lot 802, flip accompanies the lot.* *From The Teich Family Collection.* PCGS# 85685, CoinPlex ID# BQP1899CA

1901 Barber Quarter, PR67
Only One Finer Specimen at PCGS

- 4228 1901 PR67 PCGS. CAC.** This splendidly toned Superb Gem boasts lateral obverse toning bands in varying shades of blue and pinkish-gold, the latter color prevailing throughout most of the central reverse. The strike is better than usual but not yet full, the usual problem area on the reverse the culprit. Only one coin is certified finer at PCGS (12/12). PCGS# 5687, NGC ID# 242G, CoinPlex ID# BQP1901

1902 Barber Quarter, PR67

- 4229 1902 PR67 NGC. CAC.** Exhibiting a full strike, this Superb Gem displays an ivory-white obverse center that complements the merest hint of gold at the rim, while the reverse is deeply toned olive-gold making it easier to view the details of the sharply struck devices. Virtually no contact marks or other distractions are present. Census: 14 in 67, 4 finer (11/12). NGC ID# 242H, PCGS# 5688, CoinPlex ID# BQP1902

Gem Proof 1903 Barber Quarter
Darkly Toned Cameo Specimen

- 4230 1903 PR65 Cameo PCGS. CAC.** The rich mint frost of the devices contrasts boldly with the deeply mirrored fields of this remarkable Gem, culminating in the coveted Cameo designation from PCGS. Few darkly toned coins show this kind of cameo effect, but the contrast is readily apparent, despite the layer of dark green, violet, and lavender patina that blankets the surfaces of both sides. Eye appeal is fantastic. Population: 15 in 65 (2 in 65+) Cameo, 29 finer (11/12).
Ex: Philip G. Straus Collection (Stack's, 5/1959), lot 1791, flip accompanies the lot.
From The Teich Family Collection. PCGS# 85689, CoinPlex ID# BQP1903CA

Border-Toned PR68 Cameo 1903 Quarter
Surprising Central Frost

- 4231 1903 PR68 Cameo PCGS. CAC.** Though 1902 marked a shift in Mint practice that rendered Cameo proofs in silver largely a thing of the past, the emphasis must be on *largely*, as exceptional specimens such as this elite 1903 quarter prove. Unlike the mild effects that so often pass for "Cameo" at the certification services, this coin is well and truly frosted on boldly struck devices. Surrounding fields are clear silver on the margins but have considerable gold, orange, and blue color along the borders, the latter two hues particularly prominent on the reverse. Population: 4 in 68 Cameo, 0 finer (12/12). PCGS# 85689, CoinPlex ID# BQP1903CA

Cameo PR66 1904 Quarter
Surprising Contrast

- 4232 1904 PR66 Cameo PCGS.** Excellent detail with pale yellow patina at the periphery. Aside from the O in GOD, which is curiously flattened, no noteworthy problems appear on this 20th century proof Barber quarter with uncommonly high contrast for its issue.
Ex: Long Beach Signature (Heritage, 9/2006), lot 2235. PCGS# 85690, CoinPlex ID# BQP1904CA

**PR66 Cameo 1904 Quarter
Beautifully Preserved**

4233 1904 PR66 Cameo NGC. CAC. Both sides of this Premium Gem Cameo remain brilliant and are well-preserved. The strike is nearly full, save for hints of minor softness in the upper right shield corner and immediately adjacent feathers. Only 670 proofs were struck, and few survivors remain in comparable quality. Census: 8 in 66 Cameo, 10 finer (11/12). PCGS# 85690, CoinPlex ID# BQP1904CA

4234 1905 PR65 PCGS. This reflective Gem proof displays little contrast on the obverse, which exhibits mottled pink, sage, olive, and charcoal hues with much underlying brilliance. The reverse shows more contrast and less color, mostly pinkish-gold. This is a lovely representative for the grade. Population: 55 in 65, 45 finer (12/12). PCGS# 5691, NGC ID# 242L, CoinPlex ID# BQP1905

4235 1905 PR65 PCGS. CAC. A brilliant Gem proof with a slight haze over its untuned silver surfaces, this piece shows light cameo contrast, especially on the reverse. Population: 55 in 65, 43 finer (11/12). *From The Teich Family Collection.* PCGS# 5691, NGC ID# 242L, CoinPlex ID# BQP1905

4236 1906 PR66 PCGS. An impressive Premium Gem proof, this deeply mirrored specimen has splendid gold and iridescent toning on both sides. Population: 35 in 66 (1 in 66+), 20 finer (11/12). *Ex: Philip G. Straus Collection (Stack's, 5/1959), lot 1794. From The Teich Family Collection.* PCGS# 5692, NGC ID# 242M, CoinPlex ID# BQP1906

1908 Quarter, PR67

4237 1908 PR67 NGC. Areas of faint lavender and ice-blue toning appear at the outer edges of the obverse and are distributed throughout small portions of the reverse that primarily displays golden-brown hues. Dappled light lavender toning appears in portions of the obverse fields. Census: 20 in 67, 4 finer (11/12). NGC ID# 242P, PCGS# 5694, CoinPlex ID# BQP1908

**Multicolor PR68 ★ 1908 Quarter
Ex: John C. Hugon Collection**

4238 1908 PR68 ★ NGC. CAC. *Ex: Hugon.* Concentric bands of orange-gold, powder-blue, and apple-green dominate the obverse. The reverse border shows golden-brown and aquamarine at the margin though the frosty eagle and nearby glassy field are untuned. A prize for the connoisseur of patinated silver proofs. Census: 1 in 68 ★, none finer with a Star designation, 1 finer as PR69 Cameo (11/12). *Ex: John C. Hugon Collection (Heritage, 1/2005), lot 4190, which realized \$9,200.* NGC ID# 242P, PCGS# 5694, CoinPlex ID# BQP1908

4239 1909 PR65 PCGS. A gorgeous Gem proof example of this later Barber issue, sharply struck and flashy beneath a thin layer of hazy green-gold patina. Carefully preserved and an upper-end survivor from a mintage of just 650 specimens. Population: 27 in 65 (1 in 65+), 45 finer (12/12). *Ex: ANA Milwaukee Signature (Heritage, 8/2007), lot 722.* PCGS# 5695, NGC ID# 242R, CoinPlex ID# BQP1909

1909 Quarter Dollar, PR66 Cameo

4240 1909 PR66 Cameo PCGS. Both sides of this brilliant Premium Gem Cameo proof exhibit bright silver surfaces with no evidence of toning. Faint contact marks are noted on each side, although none are consequential. Only 650 proofs were minted in 1909, and high grade survivors are scarce, especially with contrast. Population: 12 in 66 Cameo, 4 finer (11/12). *From The Richard P. Ariagno, M.D. Collection.* PCGS# 85695, CoinPlex ID# BQP1909CA

**1910 Quarter, PR66 Cameo
Starkly Contrasted on Each Side**

- 4241 1910 PR66 Cameo PCGS. CAC.** Only 551 proofs were struck in 1910, third lowest mintage in the series. When one considers how low the mintage was, it is surprising how high the quality is of those surviving proofs from this year. This sharply contrasted Cameo shows deeply mirrored, glassy fields with thickly frosted devices. Most of each side is brilliant with just a trace of pale reddish toning around the margins. Population: 12 in 66 (2 in 66+) Cameo, 7 finer (11/12).
From The Teich Family Collection. PCGS# 85696, CoinPlex ID# BQP1910CA

- 4242 1912 PR64 PCGS.** One of only 700 proofs coined for the date, this bright near-Gem displays subtle champagne and rose-gold toning that further enhances the eye appeal. Liberty has a thickly-frosted appearance that provides nice contrast to the flashy field. Population: 50 in 64, 63 finer (11/12). PCGS# 5698, NGC ID# 242U, CoinPlex ID# BQP1912

- 4243 1914 PR66 NGC.** The 1914 proof Barber quarter boasts the lowest mintage of the series, at just 380 pieces. This attractive Premium Gem example displays sharp details throughout, with deeply reflective fields and a few touches of light gold toning. Census: 27 in 66, 22 finer (12/12). NGC ID# 242W, PCGS# 5700, CoinPlex ID# BQP1914

EARLY HALF DOLLARS

Choice Good 1794 Half, O-101a

- 4244 1794 Good 6 NGC. O-101a, R.4.** A stone-gray first year half dollar with hints of chestnut toning on the fields and a glimpse of ice-blue patina at the margins. Inconsequential adjustment marks, as made, are present near the eagle's tail. The 1794 silver dollar is out of reach for most collectors but its smaller half dollar counterpart is comparatively affordable. NGC ID# 24000000, PCGS# 6051, CoinPlex ID# EHA1794

VF Sharpness O-101a 1794 Half

- 4245 1794 — Repaired — NGC Details. VF. O-101a, R.4.** The bust tip appears carefully smoothed, and both wings have a few re-engraved feathers. Some of Liberty's hair near the top of her head is also re-engraved. The centers are cream-gray while the margins offer moderately deeper charcoal toning. The 1794 is the first date of the half dollar denomination, and the rarer of the two years for the Flowing Hair type. NGC ID# 24000000, PCGS# 6051, CoinPlex ID# EHA1794

- 4246 1795 2 Leaves Good 6 PCGS. O-115, R.5.** Deep lavender-gray fields contrast moderately with stone-gray devices. Faintly hairlined but minimally abraded for the designated grade. All stars and legends are clear, though a leaf pair near the right (facing) wing is worn. PCGS# 6052, NGC ID# 240000000, CoinPlex ID# EHA1795

- 4247 1795 2 Leaves VG10 NGC. O-102, R.4.** All legends are bold on this circulated but attractive example. Silver-white motifs contrast with wheat-gold fields and steel-blue margins. One slight obverse rim ding at 3 o'clock. A popular two-year introductory type.
From The Hilltop Collection. NGC ID# 240000000, PCGS# 6052, CoinPlex ID# EHA1795

- 4248 1795 2 Leaves VG10 PCGS. O-102, R.4.** The TES in STATES is slightly faded but all other legends are sharp. Pearl-white devices and honey-gold fields contribute further to the eye appeal. The upper reverse rim has a few wispy hairlines. A charming and collectible example of an important early type. PCGS# 6052, NGC ID# 240000000, CoinPlex ID# EHA1795

**1795 O-106 Half Dollar, VF20
Near Census Level**

- 4249 1795 2 Leaves VF20 PCGS. O-106, R.6.** A heavy diagonal break through the eagle's neck attributes the very rare Overton-106. The obverse is glossy with a pearl-gray portrait and deep charcoal-gray toning on the field. The reverse displays lighter stone-gray and chestnut patina. A few faded scratches are noted on the cheek and near the profile, but the obverse has only occasional brief thin marks. PCGS# 6052, NGC ID# 240000000, CoinPlex ID# EHA1795

1795 O-105 Half Dollar, VF20
Ideal Date or Type Coin

4250 1795 2 Leaves VF20 NGC. O-105, R.3. This is one of the common 1795 varieties, a great choice for type collectors. This example is housed in a green-label PCGS holder, featuring light silver-gray surfaces with a few splashes of gold and blue toning. Numerous small marks on both sides blend with the surrounding surfaces. PCGS# 6052, NGC ID# 240000000, CoinPlex ID# EHA1795

4251 1795 2 Leaves — Improperly Cleaned — NGC Details. VF. O-131, High R.4. The diagonal die break over the ear is usual for this moderately better Overton variety. Adjustment marks on the reverse center are as made and relatively inoffensive. Cloudy from cleaning but nonetheless attractive. NGC ID# 240000000, PCGS# 6052, CoinPlex ID# EHA1795

1795 Half Dollar, Bold VF25
O-104, Two Leaves

4252 1795 2 Leaves VF25 PCGS. O-104, R.4. A die lump beneath the final star helps attribute this collectible Flowing Hair marriage. Stone-white devices contrast with chestnut-gold fields. Liberty's hair shows pleasing detail. Partial plumage is visible on both wings. The centers are hairlined but there are no noticeable abrasions. PCGS# 6052, NGC ID# 240000000, CoinPlex ID# EHA1795

Smooth VF35 1795 Half Dollar
Two Leaves Reverse, O-104

4253 1795 2 Leaves VF35 PCGS. CAC. O-104, R.4. A nicely detailed yet highly collectible Choice VF Flowing Hair type coin. The dove-gray and golden-brown fields and devices are surprisingly devoid of abrasions. The eagle's belly displays moderate adjustment marks, as made, and a small strike-through at the top of Liberty's neck is also of mint origin. PCGS# 6052, NGC ID# 240000000, CoinPlex ID# EHA1795

1795 Half Dollar, XF45
A Over E Mint Blunder, O-113a

4254 1795 2 Leaves XF45 NGC. O-113a, R.4. This Overton marriage is well known for an engraving blunder: the A in STATES is entered over an E. The variety is mentioned in the 2013 *Guide Book*, at the bottom of page 191, but is not separately priced. A nicely detailed example with stone-gray centers and deep sea-green and steel-blue borders. Both sides display hairlines and we note a few hair-thin field marks near the eagle. NGC ID# 240000000, PCGS# 6052, CoinPlex ID# EHA1795

1795 O-126 Half Dollar, VG8
Small Head

4255 1795 Small Head VG8 PCGS. O-126, R.4. Despite its considerable wear, this attractive Small Head half dollar has light silver-gray surfaces with pale grayish-gold and iridescent toning. Both sides have a few faint hairlines, and small handling marks are evident in the left obverse field. PCGS# 6054, CoinPlex ID# EHA1795SMHEAD

4256 1801 Fine 12 NGC. O-101, R.3. Only two die marriages for this difficult low mintage date. O-101 is distinguished by the die breaks or "blobs" on the lower left reverse, which are more advanced here than usually seen. A problem-free stone-gray and almond-gold example with partial hair and plumage detail. NGC ID# 24ED, PCGS# 6064, CoinPlex ID# EHA1801

1801 O-101 Half Dollar, XF45
First Heraldic Eagle Half

4257 1801 XF45 PCGS. O-101, R.3. Only two die varieties for this difficult Draped Bust date, since silver depositors preferred the dollar denomination, more convenient for bank accounting. O-101 is readily identified by die breaks on the lower left reverse. Rich cream-gray toning with ample hints of tan-gold luster in protected areas. Unblemished and attractive with the usual incompleteness of strike on the stars above the eagle. PCGS# 6064, NGC ID# 24ED, CoinPlex ID# EHA1801

**VF25 1802 Half Dollar
O-101, Only Die Pair**

- 4258** 1802 VF25 NGC. O-101, R.3. The sole dies for this very scarce Draped Bust date. Deep walnut-brown toning encompasses minimally abraded and nicely defined surfaces. The curls behind Liberty's neck show surprising definition. Moderately granular near the right (facing) wingtip. The lowest mintage of the type, though the 1801 is nearly as elusive. NGC ID# 24EE, PCGS# 6065, CoinPlex ID# EHA1802

**Challenging AU 1803 Half Dollar, O-103
Large 3, Large Reverse Stars**

- 4259** 1803 Large 3, Large Reverse Stars AU50 PCGS Secure. O-103, R.3. The stars on the reverse are much larger than on the other two Large 3 varieties, O-101 and O-102, but the *Guide Book* has yet to take notice of the difference. This is a bold representative that shows glimmers of luster from the clashed and deeply toned olive-green and peach-gold surfaces. Population: 15 in 50, 27 finer (12/12). PCGS# 6066, NGC ID# 24EF, CoinPlex ID# EHA1803

AU 1805/4 Half, O-102

- 4260** 1805/4 AU50 NGC. O-102, R.3. There's no mistaking the underdigit on the present half dollar. The crosslet is obvious and traces of the upright, base, diagonal, and crossbar are also evident. This is a pleasing piece with considerable bright luster within the curls, legends, and stars. Lightly toned overall with deeper butter-gold and steel-gray shades near the rims. Void of consequential contact. NGC ID# 24EH, PCGS# 6070, CoinPlex ID# EHA18054

**1806/5 O-103 Half Dollar, AU50
Intermediate Die State**

- 4261** 1806/5 AU50 PCGS. O-103, R.2. A knobbed 6 is punched over a 5 on this previously unused obverse die, and that feature combined with the solid union of star 13 and the drapery identifies this die. Three reverse dies were married to this single obverse, and the O-103 reverse has a die chip in the field below the R in AMERICA. This lovely AU example is deeply toned steel-blue, gray, and gold, with traces of luster. This intermediate state specimen has a die crack through two points of star 1 to the middle hair curls. There is no evidence of the reverse crack appearing on late states. A lovely specimen, having excellent eye appeal. Population: 13 in 50, 23 finer (12/12). PCGS# 6077, NGC ID# 24EK, CoinPlex ID# EHA18065

- 4262** 1806 Pointed 6, Stem XF40 PCGS. CAC. O-115, R.1. Deep lavender-gray and sea-green toning encompasses this mildly glossy Draped Bust type coin. Luster shimmers from the legends. Abrasions are inconsequential aside from a few hair-thin marks near the beak and obverse star 3. PCGS# 6071, NGC ID# 24EJ, CoinPlex ID# EHA1806PTD6ST

**Scarce O-114a 1806 Half Dollar
AU53, Pointed 6**

- 4263** 1806 Pointed 6, Stem AU53 PCGS. O-114a, R.4. The bisecting reverse die crack between 3:30 and 9:30 attributes this scarce Overton variety. The crack is less advanced than sometimes seen for O-114a. This lightly circulated Bust half dollar displays glimpses of butter-gold and navy-blue at the margins. Minor marks are present but none are consequential. PCGS# 6071, NGC ID# 24EJ, CoinPlex ID# EHA1806PTD6ST

**Rare E Over A in STATES O-124
1806 Half Dollar, VG10**

- 4264** 1806 E over A in STATES VG10 NGC. O-124, R.6. Listed in the *Guide Book* as a separate (and costly) variety, the E over A in STATES reverse is limited to the rare Overton-124 marriage. All peripheral legends are bold on the present example, which has stone-white fields and devices framed by rich forest-green and golden-brown borders. Free from any consequential abrasions. PCGS# 39330

- 4265** 1807 Draped Bust XF40 PCGS. O-102, R.2. Olive-green peripheries encompass chestnut-gold fields and devices. This final-year Bust half dollar has moderate wear on the motifs but is free from any consequential abrasions. All letters in E PLURIBUS UNUM are present. PCGS# 6079, NGC ID# 24EM, CoinPlex ID# EHA1807DRAPE

- 4266** 1807 Draped Bust XF40 PCGS. CAC. O-105, R.1. Deep golden-brown dominates the reverse, as well as the obverse border, while the remainder of the obverse is rich powder-blue. Minimally abraded. Glimpses of luster fill the legends and outline the stars. PCGS# 6079, NGC ID# 24EM, CoinPlex ID# EHA1807DRAPE

- 4267** 1807 Draped Bust XF45 NGC. O-105, R.1. Deep navy-blue, ruby-red, and stone-gray toning embraces this lightly abraded and richly detailed example. Luster dominates the legends and stars. Housed in a former generation holder. NGC ID# 24EM, PCGS# 6079, CoinPlex ID# EHA1807DRAPE

**Partly Lustrous AU55 1807 Half
Draped Bust, O-103**

- 4268** 1807 Draped Bust AU55 NGC. O-103, R.3. An intermediate die state, both sides are multiply clashed and a crack crosses the upper obverse, but there are no cracks on the reverse legend. A lovely lightly circulated Draped Bust type coin with vibrant luster throughout the borders and devices. No marks are noticeable and the margins display light rose-gold and aquamarine toning. NGC ID# 24EM, PCGS# 6079, CoinPlex ID# EHA1807DRAPE

**1807 O-105 Half Dollar, MS64+
Draped Bust Design**

- 4269** 1807 Draped Bust MS64+ NGC. O-105, R.1. A splendid near-Gem, this 1807 Draped Bust, Heraldic Eagle half dollar was struck early in the year, prior to introduction of John Reich's Capped Bust design. Reich joined the Mint engraving staff on April 1, 1807, and immediately went to work on new, modernized coin designs. It was likely some time before he had the new half dollar dies ready for use, so the Draped Bust pieces were likely coined during the first half of the year. This beauty has a bold strike with the usual weakness behind Liberty's forehead. The surfaces are fully lustrous with mint brilliance shining through gold and iridescent toning. Census: 16 in 64 (1 in 64+), 8 finer (11/12), for all 1807 Draped Bust varieties. NGC ID# 24EM, PCGS# 6079, CoinPlex ID# EHA1807DRAPE

BUST HALF DOLLARS

- 4270** 1807 Large Stars, 50 Over 20 XF40 PCGS. O-112, R.1. Deep walnut-brown toning embraces this lightly abraded first year Capped Bust half. The 50 Over 20 is a blundered *Guide Book* variety created when the engraver began to enter the denomination as a quarter dollar. PCGS# 6086, NGC ID# 24EN, CoinPlex ID# EHA1807CAP

**1807 O-112 Half Dollar, AU58 ★
Large Stars, Blundered Reverse**

- 4271** 1807 Large Stars, 50 Over 20 AU58 ★ NGC. CAC. O-112, R.1. This is the common blundered reverse variety, in an uncommon condition. John Reich had just created the new design after joining the Mint engraving staff earlier in the year. He inadvertently grabbed a numeral 2 punch to begin the denomination. His mistake was then corrected and the die was used with two obverse dies. This attractive example is a trifle soft at the centers, but exhibits nearly full luster and delightful rainbow toning at the borders. NGC ID# 24EN, PCGS# 6086, CoinPlex ID# EHA1807CAP

**1807 Capped Bust, Large Stars Half
O-114, AU, 'Die Defect Lumps' Below 7**

- 4272** 1807 Large Stars AU50 PCGS. O-114, R.3. The 1807 Capped Bust half dollar, O-114 variety, can be easily attributed by remembering that it is the only Capped Bust, Large Stars variety that lacks the 50/20 on the reverse. There are also "die defect lumps" below the 7. This AU50 example displays copper hues on the obverse and pinkish-gray on the reverse, intermingled with a few dark toning flecks. Population: 3 in 50 (1 in 50+), 17 finer (12/12). PCGS# 6088, NGC ID# 24EN, CoinPlex ID# EHA1807CAPLGST

Patinated AU55 1808 Half, O-102a

- 4273** 1808 AU55 PCGS. CAC Gold Label. O-102a, R.2. The late die state of O-102 is identified by the prominent obverse die crack from top to bottom. The reverse exhibits a small die break from the top left corner of the scroll. This lovely Choice AU example has nearly full luster with intermingled ivory, gold, and steel-blue toning on both sides. Unabraded save for a single thin mark beneath the beak. From The SPQR Collection of CAC Gold Sticker Coins. PCGS# 6090, NGC ID# 24EP, CoinPlex ID# EHA1808

**Choice AU 1811/10 O-101 Half Dollar
Soft, Satiny Luster**

- 4274** 1811/10 AU55 PCGS. O-101, R.1. The prominent die dot beneath the 18 and 11 makes attribution easy, as do the stars "flat on the left and sharp on the right." The denticles on the reverse form a double segment at the rim above the last S. The surfaces on this Choice AU piece are mostly brilliant with a soft, satiny texture and a slight accent of pinkish-gray color. Die erosion draws the obverse stars toward the edge, and the reverse shows much die fatigue where parts of UNITED and the lower olive sprig are virtually obliterated. PCGS# 6099, NGC ID# 24EV, CoinPlex ID# EHA1811OVR10

- 4275** 1811 Small 8 AU58 NGC. O-105a, R.2. Chestnut-gold margins encompass the stone-gray centers. A partially lustrous representative that shows slight wear on the curls right of the ear. Unabraded save for faint marks near the beak. PCGS# 6097, CoinPlex ID# EHA1811SM8

- 4276** 1811 Small 8 AU58 PCGS. CAC. O-106, R.3. This lustrous near-Mint half dollar has light olive-gray toning and only a hint of wear on Liberty's curls. Abrasions are minimal, and the eye appeal is superior for the AU58 level. The reverse has lengthy peripheral cracks and the dies are double clashed, as made. PCGS# 6097, CoinPlex ID# EHA1811SM8

**1811 O-106 Half Dollar, MS65
Small 8**

- 4277** 1811 Small 8 MS65 NGC. O-106, R.3. From an old numismatic holding, this Gem Mint State 1811 O-106 half dollar is new to the current collecting fraternity. The O-106 die pair is considered common. However, high grade appearances are infrequent and the last MS65 to appear at auction was 10 years ago in our 2003 FUN sale. This stunning specimen is boldly detailed with frosty luster beneath rich golden-brown toning inside a frame of blue peripheral iridescence. Census: 19 in 65, 227 finer (12/12), for all Large 8 varieties. PCGS# 6097, CoinPlex ID# EHA1811SM8

1812 Fifty Cent, O-104a, MS65
Difficult at This Grade Level
Lustrous and Well Struck

4278 1812 MS65 PCGS. O-104a, R.1. A late die state of this available variety, recognized by the fine die crack through NITED and the top of STATES. The lustrous surfaces of this lovely Gem display whispers of reddish-gold patina clinging to the rim areas, and imbued with an occasional blush of electric-blue. The design elements are well centered on the planchet and are very nicely detailed. Close inspection reveals no mentionable contact marks or spots. Gem and finer examples are very difficult to locate, making this MS65 offering a great opportunity for the collector desiring a high-grade Bust half dollar. Population: 13 in 65 (1 in 65+), 13 finer (12/12). PCGS# 6100, NGC ID# 24EW, CoinPlex ID# EHA1812

4279 1814 AU58 NGC. O-103, R.1. The broad die line or break beneath the left scroll end immediately attributes the Overton variety. This multiply clashed but unabraded early half dollar has plentiful mint shimmer and shows only slight high point blending on the curls and the top of the eagle's head. NGC ID# 24F3, PCGS# 6105, CoinPlex ID# EHA1814

1814 O-102a Half Dollar, MS65
Ex: Eliasberg Collection

4280 1814 MS65 PCGS. O-102a, R.2. Ex: Eliasberg. Housed in a green-label PCGS holder, this Gem was likely certified a short time after the 1997 Eliasberg sale. The late die state exhibits light obverse clash marks and heavy reverse clash marks, the latter resulting in die bulges that likely contributed to the obverse strike weakness. This frosty white specimen has brilliant silver luster and pleasing surfaces. Population: 13 in 65, 4 finer (11/12). Ex: William H. Woodin; John H. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1729. PCGS# 6105, NGC ID# 24F3, CoinPlex ID# EHA1814

Key Date 1815/2 Half Dollar
VF30, O-101

4281 1815/2 VF30 NGC. O-101, R.2. Rich golden-brown and dove-gray toning embraces this key date Capped Bust half dollar. The curls exhibit wear but the plumage displays substantial design detail. A lens reveals wispy abrasions on the obverse and the field near the eagle's beak. The sole die marriage for the year, the reported mintage is just 47,150 pieces. NGC ID# 24F5, PCGS# 6108, CoinPlex ID# EHA1815OVR2

1815/2 Half, O-101, XF Details

- 4282** 1815/2 — Cleaning — PCGS Genuine. XF Details. O-101, R.2. The sole die pairing for the year and the low mintage of 47,150 pieces make this the scarcest date of the Capped Bust half series. This piece shows plenty of the deep detail remaining along with obvious signs of the underdigit 2. The obverse is boldly clashed, as often seen. The surfaces are a rather drab gray with some darker charcoal areas and lighter silvery high points. PCGS# 6108, NGC ID# 24F5, CoinPlex ID# EHA1815OVR2
-

1815/2 Half Dollar, AU58
In Demand in All Grades

- 4283** 1815/2 AU58 NGC. O-101, R.2. A very scarce date in the Capped Bust half series, the 1815/2 is in demand in all grades. Examples can be located with patience and searching in Very Fine and Extremely Fine grades, but higher-grade pieces are challenging. This near-Mint State coin displays ample luster on both sides, each of which is lightly toned reddish-gold that is deeper in hue around the borders. The design features are well struck save for the usual softness in the star centers along the right border. A few light circulation marks, as well as clash marks, do not disturb. Census: 27 in 58, 25 finer (12/12). NGC ID# 24F5, PCGS# 6108, CoinPlex ID# EHA1815OVR2
-

1817 O-109 Half Dollar, MS63
Census Level Specimen

- 4284** 1817 MS63 NGC. O-109, R.2. Although the fourth edition Overton census lists two MS65 examples, a single MS64 from the Eliasberg Collection holds the top spot among pieces sold at auction over the past 10 years. The present piece, from an old numismatic holding, is likely one of the three or four finest examples of this die marriage, exhibiting frosty luster and sharp details beneath beautiful gold, blue, and iridescent toning. Census: 26 in 63, 22 finer (12/12), for all 1817 die marriages. NGC ID# 24F6, PCGS# 6109, CoinPlex ID# EHA1817
-

- 4285** 1818/7 Small 8 AU55 PCGS. O-102, R.2. The “horns” and crossbar of the underdigit 7 are obvious at the top of the second 8 in the date. This overdated half dollar is lustrous for the designated grade, and the unblemished surfaces exhibit lovely golden-brown centers and ocean-blue margins. PCGS# 6114, NGC ID# 24FA, CoinPlex ID# EHA1818OVR7
-

1819/8 O-102 Half Dollar, MS63
Large 9 Over 8

- 4286** 1819/8 Large 9 MS63 PCGS. O-102, R.2. In his auction record of early half dollars, Stephen Herrman lists just 10 Mint State examples that have appeared in auctions since 1989, including only one in the past three years. The seven appearances above MS63 represent only four different coins. This Select Mint State piece is likely one of the six or seven finest examples of the variety. Both sides are fully lustrous with frosty silver surfaces beneath delicate gray-gold and iridescent toning with trivial marks only visible under a loupe. Population: 7 in 63, 7 finer (12/12), for all Large 9 over 8 varieties. PCGS# 6119, CoinPlex ID# EHA1819OVR8LG9
-

**1819/8 O-104 Half Dollar, MS63
Large Overdate**

- 4287** 1819/8 Large 9 MS63 PCGS. O-104, R.1. Likely a Census level example of the variety, one of only half a dozen pieces known in Mint State grades. A boldly defined representative, this half dollar has satiny silver luster with deep golden-brown, forest-green, and gunmetal-gray toning. Light mint-made roller marks are noted on portions of the reverse border.
Ex: Long Beach Signature (Heritage, 9/2008), lot 2076. PCGS# 6119, CoinPlex ID# EHA1819OVR8LG9

- 4288** 1820 Square Base Knob 2, Large Date AU55 PCGS. CAC. O-105, R.1. Deep dove-gray and powder-blue embraces the motifs and fields, while the lustrous borders offer fire-red and forest-green patina. A lightly circulated representative with only minor marks on each side. PCGS# 6122, CoinPlex ID# EHA1820SQ2LGDT

- 4289** 1821 MS62 NGC. O-101a, R.1. Autumn-gold, steel-blue, and lilac toning alternates across coruscating and moderately abraded surfaces. The strike shows some softness on the left (facing) claw and the upper reverse legends. NGC ID# 24FF, PCGS# 6128, CoinPlex ID# EHA1821

**1822/1 O-101 Half Dollar, MS63
Condition Scarcity**

- 4290** 1822/1 MS63 PCGS. O-101, R.1. Two die marriages share a single obverse die, and the O-101 is seen more frequently than O-102, although both varieties are elusive in Mint State. The centers have light silver-gray toning, the central reverse a tad brighter than the obverse. Both sides exhibit deep gold, steel, and iridescent peripheral toning. Population: 3 in 63, 8 finer (11/12). PCGS# 6130, NGC ID# 24FH, CoinPlex ID# EHA182OVR21

**1823 O-101a Half Dollar, MS62
Patched 3**

- 4291** 1823 Patched 3 MS62 PCGS. O-101a, R.1. The crude shape of the 3, a later die state of the O-101 Broken 3, identifies the *Guide Book* Patched 3 variety. The present lustrous piece offers medium slate-gray and peach-gold toning. Void of marks and well struck save for a couple of star centers. Population: 7 in 62, 11 finer (12/12). PCGS# 6133, NGC ID# 24FJ, CoinPlex ID# EHA1823PATCH3

**1825 O-114 Half Dollar, MS64
Near Condition Census**

- 4292** 1825 MS64 NGC. O-114, R.1. A delightful example, and a plentiful variety, making this Choice Mint State piece an ideal choice for a date or type collector. Both sides have sharp design motifs and full satin luster beneath gold and iridescent toning. Census: 51 in 64, 43 finer (11/12) for all 1825 varieties. NGC ID# 24FL, PCGS# 6142, CoinPlex ID# EHA1825

**1825 O-101 Half, MS66
Probable Finest Known**

- 4293** 1825 MS66 NGC. O-101, R.1. This coin is conditionally rare in the Premium Gem state of preservation. Original cartwheel mint luster emanates from deep rainbow toning in concentric circles from lime-green to deep aqua, with copper-orange centers. This coin is remarkably free of even minor marks or luster grazes, with diligent searching required to note a small tick on Liberty's ear lobe that will serve as a future pedigree marker. The strike is pleasing, with nearly all of the star centrils full, although a bit soft on Liberty's highpoint hair curls and the eagle's claws. The coin is perfectly centered, with full, bold dentilation on obverse and reverse. Both dies show moderate die erosion, as struck, with the star points and letters showing metal flow toward the peripheries. As of this writing (12/12), NGC has certified a total of nine 1825 coins of all varieties (attributed or not) in MS66, with three coins graded higher. A stunningly beautiful coin that is sure to find a home in the finest type or Bust half cabinet. NGC ID# 24FL, PCGS# 6142, CoinPlex ID# EHA1825

1826 O-103 Half Dollar, MS63
Probable Finest Known

- 4294** 1826 MS63 NGC. O-103, R.5. Just over a dozen years ago, early half dollar specialist Sheridan Downey offered an uncertified 1826 O-103 half dollar graded MS63, and that piece has been called the probable finest known. While a direct comparison is unlikely, we believe that the present specimen is at least equal to the Downey specimen, and perhaps even finer. This lovely specimen has a bold strike and remarkable eye appeal, with frosty silver luster beneath delicate gold toning. Scattered marks are entirely trivial. NGC ID# 24FM, PCGS# 6143, CoinPlex ID# EHA1826

1826 O-118a Half Dollar, MS65
Brilliant and Highly Lustrous

- 4295** 1826 MS65 PCGS. O-118a, R.1. The reverse is cracked through the tops of UNITED STATES with a faint crack through the tops of MERICA. This amazing Gem is highly lustrous and sharply detailed with brilliant silver surfaces showing only slight champagne toning. Population: 36 in 65 (1 in 65+), 7 finer (12/12). From *The Richard P. Ariagno, M.D. Collection*. PCGS# 6143, NGC ID# 24FM, CoinPlex ID# EHA1826

1827/6 O-102 Half Dollar, MS64
Popular Overdate Variety

- 4296** 1827/6 MS64 PCGS Secure. CAC. O-102, R.1. Light gray and heather toning mask the frosty silver luster of this Choice Mint State overdate half dollar. Both sides are sharply detailed with trivial marks that require a glass to view. Population: 8 in 64 (1 in 64+), 3 finer (12/12), for all three 1827/6 varieties. PCGS# 6147, NGC ID# 24FP, CoinPlex ID# EHA1827OVR6

Patinated Choice 1830 Half Dollar
Small O, Overton-117

- 4297** 1830 Small O MS64 PCGS. CAC. O-117, R.2. Repunching on the 5 in the denomination helps attribute this Overton pairing. Rose-red, ocean-blue, and dove-gray toning blankets the lustrous and mark-free surfaces. Well struck and pleasing with exceptional eye appeal for the designated grade. Struck from moderately clashed dies. PCGS# 6156, NGC ID# 24FU, CoinPlex ID# EHA1830

Choice 1831 Half Dollar, O-106

- 4298** 1831 MS64 NGC. O-106, R.3. Orange-gold and olive-gray colors enrich this lustrous and suitably struck Choice half dollar. No marks are remotely worthy of mention, and such pleasing preservation further augments the formidable eye appeal. The die lines above the cap referred to by Overton remain visible despite long in use dies. Ex: *Westmoreland, Virginia Collection (Heritage, 2/2006)*, lot 1267. NGC ID# 24FV, PCGS# 6159, CoinPlex ID# EHA1831

1831 O-104 Half Dollar, MS65

- 4299** 1831 MS65 PCGS. O-104, R.1. Although a plentiful R.1 variety, the 1831 O-104 is scarce in higher grades, and the present MS65 is likely one of the four or five finest known specimens. This delightful Gem has frosty luster beneath olive-gold and iridescent toning with faint bluish overtones enhancing its eye appeal. Population: 56 in 65 (1 in 65+), 5 finer (12/12), for all 1831 varieties. PCGS# 6159, NGC ID# 24FV, CoinPlex ID# EHA1831

4300 1832 Small Letters AU58 PCGS. O-114, High R.4. A better die marriage that shares one die each with two comparatively plentiful Overton varieties, O-113 and O-115. Toned rich olive-green and steel-gray with smooth surfaces and the usual incompleteness of strike on the PLU in PLURIBUS. PCGS# 6160, NGC ID# 24FW, CoinPlex ID# EHA1832SL

4301 1833 MS63 NGC. O-112, R.2. The key attribution point for O-112 is a boldly repunched star 10, per Capped Bust specialist Dr. Glenn Peterson. The present lustrous and lightly toned example has minimal marks and well struck motifs. The borders are typically impressed. NGC ID# 24FX, PCGS# 6163, CoinPlex ID# EHA1833

4302 1833 MS63 PCGS. O-105, R.2. The second S in STATES is widely repunched. Dusky walnut-brown and aquamarine patina embraces this lustrous Capped Bust type coin. Minimally abraded, though occasional portions of the design are lightly brought up. PCGS# 6163, NGC ID# 24FX, CoinPlex ID# EHA1833

Lustrous Gem 1834 Half Dollar O-101, Large Letters, Large Date

4303 1834 Large Date, Large Letters MS65 NGC. O-101, R.1. Golden-brown and navy-blue patina invigorates the borders of this lovely Gem. The fields and motifs are pearl-gray. Booming luster sweeps undisturbed surfaces. The strike is generally good, though blending is noted on the left shield border and the curls near the ear. Overton-101 is distinctive for its prominent repunching on the 5 in the denomination. NGC ID# 24FY, PCGS# 6164, CoinPlex ID# EHA1834LDLL

4304 1834 Large Date, Small Letters MS63 PCGS. O-105, R.1. Deep forest-green, walnut-brown, and lavender toning embrace this satiny and lightly abraded half dollar. The strike is good though the first three stars and the curls near the ear lack a full impression. *From The Gensch Numismatic Trust Collection.* PCGS# 6165, CoinPlex ID# EHA1834LDSL

4305 1835 MS63 PCGS. O-102, R.3. Light caramel-gold toning visits this satiny and unblemished Select half dollar. The strike is crisp except on the right-side stars. The flat top to the 5 in the date distinguishes O-102 from the similar O-101, coined with the same reverse die. PCGS# 6168, NGC ID# 24FZ, CoinPlex ID# EHA1835

REEDED EDGE HALF DOLLARS

Darkly Toned 1836 Reeded Edge Half, XF40

4306 1836 Reeded Edge XF40 NGC. GR-1. This is a richly toned XF example of the famous and low-mintage Reeded Edge half dollar of 1836. The fields display a deep gray patina, while the devices have a light gold cast to them, providing attractive contrast that lends wonderful eye appeal to this piece. Surface marks appear in the field to the right of Liberty. NGC ID# 2U28, PCGS# 6175, CoinPlex ID# EHA1836RE

1836 Reeded Edge Half Dollar, AU55 Popular First-Year-of-Issue

4307 1836 Reeded Edge AU55 NGC. GR-1. There is only one documented die variety of the 1836 Reeded Edge half dollar, and this example is a late die state with a short die crack from the dentils right of the final S in STATES. This piece also displays the sometimes seen die lump high between ES in STATES.

This is a popular coin because of the first year of issue of a new design and the first half dollar produced on the new steam powered press. Medium gray toning graces both sides of this Choice AU example. The design elements are well brought up and there are no mentionable marks. NGC ID# 2U28, PCGS# 6175, CoinPlex ID# EHA1836RE

4308 1837 MS63 NGC. GR-19, R.3. This lustrous Select representative displays rich lilac and golden-brown shades that deepen to lavender and forest-green near the rims. Well struck at the centers though the left borders show incompleteness. NGC ID# 24G4, PCGS# 6176, CoinPlex ID# EHA1837RE

**1837 GR-2 Half Dollar, MS63
Inverted G Reverse**

- 4309 1837 Inverted G MS63 PCGS. Breen-4733, GR-7, R.2.** This popular variety has a defective C in AMERICA that looks like an inverted G. Although a relatively common variety, the Inverted G is scarce in higher grades. A sharply struck example, although some of the reverse dentils are missing on this later die state specimen. Both sides have frosty and brilliant luster with delicate obverse toning and medium gold reverse toning. PCGS# 6176, NGC ID# 24G4, CoinPlex ID# EHA1837RE

- 4310 1839-O — Polished — NCS. Unc. Details. GR-5, High R.4.** Ex: Jules Reiver Collection. Numerous slender die cracks attribute this better '39-O variety. Unnaturally prooflike and hairlined from cleaning, but the strike is full and abrasions are few. Dusky almond-gold and slate-gray with a powder-blue area on the upper right obverse. Ex: *Julian Leidman (6/1994); Jules Reiver Collection (Heritage, 1/2006), lot 23463, which realized \$2,185.* NGC ID# 24G7, PCGS# 6181, CoinPlex ID# EHA1839O

SEATED HALF DOLLARS

Lovely 1840 Small Letters Half, MS64

- 4311 1840 Reverse of 1839, Small Letters MS64 PCGS. Gold and copper highlights appear on this near-Gem, particularly on the reverse. The piece displays vibrant satiny mint luster and sharply detailed design elements. Although there are a number of surface marks, they are minor in nature. Population: 16 in 64, 10 finer (11/12). PCGS# 6234, NGC ID# 24GM, CoinPlex ID# LHM1840SL**

**Select 1840-O Half Dollar
Small O Mintmark**

- 4312 1840-O MS63 ANACS. WB-10. Small O.** Heavy die cracks on the reverse distinguish this early New Orleans Seated half dollar. The margins offer blue-green and plum-mauve shades, but most of this satiny example is untoned. Portions of the eagle are incomplete though the overall strike is good. One thin mark is noted near the raised elbow. NGC ID# 24GN, PCGS# 6235, CoinPlex ID# LHM1840O

- 4313 1842 Small Date, Large Letters — Reverse Die Cud — MS62 PCGS. WB-102.** A sizeable rim die break is centered over the TAT in STATES. Lustrous and moderately abraded with light peripheral golden toning. A good strike despite blending on the lower portion of the eagle. PCGS# 6240, CoinPlex ID# LHM1842SDR1842

**1842 Small Date, Large Letters Half
Conditionally Rare Near-Gem**

- 4314 1842 Small Date, Large Letters MS64 PCGS. CAC.** Both sides of this near-Gem display areas of attractive sea-green, plum, and golden-orange toning. The coin is well-struck. The reverse exhibits a radial die crack through the left edge of the O in DOL. Most 1842 halves are the Medium Date variety. The Small Date, Large Letters is scarce, and the Small Date, Small Letters is extremely rare. Population: 6 in 64, 1 finer (11/12). PCGS# 6240, CoinPlex ID# LHM1842SDR1842

**Doubled Date, FS-301
AU 1844-O Half Dollar**

- 4315 1844-O Doubled Date AU50 NGC. WB-103, FS-301.** Round Medium O. One of the most famous varieties of Seated half dollars, the 1844 is widely and boldly repunched and overlaps Liberty's rock. Featured on the cover of the classic 1993 Wiley-Bugert reference. This better grade example displays flashy luster and pleasing design detail. Light almond-gold toning visits minimally abraded and mildly granular surfaces. Census: 2 in 50, 5 finer (11/12). NGC ID# 24H2, PCGS# 6247, CoinPlex ID# LHM1844ODD

- 4316 1846-O Tall Date XF45 NGC.** An attractive gray patina covers this very scarce date logotype variety. Although numerous contact marks are present, none are worthy of mention. This rare piece has a very pleasing appearance. Census: 5 in 45, 12 finer (12/12). NGC ID# 24H9, PCGS# 6256, CoinPlex ID# LHM1846OTALLDT

**1847/(6) Half Dollar, AU50
Late State of FS-301 Blundered Date**

- 4317 1847/(6) AU50 PCGS. WB-102, FS-301, Late Die State.** Between the high-right placement of the date and the doubling on Liberty's shield, this "blundered date" variety is identifiable even though the late state of the obverse die has eliminated all traces of the (major) blunder. The remaining luster under peach, violet, and blue patina is semireflective, evocative of the die polishing that must have taken away the last traces of the underlying date. This variety seldom appears on the open market in any condition, and only a few appearances appear in our Permanent Auction Archives. A coin to remember. PCGS# 6258, NGC ID# 24HA, CoinPlex ID# LHM1847OVR6

Condition Rarity MS63 1847-O Half Dollar

- 4318 1847-O MS63 PCGS. CAC.** Gold, crimson, violet, and periwinkle hues form ethereal waves of patina across brightly lustrous surfaces on this New Orleans half dollar. Peripheral details are soft, but the interiors have better definition. Frosted on Liberty's figure with a small nick in her leg drapery. Population: 8 in 63, 4 finer (12/12). PCGS# 6259, NGC ID# 24HB, CoinPlex ID# LHM1847O

**MS65 1854 Arrows Half Dollar
The Clapp-Eliasberg Coin**

- 4319 1854 Arrows MS65 PCGS Secure.** Ex: Eliasberg. Dusky dove-gray and golden-brown embrace this satiny and minimally abraded high grade silver type coin. Crisply struck aside from the left (facing) claw. Gems of this Arrows date are surprisingly rare despite a generous mintage of close to 3 million pieces. Population: 4 in 65, 6 finer (11/12).
Ex: Richard L. Ashhurst Collection (S.H. Chapman, 5/1908); John H. Clapp; Clapp Estate; Louis E. Eliasberg, Sr.; Eliasberg Collection (Bowers and Merena, 4/1997), lot 1959. PCGS# 6279, NGC ID# 24JL, CoinPlex ID# LHM1854ARR

- 4320 1856-O MS64 PCGS. WB-102, FS-301.** Attractive satin luster adds to the eye appeal of this bright, virtually untuned near-Gem example. The date is obviously repunched. The initial logotype was entered with a pronounced upward slant, then partially effaced and correctly re-entered. The variety is undesignated on the PCGS insert. Minor surface marks appear on both sides. Population: 39 in 64 (2 in 64+), 8 finer (12/12). PCGS# 6288, NGC ID# 24HP, CoinPlex ID# LHM1856O

- 4321 1857 MS63 PCGS.** Areas of bright teal color, along with golden pink and russet, appear on the obverse. The reverse displays hints of color, but is largely untuned. The dies are lightly rotated on this Select Mint State example. Population: 13 in 63, 24 finer (11/12). From The Gensch Numismatic Trust Collection. PCGS# 6290, NGC ID# 24HS, CoinPlex ID# LHM1857

**1857 Seated Liberty Half, MS66
Finest Certified at PCGS**

- 4322 1857 MS66 PCGS.** Like many issues of this period, the 1857 Seated Liberty half dollar is not difficult to locate in lower grades, but is a prime condition rarity at the Premium Gem level. This well-detailed MS66 example exhibits vibrant satiny mint luster under shades of golden-brown and amber patina. A few clash marks are evident on both sides. Population: 1 in 66, 0 finer (12/12). PCGS# 6290, NGC ID# 24HS, CoinPlex ID# LHM1857

- 4323 1859-O MS63 PCGS. CAC.** Scattered flecks of olive-green and light brown color cover both sides of this Select Mint State example. The toning combined with rich underlying luster provide this piece with an attractive appearance. Minor surface marks appear on the obverse. Population: 21 in 63, 20 finer (12/12). PCGS# 6297, NGC ID# 24HZ, CoinPlex ID# LHM1859O

- 4324 1859-S MS61 NGC. WB-102.** Medium S. Rich walnut-brown toning encompasses this satiny and unabraded early San Francisco half dollar. The strike is bold except on a few of the obverse stars. Census: 7 in 61, 28 finer (12/12). NGC ID# 24J2, PCGS# 6298, CoinPlex ID# LHM1859S

**Gem 1861 Seated Liberty Half
Scarce Early Civil War Era Date**

- 4325 1861 MS65 PCGS.** Shades of lavender-gray and champagne-gold toning blanket the well-preserved surfaces of this early Civil War era Gem. The design elements are well-detailed, with a touch of softness on the eagle's left (facing) claw. Strong mint luster shines through the toning. Population: 18 in 65, 16 finer (12/12). PCGS# 6302, NGC ID# 24J7, CoinPlex ID# LHM1861

- 4326 1861-O AU55 PCGS.** The "Die Crack Bisected Date" variety, one of the die pairs struck by the Confederacy, per Wiley-Bugert (1993). Randall E. Wiley designates it as W-13 and confirms its Confederate origins in a November 2005 *Gobrecht Journal* article. Partly lustrous with peripheral golden-brown and sea-green toning. PCGS# 6303, NGC ID# 24J8, CoinPlex ID# LHM1861O

Near-Gem 1861-O Half

- 4327 1861-O MS64 PCGS.** An attractive gray patina envelops both sides of this near-Gem, with hints of pale pink also evident. This is a lovely, well-struck example from one of the most dramatic years in the history of the New Orleans Mint. A faint fingerprint fragment appears above the eagle to the right. Population: 24 in 64 (2 in 64+), 13 finer (11/12). PCGS# 6303, NGC ID# 24J8, CoinPlex ID# LHM1861O

- 4328 1861-O CSA Obverse — Shipwreck Effect — NGC Details. AU. W-11A. Ex: S.S. Republic.** This 1861-O Seated Liberty half dollar was recovered from the wreck of the S.S. *Republic*. The design elements are well-detailed and the diagnostic die crack from the rim to the bridge of Liberty's nose shows plainly, indicating this coin may have been struck after the New Orleans Mint was seized by the Confederacy. This is the same obverse die used to strike the famous Confederate half dollars, of which only four specimens are known. Lot includes the official presentation case with certificate of authenticity and informative CD. PCGS# 39968

CONFEDERATE STATES OF AMERICA

Scott Restrike Confederate Half Dollar
Dated 1861, Struck in 1879

- 4329 1861 Scott Restrike MS62 PCGS. Breen-8002.** The Scott Restrike Confederate halves were made in 1879 and are the closest most collectors can come to owning one of the four 1861 originals. Scott's firm overstruck the planed-down reverses of 500 1861-O Seated halves with the original Confederate half die, purchased indirectly from New Orleans Mint Chief Coiner B.F. Taylor. The striking somewhat flattened the host obverses, as can be seen on the present coin, which has AU details on the Seated side. The Confederate side has light golden-brown toning and shows incompleteness of strike on CONFEDERATE STATES. Listed on page 404 of the 2013 *Guide Book*. Population: 31 in 62, 20 finer (11/12). PCGS# 340402, CoinPlex ID# LHM1861CSARES

1961 Scott Restrike CSA Half, MS62

- 4330 1861 Scott Restrike MS62 PCGS. Breen-8002.** In 1879, numismatic author Ebenezer Locke Mason had the most famous transaction of his career. He purchased the original Confederate half dollar die from B.F. Taylor, who was Chief Coiner at the New Orleans Mint at the advent of the Civil War. Mason, in turn, sold the numismatically momentous die to a leading dealer of the day, J.W. Scott. Scott promptly acquired 500 1861-O half dollars, then a common date, and planed off their reverses. Those sides were stamped with the Confederate die, creating a numismatic keepsake similar in appearance to the four known original Confederate half dollars. However, the Seated side usually showed light wear, in addition to some flatness from Scott's second strike. The present example has a well struck semiprooflike Confederate obverse and XF details on the Seated reverse. Minimally abraded and toned medium golden-brown and powder-blue. PCGS# 340402, CoinPlex ID# LHM1861CSARES

**Scott Token in White Metal
Confederate Obverse, MS64**

- 4331 1861 Scott Token MS64 PCGS. CAC. Breen-8003.** These popular tokens were struck in white metal by J.W. Scott circa 1879, pairing the Confederate States of America obverse die with a custom commemorative reverse. This near-Gem is one of just 500 pieces struck for this *Guide Book* issue. The brilliant surfaces are well struck and semiprooflike. The Confederate obverse shows light die rust while the medal reverse exhibits numerous peripheral cracks.
Ex: Long Beach Signature (Heritage, 6/2010), lot 760, which realized \$6,325. PCGS# 340403

SEATED HALF DOLLARS

**Gem 1863 Seated Liberty Half
Only Three Finer Coins at NGC**

- 4332 1863 MS65 NGC.** From a smallish Civil War mintage of 503,200 pieces, the 1863 Seated Liberty half dollar is seldom encountered in Gem condition. This stunning Gem exhibits sharply detailed design elements throughout, with vibrant satiny mint luster and traces of light lavender toning. Eye appeal is extraordinary. Census: 16 in 65, 3 finer (11/12). NGC ID# 24JB, PCGS# 6309, CoinPlex ID# LHM1863

**1863 Seated Liberty Half Dollar, MS65
Only Three Finer Coins at NGC**

- 4333 1863 MS65 NGC.** This delightful Gem displays razor-sharp definition on all design elements, with vibrant satiny mint luster on both sides. The mostly brilliant surfaces show just a hint of pink toning, with no mentionable distractions. Few examples of this popular Civil War era mintage have survived in Mint State grades. Census: 16 in 65, 3 finer (12/12). NGC ID# 24JB, PCGS# 6309, CoinPlex ID# LHM1863

**Near-Gem 1871 Half Dollar
Great Color**

- 4334 1871 MS64 PCGS.** Both sides offer semireflective luster, but the detail on peripheral elements such as the obverse stars is too soft for the coin to be a proof. Blue-to-violet toning is more prominent than the peach counterpoint in the patina, but the overall appearance suggests a mix. Population: 17 in 64, 7 finer (12/12). PCGS# 6330, NGC ID# 24K4, CoinPlex ID# LHM1871

- 4335 1871-CC — Tooled — PCGS Genuine. AU.** 1871 was the first year of half dollar production at the Carson City Mint. The mintage of 153,950 appears reasonable but there were no collectors in the area, and most of the several hundred survivors are well worn or have problems. This sharp example is repaired on the right obverse field and a more subtle smoothed area on the reverse field above the arrowheads. PCGS# 6331, NGC ID# 24K5, CoinPlex ID# LHM1871CC

- 4336 1872-CC — Improperly Cleaned — NGC Details. AU.** Design definition is virtually complete, but the slate-gray surfaces are subdued and hairlined. The upper obverse margin is mildly granular and exhibits dark toning. An early Carson City issue that is scarcer than its mintage implies. NGC ID# 24K8, PCGS# 6334, CoinPlex ID# LHM1872CC

**1873-S Arrows Half Dollar, MS62
Uncommonly High-Grade**

- 4337 1873-S Arrows MS62 PCGS.** The 1873-S half dollar with Arrows is a scarce date, especially in high grades, and according to Randy Wiley and Bill Bugert (1993) is "Extremely rare in mint state." Soft bluish-gray and rose patina cover the lustrous surfaces of this MS62 example, and an attentive strike brings up sharp detail on the design features. Some faint slide marks are visible on the obverse portrait. Population: 1 in 62, 4 finer (12/12).
Ex: ANA (Heritage, 8/2007), lot 841. PCGS# 6345, NGC ID# 24L9, CoinPlex ID# LHM1873SARR

**Elusive 1873-S Half Dollar
Arrows, MS62**

- 4338 1873-S Arrows MS62 NGC. WB-101.** Ex: Dick Osburn Collection. Large Arrowheads. Medium autumn-gold and steel-blue toning enriches this fully struck and satiny representative. Devoid of relevant marks and impressive for the designated third party grade. Coined from lightly rusted dies. One small strike-through (as made) is on the obverse border at 4 o'clock. A very scarce issue in any grade and decidedly rare in Mint State. Census: 2 in 62, 8 finer (11/12). Ex: Auction '85 (*Stack's*, 7/1985), lot 728; *David Queller Collection* (*Stack's*, 10/2002), lot 650; *Dick Osburn Collection* (*Stack's-Bowers*, 8/2011), lot 7116, which realized \$4,715. NGC ID# 24L9, PCGS# 6345, CoinPlex ID# LHM1873SARR

**1874 Arrows Half, MS64
Frosted Luster**

- 4339 1874 Arrows MS64 PCGS.** The second and final year of With Motto, With Arrows design for the Seated half dollar, offered here as a frosted near-Gem with pale peach tints to the light silver patina and a few spots of deep color in the denticles. Great all-around visual appeal. Population: 62 in 64, 19 finer (12/12). PCGS# 6346, NGC ID# 24LA, CoinPlex ID# LHM1874ARR

**Lustrous Gem 1875-S Half
High Grade Type Coin**

- 4340 1875-S MS65 PCGS.** Splashes of light autumn-gold toning embrace this lustrous and well preserved Gem. The strike is sharp and the eye appeal is exceptional. 1875 through 1877 witnessed the largest mintages of the Motto type, but Gems are scarce. Encapsulated in an old green label holder. Population: 51 in 65, 12 finer (11/12). PCGS# 6351, NGC ID# 24KF, CoinPlex ID# LHM1875S

**Near-Gem 1876-CC Half
Large CC Mintmark**

- 4341 1876-CC MS64 PCGS. WB-11.** Large CC. This Carson City type coin has a good strike and pleasing cartwheel luster. A whisper of golden toning precludes full brilliance. Prominent die lines near the N in UNITED are as made but unmentioned in the Bugert reference. Population: 13 in 64, 12 finer (11/12). PCGS# 6353, NGC ID# 24KH, CoinPlex ID# LHM1876CC

- 4342 1877 MS64 PCGS. CAC Gold Label.** Type Two Reverse. Brilliant and lustrous with a bold strike and dazzling cartwheel luster. Marks are relegated to minor contact on the right obverse field. Encased in a first generation holder. Population: 48 in 64, 41 finer (11/12). From *The SPQR Collection of CAC Gold Sticker Coins*. PCGS# 6355, NGC ID# 24KK, CoinPlex ID# LHM1877

- 4343 1877 MS64 PCGS. CAC.** Type Two Reverse. Rich jade-green, lilac-red, and powder-blue patina encompasses this satiny and well preserved near-Gem. Despite a high mintage, surprisingly few survivors attain the MS64 level. Population: 48 in 64, 41 finer (11/12). PCGS# 6355, NGC ID# 24KK, CoinPlex ID# LHM1877

- 4344 1877-S MS64 NGC.** Type Two Reverse. Golden-brown and sea-green embrace the obverse border. The reverse displays faint olive and gold shades. Lustrous and boldly struck with one concealed thin vertical mark on Liberty's raised arm. Struck from a lightly rusted obverse die. NGC ID# 24KM, PCGS# 6357, CoinPlex ID# LHM1877S

Important 1878-CC Half, XF45

- 4345 1878-CC XF45 PCGS.** Though the preceding three years had seen consecutive million-coin mintages for Carson City half dollars, the denomination's output was cut short at 62,000 pieces in 1878, and those were the last coins of the denomination the Nevada facility would produce. Areas of peach highlights appear on this otherwise lightly toned gray Choice XF example. Population: 3 in 45, 25 finer (11/12). PCGS# 6359, NGC ID# 24KP, CoinPlex ID# LHM1878CC

1879 Half Dollar, MS65 ★ Prooflike

- 4346 1879 MS65 ★ Prooflike NGC.** This impressive Gem has fully mirrored fields, lustrous and sharply defined devices, brilliant silver surfaces, and peripheral obverse iridescence, offering gold, russet, and blue. The reverse has only a thin crescent of gold toning. NGC has certified just six Prooflike examples of this date, including this MS65 ★ Prooflike, and two in MS66 Prooflike (11/12). NGC ID# 24KS, PCGS# 6361, CoinPlex ID# LHM1879

1879 Seated Liberty Half, MS65
Low Business-Strike Mintage

- 4347 1879 MS65 NGC. CAC.** Only 4,800 business-strike Seated Liberty half dollars were struck in 1879, and high-grade specimens are seldom encountered in today's market. This delightful Gem displays sharply detailed design elements and vibrant satiny mint luster on lightly marked brilliant surfaces. Census: 46 in 65 (7 in 65+), 44 finer (12/12). NGC ID# 24KS, PCGS# 6361, CoinPlex ID# LHM1879

Premium Gem 1880 Seated Half
Only Six Finer Coins at NGC

- 4348 1880 MS66 NGC.** Only 8,400 business-strike Seated Liberty half dollars were struck in 1880, and the issue is seldom encountered in high grade. This spectacular Premium Gem offers sharply detailed design elements throughout, with brilliant partially prooflike fields that show few signs of contact. Census: 11 in 66, 6 finer (11/12). NGC ID# 24KT, PCGS# 6362, CoinPlex ID# LHM1880

MS65 1888 Half Dollar
Gold CAC Bean

- 4349 1888 MS65 PCGS. CAC Gold Label.** Light to medium golden-brown toning graces this lustrous and well preserved Motto half dollar. The strike is crisp except on star 8. As with all other halves coined between 1879 and 1890, the 1888 has a very low mintage. A scant 12,000 pieces were struck. Dealers local to Philadelphia apparently saved a couple hundred pieces, but high grade examples remain scarce.
From The SPQR Collection of CAC Gold Sticker Coins. PCGS# 6370, NGC ID# 24L3, CoinPlex ID# LHM1888

- 4350 1890 MS64 Prooflike NGC.** The 1890 half was the last of the low-mintage halves that began in 1879, with only 12,000 business strikes produced. This near-Gem remains bright and displays attractive proof-like surfaces. Minor surface marks appear on the obverse. Census: 15 in 64, 29 finer (12/12). NGC ID# 24L5, PCGS# 6372, CoinPlex ID# LHM1890

- 4351 1891 MS64 PCGS.** Lustrous surfaces, particularly on the reverse, provide this near-Gem with substantial eye appeal. Subtle hints of color appear on both sides in shades of lavender, ice-blue, gold, and russet, with the reverse being particularly attractive. Population: 43 in 64, 35 finer (12/12). PCGS# 6373, NGC ID# 24L6, CoinPlex ID# LHM1891

PROOF SEATED HALF DOLLARS

Significantly Toned PR62 1847 Half Dollar

- 4352 1847 PR62 PCGS.** Proof mintages for pre-1858 U.S. coinage issues are a favorite parlor-game topic for the scholarly numismatist, but for the purchaser, *survival* is a far more important metric. To be sure, there are far fewer proof 1847 half dollars than collectors who want one, and we expect competition to be keen for this PR62 example with appreciable charms. The faint golden-orange overtone that graces the light gray surfaces is richer on the obverse, though both sides show significant patina that partly obscures the mirrors. The striking sharpness leaves little doubt as to this coin's proof status, but a long, shallow flaw in the right obverse field precludes a finer designation. Population: 1 in 62, 3 finer (12/12). PCGS# 6391, CoinPlex ID# LHP1847
-

Border-Toned 1856 Half Dollar PR64+ Cameo

- 4353 1856 PR64+ Cameo PCGS. CAC.** An unknown but undoubtedly small number of proof 1856 half dollars made their way from the U.S. Mint to collectors' hands, and the best survivors from the issue enjoy high demand today. This PR64+ Cameo specimen deserves particular praise for its gorgeous interplay of contrast and color. Pale interiors have a strong cameo effect, particularly on the reverse, while the margins offer gold, orange, and indigo patina in colorful bands. A few tiny surface imperfections leave the grade just shy of full Gem status. Population: 3 in 64 (1 in 64+) Cameo, 1 finer (11/12). *From The Teich Family Collection.* PCGS# 86410, CoinPlex ID# LHP1856CA
-

**1859 Seated Half, PR65 ★ Cameo
Brilliant Deeply Reflective Surfaces**

4354 1859 PR65 ★ Cameo NGC. The 1859 Seated Liberty half dollar claims a low proof mintage of 800 pieces, with three varieties known for the date. This coin represents Breen's third variety, with an unpolished area between the bottom arrow heads and a small dash to the left of the 1 in the date. The design elements are sharply rendered and frosty, contrasting boldly with the brilliant mirrored fields. Census: 16 in 65 Cameo, 6 finer (12/12). PCGS# 86413, CoinPlex ID# LHP1859CA

4355 1861 PR63 PCGS. Moderate cameo contrast is evident but the designation is absent because of the green label holder. Toned light golden-gray with an undisturbed appearance. Though 1,000 proofs are reported as struck, the actual number issued was much lower, as unsold sets were melted by the Mint. PCGS# 6415, NGC ID# 27TL, CoinPlex ID# LHP1861

Delicately Toned PR64 Cameo 1861 Half

4356 1861 PR64 Cameo PCGS. A gorgeous Choice Cameo proof, this 1861 half dollar exhibits pale gold toning at the borders with hints of champagne over the balance of the obverse and reverse. A sharply struck and eye-appealing proof half dollar. Population: 10 in 64 Cameo, 2 finer (12/12).
Ex: *The T.W. Brown Collection (Heritage, 9/2010)*, lot 5054. PCGS# 86415, CoinPlex ID# LHP1861CA

**1862 Half Dollar, PR65 Cameo
One of Four Finest at PCGS**

4357 1862 PR65 Cameo PCGS. CAC. This 1862 Gem Cameo half dollar is one of just four examples certified by PCGS, with none finer. Pronounced field-device contrast is evident at all angles, but is almost breathtaking when the coin is tilted slightly beneath a light source. The razor-sharp strike on all design elements enhances even more the cameo effect. Hints of light gold color are visible at the margins, leaving the centers mostly untoned. Close examination reveals no marks of consequence. This piece exhibits fantastic overall eye appeal. A minute spot on Liberty's cheekbone might help to identify the coin. PCGS# 86416, CoinPlex ID# LHP1862CA

4358 1863 PR62 PCGS. Light chestnut toning graces this flashy and fully struck specimen. Cameo contrast is significant but undesignated due to the 1990s vintage of its green label holder. Myriad faint die polish lines are as made. PCGS# 6417, NGC ID# 27TP, CoinPlex ID# LHP1863

PR64 Cameo 1863 Seated Half

- 4359 1863 PR64 Cameo PCGS. CAC.** Although the reverse is brilliant, the obverse exhibits mauve and steel-blue shades that deepen near the rim. The cameo contrast is evident, especially on the black-on-white reverse. This specimen can be identified by a slender lintmark beneath the TA in STATES. One of only 460 proofs struck in this Civil War year. Population: 8 in 64 Cameo, 7 finer (11/12).
Ex: Long Beach Signature (Heritage, 6/2006), lot 1694; Kallenberg #1 Registry of Proof Half Dollars (Heritage, 1/2008), lot 1584, which realized \$4,312.50. PCGS# 86417, CoinPlex ID# LHP1863CA

- 4360 1864 PR63 Cameo PCGS.** An attractive coin, this piece displays nicely frosted devices against brilliant fields, providing lovely contrast. This half exhibits a bold strike with sharply detailed devices. Minor surface marks in the fields limited the grade. Population: 9 in 63 Cameo, 16 finer (12/12). PCGS# 86418, CoinPlex ID# LHP1864CA

- 4361 1865 PR63 PCGS.** Certified in a green label holder, which may explain the absence of a Cameo designation. The devices and legends show frost and contrast with darkly reflective fields. An intricately struck specimen, one of 500 coined during the momentous year in American history. PCGS# 6419, NGC ID# 27TS, CoinPlex ID# LHP1865

Choice Proof 1865 Seated Half Undesignated Cameo Contrast

- 4362 1865 PR64 PCGS. CAC.** Although not designated as a Cameo, this coin displays dramatic contrast between the mirrored fields and the sharply detailed frosty devices. A few hints of champagne-gold and lavender patina enhance the peripheries. Housed in a green label holder. Population: 49 in 64, 19 finer (12/12). PCGS# 6419, NGC ID# 27TS, CoinPlex ID# LHP1865

1866 Seated Liberty Half Dollar, PR65 First Year With Motto

- 4363 1866 Motto PR65 PCGS.** The 1866 proof Seated Liberty half dollar claims a mintage of just 725 pieces. Needless to say, examples in Gem condition are quite rare in today's market. The reverse design was altered in 1866 to include the motto IN GOD WE TRUST on a banner over the eagle, making this date an important one for type collectors as well. This sharply detailed Gem features deeply reflective fields, under shades of champagne-gold, cerulean-blue, and sea-green patina. Population: 10 in 65, 4 finer (11/12).
Ex: Metropolitan New York Convention Sale (Stack's, 5/1971), lot 469, flip accompanies the lot.
From The Teich Family Collection. PCGS# 6424, NGC ID# 27TZ, CoinPlex ID# LHP1866MOT

Amazing 1866 Motto PR66 Fifty Cent

- 4364 1866 Motto PR66 NGC.** The satiny motifs stand out against the mirrored fields of this Premium Gem proof, especially when the coin is tilted slightly under a light source. Soft cobalt-blue and gold-beige patina concentrates in the fields, joined by purple and violet in those of the reverse. Light silver-gray dominates the central devices. A solid strike emboldens the design features, and impeccable preservation characterizes both sides. The reverse is particularly appealing. Census: 9 in 66, 1 finer (11/12).
From The Greensboro Collection, Part II. NGC ID# 27TZ, PCGS# 6424, CoinPlex ID# LHP1866MOT

- 4365 1869 PR63 PCGS.** A razor-sharp specimen from the proof production of 600 pieces, this example displays well-struck devices and glassy fields. Minor hairlines likely held this very attractive example from a higher grade. Population: 52 in 63, 68 finer (12/12). PCGS# 6427, NGC ID# 27U4, CoinPlex ID# LHP1869

- 4366 1869 PR63 PCGS.** Frosty motifs contrast with glassy fields, though the coin is undesignated as Cameo due to the age of its first generation holder. Brilliant aside from slender bands of autumn-gold and jade-green at the margins. A razor-sharp specimen from the proof production of 600 pieces. PCGS# 6427, NGC ID# 27U4, CoinPlex ID# LHP1869

- 4367 1869 PR64 NGC.** *Ex: Richmond Collection. Bands of peach-gold, ruby-red, and ocean-blue endow the margins of this flashy and crisply struck near-Gem. Though undesignated as Cameo, the devices on both sides display consistent and substantial frost.*
Ex: Richmond Collection, Part III (David Lawrence, 3/2005), lot 1813, which realized \$1,380. NGC ID# 27U4, PCGS# 6427, CoinPlex ID# LHP1869

Superb Gem Proof 1869 Half Dollar
Ex: Philip Kaufman

- 4368 1869 PR67 NGC.** Ex: P. Kaufman. The lightly toned caramel-gold centers give way to cherry-red and jade-green margins. This razor-sharp Superb Gem is exquisitely preserved and possesses deeply mirrored fields. Immaculate save for one tiny spot on the left border of the reverse shield. Census: 2 in 67, 1 finer (11/12).
 Ex: Philip Kaufman Collection (Heritage, 9/2002), lot 6864.
 From The Greensboro Collection, Part II. NGC ID# 27U4, PCGS# 6427, CoinPlex ID# LHP1869

Richly Toned PR66 1870 Half Dollar

- 4369 1870 PR66 PCGS.** Richly toned golden-brown and violet on the obverse, this delightful Premium Gem displays lighter green and lavender hues on the reverse. The devices are sharply detailed and the surfaces are brightly reflective under the toning. Population: 4 in 66, 0 finer (11/12).
 Ex: The Daryl J. Haynor Collection (Heritage, 8/2011), lot 4032.
 From The Greensboro Collection, Part II. PCGS# 6428, NGC ID# 27U5, CoinPlex ID# LHP1870

- 4370 1872 PR63 PCGS. CAC.** An untoned and crisply struck specimen with minor hairlines and good field reflectivity. Both motifs are frosty, but no Cameo designation is possible due to the first generation holder. PCGS# 6430, NGC ID# 27U7, CoinPlex ID# LHP1872

1872 Half Dollar, PR66 Cameo
Attractively Toned

- 4371 1872 PR66 Cameo NGC.** Concentric rings of deep electric-blue, purple, and gold-orange patina, slightly more extensive on the obverse, cling to the rim areas of this Premium Gem Cameo, framing soft champagne centers. The design features exhibit crisp definition, and both sides are nicely preserved. Census: 6 in 66 Cameo, 2 finer (11/12).
 Ex: Long Beach Signature (Heritage, 9/2008), lot 2262.
 From The Greensboro Collection, Part II. PCGS# 86430, CoinPlex ID# LHP1872CA

- 4372 1874 Arrows PR63 PCGS.** Luminous motifs rise above the pearl-gray fields and aquamarine margins. The left (facing) claw and Liberty's hair show incompleteness. The Motto, Arrows type is limited to two years. Housed in an old green label holder. PCGS# 6435, NGC ID# 27UV, CoinPlex ID# LHP1874ARR

1874 Seated Liberty Half, PR64
Popular Arrows Type, Ex: Davis-Graves

- 4373 1874 Arrows PR64 PCGS. CAC.** From a low mintage of just 700 pieces, this 1874 proof Seated Liberty half dollar represents the short-lived Arrows design, one of the most popular type issues of the 19th century. This sharply detailed Choice specimen exhibits frosty devices and deeply mirrored fields, with a few hints of light gold, blue, and lavender toning. Population: 56 in 64, 21 finer (11/12).
 Ex: Davis-Graves Sale (Stack's, 4/1954), lot 616, flip accompanies the lot.
 From The Teich Family Collection. PCGS# 6435, NGC ID# 27UV, CoinPlex ID# LHP1874ARR

**1875 Seated Liberty Half, PR65+
Vivid Multicolor Toning**

- 4374 1875 PR65+ PCGS.** This high-end Gem is a remarkable survivor from a small proof mintage of just 700 pieces. The design elements are sharply detailed throughout and the deeply mirrored fields are blanketed in attractive shades of champagne-gold and cerulean-blue patina. No mentionable distractions are evident and eye appeal is terrific. Population: 22 in 65 (1 in 65+), 7 finer (11/12).
Ex: Metropolitan New York Convention Sale (*Stack's*, 5/1971), lot 487, flip accompanies the lot.
From *The Teich Family Collection*. PCGS# 6436, NGC ID# 27U9, CoinPlex ID# LHP1875

**1876 Seated Half, PR66 Cameo
FS-401 Variety, Gorgeous Toning**

- 4375 1876 PR66 Cameo PCGS. CAC. FS-401.** Type One Reverse with open buds. The popular variety with what appears to be the top half of an S mintmark on Liberty's throat. Gorgeously toned in sun-gold, orange, powder-blue, and rose-red. Sharply impressed aside from Liberty's left (facing) claw and a couple of minor planchet marks incompletely effaced by the strike. Population: 4 in 66 (1 in 66+) Cameo, 0 finer (11/12).
Ex: *Central States Signature* (*Heritage*, 4/2008), lot 1167.
From *The Greensboro Collection, Part II*. PCGS# 86437, CoinPlex ID# LHP1876CA

**1877 Half Dollar, PR66
Obvious but Unacknowledged Contrast**

- 4376 1877 PR66 PCGS. CAC.** While business strike 1877 half dollars are a common With Motto issue with a mintage in excess of 8 million pieces, proofs are another matter. They are quite scarce with only 510 pieces struck. This is an outstanding Premium Gem and is housed in an older green-label PCGS holder. Both sides are fully brilliant with no toning. It is deserving of a Cameo designation with deep mirrors and significant luster over the devices, this coin's certification came before PCGS gave such designations. Population: 3 in 66, 0 finer (10/12).
Ex: *Coinfest Signature* (*Heritage*, 10/2010), lot 3708, where it brought \$8,050.
From *The Greensboro Collection, Part II*. PCGS# 6438, NGC ID# 27UC, CoinPlex ID# LHP1877

**1878 Seated Liberty Half, PR66
Deep Multicolor Toning**

- 4377 1878 PR66 NGC. CAC.** A remarkable Premium Gem, from a proof mintage of just 800 pieces, this coin possesses exceptional eye appeal to complement its high technical grade. The well-detailed design elements are frosty enough to stand out against the deeply reflective fields. However, iridescent shades of blue, gold, and gray toning reduce the contrast, preventing a Cameo designation. Census: 15 in 66, 3 finer (12/12). NGC ID# 27UD, PCGS# 6439, CoinPlex ID# LHP1878

**Brilliant 1878 Seated Half, PR67 Cameo
Tied for Finest Certified**

- 4378 1878 PR67 Cameo NGC.** Type Two Reverse. A virtually stone-white Superb Gem with carbon-free surfaces. The strike is absolute save for Liberty's left (facing) knee. The preservation is flawless aside from an inconspicuous gray freckle beneath star 8 and a small mint-made strike-through near the R in AMERICA. The year 1878 marks a turning point within the Seated half series. After the introduction of the Morgan dollar, business mintages of other silver denominations dwindled to near-token levels, creating greater collector demand for proofs from that period. Census: 3 in 67 Cameo, none finer, none certified as Ultra Cameo in any grade (11/12). From The Greensboro Collection, Part II. PCGS# 86439, CoinPlex ID# LHP1878CA

**Premium Gem Proof 1879 Seated Half
Unacknowledged Contrast**

- 4379 1879 PR66 PCGS. CAC.** Lightly toned on both sides with a milky-to-smoky effect on the obverse and distinct dusk-champagne and peach shadings to the reverse. The coin displays obvious contrast, though the old PCGS holder with green grade insert does not list a Cameo designation. Population: 14 in 66, 2 finer (12/12). PCGS# 6440, NGC ID# 27UE, CoinPlex ID# LHP1879

**1879 Half Dollar, PR66 Cameo
Only Two Numerically Finer**

- 4380 1879 PR66 Cameo PCGS.** This gorgeous Cameo proof has considerable mint brilliance with fully mirrored pale blue fields around lustrous devices, showing exceptional contrast within delicate peripheral gold toning. Population: 7 in 66 (1 in 66+) Cameo, 2 finer (11/12). Ex: Frank H. Chase Collection (Stack's, 12/1958), lot 351. From The Teich Family Collection. PCGS# 86440, CoinPlex ID# LHP1879CA

**1879 Seated Liberty Half Dollar
Premium Gem Proof Cameo Specimen**

- 4381 1879 PR66 Cameo NGC.** A fairly generous mintage of 1,100 proof Seated Liberty half dollars was accomplished in 1879, but the issue is not as easy to locate as that figure would suggest. Excessive die polishing resulted in some areas of incomplete detail, like the eagle's claw and drapery, on this otherwise sharply detailed Premium Gem. The frosty devices contrast boldly with the deeply reflective brilliant fields. Census: 16 in 66 Cameo, 20 finer (11/12). PCGS# 86440, CoinPlex ID# LHP1879CA

**Beautiful 1880 Seated Half Dollar
PR66 ★ Cameo**

- 4382 1880 PR66 Cameo NGC.** Type Two Reverse. This is a fully struck and impressively preserved specimen that displays deep, watery reflectivity in the fields and sharply frosted, snow-white devices. The date had a low total mintage of 9,755 pieces, of which just 1,335 coins were struck as proofs. The issue is conditionally scarce with the Cameo designation, and only one other specimen has been graded as PR66 Cameo, with the "Star" designation, by NGC; PCGS has not seen any example better than PR66 Cameo. Census: 2 in 66 ★ Cameo, none finer with the ★ (11/12). Ex: Dallas Signature (Heritage, 10/2008), lot 937. From The Greensboro Collection, Part II. PCGS# 86441, CoinPlex ID# LHP1880CA

Condition Rarity PR67 1881 Half Dollar

- 4383 1881 PR67 NGC.** Type Two Reverse. The year 1881 saw a mintage of 975 proof half dollars. Judging from NGC/PCGS population data a relatively large number of these have survived to the present day. Gems and Premium Gems are scarce, and finer coins such as this Superb Gem are quite rare. Bluish-purple patina covers the reverse, while cobalt-blue and lavender are confined to the margins of the obverse. Exquisitely struck with impeccably preserved surfaces. Census: 5 in 67, 1 finer (11/12).
From The Greensboro Collection, Part II. NGC ID# 27UG, PCGS# 6442, CoinPlex ID# LHP1881

1881 Seated Half Dollar
Lovely Gem Deep Cameo Proof

- 4384 1881 PR65 Deep Cameo PCGS.** The proof half dollars of 1881 saw a production of 975 pieces complementing the 10,000 business strikes. This Gem Cameo proof displays delightful field-device contrast over surfaces that are untuned in the centers, ceding to a range of iridescent hues at the rim with russet-brown prevailing. Only the most minor signs of contact appear, although a curious planchet anomaly gives Liberty the appearance of a malformed hand grasping the pole. Population: 1 in 65 Deep Cameo, 0 finer (12/12). PCGS# 96442, CoinPlex ID# LHP1881DC
- 4385 1882 PR64 NGC.** Deeply mirrored fields and well-executed devices along with colorful toning add to the visual allure of this near-Gem proof. There were 1,100 proofs struck in addition to 5,500 business strikes, adding up to an impressively low-production year for half dollars. Census: 89 in 64 (1 in 64+), 64 finer (12/12). NGC ID# 27UH, PCGS# 6443, CoinPlex ID# LHP1882

Deeply Toned PR64+ 1882 Half Dollar

- 4386 1882 PR64+ NGC. CAC.** Stunning concentric toning with dusky jade rims that fade through sapphire and amethyst rings before settling into citrine "hearts," the reverse's considerably larger. Quality reflectivity in the fields and still-appreciable frost on the devices point to what must have been considerable contrast when this almost-Gem specimen was struck. A few wispy and pinpoint flaws account for the grade. NGC ID# 27UH, PCGS# 6443, CoinPlex ID# LHP1882

1882 Seated Liberty Half, PR66
Vivid Multicolor Toning

- 4387 1882 PR66 NGC.** Another low total-mintage date from the 1880s with only 1,100 proofs struck plus another 5,500 business strikes. Proofs of this date are found with and without errant numerals in the denticles below the date. This particular coin shows two lunules of the top of the two 8s. The fields are deeply mirrored and each side shows attractive, multicolored toning. Census: 20 in 66, 4 finer (12/12). NGC ID# 27UH, PCGS# 6443, CoinPlex ID# LHP1882

Superb Proof 1882 Half
PR67 ★ Cameo

- 4388 1882 PR67 ★ Cameo NGC.** An extraordinary Superb Gem with gorgeous eye appeal, this piece received the coveted star designation from NGC. Both sides display vivid gold toning at the centers, gradually changing to russet, lilac, and light blue color near the borders. A small abrasion in the left obverse field is all that keeps this from an even higher grade. This piece realized \$10,925 in its last auction appearance. Census: 1 in 67 ★ Cameo, 2 finer (11/12).
Ex: Dallas Signature (Heritage, 4/2007), lot 794.
From The Greensboro Collection, Part II. PCGS# 86443, CoinPlex ID# LHP1882CA

**1883 Half Dollar, PR66+
Borderline Cameo Contrast**

- 4389 1883 PR66+ PCGS.** The top of Liberty's head and the eagle's claws show slight design weakness on this Premium Gem. However, the fully mirrored fields beneath heather, gold, and steel-blue toning provides exceptional eye appeal. The devices possess sufficient frosty luster that this piece should be described as a Cameo proof. Population: 20 in 66 (7 in 66+), 1 finer (11/12). *From The Teich Family Collection.* PCGS# 6444, NGC ID# 27UJ, CoinPlex ID# LHP1883

**1883 Seated Liberty Half, PR65
Stunning Cameo Example**

- 4390 1883 PR65 Cameo PCGS.** A delightful Gem, from a mintage of 1,039 pieces, this coin displays sharply detailed design elements, with rich mint frost, that contrast dramatically with the deeply mirrored fields. A few hints of lime-green and turquoise toning accent the flawless surfaces. Population: 7 in 65 Cameo, 14 finer (11/12). PCGS# 86444, CoinPlex ID# LHP1883CA

**1883 Half Dollar, PR66 Cameo
Strongly Contrasted**

- 4391 1883 PR66 Cameo PCGS.** The satiny motifs of this Premium Gem proof appear to float over the deeply mirrored, watery fields and yield strong contrast at all angles. A solid strike imparts full delineation to the design elements, enhancing even more the coin's overall eye appeal. Both sides are nicely preserved. Population: 11 in 66 Cameo, 3 finer (12/12). *From The Richard P. Ariagno, M.D. Collection.* PCGS# 86444, CoinPlex ID# LHP1883CA

**Premium Gem Proof 1884 Half Dollar
Distinctive Toning**

- 4392 1884 PR66 PCGS.** Notable in both proof and business strike formats, the 1884 half dollar had a total mintage of only 5,275 pieces, of which only 875 were proofs. This moderately mirrored example has lovely multicolored rose, aquamarine, and purple toning in varying degrees on each side. A sharply struck Premium Gem proof. Population: 11 in 66, 3 finer (12/12). PCGS# 6445, NGC ID# 27UK, CoinPlex ID# LHP1884

- 4393 1884 PR63 Cameo PCGS.** Softly frosted devices supply distinct contrast to this example. The half remains bright and reflective, with faintly hairlined fields appearing on both sides. The left obverse field exhibits a lint mark to the left of Liberty's arm. Population: 10 in 63 Cameo, 23 finer (12/12). PCGS# 86445, CoinPlex ID# LHP1884CA

- 4394 1885 PR64 PCGS.** A medium-gray patina envelops both sides of this example, with golden-orange highlights appearing on the obverse and a variety of shades of green on the reverse. This piece retains attractive contrast and reflectivity. Population: 86 in 64, 32 finer (12/12). PCGS# 6446, NGC ID# 27UL, CoinPlex ID# LHP1885

Flashy Gem Proof 1885 Seated Half

- 4395 1885 PR65 PCGS.** The 1885 half dollar saw only 930 proofs struck with an additional 5,200 business strikes, making this a perennially popular issue with collectors. This deeply mirrored, flashy Gem proof is fully struck throughout and shows just the slightest hint of toning on each side. Population: 23 in 65, 9 finer (11/12). *Ex: Charlotte ANA National Money Signature (Heritage, 3/2003), lot 5961.* *From The Greensboro Collection, Part II.* PCGS# 6446, NGC ID# 27UL, CoinPlex ID# LHP1885

**Cameo Superb Gem 1887 Half Dollar
Starkly Contrasted on Each Side**

- 4396 1887 PR67 Cameo NGC.** The barest hint of gold color is visible over the surfaces of this beautiful coin. The fields are exquisitely mirrored, with the frosty devices contrasting nicely and providing solid eye appeal. A bit of strike weakness is noted in the right stars. Only three finer pieces have been graded by NGC (11/12).
From The Greensboro Collection, Part II. PCGS# 86448, CoinPlex ID# LHP1887CA

**1888 Half Dollar, PR66
Light Cameo Contrast**

- 4397 1888 PR66 PCGS. CAC.** Lovely aquamarine and iridescent toning on each side encloses a small area of light silver on this Premium Gem proof. Only 832 proofs were minted in addition to a mere 12,000 business strikes at a time when silver dollar production took most of the Mint's effort. This lovely specimen is a great choice for a type set. Population: 13 in 66 (1 in 66+), 3 finer (11/12). PCGS# 6449, NGC ID# 27UP, CoinPlex ID# LHP1888
- 4398 1889 PR64 NGC.** The deeply patinated surfaces reveal iridescent fire-red and apple-green shades when rotated beneath a light. The strike is sharp except on the left (facing) claw. A low mintage date. Encapsulated in a former generation holder. Census: 44 in 64, 50 finer (12/12). NGC ID# 27UR, PCGS# 6450, CoinPlex ID# LHP1889

Cameo PR67 ★ 1891 Half

- 4399 1891 PR67 ★ Cameo NGC.** The margins offer light gold toning, while the fields and devices are brilliant. Both major devices are thickly frosted, and the eye appeal is exemplary. The fletchings, claws, and HALF DOL exhibit minute die doubling. A mere 600 proofs were struck, with only 5 finer examples graded by NGC (11/12).
Ex: Central States Signature (Heritage, 4/2008), lot 1183.
From The Greensboro Collection, Part II. PCGS# 86452, CoinPlex ID# LHP1891CA

BARBER HALF DOLLARS

- 4400 1892-O MS62 NGC.** Only 390,000 Barber half dollars were struck at the New Orleans Mint in 1892, the first year of the design. This example displays rich satin luster. Whispers of golden toning appear at the periphery. Census: 39 in 62, 77 finer (12/12).
From The J.D. Tanner Collection. NGC ID# 24LG, PCGS# 6462, CoinPlex ID# BHM1892O

Lustrous Gem 1892-O Barber Half

- 4401 1892-O MS65 NGC.** This delightful Gem displays vibrant mint luster. Areas of dark gray toning appear primarily near the devices. The 1892-O half dollar claims a low-mintage of 390,000 pieces and the issue enjoys some popularity with mintmark type collectors as the first date of the Barber design. Census: 15 in 65, 4 finer (11/12). NGC ID# 24LG, PCGS# 6462, CoinPlex ID# BHM1892O

**1892-O Micro O, XF Details
A Key Barber Half**

- 4402 1892-O Micro O — Scratch — PCGS Genuine. XF Details.** This minuscule-mintmark variant is the key to the "With Varieties" Barber half dollar set. Four or five light obverse scratches are noted. Light silver-gray patination resides on both sides. The design elements are well brought up.
From The J.D. Tanner Collection. PCGS# 6463, CoinPlex ID# BHM1892OMICROO

**1893 Barber Half Dollar, MS64+
Scarce Second Year Issue**

- 4403 1893 MS64+ PCGS. CAC.** Iridescent shades of lime-green and cobalt-blue toning accent the peripheries of this high-end Choice example. The design elements are sharply detailed throughout, and satiny mint luster shines through the toning. From a business-strike mintage of 1.8 million pieces. Population: 36 in 64 (2 in 64+), 30 finer (11/12). PCGS# 6465, NGC ID# 24LK, CoinPlex ID# BHM1893

4404 1894-O MS64 PCGS Secure. Although these are common in well-worn grades, the 1894-O is scarce at the higher grade levels. This near-Gem displays pale silver-gold color with hints of olive-green and softly frosted luster. Both sides exhibit scattered freckles. Population: 52 in 64, 14 finer (12/12). PCGS# 6469, NGC ID# 24LP, CoinPlex ID# BHM1894O

**Attractive 1895-O Half, MS65
Only One Numerically Finer NGC Example**

4405 1895-O MS65+ NGC. This Gem exhibits a degree of contrast between the fields and the devices, adding to the eye appeal of this lustrous example. As was the case with most of the branch-mint coins of the 1890s, the 1895-O Barber half dollar was not heavily saved by collectors and most surviving examples are well-circulated. Census: 9 in 65 (1 in 65+), 1 finer (11/12). NGC ID# 24LT, PCGS# 6472, CoinPlex ID# BHM1895O

**MS64+ 1895-S Half Dollar
Bright Luster**

4406 1895-S MS64+ NGC. A beautiful borderline Gem with bright, faintly frosted silver luster and a few hints of apricot-orange at the borders. Well-defined devices are largely unmarked, though a nick is noted on the truncation of the bust and a few wispy slide marks preclude an MS65 designation. Census: 41 in 64 (1 in 64+), 16 finer (12/12).
From The J.D. Tanner Collection. NGC ID# 24LU, PCGS# 6473, CoinPlex ID# BHM1895S

**Premium Gem 1895-S Half
Tremendous Eye Appeal**

4407 1895-S MS66 NGC. Just over 1.1 million 1895-S Barber halves were struck, and today the issue is a series semikey in any grade, but especially in the higher Mint State grades. This coin has a gorgeous appearance, with bold satin luster that shimmers and attractive toning at the outer edges. Vibrant colors appear including deep lilac, dark teal, copper, and purple-brown. The piece is well-struck and displays few surface marks. Census: 5 in 66, 1 finer (11/12). NGC ID# 24LU, PCGS# 6473, CoinPlex ID# BHM1895S

4408 1897-S AU53 PCGS. Russet and copper colors are scattered on the obverse, along with iridescent rainbow colors at the periphery on both sides. The reverse exhibits gold, russet, gray, and dark jade green. Both sides display satiny luster. Minor contact marks appear primarily on the obverse. PCGS# 6479, NGC ID# 24M2, CoinPlex ID# BHM1897S

4409 1898-O MS62 PCGS. Dark gray toning, including splashes of green and red, covers much of this coin. The color deepens at the outer edges. A lovely, satin luster shines through and creates attractive eye appeal. As expected at this grade level, a few small contact marks are visible. Population: 8 in 62, 43 finer (12/12). PCGS# 6481, NGC ID# 24M4, CoinPlex ID# BHM1898O

**1898-O Barber Half Dollar, MS63
Underrated Low-Mintage Issue**

4410 1898-O MS63 NGC. A small mintage of 874,000 Barber half dollars was accomplished at the New Orleans Mint in 1898. This well-detailed Select specimen shows just a touch of softness on the eagle's claw and some of the obverse stars. The lightly marked surfaces display shades of gold and lavender toning. Census: 4 in 63, 21 finer (11/12). NGC ID# 24M4, PCGS# 6481, CoinPlex ID# BHM1898O

**1900 Barber Half, MS66
Only One Finer Coin at NGC**

4411 1900 MS66 NGC. CAC. A large mintage of more than 4.7 million Barber half dollars was accomplished at the Philadelphia Mint in 1900, but few survivors can match the quality and appeal of the present coin. This spectacular Premium Gem displays flawless brilliant surfaces, with vibrant mint luster, sharply detailed design elements, and ample eye appeal. Census: 5 in 66, 1 finer (12/12). NGC ID# 24M9, PCGS# 6486, CoinPlex ID# BHM1900

Gem 1900-S Half Dollar
Turn-of-the-Century Condition Rarity

- 4412 1900-S MS65 PCGS. CAC.** The 1900-S is a conditional rarity within the Barber half dollar series. David Akers has called it "one of the unheralded rarities of the Barber half dollar series." This Gem is surpassed by few examples at either service, either numerically or aesthetically. The center obverse alternates pastel blue and pink, with dollops of sunset-orange decorating some of the areas outside the stars. The reverse is more subtly toned with the same palette. Far better-defined than usual and an excellent coin all-around. Population: 7 in 65, 4 finer (12/12). PCGS# 6488, NGC ID# 24MB, CoinPlex ID# BHM1900S

Near-Gem 1903 Half Dollar
Swirling Luster, Partial Toning

- 4413 1903 MS64 PCGS. CAC.** Swirling luster is largely light gray with a faint undercurrent of blue. Deeper steel shadings appear as spots and splashes, most notably at the lower obverse and upper reverse. An uncommonly well-preserved example of a little-saved Philadelphia issue. Population: 28 in 64, 8 finer (12/12). PCGS# 6495, NGC ID# 24MJ, CoinPlex ID# BHM1903
- 4414 1904-S VF20 PCGS.** This midrange example of this lower-mintage issue retains a subtle luster. Hints of champagne appear on the otherwise light gray surfaces. This piece displays even wear overall and has no marks worthy of mention. *From The J.D. Tanner Collection.* PCGS# 6500, NGC ID# 24MP, CoinPlex ID# BHM1904S
- 4415 1906-D MS64 NGC.** Lustrous surfaces exhibit exquisitely struck design elements and reveal just a few minute marks. This near-Gem exhibits tremendous eye appeal. Census: 30 in 64, 10 finer (11/12). NGC ID# 24MV, PCGS# 6505, CoinPlex ID# BHM1906D

1906-D Barber Half Dollar, MS65
First D-Mint Issue

- 4416 1906-D MS65 PCGS.** Sharply detailed in most areas, this attractive Gem shows just a touch of softness on the upper-right shield tip on the reverse. Satiny mint luster shines through shades of lavender-gray, sea-green, and violet toning on the lightly marked surfaces. Population: 14 in 65, 8 finer (11/12). PCGS# 6505, NGC ID# 24MV, CoinPlex ID# BHM1906D
- 4417 1907-D MS64 PCGS.** Various shades of vibrant iridescent green, along with steel-blue, rich pink, lilac, and russet decorate this lustrous near-Gem Denver Mint half. The coin is well-struck overall with the inconsequential blending of detail on the fletchings and right shield corner that often appears. Minor contact marks are confined primarily to the field. Population: 50 in 64 (2 in 64+), 32 finer (11/12). PCGS# 6509, NGC ID# 24MZ, CoinPlex ID# BHM1907D

1907-D Barber Half Dollar, MS65
Darkly Toned Example

- 4418 1907-D MS65 PCGS.** Mottled shades of green, gray, and blue-steel toning blanket the well-preserved surfaces of this attractive Gem. The design elements are well-detailed, with a touch of softness on the reverse, around the right shield point. Vibrant satiny mint luster shines through the patina. Population: 19 in 65, 13 finer (12/12). PCGS# 6509, NGC ID# 24MZ, CoinPlex ID# BHM1907D
- 4419 1908-O MS64 PCGS.** A fully brilliant near-Gem New Orleans half dollar, this example displays satiny silver luster with faint hints of ice-blue color. The strike is quite sharp for this issue. A small die break appears near the lower right corner of the neck. Population: 69 in 64, 62 finer (12/12). PCGS# 6514, NGC ID# 24N6, CoinPlex ID# BHM1908O
- 4420 1911-D MS64 PCGS. CAC.** The mintage was an unexpectedly small 695,080 pieces for this issue. Rich luster emanates from both sides of this appealing near-Gem. Small, scattered freckles appear primarily on the reverse and the jawline exhibits a small lint mark. Population: 39 in 64, 33 finer (12/12). PCGS# 6522, NGC ID# 24NE, CoinPlex ID# BHM1911D

- 4421 1911-S MS63 PCGS.** A faint gold hue and attractive luster create nice eye appeal on this example. Small areas of golden-brown color appear primarily on the reverse. The 1911-S is an underrated issue in the Barber half dollar series. Population: 13 in 63, 36 finer (12/12).
From The Gensch Numismatic Trust Collection. PCGS# 6523, NGC ID# 24NF, CoinPlex ID# BHM1911S

**Near-Mint 1913 Barber Half Dollar
Sought-After Low-Mintage Date**

- 4422 1913 AU58 PCGS. CAC.** From a notably low mintage of 188,000 pieces, the 1913 Barber half dollar is seldom encountered in high grade. This well-detailed near-Mint specimen shows a few hints of lavender-gray and pale gold toning on the mostly brilliant, lightly abraded surfaces. Population: 15 in 58, 71 finer (11/12). PCGS# 6527, NGC ID# 24NK, CoinPlex ID# BHM1913

- 4423 1914 AU55 PCGS. CAC.** A lustrous Choice About Uncirculated specimen of this low-mintage date, the 1914 Barber half dollar is seldom encountered in high grade. An attractive golden-brown patina covers both sides of this lightly worn piece, with a few small darker spots appearing on each side. PCGS# 6530, NGC ID# 24NN, CoinPlex ID# BHM1914

**Gem 1915-D Barber Half
Strong Satiny Mint Luster**

- 4424 1915-D MS65 NGC. CAC Gold Label.** An impressive Gem Barber half dollar, from a mintage of 1.1 million pieces, this coin possesses vibrant mint luster and outstanding eye appeal. The design elements are sharply detailed throughout and the lustrous surfaces show wisps of light lavender toning. Census: 47 in 65, 8 finer (11/12).
From The SPQR Collection of CAC Gold Sticker Coins. NGC ID# 24NS, PCGS# 6533, CoinPlex ID# BHM1915D

PROOF BARBER HALF DOLLARS

**1892 Half Dollar, PR66 Cameo
Debut of Barber Design**

- 4425 1892 PR66 Cameo PCGS.** This gorgeous Premium Gem Cameo proof represents the first year of the Barber design, a popular choice with type collectors. A few splashes of iridescent toning appear over predominately white surfaces that show faint ice-blue accents. Population: 13 in 66 Cameo, 3 finer (11/12).
Ex: Stack's.
From The Teich Family Collection. PCGS# 86539, CoinPlex ID# BHP1892CA

- 4426 1893 PR64 Cameo PCGS.** Razor-sharp definition is evident on all design elements of this boldly contrasted Choice specimen, with deeply reflective fields that show hints of green, gold, and ice-blue patina. Population: 19 in 64 (1 in 64+) Cameo, 38 finer (11/12).
From The Teich Family Collection. PCGS# 86540, CoinPlex ID# BHP1893CA

Gold-Tinged PR66 Cameo 1893 Half Dollar

- 4427 1893 PR66 Cameo PCGS.** Whatever initial excitement accompanied the arrival of the new Barber designs in 1892 died out quickly, replaced by apathy and corresponding three-figure mintages for silver proof sets for the rest of the series. This is a high-end Cameo specimen of the 1893 half dollar, gold-toned with color strongest at the margins and elegant frost over the devices. PCGS# 86540, CoinPlex ID# BHP1893CA

Colorful PR68 Cameo 1893 Half Dollar

- 4428** 1893 PR68 Cameo NGC. CAC. Elite preservation, gorgeous colors, and notable cameo contrast converge on this remarkable specimen. Blue hues grace the reverse rims and the upper and lower bounds of the obverse, while golden-champagne toning fills the gaps. Liberty's portrait and the eagle are appreciably frosted, and neither the devices nor the mirrors have their contrasting elements impeded by the top-layer patina. In 1893, after the novelty of the Barber design wore off, proof sales plummeted from 1,245 pieces the year before, mostly in silver proof sets, to a mere 792 specimens. PCGS# 86540, CoinPlex ID# BHP1893CA

Colorful Gem Proof 1894 Half

- 4429** 1894 PR65 NGC. A splendidly toned Gem proof that features golden-brown borders, powder-blue fields, and lilac-red centers. The surfaces appear undisturbed beneath the rich multicolor patination. Well struck on the fletchings though the right shield corner shows inexactness. Encapsulated in a prior generation holder. NGC ID# 24NW, PCGS# 6541, CoinPlex ID# BHP1894

1894 Half Dollar, Lightly Toned PR64+ Cameo

- 4430** 1894 PR64+ Cameo PCGS. CAC. The larger the coin, the larger the target for contact marks. This larger format coin has a few small signs of contact with other coins, but a magnifier is required to locate them. This undoubtedly explains both the + and CAC designations. Light reddish-golden toning encircles the rims of both sides with mostly brilliant centers, and the cameo contrast is abundantly evident. Population: 20 in 64 (3 in 64+) Cameo, 33 finer (11/12). From The Teich Family Collection. PCGS# 86541, CoinPlex ID# BHP1894CA

1894 Half, PR65 Cameo Fully Struck

- 4431** 1894 PR65 Cameo PCGS. Excellent field-motif contrast is evident on this Gem proof, and whispers of light gold color appear under magnification, especially on the portrait. The design elements are sharply impressed and both sides are devoid of mentionable marks. Population: 16 in 65 Cameo, 18 finer (12/12). From The Richard P. Ariagno, M.D. Collection. PCGS# 86541, CoinPlex ID# BHP1894CA

Gem Cameo Proof 1894 Half Dollar

- 4432** 1894 PR65 Cameo PCGS. Generously frosted devices emerge from gleaming fields. Silver on most of the surfaces, the coin has a few splashes of colors such as rose and gold. In 1894 the proof mintage recovered somewhat from the previous year and is listed at 972 specimens. Population: 16 in 65 Cameo, 18 finer (12/12). PCGS# 86541, CoinPlex ID# BHP1894CA

**1895 Half Dollar, PR65
Borderline Cameo Proof**

- 4433 1895 PR65 PCGS.** This ivory, light gray, and iridescent toned specimen is highly attractive with brilliant silver devices, showing satin luster, around fully mirrored and deeply reflective fields. Both sides have borderline Cameo contrast. Population: 29 in 65, 32 finer (11/12).
From *The Teich Family Collection*. PCGS# 6542, NGC ID# 24NX, CoinPlex ID# BHP1895

**Cameo PR65+ 1895 Half Dollar
Deep Cameo Reverse**

- 4434 1895 PR65+ Cameo PCGS.** The devices are thickly frosted on each side, especially the reverse. The obverse has moderate mirrors, inducing the "mere" Cameo designation, but the reverse has a glorious Deep Cameo appearance despite the presence of minor patina. Amazing appeal. Population: 10 in 65 (1 in 65+) Cameo, 13 finer (12/12). PCGS# 86542, CoinPlex ID# BHP1895CA

**Brilliant PR66 Cameo 1895 Half
Ex: Richmond Collection**

- 4435 1895 PR66 Cameo NGC.** The eagle and portrait are frosty and provide contrast with the darkly reflective fields. The present razor-sharp specimen is brilliant and essentially flawless. A meager 880 proofs were issued. Census: 18 in 66 (1 in 66+) Cameo, 23 finer (11/12).
Ex: *Richmond Collection, Part III (David Lawrence, 3/2005)*, lot 1914, which realized \$3,795. PCGS# 86542, CoinPlex ID# BHP1895CA

- 4436 1896 PR64 PCGS. CAC.** Both sides show a light haze over the delicate iridescent toning on this Choice proof, with satiny and sharply defined design motifs that suggest a borderline cameo appearance.
Ex: *Wilson-Reuter Sale (Stack's, 10/1959)*, lot 160.
From *The Teich Family Collection*. PCGS# 6543, NGC ID# 24NY, CoinPlex ID# BHP1896

**1896 Barber Half Dollar, PR67
Only 762 Examples Coined**

- 4437 1896 PR67 PCGS. CAC.** Only 762 proof Barber half dollars were struck in 1896, and this spectacular Superb Gem is one of the most attractive survivors. The design elements show the expected sharp definition on the obverse, with just a touch of softness on the eagle and shield on the reverse. Hints of cerulean-blue and champagne-gold toning enliven the deeply mirrored fields. Population: 7 in 67, 1 finer (11/12). PCGS# 6543, NGC ID# 24NY, CoinPlex ID# BHP1896

**1896 Cameo Gem Proof Half
Well-Produced and Nearly Brilliant**

- 4438 1896 PR65 Cameo PCGS.** The 1896 is well-known across all denominations as one of the best-produced years for proof coinage. This nicely cameoed half is certainly a good example of that statement. The fields demonstrate remarkable depth of mirrored reflectivity and significant mint frost is seen over the devices, especially on the reverse. The brilliant centers are surrounded by light golden-rose color. Population: 10 in 65 Cameo, 13 finer (11/12).
From *The Teich Family Collection*. PCGS# 86543, CoinPlex ID# BHP1896CA

- 4439 1897 PR65 Cameo PCGS.** A stunning Gem Cameo proof, both sides exhibit splashes of blue and iridescent toning on mostly brilliant silver surfaces. The devices are highly lustrous over mirrored fields. Population: 15 in 65 (1 in 65+) Cameo, 16 finer (11/12).
Ex: *Stack's*.
From *The Teich Family Collection*. PCGS# 86544, CoinPlex ID# BHP1897CA

**Colorful PR67 1898 Half
Tied for Finest Known at PCGS**

- 4440 1898 PR67 PCGS.** Only 735 proof Barber half dollars were struck in 1898, and this magnificent Superb Gem is one of the finest examples certified at PCGS. The design elements exhibit razor-sharp definition throughout, and the pristine surfaces are patinated in mingled shades of champagne-gold, fuchsia, and electric-blue. Population: 11 in 67, 0 finer (11/12). PCGS# 6545, NGC ID# 24P2, CoinPlex ID# BHP1898

**Cameo PR67 1898 Half Dollar
Mix of Contrast and Patina**

- 4441 1898 PR67 Cameo PCGS. CAC.** From a small proof mintage of 735 pieces, this magnificent Superb Gem exhibits sharply detailed design elements throughout. The mirrored fields shine through iridescent shades of gold, gray, and cobalt-blue toning. Exceptional eye appeal complements the high technical grade. Population: 4 in 67 Cameo, 2 finer (12/12). PCGS# 86545, CoinPlex ID# BHP1898CA

**1899 Barber Half, PR66+ Cameo
Ex: Wolfson**

- 4442 1899 PR66+ Cameo PCGS.** This high-end Premium Gem displays spectacular iridescent shades of champagne-gold, cobalt-blue, and lavender toning. The richly frosted devices stand out against the deeply mirrored fields in bold cameo contrast, despite the patina. Razor-sharp design elements add to the incredible visual appeal. Population: 9 in 66 (1 in 66+) Cameo, 9 finer (11/12). Ex: Samuel Wolfson Collection, Part II (Stack's, 5/1963), lot 1266, flip accompanies the lot. From The Teich Family Collection. PCGS# 86546, CoinPlex ID# BHP1899CA

**1899 Half Dollar, PR66+ Cameo
Popular Turn-of-the-Century Date**

- 4443 1899 PR66+ Cameo NGC.** The deeply reflective surfaces of this high-end Premium Gem show just a hint of champagne-gold toning and set off the frosty devices in a startling cameo effect. The design elements are sharply detailed throughout and visual appeal is outstanding. Census: 20 in 66 (2 in 66+) Cameo, 26 finer (12/12). PCGS# 86546, CoinPlex ID# BHP1899CA

- 4444 1900 PR64 PCGS.** Light olive-green toning visits this nicely struck Choice specimen. The fields are mildly subdued but lack visible contact. A lapped die removes design detail beneath WE, usual for the proof date. Certified in a green label holder. PCGS# 6547, NGC ID# 24P4, CoinPlex ID# BHP1900

**Gem Proof 1901 Barber Half
Lightly Toned, With Frosty Devices**

- 4445 1901 PR65 PCGS.** Although not designated as a Cameo, this impressive 1901 Barber half shows some elements of contrast between the richly frosted devices and brightly mirrored fields. The design elements are sharply detailed and the unmarked surfaces exhibit hints of gold and lavender toning. From a mintage of 813 pieces. Population: 30 in 65, 37 finer (11/12). Ex: The Powers Collection (Stack's, 12/1959), lot 505, flip accompanies the lot. From The Teich Family Collection. PCGS# 6548, NGC ID# 24P5, CoinPlex ID# BHP1901

**1902 Barber Half Dollar, PR65
Only 777 Pieces Struck**

- 4446 1902 PR65 PCGS.** From a minuscule mintage of 777 pieces, the 1902 proof Barber half dollar is seldom encountered in Gem condition. This attractive specimen is sharply detailed in most areas, but a touch of softness shows on the right shield point and eagle's claw. The reflective fields exhibit traces of light gold toning. Population: 28 in 65, 31 finer (11/12). PCGS# 6549, NGC ID# 24P6, CoinPlex ID# BHP1902

4447 1903 PR63 PCGS. CAC. Traces of light gold toning appear at the obverse and reverse borders of this Select proof. Both sides have sharply defined satin devices with a hint of contrast.
From The Teich Family Collection. PCGS# 6550, NGC ID# 24P7, CoinPlex ID# BHP1903

**1904 Barber Half, PR65 Cameo
Noticeably Contrasted on Each Side**

4448 1904 PR65 Cameo PCGS. CAC. Beginning in 1902, the Mint made a conscious effort to produce proofs without contrast. However some were made, it is generally believed the first coins from new dies. This piece has notable contrast on each side. The surfaces retain much brilliance with a faint accent of golden patina around the margins. Population: 3 in 65 Cameo, 9 finer (11/12).
From The Teich Family Collection. PCGS# 86551, CoinPlex ID# BHP1904CA

**1905 Half Dollar, PR63 Cameo
An Unusual Date to Locate With Contrast**

4449 1905 PR63 Cameo PCGS. Few Cameo halves are known from 1905, making this PR63 a notable offering. The fields on each side are extraordinarily deep, making the moderate frost over the devices "pop" all the more. The surfaces are almost brilliant with just a hint of peripheral color present. Faint slide marks across the cheek of Liberty explain the grade. Population: 2 in 63 Cameo, 13 finer (11/12).
From The Teich Family Collection. PCGS# 86552, CoinPlex ID# BHP1905CA

4450 1906 PR64 PCGS. CAC. Delicate champagne and gold toning appears over the satin devices and mirrored fields of this lovely near-Gem. A trace of contrast is evident on each side.
From The Teich Family Collection. PCGS# 6553, NGC ID# 24PA, CoinPlex ID# BHP1906

**1906 Half Dollar, PR65
Borderline Cameo Proof**

4451 1906 PR65 PCGS. This lovely Gem is mostly brilliant and untoned, save for a few small splashes of gold on each side. A full strike is evident on both sides, with hints of cameo contrast on this undesignated specimen. Population: 37 in 65 (1 in 65+), 30 finer (11/12).
Ex: Jim S. White Collection (Stack's, 2/1960), lot 839. From The Teich Family Collection. PCGS# 6553, NGC ID# 24PA, CoinPlex ID# BHP1906

**1906 Barber Half Dollar, PR65
Sharply Detailed, Brilliant Surfaces**

4452 1906 PR65 PCGS. A small proof mintage of 675 Barber half dollars was accomplished in 1906, using the all-brilliant finish the Mint began employing in 1902. This attractive Gem offers sharply detailed design elements throughout, with deeply reflective surfaces that show minimal signs of contact. Population: 37 in 65 (1 in 65+), 30 finer (12/12). PCGS# 6553, NGC ID# 24PA, CoinPlex ID# BHP1906

1908 Barber Half, Bright White PR67

4453 1908 PR67 NGC. Sharply struck with reflective, non-frosty devices and brightly mirrored fields. Both sides present a blazing-white appearance without a hint of toning. For pedigree purposes, a squiggly lintmark is seen below Liberty's chin that resembles a whisker. Only 545 proof half dollars were minted during the year, one of the lowest production figures in the series prior to 1914. Census: 12 in 67, 3 finer (11/12).
Ex: Long Beach Signature (Heritage, 9/2006), lot 2027. NGC ID# 24PC, PCGS# 6555, CoinPlex ID# BHP1908

1908 Barber Half, PR66 Cameo

- 4454 1908 PR66 Cameo NGC.** The 1908 has one of the lowest proof mintages in the Barber half dollar series, with only 545 pieces. Magnificent field-motif contrast shows on both sides of this exquisitely struck Premium Gem. A few minor spots appear in the fields on each side. Census: 4 in 66 Cameo, 8 finer (11/12). PCGS# 86555, CoinPlex ID# BHP1908CA

**White PR65 ★ 1909 Half Dollar
Undesignated Cameo Contrast**

- 4455 1909 PR65 ★ NGC.** Ex: Richmond Collection. An entirely brilliant Gem proof with glassy fields and noticeably frosty motifs. NGC has passed on a Cameo designation but contrast is nonetheless conspicuous. Sharply struck and undisturbed. Ex: *Richmond Collection, Part 3 (David Lawrence, 3/2005)*, lot 1928, which realized \$2,818. NGC ID# 24PD, PCGS# 6556, CoinPlex ID# BHP1909

Lovely 1909 Half, PR66 Cameo

- 4456 1909 PR66 Cameo NGC.** Hints of champagne toning add to the visual appeal of this Premium Gem that possesses contrast between the field and devices. The 1909 proof mintage is 105 pieces higher than the prior year, due to the introduction of the Lincoln cent that year which precipitated increased demand for 1909 proof sets. Census: 16 in 66 Cameo, 26 finer (11/12). PCGS# 86556, CoinPlex ID# BHP1909CA

**1909 Half Dollar, PR66 Cameo
Sharply Struck**

- 4457 1909 PR66 Cameo PCGS.** Exquisitely struck, satiny design features ride over the deeply mirrored fields of this Premium Gem Cameo. Magnification brings out hints of very light gold color, especially on Liberty's cheek. Close inspection reveals no significant marks. Population: 16 in 66 Cameo, 9 finer (12/12). From *The Richard P. Ariagno, M.D. Collection*. PCGS# 86556, CoinPlex ID# BHP1909CA

Colorful Gem Proof 1910 Half Dollar

- 4458 1910 PR65 PCGS.** Hints of past contrast are visible on the obverse, where Liberty's peach-toned cheek shows significant frost. Deeper blue-to-green hues drape most of the remainder, including glossy mirrors. Just 551 examples were struck for this issue and Gems are scarce. Population: 15 in 65, 22 finer (12/12). PCGS# 6557, NGC ID# 24PE, CoinPlex ID# BHP1910

**1910 Half, PR65+ Cameo
Low Mintage of Only 551 Pieces**

- 4459 1910 PR65+ Cameo PCGS. CAC.** Deep, shimmering glassy fields are seen on each side, and the thick mint frost provides the contrast necessary for the Cameo designation. Pale, speckled golden-rose patina is seen on the obverse, while the reverse is nearly free from color. Very scarce at this grade level. Population: 7 in 65 (1 in 65+) Cameo, 10 finer (11/12). From *The Teich Family Collection*. PCGS# 86557, CoinPlex ID# BHP1910CA

- 4460 1913 PR63 PCGS. CAC Gold Label.** Lavender, rose-red, sun-gold, and forest-green embrace this well struck and undisturbed specimen. Housed in a first generation holder. A meager 627 proofs were coined. From *The SPQR Collection of CAC Gold Sticker Coins*. PCGS# 6560, NGC ID# 24PH, CoinPlex ID# BHP1913

EARLY DOLLARS

4461 1795 Flowing Hair, Three Leaves PCGS Genuine. B-5, BB-27, R.1. The PCGS number ending in .95 suggests Scratched as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine specimen that has been scratched. The legends and stars are bold on this Flowing Hair type coin. The obverse field is cobalt-blue but the reverse is slate-gray with delicate golden undertones. A few light pinscratches are noted on the portrait and reverse exergue, and a slight rim bump is at 5 o'clock on the reverse. PCGS# 6852, NGC ID# 24WZ, CoinPlex ID# EDO1795FH3LEAV

4462 1795 Flowing Hair, Three Leaves — Improperly Cleaned — NGC Details. Fine. B-5, BB-27, R.1. A majority of early dollars have been cleaned at one time or another, and the moderate hairlines on the present piece are comparatively unobtrusive. Glimpses of caramel-gold overlie slate-white surfaces. NGC ID# 24WZ, PCGS# 6852, CoinPlex ID# EDO1795FH3LEAV

1795 Flowing Hair Dollar Choice Fine, B-5, BB-27

4463 1795 Flowing Hair, Three Leaves Fine 15 PCGS. B-5, BB-27, R.1. Blended chestnut-tan and stone-gray toning fills both sides, though pastel forest-green visits the obverse border. Well defined for the Choice Fine grade, especially on the left (facing) wing. A loupe reveals wispy thin marks on the field near the chin and a few other scattered faded pinscratches. An impressive yet collectible example of our introductory silver dollar type. PCGS# 6852, NGC ID# 24WZ, CoinPlex ID# EDO1795FH3LEAV

4464 1795 Flowing Hair, Three Leaves — Obverse Repaired, Cleaned — NGC Details. VF B-5, BB-27, R.1. This mildly granular steel-gray Flowing Hair type coin has an oval-shaped repair on the right obverse and a smoothed area near the L in LIBERTY. The obverse is lightly hairlined and the reverse is thickly hairlined. A crown-sized silver coin struck during Washington's second term. NGC ID# 24WZ, PCGS# 6852, CoinPlex ID# EDO1795FH3LEAV

VF25 1795 Flowing Hair Dollar B-5, BB-27, Early Type Coin

4465 1795 Flowing Hair, Three Leaves VF25 NGC. B-5, BB-27, R.1. Bowers-Borckardt Die State II. Lavender-tinged motifs rise above deep dove-gray fields. A problem-free example of the popular crown-sized Flowing Hair dollar, struck during the Washington Administration and far more affordable than its 1794 predecessor. The slender "bar" die line behind the highest neck curl identifies the collectible B-5 variety. From *The Hilltop Collection*. NGC ID# 24WZ, PCGS# 6852, CoinPlex ID# EDO1795FH3LEAV

Problem-Free VF25 Three Leaves 1795 Flowing Hair Dollar, B-5, BB-27

4466 1795 Flowing Hair, Three Leaves VF25 NGC. B-5, BB-27, R.1. Bowers-Borckardt Die State II. A refreshingly unabraded example of this desirable introductory silver dollar type coin. The absence of adjustment marks contributes further to the eye appeal of the blended tan-gold and steel-blue surfaces. B-5 is the most available Flowing Hair variety, readily attributed by the slender "bar" behind the highest neck curl. NGC ID# 24WZ, PCGS# 6852, CoinPlex ID# EDO1795FH3LEAV

1795 Flowing Hair Dollar, VF30 Details Three Leaves, B-5, BB-27

4467 1795 Flowing Hair, Three Leaves — Cleaned — ANACS. VF30 Details. B-5, BB-27, R.1. The stone-gray surfaces are slightly glossy and moderately hairlined, but abrasions are absent aside from a minor obverse rim ding at 5 o'clock. Liberty's hair and the eagle's left (facing) wing are nicely detailed. Ex: *Houston Signature* (Heritage, 11/2007), lot 60724, which realized \$4,084.80. NGC ID# 24WZ, PCGS# 6852, CoinPlex ID# EDO1795FH3LEAV

Smooth 1795 Flowing Hair Dollar B-5, BB-27, VF30

4468 1795 Flowing Hair, Three Leaves VF30 PCGS. CAC. B-5, BB-27, R.1. Olive-gray and steel-blue enrich this charming Flowing Hair type coin. The breast feathers are worn but the hair and wings retain partial design definition. Both sides are surprisingly free from marks given the diameter, age, and grade, though we note a single slender line above the BE in LIBERTY. PCGS# 6852, NGC ID# 24WZ, CoinPlex ID# EDO1795FH3LEAV

- 4469** 1795 Flowing Hair, Three Leaves — Surface Damage — PCGS Genuine. XF Details. B-5, BB-27, R.1. Bowers-Borckardt Die State II. This Flowing Hair dollar appears chopmarked, with three chops on the right obverse field, one on the left obverse field, two others at 2 o'clock and 5:30 on the reverse field, and a final chop on the left (facing) wing. Most of the chops do not closely resemble those seen on Trade dollars, with the exception of the one on the wing. The steel-gray surfaces are hairlined and mildly bright from cleaning. PCGS# 6852, NGC ID# 24WZ, CoinPlex ID# EDO1795FH3LEAV

**Fine Flowing Hair 1795 Dollar
B-2, BB-20**

- 4470** 1795 Flowing Hair, Two Leaves Fine 12 PCGS. B-2, BB-20, R.3. Medium golden-gray toning encompasses this evenly circulated and slightly glossy early silver type coin. The obverse displays only trivial mint-made adjustment marks and the only mentionable abrasions are a few faded thin marks on the central reverse. Mildly granular, as made, between the star 12 and the obverse center. Struck from rotated dies. PCGS# 6853, NGC ID# 24WZ, CoinPlex ID# EDO1795FH2LEAV

- 4471** 1795 Flowing Hair, Two Leaves — Scratches — NGC Details. VF. B-4, BB-14, R.3. A slender V-shaped scratch on the field near the chin is noted, along with a few brief thin scratches near star 13. The reverse is nicer but has a trio of thin marks near the right (facing) wing and a dull, broad field mark near the tailfeathers. The obverse border displays faint adjustment marks, as coined. A better Flowing Hair die variety; much scarcer than B-5. NGC ID# 24WZ, PCGS# 6853, CoinPlex ID# EDO1795FH2LEAV

**XF Details Flowing Hair 1795 Dollar
B-1, BB-21, Two Leaves Reverse**

- 4472** 1795 Flowing Hair, Two Leaves — Repaired, Whizzed — NGC Details. XF. B-1, BB-21, R.2. An uncommonly sharp example of the popular and briefly coined Flowing Hair type. The obverse shows light aquamarine toning while the reverse displays delicate rose-gold shades. Repaired near the left side of the eagle's belly. The surfaces are bright and minutely granular from whizzing, and both sides are thickly hairlined. NGC ID# 24WZ, PCGS# 6853, CoinPlex ID# EDO1795FH2LEAV

**XF 1795 Flowing Hair Dollar
B-2, BB-20, Two Leaves Reverse**

- 4473** 1795 Flowing Hair, Two Leaves XF40 PCGS. CAC. B-2, BB-20, R.3. Rich jade-green and honey-gold toning blend across this moderately circulated early silver type coin. Unobtrusive adjustment marks, as made, are confined to the area of the eagle's legs. Struck slightly off center toward 10 o'clock, though only the dentils are affected. The reverse at 9:30 has a small edge flaw, as coined, and a vertical pinscratch from Liberty's ear to the rim near 6 o'clock is subdued by subsequent toning. PCGS# 6853, NGC ID# 24WZ, CoinPlex ID# EDO1795FH2LEAV

**1795 B-1, BB-21 Two Leaves Dollar, XF45
Blundered Date**

- 4474** 1795 Flowing Hair, Two Leaves XF45 NGC. B-1, BB-21, R.2. This variety has the 7 in the date punched over an errant 1, or 1795 over 1195 as it is sometimes labeled. Pleasing pewter-gray surfaces have delicate golden-rose accents in the protected areas. Moderate adjustment marks reside at the center and left border of the obverse. NGC ID# 24WZ, PCGS# 6853, CoinPlex ID# EDO1795FH2LEAV

**Midgrade 1795 Draped Bust Dollar, VF30
Centered Bust, B-15, BB-52**

- 4475** 1795 Draped Bust, Centered VF30 NGC. B-15, BB-52, R.2. Bowers-Borckardt Die State IV with a horn-shaped die break within Liberty's hair. Traces of luster in protected areas confirm the quality of this lightly abraded early Draped Bust type coin. Generally pearl-gray though hints of sun-gold and steel-blue visit the margins. Ex: Palm Beach Signature (Heritage, 3/2006), lot 1617, which realized \$5,175. NGC ID# 24X2, PCGS# 6858, CoinPlex ID# EDO1795DRAP

1795 B-15, BB-52 Silver Dollar, XF40
Centered Draped Bust

4476 1795 Draped Bust, Centered XF40 PCGS. B-15, BB-52, R.2. Die State IV. This impressively detailed first year Draped Bust Dollar retains most of its breast feathers, with light wear on the center of the eagle's breast, leg, and neck and on Liberty's cheek and drapery. The golden-brown surfaces are glossy and relatively unmarked. A pair of tiny edge marks are noted on the reverse at 4 o'clock. Bust Dollar collections by *Guide Book* variety are increasingly popular. PCGS# 6858, NGC ID# 24X2, CoinPlex ID# EDO1795DRAP

4477 1796 Small Date, Large Letters — Rim Filing — NGC Details. VF. B-4, BB-61, R.3. Bowers-Borckardt Die State II. The rims are intermittently filed, most apparent near 1 o'clock on each side. The reverse margin shows faint mint-made adjustment marks, but the cream-white and wheat-gold surfaces are generally appealing. PCGS# 6860, CoinPlex ID# EDO1796SDLL

4478 1796 Small Date, Large Letters — Improperly Cleaned — NGC Details. VF. B-4, BB-61, R.3. Bowers-Borckardt Die State I. Light gunmetal-blue and chestnut shades visit faintly hairlined pearl-white surfaces. Minutely granular here and there with minor mint-issued adjustment marks northeast of the eagle's head. Void of noticeable marks.
From The Hilltop Collection. PCGS# 6860, CoinPlex ID# EDO1796SDLL

1796 B-4, BB-61 Dollar, VF20

4479 1796 Small Date, Large Letters VF20 PCGS. B-4, BB-61, R.3. A small round die chip is located near the drapery, directly above the 1, instantly identifying this variety. An attractive example with mottled gunmetal-blue, pale violet, and ivory toning on each side. Faint adjustment marks and trivial handling marks will pose no threat to the demand for this coin. PCGS# 6860, CoinPlex ID# EDO1796SDLL

Problem-Free VF30 1796 Dollar
Large Letters, B-4, BB-61

4480 1796 Small Date, Large Letters VF30 PCGS. B-4, BB-61, R.3. Bowers-Borckardt Die State I. Blended stone-gray and wheat-gold toning visits this midgrade early silver dollar. Only minimally abraded for the grade, and substantial definition persists on the wings and hair. The sole collectible 1796 die variety with a Large Letters reverse. Certified in a green label holder. PCGS# 6860, CoinPlex ID# EDO1796SDLL

1796 B-4, BB-61 Dollar, AU55
Small Date, Large Letters

- 4481 1796 Small Date, Large Letters AU55 NGC. B-4, BB-61, R.3.** Bowers-Borckardt Die State III, equivalent to B-4a. Bolender called the late die state extremely rare and reported that he had only seen one example. Since that time, and with much greater interest in the early dollars, a number of late die states have been seen, probably 20% of all examples from this die pair. A small die chip near the bust is centered over the 1 in the date, and that is a diagnostic feature of the obverse. The Large Letters reverse completes the attribution, while Small Letters reverse coins from this obverse die are extremely rare, if they exist at all. Most examples described as such in past auction catalogs were unplated, making verification impossible.

The present specimen is a pleasing Choice AU with attractive gray patina and lovely rose-gold toning over smooth and partly lustrous surfaces. Minor adjustment marks at the center of the obverse cause slight weakness on both sides. This piece will garner the attention of variety specialists as few finer examples are known. PCGS# 6860, CoinPlex ID# EDO1796SDLL

1796 B-2, BB-63 Dollar, VF25
Small Date, Small Letters

- 4482 1796 Small Date, Small Letters VF25 PCGS. B-2, BB-63, R.4.** Attractive grayish-brown toning with hints of lilac color cover the surfaces on both sides of this pleasing Small Eagle dollar. The surfaces have only minor abrasions, consistent with the grade. The only significant mark is a vertical scrape in the right obverse field. PCGS# 6859, NGC ID# 24X3, CoinPlex ID# EDO1796SDSL

Choice VF 1796 Silver Dollar
Small Date, Small Letters, B-2, BB-63

- 4483 1796 Small Date, Small Letters VF35 NGC. B-2, BB-63, R.4.** Of the three *Guide Book* varieties for the 1796, the Small Date, Small Letters is scarcest. A snow-white example with glimpses of luster within the legends and curls. A pass beneath a lens reveals only unimportant abrasions. Wear is moderate and chiefly confined to the eagle's breast and the highpoints of the portrait. NGC ID# 24X3, PCGS# 6859, CoinPlex ID# EDO1796SDSL

1796 B-5, BB-65 Dollar, VF30
Diagnostic Reverse Die Chip

- 4484 1796 Large Date, Small Letters VF30 PCGS. B-5, BB-65, R.2.** A large, variable size die chip at the right top of the I in AMERICA, sometimes joined also to the C, identifies this die marriage. The die chip is present to some degree on all known examples. This pewter-gray specimen has splashes of pastel gold and pale blue toning with a small defect in the right obverse field. PCGS# 6861, CoinPlex ID# EDO1796LDSL

1797 B-3, BB-71 Dollar, XF40
10x6 Stars, Large Letters

- 4485** 1797 10x6 Stars, Large Letters XF40 PCGS. B-3, BB-71, R.2. The obverse die is lapped on this early die state dollar, with more than usual detail in the hair curls on top of the head. This attractive XF specimen combines vivid gold and deep blue toning into a delightful presentation, with only trivial marks on each side. PCGS# 6865, NGC ID# 24X4, CoinPlex ID# EDO179710X6

1797 Draped Bust Dollar, B-3, BB-71, XF45
Late Die State

- 4486** 1797 10x6 Stars, Large Letters XF45 PCGS Secure. B-3, BB-71, R.2. Both dies are lapped, the obverse lacking detail among the curls over the head, and the reverse lacking detail at the right edge of most palm leaves. This Choice XF specimen has dark mottling over light gray surfaces. PCGS# 6865, NGC ID# 24X4, CoinPlex ID# EDO179710X6

1797 B-1, BB-73 Dollar, XF45
9x7 Stars, Large Letters

- 4487** 1797 9x7 Stars, Large Letters XF45 PCGS. B-1, BB-73, R.3. Die State I. This example of the 1797 9x7 Stars obverse, Large Letters reverse dollar is from our August 2000 Signature Sale, where it was cataloged as, "Dappled tan iridescence overlays the otherwise silver-gray surfaces of this originally preserved example. Lightly abraded, yet sharply defined and problem-free for the grade." Areas of lighter gray toning can be seen on the highpoints and traces of luster are seen around the devices.
Ex: Philadelphia Signature (Heritage, 8/2000), lot 6141, where it realized \$5,060. PCGS# 6863, NGC ID# 24X4, CoinPlex ID# EDO17979X7LL

1798 B-1, BB-82 Early Dollar, VF25
Small Eagle, 13 Stars

- 4488** 1798 Small Eagle, 13 Stars VF25 PCGS. B-1, BB-82, R.3. Medium gray and deep, steel-gray toning embraces this well centered example. Several tiny marks are noted on the obverse, but none of these singularly distracts. One of only two Small Eagle Bolender varieties for the year. PCGS# 6867, NGC ID# 24X5, CoinPlex ID# EDO1798SMEAG13STOBV

1798 Small Eagle, 13 Stars Dollar
B-1, BB-82, XF Details

- 4489** 1798 Small Eagle, 13 Stars — Smoothed — PCGS Genuine. XF Details. B-1, BB-82, R.3. Bowers-Borckardt Die State II. Deep, even blue-gray patina covers both sides. The obverse strike details are stronger than those seen on the reverse. The left obverse field shows the most obvious signs of smoothing. There are no large or obvious abrasions on either side, save one. An irregular line of some sort of foreign matter trails from the reverse rim downward and appears to have been outlined in ink. PCGS# 6867, NGC ID# 24X5, CoinPlex ID# EDO1798SMEAG13STOBV

Small Eagle 1798 Silver Dollar, VF25
15 Stars, B-2, BB-81

- 4490** 1798 Small Eagle, 15 Stars VF25 NGC. B-2, BB-81, R.3. Bowers-Borckardt Die State II. A problem-free cream-gray and straw-gold representative. The surfaces are without any visible marks, all legends are bold, and Liberty displays considerable hair definition. Most varieties of 1798 dollars are the Heraldic Eagle type. B-1 and B-2 are the exceptions, and receive separate *Guide Book* listings due to a different star count. NGC ID# 24X5, PCGS# 6868, CoinPlex ID# EDO1798SMEAG15STOBV

4491 1798 Large Eagle, Pointed 9 — Improperly Cleaned — NGC Details. VF. B-9, BB-121, R.4. Primarily silver-gray with hints of caramel-gold. Only mildly cleaned by the standards of this early silver series. One thin mark is noted near the profile and the field near the bust tip is glossy. Light adjustment marks are confined to the right reverse border.
From *The Hilltop Collection*. NGC ID# 24X6, PCGS# 6873, CoinPlex ID# EDO1798LGEAG

4492 1798 Large Eagle, Pointed 9 VF30 NGC. B-25b, BB-123, R.4. Bowers-Borckardt Die State IV. Chestnut-gold and lavender toning embrace this middle grade early silver dollar. The strike is even except on the eagle's head and nearby stars, where the surface is somewhat abraded. One slight reverse rim ding at 11 o'clock. NGC ID# 24X6, PCGS# 6873, CoinPlex ID# EDO1798LGEAG

**1798 B-24, BB-124 Dollar, XF40
Blundered Stars Reverse**

4493 1798 Large Eagle, Pointed 9 XF40 PCGS. B-24, BB-124, R.2. Die State III. A scarce die state for this common early dollar variety. The first two stars at lower left point to the center of the denticles, and the reverse shows the well-known Blundered Stars pattern, in which the stars are placed too high and in a line pattern. The upper curl is weak, and only part of a leaf shows by the C in AMERICA. The clouds behind the eagle's head are weak, and the crack is beginning to form from the rim to star 12, and thence inward a short way into the field. Both sides offer light-gray surfaces with some faint luster remaining. A prime opportunity for the die state specialist to obtain a nice, problem-free XF example. PCGS# 6873, NGC ID# 24X6, CoinPlex ID# EDO1798LGEAG

**1798 Draped Bust Dollar, XF40
Large Eagle, Pointed 9, B-14, BB-122**

4494 1798 Large Eagle, Pointed 9 XF40 PCGS. B-14, BB-122, R.3. Bowers-Borckardt Die State IV. The BB-14 variety is identified by the Pointed 9, the placement of the 8 close to the bust, and the line star pattern on the reverse. The bb-122 is usually seen in the VF grade range. This pleasing XF specimen retains much original design detail and the lightly abraded surfaces display natural light gray patina. PCGS# 6873, NGC ID# 24X6, CoinPlex ID# EDO1798LGEAG

4495 1798 Large Eagle, Pointed 9 — Cleaned — ANACS. XF40 Details. B-25a, BB-123, R.4. Bowers-Borckardt Die State III. Numerous die cracks aid the attribution of this scarcer Heraldic Eagle marriage. This stone-gray representative is lightly struck at the centers but the remainder of the design is sharp. Faint hairlines cross both sides but no individual abrasions are remotely consequential. NGC ID# 24X6, PCGS# 6873, CoinPlex ID# EDO1798LGEAG

**1798 Dollar, AU50
Heraldic Eagle, Pointed 9, B-8, BB-125**

4496 1798 Large Eagle, Pointed 9 AU50 NGC. B-8, BB-125, R.2. Bowers-Borckardt Die State I. The long vertical die flaw in the left obverse field identifies the BB-125 variety. The BB-125 is an available variety in lower grades, but Q. David Bowers knew of no Mint State examples when he wrote his series reference in 1993. This lightly circulated example shows just a touch of wear on the high points of the design elements and traces of mint luster clinging to the devices. NGC ID# 24X6, PCGS# 6873, CoinPlex ID# EDO1798LGEAG

**1798 B-15, BB-112 Dollar, AU53
Third Reverse Die Use**

4497 1798 Large Eagle, Pointed 9 AU53 NGC. B-15, BB-112, R.3. The reverse die was used for BB-110 through 113 (B-16, 11, 15, and 27, respectively), and it is seen here in its third use for B-15. This piece appears to represent the first die state before the obverse was lapped, with star 13 the same size as other stars, rather than smaller than the others as described in the Bowers-Borckardt reference. This pleasing light gray example has satin luster with wispy blue and gold overtones. NGC ID# 24X6, PCGS# 6873, CoinPlex ID# EDO1798LGEAG

**1798 Heraldic Eagle Dollar, AU58
B-14, BB-122**

- 4498 1798 Large Eagle, Pointed 9 AU58 NGC. B-14, BB-122, R.3.** Several reverse diagnostics, including a short lowest arrow that only extends to the center of the left foot of the N in UNITED, help identify this scarce variety. The present example is near-Mint, kept from a finer designation by only a trace of friction that crosses the silver-gray high points. The fields, which retain virtually all of their original luster, shine beneath subtle cyan and champagne patina. The strike is crisp, and the surfaces are surprisingly mark-free, with only a handful of wispy flaws on each side. NGC has certified 40 finer examples (12/12). NGC ID# 24X6, PCGS# 6873, CoinPlex ID# EDO1798LGEAG

**1798 B-7, BB-95 Dollar, VF30
Knob 9, Four Lines in Stripes**

- 4499 1798 Knob 9, 4 Stripes VF30 PCGS. B-7, BB-95, R.5.** This very scarce variety should be of special interest to variety specialists. The comma-like flaw after the date and the leaf pointing between the RI of AMERICA confirm the variety. This VF30 example displays slightly marked light gray surfaces with hints of luster in the protected areas. The usual localized strike weakness is noted. PCGS# 6875, CoinPlex ID# EDO1798LGEAGKNOB9

**1798 B-4, BB-92 Silver Dollar, XF40
Elusive Knobbed 9 Variety**

- 4500 1798 Knob 9 XF40 PCGS. B-4, BB-92, R.4.** This piece shows the beginnings of the State II die crack through the second T in STATES. BB-92 is a scarce variety that is rare in higher grades. This XF example, housed in a first-generation PCGS holder, ranks among the top specimens known. Light silver appears on the high points, with deep blue, emerald, and gray toning on each side. A few hidden marks are inconsequential. PCGS# 6875, CoinPlex ID# EDO1798LGEAGKNOB9

- 4501 1798 Large Eagle, Pointed 9, 10 Arrows VF20 PCGS. CAC. B-13, BB-108, R.2.** Bowers-Borckardt Die State II. Rich olive-brown toning embraces the fields, though the high points are pearl-white. A few parallel adjustment marks (as coined) on the central reverse do not distract. The base of Liberty's neck shows faded moderate abrasions. PCGS# 6876, CoinPlex ID# EDO1798LGEAGKNOB910ARR

**1798 B-13, BB-108 Dollar, VF35
10 Arrows Reverse**

- 4502 1798 Large Eagle, 10 Arrows VF35 PCGS. B-13, BB-108, R.2.** Die State II with a die crack through the right wing tip to the top of AM and the border over E. The reverse die is lapped with a noticeable gap between clouds 7 and 8. Light tan high points are noted on pewter gray surfaces with hints of blue, gold, and lighter silver. A pleasing example with nice surfaces for the grade, showing only trivial handling marks. PCGS# 6876, CoinPlex ID# EDO1798LGEAGKNOB910ARR

XF 1798 Heraldic Eagle Dollar
10 Arrows, B-13, BB-108

- 4503** 1798 Large Eagle, 10 Arrows XF40 PCGS. B-13, BB-108, R.2. Bowers-Borckardt Die State IV. Deep dove-gray and golden-brown toning embraces this nicely detailed early dollar. Luster glimmers from the peripheral legends. Small obverse abrasions are scattered and inoffensive. Minor parallel adjustment marks are relegated to the upper right reverse. PCGS# 6876, CoinPlex ID# EDO1798LGEAGKNOB910ARR

Partly Lustrous AU 1798 Dollar
10 Arrows, 5 Stripes, B-6, BB-96

- 4504** 1798 Large Eagle, Knob 9, 5 Stripes, 10 Arrows AU50 PCGS. B-6, BB-96, R.3. Bowers-Borckardt Die State IV. Ex: Thaler. Almond-gold and steel-blue shades encompass this well detailed Heraldic Eagle dollar. Luster is prevalent in the hair, wings, and legends. Marks are generally few, though we note a single slender abrasion at the reverse center. PCGS# 6876, CoinPlex ID# EDO1798LGEAGKNOB910ARR

- 4505** 1798 Large Eagle, Wide Date, Pointed 9 — Scratched — ANACS. XF Details, Net VF30. B-23, BB-105, R.3. The rich dove-gray toning also exhibits hints of golden-brown. A curly pinscratch on the right obverse field corresponds to the ANACS designation. Otherwise, marks are minimal, and the devices display pleasing definition. PCGS# 6877, CoinPlex ID# EDO1798LGEAGWIDEDT

1798 B-23a, BB-105 Dollar, VF35
Lapped Die State

- 4506** 1798 Large Eagle, Wide Date, Pointed 9 VF35 PCGS. B-23a, BB-105, R.3. Die State III, or B-23a, with both dies lapped. The hair curls over the head and below the shoulder are incomplete, and cloud 3 is partially dispersed on this late die state specimen. Light gray surfaces host delightful iridescent toning. PCGS# 6877, CoinPlex ID# EDO1798LGEAGWIDEDT

1798 Draped Bust Dollar, B-23a, BB-105, XF45
Late Die State

- 4507** 1798 Large Eagle, Pointed 9, Wide Date XF45 PCGS Secure. B-23a, BB-105, R.3. Bowers-Borckardt Die State III, with both dies lapped, equal to B-23a. About one-third of 1798 B-23 dollars are in this late die state, and those coins are usually found in lower circulated grades. This pleasing piece has excellent detail with traces of luster on the light silver-gray surfaces. Trivial marks and faint hairlines are evident on both sides. Full border dentils are evident, although the centering is imperfect. PCGS# 6877, CoinPlex ID# EDO1798LGEAGWIDEDT

1798 B-20, BB-102 Dollar, AU50
Ex: Queller and Hesselgesser Collections

- 4508** 1798 Large Eagle, Wide Date, Pointed 9 AU50 PCGS Secure. B-20, BB-102, R.5. Ex: Hesselgesser/Queller. Die State IV. The area between two parallel cracks below ERI on the reverse has raised slightly to form an internal retained cud. There is no evidence of the State V crack through ICA. The reverse is usually recognized by the heavy rim break below the eagle's tail. An attractive piece with light silver surfaces that are accented by hints of pale gold toning on each side. Considerable luster remains, especially near the devices. The B-20 die combination is scarce in all grades, and usually found below XF. This example, a lovely AU coin, ranks among the finest known. PCGS# 6877, CoinPlex ID# EDO1798LGEAGWIDEDT

**Smooth Choice AU 1798 Dollar
Heraldic Eagle, Wide Date
Pointed 9, B-23, BB-105**

- 4509 1798 Large Eagle, Wide Date, Pointed 9 AU55 PCGS. CAC. B-23, BB-105, R.3.** Bowers-Borckardt Die State III. Rich chestnut-gold and gunmetal-gray toning blends throughout this minimally abraded early silver dollar. The strike shows minor softness on the eagle's neck but the remainder of the design is nicely struck. Luster emerges from the wings, curls, and legends. An edge flaw at 7 o'clock is mint-made and also affects the reverse at 11 o'clock. A minor lamination, as produced, is near the obverse edge flaw. The late die state with a partially lapped shoulder curl. B-23 is an available variety but is typically encountered in VF. Original Choice AU examples are highly desirable. PCGS# 6877, CoinPlex ID# EDO1798LGEAGWIDEDT

**XF Details 1799/8 15 Stars Reverse Dollar
B-3, BB-141**

- 4510 1799/8 15 Stars Reverse — Cleaned — ANACS. XF Details, Net VF30. B-3, BB-141, R.3.** Bowers-Borckardt Die State III, cracked through AMERIC but not down to the eagle. Though cleaned in the past, this coin has a decent midrange appearance thanks to gray-to-gold retoning. A post-striking dig is noted on Liberty's neck. Housed in a small-format ANACS net-grade holder. NGC ID# 24X8, PCGS# 6883, CoinPlex ID# EDO1799OVR8

**Multicolor AU 1799/8 Dollar
15 Stars Reverse, B-3, BB-141**

- 4511 1799/8 15 Stars Reverse AU50 PCGS. B-3, BB-141, R.3.** Bowers-Borckardt Die State III. BB-141 is famous for its 15 Stars reverse, with the points of two stars peeking out of oversized left and right clouds. The corrected mint blunder apparently escaped contemporary scrutiny but was noticed by collectors decades later. This lightly circulated overdated Bust dollar exhibits iridescent gunmetal-blue, caramel-gold, and apple-green toning. No marks are remotely consequential. PCGS# 6883, NGC ID# 24X8, CoinPlex ID# EDO1799OVR8

**1799/8 Draped Bust Dollar, VF35
Popular Overdate, B-1, BB-142**

- 4512 1799/8 13 Stars Reverse VF35 PCGS. B-1, BB-142, R.3.** Bowers-Borckardt Die State III. This popular overdate is recognized by the undertype of the 8 below the last digit in the date and the star's ray pointing to the left outside of the U in PLURIBUS. The BB-142 is a slightly scarce variety, always in demand because of the prominent overdate. This problem-free Choice VF example displays pleasing dove-gray and golden-brown patina with a few traces of original mint luster. Population: 18 in 35, 59 finer (12/12). PCGS# 6884, CoinPlex ID# EDO1799OVR813STREV

4513 1799 Irregular Date, 15 Stars Reverse Fine 12 PCGS. B-4, BB-153, R.4. Bowers-Borckardt Die State II with numerous obverse cracks and clashes. A very scarce *Guide Book* variety that mates the Irregular Date obverse with the blundered 15 Stars reverse. Stone-gray throughout the obverse with light charcoal-gray toning on the reverse field. The reverse motifs are cream-gray. Minimally abraded and mildly granular. PCGS# 6879, CoinPlex ID# EDO1799IRREGDT15ST

4514 1799 Irregular Date, 15 Stars Reverse VF20 PCGS. B-4, BB-153, R.4. Bowers-Borckardt Die State II. A better Bolender variety of this popular late 18th century date. Minor adjustment marks on the central reverse are of Mint origin, but the mildly glossy cream-gray and almond-gold surfaces are surprisingly unabraded. PCGS# 6879, CoinPlex ID# EDO1799IRREGDT15ST

**1799 B-15, BB-152 Dollar, XF40
Irregular Date, 13 Stars**

4515 1799 Irregular Date, 13 Stars Reverse XF40 PCGS. B-15, BB-152, R.3. Ex: Highlander. Bowers-Borckardt Die State II. The fields are lilac, and the remaining luster and highpoints are both silver-gray. Dashes of darker russet visit the upper portions of each side. The obverse has a small edge nick at 3 o'clock, but the surfaces are generally pleasing. PCGS# 6880, CoinPlex ID# EDO1799IRREGDT13ST

4516 1799 7x6 Stars — Improperly Cleaned — NGC Details. VF. B-12, BB-160, R.3. Bowers-Borckardt Die State III. Medium chestnut toning visits the centers of this Heraldic Eagle silver dollar. Powder-blue enriches the margins. No marks are of singular consequence, though both sides are cloudy from hairlines and the obverse field may be smoothed near 7 o'clock. NGC ID# 24X7, PCGS# 6878, CoinPlex ID# EDO1799

4517 1799 7x6 Stars VF20 PCGS. B-5, BB-157, R.2. A rich gunmetal-gray example of the Heraldic Eagle design. Sharply defined for the VF20 grade, with considerable hair and plumage detail. The field near the chin has a trio of brief marks, and small reverse rim dings are noted at 5 and 8 o'clock. PCGS# 6878, NGC ID# 24X7, CoinPlex ID# EDO1799

**Scarce B-8, BB-165 1799 Dollar
Obverse 7x6 Stars, VF35**

4518 1799 7x6 Stars VF35 PCGS. B-8, BB-165, R.3. Bowers-Borckardt Die State II, cracked through the LIB but not down through the TY of LIBERTY. Faintly luminous despite moderate wear, this midrange piece is largely pale silver with reddish duskiness emerging near the rims. The plastic holder has a scratch over the upper left obverse that should not be interpreted as damage to the coin. PCGS# 6878, NGC ID# 24X7, CoinPlex ID# EDO1799

4519 1799 7x6 Stars — Repaired, Whizzed — ANACS. XF40 Details. B-12, BB-160, R.3. Bowers-Borckardt Die State III. This Heraldic Eagle dollar is whizzed throughout and has a smoothed area on the reverse field beneath the left scroll end. The borders display navy-blue toning though the centers are slate-gray. A richly detailed example of the popular early type. NGC ID# 24X7, PCGS# 6878, CoinPlex ID# EDO1799

**XF 1799 Dollar, 7x6 Stars
Scarce B-6, BB-162 Variety**

4520 1799 7x6 Stars XF40 PCGS. B-6, BB-162, R.4. Bowers-Borckardt Die State III. A stone-gray XF example of the scarcer Bolender-6 variety, typically attributed by the light radial die crack at 1 o'clock on the reverse. Close inspection locates a few faded thin field marks, but pockets of luster brighten design recesses and the types show considerable design definition. PCGS# 6878, NGC ID# 24X7, CoinPlex ID# EDO1799

**Golden-Gray XF 1799 Silver Dollar
B-11, BB-161, 7x6 Stars**

4521 1799 7x6 Stars XF40 PCGS. B-11, BB-161, R.3. Bowers-Borckardt Die State III. The heavy die crack near the D in UNITED is nearly diagnostic for this Bolender variety. Late dies with waves of clash marks (as made) above the date. Medium golden-gray toning. Smooth aside from a vertical mark above the arrows and wispy field abrasions near the chin. PCGS# 6878, NGC ID# 24X7, CoinPlex ID# EDO1799

**AU Sharpness 7x6 Stars
1799 Dollar, B-10, BB-163**

4522 1799 7x6 Stars — Cleaned, Reverse Rim Filed — NGC Details. AU. B-10, BB-163, R.2. Bowers-Borckardt Die State IV. The terminal die state of this collectible Draped Bust variety. The reverse exhibits many lengthy die cracks. The stone-gray surfaces are hairlined, and file marks are noted on a moderate rim ding at 6:30 on the reverse. Design definition is excellent and luster emerges from the motifs and lettering. NGC ID# 24X7, PCGS# 6878, CoinPlex ID# EDO1799

**AU50 7x6 Stars 1799 Dollar
B-16, BB-158**

- 4523** 1799 7x6 Stars AU50 PCGS. B-16, BB-158, R.2. Bowers-Borckardt Die State III with “wave” clash marks from clouds on the obverse above the date. Luster is largely intact with occasional rose shadings on a pale-gray and steel base. An old pinscratch underlining the Y in LIBERTY contributes to the grade, but the all-around eye appeal is solid. PCGS# 6878, NGC ID# 24X7, CoinPlex ID# EDO1799

**1799 B-21, BB-169 Dollar, AU53
Late Die State**

- 4524** 1799 7x6 Stars AU53 PCGS. B-21, BB-169, R.3. Bowers-Borckardt Die State III, with all cracks except the terminal crack vertically through the 7 to the drapery. This nicely defined AU dollar has light silver luster with reddish-gold, pale blue, and iridescent overtones. Trivial marks are barely visible with a glass. PCGS# 6878, NGC ID# 24X7, CoinPlex ID# EDO1799

**1799 Draped Bust Dollar, AU55
Popular B-17, BB-164 Variety**

- 4525** 1799 7x6 Stars AU55 PCGS. B-17, BB-164, R.3. Bowers-Borckardt Die State III. The obverse die was used to strike six different die varieties, with the BB-164 specifically identified by the relapping of the dies to remove the “pocket” at the throat and the die crack through the last four stars. This attractive Choice AU specimen is sharply detailed at the peripheries, but the centers show some of the softness always seen on this variety. The lightly marked surfaces retain much original mint luster, under pleasing golden-brown, sea-green, and blue toning. From *The Teich Family Collection*. PCGS# 6878, NGC ID# 24X7, CoinPlex ID# EDO1799

**1799 B-19, BB-155 Dollar, AU58
Second Obverse Die Use**

- 4526** 1799 7x6 Stars AU58 PCGS. CAC. B-19, BB-155, R.5. The obverse die has the right edge of the E in LIBERTY centered over the highest wave of hair, and appears here in its second use. Die State IV, with cracks through stars 2 and 3 to the hair, and another through the date to star 3. This example ranks among the finest known to the cataloger, with nearly full ivory mint luster beneath mottled gold toning on each side. The Notable Specimens list in the BB reference lists one MS63, an MS60 with adjustment marks, an AU58, and four AU50 examples as the finest known to the authors at the time. This lovely specimen may be one of those, or might be a different piece. PCGS# 6878, NGC ID# 24X7, CoinPlex ID# EDO1799

**Very Scarce 8x5 Stars 1799 Dollar
B-23, BB-159, Choice VF**

- 4527** 1799 8x5 Stars VF35 PCGS. B-23, BB-159, R.4. Bowers-Borckardt Die State III, late state with "wave" clash marks above date. The sole 8x5 Stars obverse for the year, and its sole use, a very scarce die pair with its own *Guide Book* entry. This deeply toned Choice VF example has dusky charcoal patina with overtones in blue and peach as well as a few tiny streaks of silver on the reverse. PCGS# 6881, CoinPlex ID# EDO17998X5ST

- 4528** 1800 VF25 NGC. B-13, BB-193, R.4. Bowers-Borckardt Die State II. Impressively defined for the VF25 level. A mildly granular example with powder-blue, golden-tan, and stone-gray toning. The upper reverse has an area of charcoal-gray, and a planchet flaw is noted near Liberty's mouth. The demand for early silver U.S. coins has grown considerably over the past two decades, with the early dollars particularly popular.
Ex: Orlando FUN Signature (Heritage, 1/2009), lot 4297, which realized \$2,070. NGC ID# 24X9, PCGS# 6887, CoinPlex ID# EDO1800

**Bold VF25 1800 Silver Dollar
Scarce B-13, BB-193 Variety**

- 4529** 1800 VF25 PCGS. B-13, BB-193, R.4. Bowers-Borckardt Die State III. A die crack atop AMERICA helps identify this scarcer Bolender marriage. Impressively detailed for the VF25 grade, with all letters sharp within E PLURIBUS UNUM. The dusky cream-gray surfaces are unabraded except for two faint lines near the profile. The cheek shows mild granularity. PCGS# 6887, NGC ID# 24X9, CoinPlex ID# EDO1800

**VF35 Details 1800 Dollar
Very Rare B-2, BB-182 Dies**

- 4530** 1800 — Cleaned — ANACS. VF35 Details. B-2, BB-182, R.6. Bowers-Borckardt Die State II, as inevitably seen with heavy die crack at first A of AMERICA. Though cleaned with pastel toning that does nothing to hide it, this midrange coin represents a very rare transitional die pairing and is valuable to series enthusiasts as a result. NGC ID# 24X9, PCGS# 6887, CoinPlex ID# EDO1800

**XF 1800 Silver Dollar, B-10, BB-190
Wide Date, Low 8**

- 4531** 1800 Wide Date, Low 8 XF40 PCGS. B-10, BB-190, R.3. *Ex: Hesselgesser.* Bowers-Borckardt Die State VI. Deep peach-gold, powder-blue, and stone-gray toning drapes this attractive XF representative. Glimpses of luster emerge from the legends and other design crevices. The mildly glossy surfaces are minimally abraded despite a slight obverse rim nick at 4 o'clock. PCGS# 6888, CoinPlex ID# EDO1800WIDEDTLO8

**1800 AMERICA! Dollar, B-19, BB-192
AU Details**

- 4532** 1800— Obverse Graffiti — NGC Details. AU. B-19, BB-192, R.2. Some miscreant has scratched an "L" shape with an extra leg into the obverse field out from stars 3-4, and an "M" is in the right field. More is the pity, as this is an example of BB-192, one of the two AMERICA! die varieties. Otherwise much appeal is present, although we note another small semicircular scrape at the L of LIBERTY. The pinkish-gray surfaces boast much detail and attractive collector appeal remaining. PCGS# 6892, CoinPlex ID# EDO1800AMERICA!

AU 1800 Dollar, B-19, BB-192
Popular AMERICA I Variety

- 4533** 1800 AMERICA I AU50 PCGS. B-19, BB-192, R.2. Bowers-Borckardt Die State III. Luster outlines the stars and legends, and dominates the wings and hair curls. This cream-gray early dollar has an usually unabraded reverse, and the obverse has only infrequent, relatively minor marks. The unintentional final I in AMERICA I is neither from a letter punch nor a die crack. Instead, the die was inadvertently scratched with a sharp tool. Struck from clashed dies with "waves" are noted near the date, caused by the clouds on the reverse die.

Ex: Thomas Wolfe Collection, Part One (Heritage, 9/2005), lot 3686, which realized \$8,050. PCGS# 6892, CoinPlex ID# EDO1800AMERICA I

Popular Dotted Date XF 1800 Dollar
B-14, BB-194

- 4534** 1800 Dotted Date XF40 PCGS. B-14, BB-194, R.3. Bowers-Borckardt Die State IV. The Dotted Date dollar gets its name from the small die chips around the 0 in the date. The present example has lightly toned pearl-gray centers though the peripheries exhibit deep russet-brown and steel-blue toning. No marks are noticeable aside from a roundish mark on the field near the forehead.

Ex: Long Beach Signature (Heritage, 2/2009), lot 1569, which realized \$3,737.50. PCGS# 6889, CoinPlex ID# EDO1800DOTDT

- 4535** 1800 10 Arrows Fine 12 PCGS. CAC. B-15, BB-195, R.3. The reverse has numerous tiny die flaws in the field between STATES and OF, with 13 arrowheads but only 10 shafts. Light gray centers reside in a frame of pastel blue and pale yellow toning. From *The Teich Family Collection*. PCGS# 6891, CoinPlex ID# EDO180010ARR

10 Arrows VF25 1800 Dollar
B-15, BB-195

- 4536** 1800 10 Arrows VF25 PCGS. B-15, BB-195, R.3. The later die state with light clash marks near OF and minor die rust on the upper reverse. This early dollar is attractively defined for the VF25 grade, particularly on the eagle's plumage and on E PLURIBUS UNUM, which is nearly fully visible. Thin marks are noted above the bust tip and near the eighth cloud. PCGS# 6891, CoinPlex ID# EDO180010ARR

1800 Draped Bust Dollar, AU50
Scarce B-15, BB-195 Variety

- 4537** 1800 10 Arrows AU50 PCGS. B-15, BB-195, R.4. Bowers-Borckardt Die State I. The BB-195 is a scarce variety recognized by the 10 perfect arrows on the reverse, with three arrow heads that have no shafts. This attractive AU specimen retains most of its original design detail and a surprising amount of original mint luster. Population: 50 in 50 (1 in 50+), 98 finer (12/12). PCGS# 6891, CoinPlex ID# EDO180010ARR

1800 Early Dollar, AU50
12 Arrows Reverse, B-17, BB-196

- 4538** 1800 12 Arrows AU50 PCGS Secure. B-17, BB-196, R.1. Bowers-Borckardt Die State IV. The BB-196 is an available variety, identified by the "Collar" clash mark at Liberty's throat and the 12 arrows on the reverse. Die State IV is scarce state, however, with the obverse die crack showing from star 6 to the ribbon. This attractive AU specimen is well-detailed and retains a significant amount of original mint luster, with minimally abraded surfaces. PCGS# 6890, CoinPlex ID# EDO180012ARR

**1801 Silver Dollar, XF40
B-2, BB-212 Variety**

- 4539** 1801 XF40 PCGS. B-2, BB-212, R.3. Bowers-Borckardt Die State II. The clash marks around the date and the 12 easily visible arrows on the reverse identify the BB-212 variety. This well-detailed specimen displays lustrous brilliant centers, with pink, blue, and gold at the peripheries. The pleasing surfaces are lightly abraded. PCGS# 6893, NGC ID# 24XA, CoinPlex ID# EDO1801

**1801 Draped Bust Dollar, AU50
B-2, BB-212, Scarce Die State III**

- 4540** 1801 AU50 PCGS Secure. B-2, BB-212, R.3. Bowers-Borckardt Die State III. The BB-212 variety is recognized by the single "Collar" clash mark at Liberty's throat and the point of the leftmost arrowhead positioned under the left serif of N in UNITED. Die State III is a scarce state. This delightful AU example retains a significant amount of mint luster and design detail, with pleasing gold, gray, and blue-steel patina. Population: 31 in 50, 47 finer (12/12). PCGS# 6893, NGC ID# 24XA, CoinPlex ID# EDO1801

**1802/1 Draped Bust Dollar, VF35
Narrow Overdate, B-4, BB-232**

- 4541** 1802/1 Narrow Date VF35 PCGS. B-4, BB-232, R.3. Bowers-Borckardt Die State II. The BB-232 variety is identified by the easily seen overdate and the position of the 1 attached to the curl. This attractive Choice VF specimen displays pleasing, lightly abraded surfaces that retain a significant amount of original mint luster. PCGS# 6898, NGC ID# 24XC, CoinPlex ID# EDO1802OVR1

**1802/1 B-3, BB-234 Dollar, VF30
Wide Overdate**

- 4542** 1802/1 Wide Date VF30 PCGS. B-3, BB-234, R.3. Die State III, "oblong pellet" in obverse field near stars 8 and 9. Streaky plum and stone-gray color embraces the obverse, the reverse is generally untoned although chestnut hues emerge when the piece is rotated beneath a light. Traces of mint luster are still present in portions of the eagle's wings. No unpleasant abrasions are evident. PCGS# 6899, CoinPlex ID# EDO1802OVR1WIDEDT

- 4543** 1802/1 Wide Date — Cleaned — ANACS. XF40 Details. B-3, BB-234, R.3. Bowers-Borckardt Die State II. Deep lilac, steel-gray, and caramel-gold encompass this well detailed Draped Bust dollar. Luster glimmers from protected areas, but the coin is hairlined, especially on the left obverse field. Granular on portions of the hair, and a small obverse lamination is at 6:30. PCGS# 6899, CoinPlex ID# EDO1802OVR1WIDEDT

**AU Sharpness 1802 Dollar
Narrow Date, B-6, BB-241**

- 4544** 1802 Narrow Date — Plugged, Repaired — ANACS. AU Details, Net VF30. B-6, BB-241, R.1. A round plug is faintly evident near the ER in LIBERTY, and opposite on the eagle's tail feathers. The dark gunmetal-gray toning is suspicious, and the surfaces are minutely granular. Despite these issues, this is a sharp example of a highly popular type, and would be the centerpiece of a majority of silver dollar collections. NGC ID# 24XB, PCGS# 6895, CoinPlex ID# EDO1802

**Choice VF 1802 Silver Dollar
Narrow Date, B-6, BB-241**

- 4545** 1802 Narrow Date VF35 NGC. B-6, BB-241, R.1. Bowers-Borckardt Die State III. Deep gunmetal-blue toning embraces the reverse field and the obverse margin. The devices and obverse field are stone-gray and almond-gold. The reverse has an occasional small roundish mark, but this Heraldic Eagle type coin is lightly abraded overall. NGC ID# 24XB, PCGS# 6895, CoinPlex ID# EDO1802

4546 1802 Narrow Date — Plugged, Improperly Cleaned — NCS. XF Details. B-6, BB-241, R.1. Bowers-Borckardt Die State III. The plug appears to be near the reverse rim near 7 o'clock. No corresponding repair is evident on the obverse, but both sides are glossy and cloudy from cleaning. Sharply struck for the type and free from noticeable marks. NGC ID# 24XB, PCGS# 6895, CoinPlex ID# EDO1802

**1802 Draped Bust Dollar, XF40
Narrow Date, B-6, BB-241**

4547 1802 Narrow Date XF40 PCGS. B-6, BB-241, R.1. Bowers-Borckardt Die State III. The BB-241 variety is easily identified by the missing right foot of T in LIBERTY and the wide space between 8 and 0 in the date. This lightly worn XF specimen exhibits attractive bluish-gray patina and minimally abraded surfaces. Population: 3 in 40, 15 finer (12/12). PCGS# 6895, NGC ID# 24XB, CoinPlex ID# EDO1802

**1802 Dollar, XF45
Wide Date, B-5, BB-242**

4548 1802 Wide Date XF45 PCGS. CAC. B-5, BB-242, R.5. Bowers-Borckardt Die State I. The BB-242 is a very scarce variety characterized by the normally spaced (or Wide) date, and the perfect foot of T in LIBERTY. This attractive Choice XF specimen displays dark dove-gray and golden-brown patina, with traces of mint luster underneath. Population: 1 in 45, 1 finer (12/12). PCGS# 6896, CoinPlex ID# EDO1802WIDEDT

**Scarce XF 1803 Silver Dollar
Small 3, B-5, BB-252**

4549 1803 Small 3 XF40 ANACS. B-5, BB-252, R.3. Cream-white device highpoints contrast with charcoal-gray fields. No marks are noticeable on this Heraldic Eagle type coin, though slight rim dings are noted at 6:30 on the obverse and 1 o'clock on the reverse. Minor vertical adjustment marks near the right shield corner are of mint origin. NGC ID# 24XD, PCGS# 6900, CoinPlex ID# EDO1803

**1803 B-4, BB-254 Dollar, XF40
Small 3 Date Style**

4550 1803 Small 3 XF40 PCGS. B-4, BB-254, R.3. A slightly scarcer variety than the usually encountered B-5, despite identical rarity ratings. Both sides have violet-gray patina in the fields, surrounded by deeper steel-blue peripheries. The surfaces are exceptional for the grade, prompting CAC to provide their seal of approval. PCGS# 6900, NGC ID# 24XD, CoinPlex ID# EDO1803

**1803 B-6, BB-255 Dollar, XF40
Large 3 in Date**

4551 1803 Large 3 XF40 PCGS. B-6, BB-255, R.2. Golden-brown and lilac patina enriches this untroubled and nicely detailed Bust Dollar. The only Bolender variety with a Large 3 logotype, aside from the extremely rare novodel proof. The eagle's shield has a couple of relatively innocuous adjustment marks, as made, although a short pinscratch is noted below the I in UNITED. Pale luster clings to the stars and legends. The dies are somewhat rotated counterclockwise. PCGS# 6901, CoinPlex ID# EDO1803LG3

**1803 Early Silver Dollar, AU50
Large 3, B-6, BB-255**

4552 1803 Large 3 AU50 PCGS Secure. B-6, BB-255, R.2. Bowers-Borckardt Die State I. The BB-255 variety is determined by the Large 3, with a vertical serif in the date. This lightly circulated example displays dusky gray patina on both sides, with well-detailed design elements and minimally abraded surfaces. Population: 15 in 50, 24 finer (12/12). PCGS# 6901, CoinPlex ID# EDO1803LG3

GOBRECHT DOLLAR

1836 Die Alignment I Gobrecht Dollar Judd-60, AU Details

- 4553 1836 Name on Base, Judd-60, Pollock-65, R.1 — Plugged — NGC. AU Details.** Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (the center of Liberty's head is opposite the D in DOLLAR). No trace of the linear die clash mark can be seen above the eagle's wing, thus placing this coin among the first 400 pieces struck in the last week of December. The surfaces are bright, suggestive of an old cleaning or rubbing, but significant charcoal-gray patina surrounds the devices on each side. The plug is located just to the right of Liberty's head. It is also seen on the first L in DOLLAR on the reverse. The disruption in the surface is less noticeable on the obverse, and more so on the reverse with the entire letter L skillfully reworked but a depression left in the metal surrounding it. PCGS# 11225

SEATED DOLLARS

- 4554 1842 AU55 PCGS. CAC.** The patina covering both sides of this Choice AU piece includes a number of colors with a medium sea-green serving as the predominant color on the reverse. The obverse primarily displays gold and golden-gray. The contact marks are minor in nature. PCGS# 6928, NGC ID# 24YC, CoinPlex ID# L\$M1842

1842 Seated Dollar, MS63 Scarcer Early Date in High Grades

- 4555 1842 MS63 NGC.** No Motto Philadelphia Seated dollars are notoriously scarce in any Mint State grade. This Select example displays dappled orange-gold, gunmetal-blue, and stone-gray toning. Marks are inconsequential for the grade save for a single thin line above the eagle's right (facing) shoulder. Census: 9 in 63, 15 finer (12/12). NGC ID# 24YC, PCGS# 6928, CoinPlex ID# L\$M1842

1843 Dollar, MS62

- 4556 1843 MS62 PCGS. CAC.** Despite its status as the most easily obtainable Seated dollar from the 1840s in circulated grades, the 1843 (165,100 pieces produced) is anything but common in Mint State. This example displays a dusky tan-gray patina on both sides. The piece exhibits semireflective fields, a common trait on Seated dollars of the era. Population: 13 in 62, 19 finer (12/12). PCGS# 6929, NGC ID# 24YD, CoinPlex ID# L\$M1843

1844 Seated Dollar, MS61 Scarce, Low-Mintage Date

- 4557 1844 MS61 NGC.** A very scarce date with a mintage of just 20,000 pieces. Business strikes are identified by prominent die doubling on Liberty's shield and coarse die lines on the reverse field near the center. The present representative is satiny and displays milky cream-gray, lime-green, and rose-gold toning. The fields display scattered small marks consistent with the grade. NGC ID# 24YE, PCGS# 6930, CoinPlex ID# L\$M1844

- 4558 1847 MS60 PCGS.** The 1847 Seated Liberty dollar is more elusive in high grade than the mintage of 140,750 pieces suggests. Deep golden-gray toning envelops both sides of this piece. Minor, as-made laminations appear near the top of the reverse. Population: 5 in 60, 55 finer (12/12). PCGS# 6934, NGC ID# 24YJ, CoinPlex ID# L\$M1847

- 4559 1849 — Improperly Cleaned — NGC Details. Unc.** A blanket of rich dove-gray and golden-brown toning reduces the impact of thick hairline patches on both sides. Evenly struck, and from a low business mintage of 62,600 pieces. NGC ID# 24YL, PCGS# 6936, CoinPlex ID# L\$M1849

1855 Seated Dollar, VF25
Attractive and Problem-Free

- 4560 1855 VF25 NGC.** A mere 26,000 pieces were produced, making the 1855 Seated dollar elusive regardless of condition. This gunmetal-gray example displays even wear overall, with the reverse retaining nice detail. As expected at this grade level there are contact marks, however they are minor. NGC ID# 24YU, PCGS# 6943, CoinPlex ID# L\$M1855

Elusive Mint State 1855 Seated Dollar
Deep Copper-Hued Patina

- 4561 1855 MS61 PCGS. CAC.** Deep copper hues compete against rim accents of olive-green on this Mint State 1855 Seated dollar. The mintage was a tiny 26,000 pieces for the date, yet the issue is even rarer than that number implies, as most were exported to the Orient and later melted. Mint State examples are elusive as such. This MS61 piece is one of three such as PCGS, which has seen 18 finer. The MS62 level is where most of the Mint State pieces reside at PCGS, although there are a handful in MS63 and MS64. A few scattered ticks and wispy scrapes are in concert with the grade, but this piece is quite sharply struck and offers bold eye appeal. PCGS# 6943, NGC ID# 24YU, CoinPlex ID# L\$M1855

- 4562 1857 AU53 NGC. CAC.** Although the mintage for the 1857 Seated Liberty dollar was 90,000 pieces, most of the coins were exported to China. As a result, the pieces are elusive today in all grades. Gold and gray patina covers both sides of this example. Despite a number of contact marks, this dollar retains nice eye appeal. Census: 3 in 53, 63 finer (12/12). NGC ID# 24YW, PCGS# 6945, CoinPlex ID# L\$M1857

Near-Gem 1857 Seated Dollar
High-End Survivor of 94,000-Piece Mintage

- 4563 1857 MS64 NGC.** Though the coinage reforms of 1853 adjusted the weights of minor silver coinage, the silver dollar was kept on at its old dimensions, removing any chance of the denomination being treated as a circulating coin instead of bullion to be melted at a profit. While only a relative handful of coins survive out of a mintage of 94,000 pieces, there are a handful of extraordinary examples such as this near-Gem. Though bluntly struck on peripheral elements such as the stars around Liberty and her visible foot, this coin has decent interior detail. Luster is pale silver with a light green-gold overtone, and while scattered marks affect each side, these are well within the bounds of the grade. NGC ID# 24YW, PCGS# 6945, CoinPlex ID# L\$M1857

- 4564 1860-O MS61 ANACS.** Areas of toning that include shades of blue-green, pink, golden-yellow, and fuchsia reveal themselves when this coin is viewed under magnification. Wispy hairlines appear in the right obverse field beneath the patina. NGC ID# 24Z3, PCGS# 6950, CoinPlex ID# L\$M18600

- 4565 1860-O MS62 PCGS.** This well-detailed MS62 Seated Liberty dollar displays satiny mint luster with traces of pale gold toning. A few scattered minor contact marks explain the grade. Housed in a green label holder. PCGS# 6950, NGC ID# 24Z3, CoinPlex ID# L\$M18600

1860-O Seated Dollar, MS63
Vibrant Luster, Darkly Toned Obverse

- 4566 1860-O MS63 PCGS.** Purportedly, a sealed Treasury bag of 1859-O and 1860-O Seated dollars was discovered in the early 1960s, and is the source for most remaining Uncirculated No Motto New Orleans dollars. However, those coins tended to be heavily bagmarked from decades of indifferent storage. The present crisply struck example is only lightly marked and exhibits vibrant cartwheel luster. The obverse is medium walnut-brown while the reverse displays a hint of chestnut patina. Population: 80 in 63 (1 in 63+), 37 finer (12/12). PCGS# 6950, NGC ID# 24Z3, CoinPlex ID# L\$M18600

Select Mint State 1860-O Dollar

- 4567 1860-O MS63 PCGS Secure.** This Select Mint State example displays light champagne toning, with splashes of golden-brown color appearing primarily on the reverse. As expected, there are contact marks however they pose minimal distraction. Population: 80 in 63 (1 in 63+), 37 finer (12/12). PCGS# 6950, NGC ID# 24Z3, CoinPlex ID# L\$M18600
- 4568 1861 — Improperly Cleaned — NGC Details. AU.** This low mintage Civil War silver dollar displays dusky blended gunmetal-gray and chestnut toning. Fully defined and with no evident actual wear, but both sides are thickly hairlined. NGC ID# 24Z4, PCGS# 6951, CoinPlex ID# L\$M1861
- 4569 1862 VF30 PCGS. CAC.** A muted, golden-orange patina covers both sides of this moderately worn, but faintly luminous, example of this Civil War Seated dollar date. The surfaces are lightly abraded as expected at this grade level, however there are no marks of significance. The 1862 Seated dollar has a notably low mintage of only 11,500 pieces. PCGS# 6952, NGC ID# 24Z5, CoinPlex ID# L\$M1862
- 4570 1867 XF45 PCGS.** From a low-mintage date, this Choice XF example displays slate-gray toning with shades of champagne. The surfaces are minimally abraded for the grade. PCGS# 6960, NGC ID# 24ZA, CoinPlex ID# L\$M1867

1870 Seated Liberty Dollar, MS61
Undesignated Prooflike Surfaces

- 4571 1870 MS61 PCGS Secure.** This lovely Seated Liberty dollar has mirrored fields with brilliant, untuned surfaces, save for light peripheral gold. The fields are lightly marked as expected for the grade. A delightful prooflike example, offering excellent field-to-device contrast with sharp design motifs. Population: 8 in 61, 65 finer (12/12). PCGS# 6963, NGC ID# 24ZD, CoinPlex ID# L\$M1870

- 4572 1870-CC — Obverse Scratched, Reverse Planchet Flaw — NGC Details. AU.** Variety 2-E. A lightly circulated, still-attractive example of this low-mintage date, despite the noted flaws. Collector prize this first-year Carson City issue in all grades and conditions. NGC ID# 24ZE, PCGS# 6964, CoinPlex ID# L\$M1870CC

1870-CC Dollar, AU Details
Deep, Variegated Toning

- 4573 1870-CC — Graffiti — PCGS Genuine. AU Details.** Variety 3-C. First year of issue from the Carson City mint; dollar mintage was limited to only 12,462 pieces. High-grade pieces are seldom encountered. This well-defined example displays deep reddish patina with blue interspersed. Cursive graffiti is light and located in the area of the mintmark, and is mostly concealed by the toning. PCGS# 6964, NGC ID# 24ZE, CoinPlex ID# L\$M1870CC
- 4574 1871 MS61 NGC.** This example remains bright and reflective overall, with splashes of sea-green and medium gray color scattered throughout. Numerous minor surface marks appear on both sides, resulting in the assigned grade. NGC ID# 24ZG, PCGS# 6966, CoinPlex ID# L\$M1871

Deeply Frosted Select 1871 Dollar

- 4575 1871 MS63 NGC.** Richly frosted surfaces on both sides create tremendous visual appeal for this Select piece. The eagle exhibits bold definition. Only a few scattered marks appear on each side. The 1871 is one of two Seated dollar issues with a mintage of more than 1 million pieces. Census: 37 in 63, 42 finer (11/12). NGC ID# 24ZG, PCGS# 6966, CoinPlex ID# L\$M1871

Elusive 1872-CC Seated Dollar Good 4, Clean Obverse

- 4576 1872-CC Good 4 PCGS.** With just 3,150 pieces struck, this Carson City Seated dollar issue is a challenge regardless of grade. Though extensively worn with numerous fine abrasions, this medium-gray example with a few deeper splashes has a bold date and mintmark as well as no evidence of rim merging. Ideal for the enthusiast who wants a lot of coin for this grade. PCGS# 6969, NGC ID# 24ZK, CoinPlex ID# L\$M1872CC

- 4577 1872-S — Scratches, Stained — NGC Details. AU.** This lightly circulated Seated Liberty dollar shows just a touch of wear on the well-detailed design elements and the surfaces have an unnatural champagne-gold and lavender-gray sheen. A few fine pinscratches in the obverse field accounts for the noted damage. NGC ID# 24ZL, PCGS# 6970, CoinPlex ID# L\$M1872S

1873-CC Seated Dollar, XF Details Key to the CC Seated Series

- 4578 1873-CC —Cleaning — Genuine PCGS. XF Details.** The 1873-CC is the scarcest of the four Carson City Seated dollars. Only 2,300 pieces were struck. This example shows even wear over the devices. The surfaces are bright from cleaning but have since toned over with a light golden tint. Numerous small abrasions are scattered about, plus a couple of medium-sized ones. PCGS# 6972, NGC ID# 24ZN, CoinPlex ID# L\$M1873CC

PROOF SEATED DOLLARS

1851 Restrike Silver Dollar Proof, AU Details

- 4579 1851 Restrike — Damage — PCGS Genuine. Proof, AU Details.** An example of coinage “by popular demand,” the restrike 1851 silver dollars were created to satisfy collectors’ thirst for examples and were created during two distinct time periods, the first collecting “boom” of the late 1850s and again in the late 1860s. While this example of the restrike is impaired, showing light rub and a gouge on one of Liberty’s legs that is the deepest among several contact marks on the obverse, the rarity of this coin is such that any example is worth owning. Light golden patina with apricot accents settles over still-gleaming fields. PCGS# 6993, NGC ID# 2524, CoinPlex ID# L\$P1851RES

1854 Proof Seated Dollar, AU Details
Unrecorded Obverse Die?

- 4580 1854 — Cleaning — PCGS Proof Genuine. AU Details** While each side displays hairlines from cleaning, thus the Genuine holder, the fields readily identify this as a proof. That being said, there is no trace of the usually seen diagnostic of the triangular remnant of a misplaced 4 northeast of the 5 in the date. Perhaps this is an unrecorded die pairing? Probably less than a couple of dozen proof 1854 dollars are believed known today. The surfaces are still mostly bright from cleaning with a slight accent of pale golden around the devices and margins. PCGS# 6997, NGC ID# 2528, CoinPlex ID# L\$P1854

Elusive Proof 1856 Seated Dollar
Strongly Toned PR62 Specimen

- 4581 1856 PR62 PCGS.** The exact mintage of proof Seated dollars for 1856 remains a topic of informed speculation, but it is beyond question that such coins are rare today regardless of condition. This PR62 survivor has much to offer the collector. Boldly impressed devices emerge from strongly reflective fields, both aspects draped in dappled gold and blue-green patina. Though a number of hairlines run through the fields and several contact marks are noted at the right obverse field and elsewhere, the overall eye appeal remains solid for the grade. Population: 5 in 62, 20 finer (12/12). PCGS# 6999, NGC ID# 252A, CoinPlex ID# L\$P1856

**Richly Toned Select Proof
1856 Seated Dollar**

4582 1856 PR63 PCGS. Owing to the uncertainty involved with mintages of pre-1858 U.S. proof coinage, scholars cannot settle on an original production figure for the proof Seated dollars of 1856. The rarity of surviving specimens, however, is indubitable. This Select proof is a colorful representative given over to broad gold-to-orange patina. Green and violet overtones are isolated on the obverse but more prominent across stretches of the reverse. Though lightly hairlined with a few contact marks, this glossy Select proof remains an important and readily collectible piece of earlier proof U.S. coinage history.

Ex: Milton A. Holmes (Stack's, 10/1960), lot 2289.

From The Teich Family Collection. PCGS# 6999, NGC ID# 252A, CoinPlex ID# L\$P1856

**1858 Seated Liberty Dollar, PR62
Classic Proof-Only Rarity**

4583 1858 PR62 PCGS. CAC. The 1858 Seated Liberty dollar was only struck in proof format, during the first year of the Philadelphia Mint's commercial proof set offerings. Only about 300 specimens were coined, making the coins scarce-to-rare in all grades. This attractive PR62 specimen displays sharply detailed design elements and deeply mirrored fields with a few hints of light gold toning. A few minor contact marks and hairlines do little to detract from the excellent eye appeal. Population: 25 in 62, 40 finer (11/12). *From The Teich Family Collection. PCGS# 7001, NGC ID# 252C, CoinPlex ID# L\$P1858*

**1859 Seated Dollar, Cameo PR64
Seldom-Seen Date, Impressively Contrasted**

4584 1859 PR64 Cameo PCGS. CAC. The official mintage of proof 1859 dollars may have been 800 pieces, but far fewer were actually distributed, with a net after melting being no more than 450 proofs. Because of the cameo contrast, this piece would appear to have been one of the first struck from a fresh pair of dies. Initially this impressive dollar appears brilliant, but there is actually a slight, even accent of reddish patina over each side. The fields and devices are strongly contrasted. The only contact marks we see are a small cluster just above the head of the eagle. Population: 7 in 64 Cameo, 5 finer (11/12).

From The Teich Family Collection. PCGS# 87002, CoinPlex ID# L\$P1859CA

Select Proof 1860 Seated Dollar
Elusive Issue

- 4585 1860 PR63 NGC.** A generous mintage of 1,330 proof Seated Liberty dollars was produced in 1860, however only 557 pieces were actually sold. The remaining examples were melted after the close of the year, making the issue much more elusive than the mintage would indicate. This Select Proof example displays attractive details and highly reflective surfaces. Census: 31 in 63, 106 finer (11/12). NGC ID# 252E, PCGS# 7003, CoinPlex ID# L\$P1860

1861 Seated Dollar, Toned PR63
Much Scarcer Than the Official Mintage

- 4586 1861 PR63 PCGS.** As in 1858 and 1859, proofs were struck in a quantity far in excess of the number actual needed by collectors at the time. The official mintage in this year was 1,000 pieces, but it is generally believed that no more than 350 coins were actually sold (the remainder were melted at year's end). The fields are remarkably deep on this coin. We say remarkably deep because the depth of toning is considerable on each side. Several layers of color are present, but the obverse primarily presents a reddish patina while the reverse is deep blue. A nice proof striking for the grade. Ex: Metropolitan Numismatic Convention Auction (Stack's, 5/1971), lot 541, flip included. From The Teich Family Collection. PCGS# 7004, NGC ID# 252F, CoinPlex ID# L\$P1861

1862 Seated Liberty Dollar, PR64 Cameo
Only One Finer Coin at PCGS

- 4587 1862 PR64 Cameo PCGS. CAC.** A small mintage of 550 proof Seated Liberty dollars was achieved in 1862, during the first full year of the Civil War. Sharply detailed Choice examples with bold cameo contrast are very rare. This delightful MS64 specimen offers deeply reflective fields and frosty devices, under light shades of champagne-gold toning. Exceptional eye appeal is evident on both sides, with minimal signs of contact. Population: 7 in 64 Cameo, 1 finer (11/12). Ex: Metropolitan New York Convention Sale (Stack's, 5/1971), lot 542, flip accompanies the lot. From The Teich Family Collection. PCGS# 87005, CoinPlex ID# L\$P1862CA

- 4588 1863 — Smoothed — PCGS Genuine. Proof, Unc. Details.** A fully struck Civil War proof Seated dollar. A scant 460 proofs were issued. The present specimen is slate-gray and lackluster with minutely granular fields. A collectible representative from the year of the key Gettysburg and Vicksburg battles. PCGS# 7006, NGC ID# 252H, CoinPlex ID# L\$P1863

Lovely PR62 1863 Dollar

- 4589 1863 PR62 PCGS.** This boldly struck example retains bold reflectivity and exhibits gold-tinted devices. Breaks appear in the gray patina that largely covers both sides. Small areas of attractive toning including shades of russet, bright blue, plum, and sea-green are scattered throughout. Liberty's hair and eye exhibit green color and her cap is also outlined. Population: 48 in 62, 97 finer (12/12). PCGS# 7006, NGC ID# 252H, CoinPlex ID# L\$P1863

**1863 Seated Dollar, PR65
Rare Civil War Era Proof**

- 4590 1863 PR65 NGC.** In the midst of the Civil War, the price of silver coins rose above face value and the Mint made it more difficult for collectors to acquire proofs with greenbacks. Despite this obstacle, however, Bowers concludes that numismatists in such northern cities as New York, Boston, and Philadelphia purchased many of the 460 proof Seated Dollars produced in 1863. Careful preservation of these specially minted coins was not a priority of these early collectors and today, Gem or better specimens are of the utmost rarity. Both sides of this well-cared-for representative display rich olive-gold and steel-violet patina which intermingles with flashes of blue-green iridescence. Its importance as a high grade survivor of this popular Civil War era silver issue cannot be overstated. Census: 13 in 65 (1 in 65+), 9 finer (12/12).
Ex: Baltimore Signature (Heritage, 7/2003), lot 8297. NGC ID# 252H, PCGS# 7006, CoinPlex ID# L\$P1863

Deeply Reflective PR62 1865 Seated Dollar

- 4591 1865 PR62 NGC.** Golden-orange, rose, and icy blue-green colors further enhance the eye appeal of this highly reflective piece. The beautifully struck, golden devices stand out boldly against the colorful fields. Only 500 proof Seated Liberty dollars were struck in 1865, the last year of the Civil War; however the survival rate is relatively high. NGC ID# 252K, PCGS# 7008, CoinPlex ID# L\$P1865

**1865 Seated Liberty Dollar
Select Proof Ultra Cameo Example**

- 4592 1865 PR63 Ultra Cameo NGC.** Only 500 proof Seated Liberty dollars were struck in 1865, and few examples are seen with the profound cameo contrast of this coin. The sharply detailed frosty devices seem to float on the deeply reflective fields. A few hints of pale gold toning add to the considerable eye appeal. Census: 2 in 63 Ultra Cameo, 20 finer (11/12). PCGS# 97008, CoinPlex ID# L\$P1865DC

1866 Motto Silver Dollar, PR64 Deep Cameo

- 4593 1866 Motto PR64 Deep Cameo PCGS.** The deeply frosted motifs are principally untoned, while the fields exhibit a pleasing lilac toning. The coin is well-struck and displays tremendous eye appeal. A window of brilliance appears near the left portion of the scroll. A scant 725 proofs were produced. Population: 1 in 64 Deep Cameo, 7 finer (11/12). PCGS# 97014, CoinPlex ID# L\$P1866MOTDC

**1867 Seated Dollar, PR62
Deeply Mirrored and Almost Brilliant**

- 4594 1867 PR62 PCGS.** Only 625 proofs were struck of the 1867 Seated dollar, and at least three die pairings are known. This is an almost brilliant example that shows just the faintest dabs of pale golden color on the obverse. Hairlines explain the PR62 grade, but are more than compensated for by the deep, mirrored flash in the fields and moderate contrast between the fields and devices.
From The Teich Family Collection. PCGS# 7015, NGC ID# 252N, CoinPlex ID# L\$P1867

Border-Toned PR62 1867 Seated Dollar

- 4595 1867 PR62 PCGS.** Boldly toned on the margins with narrow rings of intense blue and orange gracing the rims and nearby fields. Though this boldly impressed piece has a number of light hairlines through the fields, distinct contact marks are few. A noteworthy proof Seated dollar from late in the series. PCGS# 7015, NGC ID# 252N, CoinPlex ID# L\$P1867
- 4596 1869 — Cleaning — PCGS Genuine. Proof, Unc. Details.** This untuned specimen is well struck and exhibits blatant white-on-black contrast, but both sides are hairlined. Contact marks are minimal. A mere 600 proofs were struck. PCGS# 7017, NGC ID# 252R, CoinPlex ID# L\$P1869

Beautifully Toned PR65 1869 Dollar

- 4597 1869 PR65 NGC.** Richly toned on both sides, this lovely Gem exhibits an attractive appearance. Yellow-brown and gold colors predominate, however areas of iridescent bright blue-green, deep orange, russet, purple, and sea-green appear when the coin is rotated in the light. This piece retains brilliant surfaces. Census: 17 in 65, 15 finer (11/12). NGC ID# 252R, PCGS# 7017, CoinPlex ID# L\$P1869

PR64 Deep Cameo 1869 Dollar

- 4598 1869 PR64 Deep Cameo PCGS Secure.** The recorded proof mintage of 1869 Liberty Seated dollars is only 600 pieces, and today several hundred, including duplicates, are certified in all Mint State levels—although precious few of them are certified at either NGC or PCGS with Deep Cameo surfaces. In PR64 Deep Cameo this specimen is one of only five coins so graded at PCGS, with nine finer (12/12). Appreciable contrast between the frosted devices and boldly reflective fields combine to produce outstanding eye appeal for this near-Gem example. The piece displays an attractive light gold cast and is minimally abraded. PCGS# 97017, CoinPlex ID# L\$P1869DC

Bright 1870 Dollar, PR62 Cameo

- 4599 1870 PR62 Cameo NGC.** Despite the large production figure of 1,000 pieces, the 1870 proof Seated Liberty dollar is scarcer than some other dates of the period with smaller mintages. The present coin displays razor-sharp details on all design elements, with reflective fields that contrast dramatically with the frosty devices. The extreme outer edges display attractive toning that further enhances the eye appeal. Census: 10 in 62 Cameo, 58 finer (11/12). PCGS# 87018, CoinPlex ID# L\$P1870CA

**High-Grade Cameo 1870 Seated Dollar
Notable Near-Gem Proof**

- 4600 1870 PR64 Cameo PCGS.** A light golden overtone visits the rims, but the interiors remain essentially bright silver. Contrast is quality thanks to strong frost and mirrors, especially on the reverse. A few tiny contact marks clustered under the eagle's beak account for the grade. Population: 17 in 64 Cameo, 11 finer (12/12). PCGS# 87018, CoinPlex ID# L\$P1870CA

**1870 One Dollar, PR65 Cameo
Excellent Contrast**

- 4601 1870 PR65 Cameo NGC.** The 1870 proof dollar is scarcer than its mintage of 1,000 pieces might suggest. Most 1870 proof dollars were apparently distributed with minor and silver proof sets, and many unsold ones at the end of the year were melted.

Outstanding field-device contrast is seen on the present Gem Cameo offering. The only toning is a thin layer of golden-brown around the peripheries, and razor-sharp definition is apparent on the design elements. A series of insignificant marks in the field under the left (facing) wing are only mentioned because they might help identify the coin at some future date. Census: 22 in 65 Cameo, 6 finer (12/12).

From *The Richard P. Ariagno, M.D. Collection*. PCGS# 87018, CoinPlex ID# L\$P1870CA

- 4602 1871 PR58 PCGS. CAC.** Both sides of this near-Mint example display an attractive gray patina that includes subtle traces of gold. Hints of various shades of green appear at the peripheries, particularly on the reverse. This well-struck example exhibits no contact marks worthy of mention and has considerable eye appeal. PCGS# 7019, NGC ID# 252T, CoinPlex ID# L\$P1871

- 4603 1871 — Improperly Cleaned, Scratched — NGC Details. Proof.** Glossy and faintly hairlined with short scratches noted near star 3 and the eagle's branch. Light butter-gold toning is more prevalent on the reverse. One of only 960 proofs struck. NGC ID# 252T, PCGS# 7019, CoinPlex ID# L\$P1871

**1872 Seated Dollar, PR62
Well-Produced, Deeply Mirrored**

- 4604 1872 PR62 NGC. CAC.** This late-date Seated dollar had a mintage of 950 proofs, and it is often used as a With Motto type coin, not only because of its availability but also because it was well produced. This is a deeply mirrored example that is mostly brilliant over each side with a slight accent of golden around the margins. The strike is full throughout, and there are a few grade-limiting hairlines. NGC ID# 252U, PCGS# 7020, CoinPlex ID# L\$P1872

1873 Dollar, PR63 Cameo

- 4605 1873 PR63 Cameo PCGS.** The 1873 Liberty Seated dollar represents the last of its kind, as the heavier-weight Trade dollar, not intended for domestic U.S. circulation, would supersede the design in this year. A nominal 291,600 business strikes were produced along with a mere 600 proof pieces. This lovely example displays appreciable contrast between the fields and devices, with the fields exhibiting bold reflectivity although there is a slight haze. The coin displays a sharp strike, with some surface marks noted, including several as-made disturbances. Population: 15 in 63 Cameo, 26 finer (12/12). PCGS# 87021, CoinPlex ID# L\$P1873CA

TRADE DOLLARS

- 4606 1873 MS61 NGC.** The 1873 has the distinction of being the first of only five business strike Trade dollars from the Philadelphia Mint. With an original mintage of only 397,500 pieces and a high rate of export, this issue is scarce to rare in all Mint State grades. This example remains bright and retains areas of bold reflectivity. Orange and red toning appears at the dentils on portions of both sides. NGC ID# 252W, PCGS# 7031, CoinPlex ID# T\$M1873

- 4607 1874-S MS62 ANACS. Breen-5783.** Minute S, no period after FINE. Medium chestnut-gray toning visits this satiny Trade dollar. A good strike with minor blending on Liberty's hair and the eagle's right (facing) leg. Lightly abraded except for a small obverse rim nick at 10:30.

Ex: *Dallas Signature* (Heritage, 10/2008), lot 1131, which realized \$977.50. NGC ID# 2533, PCGS# 7036, CoinPlex ID# T\$M1874S

- 4608 1875 AU58 ANACS.** Type II reverse without berry under claw. Gold-orange patina appears at the borders of an otherwise medium-gray piece with generous remaining luster. A prominent die crack encircles the reverse. NGC ID# 2534, PCGS# 7037, CoinPlex ID# T\$M1875

- 4609 1875-CC AU58 PCGS.** Type One Reverse. This attractive near-Mint specimen shows just a touch of wear on the well-detailed design elements, while the lightly abraded surfaces show only a few minor contact marks. PCGS# 7038, NGC ID# 2535, CoinPlex ID# T\$M1875CC

**1875-CC Trade Dollar, MS63
Lustrous and Unmarked**

- 4610 1875-CC MS63 PCGS.** Type One Reverse. Medium butter-gold toning graces this lustrous and minimally abraded Carson City Trade dollar. The strike is crisp except for the usual incompleteness on the right (facing) leg. We note a granular reverse border between 5 and 9 o'clock, and the left obverse field also shows occasional granularity. PCGS# 7038, NGC ID# 2535, CoinPlex ID# T\$M1875CC

- 4611 1875-S MS63 PCGS.** Type One Reverse. Large S. Dusky golden-gray toning drapes this lustrous and unblemished representative. The strike is precise save the usual slight blending of detail on Liberty's hair and the eagle's right (facing) leg. The eye appeal is excellent for the grade.

Ex: Houston Signature (Heritage, 11/2007), lot 60770, which realized \$2,070. PCGS# 7039, NGC ID# 2536, CoinPlex ID# T\$M1875S

- 4612 1875-S MS63 PCGS.** Type One Reverse. Large S. A thoroughly lustrous Select Trade dollar. Essentially brilliant but a wisp of gold toning graces both sides. The reverse is well preserved while the obverse field exhibits moderate marks. PCGS# 7039, NGC ID# 2536, CoinPlex ID# T\$M1875S

- 4613 1875-S MS63 PCGS.** Type One Reverse. Large S. Golden-brown shades embrace this lustrous Select Trade dollar. A small strike-through near star 13 is mint-made. Delicate hairlines on the left obverse field and a few gray speckles near STATES are all that limit the grade. PCGS# 7039, NGC ID# 2536, CoinPlex ID# T\$M1875S

Near-Gem 1875-S Trade Dollar

- 4614 1875-S MS64 NGC.** Type Two Reverse. Large S. Dynamic cartwheel luster illuminates this essentially brilliant Choice type coin. Marks are virtually absent save for a single thin line near star 3. Well struck at the center with blending of detail noted on Liberty's hair and the eagle's right (facing) leg. NGC ID# 2536, PCGS# 7039, CoinPlex ID# T\$M1875S

**1875-S Trade Dollar, MS64
Well Preserved**

- 4615 1875-S MS64 PCGS. CAC.** Type One Reverse. Large S. Delicate chestnut toning visits the reverse field, but this lustrous and lightly abraded Trade dollar is close to brilliant. Well struck at the centers though portions of the borders are lightly brought up. Certified in an old green label holder. PCGS# 7039, NGC ID# 2536, CoinPlex ID# T\$M1875S

- 4616 1876-CC AU55 NGC.** Type One Obverse, Type Two Reverse, Tall CC. A stone-gray Carson City type coin that displays luminous luster about raised elements. One small strike-through (as coined) near the branch stem but abrasions are minimal. NGC ID# 253A, PCGS# 7042, CoinPlex ID# T\$M1876CC

- 4617 1876-S MS63 PCGS.** Type One Obverse and Reverse. Large S. Dappled autumn-gold toning adorns this lustrous silver type coin. Infrequent minute marks are of little import. The strike is sharp except on Liberty's hair.
From The Gensch Numismatic Trust Collection. PCGS# 7043, NGC ID# 253B, CoinPlex ID# T\$M1876S

**MS62 1877-CC Trade Dollar
Strong Luster**

- 4618 1877-CC MS62 PCGS.** The last Carson City Trade dollar issue to escape mass melting — at least in the United States. Light gold-to-peach patina settles over the left sides of the frosty surfaces. Great detail, though a number of wispy abrasions in the fields are grade-defining. Population: 29 in 62, 39 finer (12/12). PCGS# 7045, NGC ID# 253D, CoinPlex ID# T\$M1877CC

**1877-S Trade Dollar, MS64
Lustrous, Well-Preserved Surfaces**

- 4619 1877-S MS64 PCGS.** Large S. The pleasing surfaces of this charming Choice example are lustrous and well-preserved and the design elements are sharply detailed throughout. Dusky golden-brown toning enhances the considerable eye appeal. PCGS has graded 32 numerically finer specimens (12/12). PCGS# 7046, NGC ID# 253E, CoinPlex ID# T\$M1877S

**White Gem 1877-S Trade Dollar
FS-802, Die Doubled Reverse**

- 4620 1877-S MS65 PCGS Secure. CAC. FS-802.** Large S. The reverse is lightly die doubled, most prominently on TRADE and 420. The variety is undesignated on the PCGS insert. A wisp of gold patina visits this highly lustrous Gem. The strike is full, unusual for the series, with crisp definition on the eagle's legs and Liberty's hair. A few delicate obverse field marks are noted, mostly near the branch stem, but the reverse is virtually immaculate. Though the 1877-S has the highest mintage of the series, examples of the present extraordinary quality are subject to strong demand from type set collectors. Population: 25 in 65, 7 finer (11/12). PCGS# 7046, NGC ID# 253E, CoinPlex ID# T\$M1877S

PROOF TRADE DOLLARS

1873 Trade Dollar, Attractively Toned PR62

- 4621 1873 PR62 PCGS.** The production of proof 1873 Trade dollars is generally acknowledged as 865 pieces, but that number has been disputed over the years. What is certain, however, is this date is seldom located in high grades. The fields on this piece are deeply mirrored and flash strongly through the rose and gray patina seen over each side.
Ex: Samuel Wolfson, Part II (Stack's, 5/1963), lot 1516, flip accompanies.
From The Teich Family Collection. PCGS# 7053, NGC ID# 27YJ, CoinPlex ID# T\$P1873

**1873 Trade Dollar, PR63 Cameo
Important First-Year Issue**

- 4622 1873 PR63 Cameo PCGS.** From a first-year mintage of 865 pieces, the 1873 proof Trade dollar is seldom encountered with the bold cameo contrast of the present coin. This impressive Select example offers deeply reflective fields and sharply struck frosty design elements, with irregular areas of gold and blue toning. Population: 15 in 63 Cameo, 8 finer (12/12). PCGS# 87053, CoinPlex ID# T\$P1873CA
- 4623 1874 PR62 PCGS.** Frosty motifs contrast with the glassy fields, but undesignated as Cameo because of the 1990s-vintage green label holder. Brilliant and well struck. A scant 700 proofs were issued. PCGS# 7054, NGC ID# 27YK, CoinPlex ID# T\$P1874

**1874 Trade Dollar, Cameo Near-Gem
High-End Proof, Essentially Problem-Free**

- 4624 1874 PR64 Cameo NGC.** This early proof striking is impressively cameoed, with heavily frosted central devices that are surrounded by deep violet-brown toning. Hairlines are minimal and contact marks seem nonexistent. A visually compelling near-Gem. Census: 36 in 64 (4 in 64+) Cameo, 22 finer (12/12).
Ex: Long Beach Signature (Heritage, 6/2006), lot 2117. PCGS# 87054, CoinPlex ID# T\$P1874CA

**1874 Trade Dollar, PR64+ Cameo
Darkly Toned Specimen**

- 4625 1874 PR64+ Cameo NGC.** Intermingled shades of golden-brown, gray, and cobalt-blue patina enliven the surfaces of this high-end Choice example. The design elements are sharply detailed throughout and the brightly mirrored fields contrast boldly with the frosty devices. Census: 36 in 64 (4 in 64+) Cameo, 22 finer (12/12). PCGS# 87054, CoinPlex ID# T\$P1874CA

Richly Toned Select Proof 1875 Trade Dollar

- 4626 1875 PR63 PCGS.** Type Two Reverse. Proofs are approximately evenly divided between the two different reverses, distinguished by the presence or absence of a berry beneath the right (facing) claw. A razor-sharp strike and consistent field reflectivity confirm the proof status of this scarcer date Trade dollar. Dusky forest-green and steel-gray toning blanket the dappled but unmarked surfaces. A scant 700 proofs were issued. PCGS# 7055, NGC ID# 27YL, CoinPlex ID# T\$P1875

1875 Trade Dollar, Nicely Toned PR64

- 4627 1875 PR64 PCGS.** Type Two Reverse. Each side displays attractive purple centers with occasional spotty areas of brilliance, and the margins are encircled by deep blue patina. The fields are deeply reflective and when held at a certain angle one can make out frosted contrast. Type Two proof Trade dollars are usually found with weak details on the head of Liberty. Not so on this coin. The head of Liberty is fully defined, with the only areas of softness on the stars on the right side of the obverse.
Ex: Philip G. Straus Collection (Stack's, 5/1959), lot 2190, flip included.
From The Teich Family Collection. PCGS# 7055, NGC ID# 27YL, CoinPlex ID# T\$P1875

**1875 Trade Dollar, PR65+ Cameo
Strong Contrast**

- 4628 1875 PR65+ Cameo PCGS. CAC.** Type Two Reverse. The scarcity of Uncirculated business strike 1875 Trade dollars places added emphasis on surviving proofs. Thickly frosted motifs rise above the brilliant and satiny fields. This is a sharply struck example aside from the lower left corner of Liberty's base. Liberty's head and the adjacent stars, often weakly struck, are well impressed. Both sides are essentially untuned and devoid of mentionable contact marks. A high grade Gem of this scarce proof issue. Population: 3 in 65 (1 in 65+) Cameo, 2 finer (12/12). PCGS# 87055, CoinPlex ID# T\$P1875CA

- 4629 1876 — Altered Surface — Genuine PCGS. Proof, Unc. Details.** Type One Obverse and Reverse. This brilliant proof Trade dollar is well struck aside from the eagle's right (facing) leg. Overdipped and moderately hairlined with a few minor obverse contact marks. Nonetheless desirable for its sharpness and scarcity as a proof type. PCGS# 7056, NGC ID# 27YM, CoinPlex ID# T\$P1876

- 4630 1876 PR61 Cameo NGC.** Type One Obverse, Type Two Reverse. Ice-white motifs and legends provide pleasing contrast with the darkly mirrored fields. The strike is full except on the eagle's right (facing) claw. This brilliant proof Trade dollar has light field hairlines but the eye appeal is exceptional. PCGS# 87056, CoinPlex ID# T\$P1876CA

**Moderately Toned PR64 Cameo
Centennial-Year 1876 Trade Dollar**

- 4631 1876 PR64 Cameo PCGS.** Type One Obverse. Type Two Reverse. At 1,150 pieces struck for the centennial year, the 1876 Trade dollar has the highest proof mintage of any issue with an accompanying business strike, though the 1879 and 1880 dates have higher proof-only output. This Cameo PR64 coin is ideal for the type enthusiast who doesn't mind toning. Champagne and denim-blue overtones drape the obverse, while the former hue richens to peach-gold as it enriches most of the reverse. Great frost on the devices. Population: 10 in 64 Cameo, 8 finer (12/12). PCGS# 87056, CoinPlex ID# T\$P1876CA

**Deep Cameo Choice Proof
1876 Trade Dollar**

- 4632 1876 PR64 Deep Cameo PCGS.** Type One Obverse, Type Two Reverse. Deep cameo proof Trade dollars from our Centennial year are rarities. This intricately struck near-Gem provides luminous devices and glassy mirrored fields. The margins display light apricot-gold toning but the remainder of the coin is brilliant. Population: 3 in 64 Deep Cameo, 0 finer (11/12). PCGS# 97056, CoinPlex ID# T\$P1876DC

1878 Trade Dollar, Toned PR63

- 4633 1878 PR63 NGC. CAC.** The Philadelphia Mint only struck Trade dollars in proof format in 1878, starting a trend that would continue until the denomination was retired. This well-detailed Select specimen displays deeply reflective fields under layers of bluish-gray and champagne-gold toning. A few minor hairlines in the fields do little to detract from the generally high appeal. NGC ID# 27YR, PCGS# 7058, CoinPlex ID# T\$P1878

**1878 Trade Dollar, PR62 Cameo
First Proof-Only Issue**

- 4634 1878 PR62 Cameo NGC.** The Philadelphia Mint began production of Morgan dollars in 1878, marking the beginning of the end for the Trade dollar series. From 1878 to 1883, the Pennsylvania coinage facility only minted proof Trade dollars in small quantities. Today, those coins are highly collectible and an important part of late 19th century numismatic history. This impressive Cameo proof is mostly brilliant with hints of peripheral gold toning and exceptional contrast between the fields and devices. PCGS# 87058, CoinPlex ID# T\$P1878CA

- 4635 1879 PR62 NGC.** A coin with tremendous eye appeal, this untuned example remains bright. The contrast is evident and the devices display a sharp strike overall, with minor incompleteness at the usual locations. Surface marks appear, primarily on the reverse under the eagle's wings. NGC ID# 27YR, PCGS# 7059, CoinPlex ID# T\$P1879

- 4636 1879 PR62 PCGS.** Trade dollars were only produced in proof format in 1879, with a mintage of 1,541 pieces. This fully mirrored example displays light silver-gray surfaces that include subtle gold toning on each side. Faint hairlines and contact marks prevent a higher grade. PCGS# 7059, NGC ID# 27YR, CoinPlex ID# T\$P1879

Colorful PR63 1879 Trade Dollar

- 4637 1879 PR63 NGC.** The deeply toned surfaces display apple-green, plum-red, and iridescent teal when the piece is rotated beneath a light. This proof-only Trade dollar exhibits an intricate strike. The waves in the background on the obverse represent the Pacific Ocean, as these coins were specifically intended for use in the Asian market. NGC ID# 27YR, PCGS# 7059, CoinPlex ID# T\$P1879

1879 Deeply Toned Gem Proof Trade Dollar

- 4638 1879 PR65 PCGS.** The 1879 was the first year Trade dollars were only struck in Philadelphia and only struck in proof format. There were 1,541 proofs recorded as struck, a considerable number for the era. Much of the demand for Trade dollars came from speculators in 1879 and continued into 1880, as reported in Mason's April 1880 issue of his *Bi-Monthly Numismatic Visitor*. This is a beautifully toned proof with multiple shadings of purple, blue, and magenta, all of which are backlit by the flash from the mirrored fields. Fully struck.
Ex: Frank H. Chase Collection, et al (Stack's, 12/1958), lot 585, flip included.
From The Teich Family Collection. PCGS# 7059, NGC ID# 27YR, CoinPlex ID# T\$P1879

1879 Trade Dollar, PR65 Gold CAC Sticker

- 4639 1879 PR65 PCGS. Gold CAC.** Housed in a green-label PCGS holder, this remarkable Gem proof has clear and obvious Cameo contrast with delicate peripheral gold and lilac toning, the entire presentation receiving the approval of CAC, with a gold sticker awarded to this Gem. Population: 35 in 65, 27 finer (12/12). PCGS# 7059, NGC ID# 27YR, CoinPlex ID# T\$P1879
-
- 4640 1880 PR60 PCGS.** The slate-gray and almond-gold surfaces display wispy hairlines. Only 1,987 pieces were struck in this late proof-only date. PCGS# 7060, NGC ID# 27YS, CoinPlex ID# T\$P1880
- 4641 1880 PR62 PCGS.** Subtle gold highlights appear on the eagle, creating an attractive look. A mottled gray patina envelops both sides of this lovely well-detailed PR62 specimen. The 1880 Trade dollar was only produced in proof format. PCGS# 7060, NGC ID# 27YS, CoinPlex ID# T\$P1880

1880 Trade Dollar, PR64 Cameo Fully Struck, Much Brilliance on Each Side

- 4642 1880 PR64 Cameo PCGS.** The mintage of the 1880 Trade dollar was impressively high, and this year was also the high point of speculation in Trade dollars. Each side is mostly brilliant with slight peripheral color present. The fields are predictably deep in their mirrored reflectivity and the devices are noticeably frosted. The strike is full throughout. PCGS# 87060, CoinPlex ID# T\$P1880CA

Gorgeous Gem Cameo Proof 1880 Trade Dollar

- 4643 1880 PR65 Cameo PCGS.** A stunning example, this Gem displays attractive frosted devices and blindingly bright fields. Areas of toning appear at the dentils, with vibrant hues of iridescent teal, lilac, and golden-brown scattered throughout on the obverse. Iridescent deep gold along with champagne are the predominant colors on the reverse, although splashes of teal appear along portions of the bottom rim. Very few contact marks of any type are visible. Population: 21 in 65 Cameo, 14 finer (11/12). PCGS# 87060, CoinPlex ID# T\$P1880CA

**1880 Trade Dollar, PR66 Cameo
Difficult in This Grade and Finish**

4644 1880 PR66 Cameo NGC. Many examples of the 1880 Trade dollar, from a mintage of 1,987 pieces (the highest for proof Trade dollars), are still available today. Cameos are more difficult to locate, however, especially in Gem and finer condition.

The mirrored fields of this Premium Gem highlight the satiny motifs. The design elements are generally well impressed, except for the typical weakness in the hair on Liberty's head and on some of the stars. No major abrasions are evident, but magnification brings out what appear to be numerous tiny planchet flakes in the fields, especially on the obverse. Census: 66 in 36 Cameo, 19 finer (12/12). PCGS# 87060, CoinPlex ID# T\$P1880CA

1881 Trade Dollar, PR64

4645 1881 PR64 PCGS. A sharply detailed Choice Trade dollar, from a proof-only mintage of just 960 pieces, this delightful specimen is darkly toned in shades of cobalt-blue and champagne-gold, over deeply reflective fields. The surfaces show only a few minor hairlines and contact marks. Population: 98 in 64, 49 finer (12/12). PCGS# 7061, NGC ID# 27YT, CoinPlex ID# T\$P1881

**1881 Trade Dollar, PR64 Cameo
Popular Proof-Only Issue**

4646 1881 PR64 Cameo PCGS. The 1878 through 1883 Trade dollars, along with the ultra rare 1884 and 1885 Trade dollars, are proof-only issues that are ideal for type collectors. This amazing near-Gem has fully mirrored fields around frosty devices, with delicate iridescent toning on each side. Population: 29 in 64 (2 in 64+) Cameo, 34 finer (12/12). PCGS# 87061, CoinPlex ID# T\$P1881CA

**1881 Trade Dollar, PR64+ Cameo
Popular Proof-Only issue**

4647 1881 PR64+ Cameo PCGS. CAC. The 1881 is a collector-favorite. It is a proof-only issue and was limited to only 1,987 pieces. This upper-end PR64 represents especially good value for the collector as it has almost all the attributes and eye appeal of a Gem at a substantial savings. The fields are deeply reflective and each side has rose centers that are surrounded by light blue margins. The devices are noticeably frosted and present strong contrast against the deeply mirrored fields. Population: 29 in 64 (2 in 64+) Cameo, 34 finer (11/12). PCGS# 87061, CoinPlex ID# T\$P1881CA

4648 1882 PR62 NGC. Struck toward the end of the Trade dollar series, the 1882 was another proof-only date. In this case, only 1,097 pieces were struck. Attractive contrast is present between the fields and the devices. A slightly hazy patina covers the majority of both sides, however the reflectivity remains strong. The devices display a golden-brown cast. NGC ID# 27YU, PCGS# 7062, CoinPlex ID# T\$P1882

Select Proof 1882 Trade Dollar
Unacknowledged Cameo Effect

- 4649 1882 PR63 PCGS. Both sides of this lightly toned Select proof show considerable contrast, though no Cameo designation is forthcoming from the simple insert housed in a first-generation holder. Apricot hues cover the reverse and left-center obverse, while the right obverse shows a distinct lavender-violet hue. PCGS# 7062, NGC ID# 27YU, CoinPlex ID# T\$P1882

Gem Proof 1882 Trade Dollar
Bold Jewel-Tones

- 4650 1882 PR65 PCGS. Suitably enough for a "Gem" of a Trade dollar, this PR65 specimen from a proof-only issue has deep and gorgeous sapphire and amethyst patina over most of the obverse. The dusky citrine "heart" on that side blossoms on the reverse, relegating the cooler tones to the margins. Exquisitely preserved. Population: 37 in 65, 24 finer (12/12). PCGS# 7062, NGC ID# 27YU, CoinPlex ID# T\$P1882

1882 Trade Dollar, PR65
Vivid Multicolor Toning

- 4651 1882 PR65 NGC. CAC. The 1882 Trade dollar was a proof-only issue, with a substantial mintage of 1,097 pieces. This impressive Gem features well-detailed design elements and deeply mirrored fields, darkly patinated in shades of champagne-gold and cerulean-blue. Census: 63 in 65, 36 finer (12/12). NGC ID# 27YU, PCGS# 7062, CoinPlex ID# T\$P1882

1882 Trade Dollar, PR65 Deep Cameo
Fully Struck

- 4652 1882 PR65 Deep Cameo PCGS. The 1882 Trade dollar was a proof-only issue with a mintage of just 1,097 pieces. Examples are readily available today, even in Cameo, and are very popular due to the overall low mintage figure. Deep Cameos are much more difficult to locate. Many 1882 Trade dollars are poorly struck, perhaps from what Walter Breen suggests may have resulted from a deteriorating hub used to produce the die.

This Gem Deep Cameo yields white-on-black contrast when the coin is viewed from directly above. The design elements are fully struck, an unusual trait already mentioned above. Both sides are untuned and essentially devoid of mentionable marks. This is a very nice piece for the numerical grade. Population: 13 in 65 (1 in 65+) Deep Cameo, 7 finer (12/12).

From The Richard P. Ariagno, M.D. Collection. PCGS# 97062, CoinPlex ID# T\$P1882DC

**Premium Gem Proof 1883 Trade Dollar
Multicolored Patina**

- 4653 1883 PR66 PCGS.** The 1883 Trade dollar was the last regularly issued issue of the series, as the 1884 and 1885 dates were clandestinely made in extremely limited quantities. Of the 979 specimens struck, few survivors can match the atmospheric eye appeal of this Premium Gem. Rich yet translucent patina, an intriguing mix of peach, violet, and blue hues, saturates each side while leaving a few areas of pale gray to represent the “base” color of the coin. A touch of striking softness on the right-side stars is utterly trivial next to the all-around preservation and eye appeal. Population: 14 in 66, 3 finer (11/12).
From The Teich Family Collection. PCGS# 7063, NGC ID# 27YV, CoinPlex ID# T\$P1883
-

**1883 Trade Dollar, PR64 Cameo
Highly Attractive on All Fronts**

- 4654 1883 PR64 Cameo PCGS.** After the earlier excitement from speculation in Trade dollars died down and it became apparent the end of even the proof series was imminent, only 979 pieces were struck in 1883 (all proofs, of course). This is a wonderfully attractive example, made so by a combination of nearly brilliant centers, strong cameo contrast, clean surfaces, and light golden-violet marginal toning. Fully struck in all areas.
From The Teich Family Collection. PCGS# 87063, CoinPlex ID# T\$P1883CA
-

PROOF SETS

Lovely 1910 Proof Set PR63 to PR66

4655 1910 Proof Set PR63 to PR66 NGC. The set includes: **Cent PR63 Brown**, Olive and ebony with splashes of orange mint color; **Nickel PR63**, Subdued light gray proof surfaces with a few dark spots on the reverse; **Dime PR64**, A lovely original Choice proof with blue and iridescent toning; **Quarter PR63 Cameo**, Mostly brilliant white with peripheral iridescence; **Half Dollar PR66**, A brilliant Premium Gem proof with mostly untuned silver surfaces showing light gold near the reverse border. (Total: 5 coins)

Impressive 1914 Proof Set PR64 to PR66

4656 1914 Proof Set PR64 to PR66 NGC. The set includes: **Cent PR66 Brown**, Stunning blue and violet toning; **Nickel PR66**, Brilliant light gray with splashes of blue and pastel yellow; **Dime PR64**, Bright silver with iridescent toning on the obverse, entirely toned on the reverse; **Quarter PR64**, Gold, heather, and gunmetal-blue toning; **Half Dollar PR65**, A borderline Cameo with delicate gold toning over silver brilliance. (Total: 5 coins)

1916 Proof Set PR63 Brown and PR66

4657 1916 Proof Set PR63 to PR66 NGC. The set includes: **Cent PR63 Brown**, A pleasing matte proof Lincoln cent with subdued orange mint color under cerulean-blue toning; **Nickel PR66**, A stunning matte proof nickel with brilliant light gray surfaces and splashes of gold toning on the reverse. (Total: 2 coins)

MERCURY DIMES

- 4658 1916-D — Improperly Cleaned — NGC Details. VF.** A majority of the fasces lines are present and the wing shows plumage detail. Only faintly hairlined. Lavender, ocean-blue, and straw-gold toning is deepest near the rims. A couple of hair-thin marks are near the I in LIBERTY.
From The J.D. Tanner Collection. NGC ID# 23GY, PCGS# 4906, CoinPlex ID# MRD1916D

- 4659 1916-D — Damaged — ANACS. VF20 Details.** Careful examination reveals faint scrapes on the lower half of the fasces and near the reverse rim at 8 o'clock, possibly made by a mechanical coin counter. All legends are sharp and the fasces lines are mostly separated. Toned rich olive-brown. NGC ID# 23GY, PCGS# 4906, CoinPlex ID# MRD1916D

Choice VF 1916-D Dime Rarest Regular Issue of Type

- 4660 1916-D VF35 PCGS. CAC.** This piece exhibits moderate rub over the high points and each side displays a rose-gray patina. Most of the fasces lines remain clear and there are no contact marks worthy of mention. Today, all collectors know the rarity of the 1916-D dime, but the issue was seldom set aside until long after its release, given that most survivors are in Fair to VG grades. PCGS# 4906, NGC ID# 23GY, CoinPlex ID# MRD1916D

XF Sharpness 1916-D Dime

- 4661 1916-D — Improperly Cleaned — NCS. XF Details.** The wing and fasces show moderate wear, but this key date dime displays luster across the borders and motifs. The stone-gray surfaces are only mildly subdued. Most survivors of this introductory low mintage issue are in VG or lesser grade, and examples with partial mint luster are insufficient in quantity to meet collector demand. NGC ID# 23GY, PCGS# 4906, CoinPlex ID# MRD1916D

XF Sharpness 1916-D Dime

- 4662 1916-D — Improperly Cleaned — NGC Details. XF.** Most 1916-D dimes exhibit heavy wear, but the current lot displays luster remnants and has only moderate wear on the cap and fasces. The untoned surfaces are slightly bright from cleaning but otherwise show only a few small ticks. First year Mercury dimes were saved as souvenirs but most such pieces were from Philadelphia or San Francisco. NGC ID# 23GY, PCGS# 4906, CoinPlex ID# MRD1916D

1916-D Dime, AU Details Famous Key Mercury Dime

- 4663 1916-D — Scratches — NGC Details. AU.** The 1916-D is the famous key date in the Mercury dime series. Most 20th century coinage series have their famous issues, such as the S VDB Lincoln cent, the Three-Legged Buffalo, and the 11-D quarter eagle. That issue is the 16-D in the Mercury dime series, a key issue so famous that collectors will understand the meaning of "16-D" with no other explanation. Both sides of this lustrous light silver example have myriad scratches while still retaining good eye appeal. NGC ID# 23GY, PCGS# 4906, CoinPlex ID# MRD1916D

- 4664 1916-S MS66 Full Bands PCGS. Ex: Dan Miller.** Dappled honey-gold and stone-gray toning enriches this lustrous and sharply struck Premium Gem. A pristine example pedigreed to a well known early Registry Set of the popular series.
Ex: Dan Miller Collection (Heritage, 3/2000), lot 4199, which realized \$1,250. PCGS# 4909, NGC ID# 23GZ, CoinPlex ID# MRD1916SFB

**1916-S Mercury Dime, MS67 Full Bands
Tied for Finest Certified**

4665 1916-S MS67 Full Bands PCGS. CAC. An exquisite Superb Gem, this full strike exhibits gorgeous rainbow toning in concentric rings on the obverse, with pastel iridescence on the reverse, all over satin luster. Minor clash marks are noted on both sides, along with a few trivial marks only visible with a glass. The eye appeal is amazing. Population: 19 in 67 Full Bands, 0 finer (11/12). PCGS# 4909, NGC ID# 23GZ, CoinPlex ID# MRD1916SFB

4666 1918-S MS64 Full Bands NGC. A condition and strike rarity that is rarely seen finer, this piece exhibits brilliant and frosty silver surfaces with no toning on either side. Census: 28 in 64 Full Bands, 11 finer (12/12). NGC ID# 23H7, PCGS# 4921, CoinPlex ID# MRD1918SFB

4667 1919 MS66 Full Bands PCGS. Remarkably scarce in this superior condition, this bright, brilliant Premium Gem displays a rich satiny sheen and impressively preserved surfaces. The design elements display a crisp strike throughout and the central reverse bands are fully split. Population: 63 in 66 (3 in 66+) Full Bands, 10 finer (12/12). Ex: FUN Signature (Heritage, 1/2007), lot 2708, which realized \$1,840. PCGS# 4923, NGC ID# 23H8, CoinPlex ID# MRD1919FB

4668 1919-D MS62 Full Bands NGC. This well-struck piece has a pleasing appearance. Subtle champagne-rose toning appears on both sides. A small die crack runs between the I and C in AMERICA. The obverse displays a freckle near 12 o'clock. NGC ID# 23H9, PCGS# 4925, CoinPlex ID# MRD1919DFB

**Choice 1919-D Mercury Dime
Better Date With Full Bands**

4669 1919-D MS64 Full Bands PCGS. From a smallish mintage of 9.9 million pieces, the 1919-D Mercury dime is a better date in the early series. The present coin is a sharply detailed Choice example, with Full Bands definition and vibrant mint luster. The pleasing surfaces display attractive gold and ice-blue toning. Population: 76 in 64 (2 in 64+) Full Bands, 18 finer (11/12). PCGS# 4925, NGC ID# 23H9, CoinPlex ID# MRD1919DFB

4670 1919-S MS63 Full Bands PCGS. This coin is extremely lustrous for the MS63 grade and displays silver-gray surfaces and a bold strike that fully separates the central crossbands on the reverse. Obverse scratches, including several on Liberty's neck and one near the L in LIBERTY limit the grade. PCGS# 4927, NGC ID# 23HA, CoinPlex ID# MRD1919SFB

**1920 Mercury Dime, MS67 Full Bands
Tied for Finest at PCGS**

4671 1920 MS67 Full Bands PCGS. CAC. A lovely Superb Gem Mercury dime with a bold strike, this 1920 is tied for the finest that PCGS has certified. Both sides are brilliant and highly lustrous with delicate champagne toning over the surfaces. Population: 15 in 67 Full Bands, 0 finer (12/12). PCGS# 4929, NGC ID# 23HB, CoinPlex ID# MRD1920FB

4672 1920-S MS64 Full Bands PCGS. Ex: Scheppman Collection. Delicate gold and cream patina drapes the strongly lustrous surfaces of this crisply struck near-Gem. Beneath the toning lies a pleasingly preserved and lovely survivor from this challenging San Francisco issue. PCGS# 4933, NGC ID# 23HD, CoinPlex ID# MRD1920SFB

4673 1920-S MS64 Full Bands PCGS. CAC. The obverse of this near-Gem displays colorful highlights that include shades of deep golden-orange, red, and deep mint-green. Golden-yellow hues occupy the fields to the left of the fasces, with tiny specks of pink and mint green appearing at the outer edges. Population: 98 in 64 Full Bands, 35 finer (11/12). PCGS# 4933, NGC ID# 23HD, CoinPlex ID# MRD1920SFB

**1920-S Ten Cent, MS65 Full Bands
Above-Average Strike**

4674 1920-S MS65 Full Bands PCGS. Satiny luster and essentially brilliant with some faint blushes of gold. A very scarce issue in MS65 grade, and all the more desirable with full bands. Walter Breen notes in his *Encyclopedia* that Uncirculated specimens are often weakly struck; the presently offered example is a happy exception to that rule of thumb. We expect many generous bids when this beauty crosses the auction block. Population: 25 in 65 (1 in 65+) Full Bands, 10 finer (12/12). PCGS# 4933, NGC ID# 23HD, CoinPlex ID# MRD1920SFB

- 4675 1921 MS62 Full Bands NGC.** Hints of champagne, pale-blue, and pink color are present on this solidly struck example displaying lustrous surfaces. Light, scattered abrasions held this piece from a higher grade although the eye appeal is better than the numeric designation might suggest. NGC ID# 23HE, PCGS# 4935, CoinPlex ID# MRD1921FB

**1921-D Dime, MS65
Important Series Key**

- 4676 1921-D MS65 PCGS. CAC.** The horizontal bands at the center of the reverse are partially split on this Gem. A brilliant example with sharp design definition, this piece exhibits delicate heather and gold toning, primarily at the lower obverse rim. Population: 14 in 65, 12 finer (12/12). PCGS# 4936, NGC ID# 23HE, CoinPlex ID# MRD1921D

- 4677 1923-S MS64 Full Bands PCGS.** Although the 1923-S Mercury dime is known for its weak strike and examples with Full Bands are quite elusive there are exceptions, including this pleasing example. This near-Gem displays sharp details, vibrant mint luster, and wisps of gold and ice-blue toning. Population: 68 in 64 (1 in 64+) Full Bands, 39 finer (12/12). PCGS# 4941, NGC ID# 23HH, CoinPlex ID# MRD1923SFB

- 4678 1924-D MS66 Full Bands PCGS.** Housed in a green label holder, this lustrous high grade better date dime displays dappled gunmetal-gray and caramel-gold toning. Pristine save for two hair-thin lines on the cheek. Population: 36 in 66 Full Bands, 9 finer (11/12). PCGS# 4945, NGC ID# 23HK, CoinPlex ID# MRD1924DFB

- 4679 1925 MS66 Full Bands PCGS.** Brilliant shimmering surfaces with a hint of gold and a bold strike combine to provide this piece with exceptional eye appeal. A couple of minor surface marks appear on the obverse. Population: 55 in 66 (3 in 66+) Full Bands, 26 finer (12/12). PCGS# 4949, NGC ID# 23HM, CoinPlex ID# MRD1925FB

- 4680 1925-D MS64 Full Bands PCGS.** The 1925-D Mercury dime is a challenging issue in high grade because the strike is weak on most examples seen. This specimen displays an incomplete strike on the hair and the upper portions of UNITED STATES and ONE. The obverse displays a luminous luster. PCGS# 4951, NGC ID# 23HN, CoinPlex ID# MRD1925DFB

- 4681 1925-S MS64 Full Bands PCGS.** Subtle splashes of golden-brown and russet toning appear on both sides of this bright near-Gem. The coin exhibits strong detail and displays attractive luster. Contact marks on the obverse held this example from a higher grade. PCGS# 4953, NGC ID# 23HP, CoinPlex ID# MRD1925SFB

- 4682 1925-S MS64 Full Bands PCGS. CAC.** An attractive and more affordable version of this well-known strike rarity, this near-Gem is brilliant and displays dazzling mint luster. The price for these coins escalates significantly at the Gem level. A few minor, light abrasions appear. PCGS# 4953, NGC ID# 23HP, CoinPlex ID# MRD1925SFB

Gem Full Bands 1925-S Dime

Ex: Dan Miller

- 4683 1925-S MS65 Full Bands PCGS.** Ex: Dan Miller. The 1925-S is known as one of the worst produced of all Mercury dimes. However, when found in high grade, the only real concern is "fadeaway" on the peripheral lettering. Other than that characteristic (which may or may not be perceived as a deficiency by a collector), this is a lovely coin. The surfaces are bright and highly lustrous, the central crossbands are strongly brought up, and there are no obvious marks on either side. Population: 69 in 65 (1 in 65+) Full Bands, 19 finer (12/12).

Ex: Dan Miller Collection (Heritage, 3/2000), lot 4221; St. Louis Central States (Heritage, 5/2007), lot 2829, which realized \$4,025. PCGS# 4953, NGC ID# 23HP, CoinPlex ID# MRD1925SFB

Brilliant 1925-S Dime, MS66 Full Bands

- 4684 1925-S MS66 Full Bands NGC.** Although more than 5.8 million 1925-S Dimes were struck, the vast majority entered circulation. Of those that were set aside, poor striking quality restricts most from MS64 and better grades. The centers of this piece exhibit especially strong definition, the only area of slight weakness being around the rims, as usually seen. Shimmering mint luster characterizes this coin, and both sides exhibit a fully brilliant appearance. A curving die crack extends from near the top of Liberty's head, through the leading edge of her cap, to her lower jaw. Census: 9 in 66 Full Bands, 5 finer (11/12).

Ex: New York Signature (Heritage, 7/2004), lot 5871, which realized \$5,520. NGC ID# 23HP, PCGS# 4953, CoinPlex ID# MRD1925SFB

- 4685 1926-D MS65 Full Bands NGC.** Frosty satin luster covers both sides of this Gem example. The coin displays bold detail and exhibits only minor marks and grazes. Census: 43 in 65 (1 in 65+) Full Bands, 11 finer (12/12). NGC ID# 23HS, PCGS# 4957, CoinPlex ID# MRD1926DFB

- 4686 1927-D MS64 Full Bands PCGS.** The 1927-D is an important strike rarity in the series, and this near-Gem represents a significant savings for the collector. The bright, satiny luster is overlaid on each side with deep reddish patina that has occasional dabs of blue intermixed. Lightly abraded. Population: 43 in 64 Full Bands, 42 finer (12/12). PCGS# 4963, NGC ID# 23HV, CoinPlex ID# MRD1927DFB

4687 1927-S MS64 Full Bands PCGS. A well-defined and appealing near-Gem, the obverse of this example displays warm luster under light gold-gray toning with deep blue elements at the margins. The reverse is duskier with broader coverage and more mingling of the shades. Population: 41 in 64 (1 in 64+) Full Bands, 43 finer (12/12). PCGS# 4965, NGC ID# 23HW, CoinPlex ID# MRD1927SFB

4688 1927-S MS64 Full Bands PCGS. CAC. The lustrous surfaces of this near-Gem are nearly untuned save for occasional wisps of light gold color that show up under magnification. The design elements are well struck up, culminating in Full Bands. A couple of minute marks on Liberty's cheek are all that stand in the way of full Gem status. PCGS# 4965, NGC ID# 23HW, CoinPlex ID# MRD1927SFB

**Gem 1927-S Mercury Dime
Elusive Example With Full Bands**

4689 1927-S MS65 Full Bands NGC. CAC. Relatively few examples of the 1927-S Mercury dime were saved by contemporary collectors, and the mintage of 4.8 million pieces suffered considerable attrition over the years. This delightful Gem displays sharply detailed design elements, with Full Bands definition on the fasces, and vibrant mint luster on both sides. Census: 5 in 65 Full Bands, 3 finer (11/12). NGC ID# 23HW, PCGS# 4965, CoinPlex ID# MRD1927SFB

4690 1928-D MS64 Full Bands PCGS. This well-struck near-Gem displays shimmering, brilliant silver-white surfaces with small sections of reddish-gold patina. A handful of wispy marks deny a Gem grade. PCGS# 4969, NGC ID# 23HY, CoinPlex ID# MRD1928DFB

**1929-D Mercury Dime, MS68+
The Finest at PCGS**

4691 1929-D MS68+ PCGS. CAC. Only three examples of the 1929-D have received an MS68 grade at PCGS, including one MS68, an MS68 Full Bands, and this MS68+ (12/12). The three coins are the finest examples that grading service has seen. This sensational Superb Gem combines brilliant and satiny silver surfaces with splashes of vivid gold toning. PCGS# 4974, NGC ID# 23J3, CoinPlex ID# MRD1929D

4692 1931-D MS66+ Full Bands PCGS. CAC. A veneer of subtle champagne-gold color adheres to the lustrous surfaces of this high-end Premium Gem that displays crisply detailed design elements. A few minuscule marks on the fasces do not disturb. PCGS# 4985, NGC ID# 23J8, CoinPlex ID# MRD1931DFB

**1939-D Mercury Dime, MS69 Full Bands
Tied for Finest Certified**

4693 1939-D MS69 Full Bands PCGS. The PCGS Population Report indicates that 15 Mercury Dime grading events have been rewarded with the MS69 Full Bands grade, and all 15 are for the 1939-D (12/12). No other issue in the series has been certified at this level. The data smacks of resubmissions. Regardless of the total, whether it is one or 15, this is the finest certified Mercury dime, featuring stunning silver luster with splashes of orange and russet toning. PCGS# 5019, NGC ID# 23JS, CoinPlex ID# MRD1939DFB

4694 1942/1 AU50 PCGS. CAC Gold Label. FS-101. A trace of wear is apparent on the bands of the fasces but the cartwheel luster is unbroken. Lightly toned ice-blue and almond-gold. Smooth aside from wispy marks near 3 o'clock on the obverse. Housed in a first generation holder. From *The SPQR Collection of CAC Gold Sticker Coins*. PCGS# 5036, NGC ID# 23K4, CoinPlex ID# MRD1942OVR1

**1942/1-D Mercury Dime, MS63 Full Bands
A Highly Sought Variety**

4695 1942/1-D MS63 Full Bands PCGS. FS-101. David Lange (2005) calls this the most highly sought variety in the Mercury dime series. This Select specimen exhibits traces of light golden-tan patina on highly lustrous surfaces, and an impressive strike results in sharp definition on the design elements. A few minor handling marks define the grade. Population: 21 in 63 Full Bands, 67 finer (11/12). Ex: *Orlando FUN Signature (Heritage, 1/2008)*, lot 2001, which realized \$9,200. PCGS# 5041, NGC ID# 23K6, CoinPlex ID# MRD1942OVR1DFB

4696 1942-D MS68 Full Bands PCGS. An attractive array of colors appears on both sides of this well-struck piece. The obverse includes splashes in various hues of yellow and green. Vibrant shades of blue and green occupy the reverse. Population: 23 in 68 Full Bands, 0 finer (11/12). PCGS# 5039, NGC ID# 23K5, CoinPlex ID# MRD1942DFB

4697 1942-D MS68 Full Bands PCGS. CAC. Vivid toning in shades of lemon-yellow, lime-green, light green, plum, russet, red, light turquoise, and dark electric-blue appears on portions of both sides of this well-struck piece. A few minor contact marks lurk beneath the toning. Population: 23 in 68 Full Bands, 0 finer (12/12). PCGS# 5039, NGC ID# 23K5, CoinPlex ID# MRD1942DFB

MS68 Full Bands 1943-D Dime Multicolor Toning

4698 1943-D MS68 Full Bands PCGS. Ex: Jay Eisenberg Collection. Jade-green, sun-gold, and cherry-red endow the peripheries of this lustrous high grade silver type coin. The centers are precisely struck, and marks are essentially absent. Population: 25 in 68 Full Bands, none finer (12/12).

Ex: Jay Eisenberg Collection (Heritage, 2/2003), lot 6549; Pittsburgh Signature (Heritage, 8/2004), lot 5844, which realized \$3,565. PCGS# 5047, NGC ID# 23K9, CoinPlex ID# MRD1943DFB

4699 1944-D MS68 ★ Full Bands NGC. CAC. A stunning Superb Gem with brilliant satin luster and a crescent of crimson and iridescent toning on each side. Census: 20 in 68 Full Bands (3 in 68 ★ Full Bands), 0 finer (11/12). NGC ID# 23KC, PCGS# 5053, CoinPlex ID# MRD1944DFB

1945 Mercury Dime, MS64 Full Bands Important Strike Rarity

4700 1945 MS64 Full Bands PCGS. A nice representative quality strike of this final year for the design, with excellent general detail, and particularly good definition to the bands and other highpoints of the fascies. The surfaces sparkle with bright frosty mint glow, untoned, and unmarred. Population: 43 in 64 Full Bands, 53 finer (11/12). PCGS# 5057, NGC ID# 23KE, CoinPlex ID# MRD1945FB

PROOF MERCURY DIME

4701 1942 PR66 Cameo NGC. Appreciably contrasted, a rarity for the Mercury dime proof series, though the frost is light all-around. Excellent detail and silver mirrors with only a few tiny faults to preclude an even finer designation. A remarkable coin. Census: 6 in 66 Cameo, 4 finer (12/12).3 PCGS# 85077, CoinPlex ID# MRP1942CA

ROOSEVELT DIME

1949-D Dime, MS68 ★ Full Torch The Finest NGC Certified Example

4702 1949-D MS68 ★ Full Torch NGC. A stunning Superb Gem, this boldly defined Roosevelt dime exhibits full torch details, the Roosevelt equivalent to Full Bands Mercury dimes. Both sides have frosty silver luster beneath a kaleidoscope of toning, including ivory, russet, violet, blue, and green. Census: 1 in 68, 0 finer (12/12). NGC ID# 23KV, PCGS# 85092, CoinPlex ID# ROD1949DFB

PROOF ROOSEVELT DIMES

1951 Dime, PR66 Deep Cameo Only Three Finer at PCGS

4703 1951 PR66 Deep Cameo PCGS. Although only certified as a Premium Gem Cameo proof, this 1951 dime has extraordinary eye appeal, combining frosty white devices and deeply mirrored fields. Careful examination with a loupe is necessary to see the faint hairlines that prevent a higher grade. This remarkable specimen is destined for a top collection. Population: 3 in 66 Deep Cameo, 3 finer (12/12). PCGS# 95226, NGC ID# 27EK, CoinPlex ID# ROP1951DC

4704 1983 No S PR69 Deep Cameo PCGS. An indeterminate but small number of 1983-dated Roosevelt dimes escaped with no S mintmark, ascertaining by the certified population. This appealing piece exhibits deeply frosted devices and brilliant fields providing deep contrast. PCGS# 95265, NGC ID# 27FJ, CoinPlex ID# ROP1983NOSDC

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter

- 4705 1916 Genuine PCGS.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been cleaned. Always a popular and eagerly pursued date with a remarkably low mintage of only 52,000 pieces. Even though this is an untoned example, it has a different appearance from side to side. The obverse is dull from cleaning while the reverse shows only the slightest wipe and retains generous amounts of mint luster. Both sides are remarkably free from abrasions.

From The Teich Family Collection. PCGS# 5704, NGC ID# 242Y, CoinPlex ID# SLQ1916

1916 Standing Liberty Quarter Traces of Mint Luster

- 4706 1916 PCGS Genuine.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been cleaned. Traces of luster cling to the design recesses of this pearl-gray and wheat-gold key date quarter. Noticeable marks are absent, though we note a single small obverse spot near 9 o'clock. PCGS# 5704, NGC ID# 242Y, CoinPlex ID# SLQ1916

1916 Standing Liberty Quarter, VG Details First-Year, Low-Mintage Issue

- 4707 1916 — Obverse Damage — NGC Details. VG.** A well-worn example of this celebrated key date, with bright surfaces and pleasing hints of pink and gold patina. A small, discolored pit at the foot of T in LIBERTY constitutes the noted damage. From a memorably small mintage of 52,000 pieces.

From The J.D. Tanner Collection. NGC ID# 242Y, PCGS# 5704, CoinPlex ID# SLQ1916

Rare 1916 Standing Liberty Quarter VF Sharpness

- 4708 1916 — Graffiti — NGC Details. VF.** A collector celebrated the circulation find of the key date 1916 Standing Liberty quarter by lightly pinscratching "9/8/17", presumably representing the day of discovery, on the lower right quadrant of each side. This coin also has a small rim ding on the reverse at 7 o'clock, and a minor pinscratch near the tip of the front wing. Toned deep cream-gray with peripheral freckles of tan and navy-blue. NGC ID# 242Y, PCGS# 5704, CoinPlex ID# SLQ1916

1916 Standing Liberty Quarter, VF25 Sought-After First-Year Key

- 4709 1916 VF25 PCGS.** Dusky gray, golden-brown, and amber toning enlivens the surfaces of this important first-year key. The design elements retain all major features in outline, and some interior detail remains intact. This coin will be a welcome addition to an otherwise high-grade collection of Standing Liberty quarters. PCGS# 5704, NGC ID# 242Y, CoinPlex ID# SLQ1916

Rare 1916 Standing Liberty Quarter AU Sharpness

- 4710 1916 — Polished — NGC Details. AU.** The low mintage key to the regular issue Standing Liberty series, though the 1918/7-S is even rarer in Mint State. The present piece has only minimal circulation wear but the pearl-white surfaces are luminous from a wipe. Neither side has any remotely relevant marks. NGC ID# 242Y, PCGS# 5704, CoinPlex ID# SLQ1916

1916 Standing Liberty Quarter, AU Details
Type One Key

- 4711** 1916 — Improperly Cleaned — NGC Details. AU. The 1916 Standing Liberty quarter is a low-mintage key and represents the first year of a two-year design type. Collectors prize this issue in all grades and conditions. This well-detailed piece shows just a touch of wear on the design elements, with traces of pale gold and aquamarine toning.
From The J.D. Tanner Collection. NGC ID# 242Y, PCGS# 5704, CoinPlex ID# SLQ1916

1916 Standing Liberty Quarter
Uncirculated Details, Key Date

- 4712** 1916 — Improperly Cleaned — NGC Details. Unc. Struck in the waning weeks of 1916, the first year Standing Liberty quarter has a tiny mintage of 52,000 pieces, less than one-seventh the production of its closest series competitor, the 1927-S. The current lot possesses full design definition and is free from any marks or hairlines, though the satiny stone-gray surfaces are subdued.
From The Hilltop Collection. NGC ID# 242Y, PCGS# 5704, CoinPlex ID# SLQ1916

1916 Quarter Dollar, MS60
Standing Liberty Debut

- 4713** 1916 MS60 PCGS. This important first-year Standing Liberty quarter is housed in a first-generation PCGS holder that has the incorrect coin number of 05706 which is actually the number for the 1917 Type One quarter. The strike is somewhat indistinct on this Mint State specimen. The ivory surfaces are lightly marked and show splashes of pale gold toning with ebony toning along parts of the reverse border. The *PCGS Population Report* shows just seven examples certified MS60, although this piece is not one of those seven coins since it has the wrong coin number. Instead, it is included as one of the 19 MS60 1917 Type One quarters in that report (12/12). PCGS# 5704, NGC ID# 242Y, CoinPlex ID# SLQ1916

-
- 4714** 1917 Type One MS66 Full Head PCGS. This sharply struck Premium Gem displays just a hint or two of very light tan color on the reverse. A solid strike emboldens the design features, and both sides possess frosty luster and are well preserved. Housed in a green label holder.
From The Richard P. Ariagno, M.D. Collection. PCGS# 5707, NGC ID# 242Z, CoinPlex ID# SLQ1917TY1FH

- 4715** 1917 Type One MS66 Full Head PCGS. CAC. Light peripheral gold toning resides on the frosty surfaces of this lustrous and boldly detailed Premium Gem. PCGS has only certified 64 finer pieces (12/12). PCGS# 5707, NGC ID# 242Z, CoinPlex ID# SLQ1917TY1FH

**1917 Quarter, MS67 Full Head
First Design**

4716 1917 Type One MS67 Full Head PCGS. CAC. Unlike most later issues, a large percentage of 1917 Type One quarters exist with full head and shield details, much like the present Superb Gem. However, few of the survivors are as fine as this piece, and none have been certified in higher grades. This example is brilliant and highly lustrous with splashes of champagne and violet on the obverse. Population: 64 in 67 (3 in 67+) Full Head, 0 finer (11/12). PCGS# 5707, NGC ID# 242Z, CoinPlex ID# SLQ1917TY1FH

4717 1917-D Type One MS65 Full Head NGC. Areas of lilac and russet toning appear near portions of the periphery on both sides of this Gem example. This piece displays rich luster. Clash marks appear on the reverse. NGC ID# 2432, PCGS# 5709, CoinPlex ID# SLQ1917DTY1FH

**1917-D Type One Quarter, MS66 Full Head
Brilliant With Pleasing Luster**

4718 1917-D Type One MS66 Full Head PCGS. CAC. This brilliant Premium Gem exhibits pleasing frosty luster over both sides. The date is available in Full Head, but some of the other design elements can show localized weakness. All the rivets are sharp as are the vertical lines in the shield, and the obverse stars, areas that are sometimes weak. Light grazes on Liberty's chest do not detract. Housed in a green label holder.
From The Richard P. Ariagno, M.D. Collection. PCGS# 5709, NGC ID# 2432, CoinPlex ID# SLQ1917DTY1FH

**Premium Gem 1917-D Type One Quarter
Full Head Definition**

4719 1917-D Type One MS66 Full Head PCGS. CAC. The 1917-D Standing Liberty quarter represents the second, and final, year of the short-lived Type One design. This date is especially important for type purposes because the 1916 issue is rare and expensive. This delightful Premium Gem is sharply detailed, with full definition on Liberty's head, and vibrant mint luster throughout. PCGS has graded only 20 numerically finer coins (12/12). PCGS# 5709, NGC ID# 2432, CoinPlex ID# SLQ1917DTY1FH

4720 1917-S Type One MS64 Full Head PCGS. The lustrous surfaces of this near-Gem display an occasional splash of nearly imperceptible gold and violet. This is a nicely struck piece that reveals just a few minute marks. PCGS# 5711, NGC ID# 2433, CoinPlex ID# SLQ1917STY1FH

4721 1917-S Type One MS64 Full Head NGC. Other than a streak of russet-colored toning extending outward from the bottom of the shield, this piece remains largely brilliant, displaying only faint hints of toning, primarily at the peripheries. The rivets in the shield display nice detail. Only a few very minor surface marks appear.
From The J.D. Tanner Collection. NGC ID# 2433, PCGS# 5711, CoinPlex ID# SLQ1917STY1FH

4722 1917-S Type One MS64 Full Head PCGS. This lustrous intricately detailed near-Gem displays a grainy texture throughout. The piece was held from a higher grade due to surface marks near the top of the obverse. PCGS# 5711, NGC ID# 2433, CoinPlex ID# SLQ1917STY1FH

4723 1917-S Type One MS65 Full Head NGC. Deep, dusky grayish-violet and burnt-orange hues reside on both sides of this Type One quarter. Great detail with subtle eye appeal. NGC ID# 2433, PCGS# 5711, CoinPlex ID# SLQ1917STY1FH

**1917-S Type One Quarter
Premium Gem Full Head
Fully Struck**

- 4724 1917-S Type One MS66 Full Head PCGS. CAC.** Most 1917-S Type One quarter dollars come softly struck. The present Premium Gem offering is a refreshing exception. Not only is Liberty's head uncharacteristically fully delineated, but so are all date digits and shield rivets, and the eagle's plumage. Highly lustrous surfaces display occasional whispers of soft gold color, and just a couple of minuscule marks occur on the shield. Population: 67 in 66 (2 in 66+) Full Head, 9 finer (12/12).
From *The Richard P. Ariagno, M.D. Collection*. PCGS# 5711, NGC ID# 2433, CoinPlex ID# SLQ1917STY1FH

**Full Head Gem 1917-D Quarter
Type Two Design**

- 4725 1917-D Type Two MS65 Full Head PCGS.** Light wheat-gold toning endows this thoroughly lustrous and well impressed Gem. Only trivial field grazes limit the grade. Intricately struck except for the usual two shield rivets near the waist. Encased in a green label holder. Population: 56 in 65 Full Head, 17 finer (11/12).
From *The Richard P. Ariagno, M.D. Collection*. PCGS# 5717, NGC ID# 2435, CoinPlex ID# SLQ1917DTY2FH
- 4726 1917-S Type Two MS64 Full Head PCGS.** Attractive golden-silver color envelops this near-Gem. Areas of freckling appear in the fields at the upper portion of the reverse. This piece is well-struck save for the usual softness in the rivets at Liberty's hip and is virtually devoid of mentionable contact marks.
From *The Richard P. Ariagno, M.D. Collection*. PCGS# 5719, NGC ID# 2436, CoinPlex ID# SLQ1917STY2FH
- 4727 1918 MS65 Full Head PCGS.** A well directed strike leaves bold detail on the inner shield and chain mail as well as Liberty's head. Only a couple of rivets near the hip show the usual weakness. The lustrous surfaces are essentially untuned and devoid of mentionable marks.
From *The Richard P. Ariagno, M.D. Collection*. PCGS# 5721, NGC ID# 2437, CoinPlex ID# SLQ1918FH

**1918-D Quarter, MS66 Full Head
Infrequently Found Sharply Struck**

- 4728 1918-D MS66 Full Head PCGS. CAC.** The 1918-D quarter can be located with relatively little trouble in MS64. Gems are more challenging, and finer coins are elusive. Reddish-copper toning occurs on the upper and left obverse and over the reverse of this Premium Gem, though much lighter in hue on the latter, and both sides display intense, uniform luster. It is one of the only three percent of 1918-D quarters with a Full Head, and most of the remaining design elements are better struck than ordinarily seen, including the lines of the inner shield, the last four rivets (though two are weak), the breast mail, the gown line crossing the thigh, and the date. The eagle's breast feathers reveal the typical weakness. A couple of minuscule marks on the eagle do not distract. Housed in a prior generation green holder. Population: 16 in 66 (1 in 66+) Full Head, 1 finer (12/12).
From *The Richard P. Ariagno, M.D. Collection*. PCGS# 5723, NGC ID# 2438, CoinPlex ID# SLQ1918DFH
- 4729 1918-S MS64 Full Head PCGS.** Although the strike is incomplete at the lower part of the shield and the eagle's body, Liberty still qualifies for Full Head status on this attractive near-Gem example. Cline's reference estimates that only about 3% of the issue has Full Head details. Population: 86 in 64 Full Head, 39 finer (12/12).
PCGS# 5725, NGC ID# 2439, CoinPlex ID# SLQ1918SFH

Overdated 1918/7-S Quarter

4730 1918/7-S PCGS Genuine. FS-101. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been cleaned. The stone-gray surfaces are moderately subdued but acceptable for many collectors given the rarity of this key overdated issue. The diagonal of the 7 is unmistakable within the 8, and the wings show ample plumage detail. PCGS# 5726, NGC ID# 243A, CoinPlex ID# SLQ19187S

1918/7-S Quarter, VG10 Partial Wing Plumage

4731 1918/7-S VG10 PCGS. FS-101. This dove-gray and caramel-gold key date representative shows partial plumage definition on the front wing. The thick downstroke of the underdigit 7 is apparent. Smooth aside from minor hairlines on the walls of the gate. Housed in a green label holder.

Ex: Stig Ericsson Collection (Heritage, 6/2005), lot 5577, which realized \$4,887.50.

From The J.D. Tanner Collection. PCGS# 5726, NGC ID# 243A, CoinPlex ID# SLQ19187S

1918/7-S Quarter, VF Sharpness

4732 1918/7-S — Harshly Cleaned, Scratches — NGC Details. VF. FS-101. The 7 is clearly evident within the 8 in the date. This key date quarter is predominantly pearl-gray but has hints of tan toning. Both sides are a bit glossy from cleaning with hairlines noticeable on Liberty, the obverse rim, and the eagle's back wing. These hairlines have been strictly assessed as scratches by NGC. NGC ID# 243A, PCGS# 5726, CoinPlex ID# SLQ19187S

VF Details 1918/7-S Quarter Important Wartime Overdate

4733 1918/7-S — Improperly Cleaned — NGC Details. VF. FS-101. This overdated quarter is mostly cream-gray though the upper obverse margin displays vibrant lemon-gold, fire-red, and sea-green patina. Nicely defined for the VF level, with the downstroke of the 7 readily apparent within the 8 in the date. Free from abrasions aside from the parallel hairlines evident on both sides. From The Hilltop Collection. NGC ID# 243A, PCGS# 5726, CoinPlex ID# SLQ19187S

Very Fine 1918/7-S Quarter

4734 1918/7-S VF20 PCGS. FS-101. Ice-blue and almond-gold toning enriches this circulated but nicely detailed key date Standing Liberty quarter. The downstroke and upper right corner of the 7 confirms the coveted overdate. The date shows wear but all digits are readily evident and the remaining legends are bold. PCGS# 5726, NGC ID# 243A, CoinPlex ID# SLQ19187S

1918/7-S Quarter, XF45 Sole Overdate of Series

4735 1918/7-S XF45 PCGS. FS-101. Medium almond-gold and stone-gray toning drapes this partly lustrous and well detailed key date quarter. The 7 is unmistakable within the 8 in the date. The eye appeal is excellent for the Choice XF level, though a loupe reveals faint peripheral marks on each side. One of two keys for the series, along with the introductory 1916. PCGS# 5726, NGC ID# 243A, CoinPlex ID# SLQ19187S

**1918/7-S Quarter, XF45
Important Series Key**

- 4736** 1918/7-S XF45 NGC. FS-101. The undertype 7 shows plainly beneath the final digit in the date on this famous hubbing error. This Choice XF example displays lightly worn, well-detailed design elements and retains much of its original mint luster. A few hints of light gold patina are evident on both sides.
From The J.D. Tanner Collection. NGC ID# 243A, PCGS# 5726, CoinPlex ID# SLQ19187S

**1919 Quarter, MS66 Full Head
Intense Luster**

- 4737** 1919 MS66 Full Head PCGS. CAC. Splashes of lime-green and orange-gold are somewhat deeper in hue and more extensive on the obverse of this Premium Gem. Intense luster exudes from the well preserved surfaces that exhibit sharply struck design elements, including the vertical lines of the shield and chain mail, in addition to the Full Head. The eagle's breast feathers are somewhat soft. Housed in a green label holder. Population: 66 in 66 (4 in 66+) Full Head, 14 finer (12/12).
From The Richard P. Ariagno, M.D. Collection. PCGS# 5729, NGC ID# 243B, CoinPlex ID# SLQ1919FH

**Premium Gem 1919 Quarter, Full Head
Popular Early Date**

- 4738** 1919 MS66 Full Head PCGS. CAC. The mintage for the 1919 was in excess of 11 million pieces, and Full Head examples are relatively available. This thickly frosted example is fully detailed throughout the obverse, just a bit of high point definition is lost on the reverse on the eagle's breast. Much underlying brilliance shows with a slight accent of reddish patina on each side. Population: 66 in 66 (4 in 66+) Full Head, 14 finer (11/12). PCGS# 5729, NGC ID# 243B, CoinPlex ID# SLQ1919FH

- 4739** 1919-D MS63 PCGS. Soft champagne-gold and violet patina rests on the lustrous surfaces of this Select D-mint issue. The two rivets near Liberty's bosom and her head are weak but the other design elements are for the most part well defined. PCGS# 5730, NGC ID# 243C, CoinPlex ID# SLQ1919D

- 4740** 1920 MS65 Full Head PCGS. Lustrous silvery surfaces exhibit well defined devices that culminate in a Full Head. Nicely preserved throughout. Housed in a green label holder that reveals an internal crack in the plastic beneath the label.
From The Richard P. Ariagno, M.D. Collection. PCGS# 5735, NGC ID# 243E, CoinPlex ID# SLQ1920FH

Premium Gem 1920-S Quarter

- 4741** 1920-S MS66 PCGS. CAC. Although more than 6.3 million pieces were struck of the 1920-S, it is a very scarce and underrated coin in the series. This example displays the usual thick mint frost seen on S-mint quarters and exhibits the typical soft strike. A toning streak extends upward from LAR of DOLLAR. Population: 14 in 66, 3 finer (11/12). PCGS# 5738, NGC ID# 243G, CoinPlex ID# SLQ1920S

**1920-S Quarter
MS64 Full Head**

- 4742** 1920-S MS64 Full Head PCGS. CAC. This fully brilliant near-Gem has excellent design definition with satiny luster and hints of delicate champagne toning on otherwise brilliant surfaces. The few trivial marks on each side are only visible with a glass. Population: 34 in 64 Full Head, 23 finer (11/12).
From The Teich Family Collection. PCGS# 5739, NGC ID# 243G, CoinPlex ID# SLQ1920SFH

**1921 Quarter, MS64
Scarce, Low-Mintage Date**

- 4743 1921 MS64 NGC.** Shimmering satin luster adds tremendous visual appeal to this lovely near-Gem. A few small freckles appear on the reverse. The strike is better than expected for a non-Full Head coin. The low mintage of 1.9 million pieces has made the 1921 quarter a highly sought after date almost since the year it was issued. NGC ID# 243H, PCGS# 5740, CoinPlex ID# SLQ1921

**1921 Standing Liberty Quarter, MS65+
Only 18 Finer Coins at PCGS**

- 4744 1921 MS65+ PCGS.** This high-end Gem features well-detailed design elements, with a touch of softness on the date and the eagle's breast. The brilliant well-preserved surfaces radiate vibrant mint luster, and overall eye appeal is terrific. Population: 89 in 65 (1 in 65+), 18 finer (12/12). PCGS# 5740, NGC ID# 243H, CoinPlex ID# SLQ1921

**1921 Quarter, MS66 Full Head
Only Two Finer PCGS Coins**

- 4745 1921 MS66 Full Head PCGS. CAC.** The 1921 quarter is a key issue in all grades and designations, and MS66 Full Head coins are rarely encountered. In all grades, PCGS has certified 1,350 1921 quarters, including only 200 with a Full Head designation. The strike on this beauty is remarkable, with strong head details and a bold shield, showing full rivets as well as horizontal and vertical lines on the small U.S. shield. Both sides of this Premium Gem are fully lustrous and brilliant with untuned silver surfaces. An exceptional specimen for the connoisseur. Population: 17 in 66 (1 in 66+) Full Head, 2 finer (11/12). PCGS# 5741, NGC ID# 243H, CoinPlex ID# SLQ1921FH

- 4746 1923-S — Improperly Cleaned — NGC Details. AU.** Liberty's legs show only marginal wear, but the rose-red, sun-gold, powder-blue, and jade-green obverse toning is suspicious. Lustrous for the AU level with an absent area of plumage on the upper front wing due to die polishing. NGC ID# 243K, PCGS# 5744, CoinPlex ID# SLQ1923S

- 4747 1923-S AU55 NGC.** Soft pastel coloration is just slightly deeper in hue on the reverse of this Choice AU semi-key. Refreshingly clean surfaces display considerable luster.
From The Hilltop Collection. NGC ID# 243K, PCGS# 5744, CoinPlex ID# SLQ1923S

- 4748 1923-S — Reverse Stained — NGC Details. Unc.** Well struck, but the absence of an earhole denies full head classification. A satiny semikey quarter. Generally toned light golden-brown but the lower reverse is faintly hairlined and displays dusky olive-gray shades. A few specks of aqua residue are noted near STATES.
From The J.D. Tanner Collection. NGC ID# 243K, PCGS# 5744, CoinPlex ID# SLQ1923S

**1923-S Quarter, MS64
Two-Thirds Head Detail**

- 4749 1923-S MS64 PCGS. CAC.** About two-thirds of the head detail is visible on this near-Gem, and only two of the shield rivets are missing. Both sides of this frosty specimen are fully brilliant with delicate champagne toning, presenting exceptional eye appeal. *From The Teich Family Collection.* PCGS# 5744, NGC ID# 243K, CoinPlex ID# SLQ1923S

**1923-S Quarter, MS65 Full Head
Bold Head and Shield Details**

- 4750 1923-S MS65 Full Head NGC.** A scarce date that enjoys demand in all grades, this boldly defined Gem Full Head specimen is quite an important offering. In addition to sharp head details, the shield has nearly full definition as well. Frosty silver surfaces host splashes of deep gold on each side, accompanying the brilliant luster. Census: 23 in 65 Full Head, 33 finer (11/12). NGC ID# 243K, PCGS# 5745, CoinPlex ID# SLQ1923SFH

**1924 Quarter, MS66 Full Head
Highly Appealing**

- 4751 1924 MS66 Full Head PCGS.** While the 1924 is one of the more frequently encountered issues among Full Head quarters, J.H. Cline (2007) contends about value of the issue: "Most Full Heads command two to three times Red Book prices." The lustrous surfaces of the current Premium Gem Full Head offering exhibit subtle reddish-gold color at the margins. This is a highly appealing example. Population: 31 in 66 (1 in 66+) Full Head, 8 finer (12/12). *From The Richard P. Ariagno, M.D. Collection.* PCGS# 5747, NGC ID# 243L, CoinPlex ID# SLQ1924FH

Full Head Gem 1924-D Quarter

- 4752 1924-D MS65 Full Head PCGS.** Light lilac-red and steel-blue toning adorns this lustrous and well preserved better date Gem. The strike is sharp for the San Francisco emission, with incompleteness relegated to the top of the date and the two rivets near the waist. Encased in a green label holder. Population: 46 in 65 Full Head, 16 finer (11/12). *From The Richard P. Ariagno, M.D. Collection.* PCGS# 5749, NGC ID# 243M, CoinPlex ID# SLQ1924DFH

- 4753 1925 MS66 Full Head PCGS.** The untoned surfaces of this Premium Gem yield ebullient luster and well impressed design elements. A couple of minute, unobtrusive milling marks are visible on Liberty's right (facing) leg. Population: 52 in 66 Full Head, 6 finer (12/12). *From The Richard P. Ariagno, M.D. Collection.* PCGS# 5753, NGC ID# 243P, CoinPlex ID# SLQ1925FH

- 4754 1926 MS65 Full Head PCGS.** Light golden toning graces this lustrous and lovely Gem. Design definition is close to full, a rarity for the type. One tick on Liberty's leg but otherwise nearly immaculate. Certified in a green label holder. *From The Richard P. Ariagno, M.D. Collection.* PCGS# 5755, NGC ID# 243R, CoinPlex ID# SLQ1926FH

- 4755 1927 MS66 Full Head PCGS.** The brilliant surfaces of this Premium Gem yield nicely defined devices and pleasing luster. A few minuscule marks are within the parameters of the designated numerical grade. Population: 50 in 66 (1 in 66+) Full Head, 5 finer (12/12). *From The Richard P. Ariagno, M.D. Collection.* PCGS# 5761, NGC ID# 243U, CoinPlex ID# SLQ1927FH

**Superb Gem 1927-D Quarter
Spectacular Multicolor Toning**

- 4756 1927-D MS67 NGC. CAC.** The well-preserved surfaces of this delightful Superb Gem are spectacularly toned in vivid shades of violet, lavender, amber, and burnt-orange. Vibrant mint luster is evident beneath the toning and the design elements are well-detailed. Eye appeal is tremendous. Census: 4 in 67, 0 finer (12/12). NGC ID# 243V, PCGS# 5762, CoinPlex ID# SLQ1927D

**1927-S Quarter, Brilliant MS63
One of the Series Keys**

4757 1927-S MS63 PCGS. The 1927-S is a premium coin in all grades right down to Good. Uncirculated examples are seldom encountered, as one would expect from the low mintage of only 396,000 pieces. This is a brilliant coin with sparkling mint luster. The head details on Liberty are lacking, as usual with this issue. For an MS63, this is a remarkably clean piece that shows no singularly mentionable marks.
From The Teich Family Collection. PCGS# 5764, NGC ID# 243W, CoinPlex ID# SLQ1927S

4758 1928 MS65 Full Head PCGS. CAC. A remarkable Gem, this 1928 quarter displays excellent eye appeal on both sides. It is fully brilliant with attractive frosty silver luster. This piece would make a lovely addition to a high-grade registry collection of the series. Population: 79 in 65 (1 in 65+) Full Head, 35 finer (11/12). PCGS# 5767, NGC ID# 243X, CoinPlex ID# SLQ1928FH

**Premium Gem 1928 Quarter, Full Head
Satin Texture**

4759 1928 MS66 Full Head PCGS. This is an impeccably smooth, satiny Premium Gem with delicate golden accents at the margins. The strike is particularly bold, not only on the details of Liberty's head, but on her shield as well. Only some of the eagle's breast feathers are soft. A dark spot is visible to the upper right of the inner shield. Population: 30 in 66 (2 in 66+) Full Head, 5 finer (12/12).
From The Richard P. Ariagno, M.D. Collection. PCGS# 5767, NGC ID# 243X, CoinPlex ID# SLQ1928FH

**1928-D Quarter, Full Head Gem
Scarcer, Late-Date Issue**

4760 1928-D MS65 Full Head PCGS. The 1928-D is a challenging coin to locate with Full Head details, even more than its already low mintage of 1.6 million pieces would indicate. Pinpoint strike details are seen over each side, and the highly lustrous surfaces display even golden toning. Population: 27 in 65 Full Head, 18 finer (11/12).
From The Richard P. Ariagno, M.D. Collection. PCGS# 5769, NGC ID# 243Y, CoinPlex ID# SLQ1928DFH

**1928-D Quarter, MS66 Full Head
Only Two Finer at PCGS**

4761 1928-D MS66 Full Head PCGS. CAC. The Denver Mint is well known for his poorly produced coins from the 1920s, and the 1928-D quarter is one of the great strike rarities in the series. In all grades, PCGS has certified 2,142 examples of this issue, including just 100 with the Full Head designation. In addition to the bold head, this Premium Gem has a sharp shield, with only two indistinct rivets at 7 o'clock, and even those are faintly visible. Both sides are highly brilliant with frosty and untuned silver surfaces. Population: 16 in 66 (1 in 66+) Full Head, 2 finer (11/12). PCGS# 5769, NGC ID# 243Y, CoinPlex ID# SLQ1928DFH

4762 1929MS66 Full Head PCGS. The essentially untoned obverse cedes to variegated gold and lavender on the reverse. Bright luster radiates from the well preserved surfaces. Housed in a green label holder.
From *The Richard P. Ariagno, M.D. Collection*. PCGS# 5773, NGC ID# 2442, CoinPlex ID# SLQ1929FH

4763 1929-S MS66+ Full Head NGC. CAC. Areas of toning, primarily a rich gold color, frame the outer edges of this attractive example and enhance the eye appeal of this high-end Premium Gem. A few shield rivets near the waist lack absolute detail. Census: 85 in 66 (2 in 66+) Full Head, 22 finer (11/12). NGC ID# 2444, PCGS# 5777, CoinPlex ID# SLQ1929SFH

4764 1930 MS66 Full Head PCGS. CAC. Wisps of yellow-gold patina reside on localized parts of the borders. This well struck piece displays pleasing luster and has been nicely cared for. Housed in a prior generation holder.
From *The Richard P. Ariagno, M.D. Collection*. PCGS# 5779, NGC ID# 2445, CoinPlex ID# SLQ1930FH

4765 1930-S MS66 Full Head PCGS. CAC. Radiantly lustrous surfaces display whispers of light tan on the reverse. There are no marks worthy of note on either side. Housed in a prior generation holder. Population: 83 in 66 Full Head, 19 finer (12/12).
From *The Richard P. Ariagno, M.D. Collection*. PCGS# 5781, NGC ID# 2446, CoinPlex ID# SLQ1930SFH

WASHINGTON QUARTERS

4766 1932-D MS63 PCGS. CAC. The 1932-D Washington quarter is a low-mintage key from the first year of the design. Freckles of russet toning cling to the margins of this Select specimen. This is a well struck piece with pleasing eye appeal for the grade designation. PCGS# 5791, NGC ID# 2448, CoinPlex ID# WQU1932D

4767 1932-D MS63 PCGS. CAC. An attractive Select example of the first-year key to the Washington quarter series, this piece displays well-detailed design elements and satiny mint luster, under subtle hues of orange-pink toning.
From *The Western Reserve Collection*. PCGS# 5791, NGC ID# 2448, CoinPlex ID# WQU1932D

Dappled Gem 1932-S Quarter

4768 1932-S MS65 PCGS. The two mintmarked 1932 issues are known to even casual hobbyists as the keys to the long-lived Washington quarter series. The 1932-S has the lowest mintage but is nonetheless more available in better grades than its chief rival, the 1932-D. The present Gem exhibits booming luster and smooth, sharply struck surfaces. Dappled khaki-gold toning further attests to the originality. PCGS# 5792, NGC ID# 2449, CoinPlex ID# WQU1932S

Gem 1932-S Washington Quarter Only Four Numerically Finer Coins at PCGS

4769 1932-S MS65 PCGS. CAC. This attractive Gem represents the first year of the Washington quarter design, from a series-low mintage of 408,000 pieces. Accents of fuchsia, golden-brown, and amber toning enliven the well-preserved surfaces, with vibrant mint luster and outstanding eye appeal. PCGS has graded only four numerically finer specimens (12/12). PCGS# 5792, NGC ID# 2449, CoinPlex ID# WQU1932S

1932-S Washington Quarter, MS65 Low-Mintage Issue

4770 1932-S MS65 PCGS. CAC. The 1932-S Washington quarter boasts the lowest business-strike mintage of the series, at 408,000 pieces and only the famous 1932-D is more elusive in today's market. This impressive Gem displays well-detailed design elements and vibrant mint luster, under amber, golden-brown, gray, and bright light-green toning. The colors are more subdued on the reverse. PCGS and NGC combined have awarded higher grades to a mere 9 examples (11/12). PCGS# 5792, NGC ID# 2449, CoinPlex ID# WQU1932S

Scarce Light Motto 1934 Quarter, MS67 Tied for Finest Certified

4771 1934 Light Motto MS67 PCGS. CAC. FS-401. Only a small fraction of 1934 quarters display the Light Motto, the subtype of the first-year 1932 issues. The formerly blurry legend IN GOD WE TRUST was improved in different ways on the Medium Motto and Heavy Motto successors. This pristine Superb Gem exhibits dynamic luster with large splashes of golden-yellow and russet toning on the obverse. Smaller areas of light toning appear on the reverse. Population: 6 in 67, 0 finer (11/12).
From *The David Poole Collection of Silver Washington Quarters*. PCGS# 5794, NGC ID# 244A, CoinPlex ID# WQU1934LM

**1934 Heavy Motto Quarter, MS67+
Magnificent Color and Preservation**

- 4772** 1934 Heavy Motto MS67+ PCGS Secure. CAC. Magnificent obverse coloration includes hues of violet, aqua, and gold deepening to amber near the rims, with incredible surface preservation, yet the color is not so heavy as to obscure the full mint luster. The reverse is still largely silver-white, but that side is equally pristine. This Heavy Motto piece is one of only two MS67+ coins graded by PCGS, and none are finer (11/12).
From *The David Poole Collection of Silver Washington Quarters*.
PCGS# 85794, CoinPlex ID# WQU1934HM

**Doubled Die Obverse FS-101
1934 Quarter, MS66
Tied for Finest Known**

- 4773** 1934 Doubled Die Obverse MS66 PCGS. CAC. FS-101. Ex: Pat Mullen Collection. There are many Washington quarter issues with die doubled mottos, but per *Cherrypickers*, the present *Guide Book* entry is "one of the strongest and most popular of all Washington quarter varieties." Well struck with booming luster, clean surfaces, and light almond-gold toning. Population: 11 in 66, none finer (11/12).
Ex: *Patrick Mullen Collection (Heritage, 1/2004)*, lot 6324.
From *The David Poole Collection of Silver Washington Quarters*.
PCGS# 5795, CoinPlex ID# WQU1934DDO

Medium Motto 1934-D Quarter, MS66+

- 4774** 1934-D Medium Motto MS66+ PCGS. The 1934-D quarter is known in both Medium and Heavy Motto format, but unlike their Philadelphia counterparts, there are no Light Motto examples. The present lustrous representative is boldly struck and displays only incidental grazes. Toning is minor and confined to sea-green and tan-brown tints near the left margins. Population: 74 in 66 (3 in 66+), 4 finer (12/12). PCGS# 5796, NGC ID# 244C, CoinPlex ID# WQU1934DMM

**1934-D Washington Quarter, MS66+
Dark Peripheral Toning**

- 4775** 1934-D Heavy Motto MS66+ PCGS. CAC. The center of the W in WE is higher than the sides, identifying the heavy motto variety. This high-end Premium Gem is sharply detailed throughout, with areas of dark apple-green, russet, and lavender toning at the peripheries. Vibrant mint luster adds to the outstanding eye appeal. Population: 14 in 66 (1 in 66+), 2 finer (12/12). PCGS# 85796, CoinPlex ID# WQU1934DHM

**Lovely Superb Gem 1935-D Quarter
No Finer PCGS or NGC Examples**

- 4776** 1935-D MS67 PCGS. CAC. This magnificent Superb Gem D-mint example displays only a couple of tiny abrasions under even the strongest magnification, and is well-struck throughout. The rich, frosty luster is enhanced by a faint hint of golden-olive toning on the obverse. Population: 14 in 67, 0 finer (11/12).
Ex: *Palm Beach Signature (Heritage, 11/2004)*, lot 6753.
From *The David Poole Collection of Silver Washington Quarters*.
PCGS# 5798, NGC ID# 244E, CoinPlex ID# WQU1935D

**Satiny 1935-S Washington Quarter, MS67
No Finer Graded Examples at PCGS or NGC**

- 4777** 1935-S MS67 PCGS. CAC. A satiny Superb Gem that shows great luster and a firm strike. The surfaces are impressive for this date, with just a few tiny ticks keeping this coin from perfection. Washington's neck and face are quite attractive, with no disturbances worthy of note. As nice as this date ever comes. Population: 21 in 67, 0 finer (11/12).
Ex: *Long Beach Signature (Heritage, 9/2005)*, lot 2941; *Central States Signature (Heritage, 4/2012)*, lot 4263.
From *The David Poole Collection of Silver Washington Quarters*.
PCGS# 5799, NGC ID# 244F, CoinPlex ID# WQU1935S

**1936-D Washington Quarter, MS67
No Numerically Finer Coins at PCGS**

- 4778 1936-D MS67 PCGS. CAC.** Contemporary collectors were concentrating on commemorative issues in 1936, and few bothered to save any Washington quarters from the Denver Mint. As a result, the 1936-D Washington quarter is seldom encountered in high grade. This spectacular MS67 example is sharply detailed and lustrous, with a few hints of gold and lavender toning. Population: 11 in 67 (1 in 67+), 0 finer (12/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5801, NGC ID# 244H, CoinPlex ID# WQU1936D

**Superb Gem 1936-S Washington Quarter
Vivid Obverse Toning**

- 4779 1936-S MS67 PCGS. CAC.** The 1936-S Washington quarter was saved in roll quantities at the time of issue, making some high-grade examples, like the present coin, available to present-day collectors. This well-detailed Superb Gem displays vivid shades of burnt-orange and lilac toning on the obverse, with vibrant mint luster on both sides. Population: 27 in 67 (1 in 67+), 0 finer (12/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5802, NGC ID# 244J, CoinPlex ID# WQU1936S

- 4780 1937 MS67 PCGS. CAC.** An appealing Superb Gem with bright and lustrous surfaces, this piece displays tremendous eye appeal. Neither PCGS nor NGC has assigned a higher numeric grade to a single example (11/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5803, NGC ID# 244K, CoinPlex ID# WQU1937

**Superb Gem 1937-D Washington Quarter
Gorgeous D-Mint Survivor**

- 4781 1937-D MS67 PCGS.** Toning encircles both sides of this Superb Gem, with the colors more pronounced on the obverse. Shades of aqua, red, and golden-apricot appear. The mint luster further enhances the visual appeal of this impressively preserved example. This coin is tied for numerically finest certified at both PCGS and NGC (11/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5804, NGC ID# 244L, CoinPlex ID# WQU1937D

Lustrous MS67+ 1937-D Quarter

- 4782 1937-D MS67+ PCGS.** Early Denver Mint quarters have low mintage, and the 1937-D is no exception. From the mintage of 7,189,600 pieces, a number of original rolls were set aside by collectors of the day. However, most such coins are MS64 to MS65, held back by marks on the portrait, fields, or eagle's breast. The current lustrous Superb Gem is well struck and shows peach-gold, ruby-red, and aquamarine shades along the left borders. Population: 32 in 67 (1 in 67+), 0 finer (12/12). PCGS# 5804, NGC ID# 244L, CoinPlex ID# WQU1937D

**1937-S Washington Quarter, MS67
No Numerically Finer Coins at PCGS**

- 4783 1937-S MS67 PCGS. CAC.** Vivid shades of sea-green, gray, and lavender toning blanket the well-preserved surfaces of this spectacular Superb Gem. The design elements are sharply detailed throughout and vibrant mint luster shines through the patina. Population: 22 in 67 (2 in 67+), 0 finer (12/12). PCGS# 5805, NGC ID# 244M, CoinPlex ID# WQU1937S

**Superb Gem 1937-S Quarter
Multicolor Toning, Low Mintage**

- 4784 1937-S MS67 PCGS Secure. CAC.** The 1937-S is the lowest mintage issue aside from the two first-year keys. Examples were saved by far-sighted collectors, but most such pieces grade MS64 or so today. Hardly any can compete with the present unabraded Superb Gem, which displays richly dappled sea-green, rose-red, honey-gold, and stone-gray toning. Population: 22 in 67 (2 in 67+), none finer (12/12).

From The David Poole Collection of Silver Washington Quarters.
PCGS# 5805, NGC ID# 244M, CoinPlex ID# WQU1937S

- 4785 1938 MS67 NGC.** Intense luster is apparent on the essentially untuned surfaces of this Superb Gem. It is well struck and nicely preserved. The 1938 quarter is elusive in high grade. Census: 58 in 67, 1 finer (12/12). NGC ID# 244N, PCGS# 5806, CoinPlex ID# WQU1938

- 4786 1938 MS67 PCGS. CAC.** This Superb Gem is lustrous and well-struck. The reverse exhibits a hint of golden-orange color and a subtle, striated gray patina appears near the top of the reverse. Population: 39 in 67 (3 in 67+), 0 finer (11/12).

From The David Poole Collection of Silver Washington Quarters.
PCGS# 5806, NGC ID# 244N, CoinPlex ID# WQU1938

- 4787 1938-S MS67 PCGS. CAC.** A brilliant satin luster provides lovely visual appeal to this Superb Gem. This splendidly preserved example is well-struck. Population: 37 in 67 (2 in 67+), 0 finer (11/12).

From The David Poole Collection of Silver Washington Quarters.
PCGS# 5807, NGC ID# 244P, CoinPlex ID# WQU1938S

**1939 Washington Quarter, MS68
None Certified Finer**

- 4788 1939 MS68 PCGS Secure. CAC.** A stunning MS68 Washington quarter, with sharply detailed design elements throughout and vibrant mint luster, under shades of apple-green and lavender toning. Eye appeal is extraordinary. Population: 3 in 68, 0 finer (12/12).

From The David Poole Collection of Silver Washington Quarters.
PCGS# 5808, NGC ID# 244R, CoinPlex ID# WQU1939

- 4789 1939-D MS67 PCGS Secure. CAC.** Both sides of this Superb Gem are highly lustrous with brilliant mint frost. Subtle hues of light peach and ice-blue toning appear on the obverse along with a few minor contact marks. Neither PCGS nor NGC has awarded a higher numeric grade to a single example (11/12).

From The David Poole Collection of Silver Washington Quarters.
PCGS# 5809, NGC ID# 244S, CoinPlex ID# WQU1939D

**1939-S Washington Quarter, MS67
Low-Mintage Better Date**

- 4790 1939-S MS67 PCGS.** A spectacular Superb Gem, from a small mintage of 2.6 million pieces, this delightful coin displays brilliant surfaces, with just a touch of champagne-gold on the obverse, and vibrant mint luster on both sides. The design elements are sharply detailed throughout and there are no visible signs of contact. Population: 27 in 67, 0 finer (12/12). PCGS# 5810, NGC ID# 244T, CoinPlex ID# WQU1939S

**1939-S Washington Quarter, MS67
Sharply Detailed, Lustrous Example**

- 4791 1939-S MS67 PCGS. CAC.** The 1939-S Washington quarter claims a smallish mintage of 2.6 million pieces, and examples in Superb Gem condition are quite rare. This attractive Superb Gem exhibits sharply detailed design elements and vibrant mint luster, with a few hints of light gold patina. Population: 27 in 67, 0 finer (12/12). PCGS# 5810, NGC ID# 244T, CoinPlex ID# WQU1939S

**Superb Gem 1939-S Quarter
Tremendous Visual Appeal, None Finer**

- 4792 1939-S MS67 PCGS Secure. CAC.** The 1939-S Washington quarter is a better date in the series, from a mintage of 2.6 million pieces. This impressive, well-preserved Superb Gem displays tremendous eye appeal with sharply detailed design elements and vibrant mint luster. Neither PCGS nor NGC has awarded a higher grade to one of these examples (11/12).

From The David Poole Collection of Silver Washington Quarters.
PCGS# 5810, NGC ID# 244T, CoinPlex ID# WQU1939S

- 4793 1940 MS67 PCGS. CAC.** Brilliant iridescent shades of the rainbow cover portions of both sides of this Superb Gem. The colors provide this example with attractive eye appeal. PCGS has only assigned a higher numeric grade to a single example (12/12). PCGS# 5811, NGC ID# 244U, CoinPlex ID# WQU1940

**1940 Washington Quarter, MS67+
Only One Numerically Finer at PCGS**

- 4794 1940 MS67+ PCGS. CAC.** This impressive high-end Superb Gem displays brilliant centers surrounded by vivid shades of apple-green and amber toning, with vibrant mint luster underneath. The design elements are sharply detailed throughout, and eye appeal is outstanding. PCGS has certified only one numerically finer example (12/12). PCGS# 5811, NGC ID# 244U, CoinPlex ID# WQU1940

**Superb Gem 1940-D Quarter
Tied for Finest PCGS-Graded**

- 4795 1940-D MS67 PCGS. CAC.** As one of only 22 Superb Gems certified by PCGS, with none at MS68 or finer levels (11/12), this 1940-D quarter is a coin of great importance to Registry collectors. Golden and russet toning covers a large portion of the obverse while the reverse is almost entirely free of color other than the extreme outer edges.
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5812, NGC ID# 244V, CoinPlex ID# WQU1940D

- 4796 1940-S MS67 PCGS. CAC.** The otherwise lilac tinged surfaces display blushes of apricot-champagne iridescence. Rich, vibrant mint frost swirls around both sides in true cartwheel fashion. This Superb Gem displays tremendous visual allure. Population: 49 in 67 (1 in 67+), 1 finer (11/12).
Ex: Charlotte ANA Signature (Heritage, 3/2003), lot 5810, which realized \$1,207.50.
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5813, NGC ID# 244W, CoinPlex ID# WQU1940S

- 4797 1940-S MS67 PCGS. CAC.** Subtle hints of gold shades appear on this Superb Gem piece. Strongly lustrous with fantastic eye appeal for this San Francisco issue. PCGS and NGC have each assigned higher numeric grades to only one example (11/12). PCGS# 5813, NGC ID# 244W, CoinPlex ID# WQU1940S

- 4798 1940-S MS67 PCGS. CAC.** Hints of soft russet color gravitate to the margins of this highly lustrous Superb Gem. This is a well struck and cared for S-mint quarter. Population: 49 in 67 (1 in 67+), 1 finer (12/12). PCGS# 5813, NGC ID# 244W, CoinPlex ID# WQU1940S

**1941 Washington Quarter, MS67+
Multicolor Toning**

- 4799 1941 MS67+ PCGS. CAC.** This high-end Superb Gem displays speckled apple-green and lavender-gray toning over pristine surfaces that radiate vibrant mint luster. The design elements are sharply detailed and there are no signs of contact. Eye appeal is quite strong. Population: 86 in 67 (4 in 67+), 1 finer (12/12). PCGS# 5814, NGC ID# 244X, CoinPlex ID# WQU1941

- 4800 1941-D MS67 PCGS. CAC.** A gorgeous Superb Gem, this brilliant coin is close to technical perfection and shines brightly with a bold, satiny finish. Population: 23 in 67 (4 in 67+), 1 finer (11/12).
Ex: November Signature (Heritage, 11/2003), lot 6413, which realized \$3,450.
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5815, NGC ID# 244Y, CoinPlex ID# WQU1941D

**1942 Washington Quarter, MS67+
None Certified Finer**

- 4801 1942 MS67+ PCGS Secure. CAC.** This high-end Superb Gem displays hints of apple-green and lavender toning on the well-preserved, mostly brilliant surfaces. The design elements are sharply detailed and both sides radiate vibrant mint luster. Population: 27 in 67 (3 in 67+), 0 finer (12/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5817, NGC ID# 2452, CoinPlex ID# WQU1942

**1942-D Washington Quarter, MS62
Doubled Die Obverse, FS-101**

- 4802 1942-D Doubled Die Obverse, MS62 NGC. FS-101.** Doubling is apparent in LIBERTY, the date, and IN GOD WE TRUST. FS-101 is one of the most popular Washington quarter varieties and always commands a significant premium. Dark golden-brown and amber toning graces the surfaces of both sides, with vibrant mint luster underneath. NGC ID# 2453, PCGS# 5818, CoinPlex ID# WQU1942D

**Doubled Die Obverse FS-101
Near-Gem 1942-D Quarter**

- 4803 1942-D Doubled Die Obverse MS64 PCGS. CAC. FS-101.** This bold and popular doubled die is listed in the Guide Book. The broad spread is most obvious on LIBERTY, where the L and E show notching and the two vertical strokes of the B are plain. A sharply struck near-Gem that boasts booming luster, a pristine reverse, and only minor obverse contact. Population: 2 in 64, 0 finer (11/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 95818, CoinPlex ID# WQU1942DDDO

- 4804 1942-S MS67 PCGS. CAC.** Trumpet tail S. Light ice-blue toning graces this lustrous Superb Gem. Well struck aside from softness on DOLLAR and the final letters in LIBERTY. Minor grazes on the right obverse field. Population: 33 in 67 (2 in 67+), 1 finer (11/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5819, NGC ID# 2454, CoinPlex ID# WQU1942S

**Rare Near-Mint Guide Book FS-103
Doubled Die Obverse 1943 Quarter**

- 4805 1943 Doubled Die Obverse AU58 PCGS. CAC. FS-103.** The Guide Book doubled die variety, similar in appearance to the also-famous 1943-S doubled die. IN GOD WE TRUST and the date are strongly doubled, as are the initial letters in LIBERTY. Lustrous and minimally abraded with delicate almond-gold and stone-gray toning. A different example of this variety, also graded AU58 by PCGS but without a CAC seal, realized \$9,200 as lot 5873 in our January 2012 FUN Signature.
From The David Poole Collection of Silver Washington Quarters.
PCGS# 95820, CoinPlex ID# WQU1943DDO

**MS67+ 1943-D Quarter
Lustrous World War II Issue**

- 4806 1943-D MS67+ PCGS. CAC.** Deeper blushes of fire-red and lemon-gold are confined to the margin. The fields and devices display lightly blended shades of straw-gold and lime-green. A lustrous and crisply struck Superb Gem, virtually unimprovable within the Registry. Population: 46 in 67 (1 in 67+), 1 finer (12/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5821, NGC ID# 2456, CoinPlex ID# WQU1943D

- 4807 1943-S MS67 PCGS. CAC.** Large S. Delicate golden patina adorns the lustrous and pristine surfaces of this World War II San Francisco quarter. The strike is full except on the tops of AMERICA.
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5822, NGC ID# 2457, CoinPlex ID# WQU1943S

**Colorful MS66 1943-S Quarter
Doubled Die Obverse, FS-101**

- 4808 1943-S Doubled Die Obverse MS66 PCGS. CAC. FS-101.** Large S. IN GOD WE TRUST is obviously die doubled clockwise. The date and LIBERTY show notching and thick lettering. Apple-green, sun-gold, and cherry-red toning embraces the obverse. The reverse displays light olive patina. A lustrous and nicely struck high grade representative. Population: 4 in 66 (1 in 66+), 0 finer (11/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5823, CoinPlex ID# WQU1943SDDO

**1944 Washington Quarter, MS67+
Finest PCGS-Graded Example**

- 4809 1944 MS67+ PCGS. CAC.** An incredible Superb Gem, this is the only MS67+ that PCGS has certified, with none in finer grades (11/12), making it the finest PCGS-certified surviving example from a mintage of more than 100 million coins. Bright, lustrous surfaces provide exceptional eye appeal to this coin.
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5824, NGC ID# 2458, CoinPlex ID# WQU1944

1944-D Quarter, MS67+

- 4810 1944-D MS67+ PCGS. CAC.** Dappled gold and jade-green patina covers this highly lustrous high-grade Superb Gem example. Minor die cracks appear on Washington's forehead and cheek. The coin displays only a couple of contact marks and they are extremely minor. Population: 84 in 67 (6 in 67+), 1 finer (11/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5825, NGC ID# 2459, CoinPlex ID# WQU1944D

**1944-D Washington Quarter, MS67+
Only One Finer Specimen at PCGS**

- 4811 1944-D MS67+ PCGS. CAC.** The brilliant centers of this high-end Superb Gem are surrounded by vivid shades of apple-green and lilac toning, creating a dazzling play of colors. Vibrant mint luster radiates from both sides and the design elements are sharply detailed throughout. Eye appeal is tremendous. Population: 85 in 67 (6 in 67+), 1 finer (12/12). PCGS# 5825, NGC ID# 2459, CoinPlex ID# WQU1944D
- 4812 1944-S MS67+ PCGS.** Knob S. This high grade World War II quarter offers dynamic luster and only a wisp of green-gold toning. Well struck save for a few peripheral letters. Population: 88 in 67 (5 in 67+), 3 finer (12/12). PCGS# 5826, NGC ID# 245A, CoinPlex ID# WQU1944S
- 4813 1945 MS67 PCGS. CAC.** Attractive toning largely rings the obverse of this Superb Gem, with the colors ranging from hazel to frosted mint-green, with shimmering violet and a few splashes of red as well. Population: 17 in 67, 1 finer (11/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5827, NGC ID# 245B, CoinPlex ID# WQU1945
- 4814 1945-D MS67 PCGS. CAC.** The lustrous, untuned surfaces of this Superb Gem have a satin-like finish. The design elements are well struck. This piece exudes excellent eye appeal. Population: 26 in 67, 0 finer (12/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5828, NGC ID# 245C, CoinPlex ID# WQU1945D
- 4815 1945-S MS67 PCGS. CAC.** Exquisite dappled aquamarine and golden-brown endow this lustrous high grade quarter. The strike is sharp at the centers and shows only minor blending on the peripheral legends. Population: 36 in 67 (1 in 67+), 0 finer (11/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5829, NGC ID# 245D, CoinPlex ID# WQU1945S

- 4816 1946 MS67 PCGS. CAC.** The satiny untuned surfaces of this Superb Gem yield well defined design features. This virtually pristine example exhibits great eye appeal. Population: 21 in 67 (1 in 67+), 0 finer (12/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5830, NGC ID# 245E, CoinPlex ID# WQU1946

**Richly Toned 1947-S Quarter, MS68
Tied With Two Others as Highest PCGS-Graded**

- 4817 1947-S MS68 PCGS. CAC.** A gorgeous MS68 quarter, this coin is immensely lustrous with a wide ring of vibrant rainbow toning encircling each side. The rich gold and dark fuchsia colors on the reverse are particularly striking. The 1947-S is a low mintage issue, since only 5.5 million pieces were produced, and this high-grade example should be of great interest to the Registry Set collector. NGC has graded only two pieces as MS68 and neither PCGS nor NGC has certified an example in a higher grade, with this example one of only 3 PCGS-graded pieces at this level (11/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5835, NGC ID# 245K, CoinPlex ID# WQU1947S

Vibrantly Toned 1948 Quarter, MS67+

- 4818 1948 MS67+ PCGS Secure. CAC.** Iridescent toning in shades of lime-green, bright yellow, fuchsia, and deep purple envelops the obverse of this high-end Superb Gem. An area with similar shades frames approximately half of the reverse periphery. A die crack extends almost the entire length of the eagle's right wing along the outer edge. Population: 74 in 67 (3 in 67+), 1 finer (11/12).
From The David Poole Collection of Silver Washington Quarters. PCGS# 5836, NGC ID# 245L, CoinPlex ID# WQU1948

**MS67+ 1950 Quarter
Tied With One Other for Highest Graded**

- 4819 1950 MS67+ PCGS Secure. CAC.** Strikingly original, this piece exhibits excellent luster. Subtle shades of ice-green toning appear on both sides and the piece exhibits a number of minor die cracks. This is one of only two MS67+ examples graded by PCGS, with none higher, and NGC has not awarded a grade above the 67 level to any pieces (11/12).
From The David Poole Collection of Silver Washington Quarters. PCGS# 5841, NGC ID# 245S, CoinPlex ID# WQU1950

**White MS66 1950-D/S Quarter
High Grade Guide Book Overmintmark**

- 4820 1950-D/S MS66 PCGS. CAC. FS-601.** Ex: Michael Fuller Collection. The upper loop of the S emerges above the overmintmark D. This important *Guide Book* variety is much rarer in better Mint State grades than its 1950-S/D counterpart. The essentially brilliant surfaces are lustrous and crisply struck. Only delicate grazes on the obverse field and motifs determine the grade. Minor strike doubling on the Denver mintmark is usual for the variety, as is the slender horizontal die break on the eagle's head. Population: 7 in 66, 1 finer (11/12).
Ex: Michael Fuller Collection (Heritage, 11/2007), lot 60895, which realized \$23,000.
From The David Poole Collection of Silver Washington Quarters. PCGS# 5843, NGC ID# 245U, CoinPlex ID# WQU1950DS

- 4821 1950-S MS67 PCGS. CAC.** The lustrous surfaces of this Superb Gem are untuned save for a light gold splash beneath the obverse motto. Both sides are well impressed and free of mentionable marks. Population: 63 in 67 (4 in 67+), 0 finer (12/12). PCGS# 5844, NGC ID# 245V, CoinPlex ID# WQU1950S

- 4822 1950-S MS67 PCGS. CAC.** A frosty Superb Gem, as fine as any that PCGS has certified (12/12). It has rich lilac, blue, gold, and iridescent toning on both sides, and the surfaces are absolutely smooth. PCGS# 5844, NGC ID# 245V, CoinPlex ID# WQU1950S

**1950-S Washington Quarter, MS67+
Tied for Finest PCGS-Graded**

- 4823 1950-S MS67+ PCGS. CAC.** Moderately toned, this Superb Gem displays a patchwork of gold, peach, russet and iridescent green patina on the obverse. The reverse is largely untoned with gold and russet shades appearing primarily at the lower edge. Population: 62 in 67 (4 in 67+), 0 finer (11/12).
From *The David Poole Collection of Silver Washington Quarters*.
PCGS# 5844, NGC ID# 245V, CoinPlex ID# WQU1950S

**1950-S Washington Quarter, MS67+
Brilliant, Lustrous Example**

- 4824 1950-S MS67+ PCGS. CAC.** The 1950-S Washington quarter is easily located in grades through the Gem level, but high-end Superb Gems, like the present coin, are very scarce. This spectacular specimen displays well-preserved brilliant surfaces, with vibrant mint luster and sharply detailed design elements. Population: 63 in 67 (4 in 67+), 0 finer (12/12). PCGS# 5844, NGC ID# 245V, CoinPlex ID# WQU1950S

**MS66 1950-S/D Quarter
Ex: Walser, Canniff**

- 4825 1950-S/D MS66 PCGS. CAC. FS-601. Ex: Walser.** Light olive-gold patina ensures the originality of this highly lustrous Premium Gem. The centers are well struck, and only a few peripheral right-side letters are not boldly defined. The fields are beautifully preserved, and only a luster graze near the chin denies a finer third party assessment. A high grade for this scarce overmintmark variety, which is more available in MS64 and MS65 grades. Population: 32 in 66 (1 in 66+), 4 finer (11/12).
Ex: Jack Canniff Collection (*Heritage*, 6/2004), lot 8349, which realized \$4,255.
From *The David Poole Collection of Silver Washington Quarters*.
PCGS# 5845, NGC ID# 245V, CoinPlex ID# WQU1950SD

- 4826 1951-D MS67 PCGS. CAC.** Medium intensity multicolored toning gravitates to the obverse margin of this Superb Gem, leaving the center and the reverse brilliant. The radiantly lustrous surfaces have been well cared for. Population: 18 in 67 (1 in 67+), 0 finer (12/12).
From *The David Poole Collection of Silver Washington Quarters*.
PCGS# 5847, NGC ID# 245X, CoinPlex ID# WQU1951D

**1951-D Washington Quarter, MS67+
None Certified Finer**

- 4827 1951-D MS67+ PCGS.** Colorful shades of apple-green, violet, and amber toning blanket the well-preserved surfaces of this high-end Superb Gem Washington quarter. The design elements are sharply detailed and both sides radiate vibrant mint luster. Eye appeal is tremendous. Population: 18 in 67 (1 in 67+), 0 finer (12/12).
PCGS# 5847, NGC ID# 245X, CoinPlex ID# WQU1951D

**MS67+ 1952 Quarter
Exquisite Toning**

- 4828 1952 MS67+ PCGS. CAC.** Type A Reverse. Both borders are deep peach-red, but the obverse center is olive-green, while the reverse center displays blended powder-blue and lavender. Pristine and lustrous with a needle-sharp strike. Population: 74 in 67 (2 in 67+), none finer (12/12).
From *The David Poole Collection of Silver Washington Quarters*.
PCGS# 5849, NGC ID# 245Z, CoinPlex ID# WQU1952

**1952-D Quarter, MS67
No Finer PCGS Examples**

- 4829 1952-D MS67 PCGS. CAC.** Irregular orange and copper-russet toning appears primarily on the left side of the obverse, while a small area of multicolored iridescence is present on the left side of the reverse. The glistening satin luster is full, as one should expect for the assigned grade. A couple of tiny marks appear on Washington's cheek and lower jaw. In the intervening years since this piece last graced one of our auctions, only two additional pieces have achieved the MS67 grade and there continue to be no finer examples from PCGS (11/12).

Ex: Central States Signature (Heritage, 5/2005), lot 7740.

From The David Poole Collection of Silver Washington Quarters. PCGS# 5850, NGC ID# 2462, CoinPlex ID# WQU1952D

**1952-S Washington Quarter, MS68
Tied for Finest Certified at PCGS**

- 4830 1952-S MS68 PCGS Secure. CAC.** From a substantial mintage of 13.7 million pieces, the 1952-S Washington quarter is readily available in most grades, but few survivors can match the quality of the present coin. This magnificent MS68 specimen is patinated in shades of lavender-gray and dark green, with vibrant mint luster underneath and incredible eye appeal. Population: 3 in 68, 0 finer (12/12).

From The David Poole Collection of Silver Washington Quarters. PCGS# 5851, NGC ID# 2463, CoinPlex ID# WQU1952S

- 4831 1953 MS67 PCGS. CAC.** A spectacular Superb Gem Washington quarter, with sharply detailed design elements and vibrant mint luster, under shades of golden-brown and lavender-gray toning. Population: 38 in 67 (1 in 67+), 0 finer (12/12).

From The David Poole Collection of Silver Washington Quarters. PCGS# 5852, NGC ID# 2464, CoinPlex ID# WQU1953

- 4832 1953-D MS67 PCGS Secure.** Whispers of very light violet and yellow-green toning rest on the radiantly lustrous surfaces of this Superb Gem. this is a sharply defined and impeccably preserved specimen. Population: 18 in 67, 0 finer (12/12).

From The David Poole Collection of Silver Washington Quarters. PCGS# 5853, NGC ID# 2465, CoinPlex ID# WQU1953D

**Superb Gem 1954-D Quarter
Among the Finest Known**

- 4833 1954-D MS67 PCGS. CAC.** Without a doubt, those completing PCGS Registry Sets will be vying for this Superb Gem. The nearly perfect surfaces are a necessary requirement for this lofty grade, however the toning adds to the visual allure of this piece. Liberal splashes of olive-green, golden-brown and bright red appear on the obverse. Though not as pronounced, the toning on the reverse includes shades of ice-blue and golden-brown with a few small areas of various shades of red. Neither PCGS nor NGC has awarded a higher numeric grade to any examples, with PCGS's Population Report listing 8 in 67 (1 in 67+), 0 finer (11/12).

From The David Poole Collection of Silver Washington Quarters. PCGS# 5856, NGC ID# 2468, CoinPlex ID# WQU1954D

- 4834 1954-S MS67 PCGS. CAC.** An immaculate branch mint quarter, this Superb Gem displays gorgeous patination in iridescent apple-green, cherry-red, russet, and stone-gray shades. Potent luster encompasses the evenly struck surfaces. Population: 36 in 67 (1 in 67+), 1 finer (11/12).

From The David Poole Collection of Silver Washington Quarters. PCGS# 5857, NGC ID# 22FU, CoinPlex ID# WQU1954S

- 4835 1955 MS67 PCGS. CAC.** A melange of purple, gold, crimson, and aqua-green patina cascades over the lustrous surfaces of this sharply struck Superb Gem. A couple of minute obverse marks do not from the beautiful overall eye appeal. Population: 25 in 67, 0 finer (12/12).

From The David Poole Collection of Silver Washington Quarters. PCGS# 5858, NGC ID# 2469, CoinPlex ID# WQU1955

**1956-D Washington Quarter, MS67
Attractively Toned**

- 4836 1956-D MS67 PCGS Secure. CAC.** The obverse border has attractive golden-brown color, while the reverse has speckled russet patina. Well struck with good luster and generally clean surfaces. There is a patch of raised die polish lines on the neck of Washington, as struck. The mintmark appears to be very slightly repunched, with the secondary image directly east.

From The David Poole Collection of Silver Washington Quarters. PCGS# 5861, NGC ID# 246C, CoinPlex ID# WQU1956D

- 4837 1958 MS67+ PCGS. CAC.** A beautifully toned and well-preserved example, this piece displays a range of colors on both sides, with light gold, sunset-orange, bright pink, lavender, and aqua appearing on the reverse. The shades are particularly prominent on the eagle's wing at right. This is one of only two MS67 examples to receive the Plus designation from PCGS and they have not graded any numerically finer examples (11/12).

From The David Poole Collection of Silver Washington Quarters. PCGS# 5864, NGC ID# 246F, CoinPlex ID# WQU1958

**Attractively Toned 1958-D Quarter, MS67+
Tied With Two Others as Finest PCGS-Graded**

- 4838 1958-D MS67+ PCGS. CAC.** Attractive iridescent hues frame the obverse of this high-end Superb Gem. Only a portion of Washington's neck remains free of color. Rainbow toning also runs around the outer edges of the lower half of the reverse. This piece is tied with two others as finest PCGS-graded (12/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5865, NGC ID# 246G, CoinPlex ID# WQU1958D

**Superb Gem 1959 Quarter
Tied for Finest at PCGS**

- 4839 1959 MS67 PCGS. CAC.** Prior to 1959, Mint Sets were issued in cardboard and paper holders with a high sulfur content that created lovely iridescent toning. However, beginning in 1959, the Mint switched to thin plastic packaging that protected the coins from toning. For that reason, 1959 through 1964 silver coins are seldom found with any toning. This impressive exception to that rule exhibits lovely gold, blue, and violet on both sides, with brilliant underlying mint frost. This nearly perfect example is tied with just two others as the finest that PCGS has certified (11/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5866, NGC ID# 246H, CoinPlex ID# WQU1959

Patinated Superb Gem 1959-D Quarter

- 4840 1959-D MS67 PCGS Secure. Ex: Stella Colbert.** Fully toned in jade-green, fire-red, and plum-mauve shades. Coruscating luster sweeps nearly pristine surfaces. Those in search of the finest quality patinated 1959-D quarter need look no further. Population: 6 in 67, none finer (11/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5867, NGC ID# 246J, CoinPlex ID# WQU1959D

**1960 Washington Quarter, MS67
Brilliant Surfaces, Vibrant Luster**

- 4841 1960 MS67 PCGS. CAC.** There is not a trace of toning on either side of this richly frosted Superb Gem. A fully defined coin for the Washington quarter collector who demands the ultimate in technical quality. Population: 9 in 67, 0 finer (12/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5868, NGC ID# 246K, CoinPlex ID# WQU1960

**Superb Gem 1960 Washington Quarter
No Finer Specimens at PCGS**

- 4842 1960 MS67 PCGS. CAC.** Intermingled shades of apple-green, lavender, and cerulean-blue toning enhance the well-preserved surfaces of this magnificent Superb Gem. The design elements exhibit razor-sharp definition throughout and vibrant mint luster shines through the toning. Population: 9 in 67, 0 finer (12/12).
PCGS# 5868, NGC ID# 246K, CoinPlex ID# WQU1960

**Superb Gem 1960-D Quarter
Sharply Detailed and Lustrous**

- 4843 1960-D MS67 PCGS. CAC.** Attractive shades of sea-green and lavender toning blanket the surfaces of this sharply detailed Superb Gem. Vibrant mint luster is evident under the toning and overall eye appeal is terrific. Population: 8 in 67, 0 finer (12/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5869, NGC ID# 246L, CoinPlex ID# WQU1960D

**1960-D Washington Quarter, MS67
Among the Finest Certified**

- 4844 1960-D MS67 PCGS. CAC.** This spectacular Superb Gem is evenly toned in vivid shades of apple-green and lavender-gray, with vibrant mint luster under the toning. The design elements are sharply detailed throughout and there are no mentionable signs of contact. Population: 8 in 67, 0 finer (12/12). PCGS# 5869, NGC ID# 246L, CoinPlex ID# WQU1960D

**Lustrous Superb Gem 1961 Quarter
None Finer at PCGS or NGC**

- 4845 1961 MS67 PCGS Secure.** This Superb Gem is lustrous and well-struck. Subtle hints of lilac add to the eye appeal. A few minor marks appear on each side. This piece would make a great addition to a PCGS Registry Set. Neither major service has assigned a higher grade to a single example. Population: 3 in 67, 0 finer (11/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5870, NGC ID# 246M, CoinPlex ID# WQU1961

**1962 Washington Quarter, MS67
Vivid Toning and Luster**

- 4846 1962 MS67 PCGS. CAC.** This delightful Superb Gem displays shades of violet, apple-green, and amber patina, with vibrant mint luster and sharply detailed design elements. The 1962 Washington quarter is one of the more difficult to locate issues of the later silver series. Population: 11 in 67, 0 finer (12/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5872, NGC ID# 246P, CoinPlex ID# WQU1962

Superb Gem 1963 Quarter

- 4847 1963 MS67 PCGS. CAC. Thick Letters Obverse. Type A Reverse.** This flashy Superb Gem is virtually immaculate and displays only a wisp of sun-gold toning. The strike is intricate. Although the 1963 still exists in quantity within 90% Uncirculated bags, such pieces are well abraded and cannot compare with the eye appeal of the present lot. Population: 7 in 67, 0 finer (12/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5874, NGC ID# 246S, CoinPlex ID# WQU1963

**Very Attractive Superb Gem 1963-D Quarter
Tied With Three Other PCGS MS67 Pieces
None Finer**

- 4848 1963-D MS67 PCGS Secure. CAC.** Lustrous and beautiful with a bold strike, this Superb Gem displays tremendous eye appeal. Very subtle hints of toning appear when the coin is rotated. Only a few contact marks appear and they are minor. A few drops of translucent residue are noted near 8 o'clock on the reverse. The last PCGS-graded 1963-D example we offered at this grade level, a nicely toned piece, realized \$16,100 in our April 2012 Central States Signature Auction as lot 4331. The present example will certainly appeal to PCGS Registry Set collectors. Neither PCGS nor NGC has assigned a higher numeric grade to a single piece. Population: 4 in 67, 0 finer (11/12).
From The David Poole Collection of Silver Washington Quarters. PCGS# 5875, NGC ID# 246T, CoinPlex ID# WQU1963D

**Patinated MS67 1964 Quarter
Ex: Patrick Mullen**

- 4849 1964 MS67 PCGS. CAC.** Ex: Patrick Mullen Collection. Aquamarine margins encompass sun-gold and rose-red interiors. Though the 1964 mintage is remarkably high, as it was a "fixed date" issue struck until the silver planchets were coined, few examples can match the eye appeal of the present pristine piece.
Ex: Patrick Mullen Collection (Heritage, 1/2004), lot 6504, which realized \$7,187.50.
From The David Poole Collection of Silver Washington Quarters. PCGS# 5876, NGC ID# 246U, CoinPlex ID# WQU1964
- 4850 1964-D MS67 PCGS. CAC.** Soft orange-gold and violet patina run over the radiantly lustrous surfaces of this Superb Gem. Nicely preserved and well struck on both sides. Population: 34 in 67 (1 in 67+), 0 finer (12/12).
From The David Poole Collection of Silver Washington Quarters. PCGS# 5877, NGC ID# 246V, CoinPlex ID# WQU1964D

PROOF WASHINGTON QUARTERS

- 4851 1937 PR67 PCGS.** A coating of milky tan-beige coloration partially covers the obverse, while the reverse remains essentially untinted. Fully struck and pristine, a beautiful Superb Gem quarter. Only the 1936 proof issue has a lower mintage. Population: 83 in 67 (2 in 67+), 2 finer (12/12). PCGS# 5976, NGC ID# 27HP, CoinPlex ID# WQP1937

1941 Washington Quarter, PR68 Single Finest Certified at PCGS

- 4852 1941 PR68 PCGS. CAC.** Only 15,287 proof Washington quarters were struck in 1941, using the Variety B reverse, and this magnificent coin is one of the finest survivors. The design elements exhibit razor-sharp definition throughout, with exceptional eye appeal. The deeply reflective surfaces on this piece — the *sole finest certified at PCGS* — could pass for a looking-glass, despite the most imperceptible hints of lime, pink, and gold that appear on the obverse at certain angles. As expected of the grade, even a loupe reveals no sign of contact. Population: 1 in 68, 0 finer (12/12). PCGS# 5980, NGC ID# 27HU, CoinPlex ID# WQP1941

- 4853 1954 PR68 Ultra Cameo NGC.** An absolutely stunning Deep Cameo proof with bold contrast between the fields and devices. Although NGC's data reveals they have assigned higher grades to 12 examples, PCGS has not graded any pieces beyond this level. Census: 36 in 68 Ultra Cameo, 12 finer (12/12). NGC ID# 27HY, PCGS# 95986, CoinPlex ID# WQP1954DC

- 4854 1958 PR68 Deep Cameo PCGS.** Bright untinted surfaces yield pronounced field-motif contrast on both sides. This is a strongly impressed and marvelously preserved example with super eye appeal. Population: 23 in 68 Deep Cameo, 5 finer (12/12). *From The Atlanta Collection.* PCGS# 95990, NGC ID# 27J4, CoinPlex ID# WQP1958DC

- 4855 1958 PR68 Deep Cameo PCGS.** From a mintage of 875,652 pieces, proof 1958 Washington quarters are rare with the Deep Cameo designation. This piece exhibits pronounced contrast, a deep strike, and darkly mirrored fields. Population: 23 in 68 Deep Cameo, 5 finer (12/12). PCGS# 95990, NGC ID# 27J4, CoinPlex ID# WQP1958DC

- 4856 1976-S Silver PR70 Deep Cameo PCGS.** Technically flawless with absolute contrast, this is a perfect representative of the popular Bicentennial quarter proof. Population: 49 in 70 Deep Cameo (11/12).

Ex: Long Beach Signature (Heritage, 5/2009), lot 707. PCGS# 96008, NGC ID# 27JG, CoinPlex ID# WQP1976SSILVDC

WALKING LIBERTY HALF DOLLARS

1916 Half Dollar, MS66 First Walking Liberty Issue

- 4857 1916 MS66 PCGS.** The 1916 Walking Liberty half dollar is always in demand because of its low mintage and its status as a first-year type coin. This example is a spectacular Premium Gem, with a sharp strike and full, satiny luster. Population: 82 in 66 (3 in 66+), 4 finer (11/12).

From The Western Reserve Collection. PCGS# 6566, NGC ID# 24PL, CoinPlex ID# WLM1916

- 4858 1916-D MS63 NGC.** Total production for this first-year branch mint issue barely exceeded 1 million pieces. This shining near-Gem displays satiny luster and is well-struck save for the centers. A few tiny specks appear when the coin is examined closely under magnification, including one near the center of the eagle's neck. NGC ID# 24PM, PCGS# 6567, CoinPlex ID# WLM1916D

- 4859 1916-D MS65 PCGS.** Various shades of brown appear at the outer edges of both sides of this well-struck example. This Gem is a lovely representative of the low mintage Denver issue that is popular for its obverse mintmark. PCGS# 6567, NGC ID# 24PM, CoinPlex ID# WLM1916D

- 4860 1916-D MS65 PCGS.** A beautifully preserved Gem, this coin displays potent luster and a good strike. This attractive example displays light toning, with slightly more pronounced color appearing on the reverse. All first-year issues of the Walking Liberty type are low-mintage, due to technical delays in introducing the design. Only 56 pieces have been assigned higher numeric grades by PCGS (11/12).

From The Western Reserve Collection. PCGS# 6567, NGC ID# 24PM, CoinPlex ID# WLM1916D

- 4861 1916-D MS65 PCGS.** Occasional splashes of electric-blue and russet gravitate to the obverse borders of this lustrous Gem, leaving the remaining surfaces essentially untinted. A small mark concealed within the branches may well preclude an even finer grade. PCGS# 6567, NGC ID# 24PM, CoinPlex ID# WLM1916D

**Gem 1916-D Half Dollar
Gold CAC Seal**

- 4862 1916-D MS65 PCGS. CAC Gold Label.** Dappled autumn-gold and olive-gray toning enriches this thoroughly lustrous and well struck high grade half dollar. Essentially pristine save for faint grazes on the right obverse field. A low mintage Denver issue popular for its obverse mintmark. Housed in an old green label holder. From *The SPQR Collection of CAC Gold Sticker Coins*. PCGS# 6567, NGC ID# 24PM, CoinPlex ID# WLM1916D

Patinated Premium Gem 1916-D Half

- 4863 1916-D MS66 PCGS.** Deeply dappled tobacco-brown and gunmetal-gray dominate, although the margins also offer jade-green toning. Satiny and sharply struck with virtually immaculate preservation. A magnificent example of this early and low mintage branch mint issue. Encapsulated in an older generation holder. Population: 51 in 66 (1 in 66+), 3 finer (11/12). From *The Western Reserve Collection*. PCGS# 6567, NGC ID# 24PM, CoinPlex ID# WLM1916D

Low-Mintage MS65 1916-S Half

- 4864 1916-S MS65 PCGS.** The first year 1916-S is the lowest mintage San Francisco issue, likely due to difficulties at the Mint from the introduction of the new type. The present lustrous Gem shows delicate gold toning and a bold strike. Marks are confined to faint grazes on the obverse field. Housed in a green label holder. Population: 88 in 65 (1 in 65+), 14 finer (11/12). From *The Western Reserve Collection*. PCGS# 6568, NGC ID# 24PN, CoinPlex ID# WLM1916S

- 4865 1917 MS66 NGC.** Light smoky-gray patination covers the lustrous surfaces of this Premium Gem, to which are added a few scattered darker toning spots. This strongly impressed coin reveals no noticeable contact marks. Census: 39 in 66, 5 finer (12/12). NGC ID# 24PP, PCGS# 6569, CoinPlex ID# WLM1917

- 4866 1917 MS66 PCGS.** While the mintmarked Walker issues of 1917 come in two varieties, the Philadelphia pieces have no such distinction. This brilliant, well-struck Premium Gem displays delicate patina in shades of silver-gray. PCGS has certified only three numerically finer pieces (11/12). From *The Western Reserve Collection*. PCGS# 6569, NGC ID# 24PP, CoinPlex ID# WLM1917

- 4867 1917 MS66 PCGS. CAC.** The lustrous surfaces of this Premium Gem are essentially untuned, though a couple of small toning spots are visible on the upper obverse. This is a sharply struck and nicely preserved piece. Population: 77 in 66, 3 finer (12/12). PCGS# 6569, NGC ID# 24PP, CoinPlex ID# WLM1917

- 4868 1917-D Obverse MS64 PCGS.** Both sides of this near-Gem exhibit a speckled medium gray and sky-blue patina. Lustrous surfaces display sharply struck devices and reveal a few minute contacts that prevent MS65 status. Ex: *West Palm Beach Signature (Heritage, 7/2009)*, lot 680. PCGS# 6570, NGC ID# 24PR, CoinPlex ID# WLM1917DOBV

- 4869 1917-D Obverse MS64 PCGS.** An attractive lustrous near-Gem, this piece exhibits a silver-centered obverse ceding to russet at the rim, while the reverse exhibits deep electric-blue and pinkish-gold patina. A few stray marks are well-hidden within the devices precluding an even finer grade. PCGS# 6570, NGC ID# 24PR, CoinPlex ID# WLM1917DOBV

**1917-D Half Dollar, MS65
Obverse Mintmark**

- 4870 1917-D Obverse MS65 NGC.** This frosty Gem is a beauty with brilliant silver surfaces and full luster, showing sharp design motifs that are far above average for the issue. While the head and skirt lines are a trifle weak, the central thumb is completely outlined. Although scattered marks prevent a higher grade, they are consistent with the MS65 assigned grade. Census: 49 in 65, 3 finer (12/12). NGC ID# 24PR, PCGS# 6570, CoinPlex ID# WLM1917DOBV

**Gem 1917-D Half
Obverse Mintmark**

- 4871 1917-D Obverse MS65 PCGS.** A two-year design variant with the mintmark located below the motto on the obverse. Stunning luster emanates from the surfaces of this Gem that displays traces of light toning and is minimally abraded. Population: 68 in 65 (2 in 65+), 5 finer (11/12). From *The Western Reserve Collection*. PCGS# 6570, NGC ID# 24PR, CoinPlex ID# WLM1917DOBV

- 4872 1917-D Reverse MS64 PCGS. CAC.** Magnification brings out occasional wisps of russet on both sides of this near-Gem Walker, and an impressive strike leaves strong definition on the design features. A few light obverse marks prevents Gem status. PCGS# 6571, NGC ID# 24PS, CoinPlex ID# WLM1917DREV

**1917-S Half Dollar, AU58
Obverse Mintmark**

- 4873 1917-S Obverse AU58 PCGS. CAC.** At one time, a remarkable collection on the PCGS Set Registry was a complete set of Barber half dollars, each coin graded XF45 PCGS. Forming such a collection requires considerable patience. A similar collection would be a complete set of Walking Liberty half dollars with every coin in AU58. Start with this brilliant and lustrous near-Mint specimen, and match the set to this coin. A decade may not be enough time to find all the coins. PCGS# 6572, NGC ID# 24PT, CoinPlex ID# WLM1917SOBV

Near-Gem 1917-S Obverse Half

- 4874 1917-S Obverse MS64 PCGS. CAC.** The 1917-S Obverse is the scarcest of the five mintmark variations of this issue, and it is ranked second in the series next to the 1919-S in rarity in Mint State. This attractive near-Gem exhibits potent luster and is well struck overall, but lacks absolute high point definition (as do almost all early Walkers).
From The Western Reserve Collection. PCGS# 6572, NGC ID# 24PT, CoinPlex ID# WLM1917SOBV

**1918 Half Dollar, Gem Uncirculated
Brilliant and Lustrous**

- 4875 1918 MS65 PCGS.** The 1918 Walking Liberty half dollar was produced in large numbers, but the survival rate was low for this issue. Examples in Gem Mint State condition are surprisingly elusive. This coin is a spectacular Gem, with detailed design elements and brilliant, lustrous surfaces. PCGS has assigned higher numerical grades to a mere 8 examples (11/12).
From The Western Reserve Collection. PCGS# 6574, NGC ID# 24PV, CoinPlex ID# WLM1918

**Lightly Toned Gem 1918 Half Dollar
Green Label Holder**

- 4876 1918 MS65 PCGS.** Gently toned tan-gold across a silver base, this lustrous Gem is sharply struck and has a well preserved reverse. The mintage of 6.6 million pieces is relatively plentiful, but Uncirculated pieces are surprisingly scarce with only a small fraction making Gem. Population: 95 in 65, 8 finer (12/12).
Ex: New York Signature (Heritage, 6/2005), lot 5796. PCGS# 6574, NGC ID# 24PV, CoinPlex ID# WLM1918

- 4877 1918-D AU58 PCGS.** Ample luster remains on both sides of this near-Mint State piece. A few small areas of toning appear. This piece displays little actual wear, only the typical incompleteness of strike at the centers. PCGS# 6575, NGC ID# 24PW, CoinPlex ID# WLM1918D

1918-D Walking Liberty Half, MS63

- 4878 1918-D MS63 PCGS.** Atypically lustrous with above-average sharpness over the central devices. Speckled russet and violet toning gravitates to the borders. Golden patina covers large areas of the reverse. Very few contact marks appear and they are minor in nature.
Ex: FUN Signature (Heritage, 1/2006), lot 4016. PCGS# 6575, NGC ID# 24PW, CoinPlex ID# WLM1918D

**1918-D Half Dollar, Near-Gem
Strong Mint Luster**

- 4879 1918-D MS64 PCGS.** The 1918-D is a scarcer issue among early Walkers even though 3.8 million pieces were produced. High grade examples such as this piece are very elusive and rarely encountered any finer. Thick mint luster rolls around each side and subtle hints of toning appear. A few minimal abrasions are noted in the right obverse field, holding this piece from a higher grade.
From The Western Reserve Collection. PCGS# 6575, NGC ID# 24PW, CoinPlex ID# WLM1918D

Brilliant Near-Gem 1918-S Half

- 4880 1918-S MS64 PCGS.** Despite its huge mintage of more than 10 million pieces, the 1918-S Walking Liberty half dollar is not easy to locate in high grade. This example is sharply struck, thoroughly lustrous and untoned with immaculate fields and only minor contact marks. An area of die-polish brilliance appears along the upper reverse on this near-Gem piece.
From The Western Reserve Collection. PCGS# 6576, NGC ID# 24PX, CoinPlex ID# WLM1918S

Appealing Choice 1918-S Walker

- 4881 1918-S MS64 PCGS. CAC.** With a mintage of 10.2 million pieces, the 1918-S is always available in lower (especially circulated) grades. However, in Uncirculated grades it is well-known as one of the more significant strike and condition rarities in the series. This example is especially well-defined on Liberty's head and hand area, but the skirt lines and left side of the eagle's leg are a bit soft, as usual. Mostly brilliant, the peripheries show just a bit of scattered golden and russet toning. This is an exceptional, attractive, and lustrous example of this scarce early issue. It has been almost a decade since this coin appeared in our Baltimore auction. Since that time, PCGS has only assigned higher numeric grades to only 3 pieces, with the count now standing at 32 finer (12/12).
Ex: Baltimore Signature (Heritage, 7/2003), lot 7811. PCGS# 6576, NGC ID# 24PX, CoinPlex ID# WLM1918S

Gem 1918-S Walking Liberty Half Rare Any Finer

- 4882 1918-S MS65 PCGS.** Despite a mintage of more than 10 million pieces, this San Francisco half dollar issue struck in the last year of World War I is a borderline condition rarity at the Gem level and unquestionably so any better. The MS65 coin offered here has broad, subtly frosted luster that is largely silver with just a few faint undercurrents of blue and the occasional top-splash of peach. Better-defined than usually seen for the date, and of course remarkably well-preserved by the same measure. A tiny nick is noted on the sun. Population: 30 in 65 (1 in 65+), 2 finer (12/12).
PCGS# 6576, NGC ID# 24PX, CoinPlex ID# WLM1918S

Near-Gem Elusive 1919 Half

- 4883 1919 MS64 PCGS.** From a low mintage of 962,000 pieces, the 1919 Walking Liberty half dollar is an elusive date in the series. This pleasing near-Gem example exhibits the soft definition usually seen on early series Walkers, however the subtle hints of champagne color add to the attractiveness of this piece.
From The Western Reserve Collection. PCGS# 6577, NGC ID# 24PY, CoinPlex ID# WLM1919

**Lustrous Gem 1919 Half
Low-Mintage Philly Issue**

- 4884 1919 MS65 PCGS.** Dappled tan-brown toning enriches the margins of this low mintage Philadelphia half dollar. Marks are absent and the cartwheel luster is invigorating. The strike shows only minor incompleteness. Housed in a green label holder. Population: 53 in 65, 24 finer (11/12). PCGS# 6577, NGC ID# 24PY, CoinPlex ID# WLM1919

**1919-D Walking Liberty Half, MS62
Low-Mintage Key Issue**

- 4885 1919-D MS62 PCGS.** The 1919-D half dollar is well-known as a condition rarity in Mint State grades. Barely discernible pale rose color appears when this piece is examined closely. The design elements are a bit better impressed than ordinarily seen, but the typical softness is apparent in the centers. Lustrous surfaces reveal just a few minor marks.
From The Western Reserve Collection. PCGS# 6578, NGC ID# 24PZ, CoinPlex ID# WLM1919D

**Lustrous MS62 1919-S Half Dollar
Uncommon So Fine**

- 4886 1919-S MS62 PCGS.** Full mint luster on softly frosted surfaces is the immediately apparent hallmark of this delightful coin from an issue seldom seen in Mint State. Silver-white predominates on each side with a suggestion of gold tint. Strike softness shows in the center obverse, leaving Liberty's head and branch hand soft. Scattered marks preclude an even finer grade, but this coin boasts much eye appeal. PCGS# 6579, NGC ID# 24R2, CoinPlex ID# WLM1919S

- 4887 1920 MS64 PCGS.** A veneer of soft yellow-gold patina runs over the obverse of this near-Gem. The lustrous surfaces are adequately struck. PCGS has seen fewer than 100 pieces finer. PCGS# 6580, NGC ID# 24R3, CoinPlex ID# WLM1920

Bright 1920 Half, MS65+

- 4888 1920 MS65+ PCGS. CAC.** This early Philadelphia issue is plentiful in VF grades but surprisingly rare at the MS65 level. This brilliant, untoned example provides sweeping luster and a virtually mark-free appearance. The reverse is sharply detailed. Population: 82 in 65 (2 in 65+), 13 finer (11/12).
From The Western Reserve Collection. PCGS# 6580, NGC ID# 24R3, CoinPlex ID# WLM1920

- 4889 1920-D AU55 PCGS.** Areas of light green-gray patina appear on portions of the obverse, primarily near the top. This is a lovely Choice AU example of this challenging issue. PCGS# 6581, NGC ID# 24R4, CoinPlex ID# WLM1920D

**1920-S Half Dollar, MS63
Conditionally Scarce**

- 4890 1920-S MS63 NGC. CAC.** Delicate golden-brown wisps grace the satin surfaces of this Select Mint State beauty. The usual central weakness is present, but the overall appearance is excellent, especially where heavy die polishing lines provide a slightly reflective look. This exceptional half dollar will make a nice addition to a Select Mint State set of Walkers. NGC ID# 24R5, PCGS# 6582, CoinPlex ID# WLM1920S

- 4891 1921 XF40 PCGS.** The 1921 is a scarce and valuable coin in circulated grades, roughly comparable to the 1921-S. However, in mint condition the S-mint pulls away quickly in rarity and value. This piece displays gunmetal-gray surfaces that exhibit even wear. There are no contact marks worthy of mention. PCGS# 6583, NGC ID# 24R6, CoinPlex ID# WLM1921

- 4892 1921 — Altered Surface — PCGS Genuine. AU Details.** Delicate almond-gold toning visits this lustrous, unblemished, but slightly glossy key date half dollar. Barely a whisper of wear affects the top of the skirt lines. The strike is above average with minor softness on the cheek. Struck from clashed dies with prominent die polish lines near the motto. PCGS# 6583, NGC ID# 24R6, CoinPlex ID# WLM1921

1921 Walking Liberty Half, MS61

- 4893 1921 MS61 NGC.** The 1921 Philadelphia half dollar has the second lowest mintage of the series, making it a high-demand issue among Walking Liberty collectors. Additionally, the 1921 is rated 7th of the 65 issues in the series in overall Mint State rarity. The surfaces of this example are hazy-gray. The central striking details show weakness, but there are no mentionable marks on either side. NGC ID# 24R6, PCGS# 6583, CoinPlex ID# WLM1921

- 4894 1921-D VF20 PCGS.** This stone-gray key date half dollar has bold legends and an unmarked appearance. Two tiny obverse spots near 3 and 11 o'clock. The lowest mintage issue of the series. Housed in a green label holder. PCGS# 6584, NGC ID# 24R7, CoinPlex ID# WLM1921D

AU Sharpness 1921-D Half Only 208,000 Pieces Struck

- 4895 1921-D — Improperly Cleaned — NGC Details. AU.** The 1921-D is the lowest mintage issue of the series, since the Denver Mint was busy striking silver dollars that year. The present stone-gray example shows pockets of luster and is unblemished aside from a couple of hair-thin marks near the skirt and some russet stains near the denomination and designer monogram. NGC ID# 24R7, PCGS# 6584, CoinPlex ID# WLM1921D

1921-D Half Dollar Lowest Mintage Walker

- 4896 1921-D — Cleaning — PCGS Genuine. Unc.** Although the strike is deficient, especially on the obverse, and the surfaces are bright from cleaning, this light champagne toned half dollar remains an attractive representative of the low mintage 1921-D half dollar. Just 208,000 were struck, the lowest total mintage of any issue in the Walking Liberty series. PCGS# 6584, NGC ID# 24R7, CoinPlex ID# WLM1921D

Unc Details Key-Date 1921-D Half Dollar

- 4897 1921-D — Improperly Cleaned — NGC Details. Unc.** Thanks to a mintage of only 208,000 pieces, the 1921-D is one of the more notable low-mintage rarities in the Walking Liberty half dollar series. While this example has dulled, disturbed luster, the result of a past cleaning, it is remarkably well-defined under gold-gray retoning and shows no trace of wear. NGC ID# 24R7, PCGS# 6584, CoinPlex ID# WLM1921D

Pleasing MS62 1921-D Half

- 4898 1921-D MS62 PCGS.** This low mintage key provides the collector an opportunity to acquire this famous rarity at a more affordable grade level. The surfaces are very pleasing with an especially strong strike on each side. Only slight toning appears and the piece displays a very pleasing overall appearance. *From The Western Reserve Collection.* PCGS# 6584, NGC ID# 24R7, CoinPlex ID# WLM1921D

1921-S Walking Liberty Half, XF40 Key Date at XF40 and Above

- 4899 1921-S XF40 PCGS.** In XF and higher grades, the 1921-S is the key to the Walking Liberty series. The mintage of 548,000 pieces was higher than the combined total of its Philadelphia and Denver counterparts, but there were comparatively fewer West Coast collectors. Examples circulated for a longer period, until they reached collector strongholds in the East and Midwest. This example displays a golden-brown patina with luster peeking through on the obverse. The reverse displays a subtle rose-gold patina with dark gray freckles also appearing. PCGS# 6585, NGC ID# 24R8, CoinPlex ID# WLM1921S

- 4900 1923-S AU55 PCGS. CAC.** This impressive Choice AU specimen displays well-detailed design elements and vibrant mint luster, with light shades of champagne-gold toning at the periphery. PCGS# 6586, NGC ID# 24R9, CoinPlex ID# WLM1923S

**1923-S Half Dollar, MS64
Above-Average Strike**

4901 1923-S MS64 PCGS. Dusky gray toning resides on the lustrous surfaces of this frosty Choice Mint State Walking Liberty half dollar. Although shy of a full strike, this piece has a nearly complete thumb at the center of the obverse, with excellent leaf and sandal detail. An important piece, with only 49 finer examples certified by PCGS (12/12). PCGS# 6586, NGC ID# 24R9, CoinPlex ID# WLM1923S

4902 1927-S MS62 PCGS. Luminous surfaces are untuned, and the design elements are generally well brought up except for the usual weakness in the centers. A couple of minute marks are noted on Liberty. PCGS# 6587, NGC ID# 24RA, CoinPlex ID# WLM1927S

Choice 1927-S Walking Liberty Half

4903 1927-S MS64 PCGS. CAC. Satiny luster throughout with a blush of light gold over much of the surfaces. The strike is average for the date with characteristic weakness on Liberty's hand and thumb, as well as the skirt lines. On the reverse we note a number of thin die cracks which can be seen with a glass. About as nice as this date is found; locating a Gem is not only a challenge, but costs significantly more than the present Choice specimen. PCGS# 6587, NGC ID# 24RA, CoinPlex ID# WLM1927S

**Frosty Gem 1927-S Half Dollar
Rare Any Finer**

4904 1927-S MS65 PCGS. Broadly lustrous with the coin's frosty character most visible in the contrast between the prevailing shimmer and a few windows of die-polish brilliance at the upper reverse. A few tiny marks on the softly struck central devices are well within the bounds of the grade range. Population: 59 in 65, 6 finer (12/12). PCGS# 6587, NGC ID# 24RA, CoinPlex ID# WLM1927S

Vibrant 1927-S Half, MS65

4905 1927-S MS65 PCGS Secure. Vibrant luster exudes from both sides of this near-Gem, with subtle rose-peach toning appearing, particularly on the obverse. The design elements display bold definition aside from the usual softness in the central areas. Population: 59 in 65, 6 finer (11/12).
From The Western Reserve Collection. PCGS# 6587, NGC ID# 24RA, CoinPlex ID# WLM1927S

Smooth Gem 1928-S Half Dollar

4906 1928-S MS65 PCGS. The 1928-S is the last S-mint Walker that can truly be called a condition rarity. While production of half dollars at San Francisco did not increase significantly until the 1940s, the number of Mint State survivors increased dramatically beginning with the 1929-S. Slightly dusky honey-gold and pale pink hues are evident, along with infrequent splashes of powder-blue toning and a few freckles. The surfaces are remarkably smooth. Population: 55 in 65, 6 finer (11/12).
From The Western Reserve Collection. PCGS# 6588, NGC ID# 24RB, CoinPlex ID# WLM1928S

4907 1929-D MS64 NGC. A lovely example, this near-Gem displays soft pinkish-gray at the satiny centers with orange toning toward the rims. Dabs and dashes of deep umber toning appear sporadically at the borders.
Ex: Long Beach Signature (Heritage, 9/2010), lot 4243. NGC ID# 24RC, PCGS# 6589, CoinPlex ID# WLM1929D

**1929-D Half Dollar, MS65
Above Average Strike**

4908 1929-D MS65 PCGS. CAC. The pre-1933 Walkers are usually found with below average strikes, so those with strong strike enjoy considerable demand. This satiny Gem has vibrant, essentially untuned silver luster and bold design definition, including nearly full thumb detail at the center of the obverse. PCGS# 6589, NGC ID# 24RC, CoinPlex ID# WLM1929D

High Grade MS66 1929-D Half Dollar

- 4909 1929-D MS66 PCGS.** Ex: Dakota Collection. Pastel gunmetal-blue and sun-gold toning visits this lustrous and lightly abraded high grade better date branch mint half dollar. Liberty's head is well struck and the skirt lines show only minor blending. The Dakota Collection, which consisted of high grade 20th century issues, was purchased by Legend Numismatics for \$2.5 million in September 2011. Population: 60 in 66, 1 finer (11/12).
From The Western Reserve Collection. PCGS# 6589, NGC ID# 24RC, CoinPlex ID# WLM1929D

Visually Appealing Premium Gem 1929-S Half Only One Numerically Finer PCGS-Graded Example

- 4910 1929-S MS66 PCGS. CAC.** Toned in shades of gold, ice-blue, and amber, this Premium Gem Walking Liberty half dollar displays tremendous visual appeal. The design elements, usually weak on this issue, are well-struck with only a few areas of incomplete detail. The mint luster is quite strong, but slightly understated beneath the toning. Population: 40 in 66, 1 finer (11/12).
From The Western Reserve Collection. PCGS# 6590, NGC ID# 24RD, CoinPlex ID# WLM1929S
- 4911 1933-S MS64 NGC.** Attractive satin luster adds to the visual appeal of this near-Gem that displays a hint of champagne toning. Small, scattered freckles of aqua patina appear on the high points of both sides. NGC ID# 24RE, PCGS# 6591, CoinPlex ID# WLM1933S

Gem 1933-S Half

- 4912 1933-S MS65 PCGS.** Small areas of orange, russet, green, and yellow toning appear on this Gem example, primarily on the obverse. That side also exhibits minor contact marks while the reverse is largely unabraded. PCGS has only assigned higher numeric grades to 95 examples (12/12). PCGS# 6591, NGC ID# 24RE, CoinPlex ID# WLM1933S

Premium Gem 1933-S Walking Liberty Half Sharply Detailed, Attractively Toned

- 4913 1933-S MS66 NGC.** The peripheries of this delightful Premium Gem are attractively toned in shades of apple-green, cobalt-blue, and lavender, while the centers remain mostly brilliant. The design elements are sharply detailed throughout, with definite separation between Liberty's thumb and finger. Vibrant mint luster shines through the toning. Census: 80 in 66 (1 in 66+), 3 finer (12/12). NGC ID# 24RE, PCGS# 6591, CoinPlex ID# WLM1933S

Bold 1933-S Walker, MS66

- 4914 1933-S MS66 PCGS. CAC.** The 1933-S half is a remarkably well-produced issue that almost always displays a full strike or one that is very nearly full, as exhibited on this piece. Both sides of this example are fully brilliant with silver surfaces and no toning. Population: 86 in 66 (3 in 66+), 7 finer (11/12).
From The Western Reserve Collection. PCGS# 6591, NGC ID# 24RE, CoinPlex ID# WLM1933S
- 4915 1934 MS67 PCGS.** A well-struck example, this piece displays lustrous, brilliant surfaces that provide tremendous eye appeal. Only 8 pieces have achieved higher numeric grades from PCGS (11/12).
From The Western Reserve Collection. PCGS# 6592, NGC ID# 24RF, CoinPlex ID# WLM1934
- 4916 1934-D MS66 PCGS.** Small D. Light freckles of gold, green, and magenta infrequently adorn the borders of this lustrous Premium Gem. The fields are pristine and any marks are confined to the front wing and Liberty's neck. Well struck on the skirt lines and branch hand.
From The Western Reserve Collection. PCGS# 6593, NGC ID# 24RG, CoinPlex ID# WLM1934D

1934-S Half Dollar, MS66
Only Six Numerically Finer at PCGS

- 4917 1934-S MS66 PCGS.** Totally bright and lustrous, this untoned coin possesses lovely eye appeal. The strike is fairly sharp, with Liberty's thumb showing more definition than usually encountered. As with most of the early mintmarked Walking Liberty half dollars, there are very few that have earned this lofty grade, making this an excellent collector opportunity. Population: 96 in 66 (7 in 66+), 6 finer (11/12).
From The Western Reserve Collection. PCGS# 6594, NGC ID# 24RH, CoinPlex ID# WLM1934S

Premium Gem 1934-S Walker
Fully Struck and Nearly Brilliant

- 4918 1934-S MS66 PCGS.** The 1934-S is the scarcest of the Middle Date issues in the Walking Liberty series from 1934 through 1940. This is a brightly lustrous, shimmering example with complete strike details. The surfaces are nearly brilliant with just the faintest speckling of russet patina present here and there. PCGS# 6594, NGC ID# 24RH, CoinPlex ID# WLM1934S

Superb Gem 1935 Half

- 4919 1935 MS67 PCGS.** A lovely Superb Gem, this 1935 Walker is highly lustrous with brilliant silver surfaces. Subtle hints of color appear on both sides. The 1935 Walking Liberty half dollar claims a large mintage of more than 9 million pieces, but few examples can match the quality and appeal of the present coin. Population: 24 in 67, 1 finer (11/12).
From The Western Reserve Collection. PCGS# 6595, NGC ID# 24RJ, CoinPlex ID# WLM1935

Exceptional 1935-D Half Dollar, MS66

- 4920 1935-D MS66 PCGS.** This issue is nearly impossible to find fully struck. While we do not contend that this Premium Gem offering displays full delineation, it does show bold detail on the gown lines, and partial definition on the thumb and adjacent branches. Bluish-purple surfaces are accented in champagne-gold and exhibit pleasing luster. A few minute grade-consistent marks do not detract. Population: 99 in 66 (1 in 66+), 0 finer (11/12).
From The Western Reserve Collection. PCGS# 6596, NGC ID# 24RK, CoinPlex ID# WLM1935D

- 4921 1935-S MS65 NGC.** The design elements of this Gem are generally well struck save for weakness on the branch hand. The lustrous surfaces are untuned, and a few minuscule marks do not detract. NGC ID# 24RL, PCGS# 6597, CoinPlex ID# WLM1935S

MS66 1935-S Half Dollar
Only Two Finer at PCGS

- 4922 1935-S MS66 PCGS.** The heavy die polish in the fields of this satin Premium Gem creates reflective fields that are unlike most examples of this issue. Both sides have delicate champagne toning with iridescent splashes that create outstanding eye appeal. PCGS has only certified two finer examples of this issue (12/12). PCGS# 6597, NGC ID# 24RL, CoinPlex ID# WLM1935S

1935-S Half Dollar, MS66
Brilliant White Surfaces, Vibrant Luster

- 4923 1935-S MS66 PCGS.** The brilliant surfaces of this delightful Premium Gem radiate especially vibrant mint luster, with outstanding eye appeal. The design elements are well-detailed, with the usual touch of softness on the wreath hand. There are no mentionable signs of contact. PCGS has graded only two numerically finer coins (12/12). PCGS# 6597, NGC ID# 24RL, CoinPlex ID# WLM1935S

**Frosty Premium Gem 1935-S Half Dollar
Shimmering Silver Surfaces**

- 4924 1935-S MS66 PCGS. CAC.** Bold luster adds a frosty shimmer to essentially untoned surfaces on this Depression-era half dollar out of San Francisco. Peripheral detail is solid for the date, though Liberty's brand hand is all but invisible. PCGS has certified only two examples as MS67 or finer (1/212). PCGS# 6597, NGC ID# 24RL, CoinPlex ID# WLM1935S

Desirable MS66 1935-S Half

- 4925 1935-S MS66 PCGS. CAC.** Well struck overall, though Liberty's branch hand shows only minimal definition. The silver-white fields are impressively lustrous and carefully preserved. This Depression-era San Francisco issue is essentially unavailable any finer, with only two such pieces certified by PCGS (11/12).
Ex: Houston Signature (Heritage, 12/2008), lot 1493.
From The Western Reserve Collection. PCGS# 6597, NGC ID# 24RL, CoinPlex ID# WLM1935S

- 4926 1936 MS67 PCGS. CAC.** Fully struck with lightly toned olive-gray surfaces that are radiantly lustrous and virtually pristine, save for a few faint luster grazes in the right obverse field, this is a lovely Superb Gem. Population: 125 in 67 (4 in 67+), 2 finer (11/12).
From The Western Reserve Collection. PCGS# 6598, NGC ID# 24RM, CoinPlex ID# WLM1936

- 4927 1936 MS67+ PCGS. CAC.** Large portions of the obverse periphery exhibit an area of pearly iridescent rainbow color. Scattered splashes of gray, gold-tan, and russet appear primarily on the reverse. Only two examples have received higher numeric grades from PCGS (12/12). PCGS# 6598, NGC ID# 24RM, CoinPlex ID# WLM1936

Superb Gem 1936-D Walker

- 4928 1936-D MS67 PCGS.** The 1936-D Walking Liberty half dollar is a rare issue at the Superb Gem level, and neither of the leading grading services has certified any coins in higher numeric grades (11/12). This spectacular Superb Gem is sharply detailed for a Walking Liberty half, with just a little softness on the central obverse. Areas of iridescent toning as well as freckles appear on both sides, with particularly attractive color appearing at Liberty's foot.
From The Western Reserve Collection. PCGS# 6599, NGC ID# 24RN, CoinPlex ID# WLM1936D

- 4929 1936-S MS66 PCGS.** Areas of golden color enliven this lustrous and crisply struck Gem, particularly on the reverse. PCGS has assigned higher numeric grades to a mere 6 examples (11/12).
From The Western Reserve Collection. PCGS# 6600, NGC ID# 24RP, CoinPlex ID# WLM1936S

**Appealing 1936-S Half, MS67
Tied for Finest Known at Both Major Services**

- 4930 1936-S MS67 NGC. CAC.** This impressive Superb Gem displays a sharp strike. The brilliant surfaces radiate vibrant mint luster and exhibit no mentionable flaws, providing this example with a spectacular appearance. NGC and PCGS combined have graded only 21 pieces at the 67 level, with none finer (12/12). NGC ID# 24RP, PCGS# 6600, CoinPlex ID# WLM1936S

- 4931 1937 MS67 PCGS. CAC.** This Superb Gem Walker shows well defined design elements and vibrant cartwheel luster. Only minute marks near the base of the flag merit passing mention. Housed in a green label PCGS holder. Nearly unobtainable in the next higher grade.
Ex: Long Beach Signature (Heritage, 9/2007), lot 1743.
From The Western Reserve Collection. PCGS# 6601, NGC ID# 24RR, CoinPlex ID# WLM1937

**Superb Gem 1937-D Half Dollar
Only One Finer Coin at NGC**

- 4932 1937-D MS67 NGC.** Attractive wisps of champagne-gold and lavender toning enliven the surfaces of this spectacular Superb Gem, with vibrant mint luster underneath. The design elements are well-detailed and no mentionable distractions are evident. Eye appeal is extraordinary. Census: 32 in 67, 1 finer (11/12). NGC ID# 24RS, PCGS# 6602, CoinPlex ID# WLM1937D

**1937-D Half Dollar, MS67
Condition Rarity**

- 4933 1937-D MS67 PCGS.** The 1937-D is scarcer than its S-mint counterpart, a statement that is counterintuitive for most D and S-mint issues in the 1930s and 1940s. This Superb Gem displays fully brilliant luster with frosty mint surfaces. Population: 39 in 67, 0 finer (11/12).
From The Western Reserve Collection. PCGS# 6602, NGC ID# 24RS, CoinPlex ID# WLM1937D

- 4934 1937-S MS66+ PCGS. CAC.** Shades of gold, orange, and brown encircle the outer edges of the obverse, providing an attractive look to this bright high-end Premium Gem. The color on the reverse periphery is more subtle. Only 24 pieces have been assigned higher grades by PCGS (11/12). PCGS# 6603, NGC ID# 24RT, CoinPlex ID# WLM1937S

Sharply Struck Superb Gem 1937-S Half

- 4935 1937-S MS67 PCGS.** The 1937-S is a scarcer issue among the dates and mintmarks from the 1930s. A few dozen Superb Gems are known, but none have been certified finer. As usual, this example has thick, swirling mint frost. The piece displays brilliant, untuned surfaces on both sides. Sharply, but not quite fully struck. Population: 23 in 67, 0 finer (11/12).
From The Western Reserve Collection. PCGS# 6603, NGC ID# 24RT, CoinPlex ID# WLM1937S

- 4936 1938 MS67 PCGS.** While not a rare date and overshadowed by the illustrious 1938-D half, the 1938-P is conditionally rare in so fine a grade as the present Superb Gem. This piece offers pristine surfaces that sport deep mint frost, revealing under a loupe only the most trivial ticks. Radiant luster emanates from each side, providing this example with tremendous eye appeal. Population: 67 in 67, 1 finer (11/12).

Ex: Central States Signature (Heritage, 4/2008), lot 1505.

From The Western Reserve Collection. PCGS# 6604, NGC ID# 24RU, CoinPlex ID# WLM1938

- 4937 1938 MS67 PCGS.** Brilliant untuned surfaces add to the eye appeal of this lustrous well-preserved Superb Gem. Population: 67 in 67, 1 finer (12/12). PCGS# 6604, NGC ID# 24RU, CoinPlex ID# WLM1938

- 4938 1938-D MS66 PCGS.** Magnification brings out a few nearly imperceptible wisps of light tan color on the obverse of this Premium Gem. This is a highly lustrous and well struck piece that is devoid of mentionable marks.

From The Western Reserve Collection. PCGS# 6605, NGC ID# 24RV, CoinPlex ID# WLM1938D

- 4939 1938-D MS66+ PCGS. CAC.** Splashes of red, orange, yellow, and green in various hues are scattered throughout both sides of this lustrous high-end Premium Gem. The piece exhibits the typical incompleteness of strike. PCGS has awarded higher numeric grades to only 29 examples (12/12). PCGS# 6605, NGC ID# 24RV, CoinPlex ID# WLM1938D

- 4940 1939-D MS67 PCGS.** Highly lustrous with a touch of gold and blue toning on each side, this well-defined Superb Gem exhibits strong eye appeal. Population: 60 in 67 (2 in 67+), 1 finer (11/12).
Ex: Charlotte ANA National Money Show (Heritage, 3/2007), lot 1090.

From The Western Reserve Collection. PCGS# 6607, NGC ID# 24RX, CoinPlex ID# WLM1939D

- 4941 1939-D MS67 PCGS. CAC.** A sliver of deep multicolored toning clings to the lower margins on both sides of this Superb Gem Walker. The design features are well defined. Population: 60 in 67 (2 in 67+), 1 finer (12/12). PCGS# 6607, NGC ID# 24RX, CoinPlex ID# WLM1939D

- 4942 1939-S MS67 PCGS. CAC.** Hints of pink and rose hues add to the eye appeal of this well-struck Superb Gem. A diagonal die crack bisects the eagle on the reverse, from the top of the left (facing) wing through the right (facing) talons. Neither PCGS nor NGC has certified a single numerically finer example (11/12).

From The Western Reserve Collection. PCGS# 6608, NGC ID# 24RY, CoinPlex ID# WLM1939S

- 4943 1940-S MS66 PCGS. CAC.** The surfaces are brilliant and display the usual thick, frosted mint luster. Minor surface marks appear, primarily on the obverse. PCGS has awarded higher numeric grades to a mere 6 pieces (11/12).

From The Western Reserve Collection. PCGS# 6610, NGC ID# 24S2, CoinPlex ID# WLM1940S

- 4944 1941 MS67 NGC. CAC.** A very thin layer of nearly imperceptible champagne color resides on the lustrous surfaces of this lovely Superb Gem. A solid strike imparts sharp detail to the design elements. NGC ID# 24S3, PCGS# 6611, CoinPlex ID# WLM1941

- 4945 1941-D MS67 PCGS. CAC.** Dazzling luster radiates from the impeccably preserved surfaces that reveal a hint of lilac. The design elements reveal an impressive strike. NGC has certified only two pieces finer, along with one at PCGS (11/12).
From The Western Reserve Collection. PCGS# 6612, NGC ID# 24S4, CoinPlex ID# WLM1941D

- 4946 1941-S MS66 PCGS.** Brilliant mint luster adds to the attractiveness of this lovely example. Although the definition is sharp in most portions of the design, the usual softness on Liberty's hand and the eagle's leg is present. The 1941-S Walking Liberty half dollar is unknown with a full strike. Only six coins have been certified in higher numeric grades at PCGS (11/12).
From The Western Reserve Collection. PCGS# 6613, NGC ID# 24S5, CoinPlex ID# WLM1941S

4947 1941-S MS66 PCGS. The mint luster adds to the attractiveness of this Premium Gem. The usual incompleteness of strike is present on Liberty's hand and the eagle's leg, however the definition is sharp elsewhere. PCGS has assigned higher numeric grades to a mere 6 pieces (11/12). PCGS# 6613, NGC ID# 24S5, CoinPlex ID# WLM1941S

4948 1941-S MS66 PCGS. CAC. An essentially brilliant Premium Gem that boasts potent luster and attractive eye appeal. Marks are confined to minor contact on the right obverse field. The short set key, popular in quality Mint State grades. Encased in an old green label holder. PCGS# 6613, NGC ID# 24S5, CoinPlex ID# WLM1941S

1941-S Walker, Sharply Struck MS67 Among the Finest Certified

4949 1941-S MS67 NGC. This spectacular Superb Gem displays well-detailed design elements, with the typical touch of softness on Liberty's right (facing) hand. The surfaces are mostly brilliant, with a few accents of lime-green and amber toning at the peripheries. Vibrant satiny mint luster adds to the terrific eye appeal. Census: 19 in 67, 0 finer (11/12). NGC ID# 24S5, PCGS# 6613, CoinPlex ID# WLM1941S

4950 1942-D MS67 PCGS. A splendid Superb Gem example with brilliant silver luster, the designs are fully struck and the fields are smooth. Population: 130 in 67 (3 in 67+), 5 finer (11/12). Ex: Long Beach Signature (Heritage, 2/2005), lot 8121. From The Western Reserve Collection. PCGS# 6615, NGC ID# 24S7, CoinPlex ID# WLM1942D

4951 1942-S MS66 PCGS. CAC. Trumpet tail S. A high grade San Francisco type coin that provides potent luster and pristine preservation. The branch hand is soft but the overall strike is above average. Nearly unobtainable at the MS67 level. From The Western Reserve Collection. PCGS# 6617, NGC ID# 24S8, CoinPlex ID# WLM1942S

1942-S Half Dollar, Bright MS66+

4952 1942-S MS66+ PCGS. CAC. Flashy and subtly frosted silver luster dominates the eye appeal for this short-set Plus-graded Premium Gem from San Francisco. A small window of die-polish brilliance is noted between the D of UNITED and the first S of STATES. Softly struck in the centers but remarkably close to Superb Gem status, a grade earned by only one coin in the PCGS Population Report (12/12). PCGS# 6617, NGC ID# 24S8, CoinPlex ID# WLM1942S

1943-S Half Dollar, MS67 ★ FS-101, Doubled Obverse

4953 1943-S MS67 ★ NGC. FS-101. Trumpet Tail S. IN GOD WE TRUST is boldly hub doubled, a feature common to many 1943 Walking Liberties. A thin iridescent crescent of copper and indigo toning graces the obverse, with a touch of color on the lower reverse. Somewhat flatly struck through the centers, but exhibiting superior satiny luster. A couple of hidden scratches are noted on the eagle. Census: 23 in 67 (1 in 67 ★), 0 finer (11/12). NGC ID# 24SB, PCGS# 6620, CoinPlex ID# WLM1943S

4954 1944 MS67 PCGS. The Walking Liberty design is a classic in American numismatics, and high grade specimens are extremely popular. This Superb Gem displays highly lustrous, satiny surfaces. A few minor contact marks appear on the obverse. Population: 71 in 67 (3 in 67+), 1 finer (11/12). From The Western Reserve Collection. PCGS# 6621, NGC ID# 24SC, CoinPlex ID# WLM1944

4955 1944-S MS66 PCGS. Large S. This brilliant World War II Premium Gem has immaculate fields and only minute marks on the reverse motifs. The usual San Francisco strike on the cheek and waist of Liberty. From The Western Reserve Collection. PCGS# 6623, NGC ID# 24SE, CoinPlex ID# WLM1944S

4956 1945 MS67 PCGS. CAC. Attractive luster emanates from both sides of this lightly toned Superb Gem. The 1945 Walking Liberty half dollar was produced in large numbers, but few examples have survived in Superb Gem condition, and neither NGC nor PCGS has certified any coins in numerically finer grades (12/12). PCGS# 6624, NGC ID# 24SF, CoinPlex ID# WLM1945

4957 1945 MS67 PCGS. CAC. Sharply defined with full luster, this lightly toned Superb Gem is tied for the finest that NGC or PCGS have certified. Pristine surfaces host only minuscule marks. The coin has tremendous eye appeal, with hints of light rose color. From The Western Reserve Collection. PCGS# 6624, NGC ID# 24SF, CoinPlex ID# WLM1945

4958 1945 MS67 PCGS. CAC. The silvery surfaces of this well struck Superb Gem are awash with strong luster. There are no contact marks worthy of note. PCGS# 6624, NGC ID# 24SF, CoinPlex ID# WLM1945

4959 1945-D MS67 PCGS. Lovely gown line and left-thumb definition are present on this D-mint Walking Liberty half dollar. The satiny surfaces emitting flashy luster are essentially untoned, except for a small toning spot on the lower, inner left wing of the eagle. A few light abrasions appear on Liberty's outstretched right arm, and on the upper part of the eagle's left leg. Population: 139 in 67 (2 in 67+), 0 finer (11/12). Ex: New York Signature (Heritage, 7/2004), lot 6705, which realized \$1,552.50. From The Western Reserve Collection. PCGS# 6625, NGC ID# 24SG, CoinPlex ID# WLM1945D

**Superb Gem 1945-S Walking Liberty Half
Ideal for a High-End PCGS Registry Set**

4960 1945-S MS67 PCGS. PCGS Registry collecting has had significant impact on many issues and their pricing in top grades. While any Superb Gem example of the 1945-S half dollar will experience considerable demand, of the 33 MS67 coins in the combined certified population with none graded MS68 or better (11/12), only eight are certified by PCGS, putting immense Registry pressure on a relative handful of coins. This frosty beauty is largely silver with the faintest hint of golden peripheral color. The strike is above average for an S-mint from the 1940s, but still a bit short of complete. The shimmering surfaces are practically untouched. PCGS# 6626, NGC ID# 24SH, CoinPlex ID# WLM1945S

Well-Preserved 1947 Half, MS67

4961 1946 MS67 PCGS. CAC. A frosty short-set Superb Gem with lustrous and nearly pristine surfaces that receives high marks for technical merit as well as great visual appeal. Hints of peach and apricot patina appear, primarily on the reverse. Population: 41 in 67, 0 finer (11/12).
From The Western Reserve Collection. PCGS# 6627, NGC ID# 24SJ, CoinPlex ID# WLM1946

4962 1946 Doubled Die Reverse MS65 NGC. FS-801. The eagle's plumage and E PLURIBUS UNUM are strongly die doubled. A lustrous Gem of this desirable *Guide Book* variety. Attractive golden-brown and apple-green toning enriches the borders of this lustrous and well preserved Gem. A bold strike with only minor blending on the branch hand. PCGS# 6632, CoinPlex ID# WLM1946DDR

4963 1946 Doubled Die Reverse MS65 PCGS. CAC. FS-801. E PLURIBUS UNUM and the eagle's plumage are widely doubled. Currently the only die variety of the series to receive a separate *Guide Book* listing. This lustrous, nicely struck, and nearly brilliant example has a well preserved reverse and only minor obverse contact. Population: 15 in 65, 6 finer (11/12).
Ex: Long Beach Signature (Heritage, 2/2006), lot 1525, which realized \$3,450.
From The Western Reserve Collection. PCGS# 6632, CoinPlex ID# WLM1946DDR

4964 1946-D MS67 PCGS. CAC. An attractive Superb Gem, this piece displays swirling luster and areas of pale-gold toning. Better-defined than most survivors and incredibly appealing, even at this grade level. Neither PCGS nor NGC have assigned a higher numerical grade (11/12).
From The Western Reserve Collection. PCGS# 6628, NGC ID# 24SK, CoinPlex ID# WLM1946D

**1946-S Half Dollar, MS67
Tied for Finest Certified**

4965 1946-S MS67 PCGS. Fox-101. The trumpet tail S mintmark is lightly but widely repunched northwest. The variety is currently unlisted in *Cherrypickers'* though its eventual inclusion is inevitable. This sensational Superb Gem exhibits frosty silver-white brilliance with peripheral gold, reddish-orange, and pale blue toning that encroaches only slightly into the letters and date on each side. PCGS and NGC have combined to grade an even 100 examples in MS67, with none finer at either service. Population: 37 in 67 (1 in 67+), 0 finer (11/12). PCGS# 6629, NGC ID# 24SL, CoinPlex ID# WLM1946S

Brilliant Superb Gem 1946-S Half

4966 1946-S MS67 PCGS. Trumpet tail S. A stone-white Superb Gem with booming luster and a pristine appearance. The skirt lines show virtually complete detail though the branch hand exhibits blending. The '46-S was saved in roll quantity but most such pieces grade between MS63 and MS65. Population: 36 in 67 (1 in 67+), 0 finer (11/12).
From The Western Reserve Collection. PCGS# 6629, NGC ID# 24SL, CoinPlex ID# WLM1946S

- 4967 1946-S MS67 PCGS. CAC.** Knob S. Lovely sea-green and orange-red patina invigorates the peripheries of this nicely struck Superb Gem. Remarkably devoid of marks. An exceptional example of the final San Francisco issue. Population: 37 in 67 (1 in 67+), none finer (12/12). PCGS# 6629, NGC ID# 24SL, CoinPlex ID# WLM1946S

**1947 Walking Liberty, MS67
Final Year of Type**

- 4968 1947 MS67 PCGS.** Soft golden-brown patination runs over the strongly lustrous surfaces of this Superb Gem and an impressive strike provided strong detail on the design motifs, including Liberty's branch hand. Both sides are well-preserved. Population: 33 in 67, 0 finer (11/12).
Ex: Long Beach Signature (Heritage, 2/2010), lot 481, which realized \$4,312.50.
From The Western Reserve Collection. PCGS# 6630, NGC ID# 24SM, CoinPlex ID# WLM1947

- 4969 1947 MS67 NGC.** Blushes of light gold toning are deeper and more extensive on the reverse of this well struck Superb Gem. Both sides have been well cared for. NGC ID# 24SM, PCGS# 6630, CoinPlex ID# WLM1947

**Superb Gem 1947 Half
None Certified Finer**

- 4970 1947 MS67 PCGS. CAC.** *Ex: Sounder.* This is a superlative example of the final Walking Liberty half dollar issue. The bright, satiny luster shows golden-olive and lilac patina over each side, and the strike is full. While the 1947 is readily available in most grades, the number of survivors in MS67 is a mere fraction of the total population just one point lower. PCGS has graded less than three dozen pieces in MS67, and neither major grading service has certified an example finer (11/12). The CAC seal has been bestowed on only five examples at the Superb Gem grade level.
Ex: Chicago Signature (Heritage, 8/2011), lot 4224, which realized \$4,887.50. PCGS# 6630, NGC ID# 24SM, CoinPlex ID# WLM1947
- 4971 1947-D MS66+ PCGS. CAC.** The 1947-D Walking Liberty half dollar is one of the more challenging Denver Mint issues of the decade. This is a lustrous high-end Premium Gem. Small splashes of gray patina appear at the upper portion of the obverse. PCGS has assigned higher grades to only 10 pieces (11/12).
From The Western Reserve Collection. PCGS# 6631, NGC ID# 24SN, CoinPlex ID# WLM1947D

**PROOF WALKING LIBERTY
HALF DOLLARS**

Brilliant 1936 Half, PR64

- 4972 1936 PR64 PCGS.** The first brilliant finish proof Walking Liberty half dollars were minted in 1936 and they are extremely popular with type collectors. This lovely near-Gem proof has highly reflective silver surfaces with traces of gold toning and splashes of steel. Both sides display attractively mirrored fields and sharp design motifs. PCGS# 6636, NGC ID# 27V4, CoinPlex ID# WLP1936

**1936 Walking Liberty Half, PR65
Only 3,901 Pieces Struck**

- 4973 1936 PR65 PCGS. CAC.** As expected from a proof, this delightful Gem exhibits pinpoint definition on all design elements and deeply reflective fields throughout. The well-preserved surfaces show just a few wisps of champagne-gold toning, with extraordinary eye appeal. From a mintage of just 3,901 pieces. PCGS# 6636, NGC ID# 27V4, CoinPlex ID# WLP1936

Brilliant PR66 1936 Half Dollar

- 4974 1936 PR66 PCGS.** This high grade specimen appears fully brilliant upon first glance, though the obverse border exhibits delicate pale tan toning. The strike is razor-sharp and both sides are pristine. The low mintage key to the seven-year proof Walking Liberty type. Encapsulated in a green label holder. PCGS# 6636, NGC ID# 27V4, CoinPlex ID# WLP1936

Premium Gem Proof 1936 Walker

- 4975 1936 PR66 PCGS. CAC.** Although the Walking Liberty series was introduced in 1916, no proofs were produced until 1936. A brilliant, virtually untoned example, this Premium Gem displays tremendous eye appeal. The piece is lustrous and well-struck. Minor lint marks appear over UR in PLURIBUS. Only 23 examples have received higher numeric grades from PCGS (12/12). PCGS# 6636, NGC ID# 27V4, CoinPlex ID# WLP1936

1936 Walking Liberty Half Dollar, PR67 Only One Finer Coin at PCGS

- 4976 1936 PR67 PCGS.** The Philadelphia Mint resumed its program of commercial proof set offerings in 1936, after a two-decade hiatus. A small mintage of 3,901 Walking Liberty half dollars was produced, using an all-brilliant finish that limited cameo contrast. The program was well-received, and mintages increased steadily in the following years, until the onset of World War II interrupted production in 1942.

The present coin is a magnificent Superb Gem with razor-sharp definition on all design elements. The well-preserved, deeply mirrored fields show no sign of toning and no mentionable distractions. Population: 22 in 67, 1 finer (12/12). PCGS# 6636, NGC ID# 27V4, CoinPlex ID# WLP1936

- 4977 1937 PR65 PCGS.** A brilliant, no-contrast proof of this second-year issue, this piece exhibits hints of gold and rose shades. Adolph Weinman's classic Walking Liberty obverse design appears on the larger Silver Eagle coins that are able to better display the finer details of Liberty's hand, head, and the eagle's trailing leg that are generally found incompletely struck on this series. *From The Western Reserve Collection.* PCGS# 6637, NGC ID# 27V5, CoinPlex ID# WLP1937

- 4978 1937 PR67 PCGS.** This satiny and sharply struck Superb Gem has delicate pearl-gray toning. Refreshingly void of hairlines or spots. Only the introductory year 1936 has a lower proof emission. PCGS has certified just ten pieces in finer grades (12/12). PCGS# 6637, NGC ID# 27V5, CoinPlex ID# WLP1937

- 4979 1937 PR67 NGC.** An outstanding example of this early proof Walker issue, strongly defined with untuned and highly reflective surfaces. This specimen's eye appeal is considerably finer than the norm. NGC has certified 18 pieces finer (12/12). NGC ID# 27V5, PCGS# 6637, CoinPlex ID# WLP1937

- 4980 1937 PR67+ PCGS. CAC.** Deep golden-orange, russet, and yellow-brown toning covers large portions of both sides of this example. This is one of only 6 pieces to have reached the 67+ level at PCGS, with 10 finer (12/12). PCGS# 6637, NGC ID# 27V5, CoinPlex ID# WLP1937

Attractively Toned 1939 Half, PR68 Only One Finer

- 4981 1939 PR68 NGC.** A pearl-like iridescence covers portions of this example, with attractive rainbow-colored toning appearing in the fields at right on the obverse. The piece exhibits a beautiful strike and displays brilliant luster. NGC has assigned a higher grade to only one example and PCGS has yet to assign a higher grade to a single piece. (12/12). NGC ID# 27V7, PCGS# 6639, CoinPlex ID# WLP1939

Lovely PR68 ★ 1939 Walking Liberty Half Only One Finer PCGS-Graded Example

- 4982 1939 PR68 ★ NGC. CAC.** The intense coppery-gold and bright deep pink peripheral toning on the lower obverse adds to the eye appeal of this example, especially as viewed against the stark white reflectivity seen on the balance of the coin. The well-preserved surfaces are pristine. Census: 75 in 68, 1 finer (11/12). NGC ID# 27V7, PCGS# 6639, CoinPlex ID# WLP1939

PR68 1940 Half Dollar
Among the Finest Certified at NGC

- 4983 1940 PR68 NGC.** This is an essentially perfect proof Walker, and even a loupe fails to reveal any mentionable contact marks. The early proof sets were packaged in cellophane envelopes, and with the passing years they became more and more brittle; eventually, many of them split on the sides. This piece appears to have come from an envelope that split on the right side, as both obverse and reverse are deeply toned in that area, while brilliant elsewhere. An interesting and impressive type coin. Census: 51 in 68, 0 finer (8/12). NGC ID# 27V8, PCGS# 6640, CoinPlex ID# WLP1940

1942 Walking Liberty Half Dollar, PR68
Only Three Numerically Finer Coins at NGC

- 4984 1942 PR68 NGC.** Beautifully toned with deep magenta, violet, fire-red, and gold patina surrounding the centers, which are silver-gray peppered with purple accents. The devices are nicely frosted, while the fields are satiny. The strike is essentially full, and both sides appear pristine. NGC and PCGS combined have certified just four proofs in numerically finer grades (11/12).
Ex: Long Beach Signature (Heritage, 9/2009), lot 874, which realized \$3,450. NGC ID# 27V9, PCGS# 6642, CoinPlex ID# WLP1942

FRANKLIN HALF DOLLARS

MS66 FBL 1949-D Franklin
Extraordinary Satiny Mint Luster

- 4985 1949-D MS66 Full Bell Lines PCGS.** In Rick Tomaska's book on Franklin and Kennedy halves, he speaks highly of the 1949-D. Well, some of them. He makes it plain that the vast majority lack the luster required for a coin in this price range. This piece does. It is nearly brilliant, with just a bit of pale golden toning on each side. But most importantly, the mint luster is exceptional and bright, with a satiny mint glow that races around each side as the coin is tilted beneath a light. Population: 25 in 66 Full Bell Lines, 0 finer (12/12).
Ex: Sacramento ANA (Heritage, 3/2011), lot 3780, which realized \$11,500.
From The Atlanta Collection. PCGS# 86654, NGC ID# 24SU, CoinPlex ID# FHM1949DFBL

- 4986 1949-S MS67 PCGS.** Toning is a variety of shades, including red-brown, orange, red, green, and gray covers large portions of both sides of this Superb Gem example. Neither PCGS nor NGC has assigned a higher numeric grade to a single example, with this one of only 3 PCGS-graded examples at the MS67 level. PCGS# 6655, NGC ID# 24SV, CoinPlex ID# FHM1949S

MS67 Full Bell Lines 1949-S Franklin
None Finer at Either Major Service

- 4987 1949-S MS67 Full Bell Lines NGC.** Large areas of toning with deep shades from scarlet to maroon envelop this fully struck piece. The majority of the toned examples from this era received their color while residing in Mint sets. This piece stands alone as the highest NGC-graded example and PCGS has graded three at this level with none finer (11/12).
From The Atlanta Collection. NGC ID# 24SV, PCGS# 86655, CoinPlex ID# FHM1949SFBL

- 4988 1950-D MS66 Full Bell Lines PCGS.** Boldly struck with dynamic luster and exquisite preservation. The dappled silver-gray and tan-gold color on the obverse is echoed on the reverse, but with added effects such as "ripples" of deeper gray toning and rich peach and crimson elements at the borders. Population: 53 in 66 (2 in 66+) Full Bell Lines, 0 finer (12/12).
Ex: Summer FUN (Heritage, 7/2010), lot 4014.
From The Atlanta Collection. PCGS# 86657, NGC ID# 24SX, CoinPlex ID# FHM1950DFBL

- 4989 1950-D MS66 Full Bell Lines PCGS. CAC.** A finely speckled patina in shades of gray, plum, green, and fuchsia covers large portions of the obverse. The reverse displays significantly less color. Only two examples with FBL have received 66+ grades from PCGS, with none finer (12/12). PCGS# 86657, NGC ID# 24SX, CoinPlex ID# FHM1950DFBL

4990 1951 MS67 NGC. Orange-gold patination at the margins cedes to soft violet in the centers. The design elements are well impressed, including about 90% of the bell lines. Lustrous surfaces have been well cared for. Census: 5 in 67, 0 finer (12/12).
From *The Atlanta Collection*. NGC ID# 24SY, PCGS# 6658, CoinPlex ID# FHM1951

**1952 Franklin MS67 Full Bell Lines
Attractively Toned**

4991 1952 MS67 Full Bell Lines PCGS. A genuine rarity at this Superb Gem with Full Bell Lines grade level, this 1952 Philadelphia half displays deep toning on the reverse that includes shades of golden-yellow, orange-red, and iridescent deep lime-green. Lighter, striated color is observed on the obverse, primarily in the fields. Generous luster prevails throughout both sides. The scattered marks are minor. Population: 8 in 67 Full Bell Lines, 0 finer (11/12). PCGS# 86661, NGC ID# 24T3, CoinPlex ID# FHM1952FBL

Superb Gem FBL 1952 Franklin

4992 1952 MS67 Full Bell Lines NGC. This sharply struck Superb Gem displays attractive shades of russet, golden-yellow, pink-red, olive-green and deep lime-green. Neither NGC nor PCGS has assigned a higher numeric grade to a single example. Census: 4 in 67 Full Bell Lines, 0 finer (11/12).
From *The Atlanta Collection*. NGC ID# 24T3, PCGS# 86661, CoinPlex ID# FHM1952FBL

4993 1952-D MS66 Full Bell Lines PCGS. CAC. Dark gray freckles appear on both sides of this coin, but are largely confined to the outer edges on the obverse. This Premium Gem is lustrous and attractive. Population: 63 in 66 Full Bell Lines, 2 finer (11/12). PCGS# 86662, NGC ID# 24T4, CoinPlex ID# FHM1952DFBL

4994 1952-S MS66 Full Bell Lines PCGS. Both sides of this Premium Gem exhibit a matte finish, with splashes of toning appearing almost solely on the obverse. The colors include a variety of shades of green, red, pink, and yellow. Neither PCGS nor NGC has awarded a higher numeric grade to a single example (12/12). PCGS# 86663, NGC ID# 24T5, CoinPlex ID# FHM1952SFBL

4995 1952-S MS66 Full Bell Lines PCGS. The toning indicates this coin originated from a Mint set as the obverse displays lovely, multicolored toning while the reverse is gray-lilac with a thin accent of peripheral color. The 1952-S is well known as one of the great strike rarities in the series. This piece exhibits faint but complete lines across the bell. The mint luster is frosted, as one would expect, and there are no obvious or detracting marks on either side. Population: 35 in 66 Full Bell Lines, 0 finer (11/12).
Ex: ANA Sacramento Signature (*Heritage*, 3/2011), lot 3788, which realized \$2,300.
From *The Atlanta Collection*. PCGS# 86663, NGC ID# 24T5, CoinPlex ID# FHM1952SFBL

4996 1952-S MS66 Full Bell Lines PCGS. CAC. Subtle toning appears on both sides of this Premium Gem, primarily at the outer edges. This is a lovely example with lustrous surfaces. No examples have received higher numeric grades from PCGS or NGC (11/12). PCGS# 86663, NGC ID# 24T5, CoinPlex ID# FHM1952SFBL

1953 Franklin, MS66 Full Bell Lines

4997 1953 MS66 Full Bell Lines PCGS Secure. Specks of copper, russet, green, gold, and gray toning cover large portions of both sides of this lustrous Premium Gem. Copper toning covers large portions of the bell, creating attractive eye appeal. Although surface marks are present, they are not as evident due to the patina. Population: 32 in 66 Full Bell Lines, 0 finer (12/12).
From *The Atlanta Collection*. PCGS# 86664, NGC ID# 24T6, CoinPlex ID# FHM1953FBL

4998 1954 MS66 Full Bell Lines PCGS. Flecks of primarily tan and gold toning cover large portions of both sides of this Premium Gem example and create an attractive look. A number of contact marks appear beneath the toning. Population: 77 in 66 (2 in 66+) Full Bell Lines, 0 finer (12/12).
From *The Atlanta Collection*. PCGS# 86667, NGC ID# 24T9, CoinPlex ID# FHM1954FBL

4999 1954-S MS67 ★ NGC. Beautiful reddish-gold patina at the margins frames soft violet centers, and both sides are impeccably preserved. This Superb Gem is well deserving of the coveted Star designation. One of just two MS67s so designated.
From *The Atlanta Collection*. NGC ID# 24TB, PCGS# 6669, CoinPlex ID# FHM1954S

5000 1955 Bugs Bunny MS66 Full Bell Lines NGC. FS-401. This lot is the single finest NGC-certified "Bugs Bunny" half dollar. Clash marks from the eagle, near Franklin's lips, are responsible for the nickname. Bugs Bunny examples are known for several Franklin issues, but 1955 pieces are scarce since that date has the lowest mintage of the series. Richly toned golden-brown and slate-gray. NGC ID# 24TC, PCGS# 86670, CoinPlex ID# FHM1955FBL

**Full Bell Lines MS67 1956 Half
Dramatic Multicolor Toning**

- 5001 1956 MS67 Full Bell Lines NGC.** Type One reverse with low relief eagle. Beautifully patinated in orange-red and powder-blue shades. Thoroughly lustrous and nicely struck with pristine fields and only minimal contact on the motifs. The 1956 was set aside but few examples have secured the lofty MS67 grade. Census: 5 in 67 Full Bell Lines, 0 finer (11/12). NGC ID# 24TD, PCGS# 86671, CoinPlex ID# FHM1956FBL

- 5002 1957-D MS67 PCGS.** Gold, gray, and crimson obverse toning cedes to mostly gray on the reverse with a swath of multicolored patina at the margins. Well struck with strong, though not full, bell lines. PCGS# 6673, NGC ID# 24TF, CoinPlex ID# FHM1957D

Richly Toned Superb Gem FBL 1957-D Half

- 5003 1957-D MS67 Full Bell Lines NGC.** Beautiful orange, rose, and lime-green toning from decades of mint set storage appears on this piece, with the colors more pronounced on the obverse. These pieces are seldom available at this grade level, with NGC and PCGS combined having assigned this grade to only 15 examples, with none finer. (12/12).
Ex: Long Beach Signature (Heritage, 6/2006), lot 1989.
From The Atlanta Collection. NGC ID# 24TF, PCGS# 86673, CoinPlex ID# FHM1957DFBL

**1958 Half, MS67 Full Bell Lines
Tied for Finest Known at NGC and PCGS**

- 5004 1958 MS67 Full Bell Lines NGC.** Areas of subtle gold and sage-green color are visible on the obverse. Lovely lilac and pink toning covers portions of the reverse, providing an attractive look. Splashes of bright iridescent gold and teal appear as well. Census: 3 in 67 Full Bell Lines, 0 finer (11/12).
From The Atlanta Collection. NGC ID# 24TG, PCGS# 86674, CoinPlex ID# FHM1958FBL

- 5005 1958-D MS67 Full Bell Lines NGC.** A medley of lime-green, orange-gold, and crimson patination resides on the lustrous surfaces of this Superb Gem. Sharply struck design elements culminate in Full Bell Lines. Both sides are extremely well preserved. Census: 15 in 67 Full Bell Lines, 0 finer (12/12).
From The Atlanta Collection. NGC ID# 24TH, PCGS# 86675, CoinPlex ID# FHM1958DFBL

- 5006 1958-D MS67 Full Bell Lines NGC. CAC.** This deeply toned Superb Gem displays nearly full iridescence on both sides accompanying a sharp strike. Census: 15 in 67 Full Bell Lines, 0 finer (12/12). NGC ID# 24TH, PCGS# 86675, CoinPlex ID# FHM1958DFBL

- 5007 1959 MS66 Full Bell Lines NGC.** Areas of red, yellow, and orange toning appear primarily near the top of the obverse on this attractive Premium Gem example that displays attractive luster. Census: 13 in 66 Full Bell Lines, 1 finer (12/12).
From The Atlanta Collection. NGC ID# 24TJ, PCGS# 86676, CoinPlex ID# FHM1959FBL

**1960 Full Bell Lines Half, MS66
Conditionally Scarce**

- 5008 1960 MS66 Full Bell Lines PCGS.** The 1960 Franklin is a challenging issue, as despite its normally sharp strike and excellent luster, most pieces show tiny nicks and abrasions that hold them from the MS66 level. This bright piece displays the coveted full bell lines and hints of rose-gold color. Population: 37 in 66 Full Bell Lines, 0 finer (11/12). PCGS# 86678, NGC ID# 24TL, CoinPlex ID# FHM1960FBL

**1960-D Franklin, MS66 FBL
Tied for Finest Known**

- 5009 1960-D MS66 Full Bell Lines PCGS. CAC.** Lustrous untuned surfaces add to the visual appeal of this well-struck example. The 1960-D Franklin half dollar is prohibitively rare in Premium Gem condition with Full Bell Lines. PCGS has certified only 20 coins in the category, with none finer (12/12).
From The Atlanta Collection. PCGS# 86679, NGC ID# 24TM, CoinPlex ID# FHM1960DFBL

- 5010 1961 Bugs Bunny MS64 PCGS. FS-401.** Faint clash marks from the eagle's wing are evident near Franklin's mouth. Highly lustrous and close to brilliant with only minor obverse field grazes. PCGS# 6680, NGC ID# 24TN, CoinPlex ID# FHM1961

- 5011 1962 MS65 Full Bell Lines PCGS.** Small spots of forest green toning appear on this frosty Gem. PCGS has awarded higher numeric grades to only 4 pieces (12/12).
From The Atlanta Collection. PCGS# 86682, NGC ID# 24TR, CoinPlex ID# FHM1962FBL

**Final-Year 1963 Franklin Half
Full Bell Lines Premium Gem**

- 5012 1963 MS66 Full Bell Lines PCGS.** John R. Sinnock's half dollar design featuring Benjamin Franklin was not "due" for replacement until 1973 according to the 25-year rule, but the shocking assassination of President John F. Kennedy in 1963 saw a swift movement to memorialize him on a coin, leaving Franklin and the Liberty Bell in the cold. This Philadelphia example from 1963 is notable for its Full Bell Lines detail on the reverse. Bright luster is largely silver but has patches of gold and yellow toning on each side, more visibly the obverse. Population: 1 in 66 Full Bell Lines, 0 finer (12/12). PCGS# 86684, NGC ID# 24TT, CoinPlex ID# FHM1963FBL

PROOF FRANKLIN HALF DOLLARS

- 5013 1950 PR67 PCGS.** A lovely representative from the first proof Franklin half dollar issue, this Superb Gem is a stunning beauty with essentially brilliant silver surfaces. Population: 28 in 67, 0 finer (11/12). PCGS# 6691, NGC ID# 27VA, CoinPlex ID# FHP1950

**PR66 Cameo 1950 Franklin Half
First Proof Year for Design**

- 5014 1950 PR66 Cameo NGC.** A decently contrasted representative of this initial proof Franklin half dollar issue, moderately mirrored with light but distinct frost across the devices. Toning is at a minimum. Anything better is a rarity; NGC has certified only nine specimens as PR67 Cameo or finer (12/12). NGC ID# 27VA, PCGS# 86691, CoinPlex ID# FHP1950CA

PR66 Cameo 1950 Half

- 5015 1950 PR66 Cameo NGC.** A gorgeous coin, this example exhibits attractive frost on the devices and smooth, mirrored fields. The piece is mostly white in color but is framed with gold and blue around the rims, particularly on the reverse. Census: 48 in 66 (1 in 66+) Cameo, 9 finer (12/12).
Ex: Central States Signature (Heritage, 4/2006), lot 3142. NGC ID# 27VA, PCGS# 86691, CoinPlex ID# FHP1950CA

**Superb Gem Cameo Proof
1950 Franklin Half**

- 5016 1950 PR67 Cameo PCGS.** The Franklin half dollar design got its start in 1948, but proof coinage did not emerge from its World War II-induced hiatus until 1950. All Franklin half dollars, but especially the earlier issues, prove challenging when sought with a prominent cameo effect. This Superb Gem specimen from the earliest of issues has considerable (if a trifle watery) reflectivity in the fields, paired with generous frost on the central devices. Light golden overtones are most intense in the obverse fields. Population: 8 in 67 (2 in 67+) Cameo, 0 finer (12/12).
From The Atlanta Collection. PCGS# 86691, NGC ID# 27VA, CoinPlex ID# FHP1950CA

**Challenging PR66 Ultra Cameo
1951 Franklin Half**

- 5017 1951 PR66 Ultra Cameo NGC.** Excellent all-around appearance for a second-year proof Franklin half dollar. While the mirrors are a trifle watery, the silver-frost draping the central devices remains intense, granting the coin its Ultra Cameo contrast. A modestly toned and appealing Premium Gem.
From The Atlanta Collection. NGC ID# 27VB, PCGS# 96692, CoinPlex ID# FHP1951DC

**1952 Cameo PR67 Franklin Half
Well-Matched, Nicely Frosted**

- 5018 1952 PR67 Cameo PCGS.** The 1952 Cameo halves that are known are generally not equal to the quality of the 1951s, and are often found with mismatched obverse and reverse contrast. This is nicely frosted, and evenly frosted Cameo. The essentially untuned surfaces of this Superb Gem exhibit well-impressed design features. This is a very well cared for Franklin that yields strong field-device contrast. Population: 28 in 67 Cameo, 1 finer (11/12). PCGS# 86693, NGC ID# 27VC, CoinPlex ID# FHP1952CA
- 5019 1952 PR67 Cameo NGC.** The bright surfaces of this Superb Gem Cameo exhibit well-impressed design details. This beautifully preserved piece displays pronounced contrast between the frosted devices and the brilliant fields. NGC has awarded higher numeric grades to a mere 6 examples (12/12).
From The Atlanta Collection. NGC ID# 27VC, PCGS# 86693, CoinPlex ID# FHP1952CA

Elusive PR67 Ultra Cameo 1952 Franklin

- 5020 1952 PR67 Ultra Cameo NGC.** The 1952 is scarcely encountered in Ultra Cameo and is quite elusive above the Gem level. Many of the 1952 Franklin halves with cameo contrast were struck from mismatched dies and thus matching ultra cameo contrast was not produced on both sides of the coins, leaving them as essentially single-sided Cameo Proofs. This deeply contrasted piece is a welcome exception, providing evenly matched contrast on both sides for exceptional eye appeal. These pieces are in high demand not only from Franklin specialists, but also by connoisseurs of contrasted Proofs. Census: 2 in 67 Ultra Cameo, 3 finer (11/12). *From The Atlanta Collection.* NGC ID# 27VC, PCGS# 96693, CoinPlex ID# FHP1952DC

- 5021 1953 PR68 ★ NGC. CAC.** This coin owes its star to the obverse, which positively pops with Cameo-level contrast. While the reverse is a touch too reflective on the devices for such a designation, this is a special coin in its contrast-hostile striking context. NGC ID# 27VD, PCGS# 6694, CoinPlex ID# FHP1953

- 5022 1953 PR68 Cameo NGC.** Small areas of toning appear on both sides of this example that exhibits attractive contrast. Neither NGC nor PCGS has assigned a higher numeric grade to a single example (12/12). NGC ID# 27VD, PCGS# 86694, CoinPlex ID# FHP1953CA

Outstanding PR68 Cameo 1953 Franklin

- 5023 1953 PR68 Cameo PCGS. CAC.** A starkly contrasted, snow-white Superb Gem that resembles a newly minted proof striking from half a century later. Those in search of a technically and aesthetically unsurpassable 1953 proof Franklin need look no further. A very scarce issue in Cameo at this grade level. Population: 5 in 68 Cameo, 0 finer (11/12). *Ex: ANA Fort Worth Signature (Heritage, 3/2010), lot 1152, which realized \$3,737.50.* *From The Atlanta Collection.* PCGS# 86694, NGC ID# 27VD, CoinPlex ID# FHP1953CA

- 5024 1954 PR69 Cameo NGC.** Tied for finest known with only three others, this piece displays a strong strike and attractive contrast. Census: 4 in 69 Cameo, 0 finer (12/12). *From The Atlanta Collection.* NGC ID# 27VE, PCGS# 86695, CoinPlex ID# FHP1954CA

- 5025 1954 PR67 Ultra Cameo NGC.** As the grade implies, this example has tremendous eye appeal. Among its attributes are pronounced contrast and beautifully preserved surfaces. Census: 44 in 67 Ultra Cameo, 20 finer (12/12). PCGS# 96695, CoinPlex ID# FHP1954DC

Ultra Cameo PR68 1954 Half Dollar Minimal Toning

- 5026 1954 PR68 Ultra Cameo NGC.** Quality contrast, especially in the context of a year not known for it. A handful of small milky toning spots interrupt the overall black-and-white effect, though not badly. Neither NGC nor PCGS has certified a PR69 Ultra or Deep Cameo example of the issue (12/12). *From The Atlanta Collection.* PCGS# 96695, CoinPlex ID# FHP1954DC

- 5027 1955 PR69 Cameo NGC.** This is an impressive looking coin as might be presumed based on the assigned grade. The devices exhibit a thick layer of frost and the fields are deeply reflective on this beautifully struck Franklin half. Census: 14 in 69 Cameo, 0 finer (12/12). NGC ID# 27VE, PCGS# 86696, CoinPlex ID# FHP1955CA

- 5028 1955 PR68 Deep Cameo PCGS Secure. CAC.** Profoundly contrasted and essentially untoned, this piece exhibits moderate to heavy frost across the central devices. This is a fully detailed and carefully preserved example. Population: 17 in 68 Deep Cameo, 0 finer (12/12). *From The Atlanta Collection.* PCGS# 96696, NGC ID# 27VE, CoinPlex ID# FHP1955DC

- 5029 1956 Type One PR68 Cameo PCGS.** A well-struck example, this piece displays attractive contrast and beautifully preserved surfaces. Population: 29 in 68 Cameo, 0 finer (12/12).
From The Atlanta Collection. PCGS# 86686, NGC ID# 24TV, CoinPlex ID# FHP1956TY1CA

**Type One 1956 Franklin Half
Stunning PR69 Cameo**

- 5030 1956 Type One PR69 Cameo NGC.** The more elusive of the proof Franklin half variants for the issue. The Type One reverse is distinguished by the four feathers on the eagle's left (facing) wing that are clear of the perch. Fully brilliant with sharply struck, satiny motifs highlighted by deeply mirrored fields. Virtually immaculate.
From The Atlanta Collection. NGC ID# 24TV, PCGS# 86686, CoinPlex ID# FHP1956TY1CA
- 5031 1956 Type Two PR69 Ultra Cameo NGC.** The Type Two reverse is identified by its high relief eagle. This example has tremendous eye appeal with deeply frosted devices and richly mirrored fields. Census: 66 in 69 Ultra Cameo, 0 finer (12/12). NGC ID# 24TW, PCGS# 96697, CoinPlex ID# FHP1956TY2DC
- 5032 1956 Type Two PR69 Ultra Cameo NGC.** With its gleaming silver-white fields and thickly frosted devices, this Ultra Cameo specimen is as close to perfection as imaginable for a Franklin half. Not surprisingly, this piece exhibits spectacular eye appeal. Census: 66 in 69 Ultra Cameo, 0 finer (12/12). NGC ID# 24TW, PCGS# 96697, CoinPlex ID# FHP1956TY2DC
- 5033 1956 Type Two PR69 Ultra Cameo NGC.** A stunning example, this proof Franklin half is richly frosted and deeply mirrored leading to tremendous visual appeal. Census: 66 in 69 Ultra Cameo, 0 finer (12/12). NGC ID# 24TW, PCGS# 96697, CoinPlex ID# FHP1956TY2DC

Elusive PR69 Deep Cameo 1956 Franklin

- 5034 1956 Type Two PR69 Deep Cameo PCGS. CAC.** The Type Two design, with strengthened eagle feathers, is found on perhaps 95% of all proofs of this year. The 1956 is known for ultradeep black-on-silver contrast, as this piece ably demonstrates. More than a half-century after its production, this issue has only 39 examples certified PR69 Deep Cameo at PCGS, with none finer (12/12), with the population data not having changed since this piece appeared at auction three years ago.
Ex: FUN Signature (Heritage, 1/2010), lot 2781.
From The Atlanta Collection. PCGS# 96697, NGC ID# 24TW, CoinPlex ID# FHP1956TY2DC

Fantastic PR69 Ultra Cameo 1957 Half

- 5035 1957 PR69 Ultra Cameo NGC.** A highly desirable PR69 Ultra Cameo, this outstanding coin is sure to capture attention. The sharply detailed frosty design elements and the deeply mirrored fields provide pronounced contrast to this beautifully struck example. Census: 8 in 69 Ultra Cameo, 0 finer (11/12).
From The Atlanta Collection. NGC ID# 24TX, PCGS# 96698, CoinPlex ID# FHP1957DC
- 5036 1958 PR69 Cameo NGC.** Deeply mirrored fields exhibit strong contrast with the satiny motifs of this attractive PR69 Cameo half. The color-free surfaces are nearly pristine, and display sharply struck design elements. Census: 20 in 69 Cameo, 0 finer (12/12). NGC ID# 27VH, PCGS# 86699, CoinPlex ID# FHP1958CA
- 5037 1958 PR69 Cameo NGC.** Crisply struck and gleaming, this piece displays distinct contrast and impressive preservation. Census: 20 in 69 Cameo, 0 finer (12/12). NGC ID# 27VH, PCGS# 86699, CoinPlex ID# FHP1958CA
- 5038 1958 PR69 ★ Cameo NGC.** Even when held at arm's length, the beauty of this piece is undeniable. Closer examination reveals deeply mirrored fields, thickly frosted devices, and a bold strike. Census: 20 in 69 Cameo, 0 finer (12/12).
From The Atlanta Collection. NGC ID# 27VH, PCGS# 86699, CoinPlex ID# FHP1958CA

**PR68 Ultra Cameo 1958 Half Dollar
Richly Frosted Devices**

- 5039 1958 PR68 Ultra Cameo NGC.** Excellent field-device contrast owes a trifle more to the frost across Franklin's portrait than the silver mirrors around. A few tiny toning flecks and minuscule flaws are visible, but the all-around eye appeal is excellent for a proof Franklin half of the 1950s.
From The Atlanta Collection. NGC ID# 27VH, PCGS# 96699, CoinPlex ID# FHP1958DC

**1958 Half, PR68 Deep Cameo
Tied for Finest PCGS-Graded**

- 5040** 1958 PR68 Deep Cameo PCGS. CAC. A stunning 1958 proof Franklin half dollar, this piece is fully brilliant with silver surfaces that are completely devoid of toning. Both sides display deeply mirrored fields that seem unending, serving as a nice frame for the extraordinary, highly lustrous devices. Population: 20 in 68 Deep Cameo, 0 finer (11/12). PCGS# 96699, NGC ID# 27VH, CoinPlex ID# FHP1958DC

**1959 Franklin Half Dollar
PR67 Deep Cameo**

- 5041** 1959 PR67 Deep Cameo PCGS. The 1959 Franklin half dollar certified PR67 Deep Cameo is one of the treasured rarities in the series, a coin that appears on more Cameo proof Franklin want lists than any other. Including resubmissions, PCGS has certified just six examples, and only two finer (12/12). Our auction database shows just four appearances at this grade among PCGS coins sold in the last decade, and those appearances likely represent a smaller number of coins.

The present piece would upgrade several sets among the top five at the PCGS Set Registry. The piece offers brilliant mirrors with a full strike throughout, and the intense field-device contrast is quite startling to the viewer. There are no flaws detected by the naked eye. An important opportunity for the Franklin lovers.

From The Atlanta Collection. PCGS# 96700, NGC ID# 27VJ, CoinPlex ID# FHP1959DC

- 5042** 1960 PR69 PCGS. Franklin exhibits a frosted appearance, while the Liberty Bell retains brilliance. Neither of the two major grading services has assigned a PR70 grade to any examples, with this piece tied with only 12 others at this grade level at PCGS (11/12). PCGS# 6701, NGC ID# 24TY, CoinPlex ID# FHP1960

- 5043** 1960 PR68 Deep Cameo PCGS. CAC. A sharply struck and immaculately preserved proof. The portrait has a few tiny golden-brown freckles. There is a tiny lintmark (as struck) in the upper back of Franklin's head. Population: 72 in 68 Deep Cameo, 5 finer (12/12).

Ex: Long Beach Signature (Heritage, 6/2002), lot 5945.

From The Atlanta Collection. PCGS# 96701, NGC ID# 24TY, CoinPlex ID# FHP1960DC

**Superb Gem Proof 1961 Half Dollar
Doubled Die Reverse, *Guide Book Variety***

- 5044** 1961 Doubled Die Reverse PR67 NGC. FS-801. Proof coins are specially manufactured and are supposed to undergo close scrutiny, but the sharp unaided eye can spot the doubling on the P in PLURIBUS on the reverse, while other doubled details become obvious on magnification. A low-contrast but high-reflectivity Superb Gem. *From The Atlanta Collection.* PCGS# 6689, CoinPlex ID# FHP1961DDR

**Ultra Cameo PR69 1962 Franklin Half
Pleasing Example of Penultimate Issue**

- 5045** 1962 PR69 Ultra Cameo NGC. Though nobody knew it at the time, this was to be the penultimate proof Franklin half dollar issue. This near-perfect specimen has a functionally black-and-white appearance despite the presence of a few tiny whitish flecks on each side. Excellent frost on the portrait.

From The Atlanta Collection. NGC ID# 27VK, PCGS# 96703, CoinPlex ID# FHP1962DC

**Black-and-White 1962 Franklin Half
PR69 Ultra Cameo**

- 5046** 1962 PR69 Ultra Cameo NGC. Generously frosted devices and chrome-gleam mirrors led NGC to give this 1960s Franklin half its top contrast designation. Minimally toned surfaces are essentially perfect to the unaided eye. The specimen offers amazing preservation for a coin now more than a half-century old. NGC ID# 27VK, PCGS# 96703, CoinPlex ID# FHP1962DC

Elusive PR69 Deep Cameo 1963 Half

- 5047** 1963 PR69 Deep Cameo PCGS. A spectacular example from the last year of production, this piece has tremendous eye appeal with bold contrast and sharply struck devices. President Kennedy's assassination led to a premature end for Franklin half dollar production. Population: 16 in 69 Deep Cameo, 0 finer (12/12). *From The Atlanta Collection.* PCGS# 96704, NGC ID# 27VL, CoinPlex ID# FHP1963DC

KENNEDY HALF DOLLAR

- 5048** 2011-P MS69 PCGS. Beginning in 2002, Philadelphia and Denver Mint-produced Kennedy half dollar coins were only available through orders placed with the Mint, no coins were issued for circulation. The 2011-P issue consists of 1,750,000 pieces. This lustrous example nears perfection, with boldly struck designs and attractive surfaces. Population: 4 in 69, 0 finer (12/12). PCGS# 505191

SMS KENNEDY HALF DOLLAR

1965 Half Dollar, MS68 Cameo Rare Special Mint Set Issue

- 5049** 1965 SMS MS68 Cameo NGC. Specialist collectors of Kennedy half dollars recognize the 1965 as the rarest of the three Special Mint Set issues in Cameo or Deep Cameo. For 1965, NGC has certified one MS69 Cameo and 28 MS68 Cameos (12/12). That service has never certified an MS68 Ultra Cameo. This Superb Gem has deeply mirrored fields with lustrous silver devices, and no evidence of toning on either side. NGC ID# 27WJ, PCGS# 86845, CoinPlex ID# KHP1965MSCA

PROOF KENNEDY HALF DOLLARS

- 5050** 1964 PR69 Deep Cameo PCGS. Type One Reverse. Icy motifs and glassy fields combine to ensure imposing cameo contrast. Brilliant upon first glance, thorough evaluation locates infrequent tiny tan freckles. A high mintage proof issue but rare with a Deep Cameo finish. Population: 78 in 69 Deep Cameo, none finer (11/12). PCGS# 96800, NGC ID# 24WF, CoinPlex ID# KHP1964DC
- 5051** 1964 PR69 Deep Cameo PCGS. Type Two Reverse. Icy motifs exhibit imposing contrast with the prominently mirrored fields. Brilliant and flawless with a full strike. Population: 78 in 69 Deep Cameo, none finer (12/12). PCGS# 96800, NGC ID# 24WF, CoinPlex ID# KHP1964DC

1964 Kennedy Half, PR68 Ultra Cameo Accented Hair Subtype

- 5052** 1964 Accented Hair PR68 Ultra Cameo NGC. FS-401. Type One Reverse. The 1964 Accented Hair "variety" is actually a subtype of the initial Kennedy half dollar issue of 1964. This issue, with its bold part in President Kennedy's hair, is seldom found with black-and-white contrast, and it is highly elusive in PR68 Ultra Cameo. This Superb Gem is fully brilliant and untuned with frosty silver devices and deeply mirrored fields. Census: 10 in 68 Ultra Cameo, 1 finer (12/12). NGC ID# 24WG, PCGS# 96801, CoinPlex ID# KHP1964ACCENTDC
- 5053** 1976-S Silver PR70 Deep Cameo PCGS. A flawless proof with deep contrast between the fields and devices. The surfaces are stunningly brilliant with unlimited depth to the mirrored fields and fully lustrous and frosty devices. Population: 53 in 70 Deep Cameo (11/12). *Ex: Central States (Heritage, 5/2009), lot 2930.* PCGS# 96812, NGC ID# 27WR, CoinPlex ID# KHP1976SSILVDC

MODERN ISSUES

2000-W Library of Congress \$10, MS69

- 5054** 2000-W Library of Congress Bimetallic Ten Dollars MS69 NGC. The first bimetallic (gold-platinum) U.S. Mint issue, the 2000-W Library of Congress ten dollar coins were struck in proof and "circulation strike" format, but the low-mintage business strikes, at 7,261 distributed, were the long-term winner in high grades — far more so than the proofs, at 27,445 coins. This is an attractive example of one of the keys to a modern set of gold commemoratives. NGC ID# 28V5, PCGS# 9784, CoinPlex ID#
- 5055** 2009-W Sarah Polk Half-Ounce Gold Ten Dollar, First Strike PR70 Deep Cameo PCGS. The contrast between the field and the devices is outstanding, as expected on this unimprovable example as graded by PCGS. This is a beautifully produced piece exhibiting bold detail. PCGS# 404582

MODERN BULLION COINS

- 5056 1988 Silver Eagle MS70 NGC.** Over 11 million Silver Eagles were produced for the prior year, with the demand being reduced by more than half for this 1988 issue. This is a thoroughly attractive example, as the grade would imply. NGC ID# 26J8, PCGS# 9816, CoinPlex ID#

Exemplary MS70 1991 Silver Eagle

- 5057 1991 Silver Eagle MS70 NGC.** The early Silver American Eagles are not only extremely popular, they are less often seen in this ultimate MS70 grade than many of their later counterparts. And the popularity of the series as a whole can scarcely be overestimated. This example is every bit as flawless and mark-free as expected, with excellent eye appeal. NGC ID# 26JE, PCGS# 9846, CoinPlex ID#

- 5058 1992 Silver Eagle MS70 NGC.** A numerically perfect example with plenty of eye appeal, the average price for an ounce of silver in 1992 was just below \$4. The mintage for regular strikes in 1992 was slightly over 5.5 million pieces. NGC ID# 26JG, PCGS# 9856, CoinPlex ID#

Brilliant MS70 1993 \$1 Silver Eagle

- 5059 1993 Silver Eagle MS70 NGC.** An unimprovable example as determined by NGC, this piece displays brilliant surfaces and a sharp strike. Many collectors avidly seek numerically perfect pieces such as this. Weinman's Liberty Walking design was repurposed for these bullion coins. NGC ID# 26JJ, PCGS# 9866, CoinPlex ID#

1993-P Silver Eagle PR70 Ultra Cameo

- 5060 1993-P Silver Eagle PR70 Ultra Cameo NGC.** Ex: Farris Collection. The American Eagle silver and gold bullion program was designed for precious metals investors. However, the combination of proof strikes and historic designs created a popular series for collectors. This perfect proof has stunning white on black contrast. NGC ID# 26JK, PCGS# 9867, CoinPlex ID#

- 5061 1994 Silver Eagle MS70 NGC.** Among the regular issues of American Eagles to this point, 1994 ranks as the second lowest mintage, with slightly over 4 million pieces produced. This incredible 1994 Silver Eagle is a technically perfect coin. NGC ID# 26JL, PCGS# 9876, CoinPlex ID#

- 5062 1994-P Silver Eagle PR70 Ultra Cameo NGC.** Ex: Farris Collection. A gorgeous, unimprovable example, this piece displays beautifully frosted devices and brilliant, mirrored fields. Only just over 370,000 of these were struck, making them the lowest mintage of any of the regular Silver Eagle issues. NGC ID# 26JM, PCGS# 9877, CoinPlex ID#

1995-W Silver Eagle, PR69 Deep Cameo Key to the Series

- 5063 1995-W Silver Eagle PR69 Deep Cameo PCGS.** This is an exceptional example of the "King of American Silver Eagles" as this issue, the first produced at West Point, is known. These coins earned the No. 4 spot on the list of the *100 Greatest U.S. Modern Coins*. A short streak of tan patina appears between the eagle's head and left wing. Only 5 examples have been awarded higher numeric grades by PCGS (12/12).
From The J.D. Tanner Collection. PCGS# 9887, NGC ID# 28WZ

PR69 Deep Cameo 1995-W Silver Eagle
Only Five Numerically Finer PCGS-Graded Examples

- 5064 1995-W Silver Eagle PR69 Deep Cameo PCGS.** The 1995-W is the well-known key to this highly collectible series. The 1995-W Silver Eagle was a bonus coin for customers who ordered the four-piece gold set at a price of \$999, provided they stated that they wanted the Silver Eagle. This example has spectacular eye appeal due in part to the pronounced contrast between the fields and devices. PCGS has awarded higher numeric grades to only 5 examples (12/12). PCGS# 9887, NGC ID# 28WZ

1995-W Silver Eagle, PR70 Ultra Cameo
Key Silver Issue

- 5065 1995-W Silver Eagle PR70 Ultra Cameo NGC.** Ex: Farris Collection. Adolph Weinman created the iconic Walking or Striding Liberty design that was first used on half dollars in 1916. The coins proved so popular that the U.S. government reincarnated the design for use on the American Eagle silver coin program, beginning 70 years later. The limited mintage of the 1995-W proof coins created a rarity, and this white on black specimen is a perfect proof example. NGC ID# 28WZ, PCGS# 9887, CoinPlex ID#

PR70 Ultra Cameo 1995-W Silver Eagle
Brilliant and Starkly Contrasted

- 5066 1995-W Silver Eagle PR70 Ultra Cameo NGC.** NGC has awarded a technically perfect grade to this gleaming key-date silver American Eagle specimen. In the proof series of Silver Eagles, most mintages are in the hundreds of thousands. The 1995-W stands out as the key issue with a paltry mintage of only 30,125 pieces. This all-brilliant example has thickly frosted devices and deeply mirrored fields. NGC ID# 28WZ, PCGS# 9887, CoinPlex ID#

MS70 1996 Silver Eagle

- 5067 1996 Silver Eagle MS70 NGC.** With a mintage of about 3.6 million coins, the 1996 silver eagle is scarce when compared to all others, with the lowest Mint State mintage of any issue. As a result, countless collectors wish they had stashed a few rolls away during the late 1990s. Both sides display satiny silver luster and bold design definition. Census: 128 in 70 (11/12). NGC ID# 26JR, PCGS# 9900, CoinPlex ID#

- 5068 1999-W Tenth-Ounce Gold Eagle MS70 NGC.** A simply wonderful example, this coin displays a beautiful strike and gorgeous surfaces as the grade would imply. NGC ID# 26LB, PCGS# 99940, CoinPlex ID#

- 5069 2006-W One-Ounce Gold Eagle Reverse Proof PR70 PCGS.** The reverse proof gold eagles have frosted fields and mirrored devices, creating a distinctive appearance unlike anything seen before in U.S. numismatics. Exhibiting bright yellow surfaces, this perfect piece is truly flawless, undoubtedly pleasing the modern issue enthusiast. PCGS# 89994, NGC ID# 28ZH

- 5070 2006-W One-Ounce Gold Eagle, Reverse Proof PR70 PCGS.** With the PCGS First Strike designation and custom holder. Outstanding contrast shows on the pristine surfaces of both sides. A tiny orange toning spot above the right (facing) shoulder does not disturb. PCGS# 89995

- 5071 2008-W Half-Ounce Platinum Eagle MS70 PCGS.** An unimprovable example based on the PCGS-assigned grade, this appealing piece displays the Statue of Liberty obverse designed by John M. Mercanti. The 2008 reverse is "Judicial Branch" designed by Joel Iskowitz. PCGS# 393082

- 5072 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 PCGS.** A near-perfect representative of the Ultra High Relief double eagle, these pieces exhibit a merger of the 20th century artistry of Augustus Saint-Gaudens with 21st century Mint technology. PCGS# 407404, NGC ID# 26S4

- 5073 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 NGC.** A technically flawless representative of this modern Mint rendition of the classic Saint-Gaudens design in Ultra High Relief, this piece exhibits all of the eye appeal one would expect. NGC ID# 26S4, PCGS# 407404, CoinPlex ID#

COINS OF HAWAII

- 5074 1847 Hawaii Cent MS63 Brown PCGS. Medcalf 2CC-2.** Crosslet 4, 15 berries. This chocolate-brown Select example is sharply struck and satiny. One small spot is at 5 o'clock on the reverse and the obverse rim shows slender impressions at 6 and 8 o'clock. Privately struck in Attleboro, Massachusetts for the Kingdom of Hawaii. PCGS# 10965

1847 Hawaiian Cent, MS63 Red and Brown Crosslet 4, Medcalf 2CC-2

- 5075 1847 Hawaii Cent MS63 Red and Brown PCGS. Medcalf 2CC-2.** Crosslet 4. This is the most plentiful variety among all Hawaiian cents. Housed in a green-label PCGS holder, this piece is designated Red and Brown, showing full design definition. The holder is discolored lemon yellow, rendering a specific color determination impossible. Population: 60 in 63 (1 in 63+) Red and Brown, 22 finer (12/12). PCGS# 10966

1847 Hawaii Cent, MS64 Red and Brown Medcalf 2CC-2, Crosslet 4

- 5076 1847 Hawaii Cent MS64 Red and Brown NGC. Medcalf 2CC-2.** Ex: Forsythe Collection. Crosslet 4. The common variety with a berry centered below the first A in HAWAII. The same reverse die, paired with the Plain 4 obverse, is the rarest variety of Hawaii cents. Splashes of bluish-brown patina appear on both sides, accompanying the brilliant and highly lustrous orange surfaces of this fresh Hawaiian cent. Census: 4 in 64 Red and Brown, 1 finer (12/12). PCGS# 10966

- 5077 1883 Hawaii Ten Cents MS63 PCGS.** The 1883 one-year type Umi Keneta, or Hawaii one dime, had a reported mintage of 250,000 pieces, but a large number were likely melted when Hawaii became a Territory of the United States. An attractive light champagne patina covers both sides of this lovely well-struck example that retains bright luster. A few minor surface marks appear, including one near the eye. Population: 31 in 63, 68 finer (12/12). PCGS# 10979

Rare 1883 Hawaiian Quarter, PR62 Richly Toned

- 5078 1883 Hawaii Quarter PR62 NGC.** Only 26 pieces were minted, therefore opportunities to acquire one of these examples are rare. Deeply toned, this example displays rich hues of dark steel-gray that include shades of blue, along with apricot and peach. The bust on the obverse is largely highlighted by the apricot and peach colors, adding to the visual allure. The darkly patinated fields on the reverse outline the shield and accentuate the detailed strike. The three finer NGC-graded examples are all only a single grade point higher. Census: 4 in 62, 3 finer (11/12). PCGS# 10989

- 5079 1883 Hawaii Half Dollar MS62 PCGS.** Hues of gold and brown cover large portions of this well-struck example. Splashes of teal and purple-brown appear at portions of the obverse at upper left. Contact marks held this piece from a higher grade. PCGS# 10991

1883 Hawaiian Half, MS63+

- 5080 1883 Hawaii Half Dollar MS63+ PCGS. CAC.** An uncommonly high-end survivor from this heavily melted issue, boldly struck with the intricate details of Kalakaua's beard particularly well-impressed. The patina is primarily gray and golden-yellow with hints of olive-green, russet, and steel-blue. Minor surface marks, almost entirely within the fields, contributed to the grade but do little to affect the eye appeal of this high-end Select Mint State example. PCGS# 10991

1891 Hawaii Pattern Silver Dollar, PR62
Struck in 1893 by Reginald Huth
Queen Liliuokalani Type

- 5081** 1891 Queen Liliuokalani Pattern Silver Dollar PR62 NGC. Medcalf 2MH-1. The obverse features a young Queen Liliuokalani, facing left. A map of the Hawaiian Islands set in the frosted globe background of the Pacific Ocean centers the reverse. The queen was deposed in January 1893 and Hawaii became a U.S. territory instead of a monarchy. A mere 50 pieces of these beautifully designed Liliuokalani patterns are believed to have been struck, with Reginald Huth behind the issue. Survivors are eager sought by both numismatic enthusiasts and collectors of Hawaiiana alike. This is an intricately specimen with evident cameo contrast despite to light to medium caramel-gold toning. The fields display faint hairlines and we note a single faded thin mark above the left (facing) shoulder. Listed in *Unusual World Coins, Third Edition* (1992) by Colin R. Bruce II as XM1. PCGS# 10995

1891 Queen Liliuokalani Silver Dollar Pattern
PR63 Deep Cameo

- 5082** 1891 Queen Liliuokalani Pattern Silver Dollar PR63 Deep Cameo PCGS. Medcalf 2MH-1. Reginald Huth was a late Victorian-era British collector. He must have sympathized with the deposed Royalty from the former Kingdom of Hawaii, since he issued several silver medals or dollar patterns that depicted either Queen Liliuokalani or Princess Kailulani. These were struck by London medallists Pinches & Co. and the well-made varieties are all coveted by Hawaiian collectors to this day. The present fully struck piece has frosty motifs and glassy fields. The borders display attractive peach-gold and cherry-red shades though the centers remain brilliant. Close examination reveals the small letters H and L are lightly pinscratched on the reverse border beneath the stars, but field hairlines are minimal for the designated grade. PCGS# 10995
- 5083** 1919 Kamehameha Medal by Wall & Dougherty. The medal marked the 100th anniversary of the death of Kamehameha I. The portion with the pin affixed to the back reads 1819 JUNE, 11 1919 KAMEHAMEHA I while the larger portion attached by chains depicts the king participating in the ancient sport of catching spears at which he is said to have excelled. MAMALAHOE appears below. W&D is stamped on the back. According to a photocopy of two newspaper articles dated 1954, a former employee of Wall & Dougherty, C.P. West, stated that he designed the medals in 1919 and that only 8 pieces were produced. He did not have information concerning who ordered the medals. PCGS# 10995

**Wailuku Plantation Half Real Token, VF30
Variety 2TE-4**

5084 (1871) Wailuku Plantation Token, Half Real VF30 PCGS. Medcalf 2TE-4. Narrow Starfish. The half real denomination, equal to 6.25 cents, was marked by a Roman Numeral VI on the obverse of this Choice VF token. Both sides have medium olive surfaces with dark patina around the devices. PCGS has certified five of these tokens, ranging from VF30 to AU50. PCGS# 600506

5085 1871 Hawaii Wailuku Plantation Token, 12 1/2 Cents VF25 PCGS. Medcalf 2TE-2. Narrow Starfish. These early Wailuku Plantation tokens were hand-made pieces produced at a blacksmith shop. That suggests that they were made by the hammer method, a coin production method that predates the screw press. The result was crude tokens seldom found in high grade. This attractive example has smooth mahogany and olive-brown surfaces with lighter tan on the devices. It was produced on a well-prepared planchet. The dies are slightly misaligned, as expected for the local operation. PCGS# 600503

**1882 Haiku Rial Plantation Token
Medcalf TE-15, MS62 Brown**

5086 1882 Hawaii Haiku Plantation Token, One Rial MS62 Brown NGC. Medcalf TE-15. The Haiku Sugar Company was located east of Wailuku. Per Medcalf, the Haiku Plantation tokens are considered "the most artistic and well struck of the early metal tokens." The "Rial" denomination on the token was a phonetic translation of one real in Mexican silver. This attractive, well-struck example displays satiny, dark brown surfaces. Listed on page 406 of the 2013 *Guide Book*. PCGS# 600518

ERRORS

**Double Struck Indian Cent, AU50
Second Strike 40% Off Center**

5087 Undated Indian Cent — Double Struck, Second Strike 40% Off Center — AU50 PCGS. The first strike was normal, but the second impression was widely off center toward 6 o'clock. The second strike is at 7 o'clock relative to the first strike. Struck between 1870 and 1886, due to the Bold N in ONE and the placement of the feather tips relative to the legend.

**Triple Struck 1889 Indian Cent, XF45
Additional Strikes are 85% and 95 Off Center**

5088 1889 Indian Cent — Triple Struck, 85% and 95% Off Center — XF45 PCGS. The first strike was normal but the coin was struck an additional two times, once 85% off center toward 7:30 and once 95% off center toward 6 o'clock. The two off center strikes are at 5 o'clock and 10:30 relative to the first strike. The date is complete on the 95% off center strike and mostly complete on the first strike. None of the strikes are uniface.

**1957 Cent, AU55, Struck
on a Silver Dime Flan**

5089 1957 Lincoln Cent — Struck on a Silver Dime Planchet — AU55 PCGS. Dappled golden-brown toning visits this satiny wrong planchet error. IN GOD WE TRUST shows spreading toward the rim. The strike is good except on the shoulder and opposite on the O in ONE. No high point wear is evident, but delicate field hairlines account for the grade.

1957 Cent, AU55, Struck on a
Silver Dime Planchet

- 5090 1957 Lincoln Cent — Struck on a Silver Dime Planchet — AU55 PCGS. A satiny wrong planchet error with delicate chestnut-gold toning and some softness of strike on the O in ONE and the high points of the portrait. Devoid of marks. Most legends are well defined though TRUST and E PLURIBUS UNUM show stretching toward the rim. Aligned with the collar at 10 o'clock.

1957 Cent Struck on a
Silver Dime Planchet, AU55

- 5091 1957 Lincoln Cent — Struck on a Silver Dime Planchet — AU55 PCGS. Struck aligned with the collar at 10:30, this flashy off metal error has a slight change of color on the cheekbone, jaw, and ONE CENT. Traces of autumn-gold toning visit the fields. TRUST and E PLURIBUS UNUM show spreading toward the rim while all other legends are bold.

1958 Wheat Cent on a Silver
Dime Planchet, MS62

- 5092 1958 Lincoln Cent — Struck on a Silver Dime Planchet — MS62 PCGS. Aligned with the collar at 6 o'clock. The upper obverse and lower reverse rims are broad and have low relief. The tops of IN GOD WE TRUST blend into the rim while other legends are distinct, except for a softly brought up 8 in the date. Minimally toned and unmarked with the semiprooflike luster usual for the error combination.

Lincoln Cent on a Silver Dime Planchet
Triple Struck, Memorial Reverse

- 5093 Undated Lincoln Memorial Cent — Triple Struck on 90% Silver Dime Planchet — MS64 NGC. 2.5gm. The first strike of this untuned silver cent was well centered. The coin then failed to fully eject from the dies, and was struck a second time, approximately 50% off center toward 6 o'clock, at 4:30 relative to the first strike. The second strike is uniface, since a planchet was fed between the reverse and the reverse die during the later impression. Stretching of IN GOD WE TRUST on the second strike leaves an intermediate shelf that NGC has deemed a third strike, but might also be caused by a second contact of the dies during the descent of the second strike.

1959 Cent on a Silver Dime Planchet
Uncirculated Details

- 5094 1959 Lincoln Cent — Struck on a Silver Dime Planchet, Cleaning — Genuine PCGS. Unc. Details. This off metal error is aligned with the collar at 9 o'clock. AMERICA and TRUST are complete but exhibit stretching toward the rim. The memorial is well struck though the high points of Liberty's head show some blending. Faint obverse hairlines indicate a mild cleaning.

Uncirculated 1959 Cent
on a Silver Dime Planchet

- 5095 1959 Lincoln Cent — Struck on a Silver Dime Planchet — MS61 PCGS. Crisply struck for this mint error category. The luminous silver-white surfaces lack conspicuous marks. TRUST is stretched toward the rim, as often seen on cents coined on dime planchets. The upper obverse field has a slender arc of minor granularity.

**Double Denomination 1959 Cent, MS63
Struck on a Dominican Republic 10 Centavos**

5096 1959 Lincoln Cent — Struck on a Dominican Republic Ten Centavos — MS63 PCGS. 2.50gm. In 1959, the U.S. Mint struck Dominican Republic ten centavos and half pesos, respectively using dime and half dollar planchets. No traces of the undertype are readily evident beneath a loupe. Sharply struck for a wrong planchet error, since both sides have full rims. The E in E PLURIBUS UNUM is essentially absent, however.

**Near-Gem 1959 Cent
on a Silver Dime Planchet**

5097 1959 Lincoln Cent — Struck on a Silver Dime Planchet — MS64 PCGS. Vibrant luster sweeps the lightly toned straw-gold and steel-blue surfaces. Unmarked and nicely centered with a bold date. STATES OF and the middle base of the memorial show softness typical of the error combination. The present off metal Lincoln cent date and mintmark collection, dated between 1957 and 1965, must have required years of searching to assemble.

**1959-D Lincoln Cent, MS63
Struck on a Silver Dime Planchet**

5098 1959-D Lincoln Cent — Struck on a Silver Dime Planchet — MS63 PCGS. More softly impressed than is usual for this error combination. Lincoln has a flat shoulder and the opposite portion of the legend, the ST in STATES, is illegible. Satiny and smooth with a hint of gold toning. Aligned with the collar at 12 o'clock.

**1960 Large Date Cent, MS61
on a Silver Dime Flan**

5099 1960 Large Date Lincoln Cent — Struck on a Silver Dime Planchet — MS61 PCGS. This wrong planchet mint error has a strong rim at 5 o'clock where the coin was flush against the collar. IN GOD, at the opposing end of the obverse, is partially absent since the undersized coin could not completely fill the dies. The motifs are well struck. The right base of the Lincoln Memorial has a patch of unobtrusive test marks.

**Large Date 1960 Cent, MS62
on a Silver Dime Planchet**

5100 1960 Large Date Lincoln Cent — Struck on a Silver Dime Planchet — MS62 PCGS. A radiant silver-white off metal error. Intricately struck for the error combination, and void of visible marks. The legends are intact though the AMERI shows spreading toward the rim, usually seen for cents on dime flans. Both sides show faint, slender, and parallel gray streaks, as made.

**Large Date 1960-D Cent, AU58
on a Silver Dime Planchet**

5101 1960-D Large Date Lincoln Cent — Struck on a Silver Dime Planchet — AU58 PCGS. An essentially brilliant near-Mint off metal error. Aligned with the collar die at 5 o'clock, much of IN GOD WE is absent. Lincoln's forehead and cheekbone have a blunt strike due to the undersized planchet. Devoid of noticeable marks.

**1960-D Small Date Cent, MS63
Struck on a Silver Dime Planchet**

- 5102 1960-D Small Date Lincoln Cent — on a Silver Dime Planchet — MS63 PCGS.** Struck flush with the collar at 11 o'clock, this wrong planchet error has a full date, though the 0 is against the proto-rim. Light caramel-gold toning visits smooth surfaces. Portions of the Memorial are softly defined. The Small Date variety of the 1960-D is much scarcer than its Large Date counterpart.

**1961 Lincoln Cent, MS61
Struck on a Silver Dime Flan**

- 5103 1961 Lincoln Cent — Struck on a Silver Dime Planchet — MS61 PCGS.** This well struck off metal error shows stretching on peripheral letters toward the rim, a characteristic of the cent on dime planchet mint error. Faint hairlines on the fields determine the grade. Untoned at the centers with light apricot patina at the borders.

**MS62 1961 Cent, Struck
on a Silver Dime Planchet**

- 5104 1961 Lincoln Cent — Struck on a Silver Dime Planchet — MS62 PCGS.** This satiny off-metal cent is well struck aside from the cheekbone. All legends are complete. Minor gray granularity is noted on portions of the reverse. Marks are confined to a single thin obverse line at 4 o'clock. The silver-white surfaces are minimally toned.

1961-D Cent on a Silver Dime Planchet, MS60

- 5105 1961-D Lincoln Cent — Struck on a Silver Dime Planchet — MS60 PCGS.** A cream-gray representative that has subdued luster but is virtually free from contact. Lincoln's forehead and cheekbone are lightly brought up, as often seen on this wrong planchet combination. TRUST and AMERICA exhibit spreading, and are tight against the border though essentially complete.

**90% Silver 1962 Cent, MS62
Struck on a Dime Planchet**

- 5106 1962 Lincoln Cent — Struck on a Silver Dime Planchet — MS62 PCGS.** Light almond-gold toning encompasses this lustrous and unblemished off metal cent error. Softly impressed on portions of the devices and STATES OF IN GOD WE TRUST is partly off the flan, but the rim is visible near 6 o'clock. The 196 in the date is sharp though the 2 is less distinct.

**Near-Mint 1962-D Cent on a
Silver Dime Planchet**

- 5107 1962-D Lincoln Cent — Struck on a Silver Dime Planchet — AU58 PCGS.** Aligned with the collar at 7 o'clock, most of IN GOD WE TRUST is absent. Lightly brought up on the upper reverse. One slender mark is above the E in ONE. The present auction has cent on dime planchet errors for most cent issues from the late 1950s through early 1960s, and provides an important opportunity for the collector assembling date and mintmark runs of the elusive error combination.

1963 Cent, MS61, on a
Silver Dime Planchet

- 5108** 1963 Lincoln Cent — Struck on a Silver Dime Planchet — MS61 PCGS. Struck flush with the collar at 5 o'clock. IN GOD WE is partly off the flan. Highly lustrous for the error category but bluntly struck on the portrait and memorial. Close to brilliant and essentially as made, though planchet striations are retained where the strike is soft.

Borderline Uncirculated 1963-D Cent
Struck on a Silver Dime Planchet

- 5109** 1963-D Lincoln Cent — Struck on a Silver Dime Planchet — AU58 PCGS. This wrong planchet mint error is aligned with the collar at 9 o'clock, resulting in stretching and minor incompleteness on TRUST and AMERICA. The bright fields are satiny, minimally marked, and show a whisper of gold toning. The cheekbone and the base of the steps lack a full strike.

1964 Cent on a Dime Blank, MS63

- 5110** 1964 Lincoln Cent — Struck on a Dime Blank — MS63 NGC. 2.5gm, the weight of a 90% silver dime. Almond-gold toning graces this satiny off-metal mint error. Aligned with the collar at 11 o'clock, the legends are intact though the top of IN GOD WE TRUST is softly struck. The rim is present only near ONE. The 196 in the date is sharp. The 4 has a lighter impression but is nearly complete.

MS62 1964 Lincoln Cent
Struck on a Silver Dime Planchet

- 5111** 1964 Lincoln Cent — Struck on a Silver Dime Planchet — MS62 PCGS. The present off metal error is aligned with the collar die at 6 o'clock, thus IN GOD WE TRUST is partially off the flan. The final letters in AMERICA exhibit spreading toward the border, usual for the error category. Moderately prooflike with delicate russet-brown toning.

Select 1964 Lincoln Cent
on a Silver Dime Planchet

- 5112** 1964 Lincoln Cent — Struck on a Silver Dime Planchet — MS63 PCGS. This coruscating silver-gray off-metal error is aligned with the collar at 6 o'clock. The date is bold but IN GOD WE TRUST is partly off the flan. Marks are essentially absent though both sides retain the streaky planchet surface, which is riddled with slender horizontal mint-made retained laminations.

1964-D Cent Struck on a
Silver Dime Flan, MS62

- 5113** 1964-D Lincoln Cent — Struck on a Silver Dime Planchet — MS62 PCGS. Aligned with the collar at 1 o'clock, this mint error cent has a full date and mintmark but the upper left peripheral legends are partially off the coin. Delicate straw-gold and powder-blue toning. One slender abrasion is on the left side of the Lincoln Memorial steps.

1965 Cent on Silver Dime Planchet, MS65

- 5114** 1965 Lincoln Cent — Struck on a Silver Dime Planchet — MS65 NGC. 2.5gm, the standard weight of a silver dime. Clad dimes typically weigh 2.27gm. Although 1965-dated dimes are clad, 1964-dated dimes in 90% silver alloy were struck in great numbers during 1965, perhaps to use up leftover stock, or to deter hoarding. This lustrous, untoned, and sharply struck wrong planchet error has only trivial surface imperfections.
Ex: Long Beach Signature (Heritage, 2/2007), lot 3752.

Double Denomination 1980 Cent
Struck on a 1980-P Dime, MS64

- 5115** 1980 Lincoln Cent — Double Denomination on a Struck Dime — MS64 PCGS. The PCGS insert does not specify the date and mintmark of the dime, but the 1980 P from the host coin is obvious near ONE on the cent. The cent date has a bold 19 and an incomplete 80. Roosevelt gazes north relative to the Lincoln Memorial. Satiny, unabraded, and lightly toned.

15% Off Center Near-Mint
1865 Three Cent Nickel

- 5116** 1865 Three Cent Nickel — Struck 15% Off Center — AU58 PCGS. Off center toward 1 o'clock with a broad arc of unstruck surface centered at 7 o'clock. Multiple sets of clash marks are also present, as made. Toned dove-gray and unabraded with some softness of strike at the centers. First year of the three cent nickel series.

40% Off Center 1892 Nickel, AU50

- 5117** 1892 Liberty Nickel — Struck 40% Off Center — AU50 PCGS. Widely off center toward 1 o'clock. The date is complete, though CENTS is off the flan. Circulation wear is essentially absent but the stone-gray surfaces are lightly hairlined and mildly granular. A scarce mint error on a 19th century type.

Double Struck 1903 Nickel, MS62
Second Strike 80% Off Center

- 5118** 1903 Liberty Nickel — Double Struck, 2nd Strike 80% Off Center — MS62 NGC. The first strike was normal. However, the piece was not fully ejected, and was struck a second time widely off center toward 7 o'clock, at 1 o'clock relative to the first strike. The second strike shows both sides. The collar of the reverse die makes a circular impression on the reverse near the second strike.

1906 Nickel on a Cent Planchet
XF Sharpness

- 5119** 1906 Liberty Nickel — Struck on a Cent Planchet, Cleaning — Genuine PCGS. XF Details. An off-metal error on an obsolete type. Aligned with the collar at 10 o'clock, the undersized flan has a slightly incomplete design between 2 and 7 o'clock on the obverse and 11 to 5 o'clock on the reverse. The date is essentially complete though the digit bases reach the edge. Toned rose-red and orange-gold with mildly glossy surfaces. Circulation wear is minimal though the forehead curls are softly brought up.

**Double Struck AU 1907 Nickel
Second Strike 85% Off Center**

- 5120** 1907 Liberty Nickel — Double Struck, Second Strike 85% Off Center — AU50 PCGS. The first impression of the dies was normal, but the coin was struck a second time, at 8:30 relative to the first strike. The second strike is 85% off center toward 7:30 and shows stars 8, 9, and 10 along with a portion of Liberty's hair. The reverse of the second strike displays the CA in AMERICA and the TS in CENTS. The stone-gray and almond-gold surfaces are well defined and exhibit delicate parallel hairlines.

**1920 Nickel on a Cent Planchet
XF Sharpness**

- 5121** 1920 Buffalo Nickel — Struck on a Cent Planchet, Damage or Tooling — Genuine PCGS. XF Details. This off-metal mint error has pleasing sharpness and displays rich cherry-red and orange color. Both sides are hairlined from cleaning and the right obverse field near the profile shows moderate damage. A majority of Buffalo nickel errors in Heritage auctions are off center strikes. Examples struck on cent planchets appear only about once per year.

**Undated Roosevelt Dime, MS64
Struck on a Feeder Finger**

- 5122** 20??-D Roosevelt Dime — Double Struck on Feeder Finger — MS64 PCGS. A slate-gray feeder finger failed to retract and was struck between dime dies. The strike sheared off a large fragment of the finger. About two-thirds of the dime design is present, though the profile is missing, as is UNITED STATES OF. The date is partial, with the top of the 20 present, the third digit absent, and the flat top of the fourth digit present. Judging from what is present of the fourth digit, we suspect the date is 2003, 2005, or 2007. Designated as a double strike, likely due to the extreme stretching of the R in AMERICA, but it is possible that the stretching occurred during a single strike.

**25% Off Center Seated Quarter
Choice VF, Type Two Motto Subtype**

- 5123** Undated Philadelphia Mint Motto Seated Quarter — Struck 25% Off Center — VF35 PCGS. The Type Two reverse suggests the coin was struck between 1875 and 1891. Off center toward 6:30 with the date and STATES OF off the flan. The letters in AMERICA show spreading toward the rim, characteristic of an off center error. Lightly toned and well detailed with traces of luster on the drapery and plumage.

**5% Off Center 1892 Quarter
AU55, First-Year Barber Type**

- 5124** 1892 Barber Quarter — Struck 5% Off Center — AU55 PCGS. Delicate caramel-gold toning adorns the partly lustrous surfaces of this sharply impressed first year type coin. Moderately off center toward 6:30, with all design details intact including the date. Letters in UNITED STATES show moderate spreading toward the rim, characteristic of a broadstrike.

**1958 Quarter on a Cent Flan
AU Sharpness**

- 5125** 1958 Washington Quarter — Struck on a Cent Planchet, Cleaning — Genuine PCGS. AU Details. Type B Reverse. A well centered example of this scarce off metal combination. The portrait and eagle are sharply struck and intact. The date is readable though distorted from metal flow toward the rim. Appropriately, the denomination is illegible. Void of hairlines, but recolored in cherry-red and olive-green shades.

**Double Struck 1959-? Quarter
2nd Strike 60% Off Center**

- 5126** 1959-? Washington Quarter — Double Struck, Second Strike 60% Off Center — MS63 PCGS. Type A Reverse. The first strike was conventional, but the coin failed to fully eject and was struck again, this time widely off center toward 11:30. The second strike is at 12 o'clock relative to the first strike. Both dates are present but the second strike overlaps the mintmark position from the first strike, while the mintmark (if any) on the second strike is off the flan.

**Choice 1998-P Quarter
Reverse Indented by Cent Flan**

- 5127** 1998-P Washington Quarter — Reverse Indented by Cent Planchet — MS64 PCGS. Two planchets, for a cent and a quarter, were simultaneously fed between quarter dies. The cent flan rested between the reverse die and the quarter planchet. The obverse appears normal, but the reverse has a well centered recession where the cent (not included) indented the quarter. The eagle is faintly apparent throughout the indent, while the reverse border is raised and displays partial peripheral quarter legends.

**D-Mint Franklin Half, AU55
Struck on a Dime Planchet**

- 5128** Undated Denver Mint Franklin Half — Struck on a Dime Planchet, Uniface Obverse — AU55 PCGS. 2.4gm. A dime planchet and a half dollar planchet were fed together between half dollar dies. The dime planchet was struck between the reverse die and the half dollar planchet (the latter piece is not included). The dime planchet was aligned with the reverse die at 3 o'clock, so the eagle is fully present, as is AMERICA and most of the bell. There appears to be a Denver mintmark above the bell but it is very blurry. The obverse displays a faint incused and reversed image of the reverse impression, consistent with a uniface strike on a very thin flan.

**Choice 1956 Franklin Half on a
Silver Quarter Planchet**

- 5129** 1956 Franklin Half — Struck on a Silver Quarter Planchet — MS64 PCGS. A well centered wrong planchet error with virtually all of the portrait and bell on the flan. The date is full, IN GOD WE TRUST and STATES OF are absent, and the other peripheral legends are partial. Lustrous and brilliant with the surface preservation and eye appeal of a higher grade.

1957 Half on a Quarter Planchet, MS63

- 5130** 1957 Franklin Half — Struck on a Silver Quarter Planchet — MS63 PCGS. This wrong planchet error has ideal centering, since all of the portrait, bell, date, and eagle are present, as is the field above the bell, which confirms its Philadelphia origin. Most of the peripheral legends are absent, though the upper half of HALF DOLLAR is visible.

**1961-D Franklin Half, MS62
Struck on a Nickel Planchet**

- 5131 1961-D Franklin Half Dollar — Struck on a Five Cent Planchet — MS62 NGC.** 5.0 grams. The complete bust of Franklin, the date, the entire Liberty Bell, and the mintmark, are all visible on this nicely centered impression of the half dollar dies on a nickel planchet. Both sides are light gray with full luster and wisps of toning.

**1964-D Kennedy Half, MS63
Struck on a Silver Quarter Planchet**

- 5132 1964-D Half Dollar — Struck on a Silver Quarter Planchet — MS63 PCGS.** Type Two Reverse. All of the portrait and eagle are present. Most of UNITED STATES OF AMERICA is absent. The date is off the flan, but the location of the Denver mintmark, near the stem of the eagle's branch, confirms the coin is a 1964-D. Satiny and lightly toned.

**Double Struck 197?-D Half Dollar, MS63
Second Strike 30% Off Center**

- 5133 197?-D Kennedy Half — Double Struck, Second Strike 30% Off Center — MS63 PCGS.** The initial strike was normal. The coin was struck a second time, off center toward 7 o'clock, at 7 o'clock relative to the first strike. The Denver mintmark from the first strike is visible on the cheek from the second strike, with the loop of the 9 evident on the chin and the 7 apparent on the neck. Lustrous and minimally abraded with rich honey toning.

**Doubled Die Obverse 1973-D Half, MS62
Double Struck, 2nd Strike 40% Off Center**

- 5134 1973-D Kennedy Half — Double Struck, Second Strike 40% Off Center — MS62 PCGS.** FS-101. The first strike was normal, but the coin was struck again, widely off center toward 12 o'clock. The second strike is non-uniface and at 12 o'clock relative to the first strike. Light honey-gold and ice-blue toning graces lustrous and unmarked surfaces. In addition, the coin is a doubled die obverse variety, evident on IN GOD WE TRUST and listed in *Cherry-pickers'*. The variety is undesignated as such on the insert.

**Choice 1976-D Bicentennial Half
Double Struck, 2nd Strike 85% Off Center**

- 5135 1976-D Clad Bicentennial Half — Double Struck, Second Strike 85% Off Center — MS64 PCGS.** The first strike was normal, but the coin failed to eject completely and was struck a second time, far off center toward 6 o'clock. The second strike is at 6 o'clock relative to the first strike. The second strike is non-uniface. The upper half of the Denver mintmark is present.

**Mated Error Pair 1976-D Halves
Brockage and Reverse Die Cap**

- 5136 1976-D Clad Bicentennial Half Mated Error Pair PCGS.** Coin #1 is graded MS65 and described as Obverse Die Cap, Brockage Reverse. Coin #2 is certified as MS62 with the notation Reverse Cap Counterbrockage Obverse. The story of this error begins with a normal first strike for Coin #2. However, it stuck to the reverse die and failed to eject. Coin #1 was then fed and struck between the obverse die and Coin #2. The obverse of Coin #1 and the reverse of Coin #2 exhibit curved knife rims of various depth. A light X was pinscratched on the cheek of Coin #2 by a curious finder. (Total: 2 coins)

**Double Struck 1976-D Half Dollar, MS67
Both Strikes Off Center with Reverse Brockage**

- 5137 1976-D Clad Bicentennial Half — Double Struck, Both Off Center, Reverse Brockage — MS67 NGC.** The story of this spectacular error begins when a coin (not the present lot) stuck to the reverse die after it was struck. Two non-overlapping planchets, one of which became the present lot, were then fed between the obverse die and the previously struck coin. The present lot was struck approximately 50% off center toward 12 o'clock. The strike left an incused and reversed impression of the obverse on the reverse. The reverse also shows a second curved impression from the first strike, from the outline of second fed planchet (not included). The present coin failed to eject and was struck a second time, perhaps 30% off center toward 2:30. Again, on the second strike, the reverse die was blocked by the reverse die cap, leaving a second brockage impression.

**Fascinating Mated Error Pair
Counterbrockage, Double Struck
1979 Half Dollar, MS64**

- 5138 1979 Kennedy Half Mated Error Pair MS64 PCGS.** Coin #1 is designated by PCGS as Double Struck, Double Counterbrockage. Coin #2 is designated by PCGS as Double Struck, Double Brockage Obverse. However, we believe Coin #1 is triple struck and a counterbrockage, while Coin #2 is a double struck brockage of a counterbrockage. The first strike for coin #1 was between the obverse die and a brockage of the obverse design (that brockage coin is not included in the lot). The second strike for coin #1 was between the obverse die and coin #2, which was fed between coin #1 and the reverse die. The two coins were struck again, this time with coin #1 approximately 50% off center toward 2:30. (Total: 2 coins)

**Rotated Double Struck in Collar
1921-S Morgan Dollar, AU50**

- 5139 1921-S Morgan Dollar — Double Struck in Collar & Rotated — AU50 PCGS.** The first strike was normal, but the coin failed to eject. It rotated approximately 135 degrees clockwise and was struck a second time. Both sides show considerable evidence of the initial strike on the fields and peripheral elements. Delicate gold toning visits partly lustrous surfaces. One small obverse rim mark at 9 o'clock, and the field near Liberty's mouth has a test mark made by a curious finder.

**MS63 1890-CC Half Eagle
Reverse Struck Through**

- 5140 1890-CC Half Eagle — Reverse Struck Through — MS63 NGC.** A bullet-shaped strike-through, as made, is on the reverse between the branch stem and the period following the denomination. An object, such as a small rod, came between the reverse die and the present coin. This lustrous orange-gold Carson City half eagle is smooth aside from minor field grazes. The centers show minor softness usual for the Old West facility.

GSA DOLLARS

**Near-Gem 1879-CC GSA Dollar
Clear CC VAM-4**

- 5141 1879-CC MS64 NGC. VAM-4.** This Clear CC semikey near-Gem is lustrous and untoned with clean fields and minor facial grazes. The strike is good though incomplete at the centers. Accompanied by the box and certificate of GSA issue. VAM-4 is noteworthy for a lengthy die line descending from the base of Liberty's nose. NGC ID# 253T, PCGS# 7086, CoinPlex ID# M\$M1879CC

**1879-CC Morgan Dollar, MS63 Prooflike
Key Issue From the GSA Hoard**

- 5142 1879-CC MS63 Prooflike NGC.** The 1879-CC is the second rarest Carson City Morgan dollar, from a mintage of 756,000 pieces. This date was only lightly represented in the GSA sales, and examples in the original government holder are seldom encountered. This well-detailed Select specimen displays lustrous reflective fields that show only minor signs of contact. Census: 13 in 63 Prooflike, 2 finer (11/12).
From The Teich Family Collection. NGC ID# 253T, PCGS# 7087, CoinPlex ID# M\$M1879CCPL

- 5143 1883-CC MS65 Deep Prooflike NGC.** This Gem in a black GSA holder (band-certified) is a well-contrasted and deeply mirrored beauty. The lot comes with a GSA box, information card, and "Mixed Carson City" card, an unusual inclusion on a minimally toned and well-preserved piece. NGC ID# 254H, PCGS# 97145, CoinPlex ID# M\$M1883CCDMPL
- 5144 1885-CC MS65 ★ NGC.** A broad arc of rich golden-brown and sea-green toning endows the lower left obverse. The reverse patina shows remarkably deep ruby-red, forest-green, and peach-gold shades. NGC ID# 254S, PCGS# 7160, CoinPlex ID# M\$M1885CC

REDFIELD DOLLAR

- 5145 1899-S MS65 Paramount (MS64 NGC).** Ex: Redfield Collection. An impressive example that boasts dynamic cartwheel luster and well preserved fields. The cheek shows wispy grazes. Close to brilliant though the borders display light autumn-gold and jade-green toning. NGC ID# 256D, PCGS# 7262, CoinPlex ID# M\$M1899S

COLONIALS

1776 Continental Dollar, Choice XF
CURRENCY, Newman 1-C, Late Die State

5500 1776 Continental Dollar, CURRENCY, Pewter XF45 PCGS. Newman 1-C, W-8445, R.3. A dove-gray representative of this coveted Early American issue, dated from the year of the nation's founding and with motifs similar to contemporary Continental currency. The designs would later emerge in simplified form on the 1787 Fugio cents. This piece is evenly struck and retains glimpses of faded luster in protected areas. The field within the rings has occasional verdigris, and a small dig below the U in CURRENCY creates a mild wave on the planchet. A late die stage with breaks above GI in FUGIO and below NT in CONTINENTAL. The dies are rotated 45 degrees clockwise from medal turn. Housed in a green label holder. Listed on page 85 of the 2013 *Guide Book*.

Ex: *Palm Beach Signature* (Heritage, 11/2004), lot 5050, which realized \$23,575. PCGS# 791

1783 Chalmers Shilling, XF40
W-1785, Short Worm

5501 1783 Chalmers Shilling, Short Worm XF40 PCGS. CAC. Breen-1011, W-1785, High R.4. The citizens of Annapolis, Maryland, were tired of the abuses associated with the cut pieces from Spanish Milled dollars, pieces known as bits. It seems that some individuals produced nine or even 10 factional pieces from a single Spanish dollar, passing them at eight for a dollar, and making a tidy profit. A local silversmith, John Chalmers, produced his own coins that undoubtedly pleased his friends and neighbors. His threepence, sixpence, and shillings are all rare today. This pewter-gray specimen has clear types and legends with pleasing surfaces the show only trivial handling marks, being far finer than typically encountered. Population: 12 in 40, 8 finer (11/12). PCGS# 596

Bar Copper, MS63 Brown, W-8520
Seldom Found in High Grades

5502 (1785) Bar Copper MS63 Brown PCGS. Breen-1145, W-8520. The famous Bar copper, better known as the Bar cent to an older generation of collectors. The nomenclature changed from cent to copper with the 1987 *Guide Book*. The designs of the Bar copper resemble no other early American issue. We know approximately when this anonymous issue first circulated, due to a much-quoted article in the November 12, 1785 *New Jersey Gazette*, which states that "a new and curious kind of coppers have lately made their appearance in New York. ... These coppers are in fact similar to Continental buttons without eyes; on the one side are thirteen stripes and on the other U.S.A. as was usual on the soldiers buttons."

The present piece has all of the diagnostics of authentic pieces, such as the spur from the end of the second bar, and a slender die crack at the center between bars. Best of all, there is no sign of wear, and the golden-brown to medium brown surfaces are nearly devoid of marks. Listed on page 74 of the 2013 *Guide Book*. Population: 3 in 63 Brown, 5 finer (10/12). PCGS# 599

HALF CENTS

1793 C-3, B-3 Half Cent, XF45

5503 1793 XF45 NGC. C-3, B-3, R.3. The obverse of this first-year half cent is medium olive-brown with a few splashes of darker toning, while the reverse is combines deep steel-brown and mahogany, with lighter tan on several of the leaves, especially in the left branch. Both sides show the usual quota of handling marks associated with these early copper coins. The reverse has a scrape between HALF and CENT, with a few rim bruises and old scratches that are blended with the surrounding surface. Here is an opportunity for the early copper enthusiast to acquire a nicely detailed first-year half cent. Our EAC grade VF25. NGC ID# 2222, PCGS# 1000, CoinPlex ID# HFC1793BN

1793 C-4, B-4 Half Cent, AU53 Last Variety of the Year

5504 1793 AU53 NGC. C-4, B-4, R.3. Manley Die State 2, the usual state for this variety, with a faint die defect on the top of the 7 in the date. Four known 1793 half cent varieties combine two obverse dies (1 and 2) and three reverse dies (A, B, and C), interlocked in a simple (1-A, 1-B, 2-B, 2-C) emission sequence.

This example has pleasing olive-brown surfaces with a few splashes of darker brown toning. Handling marks are minimal, with a small edge dent at 12:30 that affects the border beads over ER of LIBERTY. A few trivial rim bruises are noted on the reverse. Our EAC grade VF35. NGC ID# 2222, PCGS# 1000, CoinPlex ID# HFC1793BN

Near-Mint State 1793 Half Cent, C-4, B-4 Seldom Seen Finer

5505 1793 AU58 PCGS. C-4, B-4, Low R.3. Manley Die State 2.0. The obverse die of the Breen-4 pairing was first used to strike the C-3, B-3 half cents, one of the four known die combinations for the year, all of about equal scarcity. The 7 in the date is short, and the L in LIBERTY is too low and above the juncture of the hair and brow. The juncture of the neck and bottom hair curl makes a sharp curve. On the reverse, the U in UNITED and the last A in AMERICA are both quite distant from the stem ends. The stem themselves are the longest of any 1793 reverse — a key to the pairing. A leaf tip appears under the right side of the E in UNITED, another under the left base of the last A. The ribbon ends are quite long and wispy, trailing down nearly to the rim at each point. This is the usually seen die state, with a lump of apparent die rust on top of the 7 and clash marks visible between Liberty's hair and the cap.

This near-Mint State piece is in remarkably high grade for an example of the C-4 die pairing, which is usually seen well-worn. It shows little evidence of wear and is struck on a broad but imperfectly centered planchet. The surfaces are predominantly chocolate-brown, although some darker areas of purplish-mahogany patina appear at the lower obverse and scattered through the central reverse. A few scattered signs of contact are confined mostly to the obverse, including a linear scrape that appears in the left obverse field before the profile, along with a few smaller marks on the neck, elsewhere in the left obverse field, and well-hidden in the hair. A tiny nick appears to the left of the 1 in the date. Both sides are well-struck, although the reverse is a bit better-defined overall than the obverse. An elusive variety so fine, with only a few survivors in Mint State. Our EAC grade XF45. PCGS# 1000, NGC ID# 2222, CoinPlex ID# HFC1793BN

PROOF CLASSIC HEAD HALF CENT

B-2 1831 Half Cent, Reverse of 1836
Rare PR67 Brown Specimen

5506 1831 Reverse of 1836 PR67 Brown PCGS. B-2, R.5. Breen Die State I. Although the obverse is bulged, this early die state shows no evidence of reverse cracks that are found in the later die states. This restrike has the reverse of 1836, also known as the First Restrike. It is far more plentiful than Original or Second Restrike 1831 half cents, and yet, just 30 to 35 pieces are known in all grades. Walter Breen enumerated 26 examples in his *Half Cent Encyclopedia*, published 29 years ago. PCGS has certified 15 of these in all grades, and the present specimen is the only piece they have called PR67, regardless of color designation (12/12). This lovely Superb Gem has subdued mirrored fields with deep brown and pale blue patina. Our EAC grade PR62. PCGS# 1189, CoinPlex ID# HFP1831RESR1836LGBERRBN

LARGE CENTS

1793 S-1 Chain Cent, Fine 12
Famous AMERI. Reverse

5507 1793 Chain AMERI. Fine 12 NGC. S-1, B-1, R.4. This is the famous Chain AMERI. cent, the first copper coin struck at the Philadelphia Mint before all the others. Although certain indications suggest Henry Voight, the actual engraver of those first dies remains unidentified. This piece has glossy chocolate-brown surfaces with splashes of lighter tan around the chain. The surfaces are moderately marked as expected for the grade, although the date, LIBERTY, and central motifs are all strong, as is the legend and denomination on the reverse. Our EAC grade VG7. NGC ID# 223G, PCGS# 1340, CoinPlex ID# LGC1793CHAINAMERIBN

1793 S-1, B-1 Chain Cent, AU53
AMERI. Reverse
First U.S. Mint Regular-Issue Coin

5508 1793 Chain AMERI. AU53 PCGS. S-1, B-1, R.4. Ex: Husak. Breen Die State III. Most numismatists consider the Chain AMERI. to be the first variety struck, and therefore the first American coin produced at the new Philadelphia Mint. Sheldon wrote in *Early American Cents*: "This coin is in strong demand at all times, and the high value arises in part from the fact that it is the first coin struck for circulation at the U.S. Mint." His comments are equally valid today, nearly 60 years after he wrote them. Although considered just Rarity-4, with 150 to 200 examples known, the Chain AMERI. is hard to locate in higher grades due to a typical weak obverse, quickly affected by wear. Sheldon also noted that older cent collectors sometimes called this the "weak obverse" variety. It is unknown who was the first to identify the Chain AMERI. cent as a new variety, although it was clearly discovered before publication of the Crosby-Levick plate in 1869.

The history of large cent collecting dates back to at least 1858, when Edward Cogan conducted a small sealed bid sale of 77 large cents. Although he did not publish the results until 1862, it is clear that there were several active collectors in the late 1850s. The 77 pieces realized a total of \$128.68, for an average of \$1.67 each. While seeming unimpressive today, the results were astonishing at the time.

In the 1860s some numismatists discouraged collecting these "insignificant" pieces. In the introduction to his *Monographs* reference, John Adams quotes an 1865 address by Dr. Winslow Lewis, president of the Boston Numismatic Society, to the members: "Are we not somewhat degenerate at this present time in our Numismatic pursuits? Will the possession of fifty or sixty cents from the first coinage to this year, a series not certainly strikingly artistic nor elegantly suggestive, be called a lofty pursuit? Let us ... do all we can to discourage the folly of collecting worthless pieces of metal, whose sole value is their scarcity." Adams comments that the Boston society would soon devote entire evenings to large cents. Die variety references for 1793 and 1794 large cents were published in 1869, and critics were silenced.

Prior to the establishment of the Mint in Philadelphia, coinage in circulation consisted of a mixture of Colonial issues and foreign coins. Gold and silver coins were primarily issues from England, France, Spain, and Portugal, while copper coins included issues from those countries, as well as various state coinage issues and private tokens. As there was no standard coinage, the system created a nightmare for bankers, merchants, and consumers. Gold and silver issues were accepted at weight, based on their approximate content, requiring each merchant to test the pieces and weigh them.

David Rittenhouse submitted an assay report to Congress on January 7, 1793 (reprinted in *American State Papers*), indicating the content of various gold and silver coins then in common circulation. David Ott conducted the actual assay work, indicating that Spain used the lowest-quality gold and Portugal, the highest. Similar assays were conducted periodically for many years, as long as various world coinage remained in circulation. Although weighing was still necessary, those assays lessened the need to test individual pieces.

This piece represents an intermediate die state with faint clash marks below the bust truncation, but no evidence of the die crack that eventually forms through the tops of TATE. Aspects of this piece seem to meet Breen's criteria of different die states recorded in his *Large Cent Encyclopedia*. While the clash marks of Breen's Die State III are faintly visible on the obverse, there is no indication of the die bulge over the U on the reverse, recorded for State II.

This is the famous AMERI. cent with the abbreviated legend traditionally attributed to an inexperienced engraver who felt that there was insufficient space to punch the final two letters in the die. After a limited production of a few thousand cents, the reverse broke over TAT in STATES, and the die was removed from service.

Del Bland grades this piece XF40 and tied for 11th finest, and Bill Noyes suggests VF35 and 12th best. Noyes calls this piece XF40 sharpness with Average Plus surfaces, and deducts five points for his net grade. There is merit to the system of surface ratings, as long as the standards are applied consistently.

Excellent surfaces with the sharpness slightly finer than the net grade. Both sides have smooth steel-brown and dark olive color with only the slightest handling marks expected for the grade. A faint scratch across the neck into the hair and another at the chin are the only visible provenance markers, with a few fainter scratches and other blemishes mostly hidden in the devices. Traces of cartwheel luster remain on both sides. Our EAC grade XF40.

Purchased in 1941 by J.S. Gensheimer (Stack's, 2/1951), lot 396, \$240; Willard C. Blaisdell; J.J. Teaparty (1976); Ed Hipps; Dean Oakes; Julian Leidman (7/1994); John B. MacDonald; Denis W. Loring; Walter Husak (Heritage, 2/2008), lot 2000.

From The Wes Rasmussen Collection. PCGS# 1340, NGC ID# 223G, CoinPlex ID# LGC1793CHAINAMERIBN

1793 S-2, B-2 Chain Cent, XF45 The 14th Finest S-2 Cent

5509 1793 Chain AMERICA XF45 PCGS. S-2, B-2, High R.4. Ex: Boka. Breen Die State II. The late die state with a bulge at the base of 793 and faint clash marks below the bust. There are five known die varieties of the Chain cents, all struck during the last few days of February and first two weeks of March 1793. Production totaled 36,103 coins that the coiner delivered in small batches on eight different days from March 1 to March 12.

The five varieties include the NC-1 rarity, with only two known and one of those in the ANS, the Chain AMERI cent that is easily the most popular variety, the Periods Obverse variety, and two "Normal" Chain Cent varieties. Of those, the S-2 is distinctly rarer than the S-3. Walter Breen attempted to correlate rarity of each variety with the delivery dates, suggesting a "mintage" for each individual die pair. Such an accounting is now thought impossible to reconstruct.

Bill Noyes gives this piece a sharpness grade of VF35 and a net grade of VF30, placing it in a tie for 14th finest known. He rates the surfaces Average. While we agree with his net grade, our opinion of the sharpness is XF40. The surfaces are generally pleasing with a few minuscule handling marks and planchet flakes. Magenta toning appears on the high points, with mahogany surfaces, indicating that this piece has been cleaned and retoned. Certainly, the later toning was expertly applied and posed no concern to PCGS when they graded this example. Our EAC grade VF30.

Ex: Tom Reynolds; Denis W. Loring (4/24/1998); Jon Alan Boka (privately, 11/25/2009).

Remarkable Choice AU 1793 Chain Cent AMERICA, S-2, B-2

5510 1793 Chain AMERICA AU55 PCGS Secure. S-2, B-2, High R.4. Of the so-called “collectible” Sheldon varieties of Chain cent, the S-2 is most challenging, being very scarce and a borderline rarity regardless of grade. (This statement necessarily excludes the NC-1 die pair, which has just a couple of coins known.) The letter R in LIBERTY is low relative to other obverses, with the bottom of that letter nearly parallel to the lowest serifs on the nearby T. The in-common reverse shows the 1 in the numerator of the fraction at center-right over the first 0 of the denominator and nearly touching the N of CENT.

With all Chain cent die pairs being genuinely scarce, there are far fewer of these historic coins than collectors to demand them. The effect becomes more pronounced with higher grades, and even midrange representatives such as VF20 coins pose a substantial challenge while commanding a sizable sum. A coin in the AU or Mint State range is genuinely rare even when all die pairs are taken together, which makes this Choice AU coin all the more noteworthy.

Still-glossy surfaces are rich medium-brown with an olive overtone. The central definition on the obverse is soft, yet the reverse chain-links have crisp outlines, and the all-around wear is minimal. The soft copper has picked up a few abrasions over the years, including one on the cheek and a graze that seems to underline the F in OF on the reverse, but the all-around eye appeal makes this a piece any collector with an appreciation for early U.S. coinage would be proud to own. For the AMERICA, No Periods varieties together, Population: 11 in 55, 11 finer (11/12). Our EAC grade XF45. PCGS# 1341, NGC ID# 223F, CoinPlex ID# LGC1793CHAINAMERICABN

1793 S-4, B-5 Chain Cent, Fine 15
Periods Obverse

5511 1793 Chain Periods Fine 15 PCGS. S-4, B-5, R.3. This late die state example has a small obverse rim break at 7:30, with two cracks, one extending inward toward the hair, and the other downward toward the date. A lovely two-tone specimen featuring light tan devices on darker chocolate-brown fields, this piece exhibits finely granular surfaces. The head retains considerable detail and the chain is bold, with a full date, LIBERTY, and statutory legend on the reverse. The reverse has a minor rim bruise over the first A in AMERICA. This Choice Fine specimen is a nice example for the specialist or type collector. Our EAC grade Fine 12. PCGS# 91341, CoinPlex ID# LGC1793CHAINPERBN

1793 S-4, B-5 Cent, AU50
Periods Obverse
Near Census Level

5512 1793 Chain Periods AU50 PCGS. S-4, B-5, R.3. Ex: Husak. A late die state, Breen Die State III, this piece has a small rim break where two obverse cracks meet the border at 7 o'clock. Another delicate crack joins the letters BERTY to the period, extending into the right obverse field past 2 o'clock.

The pleasing surfaces of this lovely piece display mottled dark brown and golden-olive color. The obverse has a nearly invisible hairline in the lower right field. Only faint evidence of porosity is noted on the reverse. It is sharply struck with excellent details on the portrait and the chain, standing boldly against the field. The date and all of the obverse and reverse lettering are complete and fully outlined with a raised border.

Del Bland conservatively grades this piece EF40 and tied for seventh finest of the S-4 cents, while Bill Noyes suggests VF35 and tied for eight finest known. In our opinion, this cent should grade XF45, equal to the fourth best in the Bland census, likewise equal to the forth finest in the Noyes census. Our EAC grade XF45.

Ex: Charles M. Williams (*Numismatic Gallery*, 11/1950), lot 5, \$210; Harold Bareford (9/1985); Herman Halpern (*Stack's*, 3/1988), lot 4, \$19,800; David Bloom; Dennis Irving Long (*Bowers and Merena*, 1/1990), lot 14, \$34,100; Dr. Eugene Sherman (12/1996); John B. 1793 S-6, B-7 Cent, XF Details
Ex: Holmes Collection

1793 S-8, B-13 Wreath Cent, XF45
Vine and Bars Edge

5513 1793 Wreath Cent, Vine and Bars — Altered Surfaces — PCGS Genuine. XF Details. S-6, B-7, R.3. The Sprung Die variety with an obverse bulge from the left border into the hair, but in this early state there is no evidence of a die crack that eventually follows the die bulge. At one time, this pleasing piece was graded AU50 PCGS, and more recently they declared surface alteration. We disagree with their opinion as did Bob Grellman who wrote in the Holmes catalog that the surfaces are smooth and choice, virtually flawless. Two small rim nicks at 9 o'clock on the obverse, and a thin diagonal blemish on the cheek, only slightly diminish the grade and importance of this exceptional Wreath cent. Our EAC grade VF35.

Ex: Stack's (1/2008), lot 8021 as AU50 PCGS; Chris Victor-McCawley; Daniel W. Holmes (Goldberg Coins, 9/2009), lot 10.

From The Wes Rasmussen Collection. PCGS# 1347, NGC ID# 223H, CoinPlex ID# LGC1793WREATHVBBN

5514 1793 Wreath Cent, Vine and Bars XF45 NGC. S-8, B-13, R.3. The obverse of this variety features the horizontal stem over the date, and the reverse has a diagonal bulge through the wreath. The reverse is cracked along the die bulge in this intermediate die state.

Both sides of this nicely detailed Wreath cent exhibit light tan surfaces, blended with darker bluish-brown at the lower obverse and upper reverse. Border beads are complete on both sides although imperfectly centered with a wide outside margin at the left and a narrow margin to the right on both sides. A few small edge dents are evident on each side of this Choice XF cent. Our EAC grade VF30.

From The Hilltop Collection. NGC ID# 223H, PCGS# 1347, CoinPlex ID# LGC1793WREATHVBBN

1793 S-11a, B-16a Wreath Cent, AU53 Final Vine and Bars Wreath Cent

5515 1793 Wreath Cent, Vine and Bars AU53 PCGS. S-11a, B-16a, High R.4. Ex: Holmes. This is one of those unusual situations where just about everyone agrees on the grade. Tom Reynolds, Bill Noyes, Bob Grellman, Dan Holmes, and Mark Borckardt all grade this specimen VF30, while Walter Husak preferred VF35. Just missing the census, Bill Noyes places this example in a tie for the eighth finest known specimen.

A transitional die marriage, the S-11a was the last Vine and Bars Edge Wreath cent minted. Lettered Edge planchets were soon in production, used for the last Wreath cents, S-11b and S-11c. The three subtypes were actually minted simultaneously from a single obverse and reverse die.

Pleasing light brown surfaces with some diagonal linear planchet flaws at the lower reverse. A few faint hairlines on each side suggest that this piece may have been cleaned at one time in its past. A small rim bruise is noted below the right ribbon end. Our EAC grade VF30.

Ex: Tom Reynolds (12/2002); Walter Husak (Heritage, 2/2008), lot 2010; Daniel W. Holmes (Goldberg Coins, 9/2009), lot 18.

From The Wes Rasmussen Collection. PCGS# 1347, NGC ID# 223H, CoinPlex ID# LGC1793WREATHVBBN

1793 S-8, B-13 Wreath Cent, MS62 Brown
Ex: Masters, Husak

5516 1793 Wreath Cent, Vine and Bars MS62 Brown PCGS. S-8, B-13, R.3. Ex: Husak. Die State II with minor obverse clash marks and a die crack along the diagonal bulge through the center of the wreath. Del Bland grades this coin AU50 and tied for CC-10, while we feel a slightly higher grade is appropriate. Splendid steel and chocolate-brown surfaces blend with olive and traces of red in the protected areas. The only marks, barely worth describing, are a minuscule rim bump left of L and a small mark between the tops of EN in CENT. This is an exceptional piece with impressive eye appeal.

The Philadelphia Mint only produced copper coins from the first issues of March 1793 until October 1794 when the first silver coins were struck, after a difficult bonding issue was resolved through a Congressional amendment. Production of 1793 cents totaled just over 110,000 coins, and nearly 1 million cents were minted in 1794. There were also a little more than 100,000 half cents struck in those two years, or about 100,000 coins per month for both denominations. Our EAC grade AU55.

Ex: Frank H. Masters, Jr. (RARCOA, 5/1971), lot 38, \$4,400; Jerry A. Bobbe; Del Bland; Don Quiggins; Mike Brownlee; Dennis Weaver Rare Coins (FPL #22, 3/1975); Bowers and Ruddy (11/1976), lot 405, \$6,500; Fred Sweeney Rare Coins (Coin World, 12/8/1976), \$8,900; Kenneth M. Goldman; later, Goldberg Coins (2/2007), lot 254, \$66,125; Walter Husak (Heritage, 2/2008), lot 2007.

1793 S-5, B-6 Wreath Cent, MS62 Brown Large Date and LIBERTY Among the First Wreath Cents

5517 1793 Wreath Cent, Vine and Bars MS62 Brown PCGS. S-5, B-6, R.4. Ex: Husak. This is the only Wreath cent obverse with large letters in LIBERTY and large numerals in the date, a distinctive style that is recognized at a glance. The font size is similar to the Chain cents, and for that reason the S-5 is listed first in the emission sequence, believed to be the first Wreath cent produced during the first few days in April 1793. In fact, the early die state suggests that this piece was one of the first Wreath cents ever minted. The Chain cents were discontinued in March following public criticism, and the new Wreath design began early the next month. The first delivery of Wreath cents totaled 12,000 pieces delivered on April 9.

Above-average surfaces have attractive olive and steel-brown color, with a tiny nick on the cheek that is the only obvious provenance marker on either side. Both sides are glossy with traces of luster in the protected areas, especially visible on the reverse. Sharply struck and nicely centered with a full border. This example is the sixth or seventh finest known, depending on the specific census being referenced. Our EAC grade AU50.

Ex: J.P. Lyman (*S.H. Chapman*, 11/1913), lot 390, \$112; Elmer S. Sears; Virgil M. Brand (2/1941); B.G. 1793 S-8, B-13 Wreath Cent, MS64 Brown Census Level Specimen

5518 1793 Wreath Cent, Vine and Bars MS64 Brown PCGS. S-8, B-13, R.3. The emission sequence of a group of die varieties states the order in which they were actually minted. That sequence is determined through careful study of the die states for the different obverse and reverse dies. In the case of the Wreath cents, there is some confusion regarding the proper sequence of production. One variable that is almost never considered when studying die states and attempting to determine the proper order of production is the number of coinage presses in use. Most studies assume that only one press was used. However, a second or third press used simultaneously will substantially alter the die state study and change any proposed emission sequence.

A single reverse die was used for S-5, S-6, S-7, and NC-5. That reverse may have been in one coinage press, with four different obverse dies used in that press. Meanwhile, a single obverse die was used for S-8, S-9, and NC-4, used with three other reverse dies, and they might have been used in a second coinage press. One additional obverse die was used in both presses, creating NC-5 with the reverse in the first press, and S-10 with one of the reverse dies from the second press. These two paragraphs may seem confusing, but then the study of early mint processes was little documented, and can only be reconstructed through examination of the actual coins that still exist today. Hopefully some who read this will be intrigued and may wish to continue the study.

This impressive Choice Mint State 1793 Wreath cent has highly lustrous chestnut-brown surfaces with faint traces of mahogany toning and few marks of any kind, save for tiny rim nicks outside the beaded border at 7 o'clock on the reverse. This stunning specimen ranks quite high in the condition census and is destined for a top-level collection. Our EAC grade AU55.

Ex: Heritage (2/1994), lot 6678; Bowers and Merena (5/1994), lot 1147; Heritage (3/1995), lot 5008; Jay Parrino (The Mint, 4/16/1996); W. M. "Jack" Wadlington; Chris Victor-McCawley. PCGS# 1347, NGC ID# 223H, CoinPlex ID# LGC1793WREATHVBBN

1793 S-11b, B-16b Wreath Cent, AU53
Lettered Edge, Double Leaf
Tied for Third Finest Known

5519 1793 Wreath Cent, Lettered Edge AU53 PCGS. S-11b, B-16b, R.4. Ex: Holmes. Although the S-11a is rated slightly rarer, the S-11b has a slightly lower average grade for the 12 finest specimens. Those averages are VF36 for S-11a, VF34 for S-11b, and XF47 for S-11c. In the Holmes catalog, Bob Grellman graded this coin XF40 and tied for third finest known, and we agree with his observation.

Two different edge devices were used for the Lettered Edge cent planchets. The S-11b has a double leaf following DOLLAR and the S-11c has a single leaf after DOLLAR. The single leaf style continued on the Liberty Cap cents, and that is why S-11c is placed last in the emission sequence of the Wreath cents. In reality, the Lettered Edge planchets were mixed together and the S-11b and S-11c cents were struck simultaneously, explaining the mixture of die states found on these cents.

This example was discovered in England after the Breen *Large Cent Encyclopedia* and the Noyes color book were published and for that reason does not appear in the published census lists. Lovely medium olive surfaces are mottled with darker steel-brown splashes. Minor surface marks on each side include some handling marks and other planchet marks from before this piece was minted, still visible due to central strike weakness. Our EAC grade XF40.

Ex: From England; Dallas coin show; Bill Yates (8/2007); Ed Hipps; Chris Victor-McCawley (1/2008); Daniel W. Holmes (Goldberg Coins, 9/2009), lot 19.

1793 Lettered Edge Wreath Cent, MS66 Brown The Finest Known S-11b Cent

5520 1793 Wreath Cent, Lettered Edge MS66 Brown NGC. S-11b, S-16b, R.4. Toward the end of Wreath cent production in August 1793, the Mint switched from the Vine and Bars edge to a Lettered Edge reading ONE HUNDRED FOR A DOLLAR. Two small leaves punctuated the edge lettering on the S-11b cents, and a single leaf appeared on the S-11c cents. The edge device was placed on the planchets before they were struck. The first edge type, the Vine and Bars edge, appeared on all Chain cents, and on all earlier Wreath cents. The third edge appearing on S-11c, continued in use for all of the 1793 Liberty Cap cents.

When the die pair was initially placed into service, a number of planchets remained with the Vine and Bars edge device, and those were used first, while additional planchets were prepared with the Lettered Edge. Die states of the S-11b and S-11c cents indicate that planchets with both of those edge devices were mixed together before the coins were struck, as both sub-varieties are known in several die states ranging from perfect, to clashed, and lapped. This intermediate die state has prominent clash marks below the chin and around the bust, with faint clash marks on the reverse.

This exquisite cent is tied for the finest known 1793 S-11b Wreath cent, and ranks among the top Wreath cents of all varieties. Bill Noyes assigns a conservative grade of AU50, a slight reduction from his opinion of AU55 sharpness. He considers the coin second finest known behind another piece that is assigned the same sharpness and net grades. The condition census for S-11b drops quickly after these two pieces, with one XF example and nine VF coins following the two finest pieces. Among all 1793 Lettered Edge Wreath cents, this specimen is tied for fourth finest.

Both sides are satiny and fully lustrous with rich medium brown surfaces that show delicate blue patina around the devices. The fields are slightly reflective. The strike is exquisite and nicely centered. A shallow diagonal mark is noted on Liberty's cheek, and minor rim marks are evident outside the beaded border on the obverse. The reverse is flawless. Our EAC grade AU55.

Ex: Catherine Bullowa-Moore (Coinhunter, 12/2005), lot 371; Stack's (1/2009), lot 50; Heritage (8/2012), lot 5021.

Catherine (Elias) Bullowa-Moore, a native of Larchmont, New York, was born in 1919 and celebrates her 60th year in numismatics in 2012. She was a 1941 graduate of Connecticut College, and was married to numismatist David Marks Bullowa (1912-1953) in 1952, and he tragically died the next year. In 1959, she remarried Earl Moore (1912-2001). Mrs. Bullowa-Moore joined the ANA in 1953 where she is a life member and member of the Hall of Fame alongside her first husband, the only husband and wife duo to receive that honor. She is a charter member of the Professional Numismatists Guild, and a member of the ANS, Royal Numismatic Society, and many other organizations. She was appointed to the 1965 U.S. Assay Commission. NGC ID# 223J, PCGS# 1350, CoinPlex ID# LGC1793WREATHLEBN

1793 S-16, B-19 Liberty Cap Cent, VG10
Sixth Finest Known

Ex: Dr. Ruby, Daniel Holmes

5521 1793 Liberty Cap VG10 PCGS. S-16, B-19, R.6. The typical 1793 S-16 cent is low grade with poor surfaces. Bill Noyes records 18 specimens in his color book, ranging from a high of VF25 to a low of Fair 2, based on his grading standards. The average grade for all 18 coins is just Good 6, exactly the grade he assigns to this piece, except he lists it as sixth finest known, and it is fifth finest in collectors' hands.

Importantly, the surface quality of this piece is far better than usual, as Noyes calls it "average," which in his language actually means that it is really nice. The 18 coins in his roster include one Choice, one Average Plus, five Average, six Average Minus, and five Scudzy. Based on his labels, the "Average Minus" coins are actually average for the variety, and this specimen is above average.

Del Bland assigns a grade of VG7 and records this coin as tied for sixth finest in his census. Both sides are glossy dark chocolate with a hint of olive and splashes of deeper steel patina. A small chatter mark is noted below the R in LIBERTY and a few trivial ticks are evident near the date, with a tiny rim nick on the inverted reverse. Our EAC grade VG7.

Ex: Dr. Charles L. Ruby (Superior, 2/1974), lot 335; Philip Van Cleave (Kagin's, 1/1986), lot 5018; Jack H. Robinson (Superior, 1/1989), lot 21; Dr. Robert J. Shalowitz (9/15/1989); Daniel W. Holmes (Goldberg Coins, 9/2009), lot 27.

1793 S-12, B-21 Liberty Cap Cent, VF25
Tied for Second Finest Known
Finest in Collectors' Hands
Ex: Garrett-Naftzger-Holmes

5522 1793 Liberty Cap VF25 PCGS Secure. S-12, B-21, Low R.6. Breen Late Die State Plate Coin. Breen Die State III with heavy reverse swelling at CE. Del Bland grades this coin VF20 and tied for second finest known with a coin once in the Virgil Brand Collection. Bill Noyes also calls this piece tied for second finest known, and grades the coin VF25. The two coins are virtual twins, and the only finer piece is a VF35 example that has been part of the ANS Collection for more than half a century. This coin and the Brand specimen are therefore tied for the finest available to collectors.

This piece has an important provenance, and a delightful story shared by Dan Holmes about his acquisition of the coin at the 1990 EAC Sale in Orlando, Florida: "Opened: 3,200, I jumped to 20,000, then in 2's to 30,000, I jumped to 35,000 and won the lot. JLO underbidder."

Absolutely splendid glossy olive-brown surfaces exhibit splashes of dark chocolate on the reverse. In the Holmes catalog, Grellman suggested that this piece may have been lightly cleaned years ago, but if it was, it was so long ago that the patina today is natural and beautiful. A few tiny surface marks are evident on each side with a trivial rim flaw over the A in AMERICA. Our EAC grade VF25.

Ex: John Work Garrett; Johns Hopkins University (privately, 3/1973); John W. Adams (3/1973); Denis W. Loring (3/1973); R.E. Naftzger, Jr.; 1990 EAC Sale (5/1990), lot 17; Daniel W. Holmes (Goldberg Coins, 9/2009), lot 22.

1795 S-80 Jefferson Head Cent, VF20
Apparently a New Specimen
Census-Level Candidate

5523 1795 Jefferson Head, Plain Edge VF20 PCGS. S-80, B-11b, High R.5. Just over 30 Jefferson Head cents are known, and we have compared this piece to photos of all known specimens. This impressive piece is apparently a new specimen as it fails to match any currently known Jefferson Head cent. Three of the top 10 Jefferson Head cents are in museums, with the finest known in the American Numismatic Society, fourth finest at the Carnegie Museum, and seventh finest (tied) housed in the Smithsonian Institution.

This remarkable Jefferson Head cent has detail that rivals some of the finest known examples, exhibiting VF35 sharpness. Both sides are dark olive with light porosity spread evenly across both surfaces. The surfaces suggest that it may have been buried for a period of time. A few trivial rim bruises are noted around the obverse. The centering is nice, but there are no visible border dentils on either side.

Based on strict grading standards, we assign a grade of Fine 15, placing this piece in a tie for fifth finest known. This may be the piece that appears in Del Bland's Condition Census as "F-15 Sharpness of VF-35 but lightly porous and some edge dents. Unearthed with a metal detector by Jerry Cavalier." There is no available photo of that piece, but the brief written description is a close match. Here is an excellent opportunity for the advanced collector to acquire a lovely 1795 Jefferson Head cent. Our EAC grade Fine 15. PCGS# 1386, CoinPlex ID# LGC1795JEFFHEADPEBN

PROOF LARGE CENTS

R.7 1822 Large Cent, PR62 Brown Ex: Frothingham-Wilson-Pittman Example

5524 1822 PR62 Brown PCGS. N-10, R.7 as a Proof. The manufacture of master coins, as they were known prior to the use of our current word “proof,” was spotty at best prior to 1858. Curiously, there was some special need for proof cents in 1822, as at least nine pieces are known of this particular variety and several others are known of other varieties. In the Pittman Sale in 1997, Denis Loring contributed a brief roster of nine examples of proof N-10 cents. The pedigree of this particular coin is long and impressive, stretching back to 1883. The coin was described in this coin’s first appearance in the Frothingham Sale as, “Fine proof of brilliant steel color. Very rare.”

This coin has a couple of distinctive pedigree identifiers: On the obverse a small planchet flake appears in the left field between star 2 and Liberty’s chin. On the reverse a couple of lint marks occur around the left side of the N in ONE; another shallow planchet flake is seen above that same letter. Otherwise, the surfaces are deep brown with olive accents. The strike is unusually complete on Liberty’s hair. The peripheral stars show just the slightest softness over the highest points. The fields are reflective as expected — surprisingly so, given the depth of patina present over each side. A raised line surrounds the inner denticles on the obverse, undoubtedly a scribe line used to locate the placement of the denticles. As one can see from the pedigree below, this coin has always brought a high price when offered at public auction. However much it brings in this offering, one thing is certain, it will be impressively high. Our EAC grade PR55.

Ex: Charles F. Frothingham Collection (H. G. Sampson, 5/1883), lot 100, where it brought \$26; James B. Wilson, Esq. Collection (Thomas Elder, 10/1908), lot 1057, where it brought \$31; Dr. George P. French (FPL, B. Max Mehl), lot 439; New Netherlands 54th Sale (4/1960), lot 1535; John Jay Pittman Collection (Akers, 10/1997), lot 205, where it brought \$17,600; Keusch, Snow, & Del Zorro Collections (Stack’s, 11/2008), lot 3075, where it realized \$44,850.

From The Greensboro Collection, Part II. PCGS# 1774, NGC ID# 2726, CoinPlex ID# LGP1822BN

1829 N-6 Cent, PR64 Brown
Mirrored Finish, Very Rare as a Proof

5525 1829 PR64 Brown NGC. N-6, R.6 as a Proof. The 1829 N-6 is readily secured as a business strike, but proofs are very rare. The present offering is just our sixth auction offering of a proof 1829 large cent since we began our auction archives in 1993. This is the third appearance of this specimen, meaning that the six appearances include just four different coins. Various authors and students of the proof large cents have given different estimates over the years, while we suggest that between 15 and 20 proof 1829 large cents exist today. Several of those proofs are bronzed, having a satin appearance, while others have brilliant, mirrored surfaces like this specimen.

The present example is unbronzed and shows traces of the original orange-gold color, particularly on the reverse legends and wreath. The strike is sharp aside from stars 6 to 9 that are always weak. The dies are rotated counterclockwise about 45 degrees, as always on the proofs. The only relevant imperfections are a couple of wispy marks near the NT in CENT. The fields are nicely mirrored. This proof 1829 will be a centerpiece of even the most advanced holding of middle-date large cents. Our EAC grade PR60

Ex: 2006 ANA Sale (Bowers and Merena, 8/2006), lot 169; Dallas Signature (Heritage, 11/2006), lot 82; Central States Platinum Night (Heritage, 4/2011), lot 5022.

1831 N-3 Cent, PR64 Brown
Mottled Iridescence

5526 1831 PR64 Brown PCGS. CAC. N-3, R.6 as a Proof. While far from common, the N-3 die pair is clearly the most plentiful of proof 1831 large cents, while N-10 and N-11 are the other varieties seen in proof from time to time. Perhaps 30 proof 1831 large cents are known, including nearly 20 examples of N-3. There are currently 15 different 1831 proofs that are PCGS- or NGC-certified, while the combined population reports show grades for 18 submissions.

The 10 PCGS-certified pieces include two PR62 Brown, one PR63 Brown, one PR63 Red, two PR64 Brown, two PR64 Red and Brown, one PR64 Red, and one PR65 Brown. NGC has certified two PR63 Brown, three PR64 Brown, two PR65 Brown, and one PR65 Red.

This impressive Choice proof shows the usual flat stars found on these proofs, with all other details sharp, including bold denticles and nice centering. Both sides have lovely mirrored surfaces that display delightful cobalt-blue and olive-gold fields, with light brown devices and a splash of violet on the reverse. A small spot directly behind the lower hair bun will assist in pedigree research. Our EAC grade PR60+.

Ex: Stack's (11/2008), lot 3079.

From The Greensboro Collection, Part II. PCGS# 1796, NGC ID# 2263, CoinPlex ID# LGP1831BN

ANACS-Certified 1837 N-6 Cent
PR63 Brown, Ex: Pearl

5527 1837 PR63 Brown ANACS. N-6, R.8 as a Proof. Ex: Pearl. Plain Hair Cords. This sharply struck 1837 N-6 cent with reflective fields is a nice representative from dies that were used to coin both proofs and business strikes. In his 1977 *Proof Encyclopedia*, Walter Breen recorded this coin and the Howard Newcomb-Floyd Starr coin as the two known proofs from the N-6 die pair. In addition, about a dozen 1837 proof large cents are known of other varieties, including N-3, N-9, and N-10. Considerable rose and light blue toning appears on the mirrored brown surfaces of this lovely cent. All areas indicate a bold strike on this presentable specimen. Our EAC grade 60.

From *The Greensboro Collection, Part II*. PCGS# 1808, CoinPlex ID# LGP1837BN

1838 N-11 Cent, PR64 Brown
About 30 Known

5528 1838 PR64 Brown PCGS. CAC. N-11, Low R.6 as a Proof. Howard Newcomb described two different varieties from a single die pair, known as N-11 and N-13. The N-11 cents are early die states, and all proofs are from the earliest state. Later die states with an obvious rim break below star 1 are known as N-13, quite rare, and usually in circulated grades. The 1838 N-11 is a borderline Low R.6 or High R.5 variety in proof, with approximately 30 pieces known at all numerical levels.

The olive-brown obverse shows hints of pale blue and violet, while the vivid sea-green reverse exhibits hints of olive and gold. Stars 1 through 6 are flat on this nicely centered Choice proof, with all other details boldly rendered. The fields of this piece are reflective rather than deeply mirrored. Our EAC grade PR60.

Ex: ANA Sale (Kagin's, 7/1977), lot 428; Stack's (3/1996), lot 32; King-wood (2/2000), lot 16; American Numismatic Rarities (1/2004), lot 1123; Stack's (7/2008), lot 1136.

1840 N-2 Cent, PR65 Brown
Small Over Large 18

1841 N-1 Cent, PR66 Brown
Proof-Only Variety
Ex: Oscar Pearl, Will Neil

5529 1840 Small Over Large 18 PR65 Brown PCGS. N-2, Low R.6 as a Proof. About two dozen 1840 proof large cents are known, all from the N-2 die pair that has a small block-style 18 punched over a large script-style 18. The angular stroke of the Script 8 is visible in the lower loop of the Block 8. Two oval areas of magenta toning appear on the olive and light brown surfaces of this Gem proof, one on Liberty's neck and jaw, the other from TY across the hair buns to stars 8 and 9. Delicate blue toning appears with faded reddish mint color. The fields are lightly reflective as usual on these proofs, with shallow mirrors. Iridescent overtones enhance the splendid eye appeal of this beauty. Our EAC grade PR60+.

Ex: C. David Pierce; Numismatic Gallery (1946); T. James Clarke Collection (Abe Kosoff, 4/1956), lot 309; Lee G. Lahrman Collection (Abe Kosoff, 2/1963), lot 411; Warren Snow Collection (Stack's, 11/2008), lot 3088.

From The Greensboro Collection, Part II. PCGS# 1949, NGC ID# 226R, CoinPlex ID# LGP1840SMOVRGLG18BN

5530 1841 PR66 Brown PCGS. CAC. N-1, Low R.5. Among the more plentiful of the proof-only varieties in the late-date large cent series, with about 70 examples known. However, N-1 is rarely seen so fine with most survivors in the lower numerical grades. This satin Premium Gem proof has exquisite surfaces with lovely violet, blue, and sea-green patina on both sides, showing deeply faded original orange mint color, especially evident in the protected areas of the field near the devices. A remarkable, sharply defined proof cent, this piece ranks among the top five or six known of its kind. Our EAC grade PR63.

Ex: Oscar Pearl Collection (Abe Kosoff, 1944 FPL), lot 366; Will W. Neil Collection (B. Mac Mehl, 6/1947), lot 2079; Warren Snow Collection (Stack's, 11/2008), lot 3089.

1843 N-14 Cent, PR64 Brown
Type of 1842
Ex: Herman Halpern

5531 1843 Petite Head, Small Letters PR63 Brown PCGS. N-14, High R.6. Two varieties are known of proof 1843 large cents, including two examples of N-12 and about 14 examples of N-14, the variety offered here. This Select proof is sharply defined, unlike at least two N-14 proofs that are bluntly struck. Both sides have modestly mirrored fields with mostly steel-blue patina on its magenta-toned brown surfaces with hints of gold on the reverse. A few faint hairlines on the cheek, a tiny dig below the eye, and minor contact marks below CE in CENT identify this as the Herman Halpern specimen. Our EAC grade PR55. PCGS has only certified nine proof 1843 large cents in all grades.

Ex: James MacAllister; T. James Clarke (Abe Kosoff, 4/1956), lot 324; Auction '80 (Stack's, 8/1980), lot 1078; Stack's (5/1981), lot 716; Herman Halpern (Stack's, 3/1988), lot 560; J.R. Frankenfield (Superior, 2/2001), lot 1274; Anthony Terranova; Stack's (1/2008), lot 70. From The Greensboro Collection, Part II. PCGS# 1958, NGC ID# 226T, CoinPlex ID# LGP1843PETITESLBN

1844 N-8 Cent, PR64 Brown
Grossly Misplaced Date
Proof-Only Variety

5532 1844 PR64 Brown PCGS. N-8, High R.6. The blundered obverse die shows remnants of a misplaced date in the bust of Liberty. The peak of a 1 extends from the upper bust line just below the neck, and a remnant from the upper curve of the 8 clearly visible on the bust. Only 12 to 15 examples of this proof-only variety are known in all grades. The entire obverse and the upper half of the reverse show much faded original orange mint color with light brown and iridescent highlights, while the lower reverse is dark olive with gunmetal-blue overtones. Satin fields accompany bold design elements, showing slight reflectivity and shallow mirrors as usual.

Dr. James Olson Sloss (1913-1987), a Western Pennsylvania medical doctor, was a numismatic connoisseur who assembled remarkable collections in a number of areas. Although best-remembered for his large cents, he also had an impressive collection of pattern coins, many of which he donated to the Carnegie Museum. Many additional items from his collection were sold at public auction a decade after his death. Our EAC grade PR63.

Ex: Dr. James O. Sloss Collection (Abe Kosoff, 10/1959), lot 225; Warren Snow Collection (Stack's, 11/2008), lot 3091.

From The Greensboro Collection, Part II. PCGS# 1961, CoinPlex ID# LGP1844BN

Proof-Only 1845 N-14 Cent, PR65 Brown
Fewer Than 12 Known

5533 1845 PR65 Brown PCGS. N-14, Low R.7. The proof-only N-14 is the only 1845 variety known in that format with all other die marriages seeing only business-strike coinage. Less than a dozen of these pieces are known, including three impaired pieces and one example in the Smithsonian collection. The present Gem is the second finest certified behind a PR66 Brown PCGS specimen. PCGS and NGC have graded just 10 proofs of the date, including resubmissions. A glass reveals faint hairlines on the reverse with a small bright orange area on the branch right of CENT. Deep blue and magenta overtones appear on the reddish-brown surfaces of this Gem. Proof examples of this date are rare and this piece is the first we have offered. Our EAC grade PR60+.

Ex: Lee G. Lahrman Collection (Abe Kosoff, 2/1963), lot 434; Warren Snow Collection (Stack's, 11/2008), lot 3092.

From The Greensboro Collection, Part II. PCGS# 1964, CoinPlex ID# LGP1845BN

1846 N-22 Cent, PR64 Brown
Proof-Only Variety

5534 1846 PR64 Brown PCGS. N-22, R.7 as a Proof. Only about 20 1846 proof large cents exist for several varieties, and about half of those are examples of the N-22 die marriage. There are actually only about seven confirmed proofs of this die marriage, with other listings in old auction catalogs recorded for coins unseen in recent years. Other 1846 proof varieties include N-1 (R.8), N-21 (unique), and N-24 (R.7). The N-22 and N-24 combinations are known only as proofs, further increasing demand for this piece.

This coin today is certified PR64 Brown, but when we handled it two decades ago it was PCGS-graded PR63 Red and Brown. The fields are lightly reflective with olive-brown on the obverse and deeply faded reddish-brown on the reverse. A tiny spot left of star 10 and another in the space right of the Y in LIBERTY will aid future identification. Our EAC grade PR63.

Ex: B. Max Mehl (1/22/1938); Floyd T. Starr (Stack's, 6/1984), lot 498; Heritage (5/1990), lot 609; Denis W. Loring; Robinson S. Brown, Jr.; Wes Rasmussen (Superior, 2/1998), lot 122; J.R. Frankenfield (Superior, 2/2001), lot 1355; later, Bowers and Merena (6/2009), lot 325; Bowers and Merena (8/2009), lot 210.

From The Greensboro Collection, Part II. PCGS# 1967, CoinPlex ID# LGP1846BN

1847 N-42 Cent, PR65 Red and Brown
Tied for Finest 1847 Proof Cent

5535 1847 PR65 Red and Brown PCGS. CAC. N-42, Low R.7 as a Proof. Only about a dozen 1847 proof large cents are known, all from the dies of N-42. The present specimen was formerly in the R.E. Naftzger, Jr., Robinson S. Brown, Jr., and Daniel W. Holmes collections, and it is the second finest known 1847 proof cent. Both sides have highly appealing surfaces combining light orange mint color fading to dark blue, violet, and olive-gold toning. The fields are fully mirrored with lustrous devices. A tiny carbon fleck below the 8 identifies this specimen, and two Mint-made obverse rim defects described in the Holmes catalog are hidden beneath the plastic lip of the PCGS holder. We agree with Bob Grellman's grade of PR64, and note his ranking of this piece in a first-place tie with two other proofs. Our EAC grade PR64.

Ex: C. David Pierce; Hollinbeck-Kagin Coin Co. (5/15/1947); R.E. Naftzger, Jr.; Robinson S. Brown, Jr. (4/17/1999); Daniel W. Holmes (Goldberg Coins, 1/2011), lot 255.

From The Greensboro Collection, Part II. PCGS# 1971, CoinPlex ID# LGP1847RB

1848 N-19 Cent, PR65 Brown
Proof-Only Variety
About 30 Known

5536 1848 PR65 Brown PCGS. N-19, Low R.6. Possibly a High R.5 proof-only variety, there are about 30 confirmed proof examples known from this die marriage, the only pair of dies known to strike 1848-dated proofs. At least four of the known survivors are circulated or impaired proofs. This Gem combines deep blue patina with faded orange on the obverse, additional violet and rose appearing on the reverse. Faint hairlines are evident in the interior fields of the reverse, with both sides showing satin surfaces and hints of mirrored reflectivity. Our EAC grade PR60.

Ex: Hollinbeck Stamp and Coin Company (11/1946), lot 265; Warren Snow Collection (Stack's, 11/2008), lot 3095.

From The Greensboro Collection, Part II. PCGS# 1973, NGC ID# 226X, CoinPlex ID# LGP1848BN

1849 N-18 Cent, PR65 Red and Brown
Proof-Only Variety
From the Allenburger Collection

5537 1849 PR65 Red and Brown PCGS. N-18, Low R.6. About two dozen 1849 N-18 large cents are known, all in proof, along with eight or nine proof examples of N-30. Just over a dozen of the known proofs are certified, and this specimen is tied for the finest of those pieces. The reverse die was used for seven proof-only varieties spanning six years from 1844 through 1849. Like all 1849 N-18 cents, this Gem proof has little field reflectivity on the obverse, with lightly mirrored reverse fields. The strike is deficient, especially evident on the hair curls. However, the surfaces are virtually full red with light bluish-brown toning on each side.

A previous owner of this piece was Dr. Christian Alexander Allenburger, the Nebraska surgeon who was born in Russia in 1872. After graduating from Chicago's Rush Medical College in 1895, Allenburger relocated to Nebraska. He was honored by the Platte County Medical Society in 1951 for his medical practice there spanning more than 50 years. Our EAC grade PR63.

Ex: Dr. Christian Allenburger (B. Max Mehl, 3/1948), lot 1084; Warren Snow Collection (Stack's, 11/2008), lot 3096.

From The Greensboro Collection, Part II. PCGS# 1977, CoinPlex ID# LGP1849RB

1854 N-12 Cent, PR64 Red
The Pittman Specimen

5538 1854 PR64 Red PCGS. N-12, R.6 as a Proof. The 1 in the date is repunched south, a diagnostic feature of this scarce pre-1858 proof delivery. Breen (1977) asserts that perhaps 30-50 examples of this issue are extant, some of which are impaired. This is a bright, cherry-red example. Both sides display moderately glassy fields and glimmering reflectivity. A small carbon spot occurs in the field before Liberty's nose, but the surfaces have the look of an even higher grade. This date is seldom encountered with fully lustrous features. Our EAC grade PR63. Population: 1 in 64, 0 finer (11/12).

Ex: Christian Allenburger Collection (B. Max Mehl, 3/1948), lot 1138; John Jay Pittman Collection (David Akers, 10/1997), lot 271; Superior (9/1999), lot 586; Paul Norris; Superior (6/2000), lot 398; Bowers and Merena (1/2001), lot 671; Baltimore Signature Sale (Heritage, 7/2003), lot 5215.

From The Greensboro Collection, Part II. PCGS# 1993, CoinPlex ID# LGP1854RD

1855 Slanted 55 N-10 Cent PR66 Red and Brown Significant Mint Luster on Each Side

5539 1855 PR66 Red and Brown PCGS. CAC. N-10, R.5 as a Proof. Walter Breen's *Proof Encyclopedia* notes that the 1855 proof large cents are known in the Newcomb-10 and Newcomb-11 varieties, with the Newcomb-10 much more frequently seen. Breen estimates that perhaps 100 survive of the Newcomb-10, versus only 15 of the Newcomb-11.

This Premium Gem proof is an example of the Newcomb-10, attributed by the point of the curl right of center of the 8 in the date, a strong but small dot or die defect running down to the left from the front edge of the coronet, and a line from the dentils down to the left side of the O in OF.

In contrast, Breen describes the Newcomb-11 die variety thusly: "Distinctive among the three slanting 5's dies, this has curl point very slightly r. of inner r. curve of 8; no spur from front line of coronet. Extremely rare; Newcomb never owned one."

Even though the Newcomb-10 is the more widely seen variety, the present Premium Gem Red and Brown example is clearly atop the Condition Census of the certified proofs surviving. PCGS and NGC have seen a total of 12 submissions in Red and Brown, with the present coin and one other PCGS example tied for the finest known of this color designation. Only one fully Red example has been certified (PR64 Red NGC). The finest Red and Brown examples at NGC are two grading events in PR65 (12/12).

Bright orange surfaces display traces of sky-blue and crimson and are immaculately preserved. The strike is uniformly bold throughout. A lovely Premium Gem proof large cent. Our EAC grade PR64.

Ex: *FUN Signature* (Heritage, 1/2008), lot 2677, where it brought \$43,125.

From *The Greensboro Collection, Part II*. PCGS# 1995, NGC ID# 2273, CoinPlex ID# LGP1855SL55RB

FLYING EAGLE CENTS

Beautifully Toned Premium Gem
1858 Small Letters Cent, None Finer

1858 Flying Eagle Cent, MS66
Small Letters, Low Leaves

5540 1858 Small Letters MS66 NGC. Low Leaves, Closed E in ONE. This thoroughly lustrous and exactly struck Premium Gem features lovely rose-red, lime-green, and yellow-gold toning. An outstanding example of this briefly produced type coin, one that seldom appears at the Premium Gem level, the finest available grade that collectors can hope to achieve for this in-demand issue. The obverse legends are lightly strike doubled. Certified in a former generation holder. Census: 15 in 66, none finer (11/12).

Ex: Robert R. Rollins Collection, Part Two (Heritage, 6/2008), lot 88, which realized \$10,350. NGC ID# 2279, PCGS# 2020, CoinPlex ID# FEC1858SL

5541 1858 Small Letters MS66 NGC. Low Leaves, Closed E in ONE. The Small Letters variant of the 1858 Flying Eagle cents can be easily distinguished by the separation between AM in AMERICA; those letters touch on the Large Letters variety, which is more frequently seen in the higher levels of Mint State. This peach-gold Premium Gem Small Letters displays vibrant luster and a full strike. Evidence of contact is virtually absent, and carbon is limited to a tiny spot at the mouth of the C in CENT. An outstanding representative of this briefly struck type coin. Census: 15 in 66, none finer (11/12). NGC ID# 2279, PCGS# 2020, CoinPlex ID# FEC1858SL

PROOF FLYING EAGLE CENTS

1856 Flying Eagle Cent, PR62
Key to the 19th Century Small Cents

5542 1856 PR62 PCGS Secure. Snow-9. A sharply struck specimen whose mildly reflective fields provide excellent eye appeal for the designated grade. The obverse is lightly toned pumpkin-gold, and the reverse is dusky with variegated rose and chestnut shades. Only a single carbon fleck is noted, above the O in OF, and Mint-made imperfections are confined to a narrow strike-through near the T in UNITED and a minor retained lamination at 7:30 on the obverse. The 1856 Flying Eagle cent introduced the small cent denomination and remains the key date of the series. In the 19th century, possession of an example was considered the passport to an advanced collection. PCGS# 2037, NGC ID# 227A, CoinPlex ID# FEP1856

Choice Proof 1856 Flying Eagle Cent
Snow-9, Famous Series Key

5543 1856 PR64 PCGS. Snow-9. This fully struck Choice proof displays richly blended walnut-brown and gunmetal-blue toning. The mildly reflective fields lack any indication of marks aside from a minute tick on the rim near the E in UNITED, which we mention solely as an identifier. Carbon is also virtually absent. One tiny drop of translucent residue is beneath the eagle's neck. Spreading toward the edge on the letters in AMERICA suggests that the collar was either missing, blocked, or incorrectly installed. The production of the Snow-9 proofs was unofficial and perhaps irregular, and occurred in the late 1850s to meet collector demand for what remains the rarest date of the small cent denomination. PCGS# 2037, NGC ID# 227A, CoinPlex ID# FEP1856

Very Rare Low Leaves Reverse
1856 Flying Eagle Cent
Snow-4a, Pointed U, PR64

5544 1856 PR64 PCGS Secure. Snow-4a, R.7. The Low Leaves, Pointed U in UNITED die pair. This very rare 1856 variety is a proof restrike likely produced in 1858 when the Low Leaves hub was introduced. Since the vast majority of 1856 Flying Eagle cents exhibit a High Leaves reverse, the present “naked eye” variety should command a significant premium. This is a well-struck specimen with intricate definition on the cotton leaves and the extremities of the eagle. Only the breast feathers lack absolute detail. The obverse is dusky walnut-gold while the reverse displays lighter sun-gold, apricot, and lime tints. Void of contact, though three tiny and shallow strike-throughs are noted on the upper left reverse margin and a few minute flecks are present near the C in CENT. PCGS# 2037, NGC ID# 227A, CoinPlex ID# FEP1856

Gem Proof Snow-9 1856 Flying Eagle Cent

5545 1856 PR65 PCGS. Snow-9. Both sides are alive with appreciable reflectivity in the fields. Warm peach and orange-tan color with hints of pink blankets smooth, Gem-quality surfaces that are all but carbon-free. The strike is needle-sharp throughout, and the all-around eye appeal befits the preservation.

Perhaps not surprisingly for a variety that was produced primarily for sale to collectors, Snow-9 coins tend to “come nice,” and this Gem proof is no exception. A small fault between the eagle’s head and the nearby curve of the wing may permit future identification. Population: 43 in 65, 2 finer (11/12).

Ex: Long Beach Signature (Heritage, 2/2003), lot 5176. PCGS# 2037, NGC ID# 227A, CoinPlex ID# FEP1856

CONFEDERATE STATES OF AMERICA

'1861' Confederate States Cent, PR62 Brown
John Haseltine Copper Restrike of 1874

5546 1861 Confederate States of America Cent PR62 Brown PCGS. Copper 1874 Haseltine Restrike, Breen-8008, R.5. Robert Lovett, Jr. (1818-1879) is best-remembered today for making the famous 1861 Confederate States of America cent. A merchant token he struck, dated 1860, has the legend surrounding a figure of Liberty facing left, with Liberty cap atop her head, a sharply truncated lower bust point, and a thick mane of hair flowing down her neck.

Lovett would use the same Liberty portrait in the following year for the Confederate cent, although the modeling of the facial features is more refined on the later work. For the reverse, Lovett would create a new wreath more in keeping with Southern agriculture.

It may have been his store card that called him to the attention of Confederate agents, who commissioned Lovett to design the CSA cents. In the end he struck only 12 original cents on copper-nickel planchets before having second thoughts: The act likely constituted treasonous activity against the Federal government. Lovett nonetheless engraved a bold initial L on the lower reverse, on a cotton bale, and kept the dies and coins to himself. In 1874, however, Lovett, drinking in a saloon, slipped up and revealed his secret, spending one of the original cents to a bartender. Coin dealer William Haseltine subsequently bought the dies from Lovett, producing 55 restrikes in copper and smaller quantities in silver and gold.

Even though these pieces appear seldom at auction, this is the second example within a few months that Heritage has been privileged to offer. Certified PR62 Brown by PCGS, this coin has smooth milk-chocolate surfaces that show some light buildup in the interiors of some of the peripheral letters. There are a few scattered ticks but no overt marks. The strike is well-impressed throughout, even if not quite full. Population: 2 in 62 Brown, 3 finer (11/12). PCGS# 340405

INDIAN CENT

1888/7, FS-301, AU58
Top Indian Cent Variety

5547 1888/7 AU58 PCGS. CAC. FS-301, Snow-1. The *Cherry-pickers' Guide* writes that "this variety is the #1 cherrypick among Indian Head cents. About 30 examples are known and demand is very high." This piece is unusual in that it lacks the usually seen cud above the U in UNITED. There is also little evidence on the top of the last 8 of the underdigit 7. However, part of the 7 is visible inside the upper loop of the last 8, and the bottom of the underdigit 7 protrudes boldly from beneath the lower-left side of the 8. This near-Mint State example is boldly struck, mostly brown with tinges of violet and muted mint red. The eye appeal is excellent. Population: 3 in 58, 1 finer (12/12). PCGS# 2169, NGC ID# 228G, CoinPlex ID# INC188OVR87BN

LINCOLN CENTS

Steel-Planchet 1944-D Cent, MS63 Famous Year-Too-Late Off-Metal Error

5548 1944-D On Steel Planchet MS63 PCGS Secure. The one-year changeover in the cent alloy from copper-based to steel in 1943 created wrong-metal errors coming and going. The 1943 bronze cents (or “copper pennies” as they often were called in the mass media) were the first part of the holdover-metal error class, while the 1944-dated steel cents were the second.

The 1944-dated steel cents are less celebrated than their 1943 bronze counterparts, but they are also more available to collectors in both quantity and price. (The 1944 Philadelphia steel cents have a few dozen coins known, while PCGS puts the surviving population of 1944-D steel cents at seven pieces.) Heritage’s Permanent Auction Archives show examples of steel cents selling for four-figure sums in the 1990s and early 2000s, and even Heritage’s most recent offering of a 1944-D steel cent, a damaged AU Details example offered January 2012, brought \$10,350. These figures are far below the prices 1943-dated bronze cents can command.

At the higher end of the grading scale, of course, prices escalate. Heritage’s offering of a 1944-D steel cent graded MS63 by NGC in August 2007 realized \$115,000, a noteworthy six-figure sum. This MS63 PCGS Secure example is the current finest coin in the combined NGC and PCGS certified population, as NGC no longer registers the MS63 coin mentioned above, yet this example is not a plate-match to the MS63 NGC coin.

This piece was struck from significantly eroded dies on both sides, more so on the obverse, where a die crack passes just under Lincoln’s hairline. A toning spot appears between the rim and the right side of the portrait’s rounded truncation, while the overall color is pale blue-steel. To the unaided eye, this piece appears better than MS63, but an old pinscratch from Lincoln’s temple diagonally down to his neck precludes any status better than its Select designation. PCGS# 82725, CoinPlex ID# LIC1944DZINC

1944-D/S Lincoln Cent, MS66+ Red
Rare Overmintmark, FS-511

5549 1944-D/S MS66+ Red PCGS Secure. FS-511. The under-type S is visible above the primary mintmark, identifying the FS-511 variety. The FS-511 is much rarer and more valuable than the other overmintmark variety of the year, FS-512. The FS-511 is the variety listed on page 121 of the 2013 *Guide Book*.

The coin offered here is a high-end Premium Gem with well-detailed design elements that show just a touch of softness on Lincoln's hair. The original red surfaces show no mentionable distractions with vibrant mint luster on both sides. Eye appeal is terrific. Population: 9 in 66 (2 in 66+) Red, 1 finer (11/12). PCGS# 2728, NGC ID# 2734

Choice AU 1969-S Doubled Die Cent Famed and Elusive Rarity

5550 1969-S Doubled Die AU55 PCGS. FS-101. The 1969-S Doubled Die was discovered shortly after its release, yet today specimens remain highly elusive. The bold die doubling in places is nearly as dramatic as that on its cousin, the 1955 Doubled Die, an error coin that is nonetheless far more available. While the digits of the 1955 Doubled Die are more widely separated, the letters near the rim of the 1969-S Doubled Die are separated by nearly a half-letter width at IN GOD WE TRUST. The digits of the date and LIBERTY are also widely doubled, although not in so extreme a fashion as the 1955 Doubled Die.

Interestingly, all of the 1969-S Doubled Die cents were apparently made from a single die pair, as Michael Fahey wrote in his "Detecting Counterfeits" column for the April 1, 1996 edition of *Coin World*:

"Before being placed into service, the reverse die was rather harshly polished, leaving a number of strong die polish lines.

"Every genuine 1969-S Doubled Die cent I have seen has exhibited these raised lines, even the circulated specimens. The most easily seen are the two lines at the E of UNITED, the line through the M of AMERICA, and the lines that extend down from the lower edges of the R and I of AMERICA."

This also puts the 1969-S Doubled Die cents in common with the 1955 Doubled Die cents, which are also all struck from a single die pair.

But there, the similarities largely end.

While PCGS has certified more than 3,700 1955 Doubled Die cents, that service has certified just 35 1969-S Doubled Dies as of (11/12), with both totals likely including duplications. While the 1955 Doubled Die is readily obtainable for a price in the lower Mint State grades, Uncirculated examples of the 1969-S Doubled Die are seldom seen. The typical survivor, as here, is an AU55. This is an extremely attractive coin with even, reddish-brown coloration on both sides. A tick at the top of Lincoln's hair and one on the beard are the only mentionable contact on the obverse. Singular contact is also nearly absent on the reverse, save for a small mark on a column of the Lincoln Memorial. These are minor complaints, however, compared to the overall high quality and excellent eye appeal this coin offers.

From The J.D. Tanner Collection. PCGS# 2921, CoinPlex ID# LIC-1969SDDOBN

PROOF LINCOLN CENT

Bold 1909 VDB Cent, PR65 Red and Brown

5551 1909 VDB PR65 Red and Brown NGC. Any offering of a proof 1909 VDB Lincoln cent is apt to draw throngs of admirers and multiple bidders, eager to obtain an example of these sought-after pieces. Researcher Kevin Flynn asserts that the 1909 VDB cent is the scarcest Lincoln matte proof despite its reputed mintage of 1,194 pieces — and the marketplace certainly concurs with that assessment. This lovely Gem Red and Brown example shows some intermingled light gold with medium tan and orange colors and darker lavender high points. The strike is far bolder than will be encountered on business strikes, and the high, squared-off rims are diagnostic as well. The reverse is lighter almond-tan with scattered flecks of deeper color. Census: 15 in 65 Red and Brown, 5 finer (11/12).

From The Richmond Hill Collection. NGC ID# 22KR, PCGS# 3301, CoinPlex ID# LIP1909VDBRB

THREE CENT NICKELS

Rare 1883 Three Cent Nickel, MS66 Pleasing Eye Appeal

5552 1883 MS66 PCGS. CAC. The 1883 circulation strike is one of the rare dates in the three cent nickel series. PCGS has certified only 79 pieces in all grades, 33 of which are in Mint State, predominately the lower levels thereof. The lustrous surfaces of this soft stone-gray Premium Gem exhibit sharp definition over the design elements, including fully delineated lines in the III denomination. Both sides are pristine except for a few tiny, light obverse pinpoint flecks. A minuscule graze on the temple and an inconsequential planchet flake near the reverse rim at 8 o'clock are mentioned solely for pedigree purposes. This piece displays pleasing overall eye appeal. Population: 4 in 66, 1 finer (12/12). PCGS# 3751, NGC ID# 275E, CoinPlex ID# 3CN1883

PROOF THREE CENT NICKEL

1884 Three Cent Nickel, MS65
Mintage 1,700 Pieces

5553 1884 MS65 PCGS. From 1883 to 1885, production of proof three cent nickels exceeded that of the corresponding business strikes, and the 1884 issue has a circulation mintage of only 1,700 pieces. This Gem representative is a clearly Mint State coin with its swirling luster that is semireflective only on the reverse. Peach and green-gold overtones grace otherwise steely surfaces, while the obverse adds a spot of deep toning at the upper right corner of the E in UNITED. This issue seldom comes on the market in such fine grade, and series enthusiasts will recognize the opportunity. Population: 5 in 65, 2 finer (11/12). PCGS# 3752, NGC ID# 275F, CoinPlex ID# 3CN1884

1878 Three Cent Nickel
PR68 Cameo, Finest at PCGS

5554 1878 PR68 Cameo PCGS. The second proof-only key to the series, the 1878 saw a proof mintage of 2,350 pieces. PCGS has certified 36 three cent nickel proofs in PR68, and none finer. Of these, 12 are Cameos, including the present PR68 Cameo. The nearly untuned surfaces display just a whisper or two of light blue and orange at the reverse border. The design elements are exquisitely struck, including full delineation in the lines of the III denomination. The surface are flawless except for two insignificant, minuscule marks — one at the upper part of the I in AMERICA and another between the I and the rim. These are mentioned only because they might identify the coin if another specimen were to be designated PR68 Cameo in the future. Population: 1 in 68 Cameo, 0 finer (11/12). PCGS# 83774, CoinPlex ID# 3CP1878CA

SHIELD NICKEL

Gem Mint State 1880 Nickel Key Date of the Shield Series

5555 1880 MS65 PCGS. In the mid-1870s, a series of events contributed to low mintages for the minor coinage of the United States in specific years. Over-coining of the base-metal minors led to notable key and nonexistent dates such as the 1877 Indian cent and the proof-only three cent and five cent nickel issues in 1877 and 1878. The passage of a silver purchase act in 1878, which mandated government acquisition of silver and the coining thereof into dollars (the famous Morgan dollars), made work for the various Mints and took time away from other efforts, though this is seen most prominently in the minor silver denominations such as dimes and quarter dollars.

The 1880 Shield nickel is the middle date of three struck in the years immediately following two proof-only dates for five cent coinage. From 1879 to 1881, five-figure mintages were the rule, and the 1880 at 16,000 pieces coined is the no-questions key to the series. An important issue in any grade, it emerges as a commanding condition rarity in the better Mint State levels, as there was no particular reason for the issue to be saved and high-grade survivors came through largely by chance.

This Gem is an essential for the high-end collector of the series, Registry or private. Broadly luminous surfaces are semireflective but too frosted for a proof, and the strike, while excellent, is not full. Reddish-orange patina is noted at the right margins, while the remainder of the coin is light nickel-gray with an occasional golden cast. Population: 6 in 65 (1 in 65+), 1 finer (11/12). PCGS# 3810, NGC ID# 276E, CoinPlex ID# SNM1880

PROOF SHIELD NICKEL

1867 Shield Nickel, PR64 Cameo
Classic Rarity With Rays
Only Nine Finer Coins at PCGS

5556 1867 Rays PR64 Cameo PCGS. Dannreuther-1A, State a/a. The 1867 With Rays proof Shield nickel is one of the rarest coins in the U.S. federal coinage series, and one of the most mysterious. While the 2013 *Guide Book* lists a mintage of 25+ pieces for the issue, based on Mint records and the research of Walter Breen, population data indicates a larger surviving population. Recent research by John Dannreuther suggests that the issue was restruck on several occasions, using three different obverse dies in different die states and a single reverse die, also in different die states.

The Mint experienced many striking problems with the Shield nickel design in 1866, and Chief Coiner A. Loudon Snowden and Chief Engraver James B. Longacre advocated removing the rays from the reverse, in hopes of improving striking quality. Treasury Secretary Hugh McCulloch ordered the removal of the rays on January 21, 1867, severely limiting the period in which Original With Rays coins should have been struck. Probably 10-15 specimens were produced in this period, using the Dannreuther-1 obverse in its earliest state and the With Rays reverse, also in its earliest state. Collector demand was high for this issue, and perhaps 40-60 Restrikes were produced at different intervals in the following years, probably coinciding with the terms of Henry Linderman as Mint Director.

The present coin represents the Original proof striking, Dannreuther-1A, State a/a, with the 1 in the date over the right side of a dentil. This delightful Choice specimen is sharply detailed throughout, with frosty devices that contrast boldly with the mirrored fields. The pleasing surfaces are blanketed in attractive shades of champagne-gold toning and show only minor signs of contact. Eye appeal is extraordinary. Population for all Rays varieties: 5 in 64 Cameo, 9 finer (11/12). PCGS# 83818, CoinPlex ID# SNP1867RAYSCA

BUFFALO NICKELS

1916 Buffalo Nickel, AU50
Rare Doubled Die Obverse, FS-101

5557 1916 Doubled Die Obverse AU50 PCGS. FS-101. Many features of the obverse die are strongly doubled, but the effect is most easily seen on the final digits of the date, with the undertype of the 6 visible to the naked eye to the lower-right of the primary digit. FS-101 is a well-known variety, but it is also quite rare and always commands a large premium in its infrequent public offerings. The FS-101 is listed on page 133 of the 2013 *Guide Book*.

The present example is a lightly circulated specimen with just a touch of wear on the high points of the design elements and a few minor abrasions on both sides. The surfaces display dusky gold and bluish-gray patina with a few traces of satiny mint luster. Population: 9 in 50, 35 finer (11/12). PCGS# 3931, NGC ID# 2TSS, CoinPlex ID# BFN1916DDO

1918/7-D Nickel, AU55
Wartime Doubled Hub Variety

5558 1918/7-D AU55 PCGS. CAC. FS-101. Like its wartime cousins the 1918/7-S Standing Liberty quarter, the 1942/1 and 1942/1-D Mercury dimes, and the 1943/2-P Jefferson nickel, this error coin was produced when one hub was switched for another during the annealing process required to harden working dies. Are the wartime occurrences a coincidence, or were key Mint personnel shipped off to do battle?

This example is almost completely lustrous with subtle golden accents and normal striking deficiency over the design elements. The underdigit is crystal clear, even to the unaided eye, and there are no distractions worthy of mention. Had this prized overdate been a little better-struck, we could easily see it in an AU58 holder. This famous rehubbled variety, now one of the classic 20th century nickel rarities, was discovered in 1931, by which time the vast majority of 1918/7-D nickels had been in circulation for more than a decade. Consequently, AU and better examples are quite elusive, and only a few dozen Uncirculated pieces are believed to exist. Population: 29 in 55, 72 finer (11/12). PCGS# 3939, NGC ID# 22RJ, CoinPlex ID# BFN19187D

1918/7-D Buffalo Nickel, Toned MS62
Scarce Dual-Hubbing Error

5559 1918/7-D MS62 NGC. FS-101. The 1918/7-D Buffalo nickel overdate has a close sibling in the 1918/7-S Standing Liberty quarter. Both are branch mint overdates produced in the same year, the products of generous wartime mintages near the close of World War I. They were produced in an era when the production of coinage dies and hubs was the total responsibility of the Philadelphia Mint, a task that facility hung onto for more than 200 years, until the Denver Mint opened its own die shop in 1996.

Both the overdate nickel and quarter were produced in the same way, via coinage dies that were given one blow from a 1917-dated hub and one from a 1918-dated hub. Mintmarks were also applied in Philadelphia before the dies were shipped to their respective destinations. Note that the actual overdated *dies* had to be produced in 1917 — likely toward the end of the year, when production of the next year's dies was under way — while the overdated *coins* were probably produced in 1918.

This MS62 coin shows almost equal definition on each of the digits. It is quite surprising how strong the underlying 7 is. Satiny mint luster appears over each side, accented by rich rose and faint hints of lilac toning. A bit weakly struck, as usually seen. NGC ID# 22RJ, PCGS# 3939, CoinPlex ID# BFN19187D

1925-D Buffalo Nickel, MS66
Far Better-Struck Than Normal

5560 1925-D MS66 PCGS. The 1925-D is among the worst-produced of all D-mint nickels and is one of the great strike rarities in the Buffalo series. The bison's head is usually flat, and very few possess complete horn detail. Some examples are known with the E in FIVE filled, and most are characteristically weak in the first two numerals of the date.

The central design motif on each side of the current Premium Gem is extremely well brought up, actually about as strongly defined as one is ever likely to find on a 1925-D. This is not to say the coin is fully struck; there is the usual softness in the hair on the bison's head, for example. The date digits and LIBERTY are sharp, however, and the bison's horn is full. Likewise, all of the peripheral lettering, including the mintmark, is strong.

In terms of luster quality and surface preservation, this coin is nothing less than remarkable. Just a hint of pale golden patina lightly coats each side with complete, satiny underlying luster, and there are no marks or spots worthy of individual mention. The foregoing attributes add up to perhaps what is one of the finest 1925-D nickels extant, and as such, will undoubtedly generate spirited bidding. This is one of only 15 Premium Gems certified by PCGS and NGC, with none finer (11/12). PCGS# 3955, NGC ID# 22S3, CoinPlex ID# BFN1925D

Gem 1925-S Buffalo Nickel

5561 1925-S MS65 PCGS. CAC. A classic saying of business goes, "Fast, right, cheap: pick two." In the 1920s, the U.S. Mint opted for fast and cheap, pushing equipment such as dies well past the point where they would have been shelved in earlier years. The result is a quicksilver-frost texture to the luster, as seen on this Gem. Though softly struck — once again a norm for this issue — the coin is pleasing for its time with luminous peach, gold, and violet-blue hues enriching each side. Minimally abraded and conditionally rare this fine. Population: 24 in 65, 1 finer (11/12). PCGS# 3956, NGC ID# 22S4, CoinPlex ID# BFN1925S

1928-S Nickel, Remarkable MS66 Tied for Finest Certified

5562 1928-S MS66 PCGS. CAC. The 1928-S and the 1929-S have similar mintages, 6.9 million pieces versus 7.7 million pieces. The two issues were struck at the same facility, only one year apart. In typical circulated grades, there is no difference in price. But surprisingly, by the AU level, the 1928-S is considerably scarcer than the 1929-S. This trend continues in Mint State, where the 1928-S is priced at multiples of the 1929-S.

It is difficult to explain the rarity of the 1928-S relative to the 1929-S. Perhaps a West Coast collector simply hoarded the 1929-S upon release. That person may also have saved rolls of the other two lowest denominations, the cent and dime, since for those denominations the 1929-S is also much more plentiful in high grade than the 1928-S. The 1928-S nickel, like other mintmarked issues from its decade, was little-saved and is difficult to locate in exceptional Mint State condition.

The present Premium Gem is bright and lustrous on both sides and bathed in a light blue peripheral frame with rose highlights in the centers. The surfaces are evenly matched and quite attractive. The strike is sharp on the devices, and both sides show evidence of clashing. As to the rarity in this lofty condition, the combined NGC and PCGS population data show 15 coins graded this high, with none finer. Certainly worthy of any top-notch collection, and a coin that is probably unimprovable. Population: 6 in 66, 0 finer (11/12).

Ex: Dallas Signature (Heritage, 11/2005), lot 2039, which realized \$43,125. PCGS# 3965, NGC ID# 22SD, CoinPlex ID# BFN1928S

Gem 1937-D Three-Legged Nickel Beautiful Satiny Surfaces

5563 1937-D Three-Legged MS65 PCGS. FS-901. The old saying goes, “Buy the keys first.” And by any reasonable definition, the 1937-D Three-Legged Buffalo is a key to the series. Undeterred by its status as a curious die-polishing error, legions of Buffalo nickels collectors pursue it with peculiar avidity. Even though there are ample supplies of the Three-Legged in most conceivable grades, there are far more collectors willing to snatch up those coins at auction.

In fact, we have noticed a trend where high-grade pieces seem to be the subject of increasing demand as compared to lower-grade examples; it is almost as if many collectors were determined to “get the nicest specimen I can afford before the price goes up.” The price of an MS64 example certified by PCGS has just about tripled in the last 15 years, from around \$4,500 to \$11,500 or so. In the last 10 years, we have seen the price of a Gem PCGS coin increase from around \$20,000 to \$35,000. And for the infrequently traded MS66 PCGS examples, the earliest auction record we can find is lot 5906 in our 1995 ANA Sale (Heritage, 8/1995), which brought \$20,900. The most recent MS66 PCGS we offered brought \$54,625, lot 3995 in our Summer FUN Signature (Heritage, 7/2012), an increase of 161% during that time.

Of course, the past does not predict the future, but the popularity of high-grade Mint State Three-Leggers shows no sign of waning. This lovely Gem example displays glowing, satiny mint luster uninterrupted by the often-seen abrasions this issue is so well-known for. Pale reddish-golden toning covers each side. Population: 51 in 65 (2 in 65+), 6 finer (11/12).

From The Richard P. Ariagno, M.D. Collection. PCGS# 3982, NGC ID# 22SX, CoinPlex ID# BFN1937D3LEG

EARLY HALF DIMES

Moderately Worn 1792 Half Disme Intriguing Example of Judd-7

5564 1792 Half Disme, Judd-7, Pollock-7, R.4, PCGS Genuine. The PCGS number ending in .84 suggests Holing and Plugging as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, the piece has the details of a VF specimen that has been holed and plugged. This coin clearly was holed at one time at the Y of INDUSTRY (corresponding area between OF and AMERICA on the reverse) and since has been plugged and skillfully repaired. Medium-gray hues are visible where peach shadings on both sides and reverse charcoal-gray are not. Though an impaired coin, the piece comes across as pleasing under casual inspection, and even closer attention is rewarding once the viewer takes the plug into account. An important opportunity to own an issue that might otherwise be inaccessible. PCGS# 11020, CoinPlex ID# PAT1792J7

Famous 1792 Half Disme, VG10 Judd-7, Pollock-7 First Circulating U.S. Coin

5565 1792 Half Disme, Judd-7, Pollock-7, R.4, VG10 PCGS. Although the 1792 half disme has traditionally been collected with the pattern series, most present-day numismatists consider the issue to be the first U.S. coin struck for circulation. Authority for this view comes from an unimpeachable source, President George Washington himself. In his November 1792 address to Congress, Washington remarked, "There has also been a small beginning in the coinage of half dimes, the want of small coins in circulation calling the first attention to them."

The number of coins produced also argues strongly for the business-strike nature of this premier U.S. Mint product, as somewhere between 1,500 and 2,000 pieces were originally struck. Later accounts suggest the coins were distributed by Washington himself, either through presentation to European dignitaries or as gifts to friends. The majority of examples seen today are worn, suggesting that the issue circulated extensively at, or near, the time of issue.

While the coins were produced under the authority of the Mint Act of April 1792, using Mint personnel and equipment, the 1792 half dismes actually predate the opening of the first U.S. Mint building by a few months. The Mint facilities were not ready to begin coinage operations in the summer of 1792, and much of its equipment was stored in the cellar of Philadelphia sawmaker John Harper on Sixth Street, about a block away. It was here that the half dismes were struck, on July 12, 1792 according to Thomas Jefferson's household account book. From this modest beginning, the 1792 half disme has become one of the most important and valuable issues in the U.S. coinage series. The surviving population is estimated as 250-400 pieces in all grades.

The present coin is well-centered on the obverse, with date and legend easily legible. The portrait is complete in outline and retains some interior detail. The reverse is not quite as sharp, but the surfaces of both sides show only minor abrasions with pleasing silver-gray and golden-brown patina. Population: 3 in 10, 72 finer (11/12). PCGS# 11020, CoinPlex ID# PAT1792J7

Fine Details 1792 Half Disme Coveted Judd-7 Type

5566 1792 Half Disme, Judd-7, Pollock-7, R.4 — Bent — NGC Details. Fine. The 1792 half disme is a legendary issue, the “small beginning” of coinage by the United States, as President Washington put it in a National Address, that would lead to the billions of coins produced in Philadelphia each year. Any survivor from the very scarce issue is a prize. While this piece was bent and later straightened with significant design loss on the steel-and-charcoal reverse, the central portrait of Liberty on the obverse is intact. A pinscratch up from the forehead to the top of the obverse rim also warrants mention. Despite its faults, this is an important coin that any number of collectors would be proud to own. PCGS# 11020, CoinPlex ID# PAT1792J7

PLATINUM NIGHT

1792 Half Disme, Judd-7, AU50 Totally Original Example of America's First and Most Historic Silver Circulation Coinage

5567 1792 Half Disme, Judd-7, Pollock-7, R.4, AU50 PCGS Secure. The Brasher doubloon and 1792 silver half disme are arguably America's most historic gold and silver coins, respectively, although there is a huge difference in availability between the two issues. The Brasher doubloons, struck in 1787 and dated the same, were the first gold coins produced for the United States of America by Ephraim Brasher, a goldsmith and neighbor of George Washington in New York during a time when that city served as the nation's capital.

Unfortunately for collectors, the Brasher doubloons — with a nominal value of \$15 each and a numismatic worth well into the hundreds of thousands or millions of dollars each, depending on the grade and other factors — survive in the extent of only seven pieces, including the six Punch on Wing and the unique Punch on Breast coins. The Brasher doubloons were “struck to circulate as full value coinage,” according to Don Kagan on PCGS CoinFacts, one of the previous owners of the Breast Punch example.

The 1792 half dismes have, of course, some distinct similarities and differences from the Brasher doubloons. The designer or designers are unknown, but various names from early U.S. Mint history have been put forth by numismatists who have pondered the matter. The 1792-dated half dismes were certainly the first circulating silver issue produced for the United States, even though they were struck on Mint machinery in the basement of sawmaker John Harper before the actual Mint buildings were constructed and readied for coinage operations, which commenced in the following year, 1793. The Judd-7 pattern designation is somewhat of a misnomer, as there is ample evidence in the historical record and from the coins themselves that they did indeed circulate and were struck in quantities exceeding typical patterns.

The good news for collectors is that, quite differently from the Brasher doubloons, the 1792 half dismes are available in reasonable supply. Most researchers estimate between 100 and 300 survivors of the 1792 half disme exist today from the 1,500 pieces conjectured struck.

The bad news for collectors is that, in common with the Brasher doubloons, the historic 1792 half dismes are the subject of fervent demand. There are far more collectors who desire one than successful bidders at auction. For example, we note that our most-recent offering of a 1792 half disme — an AU55 PCGS example in our ANA Signature (Heritage, 10/2012), lot 3820, which brought \$158,625 — had 12 bidders for the one winner. A problem-free VF25 PCGS specimen in our Long Beach Signature (Heritage, 5/2012), lot 3418, brought \$77,625 and had 17 different bidders. We have noted before that the 1792 half dismes' grades appear to be bifurcated, with two or three dozen high-grade examples contrasting with quite a few well-circulated examples. The certified populations show clusters of coins (some undoubtedly duplicates) around VF, AU58, and MS64.

The 1792 half disme's unique spelling was the subject of an article by Daniel Ackermann in the August 2005 *Numismatist*. “Thomas Jefferson's French Twist: The 1792 Half Disme,” notes that the subtle change from the English form “dime” (first cited in a 1786 Continental Congress ordinance) to the French “disme” on the coins themselves reflects the greater influence of Francophile Thomas Jefferson compared to the Anglophile Alexander Hamilton, who was born in Charlestown, the capital of Nevis in the British West Indies. Jefferson served as minister to France from 1785 to 1789 and was thus unable to attend the First Constitutional Convention. While in Paris, Jefferson lived on the famed Champs-Élysées boulevard, and the Louisiana Purchase, bought from France in 1803, occurred during his presidency.

The present AU50 PCGS example is covered in mottled amber, gold, rose, and blue tones on each side, with considerable life and vibrant luster to the surfaces underneath the moderately deep patina. Each side shows a few contact marks, the most obvious on the obverse a near-vertical scrape from the forward hair down to the bust truncation, and a diagonal dig running downward from the N in SCIENCE to the rim. A few other wispy marks appear. The reverse shows strike softness on some of the peripheral legends, most notably the M in AMERICA. A near-circular scrape occurs in the field above the eagle's head along with a few other marks, although the scattered signs of contact on each side are not readily apparent under the dappled color. As the AU50 grade implies, a pleasing wealth of detail remains on the fine strands of Liberty's hair and the small feathers on the eagle, in particular, and the total originality and good preservation of the surfaces will make this coin a standout example in any fine numismatic collection. Population: 5 in 50, 31 finer (11/12). PCGS# 11020, CoinPlex ID# PAT1792J7

1792 Half Disme, AU58
First Business-Strike U.S. Coin
Only 1,500 Pieces Struck

5568 1792 Half Disme, Judd-7, Pollock-7, R.4, AU58 PCGS. The 1792 half dime is a classic American rarity, the first in any lineup of the most important coins ever issued by the United States. To put it another way, the 1792 half dime must be considered the premier issue in what could be called the Who's Who of American Numismatics. Acquisition of one of these national treasures is a crowning achievement for any numismatist, investor, or dedicated collector.

Although President George Washington took an understandably active interest in U.S. coinage, there is no substantiation for the mid-19th century bromide that the pieces were struck from Martha Washington's table silver. Ample evidence does point to Washington's provision of \$100 in coin or silver bullion for production of the silver half dimes. The generally accepted mintage is 1,500 pieces or so; the difference is explainable by the amount of silver scrap that would be left over after silver planchets were produced.

The silver half dimes are a regular issue that President Washington clearly intended to be a circulating issue, despite their traditional listing as Judd-7 in the Judd pattern coin reference. George Washington discussed the coins in his "State of the Union" address of November 6, 1792, showing that they were struck prior to that date. As most survivors are in low grade or are damaged, or both, we can assume that the half dimes actually circulated at the time of issue. Had they been intended as pattern coins, most survivors would probably be in much higher grade. The majority of survivors from the other 1792 coinage issues are in relatively high grade, suggesting that they had been preserved as keepsakes. The wording of Washington's November address, "There has been a small beginning in the coinage of half dimes, the want of small coins in circulation calling the first attention to them," along with the physical evidence of low-grade survivors, provides considerable evidence that the coins were, in fact, intended for circulation.

While there are many low-grade survivors, a few high-grade pieces, Uncirculated or nearly so such as the present example, also are known. (President Washington personally distributed numerous examples, whose owners likely retained them, for the most part, due to their historical significance. Dr. Judd reportedly traced the pedigree of one Uncirculated piece directly back to David Rittenhouse, first Mint Director.)

The obverse features a Flowing Hair portrait of Liberty, with the peripheral legend LIB. PAR. OF SCIENCE & INDUSTRY, 1792 below portrait. The reverse depicts an eagle in flight with UNI. STATES OF AMERICA around, HALF DISME below. The coins share distinct similarities with the so-called Birch pattern cents, made by a Birch whose identity remains unconfirmed; evidence suggests British engraver-miniaturist William Russell Birch. The average grade of 1792 half dimes certified at NGC and PCGS (the upper echelon of surviving specimens) is in the XF range, indicating limited circulation before being snatched up as souvenirs of the burgeoning nation's first official coinage — or perhaps Washington even carried pocket pieces for distribution. According to most accounts the coins were struck in the cellar of John Harper in Philadelphia, Sixth and Cherry streets, before the Mint facilities were completed.

The present piece is just a whisper of light wear away from a Mint State grade, visible on the high points of Liberty's hair curls around the ear. The strike is exceptionally bold but somewhat off-center, with the result that the denticulation on the obverse is thickest at 12 o'clock and essentially absent at 6 o'clock. Both sides show a deep layer of gray-blue patina, with underlying glints of green and reddish hues observed on both sides. This is a coin for which some forthright collector must "seize the day," as opportunities for its acquisition are fleeting. Population: 8 in 58, 14 finer (12/12).

Ex: Central States Signature (Heritage, 4-5/2009), lot 2174. PCGS# 11020, CoinPlex ID# PAT1792J7

1792 Half Disme, MS64 Judd-7, Pollock-7 A Fully Lustrous Survivor

5569 1792 Half Disme, Judd-7, Pollock-7, R.4, MS64 PCGS. Ex: Liberty Collection. The 1792 half dime was the first circulating American coin struck under authority of the Congressional Act of April 2, 1792, establishing the U.S. Mint. Although a small number of Mint State pieces survive, such as the present specimen, the typical 1792 half dime that is known today shows considerable signs of wear, consistent with use in commerce.

Nearly everything that we know about this issue was told in a terse, single-sheet memorandum dated April 9, 1844, recounting a conversation between John A. McAllister, Jr., and Adam Eckfeldt, the former a respected member of Philadelphia society, the latter a well-known figure at the Mint in the 1790s, who continued working at that establishment throughout the entire course of operation at the first Mint building and for several years at the second Mint, until his retirement in 1839. The memorandum reads:

"Description of Half Dismes coined in 1792

"On one side = a Head = 1792 = Lib. Par. Of Science and Industry

"On the other side = an Eagle Flying = Half Disme = United States of America

"In conversation with Mr. Adam Eckfeldt (Apr 9, 1844) at the Mint, he informed me that the Half Dismes above described, were struck, expressly for Gen. Washington, to the extent of One Hundred Dollars, which sum he deposited in Bullion or Coin, for the purpose. Mr. E. thinks that Gen. W. distributed them as presents. Some were sent to Europe, but the greater number, he believes, were given to friends of Gen. W. in Virginia. No more of them were ever coined. They were never designed as Currency. The Mint was not, at the time, fully ready for being put into operation. The Coining Machinery was in the cellar of Mr. Harper, saw maker, at the corner of Cherry and 6th Sts, at which place these pieces were struck.

"John McAllister, Jr.

"Philadelphia"

History of the 1792 Half Disme

In "The Fabled 1792 Half Dismes," an article *American Journal of Numismatics*, second series, published by The American Numismatic Society in 2004, authors Joel J. Orosz and Carl R. Herkowitz examined the memorandum, which had been quoted on many previous occasions, in conjunction with additional sources, and concluded that the half dimes were struck from silver bullion or recycled silver coins, their high rate of survival being consistent with presentation. Thomas Jefferson, at the time the Secretary of State and the man in charge of Mint operations, personally handled the bullion deposited by Washington and oversaw production of 1,500 coins, recording the transaction in his personal account book.

The entire history of these coins is based on the recollections of Adam Eckfeldt and the accuracy of those recollections as recorded by John A. McAllister, Jr. Orosz and Herkowitz write: "Ultimately, the entire question turns on the integrity of Adam Eckfeldt and the accuracy of John A. McAllister, Jr."

John A. McAllister, Jr.

If so much history of this coin is based on a conversation recorded more than a century and a half ago, how can we know today that the history is reliable? Who was John A. McAllister, Jr., and why should we believe him? McAllister was born in Philadelphia in June 1786 and died there on December 17, 1877. In their 2004 biographical study, Orosz and Herkowitz gave his birth date as June 19, 1786, while his obituary states June 27, 1786. His obituary appeared in the *Philadelphia Inquirer* the day after his death and tells of his integrity and his serious interest in local affairs over a great many years:

"John McAllister, Jr., one of Philadelphia's oldest and most respected citizens, died yesterday at his residence, on Merrick street, above Market, in the ninety-second year of his age. Some two or three years ago he was attacked with partial paralysis, and it was at that time feared that he could not recover, but, with the exception of a loss of eyesight and the general weakness incident to such extreme age, he has enjoyed fair health since until within a few weeks. Mr. McAllister was the oldest living graduate of the University of Pennsylvania at the time of his death, and was among the last survivors of that class of men who, by their business enterprise, purity of life and public usefulness, made themselves conspicuous in the Philadelphia of more than half a century ago.

"Mr. John McAllister, Jr., was educated in Philadelphia, and graduated at the University of Pennsylvania in 1803. He had been for many years the oldest alumnus of that institution. He took great interest in historical studies, and particularly in local antiquities. He was well known to persons having antiquarian tastes for his accurate and extensive knowledge of Philadelphia history as regarded events, men, changes in business, buildings, and, in fact, in anything relating to the past history of our city, even in the most remote degree.

"He had a very extensive library—literary, historical and miscellaneous, and the largest collection of books, newspapers, pamphlets and publications relating to Philadelphia and Pennsylvania of any person in the State. With these advantages, Mr. McAllister held his knowledge at the service of every one interested. He was applied to constantly for information on all local topics, and was always patient, attentive, obliging and anxious to comply with such requests.

"Thus, full of years and of honors, has passed away one of Philadelphia's most useful citizens, one who, during his long life, made hosts of friends, and but few enemies; preserved through all the changing years of nearly three quarters of a century an unblemished reputation for honor and integrity, and so treated all with whom he came in contact that to them his memory is now a great heritage."

The Present Specimen

Among the finer surviving 1792 half dismes, this Choice Mint State specimen exhibits lovely cerulean-blue toning on both sides with hints of golden-magenta over frosty mint surfaces showing brilliant underlying luster. The central devices carry satin luster and hold a cameo-like appearance on the frosted background. The obverse die appears perfect, while the reverse shows light die cracks and flowlines on the lustrous surfaces. The sharp impression is nicely centered on the planchet, and there is no evidence of handling marks nor blemishes of any kind. Population: 6 in 64, 4 finer (12/12).

Unique Specimen 1792 Half Disme, The Floyd Starr Example PCGS-Certified Specimen 67 The Only Specimen Certified

5570 1792 Judd-7, Pollock-7, R.4 as a Business Strike SP67 PCGS. Ex: Starr. The ownership of a 1792 half disme, regardless of grade, clearly indicates that the numismatist is a serious student of American coinage. Despite opinions to the contrary, this issue is the first circulating American coin struck under authority of the Mint Act of April 1792.

The Orosz-Herkowitz Study

A simple memorandum, in three different versions, provides much of what we know about the 1792 half dimes, and yet, it has also been the source of much confusion. The first copy of this memo was discovered by Edward Haden early in 1943 and was brought to the attention of the numismatic world a few weeks later. Shortly after this announcement, Philadelphia numismatist Charles McSorley, Jr., incorrectly identified the author as Jonas R. McClintock. A second and slightly altered copy of the same memo came into the possession of Walter Breen in the early 1960s, and a third copy was acquired by Carl Herkowitz in 1995. It was this third copy of the memo, also slightly revised, that allowed a positive identification of the author, John A. McAllister, Jr. The earlier attribution of this memo to Jonas McClintock has been continually repeated over the last 60 years, and even today, the misattribution still appears in print.

Herkowitz and coauthor Joel J. Orosz prepared a detailed article around this document, solved its authorship, and answered questions about the history of this famous coinage issue. Their article, "George Washington and America's 'Small Beginning' in Coinage: The Fabled 1792 Half Dimes," appeared in the 2003 edition of *American Journal of Numismatics*, second series, published by the American Numismatic Society in 2004.

John A. McAllister

The text of the final version of the McAllister memo reads:

"Description of Half Dimes coined in 1792"

"On one side = a Head = 1792 = Lib. Par. of Science and Industry —

"On the other side = an Eagle Flying = Half Disme = United States of America —

"In conversation with Mr. Adam Eckfeldt (Apr. 9, 1844) at the Mint, he informed me that the Half Dimes above described, were struck, expressly for Gen. Washington, to the extent of One Hundred Dollars, which sum he deposited in Bullion or Coin, for the purpose. Mr. E. thinks that Gen. W. distributed them as presents. Some were sent to Europe, but the greater number, he believes, were given to friends of Gen. W. in Virginia. No more of them were ever coined. They were never designed as Currency. The Mint was not, at the time, fully ready for being put into operation. The Coining Machinery was in the cellar of Mr. Harper, saw maker, at the corner of Cherry and 6th Sts, at which place these pieces were struck."

The study by Orosz and Herkowitz provides an in-depth examination of this memorandum, and also looks at much of the history of this issue. In the past, many false and unsubstantiated claims have appeared in print about this coinage issue. Among such claims is one that suggests Martha Washington posed as "Miss Liberty" for the engraver. Another claim that remains unsupported is that the Washingtons provided their family table service for the coinage. Both of these claims date back to 1860, when James Ross Snowden wrote: "The bust of Liberty is popularly supposed to represent the features of Martha Washington who is said to have sat for the artist while he was designing it ... This piece is said to have been struck from the private plate of Washington, which is not unlikely, considering the great interest which he took in the operations of the infant mint, visiting it frequently,

and personally superintending many of its affairs." Today, the numismatic world is indebted to the efforts of Orosz and Herkowitz for correcting many past claims.

New Information

Unfortunately, these authors allowed a new and unsubstantiated claim to be introduced. While an entry in Thomas Jefferson's "household account book" dated July 13, 1792, has been known for many years, a related entry dated July 11, 1792 was first published in the Orosz-Herkowitz study. The two entries read:

July 11, 1792: "Delivd. 75 D. at the Mint to be coined."

July 13, 1792: "Recd. From the Mint 1500 half dimes of the new coinage."

These two statements clearly indicated that the coins were struck on July 12 or July 13, 1792, probably the latter day. While the combination of these statements positively identify when the coins were struck, they also leave us with another question. How was it possible for the Mint to receive \$75 in bullion and provide finished coins two days later? The authors quoted a comment by Eric Newman, asking this very question: "it would have been literally impossible for the new Mint to have received \$75 in bullion or coin on 11 July and melt it, refine it, roll it into strips, wash the strips, anneal them, punch out the planchets once more, run all of the planchets through the Castaing machine to reed their edges, and then strike the coins, all in time to deliver 1,500 half dimes to Jefferson on 13 July."

The authors spent considerable space to answer this question with “logical explanations” developed by Newman. While logical explanations are fine and dandy, they can eventually become “numismatic facts” for a future generation to resolve. Newman suggested that the Mint had prepared the silver for striking at an earlier date, then placed it in the care of Jefferson (who was head of the Department of State, then in charge of the Mint) until the presses were ready. Once that took place, Jefferson delivered 1,500 finished planchets to the Mint, ready to be coined. Two days later, Jefferson took delivery of the new half dimes and personally delivered them to Washington, who was then at Mount Vernon. At the end of their article, Orosz and Herkowitz included Eric Newman’s logical explanation in their conclusions, as if to suggest that this is now a known fact.

Historical Perspectives

It is generally accepted that the 1792 half dimes were not struck within the physical confines of the new Mint, but rather, in John Harper’s cellar. While some have more recently translated “cellar” to “basement,” the term cellar could mean any separate structure, although usually referred to a room or enclosed place under a building. It is also generally accepted that George Washington did, in fact, provide the silver for these pieces, as related by Adam Eckfeldt, although a few researchers still dispute this. The mintage is variously estimated at 1,500 to 2,000 coins, based on documentary evidence left by Thomas Jefferson, who stated that he received \$75 value, or Adam Eckfeldt, who stated that Washington provided \$100 in silver for these coins.

While Adam Eckfeldt claimed that these pieces were never designed as currency, George Washington suggested otherwise in his November 6, 1792 National address. The President stated:

“In execution of authority given by the legislature, measures have been taken for engaging some artists from abroad to aid in the establishment of our Mint. Others have been employed at home. Provisions have been made for the requisite buildings, and these are now putting into proper condition for the purposes of the establishment. There has been a small beginning in the coinage of half dimes, the want of small coins in circulation calling the first attention to them.”

The entirety of this final sentence clearly tells us that these coins were intended for circulation, especially the second part of this sentence.

The Starr Specimen

This is only Specimen certified by PCGS. It is tied numerically with an MS67 PCGS example and only exceeded by an MS68 NGC (12/12). A roster of more than two dozen high-quality pieces, below, shows the position of the Starr coin as the only Specimen strike, and the probable finest known. It is a spectacular, fully struck coin. All of Liberty’s hair details are fully defined, and the eagle’s plumage is equally well brought up. From the details on this piece, it is obvious that special care was taken to strike this coin at least twice. The design features on both sides are nicely centered with full obverse and reverse border details. Care was also taken to polish the surfaces as each side displays light die striations in the fields and across the central device on the obverse. Both obverse and reverse display a multitude of speckled colors with bright reflectivity around the peripheral lettering on the obverse. The toning has been variously described as orange-crimson and lilac, and as blue, gray, and light gold. There is only one surface flaw that we see: a shallow, vertical scratch in the left obverse field. The reverse has two faint vertical die cracks, approximately parallel, through the right field. One extends from the right base of A(M) to the eagle’s wing and F in HALF. The other begins at the left base of the adjacent M, also through the eagle’s wing, and on to the right side of E in DISME.

The consignor who sold this coin in 2006, stated that:

“This specimen striking of the 1792 silver half dime is truly a coin that transcends numismatics. It occupies a place in our Nation’s history unequalled by any other coin. For centuries, the coinage of silver was a royal prerogative. For a young nation, the coining of these half dimes was of enormous political significance and an expression of national sovereignty understood around the world. Numismatic scholar Walter Breen wrote, ‘Their historic context has for over 120 years made these half dimes among the most prized American silver coins.’ Today, as a unique specimen striking, this coin must be considered America’s most important numismatic coin and a priceless historical treasure.”

An accompanying letter from David Hall, president and founder of PCGS, seems to affirm this statement from our consignor. Hall briefly reviews the history of the 1792 half dime, then discusses this specific coin:

“Today approximately 250 to 400 1792 half dimes survive, most of them in well worn condition. Miraculously, there are a handful of Mint State examples known. The finest of these is the coin from the Floyd Starr collection.

“When the Starr collection was auctioned in October of 1992, his 1792 half dime was described thusly, ‘Choice Uncirculated, semi-prooflike ... Both sides, brightly reflective, especially around the letters. Possible Specimen: exceptional sharpness of strike seen on no other specimen, save this one.’

“Earlier, the pioneering and extremely influential coin dealer, Wayte Raymond, had described the Starr 1792 half dime as, ‘Perfect Mint State with brilliant proof surface. Probably the finest specimen known.’

“The Starr 1792 half dime is so extraordinary in the sharpness of its strike and the reflectiveness of its surface that PCGS has designated the coin as a Specimen striking. It is the only 1792 half dime to receive this designation from PCGS. The coin is so exceptional that I believe it could very well be the first 1792 half dime struck, and thereby the first U.S. coin ever struck. It is certainly one of the most important coins PCGS has ever handled.”

The cataloger for the Starr Collection noted that this was an early strike: “Some reverse letters soft, particularly A and M in HALF DISME and M in AMERICA, as seen on most specimens from the earliest run struck with medal turn reverse orientation.”

It is our opinion that the coin, while certainly very special and deserving of a Specimen designation, is not, nor could it be, the first 1792 half dime struck. The reverse has faint but clearly visible die cracks. Earlier-die state examples are known without the die cracks, proving that this example is a later die state and was among the final examples produced in July 1792. However, given its obvious specimen status, it might well have been the very first U.S. coin actually released by the State Department, perhaps a special gift to a friend of the U.S. or even to George Washington himself.

Ex: "Great American" Sale — Virgil Brand (J.C. Morgenthau, 10/18/1933); via J.G. Macallister to Floyd Starr on October 26, 1933; Floyd Starr Collection (Stack's, 10/1992), lot 4; Baltimore '93 Auction (Superior, 7/1993), lot 138; Central States Signature (Heritage, 4/2006), lot 1860, where it realized \$1,150,000.

Roster of High-Grade 1792 Half Dimes

We believe the following roster represents distinct individual specimens, although it is possible that some duplication may exist. This roster is based primarily on a comparison of plates in the various catalogs. Plate matching of older, poor-quality photographs can be quite difficult.

—**Specimen 67 PCGS.** The example offered here. J.C. Morgenthau (10/1933), lot 77; Floyd T. Starr (Stack's, 10/1992), lot 4; Superior (7/1993), lot 137; Central States Signature (Heritage, 4/2006), lot 1860.

—**Gem Unc.** Malcolm O.E. Chell-Frost (1948 ANA \$100); John Jay Pittman Collection; David Akers (10/1997), lot 423; Clifford Mishler.

—**Gem Unc.** Dr. J. Hewitt Judd; Paramount (Auction '80, 8/1980), lot 592; Jimmy Hayes (Stack's, 10/1985), lot 3. Judd and Red Book plate coin. Dr. Judd reportedly traced the pedigree of this example back to David Rittenhouse.

—**MS66 NGC.** Col. James W. Ellsworth (3/1923); John Work Garrett; Johns Hopkins University (Bowers and Ruddy, 3/1981), lot 2351; Superior (10/1989), lot 891; Superior (5/1990), lot 3550; Stack's (10/1995), lot 267; Bowers and Merena (8/2004), lot 1383. Note: This coin was graded Choice AU by Bowers and Ruddy in the Garrett sale, later certified by PCGS as MS63, and most recently graded MS66 by NGC.

—**MS65.** Mid America (5/1987), lot 721; Superior (1/1990), lot 2354.

—**MS64 PCGS.** Goldberg (1/2004), lot 1271.

—**MS64 PCGS.** Bartlett Collection (Bowers and Ruddy, 11/1979), lot 2359; Bowers and Merena (9/1995), lot 1177; Bowers and Merena (1/2005), lot 327.

—**MS64 PCGS.** Stack's (1/1992), lot 477; MS64 PCGS. Bowers and Merena (1/2002), lot 345; Bowers and Merena (7/2003), lot 565. Graded Gem Unc by Stack's, and AU58 PCGS when sold by Bowers and Merena in January 2002.

—**MS63 PCGS.** Heritage (8/1995) lot 5941.

—**MS63 NGC.** Pacific Coast (6/1988), lot 25; Heritage (11/2005), lot 2055.

—**MS63 NGC.** Bowers and Merena (8/1987), lot 1498; RARCOA (7/1988), lot 1592; Heritage (6/2005), lot 5684. In 1987, Bowers and Merena graded this coin AU50.

—**MS63 NGC.** Heritage (7/2005), lot 10144.

—**Gem Unc.** Stack's (10/1988), lot 536.

—**Mint State.** Elliot Landau Collection (New Netherlands, 12/1958), lot 344; William J. Wild; Alan Weinberg in 1981.

—**Unc Sharpness, Damage.** Stearns Collection (Mayflower, 12/1966), lot 277. Alan Weinberg notes this coin had some damage in the form of an obverse puncture that did not go all the way through the coin. Purchased by Richard Picker for \$1,450.

—**AU58 PCGS.** A.H. Baldwin & Sons (London, 1945); Pennsylvania Cabinet (James O. Sloss); Bowers and Merena (1/1999), lot 1010; American Numismatic Rarities (11/2004), lot 469.

—**AU58 PCGS.** Bowers and Merena (3/1987), lot 582; Bowers and Merena (5/1992), lot 1708; Stack's (1/1993), lot 356; Superior (7/1993), lot 138.

—**AU58 PCGS.** Superior (6/1997), lot 300; ANR (3/2005), lot 1551.

—**AU55.** Abe Kosoff (5/1953); Norweb Collection (Bowers and Merena 11/1988), lot 3389; RARCOA (5/1992), lot 3.

—**AU55.** Richard B. Winsor (S.H. & H. Chapman, 12/1895); J.M. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 5/1996), lot 883.

—**AU50.** Henry Chapman; J.A. Beck (Kreisberg, 2/1976), lot 759; Bowers and Merena (9/1984), lot 1116.

—**AU50.** Kagin's (8/1983), lot 283; Bowers and Merena (8/1987), lot 223; Stack's (11/1995), lot 1152; Goldberg (6/2000), lot 34.

—**AU50.** Bowers and Merena (8/1989), lot 132.

—**AU50 PCGS.** Bowers and Merena (11/1999), lot 253.

—**AU.** Stack's (11/1989), lot 351.

—**AU.** Stack's (4/1962), lot 876; Stack's (11/1974), lot 34; Stack's (7/1985), lot 1594.

—**AU.** Laird U. Park Collection (Stack's, 5/1976), lot 202; Stack's (1/1989), lot 931.

—**VF35.** Superior (6/1977), lot 282. This coin would probably grade AU in today's marketplace.

Other Appearances

The following citations are for coins which may or may not be included in the roster above.

PROOF SEATED HALF DIMES

Select Mint State 1800 Half Dime
V-1, LM-1, Struck Twice in Collar

5571 1800 — Struck Twice, Rotated in Collar — MS63 NGC. V-1, LM-1, R.3. Extremely late state of the V-1 or LM-1 obverse. The denticles below the second half of the date are broken off, a die crack rises from the first zero in the date to the bottom of the bust, and in the space to the right of Liberty's neck, a "collar" die clash appears. Further complicating the appearance of this piece's struck features: it received two impressions, resulting in doubling visible on the finer details such as the stars. As a coin it is remarkably well-preserved, especially given the passage of two centuries, and the gold and blue-green toning over each side is charming. NGC ID# 2326, PCGS# 4264, CoinPlex ID# EHD1800

Delightful PR64 1842 Half Dime

5572 1842 PR64 PCGS. An exceptional early Seated proof half dime. Walter Breen, in his *Encyclopedia of United States and Colonial Proof Coins*, cited only seven known examples, and the PCGS and NGC total populations are two and five, respectively. Still other sources claim a mintage of eight pieces. Whatever the true figure, it is clear that this is an extreme rarity, and the example offered here is graded a respectable PR64. Violet-gold patina covers each side, and blue-green toning also appears within the wreath on the reverse. The strike is crisp, and the devices reveal few flaws, though a handful of hairlines and tiny contact marks are scattered in the fields. In light of the history and overall eye appeal of this piece, such minor troubles are forgivable and are unlikely to lessen anyone's appreciation of this diminutive silver proof. Population: 2 in 64, 0 finer (12/12). PCGS# 4418, NGC ID# 235A, CoinPlex ID# SHP1842

1855 Arrows Half Dime, PR65 Cameo
The Only PCGS Cameo Proof
Arrows Half Dime

5573 1855 Arrows PR65 Cameo PCGS. CAC. The Philadelphia Mint began selling proof coins to collectors in 1858. Prior to that time, relatively few collectors were active in this country, and the number of collectors who had connections with the Mint was smaller still. That combination of factors meant that production and distribution of proof coins was limited to a handful of specimens each year. The result was the minting of only a few dozen proof coins, with the quantity unrecorded. This radiant proof exhibits fully mirrored fields and lustrous devices, presenting a splendid cameo appearance beneath delicate champagne toning. All of the design elements are sharply impressed on unblemished proof surfaces. This specimen is the only Cameo proof Arrows half dime of any date that PCGS has certified (11/12).

From The Victoria Rose Collection. PCGS# 84433, CoinPlex ID# SHP1855ARRCA

EARLY DIMES

Rare JR-3 1796 Dime, MS63

Ex: Ed Price

5574 1796 MS63 NGC. JR-3, R.5. Reverse State c. Mostly brilliant silver surfaces show light rose accents on each side. Bright mint luster shows the often-seen semiprooflike or reflective finish. The date, LIBERTY, hair strands, and stars at the left are all bold, with the right-side stars above average. The reverse has definitive wreath details with remarkably sharp breast feathers. This is a clear Condition Census coin for its rare die pair.

The JR-3 is the first of four die-linked varieties, including JR-4, JR-5, and JR-7. It is the third-rarest of the seven 1796 dime varieties, behind the unique JR-7 and the rare JR-5. Slight evidence of obverse die lapping appears in the form of weakened upper hair details. The reverse has some fragmented leaves, missing feathers in the left (facing) wing, and part of the rock missing, all from die lapping. The reverse is cracked from the border through the left top of the first T in STATES, continuing down through the wreath and well into the left wing. A branch follows the top of the T to the rim over A where it forms a triangular lump that connects three dentils.

Ed Price noted in this piece's last auction appearance:

"An interesting feature is that a planchet cut at 7 to 8 o'clock is present on many specimens — apparently due to a metal chip adhering to the die (per dime book). I have observed many JR-3's. I have noted the planchet cut to be present on all coins with reverse States a and b and on some coins with reverse State c. The cut is absent on any of the reverse State d coins I have observed. I believe that the cut first appears near T1 and gradually moves toward U. The present coin is reverse State c without the cut."

Die states for the JR-3 reverse are:

- State a. Perfect reverse.
- State b. A crack from the border to the left top of the first T in STATES continues faintly to the left branch and wing.
- State c. The crack is bold through the wreath and wing, with a branch through the top of the T and the border over A.
- State d. A rim break forms over the first T in STATES.

1797 Dime, 16 Stars, JR-1, Mint State Satiny Surfaces

5575 1797 16 Stars MS61 NGC. JR-1, R.4. The 1797 dimes are known from two main subtypes, the 16 Stars and 13 Stars obverses, the latter produced after Mint personnel realized the folly of continually adding stars as new states joined the Union. Only a single die was paired with both obverses, producing the two varieties known for the year. This example of the 16 Stars JR-1 is better-struck than usually seen, showing only minor high-point softness in the immediate centers. Marks are few; the only contact of note is a short planchet depression at the top of Liberty's breast. The satiny surfaces display a hint of golden-gray patina on each side. An attractive Mint State example of this very scarce early dime die combination. NGC ID# 236C, PCGS# 4462, CoinPlex ID# EDM179716ST

Condition Census 1797 Dime, JR-1, MS65 Only Two Finer Coins at PCGS Ex: Menjou/Pittman

5576 1797 16 Stars MS65 PCGS. JR-1, R.4. Ex: Menjou/Pittman. The 1797 Draped Bust dime is an underrated date in the series, especially in Mint State grades. Mint records indicate 25,261 Draped Bust dimes were struck in 1797, the second year of the denomination. However, recent research indicates that 10,244 of these coins were actually dated 1796, making the 1797 dime about twice as rare as the 1796 issue. Only two die varieties are known for the date, one with 16 obverse stars and the other with 13 stars.

The present coin represents the JR-1 variety, with the 16 star obverse, denoting the admission of Tennessee to the Union. Researchers believe all examples of the JR-1 were included in the delivery of 9,099 pieces on May 26, 1797. The surviving population probably numbers between 76 and 200 examples in all grades today. Mint State specimens are very rare.

This coin traces its history to the famous collection of John Jay Pittman, a collector known for his insistence on high quality. Pittman believed this piece was the finest-known 1797 dime, and it is hard to imagine an example with more technical virtues and eye appeal. When David Akers described this coin in 1997, he noted:

"Very Choice Uncirculated, a virtual Gem. Very sharply struck with excellent centering and broad, even denticles all around. A lustrous, original specimen with superb light reddish-gold toning. The obverse is mostly frosty, the reverse semi-prooflike and of Gem quality....Whenever JJP displayed it (the last time at the 1991 ANA Centennial Convention in Chicago), this 1797 Dime always attracted a great deal of attention, and it is certainly one of the highlights of his outstanding Dime collection."

We have nothing to add to Akers' glowing summary. Population: 1 in 65, 2 finer (11/12).

1798/97 Ten Cent, 16 Stars on Reverse, MS64 Gorgeous Eye Appeal

5577 1798/97 16 Stars on Reverse MS64 NGC. JR-1, R.3. The JR-1 overdate with 16 Stars reverse is among the most frequently seen of the four varieties known for the year, and a few high-grade survivors are known, up to the MS66 level or so. The die marriage is obvious due to the prominent small 8 over large 7 overdate, paired with the 16 Stars reverse. Four such reverses were prepared, but the other three were used with 1796 quarter eagles (two for the 1796 No Stars, one for the 1796 With Stars).

This splendid and still-lustrous near-Gem displays deep violet interiors ceding to aqua near the rims on each side. The design elements are sharply struck, save for minor softness in the reverse center. The few signs of contact are undistracting. We mention three minute marks on Liberty's cheek solely for pedigree purposes. This is a gorgeous early dime. Census: 2 in 64, 10 finer (12/12). NGC ID# 236F, PCGS# 4468, CoinPlex ID# EDM1798OVR9716STREV

Still-Lustrous JR-4 1802 Dime, AU53

5578 1802 AU53 PCGS. JR-4, R.4. While the 1802 *half* dime gets far more attention, in-the-know collectors recognize how challenging the 1802 dime can be, as the variety represented here, the JR-4 with star 8 not tucked under the Y in LIBERTY, is rated R.4 (or "very scarce") yet is still the most common out of four varieties for the date. This AU53 example displays a mix of silver, gold-gray, orange, plum, and blue hues, the deepest colors appearing along the borders. Though considerable striking weakness is noted in the centers, the broad luster remaining in the fields confirms that actual wear is at a minimum. A gorgeous piece. Population: 2 in 53, 11 finer (11/12). PCGS# 4472, NGC ID# 236K, CoinPlex ID# EDM1802

1804 Draped Bust Dime, XF45

13 Stars Reverse, JR-1

Only Two Finer Coins at PCGS

5579 1804 13 Stars on Reverse XF45 PCGS. JR-1, R.5. It doesn't take much to get collectors excited about 1804-dated American coinage of any denomination. Only the 1804 half cents are readily available for a price, and the prices zoom skyward from there as the larger denominations are pursued. The 1804 is a key date within the large cents, still available but far more pricey than its little sister. The 1804 dimes, whether with the 13 Star Reverse or 14 Star Reverse, are both officially rated "rare" or R.5. The 1804 silver dollar, of course, is a classic American rarity, and the 1804 quarter eagles share something in common with the 1804 half dimes besides more-or-less rarity: They were struck using the same reverse dies as their silver counterparts. All 1804 half eagles and eagles are also rare, generally speaking, some varieties more than others.

The 1804 BD-2 quarter eagles with 14 Star Reverse were produced using the JR-2 die, and the 1804 BD-1 quarter eagles with 13 Star Reverse were made from the JR-1 die. (The same die was also used beforehand, for the 1802 BD-2 quarter eagles and the 1802 JR-4 dimes.) The reported mintage for the 1804 dimes was 8,265 pieces, and the 1804 quarter eagles were struck in the amount of 3,327 coins. (Of course, the usual caveat applies to early U.S. coinage, that the Mint personnel did not care about the date on a die, as long as it was serviceable for production.)

The present Choice XF 1804 13 Stars dime is rare, although marginally less so than its 14 Stars counterpart. Both varieties share the common 1804-dated obverse, with a small plain 4 and the 1 in the date touching the lowest curl. The reverse of this piece shows star 4 virtually obliterated, a gradual process, as the star is more visible on the similarly dated BD-1 quarter eagle. Stars 5 and 10 nearby are also weak. This piece still shows quite a lot of feather detail on the reverse, and about half of the original mint luster remains. Both sides show accents of pink and ice-blue, heavier at the margins. A handful of scrapes appear in the obverse field under a loupe, but none are overly distracting. A nice example of this rarity, one that will be difficult to upgrade. Population: 3 in 45, 2 finer (12/12). PCGS# 4474, NGC ID# 236M, CoinPlex ID# EDM180413STREV

1805 4 Berries Ten Cent, MS65+
A Choice Type Coin

5580 1805 4 Berries MS65+ NGC. JR-2, R.2. This is the second use of the obverse die that was also used for the 1805 JR-1, 5 Berries dimes, and the only use of the reverse die. The reverse is rotated about 20 degrees clockwise, as often seen on this die marriage.

A number of high-grade examples of each variety exist, some of which are exceptionally well-struck, lustrous, and beautiful. The present high-end Gem offering is one such coin. Liberty's hair and drapery and the eagle's wing and tail feathers are sharply detailed, and the lustrous surfaces display soft silver-gold color in the centers ceding to splashes of electric-blue and lavender at the peripheries. No marks of consequence are evident. The foregoing attributes combine to produce beautiful eye appeal and a great choice for a high-grade type collection. Census: 17 in 65 (1 in 65+), 9 finer (12/12). NGC ID# 236S, PCGS# 4477, CoinPlex ID# EDM18054BERR

BUST DIME

1829 JR-12 Dime, MS66
Medium 10C, Probably Finest Known

5581 1829 Medium 10C MS66 PCGS. JR-12, R.3. Two die varieties, JR-11 and JR-12, share the Medium 10C reverse, although they are from separate reverse dies. The PCGS population data show four Medium 10C examples in MS66 and two others in MS67 (11/12). We suspect that those totals include resubmissions. We have offered an MS66 PCGS example of the JR-12 die marriage on three previous occasions — all three appearances of a single coin showing considerable strike weakness. This specimen is a different piece that features a bold strike and frosty silver luster, exhibiting mostly untuned surfaces hosting only a trace of delicate gold toning. Both sides show full cartwheel luster and pristine silver surfaces.

From The Richard P. Ariagno, M.D. Collection. PCGS# 84511, CoinPlex ID# EDM1829MD10C

SEATED DIMES

1874-CC Arrows Dime, XF40
Elusive Low-Mintage Key

5582 1874-CC Arrows XF40 PCGS Secure. Only 10, 817 Seated Liberty dimes were coined at the Carson City Mint in 1874, and few examples were saved by contemporary collectors. As a result, the 1874-CC is a rare and sought-after issue, considered the key to the Carson City series, after the uncollectible 1873-CC No Arrows issue. Present-day collectors prize examples of this date in all grades and conditions.

The coin offered here is an attractive XF specimen that retains almost all of its original design detail, with only some minor interior definition lost. The lightly abraded surfaces are toned in pleasing shades of champagne-gold, bluish-gray, and lavender, with a few traces of mint luster under the patina. Population: 4 in 40, 9 finer (11/12). PCGS# 4669, NGC ID# 23BL, CoinPlex ID# SDM1874C-CARR

1874-CC Arrows Dime, AU
Low-Mintage Series Key

5583 1874-CC Arrows AU50 NGC. The Brian Greer series reference says that this issue is the “unquestioned key to the series (excluding the uncollectible 1873-CC No Arrows). Rare in any grade, and probably a full R.6 [very rare] in problem-free condition. Very few mint state pieces exist. Under intense demand and currently bringing well in excess of Trends prices, when available.”

Of course, the 1874-CC needs no introduction to the legions of Liberty Seated dime specialists eager to obtain an example. The mintage is recorded as 10,817 pieces, and all are from a single die pair. The obverse slant noticeably upward, as with all Arrows issues from 1874.

The same reverse die was used to strike all Carson City dimes from 1871 through 1874. A die crack begins to appear on some 1872-CC dimes and appears on all genuine 1873-CC and 1874-CC pieces. The reverse of this piece shows two die cracks, one through the right branch of the wreath through the ear of corn to the rim at about 2:30, the other from the right ribbon end through the center of the CC mintmark and beyond. The second die crack is the diagnostic found on every genuine example.

Many 1874-CC dimes have some type of surface problem, but this piece shows few poststrike impairments. For example, this piece has some minor roughness within the wreath and elsewhere, appearing to be from die rust. The surfaces have intermingled iridescence on both sides with traces of underlying luster. There are only seven pieces graded finer at both services combined. Census: 3 in 50, 3 finer (11/12). NGC ID# 23BL, PCGS# 4669, CoinPlex ID# SDM1874CCARR

PROOF SEATED DIMES

1843 Seated Liberty Dime, PR64
Only One Finer Coin at PCGS

5584 1843 PR64 PCGS. CAC. The Philadelphia Mint did not begin its program of commercial proof set offerings until 1858, 15 years after this delightful proof Seated Liberty dime was struck. No records were kept of the pre-1858 proof mintages, but the totals were always extremely limited. Only 8-12 examples of this issue survive today in all grades.

The present coin is a charming Choice example, with deeply mirrored fields and razor-sharp definition on the design elements. The pleasing surfaces are toned in shades of silver-gray, golden-brown, and cerulean-blue, with terrific eye appeal. We believe this coin is the same one offered in our Exclusively Internet Auction of January 2001, then graded PR64 NGC. The coin realized \$11,700. Population: 1 in 64, 1 finer (12/12). PCGS# 4730, NGC ID# 23BX, CoinPlex ID# SDP1843

1855 Arrows Dime, PR65
Only 12-15 Proofs Believed Known

5585 1855 Arrows PR65 NGC. Breen-3290, "Obvious double date. Proof only. Very rare." According to Garry Fortin at www.seateddimevarieties.com, every known example shows hub doubling at the date and arrows, a diagnostic of proofs. The same obverse is also known on business strikes, so the existence of the date doubling will not prove that a coin is a proof. However, the lack of that doubling will prove that a coin is not a proof. All of the With Arrows coinage types are rare in proof format, regardless of the date. This is true of all denominations from half dime through half dollar. From an unknown number minted, an estimated 12-15 proof dimes of 1855 are believed to exist; among all the specialized collections of dimes sold over the past century, few have included an example. This Gem displays rich gold toning over deeply mirrored fields and frosty devices with splashes of iridescence to heighten its aesthetic appeal. The surfaces are well-preserved with a couple of minuscule nicks noted for accuracy's sake just above the M in DIME.

Ex: Central States Signature (Heritage, 5/2007), lot 2071; Joseph Thomas Collection / Central States Signature (Heritage, 4-5/2009), lot 2263; Long Beach Signature (Heritage, 9/2009), lot 449; FUN Signature (Heritage, 1/2010), lot 2482. NGC ID# 23CG, PCGS# 4744, CoinPlex ID# SDP1855ARR

1855 Arrows Dime, PR67 Cameo Second-Finest of Perhaps 12-15 Proofs Known

5586 1855 Arrows PR67 Cameo NGC. The 1855 Arrows proof dime (this one from the Phil Kaufman Collection) ranks among the finest of 27 certified pieces. Moreover, it is one of just six examples assigned the Cameo and Ultra Cameo designation by NGC (there are none at PCGS). The level of preservation of extant pieces is relatively high, most falling into the PR64-PR65 range.

The mintage figure for this issue is unknown. While Walter Breen (1989) accounted for nine examples, including one in the Smithsonian Institution, our survey of previous catalogs with 1855 proof dime appearances suggests that most numismatists estimate 12-15 coins exist. The one exception is David Lawrence Rare Coins, which suggests there are probably about 30 proofs of this date extant.

Our research reveals what we believe to be 11 separate examples, plus the Smithsonian specimen. The photo quality of many catalog appearances made plate-matching difficult. Some listings in the roster may represent the same coin:

1. **PR67 ★ Cameo NGC.** Rosemont Signature (Heritage, 4/2008), lot 2266; Dallas Signature (Heritage, 10/2012), lot 3953, where it brought \$38,187.50.
2. **PR67 Cameo NGC.** Phil Kaufman Collection (Heritage, 4/2008), lot 2395; Sunday Internet Coin Auction (Heritage, 8/2008), lot 64201, realized \$56,062.50; Los Angeles Signature (Heritage, 7/2009), lot 1073; the present example.
3. **PR65 NGC.** Central States Signature (Heritage, 5/2007), lot 2071; Joseph Thomas Collection / Central States Signature (Heritage, 4-5/2009), lot 2263; Long Beach Signature (Heritage, 9/2009), lot 449; FUN Signature (Heritage, 1/2010), lot 2482.
4. **PR65 NGC.** Allen Lovejoy Collection (Stack's, 10/1990), lot 283.
5. **PR65.** Eliasberg Collection (Bowers and Merena, 5/1996), lot 1151.
6. **PR65 PCGS.** 2000 ANA Money Show (Superior, 3/2000), lot 280; J.B. Worthington Collection (American Numismatic Rarities, 5/2005), lot 136.
7. **PR64 NGC.** Rarities Sale (Bowers and Merena, 8/1996), lot 79.
8. **PR64 PCGS.** Pre-Long Beach (Superior, 10/2000), lot 4346.
9. **PR64 PCGS.** Long Beach Signature (Heritage, 2/2005), lot 6240. Pedigree markers visible on the plates include a carbon spot left of star 5, another under the cap, and one to the upper right of the reverse branch.
10. **PR64 NGC.** Richmond III Sale (David Lawrence Rare Coins, 3/2005), lot 1247.
11. **Choice Brilliant Proof.** Floyd T. Starr Collection (Stack's, 10/1992), lot 370.
12. **Proof.** Smithsonian Institution.

Additional Appearances

- A. **PR65 NGC.** Orlando Sale (Superior, 8/1992), lot 93.
- B. **PR64 PCGS.** FUN Signature (Heritage, 1/1997), lot 5909.
- C. **PR64 NGC.** Rarities Sale (Bowers and Merena, 8/1998), lot 110.
- D. **PR64 PCGS.** Pre-Long Beach (Ira and Larry Goldberg, 6/2002), lot 2151.
- E. **PR64 NGC.** Stack's (9/2006), lot 479.
- F. **Choice Proof 63/63.** 1986 Georgia Numismatic Association Sale (Mid-American, 5/1986), lot 1542.
- G. **Proof.** John Jay Pittman Collection (David Akers, 10/1997), lot 621.
- H. **PR65 Cameo NGC.** FUN Signature (Heritage, 1/2012), lot 3153.

Stunning cameo contrast is evident on the Superb Gem Kaufman coin, regardless of the angle from which the piece is viewed. The surfaces are fully struck, except for minor softness on the ribbing of the uppermost leaves. A few stray, inoffensive hairlines on the untuned, nicely preserved surfaces should not be confused with the faint die polish lines visible in the fields. Census: 1 in 67 Cameo, 1 in 67 ★, 0 finer (11/12). PCGS# 84744, CoinPlex ID# SDP1855ARRCA

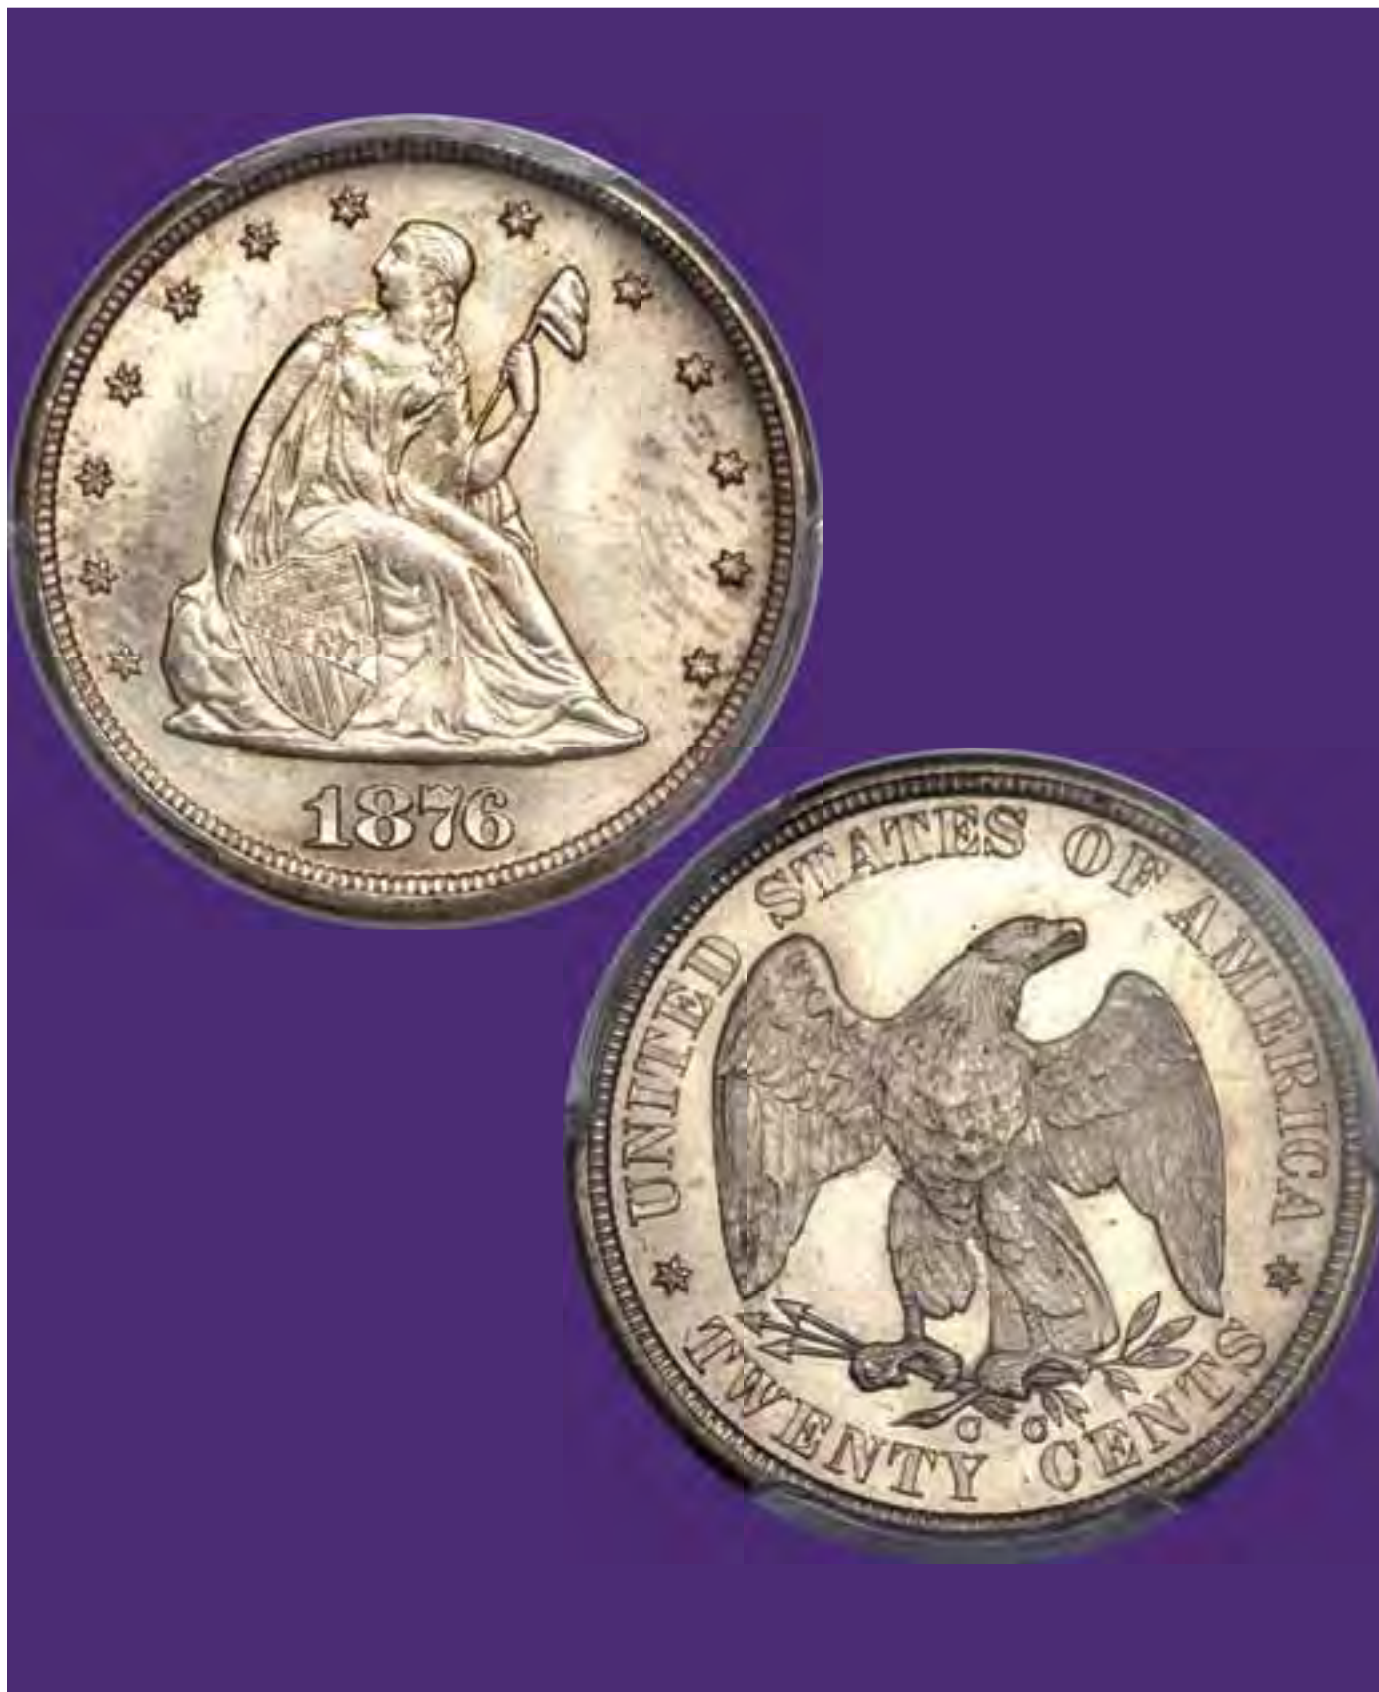

1859 Transitional Dime, Deeply Toned PR65
Judd-233, Without a Country Designation

5587 1859 Transitional PR65 NGC. Judd-233, Pollock-280, High R.6 The 1859 transitional dime was created when Mint Director James Ross Snowden suggested muling a starred obverse die with the new reverse adopted in 1860, resulting in a coin that contained no mention of the United States. It is believed that fewer than two dozen are known. Struck in silver with a reeded edge. The fields are brightly mirrored, quite remarkable actually when one considers the depth of cobalt-blue and reddish patina thickly layered on each side. A wire rim appears on both sides, and the strike details are complete in all areas. NGC ID# 23CH, PCGS# 4749, CoinPlex ID# SDP1859TRANS

TWENTY CENT PIECE

Gem 1876-CC Twenty Cent Piece
Classic Silver Rarity, 16-20 Examples Known
Condition Census Specimen, Ex: Boyd, Champa

5588 1876-CC MS65 PCGS. The 1876-CC twenty cent piece is a celebrated rarity in the U.S. silver series, traditionally considered to be in the same class as the 1804 dollar, 1913 Liberty Head nickel, and the 1894-S dime. Heritage Auctions is pleased to offer a Condition Census example of this rare issue, from a surviving population of just 16-20 pieces in all grades. This coin traces its history to the World's Greatest Collection of F.C.C. Boyd and the famous Armand Champa Collection before finding its way to the present consignor.

The twenty cent piece was ostensibly conceived as a measure to combat overcharging by merchants in the western part of the country, where five cent coins were scarce after 1873 and making change for a quarter was quite difficult. In truth, the real impetus for coining this denomination probably came from wealthy and politically influential mine owners, who had seen their profits threatened by the Mint Act of February 12, 1873, which eliminated several silver denominations that were no longer needed in the national economy. The twenty cent piece was authorized by the Act of March 3, 1875, with the support of Mint Director Henry Linderman.

Unfortunately, the odd denomination was doomed from the start. Mint policy in the 19th century insisted on uniformity of design on the silver denominations, with only rare exceptions like the Morgan dollar. The obverse of the twenty cent piece employed the long-lived Seated Liberty design in use on the contemporary dime, quarter, and half dollar. The reverse portrayed an eagle that closely resembled the Trade dollar reverse. The specifications called for a diameter of 22 mm, extremely close to the 24.3 mm of the quarter, making the two denominations virtually indistinguishable to the average citizen. In more recent times a similar situation was created with the Susan B. Anthony dollar, which shows how difficult it is to learn from past mistakes where money is concerned. The twenty cent piece was universally unpopular, and the denomination was retired from circulation after 1876, although proofs continued to be produced until 1878.

Mint records indicate that 10,000 twenty cent pieces were struck at the Carson City Mint in 1876, but fewer than 20 examples survive today. Virtually all of the tiny mintage was stored in vaults at the Carson City Mint, because the coins were unwanted in circulation. On May 19, 1877, Mint Director Linderman sent this message to Superintendent James Crawford in Carson City:

"You are hereby authorized and directed to melt all 20-cent pieces you have on hand, and you will debit 'Silver Profit Fund' with any losses thereon."

Undoubtedly the great majority of the 1876-CC mintage was destroyed per these instructions, along with some leftover coins from 1875.

Fortunately, a few examples of the 1876-CC did reach circulation before Linderman's order was issued. John Seagraves Pick, a "Forty-Niner" who later made his way to Nevada after the Comstock Lode was discovered, acquired at least one specimen in circulation in Virginia City, Nevada, in 1876. This coin was treated as an heirloom by Pick's family, and it remained in the family's possession until it was auctioned by Bowers and Merena in June 2009. The coin was graded AU58 by PCGS. A few more circulated examples have surfaced over the years, indicating that some other coins must have escaped in this manner, but not many have survived.

Most of the coins we know about today are attractive, high-grade pieces. By law, a number of coins from each year's mintage were set aside for examination by the Assay Commission in Washington, D.C. Naturally, the coins selected tended to be high-quality specimens that would impress the examiners with the craftsmanship of the issuing facility. In the late 1950s, Baltimore dealer Tom Warfield discovered a group of eight to 10 splendid Uncirculated examples in a Maryland estate. The original owner of this remarkable hoard has never been identified, but it seems most likely that a member of the Assay Commission in 1877 set these coins aside and preserved them for future generations of collectors.

The rarity of the 1876-CC was recognized by numismatists as early as the R.C. Davis Sale (New York Coin & Stamp, 1/1890), where lot 1506 in the section labeled Fifth Dollars, or Twenty Cent Pieces was described as, "1876 CC mint: sharp, brilliant, uncirc. We know of no duplicate of this mintage." A few years later, Augustus Heaton popularized the collecting of mintmark issues through his influential 1893 work, *A Treatise on the Coinage of United States Branch Mints*. Heaton paid special attention to the 1876-CC, mentioning it in his preface and the main body of the book. By 1894, at least three specimens were known to collectors, as reported in the June issue of *The Numismatist*, and Edgar Adams identified specimens in the possession of Elmer Sears, Virgil Brand, John H. Clapp, and H.O. Granberg in 1911.

A few more coins have surfaced over the years, including the pieces in the Maryland estate, until Q. David Bowers published a roster of 21 coins in lot 1353 of the Eliasberg Collection (Bowers and Merena, 4/1997). As Bowers notes in his description, "This list must include duplications." PCGS and NGC have combined to certify a total of 22 coins, in grades ranging from XF Details to MS66, but this total also probably includes resubmissions and crossovers. An estimate of 16-18 survivors seems most reasonable, but it may never be possible to compile a definitive roster. It has been more than three years since Heritage has offered an example of the 1876-CC, the magnificent MS66 PCGS specimen in lot 2299 of the Central States Signature (Heritage, 4/2009), that realized \$460,000.

The present coin has always been considered one of the finest examples known, a delightful Gem with the characteristic doubling on LIBERTY showing boldly, and full radials evident on the left-hand stars. The reverse is sharply detailed throughout, with fine definition on the eagle's feathers and claws. The reverse has been described as prooflike by several catalogers, but we see full cartwheel mint luster on both sides under attractive shades of pale gold toning, with a few streaks of sea-green and blue on the obverse. The pleasing surfaces exhibit no mentionable distractions, and overall eye appeal is terrific. This specimen is the **Breen Plate Coin**, and the number one specimen in Q. David Bowers' roster in the Eliasberg catalog. The 1876-CC twenty cent piece is listed as number 24 in Jeff Garrett and Ron Guth's 100 Greatest U.S. Coins. Population: 2 in 65, 2 finer (12/12).

EARLY QUARTERS

1796 Quarter, Original Fine 12
B-1, Low 6 Variant

5589 1796 Fine 12 NGC. B-1, R.4. Two obverse dies are known for the 1796 quarters, both sharing a common reverse. The B-2 or High 6 Obverse die pairing is found more frequently than the B-1 or Low 6 Obverse variety, although the 1796 quarters are seldom collected by die variety; most collectors are content to buy the nicest example they can afford for type purposes.

The B-2 or High 6 pieces are known both in the prime state of the obverse as well as with several progressive die cracks that eventually led to the replacement of the obverse die with the B-1 or Low 6 die. Coinage continued with the same reverse (AME joined on all known examples of the date). The B-2 marriage was accordingly the first use of the reverse, with the B-1 second. This excellent type example displays even wear over the high points and the expected silver-gray color. The fields and recesses are medium gray with just a hint of rose — an unquestionably original coin. Each side is refreshingly free from abrasions. NGC ID# 23RA, PCGS# 5310, CoinPlex ID# EQU1796

1796 B-1 Low 6 Quarter, MS60 Bright Prooflike Fields

5590 1796 MS60 PCGS Secure. B-1, R.4. Die State 3. Only two die pairings, B-1 and B-2, were used to produce the recorded 6,146 examples of the 1796 quarter, the first year the new silver denomination was produced at the U.S. Mint, along with a new gold denomination, the quarter eagle. The two obverse dies for the quarter, often called the Low 6 and High 6 dies, were combined with a single reverse for the production. The Low 6 B-1 is a bit rarer, but the desirability of the first-year type diminishes the price premium between the two varieties: Any 1796 quarter, from near-smooth Poor 1 pieces to the finest Uncirculated examples, are the subject of intense collector demand.

The B-2 shows the 6 virtually touching the drapery, while star 13 is more distant from the bust than on the Low 6. Per recent research presented by Steve Tompkins in *Early United States Quarters 1796-1838*, despite the backwards Browning numbering system, the B-2 die pairing was clearly struck first, as can be seen from the greater wear on the common reverse when it is paired with the B-1 obverse. The B-2 obverse cracked during production in several stages, advancing in later phases to where three distinct cracks show, at which time the B-1 obverse was taken up to finish the manufacture. In the latest stage of the B-1 pairing, a die crack forms on the reverse as well.

It is well-known, and part of the lore and legend of the 1796 quarters, that the famous Colonel E.H.R. Green possessed a hoard that possibly numbered several hundred pieces, many of them prooflike and most of them likely B-2 coins, given their 3:1 predominance over the B-1s. This is one of the scarcer B-1 (Low 6) variety with clearly prooflike fields on each side. The surfaces are almost entirely brilliant with just a hint of golden peripheral color. Numerous shallow die adjustment marks run diagonally across the upper obverse. The strike is sharp on the obverse, but the breast and head of the eagle are soft on the reverse. Numerous small abrasions are scattered over each side, consistent with the grade. A superior example of this always-popular one-year type. PCGS# 5310, NGC ID# 23RA, CoinPlex ID# EQU1796

BUST QUARTER

1818 B-2 Quarter, MS65
Near-Terminal Die State

5591 1818 MS65 NGC. B-2, R.1. The obverse has heavy clash marks and die cracks, including the main crack over the cap extending to star 10, and then boldly to the rim. Another crack joins the main crack and the rim at about 12 o'clock. Additional minor cracks are noted. The reverse also exhibits heavy clash marks and die cracks on this late-die state specimen. Later die states are known, but not much later than this near-terminal specimen. This Gem is impressively lustrous with hints of rose and peach toning over otherwise silver-white surfaces. It is well-struck and pleasingly preserved with great eye appeal. NGC ID# 23RH, PCGS# 5322, CoinPlex ID# EQU1818

1822 B-2 Quarter, VG10
25 Over 50C Reverse

5592 1822 25/50C VG10 PCGS. CAC. B-2, R.5. Collectors Rory Rea, Jim Koenings, and Aram Haroutunian prepared an extensive census of 1822 25/50C quarters, publishing a chart in *Early Quarter Dollars of the United States Mint* that indicates the grades of the top 45 specimens. Coins 24, 25, and 26 are graded VG10.

Both sides of this pleasing piece have light grayish-tan devices with slate-gray fields, showing darker verdigris on the reverse. A few minor hairlines are evident on the obverse of this pleasing blundered die quarter. Population: 4 in 10, 9 finer (11/12). PCGS# 5333, NGC ID# 23RH, CoinPlex ID# EQU18225OVR50C

SEATED QUARTERS

1838 No Drapery Quarter, MS65
Transitional Issue

5593 1838 No Drapery MS65 NGC. The 1838 No Drapery quarters were struck after the earlier Capped Bust design was discontinued. The Philadelphia Mint coined 366,000 of the earlier design and 466,000 of these Seated quarters. High-grade examples are rarely encountered, with the typical survivor falling in the XF to AU range. Any Mint State piece is elusive, and Gem specimens are rare. This lovely example has brilliant silver surfaces and bold design features, showing only slight weakness on a few stars at the upper-left obverse. Census: 6 in 65, 3 finer (11/12). NGC ID# 23SE, PCGS# 5391, CoinPlex ID# SQU1838ND

1843-O Seated Quarter, MS64
Rare Large O Variety
Finest Known, Ex: Eliasberg

5594 1843-O Large O MS64 NGC. Ex: Eliasberg. From a mintage of 968,000 pieces, the 1843-O Seated Liberty quarter is known in both large and small mintmark varieties. This coin represents the less available Large O type, which is extremely rare in Mint State grades. When Larry Briggs wrote his series reference in 1991 he noted that the Large O was unknown in Mint State, and most numismatists agreed with that assessment until this coin surfaced in the Eliasberg sale in 1997. This coin is still the only example certified in Uncirculated condition by NGC, with its nearest competitor grading only XF45.

The pleasing surfaces of this delightful Choice specimen are blanketed in attractive shades of dove-gray, champagne-gold, and lavender toning, with slightly subdued mint luster shining through the patina. The design elements are well-detailed, and the fields show only minor signs of contact. Census for Large O: 1 in 64, 0 finer (11/12).

Ex: Louis Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1434. PCGS# 395927

Condition Rarity AU50 1859-S Quarter

5595 1859-S AU50 PCGS. The rarity of the 1859-S quarter was summed up by Larry Briggs in his 1991 *The Comprehensive Encyclopedia of Liberty Seated Quarters*: "Most encountered are AG - VG and seem to have a problem of some sort. Coins in F/VF are quite scarce, XF - rare, and AU - extremely rare. To date no true Unc.'s are known." Briggs' assessment is still appropriate today. PCGS has certified a total of 66 1859-S quarters in all grades, primarily in Very Good to Very Fine, and NGC has seen a mere 12 examples, mainly in Very Fine and Extremely Fine. Neither service has certified a Mint State coin.

Dappled grayish-purple toning runs over both sides of the current AU specimen, which retains traces of luster in some of the recessed areas. The design elements are well-defined, including sharpness in the star centers, most of Liberty's hair, and the eagle's plumage. Both sides are remarkably clean. We mention a minute mark on the upper wrist of Liberty's left (facing) arm and another midway between star 11 and the right (facing) arm solely for identification purposes. Population: 3 in 50, 3 finer (11/12). PCGS# 5450, NGC ID# 23TN, CoinPlex ID# SQU1859S

PROOF SEATED QUARTERS

Unique Proof 1838 Seated Quarter The Dupont-West PR63 Specimen

5596 1838 No Drapery PR63 PCGS. “Once-in-a-lifetime opportunity” is a phrase that is bandied about far too often in the numismatic community. However, in the case of the unique proof 1838 Seated Liberty quarter, the phrase is justified. The last time the coin appeared for sale at public auction was five months before this aged cataloger was born. This is the only specimen recorded in *Walter Breen’s Encyclopedia of United States and Colonial Proof Coins, 1722-1989*, where the author noted that “Wayte Raymond knew another.” In the *Complete Encyclopedia of U.S. and Colonial Coins*, the same author wrote simply that there was “only one proof reported.” Unless or until the other piece, the one that Wayte Raymond knew about, turns up, we submit that this 1838 Seated quarter is unique as a proof.

Christian Gobrecht succeeded William Kneass as the new chief engraver of the Philadelphia Mint in 1836, and soon completed his iconic Seated Liberty obverse. The new design appeared on silver dollars in 1836, and on other denominations from 1837 to 1839. Following production of Capped Bust quarters during the first several months of 1838, the Mint switched to the Seated Liberty design. Gobrecht combined the Seated Liberty obverse, which he made famous over the previous couple of years, with the older-style eagle reverse, similar to the Kneass design that appeared on the earlier Capped Bust quarters and half dollars.

Mint Director Robert Maskell Patterson sent 20 examples of the new-design quarters to Treasury Secretary Levi Woodbury on September 13, 1838. In his 1977 *Proof Encyclopedia*, Breen comments that Patterson “did not” call them specimens. A decade later in his *Complete Encyclopedia*, Breen writes that “the term ‘specimens’ was Patterson’s.” The manufacturing method of those 20 coins remains unknown, although we might surmise that they were special pieces, perhaps proofs, and they were certainly struck on the Thonnelier steam presses that were installed at the second mint about two years previously.

Production of the first regular issue, business strike Seated quarters began on September 29, 1838. Most likely, that production followed the approval of Woodbury, who earlier examined the 20 specimens that were sent to him on September 13, and likely struck that same day. If that is the case, and if this Select proof specimen is one of the 20 coins, we might assume it was struck on September 13, 1838.

We are only aware of a single proof example of the 1838 Seated Liberty quarter, the example offered here. This specimen, which Breen cited in his *Proof Encyclopedia*, appeared in the Anderson-Dupont sale (Stack’s, 11/1954) as lot 1815, and later in the Edgar A. West consignment (Stack’s, 5/1957) as lot 667. Breen incorrectly attributed the West sale to Abe Kosoff. The present specimen clearly matches the plates in both the Dupont catalog and the West consignment, and it is likely that our consignor purchased the coin directly from the 1957 Stack’s sale. Our consignor comments: “This coin adds a page to numismatic history and fills out further the enigmatic chronicle of early 19th century proof coinage.”

In 1954, Stack’s described the coin as “Brilliant gem Proof. Unlisted in the Breen monograph on Proofs. Probably unique in this condition.” Although shy of a Gem, this Select proof is so much more than a mere brilliant proof. Every individual design element is bold, including full stars, complete head details, and a full sandal on the obverse, to the sharp claws, arrow feathers, leaf venation, and eagle feathers on the reverse. Both sides of this beautiful piece exhibit broad, squared rims with deep, mirrored fields and satin reliefs. Those fields, while showing faint hairlines and contact marks, display fine Mint-made striations, up to the right on the obverse and up to the left on the reverse. Similar striations are often encountered on 19th century proof coins. The surfaces show hints of heather with splashes of golden-lilac and pale blue gathering near the peripheries.

Overemphasizing the importance of this opportunity will prove difficult. It is a unique proof of the 1838 No Drapery Seated Liberty design, the first year of issue for the Seated Liberty quarters. Collectors of proof Seated Liberty coinage will have no other opportunity to acquire this issue. This is the ultimate addition to a first-year type collection, representing the Gobrecht design as well as the three-year No Drapery subtype. In April 2008 we offered the Phil Kaufman specimen of the 1839 No Drapery proof quarter, also unique, a coin that realized \$517,500. We consider this 1838 even more important than that 1839 proof quarter.

Ex: *Anderson-Dupont Sale (Stack’s, 11/1954)*, lot 1815; *Edgar A. West Consignment (Stack’s, 5/1957)*, lot 667; the current consignor. PCGS# 5527, CoinPlex ID# SQP1838ND

1868 Quarter Dollar, PR66 Undesignated Cameo Proof

5597 1868 PR66 PCGS. CAC. A review of PCGS grading data indicates the rarity of high-grade proof 1868 quarter dollars. That service has certified three examples in PR66 and one in PR66 Cameo. In addition, a single PR65 Deep Cameo is the only piece with that designation.

An example of unparalleled beauty, this Premium Gem combines delicate gold toning over light silver surfaces at the center, with peripheral blue, violet, and iridescent patina. Both sides are fully mirrored around lustrous devices, an obvious but undesignated Cameo proof. Population: 3 in 66, 0 finer (11/12). PCGS# 5567, NGC ID# 23WZ, CoinPlex ID# SQP1868

1886 Quarter Dollar, PR68 Deep Cameo The Finest Specimen at PCGS

5598 1886 PR68 Deep Cameo PCGS. There is no finer example of the 1886 quarter, as this is the only PCGS-certified PR68 Deep Cameo specimen, and only two appear on the NGC Census Report (11/12). The proof mintage was halted at 886 examples in 1886, certainly a coincidence when comparing years and mintage figures. Over the years, we have offered six examples in PR67 Deep Cameo PCGS, but this is the first PR68 Deep Cameo PCGS piece to appear in any of our auctions. This piece is the only such coin certified at PCGS, the single finest 1886 proof quarter that service has seen. It is destined for a top Set Registry collection.

Consideration of the Cameo and Deep Cameo rarity of 1886 is extremely important to understand. In all grades and designations, PCGS has certified 311 proof 1886 quarters. That total includes 248 undesignated proofs, 51 Cameo proofs, and 12 Deep Cameo coins. That equates to only four Deep Cameo proofs for every 100 submissions of this date.

In addition to its finest-certified status, this piece has amazing eye appeal, created through the combination of extraordinarily thick mint frost on the sharply defined devices with deeply mirrored fields. Both sides are fully brilliant with no evidence of toning anywhere on the obverse or reverse. An absolutely stunning Superb Gem, a coin that will please even the most fastidious connoisseur of 19th century silver type coins. PCGS# 95587, CoinPlex ID# SQP1886DC

Boldly Toned PR68 ★ 1889 Quarter

5599 1889 PR68 ★ NGC. CAC. NGC records show a total of six "certification events" for the 1889 quarter in PR68, with no coins numerically finer regardless of contrast status; those six coins are divided into two PR68, two PR68 ★, one PR68 Cameo, and one PR68 Ultra Cameo, with unknown levels of duplication (11/12). This magnificently toned and semicontrasted PR68 ★ specimen has gleaming fields, distinctly frosted devices, and eye-catching overtones with pale green-gold outer field toning that gives way to aquamarine and light blue-green hues at the centers. Stunningly preserved. NGC ID# 23XM, PCGS# 5590, CoinPlex ID# SQP1889

BARBER QUARTERS

1896-S Quarter Dollar, MS65 Fantastic Condition Rarity

5600 1896-S MS65 NGC. As one of the great triumvirate of key dates in the Barber quarter series, along with the 1901-S and 1913-S, the 1896-S is truly rare in grades finer than Very Good. In fact, the average grade of all certified examples is just Fine 12. At NGC, 233 of the 267 certified 1896-S quarters grade below that average, with only 34 pieces in grades from Fine 12 to MS67, including only six Gem or finer specimens. The data at PCGS is eerily similar, with 598 of the 682 certified pieces grading less than Fine 12, and only 15 specimens certified in Gem or finer grades.

The surfaces on this Gem example are basically brilliant, although the careful viewer might detect a slight ice-blue cast on each side. The luster is intense and unbroken, although there is little field/device contrast noted. Under a loupe, only a few light, undistracting abrasions can be seen on Liberty's cheek and neck, which are mentioned only because they collectively appear to limit an even higher grade. Few other mentionable contact marks are seen, save for a couple of tiny ticks on the shield stripes. The strike is well executed, notably on the often-weak right (facing) shield border and the eagle's left (right facing) claw, with the only mentionable quibble being some slight softness on the upper left (right facing) wing. This is a rare opportunity to obtain one of the finest examples of this issue, a coin that will contribute greatly to a superb set of Barber coinage. Census: 2 in 65, 4 finer (11/12).

From The J.D. Tanner Collection. NGC ID# 23Y9, PCGS# 5615, CoinPlex ID# BQU1896S

Key-Date 1901-S Quarter, XF Details Sharply Defined

5601 1901-S — Obverse Scratched — NGC Details. XF. The key 1901-S Barber quarter is a prized issue in any grade, and even some impaired examples are highly desirable. The present XF Details specimen is just such a coin. The NGC disclaimer refers to a horizontal, hair-thin scratch from below Liberty's ear to the dentil above star 3. It is not readily visible to the unaided eye and is the only mark of consequence on the coin. A few other minute marks are within the parameters of a coin having seen relatively brief circulation, and there are no mentionable rim dings.

The silvery surfaces display whispers of soft violet and gold around the devices. These exhibit strong detail throughout. Only the upper-right shield corner is a tad soft, not uncharacteristic of the issue. All letters in LIBERTY are bold, as are those in E PLURIBUS UNUM, and the dentilation is strong on both sides.

This piece will find a deserving home in a midgrade Barber quarter collection.

From The J.D. Tanner Collection. NGC ID# 23YR, PCGS# 5630, CoinPlex ID# BQU1901S

Key-Date 1901-S Quarter AU Details

5602 1901-S — Improperly Cleaned — NGC Details. AU. For a coin labeled "Improperly Cleaned" (and judging by the luster and hairlines, deservedly so), this is an attractive AU Details coin. Glimmers of original luster, not just cleaning, appear in protected areas, while spotted blue-to-violet retoning lends the obverse character. The 1901-S quarter is the most challenging in its Barber series, a little-saved date with the second-lowest mintage, and owning a scarcely worn representative, even one that shows aftereffects of cleaning such as the present coin, is no shame at all. Were it not cleaned, this piece would be a condition rarity. NGC ID# 23YR, PCGS# 5630, CoinPlex ID# BQU1901S

1913-S Quarter, MS64
One of the Keys to the Series

5603 1913-S MS64 PCGS. CAC. The survival of numerous high-Mint State 1913-S quarters is due, we believe, to the furor that surrounded the introduction of the 1909-S VDB Lincoln cents four years earlier in and around San Francisco. Due to the low mintage of the 1909-S VDB cents, even casual collectors and neophytes soon learned that that tiny “S” mintmark could mean tidy profits. When the 1913-S quarters were introduced, despite their series-low mintage of only 40,000 coins, more were saved than of the earlier S-mint Barber keys, the 1901-S and 1896-S.

The present near-Gem 1913-S shows largely silver-white surfaces with a light peppering of russet patina, still presenting more brilliant than not. Liberty’s cheek shows one minor scrape in the center, but there are few marks otherwise. Minor strike weakness appears on the eagle’s right (facing) claw. The eye appeal is excellent throughout both sides, making this piece a potential capstone in a fine Barber quarter set. Population: 18 in 64, 32 finer (11/12). PCGS# 5666, NGC ID# 23ZW, CoinPlex ID# BQU1913S

STANDING LIBERTY QUARTER

1926-D Quarter, MS65
Elusive Full Head Example

5604 1926-D MS65 Full Head PCGS. CAC. The 1926-D Standing Liberty quarter saw an unextraordinary mintage, for the series, of 1.7 million coins — less than half as much as the 1924-D and 1920-D, the two Denver issues that preceded it. Nonetheless it appears that a few rolls may have been saved here and there, as Gems are found with some regularity. But with Full Head details at the Gem level, the issue becomes a far different one: PCGS has seen only 18 Full Head Gems, with nine finer (11/12). This piece is not a “just barely there” Full Head but rather a piece that shows far more head detail than requisite, despite a couple of weak shield rivets. The silver-gray centers are bounded by deeper pinkish-gold near the rims, and few marks appear on either side. PCGS# 5757, NGC ID# 243S, CoinPlex ID# SLQ1926DFH

WASHINGTON QUARTERS

Gem 1932-D Quarter With CAC Approval One of Six Such Examples of This Key

5605 1932-D MS65 PCGS Secure. CAC. It is only at the Gem level where the key 1932-D Washington quarter becomes truly elusive, although any Mint State example is a prize to treasure for collectors of this popular series. As the capstone of this fine and renowned PCGS Registry Set, this quarter already has, we suspect, the attention of quite a few series specialists. PCGS has certified only 63 examples of the 1932-D in the MS65 grade, and only a single coin, graded MS66 by PCGS, is finer (11/12).

The present Gem 1932-D, with the CAC approval in addition, is one of only six PCGS Gems with the CAC green bean added on. The piece completely holds its own, exhibiting full frosty luster over surfaces that show light accents of lavender and amber amid the prevailing silver tones. A few scattered marks on the lower bust of Washington are away from the prime focal points and well within the context of the Gem grade. The reverse shows few marks of any size, with accents of gold and ruby near the rims. The successful bidder on this coin can claim bragging rights to one of the finest examples save for the sole MS66 PCGS example, which brought \$143,750 in its last auction offering (Bowers & Merena, 4/2008, lot 322).

From The David Poole Collection of Silver Washington Quarters.
PCGS# 5791, NGC ID# 2448, CoinPlex ID# WQU1932D

Fantastic MS66 1932-S Quarter A Key-Date Registry Set Essential

5606 1932-S MS66 PCGS Secure. CAC. The Washington quarter series, begun as a commemorative design for the bicentennial of the first U.S. President's birth, started with a decently high mintage in Philadelphia but two low-mintage branch issues in Denver and San Francisco. While the 1932-S quarter is more available than its D-mint counterpart in Mint State grades, even the 1932-S is a significant condition rarity at the MS66 level. This broadly luminous example has pale gold, lavender, and blue hues washing over each side. A typically soft strike is of little consequence, as are any marks. Population: 4 in 66, 0 finer (11/12).

From The David Poole Collection of Silver Washington Quarters.
PCGS# 5792, NGC ID# 2449, CoinPlex ID# WQU1932S

Singular MS68 1934 Medium Motto Quarter

5607 1934 Medium Motto MS68 PCGS Secure. CAC. For collectors seeking a finest-graded 1934 Medium Motto quarter, this magnificent MS68 survivor is the only game in town, according to PCGS (11/12). As with many other coins in the collection, ownership of this piece will go a long way toward determining the new hierarchy of Registry enthusiasts in the series. Smooth and generous luster is near-colorless on the obverse but distinctly toned silver-blue, lavender, violet, and peach on the reverse, the last color appearing in opaque patches along parts of the rims. Magnificently preserved and gorgeous.

From The David Poole Collection of Silver Washington Quarters.
PCGS# 5793, NGC ID# 244A, CoinPlex ID# WQU1934MM

Magnificent Medium Motto MS67 1934-D Quarter

5608 1934-D Medium Motto MS67 PCGS. CAC. An ideal coin for the elite Registry Set collector, this Medium Motto piece is one of just four coins graded MS67 by PCGS with none in MS67+ or numerically finer grades (11/12). A CAC label further cements the desirability of this coin in a technical sense, but no number can describe its qualitative beauty. Pale blue and pastel-yellow tints wash over silver-base surfaces. The obverse also has intermittent specks of orange and reddish-brown, most visibly at the upper and lower-right rims. A couple of tiny, shallow reed marks at Washington's lower neck attract notice only because the rest of the coin is so extraordinarily clean.

From The David Poole Collection of Silver Washington Quarters.
PCGS# 5796, NGC ID# 244C, CoinPlex ID# WQU1934DMM

Heavy Motto 1934-D Quarter, MS67
Elite Example of Underrated Variety

5609 1934-D Heavy Motto MS67 PCGS. CAC. The *Guide Book* lists "Light Motto" and "Heavy Motto" varieties for the 1934 quarter but not the 1934-D. As PCGS recognizes, however, "Heavy Motto" 1934-D quarters do exist and are important to Registry Set collecting with varieties. This Superb Gem is one of just two MS67 examples of the subtype certified by PCGS with none numerically finer (11/12). Silver interiors, wider on the frosty reverse, give way to bold colors around. Orange and violet hues are most prominent, though related shades such as a paler yellow-gold and light blue also are present.

From *The David Poole Collection of Silver Washington Quarters*.
PCGS# 85796, CoinPlex ID# WQU1934DHM

1937 Doubled Die Obverse Quarter, MS67
Tied for Finest Known

5610 1937 Doubled Die Obverse MS66 PCGS. CAC. FS-101. Ex: Michael Fuller Collection. Very strong doubling is noted on the motto and digits of the date. As stated in the fifth edition of *Cherrypickers' Guide*, "This variety is considered one of the most important in the series." This Premium Gem is one of the two finest certified by either PCGS or NGC (11/12). The surfaces are smooth and virtually mark-free, and a bit of soft silver-gray patina has gathered overall. Worthy of a strong bid from an astute Washington quarter collector.

Ex: *FUN Signature* (Heritage, 1/2004), lot 6360; *Houston Signature* (Heritage, 11/2007), lot 60853, where it brought \$19,550.

From *The David Poole Collection of Silver Washington Quarters*.
PCGS# 95803, CoinPlex ID# WQU1937DDO

The Ultimate 1940 Washington Quarter MS68, Sole Finest Certified

5611 1940 MS68 PCGS Secure. CAC. This is the *only* MS68 example of the 1940 Washington quarter so graded by NGC or PCGS (11/12). As such, it is the ultimate “stopper” for high-end Registry Set collectors of both services. Fortunately for collectors who like their coins attractive in addition to high-grade, this also is an eye-appealing example with bounteous semifrosted luster and attractive partial patina. Gold, orange, and reddish-brown toning appears at the upper obverse and lower reverse, while the remainder of the piece is silver or faintly toned gray. As expected of the grade, both sides are almost flawless.

From The David Poole Collection of Silver Washington Quarters.
PCGS# 5811, NGC ID# 244U, CoinPlex ID# WQU1940

The Best PCGS-Certified 1941 Quarter MS68, an Unmatched Trump

5612 1941 MS68 PCGS Secure. CAC. Out of a mintage of more than 79 million pieces, only this example has received an MS68 grade from PCGS (11/12), a designation backed up by a CAC green label. Not only is the coin exquisitely preserved, it also has marvelous all-around visual appeal. Deep reddish-brown, orange, and gold outer patina gives way to intensely lustrous yet subtly frosted silver centers. Though the strike is not absolute — perhaps the one quibble an absurdly picky collector might have with this gorgeous survivor — features such as the tiny breast feathers on the eagle are visible.

From The David Poole Collection of Silver Washington Quarters.
PCGS# 5814, NGC ID# 244X, CoinPlex ID# WQU1941

Colorful MS68 1943 Quarter
One of Two Finest at PCCGS

5613 1943 MS68 PCCGS Secure. CAC. Despite a mintage of almost 100 million pieces, the key figures for the 1943 quarter — at least for Registry Set collectors — are “two by two.” There are two NGC-graded MS68 ★ examples in the *Census Report*, while the PCCGS *Population Report* lists two MS68 pieces (11/12). Such staggering top-tier rarity creates high stakes for an elite example such as this richly toned coin, bountifully lustrous under peach-to-rose peripheral toning with blue, lavender-violet, and silver interior shadings. Between the PCCGS Secure holder and CAC label, this is a rock-solid example of the issue.

From The David Poole Collection of Silver Washington Quarters.
PCCGS# 5820, NGC ID# 2455, CoinPlex ID# WQU1943

1943-D Washington Quarter, MS68
Single Finest Certified Example

5614 1943-D MS68 PCCGS. The 1943-D Washington quarter claims a mintage of just over 16 million pieces, and the issue was not heavily saved by contemporary collectors. Certainly, none of the known survivors can match the quality and appeal of the coin offered here. Vibrant luster invigorates this spectacular MS68 specimen and an exacting strike leaves razor-sharp definition on the design elements. Crimson, forest-green, and yellow-gold patination is much deeper and more extensive on the obverse. Immaculately preserved throughout. The single finest certified specimen (11/12). PCCGS# 5821, NGC ID# 2456, CoinPlex ID# WQU1943D

Delightfully Toned MS68 1944-S Quarter

5615 1944-S MS68 PCGS Secure. CAC. Waves of gold, green, and blue roll across each side of this magnificently preserved World War II-era San Francisco quarter, while glimmers of lustrous silver remain in the unpatinated areas. The surfaces are near-perfect to the unaided eye, though a touch of striking softness is noted on the word IN of IN GOD WE TRUST. As one of just three PCGS-certified MS68 examples of the issue with none in MS68+ or numerically finer (11/12), this is an important piece for any collector looking to make serious strides in the PCGS Washington quarter Registry Sets.

From The David Poole Collection of Silver Washington Quarters.
PCGS# 5826, NGC ID# 245A, CoinPlex ID# WQU1944S

Magnificently Toned 1946-S Quarter PCGS-Leading MS68

5616 1946-S MS68 PCGS Secure. CAC. This dazzling MS68 example of an early postwar San Francisco issue exemplifies the collection's mix of high technical grade and eye-appealing charm. Delicately frosted high points give way to rolling cartwheel luster through the fields. Blue-to-gray overtones dominate the interiors, while the margins show gold to reddish-orange patina, those hues covering more of the reverse. A minuscule curving scrape to the left of the eagle's beak is one of the few post-striking faults visible to the unaided eye, and that only with searching. Population: 4 in 68, 0 finer (11/12).

From The David Poole Collection of Silver Washington Quarters.
PCGS# 5832, NGC ID# 245G, CoinPlex ID# WQU1946S

Singular MS68 1947-D Quarter

5617 1947-D MS68 PCGS. CAC. This is the *only* MS68-graded example of the 1947-D quarter in the combined certified population (11/12), and as such it represents a so-far unassailable trump in Registry Set collecting. Its future owner is sure to be delighted with its eye appeal even more so than the number on the tag. Both sides have frosty near-silver centers and dappled faded-denim patina around. Gold-to-orange border toning forms distinct bands on the obverse, while the reverse displays narrow arcs at the upper right and (to a far lesser extent) near the letters TE of QUARTER.

From The David Poole Collection of Silver Washington Quarters.
PCGS# 5834, NGC ID# 245J, CoinPlex ID# WQU1947D

Gorgeously Toned MS68 1948-S Quarter Sole Finest PCGS-Graded Example

5618 1948-S MS68 PCGS Secure. CAC. This is yet another coin of the collection with technical appeal that is simple to sum up: Population: 1 in 68, 0 finer (11/12). Of course, as with all coins in this group, there is plenty to meet the eye beyond the numbers on the tag. Booming luster rolls under rich and all-encompassing patina, mostly in warm colors such as reddish-orange and rose-gold but with elements of green and blue as well. While the detail on Washington's upper wig is soft, not uncommon for this issue, the all-around eye appeal is as hard to top as the coin's magnificent preservation.

From The David Poole Collection of Silver Washington Quarters.
PCGS# 5838, NGC ID# 245N, CoinPlex ID# WQU1948S

1949 Quarter, Beautifully Toned MS68 The Finest PCGS Coin of This Date

5619 1949 MS68 PCGS. CAC. The 1949, at 9.3 million coins struck, has the lowest mintage for a Philadelphia quarter since the 1932. The nearly perfect surfaces are virtually an afterthought on this spectacularly toned coin. The obverse is toned in rich shades of emerald-green, scarlet, and lemon-yellow that turns to lime-green. The reverse is mostly brilliant save for the lower periphery, which shows the same colors as the obverse but in thin rings. An outstanding coin. As the sole finest known, this piece will be of enormous interest to Registry Set collectors. Population: 1 in 68, 0 finer (11/12).
From The David Poole Collection of Silver Washington Quarters.
PCGS# 5839, NGC ID# 245P, CoinPlex ID# WQU1949

Colorful MS68 1949-D Quarter

5620 1949-D MS68 PCGS Secure. CAC. This is one of only two choices for a PCGS Registry Set collector seeking an MS68 example of the issue, and there are no finer examples at that service (11/12). In terms of raw eye appeal, it also stands at the peak among the survivors out of an issue of just over 10 million pieces. Near-silver luster occupies much of the upper obverse and lower reverse, while gold, peach, and plum hues drape the rest of the coin and a few splashes in the aforementioned areas. The detail is above-average for the issue, though not "sharp" in a modern sense, and only a few pinpoint flaws affect each side.

From The David Poole Collection of Silver Washington Quarters.
PCGS# 5840, NGC ID# 245R, CoinPlex ID# WQU1949D

Superb Gem 1962-D Quarter Tied for PCGS Finest

5621 1962-D MS67 PCGS. CAC. It is a paradox of certain issues late in the silver Washington quarter series that while they were minted in far greater quantities than many of their predecessors, in some cases they are unavailable in the same high grades. The Western Reserve Collection has many MS68 coins from the 1940s, for instance, but had to settle for an MS67 example of the 1962-D with its nine-figure mintage, for PCGS has graded only two coins at that level and none finer (11/12). Pale glints of gold and lemongrass patina settle over otherwise-silver surfaces with booming luster. A touch of striking distortion is noted on the word IN from the motto IN GOD WE TRUST.

From The David Poole Collection of Silver Washington Quarters.
PCGS# 5873, NGC ID# 246R, CoinPlex ID# WQU1962D

EARLY HALF DOLLARS

1794 Half Dollar, AU50 O-101a, Lower Condition Census Example

5622 1794 AU50 NGC. O-101a, R.4. The O-101 die variety is rather easily distinguished by the distinctive obverse, showing the lowest leftmost star piercing Liberty's bottommost hair curl at its midpoint — one of two similar obverses that show this characteristic — but on the present O-101, star 9 is distant from the Y in LIBERTY. On the very rare O-107, that star is relatively close to the Y. The reverse of the O-101 shows a pair of leaves between O and F, with the topmost leaf quite close to O. There are 21 berries on the reverse — 10 left, 11 right — the only such die for 1794 with that attribute. All known specimens show a heavy vertical die crack running from the rim to a leaf pair just left of the first S in STATES. In the later O-101a die state, as on the present AU specimen, there is a second die crack crossing from the rim through the F in OF to a second leaf pair, where it makes a sharp turn upward, crossing through the topmost single leaf on the right, to the last S in STATES, where it fades out.

This AU50 NGC-certified example of the O-101a is likely in the mid-Condition Census for the variety and die state, as far as we can discern. Our Permanent Auction Archives show more high-grade offerings of the O-101 up to Choice AU, unsurprisingly since we rank it at High R.3 (Stephen Herrman also ranks the O-101a at High R.3, but we believe it is a tad rarer). This piece is identifiable as lot 6150 in our Pittsburgh Signature (Heritage, 8/2004) by several milling marks beneath stars 6-8 and some planchet roughness in the date area. That 2004 offering brought \$48,300, a remarkably strong price at the time.

This piece shows even silver-gray color with a light golden overlay. Visible marks are few and light, and mostly confined to the fields on each side. The Steve Herrman census for O-101a places this piece as sixth finest for the die state.

Ex: Pittsburgh ANA (Heritage, 9/2004), lot 6150. NGC ID# 24000000, PCGS# 6051, CoinPlex ID# EHA1794

Choice AU 1796 16 Stars Half Dollar
O-102, Late Die State
Very Rare in AU

5623 1796 16 Stars AU55 PCGS. O-102, High R.5. Ex: Liberty Collection. The Draped Bust Small Eagle half dollars of 1796-1797, from a paltry mintage of 3,918 pieces, hold a special appeal for collectors of early American type coins. While not the most difficult type coin to acquire (that distinction goes to the 1796 No Stars and the 1808 quarter eagles with mintages of 963 pieces and 2,710 pieces, respectively), a case might be made for the 1796-1797 half as the most desirable of *all* U.S. design types. Perusal of retail and wholesale price guides indicates that the 1796-1797 half dollar has a higher type value in most grades than any other coin, including the 1796 No Stars and 1808 quarter eagles. While those one-year gold type coins claim a smaller mintage and fewer surviving examples, their lower grade-for-grade values suggest they are in less demand for type collections than the Draped Bust Small Eagle half dollar. A much larger number of collectors apparently prefer to assemble an early minor coin type set as opposed to a collection of early gold type coins.

Whatever the collector's goal with respect to metal content, a 1796 or 1797 half dollar is necessary for the completion of a type collection of U.S. coinage. The number of extant Draped Bust, Small Eagle half dollars thus limits the number of type sets that can possibly be assembled. A 12-year research project by Jon Amato analyzing plated numismatic auction sales and coin dealer fixed price lists indicates the number of surviving 1796-1797 half dollars to be on the order of 270 specimens (this research, edited by James Halperin and Mark Van Winkle, will be published by Heritage Auctions in the near future).

The foregoing research shows the vast majority of 1796-1797 half dollars to be in grades Extremely Fine and lower. Indeed, only 35 of the 270 surviving specimens (12.9%) fall into the About Uncirculated or Mint State grades. And of the AU pieces, only 10 are classified as AU55 or AU58. This Choice AU 1796 16 Stars presents an unparalleled opportunity for the discriminating collector to acquire an outstanding piece of Americana.

Both sides display silver-gray and lilac-gray patina, highlighted by blushes of lilac-tan at the lower-right reverse border. The design elements exhibit excellent definition, including strong detail in Liberty's hair and the eagle's wing and tail plumage, and the dentilation is complete except for localized weakness above B in LIBERTY. A heavy crack runs from the rim through the first four stars, indicating the coin's late die state (contrary to the often-held notion that this crack is present on most 1796 16 Star specimens, it is only seen on about one-third of surviving examples). Upper-right to lower-left adjustment marks extend from the right (facing) wing through the adjacent leg, cloud, and lower palm wreath. The surfaces are remarkably clean for a coin having seen brief circulation. A vertical toning streak on the bust above the 6 in the date and two, small scalloped marks below the eagle's beak will aid in pedigreeing the coin. This piece will be the hallmark of a high-grade type collection of U.S. coins.

1797 Half Dollar, Good Details
O-102, the Scarcest Variety
An Acceptable Lower-Grade Type Coin

5624 1797 — Reverse Repaired — NGC Details. Good. O-102, Low R.6. Draped Bust half dollars of 1796-1797 are always in demand, regardless of grade or surface condition. The present 1797 O-102 Good Details specimen is no exception. First, with a low R.6 rarity rating, the 1797 O-102 is the scarcest of the four Overton varieties (the 1796 15 stars is R.5, the 1796 16 stars is high R.5, and the 1797 O-101 is high R.4). This makes it especially attractive for early half dollar date/variety collectors. Second, the repair under the eagle's right (facing) wing is hardly noticeable, and does not hinder the coin's appearance in the least. Additionally, the borders of both sides are retoning a light golden-tan after a distant cleaning. Third, its extensively circulated condition makes it an "affordable" alternative to higher-priced examples in higher grades, an important consideration for collectors who need an acceptable piece in order to complete a set of U.S. type coins. We urge interested bidders not to be dissuaded by the NGC disclaimer, as our research shows that more than one-third of surviving specimens exhibit one or more impairments, many of which are more severe than that of the present coin.

Ex: Kreisberg and Schulman (3/1965), lot 309; Sale of the 70's (Kagin's, 11/1973), lot 436; Bowers and Merena (9/1992), lot 1336; Early American History Auctions (circa 5/2007), lot number unknown; Dick Osburn Rare Coins fixed price list (10/2007). NGC ID# 24EC, PCGS# 6060, CoinPlex ID# EHA1797

BUST HALF DOLLAR

1827/6 Half, Terrific MS67, O-102
Ex: Earle/Clapp/Eliasberg/Kaufman

5625 1827/6 MS67 NGC. O-102, R.1. *Ex: Eliasberg/Kaufman.* The bottom right side of the former 6 curves up to the right from the bottom of the 7. The overdated obverse die was used with three different reverse dies, and O-102 has the obverse stars lightly drawn to the edge. Faint "ear bar" clash marks are evident below the ear, but no other die defects are visible on the obverse. The reverse also has light clash marks but no other defects.

The 1827/6 O-102 is the most plentiful of the three overdate varieties, and the only one that can sometimes be found in Gem quality. This piece from the George Earle, John Clapp, and Louis Eliasberg collections is the only 1827/6 overdate that has been certified as a Superb Gem MS67. Incredibly, NGC has only graded one other 1827 half dollar in MS67, an example of the O-120a variety.

This satiny and lustrous Superb Gem is boldly detailed with excellent centering, better than usually seen. The color is lovely golden-brown on the obverse and lighter silver on the reverse, with outstanding iridescent accents on both sides. Today, this piece appears exactly as it did in the 1997 Eliasberg sale, and probably looks much the same as it did way back in 1912, when the George Earle Collection was sold.

Ex: George H. Earle (Henry Chapman, 6/1912); John H. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1827; Central States Signature (Heritage, 4/2009), lot 2437. NGC ID# 24FP, PCGS# 6147, CoinPlex ID# EHA-1827OVR6

EARLY HALF DOLLARS

1807 Draped Bust Half, SP65 One-Sided Specimen Striking Specially Struck and Carefully Preserved Example

5626 1807 Specimen MS65 PCGS. O-109, unique as a specimen strike. The superb, talented engraver Joseph Wright, designer of the Liberty Cap cent and half cent, was the first full-time engraver hired at the Philadelphia Mint. Tragically, he died in September 1793 during one of the annual yellow fever epidemics that killed so many early Philadelphia residents. Robert Scot was hired only two months later as chief engraver, a post he held until his death in 1823. Scot was born in 1744 and was already 50 years old when he began working for the Mint. Although Scot was later criticized for his modest talent and slow work style, among his improvements at the Mint were the use of device punches, for example, the whole head of Liberty, so that only the date, stars, and letters required addition to the working dies.

By 1807 Scot, then 63, faced serious competition from a younger rival, John Reich, who was much more talented judging from each man's artistic accomplishments. Breen writes in his *Complete Encyclopedia*:

"John Reich sold himself into indentured service to escape to the USA from the Napoleonic Wars. As early as 1801 his name came to official attention as one of the finest engravers in the country. Opposition from Robert Scot prevented the Mint from hiring him except for occasional odd temporary assignments. But in 1807, Scot's health (for which read failing eyesight) was a source of serious concern to officialdom; accordingly, the Mint hired Reich as assistant engraver at a pittance of \$600 per year.

"Reich's first assignment was to create new designs for gold and silver denominations: an insult to Scot. The first ones to benefit from Reich's attention were the denominations most in demand at banks: half dollars and half eagles."

In 1796 and 1797 only the the Draped Bust (a.k.a. Fillet Head) obverse was combined with the Small Eagle reverse, which was in turn replaced in 1801 by the Heraldic Eagle reverse, an imitation of the Great Seal of the United States. Both designs are attributed to Robert Scot. In 1807, when Reich joined the Mint as assistant engraver, the half dollar designs were modified yet again, this time to the familiar and ubiquitous Capped Bust or Turban Head design. Liberty now faced left and wore the Martha Washington-style "mob cap" on her head. The reverse features a more naturalistic eagle, although it bears a small shield attached to the center of its breast.

It is widely recognized that proof coins were sold in greatly increased numbers beginning in 1858. Prior to that time, proofs are rarely encountered. From 1792 to 1821 the Mint did not strike what we now call proofs. But the special care and unusual strike given to some of these pieces qualify them for Specimen Strike designation by PCGS. The Reed Hawn/Queller 1807 Draped Bust half is such a coin, and it is a piece that has been extensively studied by John Dannreuther. A recent email from JD yielded a two-page write-up titled "It Is What It Is," which follows.

"It is what it is. Sometimes, one encounters a numismatic anomaly and can do no more than simply shrug one's shoulders and say, 'It is what it is.' This may sound simplistic, but if you have encountered such a coin, you know what I am saying. Just such a coin was encountered at the Long Beach show in January/February (2004). I have seen other dates and denominations, but had not examined this particular coin. One-sided Proofs (and Specimens) are the numismatic anomaly to which I am referring. There was a time when I doubted that the Mint would intentionally strike such coins, but there are enough of them around that I became totally convinced that they indeed exist.

"When Adam Eckfeldt became Chief Coiner of the Philadelphia Mint in 1814, he could not have known that he would hold that position for so long. In fact, he was the longest tenured Chief Coiner and he was one of the longest serving Mint employees! He served 25 years in the capacity of Chief Coiner and for over 45 years was a valued member of the Mint personnel (1793-1839). We can thank Mr. Eckfeldt for the many superb examples of our earliest coinage, for just before he retired, he turned over all the 'special' coins he had made and kept. (Some of these coins were produced under the watch of the first Chief Coiner, Henry Voigt, but it appears that Adam Eckfeldt became the 'protector' of these coins when he assumed the Chief Coiner's role in 1814.) These coins formed the entire Mint Collection in 1838, as, before he 'donated' these coins, there was no Mint Collection! Most of these fabulous Specimens and Proofs are still in the Mint Collection, now called the National Numismatic Collection and entrusted to the care of the Smithsonian Institution. Only the items traded for Washingtonia and other numismatic items by Mint Director James Ross Snowden (and possibly some of his predecessors) are missing from the Eckfeldt/Voigt contribution.

“The first coin that made me realize that the Mint intentionally struck one-sided Proofs was the 1829 Large Planchet half eagle in the Bowers and Merena Virgil Brand Part 1 sale in 1983. This coin had been called a one-sided Proof as early as 1885! In the 1907 David S. Wilson sale by S.H. Chapman, the coin was called a Brilliant Proof on the obverse and Uncirculated on the reverse — it also had been so described in the 1885 J. Colvin Randall sale by William E. Woodward. Messrs. Woodward and Chapman were right, as the obverse planchet was burnished, the obverse die polished, and the coin was obviously specially struck. It also has had careful handling over the years (it has never been in contact with other coins) and is still in pristine condition — it now resides in the Harry Bass Core Collection that is on loan to the American Numismatic Association. This was the first coin that made me say, ‘It is what it is.’ I could not understand why it was made as a one-sided Proof, but I did suspect that it was one of the ‘traded’ coins from the Mint Collection, as the Smithsonian holdings include a superb Proof of the second type of 1829 half eagle (the Small Planchet coin struck in a close collar), but a business strike of the 1829 Large Planchet type.

“As with other probable ‘traded’ coins from the original Mint collection, it had been replaced by an inferior example. The other coins I suspect of having been ‘trade bait’ for Washingtonia and other numismatic collectibles are the 1793 Chain and Wreath cents in Specimen, the 1796 Specimen half dollar, and other examples where there are one or two Specimens/Proofs known and the National Collection has circulation strikes, usually of inferior quality.

“Over the years, other one-sided Specimens/Proofs have appeared in the marketplace. There is at least one 1836 one-sided Proof large cent and that coin has been certified as such by PCGS. The late Walter Breen, in his book on Proof coinage, mentions other large cents, half dollars, and other denominations that are reported in this unusual state. Each of these must be examined under today’s stricter interpretations of Specimen/Proof striking. Some will hold up, while others will not. However, the one recently examined does qualify as a one-sided Specimen — this coin also specifically mentioned by Walter Breen in his book on Proof coinage. The coin is a Draped Bust half dollar dated 1807.

“The fact that it was the last year of issue for this type — and also a year in which the type was changed mid-year — struck a familiar chord in my numismatic mind, or should I say, heart. The aforementioned 1829 half eagle represented a similar situation with the type changeover possibly the reason for the striking of a special coin. Just like the 1829 half eagle, the 1807 Draped Bust half dollar had the obverse planchet burnished, the obverse die polished, and was specially struck — possibly on the press used for dollars. It shows evidence of double striking on the obverse and has the sharpest stars of any Draped Bust half dollar seen. In fact one numismatist commented upon seeing this coin, ‘Is that real or is it a Gallery Mint Product?’ The 1807 half dollar examined shows no evidence of contact with other coins, thus leading to the conclusion that not only was it specially struck, it has been carefully handled by its owners. It is the most spectacular Draped Bust Heraldic Eagle half dollar the author has ever seen! It is what it is.

“Perhaps, it is a stretch to suppose that the 1807 half dollar and the 1829 half eagle exist for similar reasons. There are no Mint records to support this conclusion, but there also are no Mint records of most Proof coinage prior to 1859, when the production figures were first published. The only reason I can imagine to have struck this numismatic caviar would have been to preserve examples of discontinued coin series. Since it would be easier to polish one die and burnish one side of a planchet, perhaps simply time and effort account for their one-sided special striking status. Since the obverse almost always is the important side of the coin, perhaps it was the only side deemed necessary to specially strike. One can only surmise their purpose and marvel at their existence. It is what it is, or perhaps a better saying would be, ‘They are what they are.’ “

The obverse has an even layer of golden-blue patina, and the mirrored surfaces flash brightly through the color. The reverse is more deeply toned, with most of that side exhibiting cobalt-blue with a rose-colored center and brilliance at the top. This is a unique opportunity to acquire a coin from the earliest years of the Philadelphia Mint, a coin that was obviously made for some special purpose.

Ex: Reed Hawn Collection (Stack’s, 8/1973), lot 24; Stack’s (3/1996), lot 359; 65th Anniversary Sale (Stack’s, 10/2000), lot 902, misattributed as an O-108; Queller Family Collection of Half Dollars (Stack’s, 10/2002), lot 72; FUN Signature (Heritage, 1/2008), lot 2861; FUN Signature (Heritage, 1/2009), lot 3841, where it brought \$161,000.

PROOF BUST HALF DOLLARS

1818 Half Dollar, Amazing PR66 Profoundly Mirrored Deeply Toned Rare Early Proof

5627 1818 PR66 NGC. O-113, R.7 as a Proof. Ex: Eliasberg. Walter Breen lists only six proof half dollars from 1818, four of this variety and two overdates. Not all those pieces were examined by Breen, and in all likelihood several of those six pieces were prooflike business strikes. Which means, of course, that this date is even rarer than previously thought. This piece has been accepted as one of the few legitimate proofs since 1912, when Henry Chapman described it as: "Wide date. Proof. Short hairline scratch at throat. Sharp, even impression. Excessively rare." This hairline scratch is quite faint, but when angled just so can be seen (magnification helps also). What is perhaps the most striking aspect on this coin is the incredible detail that was captured by the screw press that struck it. The strike is full in all areas except one: Only star 13 shows any sign of weakness. The fields are also profoundly mirrored, but this is not immediately apparent as each side is so deeply patinated with multiple layerings of gray, rose, and golden toning with lavender around the margins. This is a wondrous example of an early proof Bust half, and as stated in the Eliasberg catalog, "Very few equals exist anywhere in the early American silver series."

Ex: George H. Earle Collection (Henry Chapman, 6/25-29/1912), lot 2888, where it brought \$5.75; John H. Clapp; Clapp Estate to Louis Eliasberg, Sr.; Eliasberg Collection (4/1997), lot 1756; Baltimore Signature (Heritage, 7/2003), lot 7526, where it brought \$85,750; FUN Signature (Heritage, 1/2008), lot 2871, where it realized \$126,500.

1821 SP67★ Bust Half Dollar Probably the Only O-103 Known in Proof Format

5628 1821 SP67★ NGC. O-103, R.2, R.8 as a Proof. The first appearance of this coin in one of our sales was in the January 2008 FUN Platinum Night sale, lot 2868, where it was cataloged as MS66 NGC. After considerable floor bidding from several knowledgeable experts, the coin sold for five times the price of other MS66 Capped Bust half dollars. These experts obviously understood the special nature of this remarkable piece, and it was subsequently encapsulated as a proof.

The reverse is identified by the missing left serifs to each E in the legend. NGC calls this piece a specimen but it has been called a proof on several past occasions. In 1990, Stack's called it "a self-evident proof." In his *Proof Encyclopedia*, Walter Breen noted that he had seen three proofs of this variety, except he mistakenly called it O-102, providing a description of that reverse die:

"Identifiable by a small cluster of rust pits below NI in UNITED. Newcomer—Col. Green, probably the piece Beistle saw. I have seen three, one of them being the Cass, 'Empire' coin, lot 1312, ex R.T. McPherson: 844, ex 1949 ANA Sale. Others probably exist. Reverse is 1820 E, used for proofs and business strikes in both years."

This piece is the specific McPherson, Empire coin that Breen mentioned. The problem with his description is that this is not O-102, but actually O-103, and therefore the reverse die is not the same as 1820 Reverse E that was used for O-106 of the earlier year.

While Breen mentioned the existence of several proof examples, we believe that this coin is the only proof O-103 that exists. It has been documented as a proof for over half a century, and possibly long before that.

It is a remarkable coin with deeply mirrored fields and frosty devices, with every detail boldly rendered. The surfaces are virtually perfect with no blemishes evident on each side. Marvelous old-time collection toning consists of intermingled blue, rose, amber, and iridescent toning on both sides. It exactly matches the appearance and pattern in the color plate of the 1990 Stack's catalog, and likely appears exactly as it did 50 or 60 years ago.

Ex: 1949 ANA; R.T. McPherson (*Stack's*, 2/1953), lot 844; *Empire Collection* (*Stack's*, 11/1957), lot 1312; *Stack's* (10/1990), lot 1648; *Heritage* (1/2008), lot 2868 as NGC MS66 (old holder); *National Money Show Signature* (*Heritage*, 3/2008), lot 650, where it brought \$115,000.

From *The Greensboro Collection, Part II*. PCGS# 6196, CoinPlex ID# EHP1821

1823 O-111 Half Dollar, PR63 The Norweb Specimen The Only Certified 1823 Proof

5629 1823 PR63 NGC. O-111, R.8 as a Proof. Several proof 1823 half dollars have been reported over the years, although few actually exist. PCGS has never certified a proof, and this specimen is the only proof 1823 that NGC has certified. We believe that this piece and the Eliasberg O-112 half dollar are the only two proofs that exist for the date. One other specimen that appeared in a September 1996 auction has a polished obverse and proof reverse, and may have originated as a “one-sided” proof. Walter Breen mentioned just one proof from the Levick and Cleneay collections, and past catalogs have suggested that this Norweb specimen and the piece in the Cleneay sale might be the same, except they are from different obverse dies. Only the obverse appears in the Cleneay plate, and it appears to match the O-112 obverse.

Although the stars at the right and the eagle’s claws are flat, all other design elements are quite boldly defined on this splendid Select proof. This piece has exceptionally deep mirrors with quite a different “look” to it than a prooflike business strike. Both sides show light golden toning and the devices have a moderate amount of frost which provides modest contrast on each side. A tiny dark spot at the back of the cap, just below the point of star 8, will serve as a subtle pedigree marker. A faint hairline is evident from the M in AMERICA past the corner of the scroll. This piece will be a star in any cabinet of important early U.S. coins.

Ex: B. Max Mehl (11/1954), lot 230; Norweb Collection (Bowers and Merena, 11/1988), lot 3079; FUN Signature Sale (Heritage, 1/1996), lot 149; Central States Signature Sale (Heritage, 4/2011), lot 1154.

From The Greensboro Collection, Part II. PCGS# 6198, CoinPlex ID# EHP1823

1825 O-113 Half Dollar, PR62 Extremely Rare Proof Underrated in the Past

5630 1825 PR62 PCGS. O-113, R.8 as a Proof. In the autumn 2012 revision of his early half dollar auction analysis, Stephen Herman records four appearances of the 1825 O-113 half in proof, with four other appearances of 1825 O-116 proof half dollars. However, the eight auction appearances represent only two different coins, and one of those is now considered a Prooflike Mint State piece. The PCGS *Population Report* shows two examples certified PR62, possibly representing a resubmission of this piece, and the NGC *Census Report* shows one example certified PR66. More research is necessary; however, we believe that only two or three proof 1825 half dollars exist.

The Queller O-113 was called proof when offered in a January 1974 Stack's auction, but that firm reclassified the coin as a presentation or specimen strike in its October 2002 sale of the Queller Collection. The Byers O-116 half dollar, called proof in the past, is NGC-certified as MS64 Prooflike and is likely not a proof. That coin appeared in: Lester Merkin (2/1971), lot 703; Stack's (3/1996), lot 364; Byers Collection (Stack's, 10/2006), lot 1059; Stack's (3/2007), lot 808; Bowers and Merena (1/2008), lot 195.

Walter Breen described several proof 1825 half dollars in his *Proof Encyclopedia*. However, with the exception of the Byers coin, none of the pieces that Breen recorded have been seen since before the 1970s, and are doubted today. He specifically mentioned a coin owned by Eric Newman that might be a proof, and he also mentioned a piece owned by a "New York State specialist" who was John Jay Pittman. Only two 1825 half dollars appeared in the Pittman sales, both graded AU.

The fields are fully mirrored with no indication of mint luster, framing the sharply defined portrait and eagle, while the peripheral details including the stars, letters, and eagle's claws are lightly impressed. Attractive cobalt-blue, olive, and rose-gold toning appears on each side.

Ex: Skiles Collection (Mid-American, 5/1986), lot 910; FUN Sale (Mid-American, 1/1987), lot 1513; Boys Town Sale (Superior, 5/1990), lot 3796; Long Beach Signature Sale (Heritage, 5/2008), lot 606.

Near-Gem Proof 1826 Half Dollar, O-101 A Remarkable Offering

5631 1826 PR64 PCGS. O-101, R.8 as a Proof. We believe that only two or possibly three proof 1826 O-101 half dollars exist, along with two proof O-102 half dollars. Creating an exact census of early proof coins, especially among Capped Bust half dollars, is extremely challenging, as many prooflike business strikes have been called proofs in the past. Even famous numismatic researcher Walter Breen was incorrect regarding some coins that he called proofs. In the Pittman catalog, David Akers writes:

"Attributions and pedigrees, and even whether or not a particular coin is actually a Proof, can be very confusing when it comes to the area of early Proof coinage. For this reason, it is very difficult to determine exactly how many Proofs exist of any given issue and which varieties are actually known in Proof."

Akers continued with a census of proof 1826 half dollars, which we have updated here:

1. **O-101 PR65 NGC.** Thomas Cleneay (Samuel and Henry Chapman, 12/1890), lot 1162; Colonel E.H.R. Green; Adolph Freidman Collection of Half Dollars/1946 ANA (Abe Kosoff), lot 786; Gustav Lichtenfels Collection (Kreisberg-Schulman, 2/1961), lot 2763; John Jay Pittman (David Akers, 5/1998), lot 1485; Heritage (1/2006), lot 3187; Heritage (1/2013), next lot.
2. **O-101 PR64 PCGS.** 1997 ANA (Heritage, 8/1997), lot 6351; 2005 ANA Sale (Heritage, 7/2005), lot 10206; 2012 FUN (Heritage, 1/2012), lot 3231. **The present specimen.**
3. **O-102 PR63 Uncertified.** Heritage (9/1996), lot 5600. Believed to be ex: Ira Reed; T. James Clarke (New Netherlands, 47th Sale).
4. **O-102 PR60.** Gilhousen Collection (Superior, 10/1973), lot 930; Ruby Collection (Superior, 2/1975), lot 696; Hoffecker Collection (Superior, 2/1987), lot 3154; Worrell Collection (Superior (9/1993), lot 1279.
- A. Proof.** Allenburger Collection; McPherson Collection (Stack's, 2/1953); Empire Collection (Stack's, 11/1957), lot 1320. Unplated in the Empire catalog.

One of the most appealing aspects of this rarity is the phenomenal color. The margins have splendid cobalt-blue accents while the centers are primarily pearl-gray and golden-rose. The major design elements are frosted and provide ample contrast with the subtly reflective fields. Beneath the bust of Liberty, faint pinscratches extend nearly to the date, and they will serve to identify this coin in the future. An important rarity for the advanced Bust half dollar collector. PCGS# 6203, CoinPlex ID# EHP1826

1826 O-101 Half Dollar, PR65 Ex: Pittman Collection

5632 1826 PR65 NGC. O-101, R.8 as a Proof. There is no doubt that this Gem proof from the Pittman Collection, with a provenance dating to the late 19th century, is a proof strike. Every aspect of this coin is exactly what is expected of proof Capped Bust half dollars. Proof 1826 half dollars are quite rare, with less than half a dozen known. PCGS has certified one PR64 and two PR62 examples, and NGC has graded this PR65 example and no others.

The Norweb, Eliasberg, Queller, and Byers collections all lacked a proof of this date. Although Walter Breen recorded five pieces that he felt were proofs, none of those have been seen since the early 1970s, except for this Gem specimen. When we offered this piece seven years ago, we listed three possible proofs, although one of those, the Ruby coin, sold for a mere \$2,530 in 1993, the price suggesting its nonproof status. Like others from the same era, more research is needed, but we believe that there are only two or three surviving proof 1826 half dollars.

This exceptional coin shows strike definition and depth of mirrors comparable to proofs struck 30 years later. Every line of the star centrils is complete, as are all of Liberty's hair curls and the eagle's plumage. A magnifier is required to see the few light hairlines on the delicate mirrored surfaces. Both sides are brilliant with a slight accent of golden-brown at the margins. The diagonal toning line on the obverse will identify this specimen in the future. Outstanding quality and eye appeal provide an important opportunity for the connoisseur.

Ex: Thomas Cleneay (Samuel and Henry Chapman, 12/1890), lot 1162; Colonel E.H.R. Green; Adolph Freidman Collection; 1946 ANA (Abe Kosoff), lot 786; Kreisberg-Schulman (2/1961), lot 2763; John Jay Pittman (David Akers, 5/1998), lot 1485; FUN Signature (Heritage, 1/2006), lot 3187.

From The Greensboro Collection, Part II. PCGS# 6203, CoinPlex ID# EHP1826

1827 PR66 Bust Half Dollar
A 'Museum Quality' Specimen
Second-Finest of Just Five or Six Proofs Known

5633 1827 PR66 PCGS. CAC. O-121, High R.7 as a Proof. Considerable verbiage over the years has addressed the number of proof 1827 half dollars known, and today we are no closer to an accurate census, although we may conclude the number is quite small. In his *Encyclopedia of United States and Colonial Proof Coins*, Walter Breen concluded that "at least four different specimens exist, possibly as many as seven." Our own review of auction records suggests a similar total population, including one example of O-107, three to five examples of O-121, and possibly one example of O-143, although notes in our roster will provide further details.

Proof strikes of any date or denomination prior to the steam press era that began in 1836 are great rarities, numismatic masterpieces that only appear in the finest collections. The present piece is one of those masterpieces that will see spirited bidding competition. Exhibiting a bold strike, this specimen has flawless, deep mirrored fields and delicate cameo contrast that is visible through its lovely gold and iridescent toning. We are unable to improve upon the words of David Akers in 1990: "If the expression 'museum quality' could be applied to any item in this sale, this would certainly be a prime candidate. It would be the centerpiece of the finest possible collection of U.S. coins."

Roster of Known Proof or Possible Proof 1827 Half Dollars

O-107. Just one PCGS certified example is known today, and it was plated in Breen's *Proof Encyclopedia*.

—**PR64 PCGS.** Lester Merkin (9/1967), lot 255; later, Heritage (8/2007), lot 1682. Identifiable as the plate coin by a slightly angling toning streak on the left side of the reverse.

O-121. Four different specimens have been described as proofs over the last three decades, including the present specimen, the second finest of those four coins.

—**PR68 NGC.** George H. Earle Collection (Henry Chapman, 6/1912), lot 2927; John H. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1831; Heritage (1/2004), lot 2078; Goldberg Coins (2/2006), lot 1468. The Eliasberg specimen is an undoubted proof strike, and far the finest known 1827 proof half dollar.

—**PR66 PCGS.** Auction '83 (Stack's, 7/1983), lot 690; Superior (1/1988), lot 1768; Auction '90 (David Akers, 8/1990), lot 1599; RARCOA and Akers (8/1991), lot 532; Chicago Signature (Heritage, 8/2011), lot 7157, where it brought \$161,000. **The present specimen**, an undoubted Premium Gem proof.

—**PR64 NGC.** Heritage (6/2001), lot 2309; Heritage (11/2001), lot 5883

—**PR64 (MS66 PCGS).** Joseph J. Mickley; Reichardt and Reakirt Families; Columbus Stamp & Coin Co.; Norweb Collection (Bowers and Merena, 11/1988), lot 3088; Bowers and Merena (5/1993), lot 293. Offered as a proof in the Norweb sale and the 1993 Bowers and Merena sale, this piece was certified as Mint State by PCGS.

O-143. Just one example has been called a proof in the past, but its proof status is open to some debate today.

—**Possible Proof.** Allenburger Sale (1948); McPherson Collection (1953); Charles A. Cass Collection; Empire Sale (Stack's, 11/1957); Stack's (10/1998), lot 356. Stack's cataloged this piece as a proof in 1957, although they hesitated to call it a proof in 1998, commenting: "There is little doubt that, as is the case with this piece, coins were on rare occasion struck in a manner which indicates a greater degree of care and special preparation. Whether the term 'proof' applies to such coins is open to some discussion."

From The Greensboro Collection, Part II. PCGS# 6205, CoinPlex ID# EHP1827

1829 PR66 Bust Half Dollar
Unique O-107 Proof Striking
Ex: Elder-Ryder-Raymond-Pittman

5634 1829 PR66 NGC. O-107, R.4 for the variety, apparently unique as a proof. Ex: Pittman. In his catalog description of the Pittman Collection, David Akers reported that this coin may be the only existing proof example of the O-107 die marriage. Perhaps only three other proof half dollars of this date are known, including the Norweb O-108 and O-112 half dollars, and an O-111 variety certified PR63 by NGC. There may be only four total 1829 proof half dollars, and each one appears to be a different variety. This is the finest proof known for the date.

The problem facing numismatic researchers trying to establish a proof census of early issues such as this is the existence of deceptive prooflike examples and the willingness of earlier catalogers to describe such pieces as proof coins. Many past auction offerings describe coins as proofs when they are clearly just prooflike business strikes. In today's world of certified coins, the problems in proper attribution of proof coins have largely been eliminated, although there can still be differences of opinion. In some cases, it is only the price that a buyer is willing to pay that provides a clue. For example, the 1829 O-111 in the Eliasberg catalog was called a proof by Henry Chapman in 1912, yet was described as a prooflike business strike by Bowers in the 1997 sale of that collection. The coin, which was graded MS63 Prooflike, realized nearly \$30,000, suggesting that at least two prospective buyers both felt that it is a proof.

Both sides of this piece are fully detailed with completely mirrored fields and lustrous devices. These characteristics are subdued by lilac-gray and peripheral blue toning, the central design motifs highlighted by light gold color. Die lines at the bust tip are fully visible and a thin die crack connects the low curl to the border right of the final digit in the date.

Ex: Thomas Elder's 67th Sale (10/1912); Hillyer Ryder (1945); Wayte Raymond; New Netherlands 50th Sale (12/1957), lot 588; John Jay Pittman (David Akers, 5/1998), lot 1491, where it realized \$46,750; FUN Signature (Heritage, 1/1999), lot 6741, unsold; American Numismatic Rarities (1/2004), lot 1473; FUN Signature (Heritage, 1/2007), lot 974, where it brought \$69,000.

From The Greensboro Collection, Part II. PCGS# 6208, CoinPlex ID# EHP1829

1830 O-103 Half Dollar, PR62 Cameo Five Known 1830 Proof Half Dollars From Five Different Die Pairs

5635 1830 PR62 Cameo PCGS. CAC. O-103, R.8 as a Proof. Although quite a number of auction appearances for proof 1830 half dollars are recorded, there are only five known proofs, and each is from a different die pair:

1830 Proof Half Dollar Roster

—**O-103 Proof 62 Cameo PCGS. The present specimen.** Heritage (10/1989), lot 602; Superior (1/1990), lot 3531; Superior (8/1991), lot 509; Pittsburgh Signature (Heritage, 8/2004), lot 6215.

—**O-108 PR65 Uncertified.** Dr. Christian Allenburger (B. Max Mehl, 3/1948), lot 865; John Jay Pittman (David Akers, 5/1998), lot 1494; Stack's and ANR (6/2004), lot 4360.

—**O-110 Brilliant Proof.** Lester Merkin (2/1971), lot 720; Reed Hawn Sale (Stack's, 8/1973), lot 93; Stack's (2/1982), lot 1589.

—**O-111 Proof 64 NGC.** Bowers and Ruddy (5/1973), lot 837; Gary Burghoff Collection (Superior, 1/1980), lot 205; Bowers and Merena (11/1994), lot 2252; Bowers and Merena (8/1999), lot 125; Bowers and Merena (8/2000), lot 4111; Goldberg Coins (2/2002), lot 966; Bowers and Merena (8/2003), lot 1503; FUN Signature (Heritage, 1/2005), lot 30217.

—**O-117 Proof 63.** ANA Sale (Kagin's, 7/1977), lot 1460; Auction '84 (Paramount, 7/1984), lot 663; Superior (2/1987), lot 3158; Bowers and Merena (1/1992), lot 347; George "Buddy" Byers (Stack's, 10/2006), lot 1075.

The bright surfaces of this example are faintly toned in a soft gold color, and a mild cameo contrast is established between the lightly frosted devices and the proof finish on the fields. The design elements are sharply struck, save for softness in the star centers along the right obverse border, and on the upper arrowhead. The milling is virtually complete on both sides, and the design features are nicely centered on the planchet. No significant contact marks are apparent on either side, though a few wispy hairlines in the fields preclude a higher grade. This will be a marvelous addition to a Capped Bust half dollar collection.

Ex: Heritage (10/1989), lot 602; Superior (1/1990), lot 3531; Superior (8/1991), lot 509; Pittsburgh Signature Sale (Heritage, 8/2004), lot 6215.

From The Greensboro Collection, Part II. PCGS# 86209

1831 O-103 Half Dollar, PR65

Ex: Pittman Collection

5636 1831 PR65 NGC. O-103, R.8 as a Proof. This piece is an unquestionable, deeply reflective proof striking that looks as much like a proof as any late 19th century or early 20th century silver proof. The fields are glassy-smooth and deeply reflective. The striking details are fully brought up in all areas, including all the star radials, Liberty's hair curls, and the eagle's feathers. There is a series of parallel, shallow lines on the cheek of Liberty that appeared during the minting process.

A number of 1831 half dollars have appeared in auctions over many years, yet only two examples seem to have claim to proof status. The two pieces are the present coin, and the specimen that appeared as lot 155 in Auction '79.

The surfaces are marvelously clean for a proof striking from this time period and the only mentionable flaws, other than the Mint-made ones on the cheek of Liberty, are a thin staple scratch over the eagle's right (facing) wing, and a light scuff in the field above star 1. Generally brilliant throughout, there is just a bit of light golden color around the peripheries on each side. A rare opportunity to acquire what is undoubtedly one of the finest proof Bust halves as well as one of the rarest dates in proof format.

Ex: Samuel H. Chapman, as part of a complete proof set, one of only two complete sets known to him; to Dr. C.A. Allenburger; Allenburger Sale (B. Max Mehl, 3/1948), lot 871, where it sold for \$58.50 to John Jay Pittman; Pittman II (David Akers, 5/1998), lot 1495, where it brought \$46,200.

From The Greensboro Collection, Part II. PCGS# 6210, CoinPlex ID# EHP1831

1832 O-122 Half Dollar, PR63 Only Nine 1832 Proofs Known

5637 1832 PR63 NGC. O-122, R.8 as a Proof. There are approximately nine proof 1832 half dollars known, as best we can determine. Those nine coins include two examples of O-106, two examples of O-122, and five examples of the proof-only O-123 rarity.

Boldly detailed as expected, with slight luster on the devices, and deeply mirrored fields on both sides. The central obverse and reverse exhibit pale gray-gold color, framed by splendid sky blue peripheral toning. It is reasonable to expect a few tiny ticks and faint hairlines on each side. Otherwise, the grade assigned by NGC would certainly be higher.

The following roster of 1832 proof half dollars is based in part on the database published twice a year by Stephen Herrman.

O-106

—**PR65 NGC.** Superior (5/2006), lot 582.

—**PR63.** Garrett Collection (Bowers and Ruddy, 11/1979), lot 322.

O-122

—**PR67 NGC.** Pittman Collection (David Akers, 5/1998), lot 1499; Bowers and Merena (8/1999), lot 197; Bowers and Merena (11/2002), lot 1465; Bowers and Merena (8/2006), lot 3344.

—**PR63 NGC.** The present specimen. Earlier from Stack's (2/1980), lot 910; FUN Signature (Heritage, 1/2008), lot 2873.

O-123

—**PR68 NGC.** Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1881.

—**PR63 PCGS.** Christian Allenburger (B. Max Mehl, 5/1948), lot 880; Harold Bareford (Stack's, 1981), lot 386; later Sheridan Downey (5/1994), lot 8; Sheridan Downey (8/2001), lot 14; Russell J. Logan (Bowers and Merena, 11/2002), lot 2691.

—**PR60.** National Numismatic Collection; Smithsonian Institution.

—**PR55.** Charlton E. Meyer, Jr.

—**PR45.** Sheridan Downey (8/2004), lot 18.

There are likely a few other older auction references not included above, but we believe the roster is virtually complete. This remarkable specimen will enjoy enthusiastic appreciation from connoisseurs of the Capped Bust half dollars.

From The Greensboro Collection, Part II. PCGS# 6212, CoinPlex ID# EHP1832

1834 O-101 Half Dollar, PR67 The Floyd Starr Specimen Finest Certified Original Proof

5638 1834 PR67 NGC. O-101, R.7 as a Proof. We are unaware of any detailed census listings of proof Capped Bust half dollars, but such a record would only include a small number of 1834 proof halves, certainly less than a dozen of all varieties. Perhaps five proofs are known of the Crushed Lettered Edge type that are sometimes called Restrikes, and only five or six other proofs, usually described as Originals, are known from four different die pairings.

Differentiating between proofs and prooflike pieces among old catalog listings is challenging, although many times the price realized will reflect on the status. For example, an 1834 half dollar called a proof in a 1992 sale realizing \$1,760 was probably not a proof. Alternatively, a prooflike 1834 half dollar that realized \$16,500 in 1998 was almost certainly a true proof. An updated review of all early proof coins, copper, silver, and gold, would prove an extremely worthwhile undertaking.

The combined reports of NGC and PCGS indicate that 13 submissions of 1834 half dollars have been certified as proof (11/12), including Originals, Restrikes, and resubmissions. This coin and a single CLE specimen are NGC-certified PR67, and they are the finest known proofs of the date.

The design elements are exquisitely struck, with excellent definition in the star centers, save for softness in the first three, in Liberty's hair and clasp, on the eagle's plumage, and in all of the letters of the ribbon motto. A melange of electric-blue, gold-tan, and lavender toning bathes both obverse and reverse. Impeccable preservation characterizes each face.

Ex: B. Max Mehl (12/1939); Floyd T. Starr (Stack's, 10/1992), lot 541; FUN Signature (Heritage, 1/2007), lot 975.

From The Greensboro Collection, Part II. PCGS# 6217, CoinPlex ID# EHP1834

1835 O-110 Half Dollar, PR64 Ex: George 'Buddy' Byers Collection

5639 1835 PR64 NGC. O-110, R.8 as a Proof. Both Original and Crushed Lettered Edge Restrike proof half dollars are known for 1835, and they are extremely rare, even moreso than for 1834. Just six 1835 proof half dollars are certified at NGC and PCGS, including four originals and two restrikes (11/12). Three of the four originals are graded PR64, and the fourth is PR62. The two restrikes are called PR65 and PR63. The total population of existing proofs probably numbers about eight or nine pieces, including about half a dozen originals and two or three proof restrikes. Those original 1835 proofs are from four different die pairs, O-101, 106, 109, and 110.

For the half dollar series, the most valuable source of information today is *Auction & Mail Bid Prices Realized for Bust Half Dollars* by Stephen J. Herrman. This record of auction results is updated twice a year, and includes recent sale information for all proofs. Combining this record with Breen's *Proof Encyclopedia* and pedigree notes included in auction catalogs over the past 30 years, a census can be compiled, although it is a time-consuming venture.

This piece has deeply mirrored fields and light cameo contrast beneath steel, gold, and blue toning, with a few marks above the date to aid pedigree research. A few of the hair curls are weak, but most other details are boldly rendered.

Ex: *Stack's* (1/1998), lot 1203; *George Byers Collection* (*Stack's*, 10/2006), lot 1089; *Milwaukee ANA Signature* (*Heritage*, 8/2007), lot 1684.

From *The Greensboro Collection, Part II*. PCGS# 6219, CoinPlex ID# EHP1835

1836 O-116 Half, PR65 50 Over 00 Reverse

5640 1836 50/00 Lettered Edge PR65 PCGS. O-116, R.7 as a Proof. Four different varieties of 1836 Lettered Edge half dollars are known in proof, and the 1836 Reeded Edge half dollars are also known in proof, an example also offered in the present sale. It is intriguing that two of the four proof varieties are blundered die varieties. Two or three proof examples are known of O-108, the 1836 over 1336 variety, and perhaps half a dozen proof examples of the present variety, the 50 over 00 reverse, are known. In addition to those proofs, two or three O-101 proofs are known, along with three or four proof O-109 half dollars.

This example is tied for the finest PCGS-certified proof 1836 Lettered Edge half dollars, the 10 certified pieces including five PR63, one PR64, one PR64 Cameo, two PR65, and one PR65 Cameo (11/12). NGC has certified eight 1836 Lettered Edge proofs, including two PR63, five PR64, and in PR67.

A splendid Gem proof striking of this important and highly collectible Capped Bust half dollar, The fields are deeply mirrored and each side is covered with rich cobalt-blue and gray toning. There are no mentionable contact marks on either side, and the only strike weakness is on the upper obverse stars and at the lower reverse. A rare and important opportunity to acquire this highly collectible, blundered denomination half dollar in proof format.

Ex: Dallas Signature (Heritage, 10/2006), lot 1155.

From The Greensboro Collection, Part II. PCGS# 6221, CoinPlex ID# EHP1836LE

1836 Lettered Edge Bust Half, PR67 O-109, Rarely Seen in Proof Format

5641 1836 Lettered Edge PR67 NGC. O-109, R.3. The Overton variety is attributed by these diagnostics: the sharp spike on the outer point of star 7; the 183 of the date are even at the bottom, but 3 is lower at the top; the olive stem is entirely over the top of the C in 50 C.; the 5 has a straight top, and the loop is nearly closed; and the I of PLURIBUS is left of the T in STATES.

Our records indicate that the Lettered Edge proof half dollar has made about 30 appearances at public sales over the last 35 years. NGC and PCGS combined have certified 15 specimens; the coin offered here is one of the two finest. An unequivocal proof striking with glassy fields and razor-sharp definition. Liberty's hair and the eagle's feathers are crisply delineated, as are the star centers, with the exception of star 7, which is somewhat soft. The field-to-motif contrast is notable when the coin is tilted beneath a light source, although no contrast is noted on the NGC insert. The obverse is bathed in iridescent gunmetal-blue and lavender patina in the center, and light gold and lavender around the periphery. The reverse center is dominated by a melange of electric-blue, golden-brown, and crimson, while the margins are a bright cobalt-blue and yellow-gold. The surfaces are immaculately preserved, exhibiting no mentionable marks.

Ex: FUN Signature (Heritage, 1/2006), lot 3189, where it brought \$109,250.

PROOF REEDED EDGE HALF DOLLARS

1836 Reeded Edge Half, PR65 Important Numismatic Rarity

5642 1836 Reeded Edge PR65 NGC. This is a classic rarity in U.S. numismatics and a key to the Reeded Edge half dollar series. With about a dozen examples known, the 1836 half dollar is actually the most plentiful of the four-year Capped Bust, Reeded Edge series in proof format, while it is by far the rarest as a business strike.

This is one of the first proofs struck using the new steam presses installed at the Mint in 1836. These new presses allowed the use of a close collar and made the production of consistently higher-quality coins a realistic goal. To quote Mint Director Robert Maskell Patterson, "this is struck in a close collar, which makes the edge of pieces thicker, and gives a mathematical equality to the diameters."

This is a splendid proof striking. The fields are very deeply mirrored and almost imperceptibly hairlined. Each side is covered with deep shades of blue-gray and golden-rose toning. The outer margins of the coin are a bit darker in hue. The central striking details are unusually strong with finely detailed hair curls on Liberty and fully articulated plumage on the eagle. Frosty luster remains visible beneath the toning on the central devices. The stars on the obverse, however, are quite weak and incomplete for a proof striking. An extraordinary proof striking of one of the most numismatically desirable coins from the 19th century. Census: 2 in 65, 0 finer (11/12).

From The Greensboro Collection, Part II. PCGS# 6223, CoinPlex ID# EHP1836RE

1837 Reeded Edge Half, PR62 The Only Certified Proof

5643 1837 Reeded Edge PR62 NGC. The 1837 is an extremely rare Reeded Edge proof half dollar with only three or four known specimens, from a small but unknown mintage. This is the second appearance of this specimen in our sales, and just one other proof appeared in a Stack's sale in October 2004.

Splashes of reddish-gold dominate both sides, and occasional whispers of electric-blue and lavender gravitate to the margins. The bold definition on the design elements is the result of a sharp strike, and luminous surfaces reveal some light, inoffensive hairlines interspersed with die polish lines in the fields. A faint scratch between stars 5 and 6, along with a minute contact on Liberty's neck, serves to identify the coin. Overall, a sharp piece with nice eye appeal.

NGC has certified this proof example, along with another 1837 half dollar that they describe as Specimen 65, while PCGS has never certified a proof. This piece is the only certified proof 1837 half dollar known to the grading services (11/12).

From The Greensboro Collection, Part II. PCGS# 6224, CoinPlex ID# EHP1837RE

1838-O Reeded Edge Half Dollar, PR64BM Classic Rarity, Only Nine Examples Traced None Certified in Higher Numeric Grades

5644 1838-O PR64BM PCGS. The “BM” designation stands for “Branch Mint,” signifying that PCGS recognizes this coin as a proof strike. The 1838-O Reeded Edge half dollar ranks among the most famous of all American coinage issues, comparable in value and rarity to such iconic branch-mint issues as the 1894-S dime and the 1870-S silver dollar. The inclusion of an example in a collection enshrines the owner in the elite ranks of American numismatists.

The official report from the New Orleans Mint indicates no half dollars were struck at that facility in 1838. This lack of official documentation has resulted in much confusion over the years, with several ingenious theories introduced to explain the existence of the coins, which everyone agrees were not struck at New Orleans in 1838. Recent discoveries by several researchers have caused a change of thinking about the origins of the 1838-O and its fundamental nature. In the recently published monograph *The Surprising History of the 1838-O Half Dollar*, Heritage numismatists David Stone and Mark Van Winkle present evidence that the 1838-O was struck on two occasions, with Originals struck in early 1838 at the Philadelphia Mint as *essais*, to test the dies, and Restrikes made in January 1839 at the New Orleans Mint, to test a newly arrived coin press.

The design of the half dollar was constantly evolving in the late 1830s. The Reeded Edge design took over from the Lettered Edge type with the advent of close-collar technology, beginning in 1836. Modifications continued to be made until the Seated Liberty design was finally adopted in 1839. The reverse design was changed in 1838, with the denomination expressed as HALF DOL. instead of the 50 CENTS inscription of previous years. Thicker letters were used in the legend, and a few minor stylistic changes were made to the eagle as well. One of the most important changes took place on the obverse, where a prominent O mintmark was placed above the date.

The United States had never issued a coin with a mintmark before this time, as the branch mints were not ready to commence operations before 1838. Great significance was attached to the mintmark at this juncture, and we believe its importance was one of the key factors that led to delaying the adoption of the Seated Liberty design on the half dollar. The other silver denominations had already shifted to Gobrecht’s popular design by this time, half dimes and dimes in 1837 and quarters in 1838. Apparently, the powers that be wanted to showcase the new mintmarks on the half dollar, as the highest silver denomination being produced at the time, and the gold issues, all of which have the distinctive obverse mintmark. The Seated Liberty design would not allow for the central placement of the mintmark above the date; it would have to be placed on one side of the central design element or the other. Therefore, the Mint decided to retain the Capped Bust obverse for another two years. By late 1839 the novelty of mintmarks had worn off, the Seated Liberty design was adopted on the half dollar to present a uniform design on silver coinage, and the mintmark was moved to the reverse on both silver and gold issues. We believe that 8-10 1838-O half dollars were struck in the early months of that year as prototypes, or *essai* pieces, to demonstrate the new design. Years later, when cataloging an example of the 1838-O for one of his sales, coin dealer Ed Frossard insisted the coins were “struck at Philadelphia as a pattern for the Orleans mint, which did not begin operations till the following year.”

Once the design was finalized, two sets of half dollar dies were shipped to New Orleans, arriving there by May 3, 1838. Unfortunately, there were crippling difficulties involved in the initial coinage operations there. The New Orleans Mint was initially supposed to be equipped with screw presses, but this was changed to steam-powered presses at the last moment. This move was undoubtedly the correct one in the long run, but for some reason, the staff experienced great difficulties in operating their new equipment.

The first coins delivered at the new mint were a tiny run of 30 dimes on May 8, 1838, after which the press promptly broke down. It took some time to fix the problem, and the press continued to break down at short intervals throughout the year. The New Orleans Mint closed down from August 2 to November 1, due to the annual outbreak of yellow fever. By the end of the year, the detailed mint report indicates only 402,434 dimes had been produced at the new facility, and no attempt had been made to use the half dollar dies during the year. A few half dimes may also have been struck, but they were not delivered until January 16, 1839.

A fascinating post by R.W. Julian on the Collectors Universe message boards in late 2010 disclosed the contents of several letters between Chief Coiner Rufus Tyler of the New Orleans Mint, and others, and Mint Director Robert M. Patterson in Philadelphia. The most informative letter includes the following passages describing how Tyler used the 1838-O half dollar dies to test a larger coin press that had recently arrived in New Orleans:

“U.S. Branch Mint, New Orleans

February 25, 1839

“Dear Sir,

I mentioned in both of my former letters that the half dollar dies sent us last year are unsuited for present use for, besides being out of date, the bottom ones are too short to reach the screws and consequently cannot be secured in the press. I have however ...[illegible]... to one of them in order to try the press and succeeded in making ten excellent impressions, the very first one struck being as perfect as the dies and entirely satisfactory. The piece on the bottom of the die became loose and I was unable to strike any more without further fixing.

[The rest of the letter deals with other matters.]

"I am, sir, with great respect
Rufus Tyler"

The time frame for Tyler's striking is more precisely established in another letter to Patterson from Superintendent David Bradford on March 7, 1839, which reports, "About the middle of January Mr. Tyler struck a few pieces in the large press." Bradford indicated that 1839-dated dies had not arrived at the New Orleans Mint, explaining why Tyler used the 1838 dies for his press trial.

Tyler wrote another letter shortly afterward, accompanying an example of the 1838-O half dollar that he presented to Professor Alexander Bache, president of Girard College in Philadelphia:

"The enclosed specimen coin of the United States branch mint at New Orleans is presented to Pres. Bache by Rufus Tyler, the coiner. It may be proper to state that not more than twenty pieces were struck with the half dollar dies of 1838."

From this missive we learn that Tyler was aware of the earlier striking of Originals, or *essais*, in Philadelphia, as well as the Restrike issue of 10 pieces he struck in New Orleans. The Restrikes were apparently distributed to interested parties in 1839, most of them not numismatists, and few examples have survived. The evidence indicates that the Anderson-Dupont specimen is the only surviving coin actually struck at the New Orleans Mint.

Adam Eckfeldt selected one of the Philadelphia Original coins for the Mint Cabinet, which was officially begun in 1838. The other examples were stored in the Mint, along with the 1804 dollars and other early patterns, until coin collecting became popular in the 1850s, when they could be profitably sold to collectors or exchanged for other pieces to improve the Mint Cabinet. Most of the coins we know about today are survivors of this *essai* mintage. Most *essai* pieces are collected as part of the pattern series, but information about the true nature of the 1838-O Originals has only become available recently, and none of the standard references list the 1838-O as a pattern. In any case, the rarity and fame of the 1838-O transcends traditional collecting boundaries, and the issue is avidly sought-after by enthusiasts from many disciplines.

The present coin is a pleasing proof of Choice quality. Every detail is complete and fully defined, including hair curls and star centrils on the obverse, as well as individual feather details and leaf veins on the reverse. The fields have moderate reflectivity, similar to all of the known 1838-O half dollars. The central obverse and reverse have pale golden-yellow color with pale blue and iridescent toning near the borders. The surfaces have a few minor blemishes, including small contact marks and tiny hairlines, and it is these few flaws that keep this piece from Gem quality. This specimen is one of the finest-known examples of this celebrated issue, with high technical grade, terrific eye appeal, and matchless historic interest. It has been more than four years since any 1838-O was offered at auction. The advanced collector should bid accordingly. Population: 2 in 64, 0 finer (11/12).

Roster of 1838-O Half Dollars

Although most recent rosters indicate 11 examples of the 1838-O half dollar are extant, we believe only nine specimens have survived.

1. **Smithsonian Specimen. PR60 Cleaned.** Mint Cabinet Collection, formed in June 1838; Smithsonian Institution.
2. **Eliasberg Specimen. PR64 NGC.** Robert Coulton Davis Collection (New York Coin & Stamp, 1/1890), lot 655, realized \$51 to the Chapmans per Carl Carlson; unknown intermediaries; Martin Luther Beistle; Colonel E.H.R. Green; B.G. Johnson; Stack's (1942); Louis E. Eliasberg, Sr.; Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1911, realized \$121,000 to Andrew Lustig and Don Kagin. Carl Carlson plate matched the R.C. Davis coin to the example in Eliasberg's collection, but other catalogers have suggested the Davis specimen is an earlier appearance of the Norweb piece, based on Thomas Elder's remarks in the James B. Wilson catalog. Elder made many incorrect statements in the Wilson catalog, saying the Davis sale took place in 1882, etc., so we believe Carlson's pedigree is probably more accurate. Both Carlson and Walter Breen pedigreed the Eliasberg coin to the Clapp Collection, because they knew Stack's sold Eliasberg his 1838-O in 1942, the same year he purchased the Clapp Collection intact in a blockbuster transaction via Stack's. However, the 1838-O was not part of that transaction, coming instead from Col. Green's holdings. See lot 4114 of the Philadelphia Americana Sale (Stack's, 10/2010) for sale records.
3. **Norweb Specimen. PR64 NGC.** Édouard Frossard, offered in *Numisma*, July 1882 edition, at \$60; offered to T. Harrison Garrett on approval on September 11, 1882, but Garrett returned the coin; Édouard Frossard Collection (Frossard, 10/1884), lot 400, realized \$63; James B. Wilson Collection (Thomas Elder, 10/1908), lot 346, realized \$570; Albert Fairchild Holden; Emery May Holden (Mrs. R. Henry Norweb); Norweb Collection (Bowers and Merena, 11/1988), lot 3119, realized \$93,500; unknown intermediary; Andrew Lustig; Legend Numismatics in 2002.
4. **Atwater Specimen. PR63 PCGS.** Col. E.H.R. Green; William Cutler Atwater Collection (B. Max Mehl, 6/1946), lot 555; unknown intermediary; Reed Hawn Collection (Stack's, 8/1973), lot 122, realized \$41,000; Auction '79 (Superior's session, 8/1979), lot 1569, realized \$62,000; James Bennett Pryor Collection (Bowers and Merena, 1/1996), lot 94, realized \$104,500; Doug Noblet; ANA Sale of the Millennium (Bowers and Merena, 8/2000), lot 4117; offered by North American Certified Trading in the October 15, 2001, issue of *Coin World*; Heritage to Madison Collection via private treaty (9/2005); Heritage via private treaty (10/2007) to Sid and Alicia Belzberg Collection; Long Beach Signature Auction (Heritage, 2/2008), lot 600, realized \$632,500.
5. **Baldenhofer Specimen. PR64BM PCGS.** Col. E.H.R. Green; W.G. Baldenhofer Collection (Stack's, 11/1955), lot 708, realized \$3,200; Robert Pelletreau Collection (Stack's, 3/1959), lot 782; Jerome L. Cohen; Lester Merkin; Q. David Bowers; Charles Jay (Stack's, 10/1967), lot 181, realized \$14,000; Dr. E. Yale Clarke Collection (Stack's, 10/1975), lot 253, realized \$43,000; Julian Leidman; Bryan Collection (NASCA, 11/1977), lot 708; Julian Leidman; Auction '82 (Paramount session, 8/1982), lot 1689, realized \$47,500; unknown intermediary; Long Beach Signature Auction (Heritage, 6/2005), lot 6244, realized \$632,500; **the present coin.**

- 6. Cox Specimen. Brilliant Proof.** Col. E.H.R. Green; Burdette G. Johnson; Wayte Raymond; J.G. Macallister; Charles M. Williams (the likely owner); Numismatic Gallery; Adolphe Menjou Collection (Numismatic Gallery, 6/1950), lot 1073, realized \$1,650; ANA Sale (Numismatic Gallery, 8/1953), lot 905, per Carl Carlson; R.E. Cox, Jr. (Stack's, 4/1962), lot 1873, realized \$9,500; Empire Coin Co. (Q. David Bowers and James Ruddy); Hazen B. Hinman; Century Collection (Paramount, 4/1965), lot 1151; unknown intermediary; Bowers and Ruddy Galleries (Rare Coin Review numbers 17 and 18); Ellis H. Robison (Stack's, 2/1982), lot 1605, realized \$70,000; Marvin Browder.
- 7. Neil Specimen. PR60 Uncertified.** H.O. Granberg, displayed at the 1914 ANS Exhibition; Waldo Newcomer, plate matched to Mehl's Newcomer plates; Col. E.H.R. Green via B. Max Mehl circa 1931; Maurice Ryan Collection (B. Max Mehl, 6/1945), lot 936; Will W. Neil (B. Max Mehl, 6/1947), lot 580; James Aloysius Stack (Stack's, 3/1975), lot 415, realized \$50,000; Julian Leidman; New York City Collection; 1982 ANA Sale (Steve Ivy, 8/1982), lot 2320, realized \$37,000; Anthony Terranova; Kevin Lipton; George W. Vogt (Colonial Coins); Auction '84 (RARCOA session, 8/1984), lot 1666, realized \$55,000; David Queller Collection (Stack's, 10/2002), lot 446. The enlarged reverse in the Queller Catalog is incorrect and is actually the 1836 Reeded Edge half dollar. This example was the plate coin for Wayte Raymond's *Standard Catalog of United States Coins and Currency* in the 1930s.
- 8. Anderson-Dupont Specimen. PR45 PCGS.** Col. E.H.R. Green; Anderson-Dupont Collection (Stack's, 11/1954), lot 2104, realized \$3,500; Mr. Gottschalk; 1957 ANA Sale (Federal Coin Exchange, 8/1957), lot 1535A, realized \$4,450; "TAD" Collection via Stack's; Julian Leidman; Steve Ivy; Manfra, Tordella, and Brookes; 1983 ANA Sale (Kagin's, 8/1983), lot 2494, realized \$29,700; Dr. Jasper Robertson Collection (Mid-American, 5/1985), lot 392, realized \$32,500; 1986 ANA Sale (Kagin's, 8/1986), lot 4657A, realized \$33,000; Ken Goldman; Public Auction Sale (Palm Beach Rare Coin Auctions, 11/1986), lot 318; H.W. Blevins (Superior, 6/1988), lot 3567, realized \$44,000; Four Landmark Collections (Bowers and Merena, 3/1989), lot 2000, realized \$35,200; Pre-ANA Auction (Vintage Auctions, 8/1989), lot 202, realized \$40,700; Lowell Yoder; Central States Signature (Heritage, 4/2008), lot 2310, realized \$276,000; John Albanese; private collection (7/2012) via Al Pinkall for \$325,000. The only surviving specimen actually struck at the New Orleans Mint.
- 9. Boyd-Guggenheimer-Empire Specimen. PR40 Uncertified.** New Orleans private collection, valued at \$40; Ferguson Haines; (S.H. & H. Chapman, 10/1888), lot 483, bought in by the Chapmans, per Carl Carlson; George Bauer; Turner, Hooper and Others Collection (S.H. & H. Chapman, 2/1903), lot 1149 in George Bauer's consignment, purchased by Virgil Brand for \$250; Col. E.H.R. Green; Wayte Raymond; F.C.C. Boyd; World's Greatest Collection (Numismatic Gallery, 4/1945), lot 410, realized \$1,600; Eastern collector; Stack's; F.S. Guggenheimer Collection (Stack's, 1/1953), lot 830; Charles A. Cass/Empire Collection (Stack's, 11/1957), lot 1344, realized \$4,000; New Netherlands Coin Company; Jerome L. Cohen; Public Auction Sale (Kreisberg-Schulman, 4/1967), lot 1065; Mail Bid Sale (Abner Kreisberg, 6/1970), lot 1044; 1971 ANA Sale (Stack's, 8/1971), lot 805; Dr. George J. Oviedo (Stack's, 9/1983), lot 830; George Byers Collection (Stack's, 10/2006), lot 1097.

Specimen number 9 was listed as three separate examples in pedigrees compiled by Breen and Carlson, but the grade of the coin, the timeline of appearances, and the history provided in the catalog descriptions convinces us that all these citations describe the same coin. In the Guggenheimer catalog, the coin is clearly attributed as being the example from the "World's Greatest Collection" but the plates do not match, causing much confusion. The promotional folder for the Empire Collection identifies the coin offered in lot 1344 of that sale as the Guggenheimer specimen, providing a link to the later pedigree. We believe the Guggenheimer plate is a poor-quality stock photo, and the information provided by the catalogs of the Guggenheimer and Empire catalogs is a more accurate guide to the history of this coin.

Other Appearances:

- A. Joseph Mickley Collection (W. Elliot Woodward, 10/1867), lot 1782, realized \$2.75; James Clemens Collection (Edward Cogan, 10/1878), lot 159, realized \$15. Possibly the same as number 3 above. Breen attributes number 3 as ex: Levick; Woodward, because he knew Wilson bought the coin in October 1884, and assumed it was from Woodward's sale of 10/13/1884, with Levick as the major consignor. However, there was no 1838-O offered in that sale. Apparently, Breen was unaware of the Frossard sale of 10/1884 which did include an 1838-O. We consider the Mickley-Clemens connection a more likely early history for number 3.
- B. Charles Besson Collection (John W. Haseltine, 12/1880), lot 833, realized \$23.50: "1838; New Orleans Mint; uncirculated impression; slightly rubbed in the field; extremely rare; only six specimens known." Possibly an early appearance of the example in C below. Charles Besson was a resident of Philadelphia, as was Alexander Bache, and the descriptions of the coins are not incompatible. In order to make his reference more complete, Haseltine published an addendum to his famous Type Table catalog of 1881, in which he listed certain rarities he had handled in the past, but were not currently available for sale. The 1838-O was one of the issues included in the addendum, and the Besson specimen is likely the coin he referred to.
- C. Chief Coiner Rufus Tyler of the New Orleans Mint; presented to Alexander Bache, president of Girard College in Philadelphia, per a note referred to in Frossard's article in the July 1894 issue of *The Numismatist*; possibly B.H. Collins, a Treasury employee and Washington, D.C., coin dealer, who may have sold the coin to William Friesner, retaining the note from Tyler until a later date; William Friesner Collection (Ed Frossard, 6/1894), lot 589; Augustus Heaton. Waldo Newcomer reportedly purchased the Heaton Collection intact, so he may have owned this coin at some time, in addition to the specimen he obtained from Granberg. Its later pedigree is uncertain, but the lot description in the Friesner catalog, "Sharp, dull proof surfaces" seems to match the description in the Heritage 2008 Central States catalog (number 8 above), "details of a nice AU coin, but cleaned and recolored".
- D. Henry Chapman; purchased by Col. Green in 1928 for \$2,000. A note with this information accompanied the coin in the Ryan Sale, number 7 above. We believe the note must refer to another example from Col. Green's collection, since the coin in the Ryan sale came from the Waldo Newcomer Collection, via B. Max Mehl in 1931, and was unavailable to Chapman or Col. Green before that date. It is easy to understand how the note might be matched with the wrong coin, since Col. Green owned so many examples of the 1838-O over the years.
- E. New Jersey family, whose father obtained the coin in New Orleans before moving to New Jersey circa 1840; B.P. Wright Collection (Thomas Elder, 5/1923), lot 2209.
- F. A specimen in the possession of William T. Anton, Sr. in June 1955.
- G. A specimen claimed by Rodney A Mercur, of Towanda, Pennsylvania (b. 1851, d. 1933), in a letter published in *Mason's Numismatic Visitor*, October 1880 edition, "I have an excellent half dollar, 1838 with an O under the bust."
- H. Several pieces referred to in *Mason's Coin Collector's Herald*, September 1880 edition, "... there is an 1838 half dollar, O Mint, in Nevada, another in Lynn, Mass, another claimed by C.H. Brenner, Jefferson, N.Y.; and a rubbing of one sent us from Texas, which dealers, in this city have been negotiating to purchase."
- I. A specimen in the possession of Abner Kreisberg, offered to R. Henry Norweb on June 7, 1955, described as Uncirculated Gem. Norweb declined, as the collection already had a specimen. Possibly the Baldenhofer coin.
- J. In *United States Dimes, Quarters, and Half Dollars*, Q. David Bowers reports a specimen of the 1838-O half dollar was lost in a tragic Philadelphia house fire, along with its owner, around 1960.

Choice Proof 1839-O Half Dollar Only Four Confirmed Examples Known Second-Finest Certified

5645 1839-O PR64 NGC. CAC. The similarly designed 1839-O Reeded Edge proof halves are substantially rarer than their famous 1838-O proof half dollar counterparts. Perhaps nine specimens of the 1838-O proofs are known, versus four examples of the 1839-O. Curiously, the 1838-O is a celebrated rarity in American numismatics, while the 1839-O proof is only recognized by a small number of specialists. The present coin was the first proof 1839-O half dollar that we ever offered in any of our auctions when it appeared in lot 1690 of the Baltimore Signature (Heritage, 7/2008). We have offered three more distinct specimens since that time, and believe these four coins represent the entire surviving population of this issue.

The 1838-O and 1839-O proof halves show a remarkable number of similarities. Both were struck in proof format. Both have the popular Obverse Mintmark style only produced in those two years, making them a two-year subtype. There is no official record of proof coins struck for either year, in keeping with typical Mint practice of the era. Of course, an obvious difference is that, while the 1838-O proof halves were only struck to the extent of about 20 pieces, in both Original and Restrike mintages, with nine known today, the 1839-O halves are even rarer in proof format, with only four pieces known. Despite their greater rarity, the proof 1839-O halves are relatively unknown to the numismatic community, perhaps because of a fairly large production of 1839-O business strikes.

Variety and Die State

The obverse has a doubled mintmark that was repunched north of its original position. The mintmark is nearly centered over the space between the 8 and 3, slightly favoring the 3. There are no visible die cracks on the obverse, unlike at least two other proofs that are known with faint cracks connecting some stars and the date. A tiny engraving or polishing line connects the upper point of star 13 to the lowest hair curl. Other faint die lines are evident in the right obverse field. All of these die lines are observed on the known proofs.

The reverse has several similar fine, nearly invisible die cracks connecting most of the letters. Perhaps the easiest to view is the segment of a die crack through AMERICA that connects the left upright of the R to the crossbar of the E. The ER crack, along with several others, exactly matches die cracks observed on the reverse of known 1838-O half dollars.

As stated in *The Surprising History of the 1838-O Half Dollar*, we believe the 1838-O was struck on two occasions, with Originals struck as patterns in Philadelphia in 1838 and Restrikes produced to test a new coin press in New Orleans in January 1839. Sharing a common reverse die in nearly identical die states, the 1838-O Restrikes and 1839-O proof half dollars were produced at about the same time, probably circa January 1839 in both cases.

The die state of the obverse is earlier than any other observed 1839-O half dollars, and the reverse is essentially the same state as the known 1838-O half dollars, suggesting that this specimen may have been the very first 1839-O half dollar ever coined.

Die Alignment

Walter Breen reported in his *Proof Encyclopedia* that the Straus coin he examined in 1951 had the dies aligned in medal turn orientation, and questioned the others, writing: "is this constant for these proofs?" A decade later in his *Complete Encyclopedia*, Breen reported that all known proofs have medal turn alignment. More recent examination shows Breen's error in his 1988 reference. In the George Byers catalog, Stack's notes that the Byers coin has normal alignment, and we observe that the present piece, and the other three coins that have appeared in our auctions, also have normal alignment.

This Specimen

The strike is incredibly sharp, as it should be for a proof. There is no evidence of weakness on either side. The fields are fully mirrored beneath outstanding gold, green, blue, and iridescent toning on both sides. The surfaces have a few tiny marks that are expected for the grade, but the overall aesthetic appeal is actually much finer than expected for the Choice designation. Census: 1 in 64, 1 finer (9/12).

Census of Proof 1839-O Half Dollars

This census contains the four distinct proof 1839-O half dollars known, as well as three earlier, untraced sightings that may or may not correspond to those below.

1. **PR65 NGC.** Ellis Robison Collection (Stack's, 2/1982), lot 1607; Queller Family Collection (Stack's, 10/2002), lot 448; Pre-Long Beach Sale (Ira and Larry Goldberg, 2/2008), lot 2177; Long Beach Signature (Heritage, 2/2012), lot 3633, realized \$299,000.
2. **PR64 NGC.** Salisbury/Woods Collections (Bowers and Merena, 9/1994), lot 1214; Baltimore ANA Signature (Heritage, 7/2008), lot 1690, **the present coin.**
3. **PR63 NGC.** Krouner Collection (Lester Merkin, 2/1971), lot 736; Public Auction Sale (Stack's, 9/1992), lot 358; George Byers Collection (Stack's, 10/2006), lot 1098; Long Beach Signature (Heritage, 9/2008), lot 2164; Los Angeles Signature (Heritage, 7/2009), lot 1119; Baltimore Rarities Night (Stack's Bowers, 3/2012), lot 4102. The Breen *Proof Encyclopedia* Plate Coin.
4. **PR62 NGC.** Pre-Long Beach Sale (Goldberg, 5/2006), lot 2922; Long Beach Signature (Heritage, 9/2008), lot 2163.

Additional Appearances

- A. Proof.** F.C.C. Boyd; World's Greatest Collection (Numismatic Gallery, 5/1945), lot 411; Christian Allenburger (B. Max Mehl, 3/1948), lot 1936; R.E. Cox (Stack's, 4/1962), lot 1875. Walter Breen believed these descriptions were all of the same coin, but the first two appearances were not plated, and the catalogers of the Cox specimen report that the consignor was told it was the Allenburger coin, but they could not verify that claim. The plate of the Cox coin shows an unsightly planchet void near the eagle's head. Considering the painstaking process employed in striking proofs of this era, it seems unlikely that the coiners would select a damaged planchet to strike a proof coin. The Cox specimen may be a prooflike business strike.
- B. Proof.** An unverified example that Breen reported in the Philip G. Straus Collection, circa 1951. The coin remains unseen since that time and is likely one of the four above.
- C. Proof.** A piece in the Kagin Reference Collection, observed by Q. David Bowers in the 1950s. Probably an earlier appearance of one of the coins above.

From The Greensboro Collection, Part II. PCGS# 6253

SEATED HALF DOLLARS

1842 Small Date, Small Letters Half, VF20
Extremely Rare, Discovery Coin
Perhaps Four Known

5646 1842 Small Date, Small Letters VF20 PCGS. Discovery coin for the variety. Also known as the Reverse of 1839, and is certified as such on the PCGS insert. Christian Gobrecht's original obverse design for the Seated Liberty half dollar featured small digits in the date, a design that was used from 1839 through early 1842; later in 1842, the Medium Date die came into use.

The original reverse design of the Seated Liberty half dollar featured small letters in UNITED STATES OF AMERICA and HALF DOL. Prior to the discovery of the present variety, this reverse design had been identified on all 1839 Seated Liberty, 1840 (P), 1840-O, 1841, and 1841-O half dollars, as well as on some 1842-O examples. At the time of the discovery of this coin, it was the only 1842-dated example with the Small Letters Reverse of 1839 known from the Philadelphia Mint. A few other pieces have been discovered since, including one MS64 PCGS example, but it remains quite rare; PCGS CoinFacts shows a Condition Census of only four coins ranging from MS64 to Good 6, including the present piece. Heritage issued a press release on April 4, 2001, announcing the discovery.

The coin itself is a problem-free VF that has light gray patina over each side. The only mark of note that might be used for pedigree purposes is a milling mark between the eagle's beak and the A in STATES. PCGS# 6241, CoinPlex ID# LHM1842SDR1839

1851-O WB-4 Half Dollar, MS65
Late Die State

1851-O Half Dollar, Exceptional MS66
WB-4, Tied for Finest Certified

5647 1851-O MS65 PCGS. CAC. WB-4, R.3. Five die varieties are recorded in volume III of *A Register of Liberty Seated Half Dollar Varieties*. The WB-4 is the only R.3 variety, while the other four are each slightly scarcer at R.4. Thin die cracks travel from the inner point of star 13 to the drapery above the sandal, and more faintly from the sandal to the rim nearby. On the reverse bold clash marks show within the vertical shield stripes. A faint die crack through the E of STATES reaches the eagle's head.

An interesting and lovely Gem of this issue, made to the extent of only 402,000 pieces. The last 1 in the date is noticeably lower at both top and bottom than the adjacent 5. This lustrous, unabraded, well-struck piece has deep golden and amber patina on both sides with excellent eye appeal. Population: 3 in 65, 1 finer (11/12). PCGS# 6267, NGC ID# 24HK, CoinPlex ID# LHM1851O

5648 1851-O MS66 NGC. WB-4, R.3. Late Die State. A second high-grade WB-4. This piece shows the same late die state die cracks as the MS65 above. It strikes us as curious that two such pieces would exist from the same die pairing and same die state. It is tempting to suggest a hoard, but two coins hardly make a hoard. What is also curious is that these coins exist at all. As Wiley-Bugert point out, "By 1851, the value of silver rose to a point where a silver coin's silver content was worth more than the face value ... Consequently, large numbers of U.S. silver coins, mainly quarters and half dollars, were pulled from circulation, hoarded, melted, and/or exported for profit." Why were these two O-mint halves set aside and preserved in pristine condition? A question we will never know the answer to. This is a magnificent, bright, satiny coin that exhibits untuned, silvery centers that are surrounded by thin rings of russet and blue at the margins. The strike in the centers is complete, and only displays the slightest softness on the peripheral stars on the obverse. Census: 1 in 66, 0 finer (12/12). NGC ID# 24HK, PCGS# 6267, CoinPlex ID# LHM1851O

1873 Seated Liberty Half Dollar, AU58 Rare Open 3, No Arrows Type Only Three Finer Coins at PCGS

5649 1873 Open 3, No Arrows AU58 PCGS. The Seated Liberty half dollar underwent several minor design changes in 1873, with a total of three different subtypes for the year. The first type featured a Close 3 in the date, which Chief Coiner A. Loudon Snowden complained was easily mistaken for an 8. The logotype was restyled to display an Open 3, to avoid confusion. When the Mint Act of February 12, 1873, instituted a change in weight for all silver denominations except the silver dollar, the engraver added arrows at the date to signify the change. The 1873 Open 3, No Arrows half dollar boasts a low mintage of 214,200 pieces, much smaller than the production totals of either of the other types from the Philadelphia Mint.

In addition to its low mintage, the Open 3, No Arrows issue has a low survival rate. It seems that few examples were released into circulation before the weight change took effect in February, and the coins that were still on hand were melted to provide bullion for the new With Arrows issue. The 1873 Open 3, No Arrows half dollar is one of the rarest issues of the series, and Randy Wiley and Bill Bugert list it as a high R.7 variety in AU grades.

The present coin is a well-detailed near-Mint specimen with a touch of softness on the upper stars that is often seen on this issue. The lightly abraded surfaces are blanketed in shades of dove-gray and blue-steel patina with hints of prooflike reflectivity clinging to the devices. This coin will be a welcome addition to an advanced collection of Seated Liberty dollars. Population: 1 in 58, 3 finer (11/12).

Ex: Kenneth C. Long Estate Collection (Bowers and Merena, 5/1995), lot 1110. PCGS# 6337, NGC ID# 24KB, CoinPlex ID# LHM1873OP3

1873-CC Seated Liberty Half, MS63
Two-Year Arrows Design

5650 1873-CC Arrows MS63 PCGS Secure. WB-103. The weight of the half dollar, and most other silver denominations, was adjusted in 1873, and the engraver added arrows at the date to signify the change. As a result, the Carson City Mint issued two major subtypes of half dollars in 1873, making the date an important one for type collectors. The mintage for the 1873-CC Arrows type was 214,500 pieces, and the issue is very rare in high grade today.

The present coin is a representative of the WB-103 variety, with Arrows at the date and a large mintmark on the reverse. Randy Wiley and Bill Bugert list the WB-103 as a High R.7 issue in Mint State grades. This well-detailed Select specimen offers satiny, well-preserved surfaces under shades of sea-green and lavender-gray toning. Population: 3 in 63, 10 finer (11/12). PCGS# 6344, NGC ID# 24L8, CoinPlex ID# LHM1873CCARR

With Arrows 1873-S Half Dollar
Condition Rarity Near-Gem

5651 1873-S Arrows MS64 PCGS. Just one die pair is known for this initial Motto, Arrows S-mint half dollar variety of 228,000 pieces. As usual for small-change silver denominations struck in California, the 1873-S Arrows half saw hard use, making Mint State survivors challenging to find and a near-Gem such as this a true rarity. Light golden patina settles over slightly mellowed but still-shining silver luster, and the detail is sharp on every star but the one between Liberty's head and the cap-on-pole. Just a few wispy abrasions and scattered marks combine to account for the grade. Population: 2 in 64, 2 finer (12/12). PCGS# 6345, NGC ID# 24L9, CoinPlex ID# LHM-1873SARR

1877-CC Half Dollar, MS67
Lightly Toned, Pristine

5652 1877-CC MS67 NGC. The 1877-CC half dollar is a fairly available issue among CC-mint Seated halves, due to the large mintage of more than 1.4 million pieces. (This is in particularly stark contrast to the semikey 1878-CC, struck to the extent of only 62,000 coins.) However, few survivors of the large 1877-CC mintage will ever approach the technical quality of this masterpiece. Generous luster remains under a light covering of amber-copper color with some smoke-gray accents and small areas of remaining brilliance on each side. Most Mint State examples are quite well-struck, and this piece is no exception. There are no observable defects to mar the incredible appeal. Census: 1 in 67, 1 finer (12/12). NGC ID# 24KL, PCGS# 6356, CoinPlex ID# LHM1877CC

PROOF SEATED HALF DOLLARS

1839 No Drapery Half Dollar, PR65 One of Only Five Proofs Believed Known

5653 1839 No Drapery PR65 NGC. This issue has always ranked among the most desirable early proofs, combining extreme rarity with its status as a single-year design type, and the first year of issue for a major design group. For many years a widely held belief was the existence of just three proof examples of this issue, based on the 1977 work of Walter Breen, along with his earlier writings. However, to make matters more confusing, one of the coins that Breen recorded as a proof was clearly a business strike. Only the Reed Hawn coin and the F.C.C. Boyd specimen were actual proofs. Others have been discovered, and today there are five known proofs.

Each of the true proof 1839 No Drapery half dollars has a fine die crack through the base of HALF DOL., continuing faintly through the tops of MERICA. Light clash marks are evident within the spaces of the vertical shield stripes, and several of the vertical lines extend into the horizontal cross bars. This reverse die was used for both proofs and business strikes, so it is unreliable as a diagnostic. There are no characteristics that will aid in differentiating between proofs and business strikes, aside from the quality of production. Notes about the dies: The obverse has the shield point over the space between the 1 and 8. The date is rather small, and high above the border, slightly closer to the rock. The left base of the 1 is over the right curve of a dentil. There appears to be an extremely short, diagonal die line extending down from the bottom right base of the 1.

This gorgeous Gem has pale gold at the centers with intermingled violet and sea-green at the borders. Both sides are wonderfully well-detailed with deeply mirrored fields around the lustrous devices. A few minor hairlines are consistent with the grade. The following roster, adopted from previous research by our staff and others, presents a record of the five known examples.

- 1. PR65 NGC.** Possibly the 1948 ANA example; Central States Signature (Heritage, 4/2009), lot 2481, where it brought \$241,500. **The present specimen.**
- 2. PR64 PCGS.** Reed Hawn (Stack's, 8/1973), lot 125; Bowers and Merena (8/1999), lot 199; Goldberg Coins (2/2001), lot 1752; 2002 ANA Sale (Superior, 8/1992), lot 973; Heritage (1/2004), lot 5941; Richmond Collection (David Lawrence, 3/2005); Heritage (1/2007), lot 988.
- 3. PR62 NGC.** F.C.C. Boyd (World's Greatest Collection, Numismatic Gallery, 4/1945), lot 246; 1946 ANA (Abe Kosoff), lot 812; Stack's (3/1965), lot 440; 1976 ANA (Stack's, 8/1976), lot 1172; Stack's (12/1985), lot 942; Worrell Collection (Superior, 9/1993), lot 712; Phil Kaufman Collection (Heritage, 4/2008), lot 2376; FUN Signature (Heritage, 1/2010), lot 2554; Boston Signature (Heritage, 8/2010), lot 3167.
- 4. PR63 PCGS.** Heritage (9/2002), lot 13257; Heritage (12/2002), lot 19261.
- 5. Proof.** Stack's (10/1996), lot 300. Unknown previous pedigree.

Additional Appearances

Will W. Neil (B. Max Mehl, 6/1947), lot 474; 1948 ANA, lot 1766.

From The Greensboro Collection, Part II. NGC ID# 27SZ, PCGS# 6381, CoinPlex ID# LHP1839ND

1839 With Drapery Half Dollar, PR64 The Sole Proof Striking Ex: Lichtenfels-Pittman-Kaufman

5654 1839 Drapery PR64 NGC. The rarity of the 1839 proof With Drapery half dollar is attested to by the solitary example certified by either NGC or PCGS — this NGC-graded PR64 coin out of the John Jay Pittman and the Phil Kaufman collections. A second proof was reportedly part of the Norweb Collection (Breen incorrectly called it No Drapery), sold to the family by Hollinbeck Coin Company, but that piece turned out to be a prooflike example and not a true proof.

Very little reference to this issue is found in the numismatic literature, and what does appear is cryptic. In their *Complete Guide to Liberty Seated Half Dollars*, Randy Wiley and Bill Bugert indicate that the With Drapery variety is unknown, obviously unaware of the Pittman-Kaufman example. Walter Breen, in his 1989 proof *Encyclopedia* only says “extra fold of drapery at elbow. Menjou:15, possibly reappearing as Lichtenfels I:2799. Unverified.” Abe Kosoff sold the Menjou Collection in June 1950, and Abner Kreisberg joined with Hans Schulman to sell the Lichtenfels Collection in February 1961.

David Akers, in his cataloging of the 1839 With Drapery proof from the John Jay Pittman Collection (5/1998), lot 1517, reports that Pittman bought the coin from the Kreisberg-Schulman sale of the Gustav Lichtenfels Collection (2/1961), lot 2799. The coin is thought to have previously been in the Virgil Brand Collection.

For those who desire a concise roster:

1. **PR64 NGC.** Gustav Lichtenfels Collection (Kreisberg-Schulman, 2/1961), lot 2799; John Jay Pittman (David Akers, 5/1998), lot 1517, where it brought \$132,000 and was graded PR65; Phil Kaufman Collection; Central States Signature (Heritage, 4/2008), lot 2377, where it realized \$184,000 as a PR64.

Deep mirrored fields, including areas within the shields, greet the viewer of this wonderful near-Gem. Whispers of light gold patina around the margins take on faint reddish-tan hues, and relatively strong field-motif contrast, particularly on the reverse, becomes evident when the coin is tilted under a light source. A solid strike brings out virtual fullness in the design features, save for minor softness on the star 7 centrils. A few unobtrusive field hairlines and some minute marks on the lower part of Liberty's left (facing) arm preclude full Gem classification.

It is seldom that one has the opportunity to bid on a coin that appears unique *and* exhibits outstanding technical quality and aesthetic appeal. These attributes make this proof 1839 With Drapery half dollar one of the most important bidding opportunities in this FUN auction.

From The Greensboro Collection, Part II. PCGS# 6383, CoinPlex ID# LHP1839DRAP

1841 Half Dollar, Toned PR64 Ex: Eliasberg-Kaufman No More Than Eight Pieces Known

5655 1841 PR64 NGC. Our roster suggests that about eight 1841 proof half dollars are known, mostly in the lower numeric range. The Kaufman specimen is probably second finest. Randy Wiley and Bill Bugert, in the *Complete Guide to Liberty Seated Half Dollars*, write of the 1841 proofs that there are “less than 6 known.” Similarly, in the description of the Louis Eliasberg, Sr. specimen, to which the present NGC-graded PR64 Phil Kaufman coin is pedigreed, the cataloger writes that about a half dozen are known.

A total of seven 1841 proof half dollars have been certified, five by NGC and two by PCGS:

1841 Proof Half Dollar Roster

1. **Proof.** Smithsonian Institution.
2. **Proof.** American Numismatic Society.
3. **PR65 NGC.** James Kelly (privately, 1946); John Jay Pittman (David Akers, 10/1997), lot 1522, \$44,000; Richmond Collection (David Lawrence, 3/2005), lot 1786, \$47,150; American Numismatic Rarities (9/2005), lot 413; Goldberg Coins (2/2006), lot 1472, \$55,200.
4. **PR64 NGC. The present Kaufman piece.** John G. Mills (S. H. and H. Chapman, 4/1904); J.M Clapp; Clapp Estate (1942); Louis Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1919, \$18,700.
5. **PR64 NGC.** Superior (5/1990), lot 3803, \$30,800; Long Beach Signature (Heritage, 5/2008), lot 718.
6. **PR62.** Charles A. Cass; Empire Collection (Stack's, 11/1957), lot 1352, \$110; Reed Hawn (Stack's 8/1973), lot 137, \$2,100; Auction '81 (RARCOA), lot 137, \$1,550; Auction '90 (Stack's), lot 210, \$8,800; Stack's (3/2007), lot 849.
7. **PR62 PCGS.** Dr. R. H. Wilson; 1952 ANA (New Netherlands), lot 310; Elliot Landau (New Netherlands, 52nd Sale, 12/1958), lot 575; Dr. James O. Sloss (Bowers and Merena, 1/1999), lot 1137.
8. **PR61 PCGS.** Bowers and Merena (7/2005), lot 550, \$16,675; Philadelphia Signature (Heritage, 8/2012), lot 5154.

Additional Appearances

- A. **Proof.** David Golding (Stack's, 6/1952), lot 232.
- B. **Proof.** Gustav Lichtenfels Collection (Kreisberg and Schulman, 2/1961), lot 2806. “Brilliant Proof. Sharp square edge. One of the very few in existence. Rare.” Not plated.
- C. **Proof.** Amwest (7/1981).
- D. **Proof.** George H. Earle (H. Chapman, 6/1912), lot 2970.

On the reverse, several of the vertical lines in the shield extend entirely through the horizontals to the top of the shield. Complete definition is visible on the design elements of this lovely near-Gem proof example from the Eliasberg and Kaufman collections. Moreover, they are impressively highlighted by the deeply mirrored fields, and stand out as the coin is rotated under a light source. Delicate powder-blue and lilac toning resides on each side, and the well-preserved surfaces reveal just a few faint hairlines interspersed among die polish lines in the fields. The only pedigree marker that we can locate occurs on Liberty's right (left facing) arm above the elbow.

From The Phil Kaufman Collection of Early Seated Proof Sets, Part Two / FUN Signature (Heritage, 1/2008), lot 3021.

From The Greensboro Collection, Part II. PCGS# 6385, CoinPlex ID# LHP1841

1842 PR65 Half Dollar One of Only Seven Proofs Known

5656 1842 PR65 NGC. Ex: Norweb. The obverse is toned in attractive champagne-golden shadings while the reverse is much deeper with mottled blue and gray coloration over that side. A tiny identifying nick is seen in the fields near the drapery; otherwise, the surfaces are exceptionally clean and problem-free. According to Walter Breen, only four proofs exist. However, we have investigated this date and have come to the conclusion that there are seven unquestioned proofs.

1. **PR66 NGC.** Philip Kaufman Collection (Heritage, 4/2008), lot 2381. Ex: R. Green; John Jay Pittman (David Akers, 5/1998), lot 1524.
2. **PR65 NGC.** The Norweb Specimen. Purchased by Albert Fairchild Holden circa 1908; Norweb III (Bowers and Merena, 11/1988), lot 3131, where it realized \$14,300; Bowers and Merena (8/1999), lot 201; Phil Kaufman; Phil Kaufman Collection, Part VI / Central States Signature (Heritage, 5/2003), lot 6776; FUN Signature (Heritage, 1/2006), lot 3197, where it brought \$43,125. **The present coin.**
3. **PR64 PCGS.** FUN Signature (Heritage, 1/2012), lot 3246. Ex: F.C.C. Boyd; 1946 ANA (Numismatic Gallery, 8/1946), lot 816; Stack's (3/1965), lot 443; Richmond Collection (David Lawrence, 3/2005), lot 1787.
4. **PR64 NGC.** Oscar Schilke proof set; Paul Kagin.
5. **PR63 NGC.** Chicago Signature (Heritage, 8/2011), lot 7173. Ex: Eliasberg Collection (Bowers and Merena, 4/1997), lot 1922.
6. **Proof.** American Numismatic Society.
7. **Proof.** Smithsonian Institution.

Like the proof quarters of the same date, proof 1842 halves were all struck from Small Date dies. A Large Date variant was reportedly offered in the Brand-Lichtenfels Sale, but this remains unverified. The difference between the Small Date quarters and halves is that the half dollars are known (but scarce) as business strikes with the smaller date variant. Proof 1842 halves are extremely rare, as one can see from the roster above, and the offering of this coin presents a rare opportunity for the specialist to acquire one of only two pieces known outside institutional holdings.

From The Greensboro Collection, Part II. PCGS# 6386, CoinPlex ID# LHP1842

1843 Half Dollar, PR66 Cameo
 Finest of Six Pieces Known
 And the Only Cameo
 Ex: Allenburger-Kaufman

5657 1843 PR66 Cameo NGC. This exceptional 1843 proof half dollar is the finest known specimen, and the only one given the Cameo designation by NGC or PCGS. Opportunities to acquire any proof 1843 half dollar are extremely limited, and a chance to obtain the finest known may be a once-in-a-lifetime occurrence.

Our roster is consistent with estimates of previous researchers. Randy Wiley and Bill Bugert, in their *Liberty Seated Half Dollars* reference, suggest that less than six 1843 proof half dollars are known. Walter Breen, in his *Encyclopedia of United States and Colonial Proof Coins*, lists six examples. Likewise, NGC and PCGS have certified a total of six coins.

Our research into auction appearances of the 1843 proof half dollar, along with that of previous catalogers, results in the following roster:

1. **PR66 Cameo NGC. The Kaufman coin.** Previously from Dr. Christian Allenburger Collection (B. Max Mehl, 3/1948), lot 1103; McPherson Collection (Stack's, 2/1953), lot 924; Charles A. Cass Collection; Empire Sale (Stack's, 11/1957), lot 1361; ANA Signature (Heritage, 7-8/2008), lot 1809, where it brought \$86,250.
2. **PR64 NGC.** Numismatic Gallery, June 1947; John Jay Pittman Collection (David Akers, 5/1998), lot 1527; Bowers and Merena (7/2002), lot 305; Superior (1/2004), lot 385; George "Buddy" Byers Collection (Stack's, 10/2006), lot 1126; Heritage (5/2007), lot 2137.
3. **PR64 NGC.** Judge Joseph F. Sawicki (5/1948); John Jay Pittman Collection (David Akers, 10/1997), lot 832 (part of an 1843 proof set); Richmond Sale, Part III (David Lawrence Rare Coins, 3/2005), lot 1788; July Auction (Stack's, 7/2009), lot 579, where it realized \$40,250.
4. **Brilliant Proof.** World's Greatest Collection (Numismatic Gallery, 3/1945), lot 261; 1946 ANA Sale (Numismatic Gallery, 8/1946), lot 817; Stack's (3/1965), lot 444.
5. **Brilliant Proof.** Will W. Neil Collection (B. Max Mehl, 6/1947); Amon G. Carter, Jr. Family Collection (Stack's, 1/1984), lot 630 (part of an 1843 proof set).
6. **Proof.** Smithsonian Institution.

Both sides of this Premium Gem Cameo half dollar are remarkably well-matched with beautiful low-intensity toning dominated by soft golden-tan, accented by splashes of lavender and aqua-blue in the border areas. The surfaces are fully struck throughout, and the cameo contrast stands out regardless of the angle at which the coin is observed. Added to these attributes are the immaculately preserved surfaces. All in all, a majestic coin that will delight the new owner.

A die crack, diagnostic of all proof 1843 half dollars, bisects the reverse. The crack runs from the rim between ES of STATES through the eagle's head, upper left part of the shield, left (facing) leg, and tail to the rim between LF of HALF.

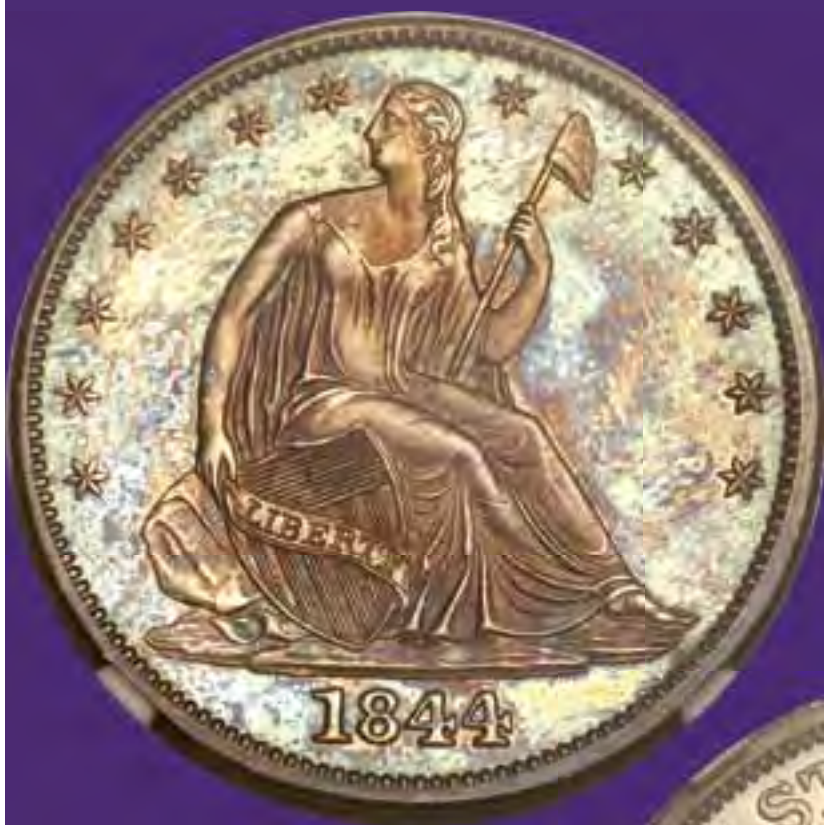

Ex: Phil Kaufman Collection of Early Proof Sets, Part Four / ANA Signature (Heritage, 7-8/2008), lot 1809.

From The Greensboro Collection, Part II. PCGS# 86387, CoinPlex ID# LHP1843CA

PLATINUM NIGHT

1844 Half Dollar, PR66 Cameo
Ex: Pittman-Kaufman, From an Original 1844 Proof Set
The Finest of Only Four Proofs Known

5658 1844 PR66 Cameo NGC. Only two 1844 proof half dollars have been certified. The NGC census records the Premium Gem Cameo proof Kaufman coin, and a PR62 piece. PCGS has not certified a single example of this rarity. The Kaufman specimen was part of the John Jay Pittman 1844 Proof Set "In Original Case of Issue" sold by David Akers Numismatics, Inc. in October 1997. Akers writes:

"The non-gold coins in the 1844 set were purchased by JJP as an original Proof set in the original case (with price list) from Abe Kosoff of Numismatic Gallery on 4/5/48 for \$400. (Almost certainly this is the set formerly owned by Dr. J. Hewitt Judd, a good friend of both JJP and Abe Kosoff.)" Akers continues: "It is likely that only 10-15 Proof sets were issued in 1844"

Randy Wiley and Bill Bugert, writing about the 1844 circulation strike and proof half dollars in their Seated half dollar reference, say of the proofs "less than 10 known." Interestingly, after 25 years of third-party grading, the population reports show a mere two certified examples.

1844 Proof Half Dollar Roster

- 1. Proof 66 Cameo.** The Kaufman specimen. Numismatic Gallery (4/1948); John Jay Pittman (David Akers, 10/1997), lot 833; Philip Kaufman. Part of Pittman's 1844 proof set. The silver coins were kept intact by Phil Kaufman until they were sold individually in our Platinum Night Signature in the FUN 2008 auction. **The present coin** was lot 3026, where it brought \$149,500.
- 2. Proof.** Stack's (1/1974), lot 1437; Robison Collection (Stack's, 2/1982), lot 1622.
- 3. Proof.** Stack's (9/1993), lot 358. Stack's described this piece as a hairlined example, although they did not plate the coin in their catalog. It is probably different than the Robison coin, and is certainly not the Smithsonian or Pittman coins.
- 4. Proof.** Smithsonian Institution.

Additional Appearances

A. Impaired Proof. Kreisberg-Schulman (2/1961), lot 2816. Not plated. Described as having "numerous tiny field scratches." It is possibly the same as the Stack's 1993 specimen.

Soft reddish-gold patina dominates the obverse central device. This turns to cobalt-blue, violet, and gold in the fields. The reverse is a lighter, more uniform champagne-gold with just a hint of blue at the margins. A strong strike shows intricate detail on each of the design elements, which are noticeably highlighted by the bright mirrored fields. While we note a few faint hairlines in the fields that are only visible under magnification, we can discern no marks that might help identify the coin for future catalogers.

From The Greensboro Collection, Part II. PCGS# 86388, CoinPlex ID# LHP1844CA

1845 Half Dollar, Remarkable PR66 Four or Five Proofs Known of This Rare Early Date

5659 1845 PR66 NGC. In the sale of this lot from the remarkable collection of early Seated proofs in our 2008 FUN Auction, we wrote:

"Of all the remarkable early silver proof coins from the Kaufman Collection, the 1845 proofs are the finest, overall. Each of the five pieces stands alone as the finest that has been certified! The half dollar is two points finer than the next best example that NGC has graded.

"Discussing the 1845 half dollar in their Liberty Seated Half Dollars guide, Randy Wiley and Bill Bugert say that less than six of the proofs are known; and Walter Breen, in his Proof Encyclopedia, cites three separate 1845 proof half dollar appearances. He then goes on to say: 'Two others seen, so badly cleaned as to render their original proof status dubious.'

"As part of his May 1998 cataloging of the John Jay Pittman 1845 proof half dollar, David Akers writes:

'The 1845 Half Dollar in Proof is one of the great Liberty Seated Proof rarities of the 1840's. It is the rarest silver denomination of this year and it is also one of the two rarest Proof Half dollars of the decade along with the 1840. All 1845 silver denominations, except the Silver Dollar, were struck in Proof only for inclusion in the 10-15 Proof sets issued that year. I have been able to confirm the existence of only four distinct examples of the Half Dollar but, of course, it is always possible that one or more additional specimens exist.' "

1845 Proof Half Dollar Roster

- 1. PR66 NGC. The present coin.** James Kelly (1946); John Jay Pittman (David Akers, 5/1998), lot 1711, as part of a complete 1845 proof set, the Seated Liberty coins kept intact by Phil Kaufman. Phil Kaufman Collection / FUN Signature (Heritage, 1/2008), lot 3031, which brought \$74,750.
- 2. PR64 NGC.** Stack's (3/1965), lot 447; Superior (5/1989), lot 5371; Superior (10/1990), lot 3662; Long Beach Signature (Heritage, 5/2008), lot 719. Possibly earlier from World's Greatest Collection (Numismatic Gallery, 4/1945), lot 273.
- 3. PR63 PCGS.** Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1929; Phil Kaufman; Bowers and Merena (1/1999), lot 1142; Richmond Collection (David Lawrence, 3/2005), lot 1789; American Numismatic Rarities (6/2006), lot 1487.
- 4. Proof.** New England (7/1978)
- 5. Proof.** Smithsonian Institution.

Additional Appearance

- A. Proof.** RARCOA (1/1973), lot 872.

Picking up again from the Kaufman description from FUN 2008, this coin was described as:

"Beautiful toning adorns each side of this Premium Gem. Light to medium cobalt-blue concentrates around the peripheries, then yields to violet, and finally to champagne-gold in the centers. A solid strike results in every individual die element being intricately and impeccably detailed. Additionally, the design elements possess a light frosty finish, resulting in mild contrast with the mirrored fields. Well cared for surfaces are devoid of contact marks, and reveal just a few faint, inoffensive hairlines in the fields. This outstanding coin exudes exceptional technical quality and aesthetic appeal."

From *The Greensboro Collection, Part II*. PCGS# 6389, CoinPlex ID# LHP1845

Cameo PR64 1845 Half Dollar Singular Survivor

5660 1845 PR64 Cameo PCGS. CAC. The only Cameo proof 1845 half dollar certified at PCGS and NGC, and one of just four certified proof 1845 half dollars at the two grading services. Our roster records seven different specimens, including six available to collectors. However, two of those have been absent from the marketplace for more than 30 years. Heritage has handled three of the other four specimens.

1. **PR66 NGC.** James Kelly (1946); John Jay Pittman (David Akers, 5/1998), lot 1711, as part of a complete 1845 proof set; Kaufman Collection; FUN Signature (Heritage, 1/2008), lot 3031.
2. **PR64 Cameo PCGS.** FUN Signature (Heritage, 1/2008), lot 2889; FUN Signature (Heritage, 1/2012), lot 3247, realized \$57,500; **the present coin.**
3. **PR64 NGC.** F.C.C. Boyd; World's Greatest Collection (Numismatic Gallery, 4/1945), lot 273; Stack's (3/1965), lot 447; Superior Galleries (10/1990), lot 3662; Heritage (5/2008), lot 719.
4. **PR63 PCGS.** Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1929; Phil Kaufman; Bowers and Merena (1/1999), lot 1142; Richmond Collection (David Lawrence, 3/2005), lot 1789; American Numismatic Rarities (6/2006), lot 1487.
5. **Proof.** Smithsonian Institution.
6. **Proof.** New England (7/1978), lot 878.
7. **Proof.** RARCOA (1/1973), lot 872

A stray die chip appears below the left side of the 8, perhaps a diagnostic feature of proofs. The same die chip is visible on plates of five different examples. Several vertical shield lines cross numerous horizontal lines of the shield on the reverse.

This specimen has excellent contrast with light gold toning and peripheral accents. Both sides have fully mirrored fields, and boldly defined, lustrous devices. A few trivial hairlines fail to detract from the overall beauty of this near-Gem Cameo proof. Population: 1 in 64 Cameo, 0 finer (12/12). PCGS# 86389, CoinPlex ID# LHP1845CA

1846 Medium Date Half Dollar, PR65 Tied for Finest Known Ex: Pittman-Kaufman

5661 1846 Medium Date PR65 NGC. The 1846 half dollar is rare in proof format. The former Kaufman specimen, earlier from the famous Pittman Collection, is considered by most knowledgeable numismatists to be the finest known example.

The half dollar of this year displays two date sizes — Medium Date and Large Date. The two varieties are easily distinguished by inspection of the 4 in the date. The Medium Date 4 is connected between the lower serif of the crossbar and the base, whereas the Large Date 4 has a noticeable separation in this area.

Over the years, estimates have remained in a narrow range of 10 to 12 pieces. Below is a current roster of Medium Date 1846 proof half dollars based on the review of plated catalogs available to us.

1. **PR65 PCGS.** Superior (2/1974), lot 1623; Auction '79 (Paramount, 7/1979), lot 79; Bowers and Merena (9/1988), lot 275; Heritage (10/2008), lot 922; Superior (10/1989), lot 3711; Heritage (5/2008), lot 721.
2. **PR65 NGC. The present specimen.** Numismatic Gallery (7/1949); John Jay Pittman (David Akers, 5/1998), lot 1712; Phil Kaufman (Heritage, 4/2008), lot 2386, where it brought \$40,250.
3. **PR64 PCGS.** FUN Signature (Heritage, 1/2012), lot 3248, where it was sold for \$35,937.50.
4. **PR64 PCGS.** Central States (Heritage, 5/2005), lot 7208; Stack's (2/2008), lot 3270.
5. **PR64 NGC.** Phil Kaufman; Bowers and Merena (8/1999), lot 202; Superior (10/2000), lot 4374.
6. **PR63 Cameo NGC.** Mid American (1/1990), lot 608; David Lawrence Rare Coins (3/2005), lot 1790.
7. **PR63 PCGS.** Reed Hawn (Stack's, 8/1973), lot 153; Superior (1/1990), lot 3574; Heritage (6/2008), lot 720.
8. **PR63 PCGS.** Lester Merkin (2/1971), lot 744; Stack's (1/1974), lot 1440; Stack's (2/1982), lot 1629; Queller Collection (Stack's, 10/2002), lot 497; Heritage (2/2007), lot 3509.
9. **PR62 NGC.** R. McAusland (6/1953); James Butterfield Collection (Mid American, 5/1987), lot 2543; Heritage (1/2002 FUN Sale), lot 6997; Rarities Sale (Bowers and Merena, 7/2005), lot 552; Superior (11/2005), lot 779; Goldberg Coins (5/2006), lot 2923.
10. **PR61.** The Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1935.
11. **Proof.** James A. Stack Collection (Stack's, 10/1994), lot 512; George "Buddy" Byers (Stack's, 10/2006), lot 1137.
12. **Proof.** Smithsonian Institution.

This Gem is an extremely attractive example, made so by rich medium-intensity toning, a powerful strike, and nicely preserved surfaces. A medley of sky-blue, russet, and lavender occupies both sides, but does not diminish the field-motif contrast when the piece is rotated under a light source. Bold definition characterizes all of the design elements. Indeed, close examination reveals no areas with even the slightest hint of weakness. A couple of grade-consistent marks aid in the identification of the coin, including minute contact in the field to the left of star 11 and a faint line above TATE of STATES. Proof halves of 1846 do not appear at auction all that frequently, so the collector of early Seated Liberty proofs will want to give special attention to this delightful specimen.

From The Greensboro Collection, Part II. PCGS# 6390, CoinPlex ID# LHP1846MD

1847 Seated Half, Toned PR64 Deeply Mirrored Fields, Rare Proof Date

5662 1847 PR64 NGC. True proof examples of earlier coins are usually identified as such by a mere glance, and this is just such a coin. The fields are deeply mirrored around lustrous and sharply defined devices. Both sides have a blend of pleasing ivory, gold, and lilac color. A few faint hairlines on each side prevent a Gem grade determination for this splendid piece.

While we do not have an accurate Census of proof 1847 half dollars, we suspect that the population is less than 10 coins in all grades. NGC and PCGS have combined to grade 16 submissions in all grades, with the finest certified as PR66. Census: 4 in 64, 1 finer (11/12).

Ex: Charlotte National Money Show (Heritage, 3/2007), lot 827, where it realized \$29,900.

From The Greensboro Collection, Part II. PCGS# 6391, CoinPlex ID# LHP1847

1848 PR66 Half Dollar Finest Known of This Very Rare Date

5663 1848 PR66 NGC. This Premium Gem 1848 proof half dollar is one of the rarest coins from Phil Kaufman's collection, and the finest known of an exceedingly sparse population. Randy Wiley and Bill Bugert, in their *Complete Guide to Liberty Seated Half Dollars*, state: "Less than 4 known." Walter Breen (1989), on the other hand, lists six examples, including one in the Smithsonian Institution. Similarly, David Akers (1998) estimates five or six specimens, while NGC and PCGS have graded a mere three coins.

1848 Proof Half Dollar Roster

1. **PR66 NGC. The present example.** Newcomb, part II (James G. MacAllister and Wayte Raymond, 5/1945), lot 859; John Jay Pitman Collection (David Akers, 5/1998), lot 1534; Phil Kaufman Collection / ANA Signature (Heritage, 7-8/2008), lot 1819, which brought \$74,750.
2. **PR63.** Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1944; Long Beach Signature (Heritage, 9/2008), lot 2246; Los Angeles Signature (Heritage, 8/2009), lot 1126, now PR64 NGC.
3. **Brilliant Choice Proof.** Lester Merkin (2/1971), lot 751; Armand Champa Collection (American Auction Association, 5/1972), lot 890. The Merkin catalog notes that this coin is from The Empire Collection (Stack's, 11/1957), lot 1383 (unplated).
4. **Brilliant Proof.** Reed Hawn Collection (Stack's, 8/1973), lot 165. (While photo quality of this appearance makes plate matching difficult, we believe it is distinct from the above specimens).
5. **Proof.** Smithsonian Institution.

Additional Appearances

- A. **Brilliant Proof.** World's Greatest Collection (Numismatic Gallery, 4/1945), lot 294.
- B. **Proof.** Numismatic Gallery (1949 ANA Sale), lot 1505.
- C. **Proof.** Paramount Rare Coin List #11 (10/1975).

This specimen displays superb toning. A delicate blend of russet, sky-blue, violet, and greenish-gold resides on the obverse, yielding to mostly soft gold-orange and sky-blue on the reverse. Satiny devices stand out against mirrored fields as the coin is tilted just slightly beneath a light source, and the design features are fully struck. No marks of consequence are visible on the impeccably preserved surfaces, enhancing even more the coin's outstanding eye appeal.

From The Greensboro Collection, Part II. PCGS# 6392, CoinPlex ID# LHP1848

1849 Seated Half, PR66

Ex: Pittman, Finest of Six or Seven Known

5664 1849 PR66 NGC. Ex: Pittman. This is the finest of just six or seven 1849 proof half dollars currently traced. In 1977, Walter Breen recorded five examples, including a badly impaired piece that he saw over 20 years earlier. Wiley and Bugert stated that at least five are known, and David Akers noted five known when he cataloged this coin as part of the Pittman sale.

1849 Proof Half Dollar Roster

1. **PR66 NGC.** The present specimen. Paramount (1967 Grand Central Sale), lot 1017; John Jay Pittman (David Akers, 5/1998), lot 1536; Bowers and Merena (8/1999), lot 205; George "Buddy" Byers (Stack's, 10/2006), lot 1150; Heritage (7/2008), lot 1701, unsold; Malibu Collection (Heritage, 9/2008), lot 2247, which realized \$86,250; Los Angeles Signature (Heritage, 8/2009), lot 1127, where it brought \$74,750.
2. **PR65 NGC.** F.C.C. Boyd; World's Greatest Collection (Numismatic Gallery, 4/1945), lot 296; Floyd T. Starr (Stack's, 10/1992), lot 549; Superior (7/1993), lot 421; Phil Kaufman (Heritage, 4/2008), lot 2391; FUN Signature (Heritage, 1/2010), lot 2555, where it realized \$41,687.50. Breen suggested that this coin was possibly earlier in the Parmelee (lot 1201) and Earle (lot 2997) sales.
3. **PR64 NGC.** The Richmond Sale, Part III (David Lawrence, 3/2005), lot 1793; FUN Signature (Heritage, 1/2012), lot 3251, where it brought \$38,812.50.
4. **PR64 PCGS.** Randall Collection, lot 409; Garrett Collection (Stack's, 3/1976), lot 214; Auction '88 (RARCOA, 7/1988), lot 1725; Heritage (9/2005), lot 3265.
5. **PR64.** Louis E. Eliasberg, Sr. (Bowers and Merena, 4/1997), lot 1947.

Additional Appearances

- A. **Proof.** James A. Stack (Stack's, 3/1975), lot 453. Apparently different from any of those listed above. In fact, the only piece it could be is #3, the Richmond specimen.
- B. **Proof.** Kagin's (7/1978), lot 622. Possibly the Richmond coin (3), the Garrett coin (4), or the Stack coin (A).
- C. **Proof.** Amwest (7/1981). The catalog is unavailable. Possibly the Richmond coin (3), the Garrett coin (4), the Stack coin (A), or the Kagin coin (B).

A boldly detailed example with full stars, head, foot, and gown details on the obverse, and strong eagle, claw, and leaf details on the reverse. This gorgeous Premium Gem proof has amazing aesthetic appeal. Both sides have brilliant silver proof surfaces, with deep peripheral sea-green, russet, violet, and gold. Aside from a few wispy hairlines, there are no contact marks or other blemishes. An exceptional example that provides an important opportunity for an advanced Seated half dollar or type specialist.

From The Greensboro Collection, Part II. PCGS# 6393, CoinPlex ID# LHP1849

1850 PR66 Half Dollar

Only Four Confirmed Proofs Known of This Date

5665 1850 PR66 NGC. The former Phil Kaufman Premium Gem proof 1850 half dollar is one of the most notable and spectacular pieces from his comprehensive collection of proof Seated coinage. The rarity of this issue is undeniable, though numismatists differ on their estimates of known examples. Randy Wiley and Bill Bugert, for example, in their *Liberty Seated* half dollar reference, suggest that at least four proofs are known. Our roster, presented below, also lists four different pieces, based on descriptions of others, not necessarily on personal examination. Some of the pieces that we record may be prooflike business strikes.

David Akers, in his May 1998 cataloging of the John Jay Pittman specimen, on the other hand, contends: "This Pittman specimen is the only 1850 Half Dollar that I have ever seen that I feel reasonably confident declaring to be a Proof. It seems reasonable to expect that more examples exist than just this one coin, but it is worth noting that the great Mickley, Winsor, Stickney and Allenburger Collections, which contained perhaps the most complete selections of Proofs ever offered for sale at public auction, all failed to have this issue in Proof." In the Pittman catalog, Akers bills the Pittman specimen as "possibly unique" as a proof.

Several distinctly different varieties have been described as proofs in a number of past auction catalogs. However, there seems to be some disagreement about the varieties that are legitimate proofs, and those that are not.

1. In the Pittman Catalog, Akers notes that the coin offered has the date slanting up to the right, with the top of the 1 distant from the base of Liberty. He suggests that true proofs of the date are known only from this obverse die.
2. The Norweb Collection coin, described as prooflike in that catalog, has the date lower in the field with the final digit closer to the border. A second example of this variety has been certified as a proof, and appeared in the June 2002 Heritage auction. It has a die crack through the tops of UNITED STATES. While this alone does not preclude a coin as a proof, it certainly lessens the possibility when combined with other questionable factors.
3. The variety known as WB-102 has the lower right curve of the 0 doubled. Breen described this variety in his *Proof Encyclopedia*, and recorded at least two different examples.
4. The second variety Breen describes has the date extremely high in the field, with the top of the 1 nearly touching the base of Liberty. He recorded one proof example, in the World's Greatest Collection. Unfortunately, that coin was not plated.
5. Breen also mentioned a "shift variety" which apparently is nothing more than machine or strike doubling.

1850 Proof Half Dollar Roster

1. **Variety 1. PR66 NGC. The present example.** Barney Bluestone (6/1947); John Jay Pittman (David Akers, 5/1998), lot 1539; Phil Kaufman / FUN Signature (Heritage, 1/2008), lot 3036, where it brought \$161,000. The variety with the date sloping up to the right.
2. **Variety 3. PR65.** William M. Friesner Collection (Ed. Frossard, 6/1894); J.M. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1949. Variety with date sloping down to the right. Cataloged as a proof in the Eliasberg sale, but Akers suggests it is a prooflike business strike.
3. **Variety 2. PR63 NGC.** Heritage (6/2002), lot 7261.
4. **Variety 4. Proof.** Thomas L. Smith Estate (Stack's, 6/1957), lot 698; Stack's (8/1973), lot 171; Stack's (9/1989), lot 1233.

Additional Appearances

- A. Variety 2. MS65 Prooflike.** Hollinbeck Coin Company (6/1953), lot 2030; Norweb Collection (Bowers and Merena, 11/1988), lot 3151. This piece was purchased from Hollinbeck Coin Company as a proof and identified as such by Breen in his *Proof Encyclopedia*, but described as prooflike by Dave Bowers in the Norweb catalog.
- B. Variety 3. PR65.** Anderson Dupont Sale (Stack's, 11/1954), lot 2137; Stack's (9/1999), lot 704.
- C. Variety 3. Proof.** Virgil Brand; Landau (New Netherlands, 52nd Sale, 12/1958), lot 580.
- D. Variety 3. Proof.** Lichtenfels Collection (Kreisberg and Schulman, 2/1961), lot 2831; R.E. Cox Collection (Stack's, 4/1962), lot 1921; Kreisberg Schulman (5/1966), lot 1200.
- E. Variety 4. Proof.** F.C.C. Boyd; World's Greatest Collection (Numismatic Gallery, 1945), lot 300; 1946 ANA (Numismatic Gallery), lot 832. Not plated. Described as the high date with the top of the 1 close to the base, possibly Variety 1, and not inconceivably the same as the Pittman coin.
- F. Variety 5. Breen's "Shift Variety." Proof.** F.C.C. Boyd; World's Greatest Collection (Numismatic Gallery, 1945), lot 301. An impaired piece, probably not a proof.
- G. Unknown variety. Proof.** 1952 ANA (New Netherlands Coin Co., 8/1952), lot 324. Not plated.

The present specimen exhibits superb light to medium orange-gold, cobalt-blue, greenish-gold, and violet toning. The mirrored fields present a noticeable contrast with the devices, especially as the coin is rotated under a light source. The strike is for the most part solid, with excellent definition in Liberty's facial features, hair, gown lines, and foot. Some localized minor softness is noted on portions of the reverse arrow feathers. Light as-made roller marks cross Liberty's torso and breasts in an almost horizontal direction, and there is a small planchet imperfection on the wrist of Liberty's right (left facing) arm. What Akers calls a "water spot" is also visible between Liberty's head and the pole. As he indicates in the Pittman catalog, it "... is mentioned only for identification purposes and completeness of description since it does not constitute a defect, nor is it at all distracting." This truly spectacular coin will undoubtedly elicit the attention of the most discriminating Seated Liberty proof half dollar enthusiast.

From The Greensboro Collection, Part II. PCGS# 6394, CoinPlex ID# LHP1850

1852 PR65 Half Dollar

Ex: Kaufman, Finest of Only Three Pieces Traced

5666 1852 PR65 NGC. The former Kaufman 1852 proof half dollar is the finest of just three or four specimens. The actual mintage is unknown, though the CoinFacts.com online reference estimates 10 coins were struck. This is probably on the high side. Breen enumerates three examples, and NGC has graded three pieces, while PCGS has seen none.

1852 Proof Half Dollar Roster

- 1. PR65 NGC. The present specimen.** Phil Kaufman Collection / ANA Signature (Heritage, 7-8/2008), lot 1824, where it realized \$74,750.
- 2. PR63 NGC.** The Tecumseh Sale (Steve Ivy Numismatic Auctions, Inc., 12/1979), lot 700; Auction '84 (Paramount, 7/1984), lot 668; Worrell Collection (Superior Galleries, 9/1993), lot 731; Stack's (10/1996), lot 303. In 1993, the Superior cataloger noted: "Purchased by Paramount from Robert Batchelder, a Pennsylvania dealer, in 1974 and sold privately in early 1975. It later appeared in Steve Ivy's Tecumseh Sale." The Superior pedigree chain for this piece also lists, incorrectly, lot 203 in Auction '86, which is an 1852-O brilliant proof half dollar.
- 3. PR63.** Norweb Collection (Bowers and Merena, 11/1988), lot 3157; Jascha Heifetz Collection (Superior, 10/1989), lot 1590.

Additional Appearances

- A. Proof.** Newcomb, part I (J.C. Morgenthau, 2/1945), lot 746 (per Breen, who says "later untraced unless this is the former W.L. Carson specimen via Lester Merkin." If Breen is referring to Merkin's February 1971 sale, lot 755, he is mistaken, as that coin is an 1852-O brilliant proof half dollar.
- B. Proof.** Paramount, per Breen.

The present Gem proof half dollar displays pleasing mirrored fields (including the areas between the stripes of both shields) that establish pronounced contrast with the satiny motifs. Whispers of gold-tan, sky-blue, and lavender make occasional visits to each side, slightly more so on the obverse, and a powerful strike results in bold detail on the design elements. Nicely preserved surfaces reveal just a few faint hairlines in the fields intermingled with die polish lines. Proof halves of 1852 are extremely rare, so the collector of early Seated Liberty proofs will want to give special attention to this delightful specimen.

From The Greensboro Collection, Part II. PCGS# 6397, CoinPlex ID# LHP1852

PLATINUM NIGHT

1853 Arrows and Rays Half Dollar, PR66
Finest of the Four or Five Proofs Known of This One-Year Type
Ex: Norweb-Kaufman

5667 1853 Arrows and Rays PR66 NGC. The finest known proof of the issue, and the only Premium Gem certified by NGC or PCGS. These two services have certified 10 proofs in all grades, including resubmissions. Those 10 grading events represent just three of the four or five proofs currently known.

1853 Arrows and Rays Proof Half Dollar Roster

—**PR66 NGC. The present specimen.** Norweb Collection (Bowers and Merena, 11/1988), lot 3159; Kaufman Collection; ANA Signature (Heritage, 8/2007), lot 1786, where it realized \$130,000.

—**PR65 NGC.** Eliasberg Collection (Bowers and Merena, 4/1997), lot 1956; Bowers (8/1999), lot 206; Goldberg Coins (2/2002), lot 1002; Heritage (5/2003), lot 6212; Heritage (7/2003), lot 7646; Heritage (9/2003), lot 7098; Heritage (2/2005), lot 7098.

—**PR65 PCGS.** Lorin G. Parmelee Collection (New York Coin & Stamp, 6/1890), lot 1234; Charles Steigerwalt; William Woodin; Waldo Newcomer; Col. E.H.R. Green; Major Lenox Lohr Collection (Stack's, 10/1956), lot 753; FUN Signature (Heritage, 1/2012), lot 3252.

—**PR63 NGC.** J. Hewitt Judd Collection; Stack's (10/1990), lot 1651; Richmond Collection (David Lawrence, 3/2005), lot 1795.

—**Proof.** Reed Hawn Collection (Stack's, 8/1973), lot 178. Possibly the same as the Judd-Richmond example.

—**Proof.** Smithsonian Institution.

Breen recorded an additional example in his *Proof Encyclopedia*, from a “N.Y. state specialist” (Pittman) coin, cataloged by David Akers as Mint State. Breen did not list the Reed Hawn coin or the Eliasberg proof. He also listed the Parmelee proof but described it as “badly cleaned,” clearly an error on his part as that coin is now recognized as the PCGS PR65 listed above.

The description of this piece in Bowers and Merena’s Norweb catalog is inaccurate. Dave Bowers called it a “one-sided proof” and graded the reverse MS64. Our opinion, and that of NGC, is full proof status for this amazing coin. The obverse is fully mirrored and the reverse is satiny, suggesting that the planchet was not perfectly prepared. Normally, each planchet intended for a proof is highly polished, and both dies are also polished. The combination provides the deep mirrors found on proof coins, as well as cameo contrast. This example shows heavy reverse die polishing lines, proving that the actual coinage die was properly finished.

The appearance of the ex: Kaufman Premium Gem is unmistakable. The obverse is fully mirrored with excellent cameo contrast, and the reverse has bright satiny luster. The reverse design stands boldly against the field. It is a sharp strike with every detail, even the minute features, boldly and completely defined. The central obverse shows brilliant silver with faint champagne color, surrounded by reddish-brown, blue, and lilac toning at the borders. A small splash of brown toning crosses just below Liberty’s neck, and positively identifies the pedigree of this piece. The reverse has deeper champagne color at the center, surrounded by peripheral russet and blue toning. Census: 1 in 66, 0 finer (10/12).

From The Greensboro Collection, Part II. PCGS# 6405, CoinPlex ID# LHP1853ARRRAYS

1854 Arrows Half Dollar, PR66 Tied for Finest of Only 10-12 Proofs Believed Known

5668 1854 Arrows PR66 NGC. Perhaps the finest proof known, the ex: Kaufman Premium Gem is tied for the grade with one other piece in the NGC census. No finer examples have been certified. The proof 1854 half dollar appears to be the rarest silver denomination of the date.

When Breen compiled his *Proof Encyclopedia*, just three specimens were recorded, with the comment that the half dollar is “about as rare as the quarter.” Since he earlier said that the 1854 proof quarter is “about as rare as the dime,” all three denominations were equally rare in his opinion. By 1988 he revised his opinion to state “probably fewer than 20 proofs survive” in his *Complete Encyclopedia*. Others suggest that about 10 to 12 survive, a seemingly realistic figure. The proof half dollar is slightly rarer than the dime and quarter, but the often reported figure of just five or six known is certainly too low.

While separated from Liberty’s base and the border, the date and arrows are slightly above center in the exergue. The shield point is over the outer left curve of the 8, and 54 are extremely close but do not touch — similar to Breen’s description, but the stars do not have any extra outlines. No unusual reverse characteristics are noted, other than faint clash marks visible just inside the right shield border. Seated coins of various dates and denominations often show similar clash marks.

This is a wonderful Premium Gem proof with lovely light gold toning at the centers that gradually changes to russet, lilac, and blue near the borders. A slightly uneven strike is indicated by weakness at the upper obverse and lower reverse. The top of Liberty’s head, stars 6 through 10, the eagle’s left facing left, and the left claw all show weak definition. These strike characteristics are also seen on the Pittman and Starr proofs, and likely on all others. Census: 2 in 66, 0 finer (10/12).

Ex: J.M. Clapp; John H. Clapp; Clapp Estate via Stack’s (1942); Louis E. Eliasberg, Sr. (Bowers and Merena, 4/1997), lot 1958; Phil Kaufman Collection of Early Proof Sets, Part One / ANA Signature (Heritage, 8/2007), lot 1791, where it brought \$109,250.

From The Greensboro Collection, Part II. NGC ID# 27TW, PCGS# 6407, CoinPlex ID# LHP1854ARR

1855/854 Arrows Seated Half, PR65 Cameo Perhaps Only Six Examples Known

5669 1855/854 Arrows PR65 Cameo NGC. FS-005. The 1855/54 proof half dollar, formerly in the Phil Kaufman Collection, is the *only* example of this issue assigned the Cameo designation by either NGC or PCGS. The rarity of this overdate cannot be overstated. Walter Breen (1989) could only account for three specimens, and Randy Wiley and Bill Bugert (1993) say at least three examples are extant. It is our belief that a few more pieces have survived, but not many more. NGC and PCGS have certified 15 1855/54 proof halves, a number that undoubtedly includes several resubmissions.

Some Normal Date coins were likely described as overdates, and vice versa, in previous catalog appearances. That said, our research results in the following listing (current up to April 2008):

1. **PR65 Cameo NGC. The present specimen.** We are unable to definitively match this piece with any of the following. Phil Kaufman Collection / Central States Signature (Heritage, 4/2008), lot 2398, where it brought \$40,250.
2. **PR65 PCGS.** Norweb Collection (Bowers and Merena, 11/1988, lot 3166; Baltimore '93 Auction (Superior, 7/1993), lot 428. Superior catalogers say "Minor spot or roughness between NI of UNITED."
3. **PR64 PCGS.** Rarities Sale (Bowers and Merena, 8/1996), lot 137; Dr. Juan XII Suros Collection of U.S. Overdate Coinage (Superior, 2/1999), lot 200; October 2000 Pre-Long Beach (Superior, 10/2000), lot 4378; Long Beach Sale (Heritage, 9/2002), lot 6855.
4. **PR63 PCGS.** Chicago Sale (Superior, 8/1991), lot 516.
5. **PR63 NGC.** Jules Reiver Collection (Heritage, 1/2006), lot 21324. The reverse photo shows a mark between the beak and left facing wing.
6. **PR61 PCGS.** Richard Allen Collection (Heritage, 2/2001), lot 7822. Is this the "impaired" example that Breen (1989) says was once owned by Ted Clarke?

Additional Appearances

- A.PR65 NGC.** The Benson Collection III (Goldberg Coins, 2/2003), lot 548; New York Connoisseur's Collection (American Numismatic Rarities, 3/2006), lot 771.

Delightful field-device cameo contrast appears on both sides of this Gem proof. Untoned surfaces benefit from a well-executed strike, resulting in completeness on the frosted design elements, further highlighting their variance with the mirrored fields. A faint unpolished area is visible in the right obverse field to the right of Liberty's elbow, as minted. Remnants of the underdate are evident under the final two digits. A pleasing coin that will be an excellent fit in a Seated Liberty proof collection.

From The Greensboro Collection, Part II. PCGS# 86406

Premium Gem Proof 1855 Seated Half None Certified Finer, Ex: Kaufman

5670 1855 PR66 NGC. Ex: P. Kaufman. The Kaufman 1855 proof half dollar is the finest known Normal Date specimen outside the Cameo designation. Previous researchers differ on the number of surviving specimens. Randy Wiley and Bill Bugert, in their *Complete Guide to Liberty Seated Half Dollars*, suggest possibly 20 Normal Date pieces are known, while Walter Breen (1988) says there may be 12 coins extant.

We feel that the above estimates of 1855 Normal Date proof half dollar survivors are somewhat high. NGC and PCGS have certified 11 examples, including an unknown number of resubmissions and crossovers, and an analysis of auction appearances of which we are aware results in four separate specimens, and three additional coins that may be duplicates. Readers should be aware that we are unable to locate auction appearances of three PCGS-graded pieces, one with a Cameo designation; moreover, some Normal Date coins were likely described as 1855/54 proof halves, and vice versa, in previous catalog appearances:

1. **PR66 NGC. The present coin.** Baltimore '93 Auction (Superior, 7/1993), lot 427; Phil Kaufman; Central States Signature (Heritage, 4/2008), lot 2397.
2. **PR65 NGC.** John Jay Pittman (David Akers, 5/1998), lot 1549; Richmond Sale III (David Lawrence Rare Coins, 3/2005), lot 1798; Pre-Long Beach Sale (Ira and Larry Goldberg, 2/2006), lot 1474.
3. **PR65 NGC.** Pre-Long Beach Elite Auction (Superior, 5/2003), lot 2574.
4. **PR64 Cameo PCGS.** Phoenix Signature (Heritage, 3/2008), lot 692; Central States Signature (Heritage, 4/2009), lot 2485; Los Angeles Signature (Heritage, 7/2009), lot 1129; Houston Signature (Heritage, 12/2009), lot 737.

Additional Appearances

- A. Gem Brilliant Proof.** Empire State Collection (Stack's, 1/1997), lot 577.
B. Brilliant Proof. Reed Hawn Collection (Stack's, 8/1973), lot 185.
C. Proof. Brand-Lichtenfels I (Kreisberg-Schulman, 2/1961), lot 1840.

A captivating array of iridescent yellow-gold, sky-blue, lavender, crimson, and orange-gold patination adorns the cameolike obverse of the Premium Gem ex: Kaufman half, while a ring of turquoise clings to the reverse borders, changing to dappled tan-gray and turquoise in the central areas. An attentive strike sharpens the design features, save for minor softness in a couple of the star centers. Close inspection reveals both sides to be devoid of mentionable marks. A shallow unpolished area, as minted, between the D of DOL. and the branch stem and a toning spot between star 5 and Liberty's shoulder enabled us to pedigree this coin. Census: 1 in 66, 0 finer (11/12).

From The Greensboro Collection, Part II. NGC ID# 24LE, PCGS# 6408, CoinPlex ID# LHP1855ARR

Branch Mint Gem Proof 1855-S Half Dollar One of Just Three Possible Proofs The Only Currently Available Example

5671 1855-S PR65 NGC. WB-1. Ex: Golden Gate Collection. The obverse lacks drapery at the elbow, a sign that the dies were polished prior to striking. In *A Register of Liberty Seated Half Dollar Varieties*, Bill Bugert writes: "Proofs and early business strikes have no clash marks; the no drapery characteristic resulted from the special die preparation for proof strikes." The bottoms of all four digits in the date are weak, especially the 8 and first 5. That weakness is noted on this piece and is visible in the plate of the Smithsonian specimen illustrated in Bugert's reference.

Numismatic literature discusses three different proof 1855-S half dollars, including: one that is now part of the Smithsonian Institution Collection; a second piece that has not been seen since the 1950s; and this specimen, the only example currently available to collectors. Four die varieties are identified for the 1855-S half dollars, and the WB-1 marriage appears to be the first minted. Die state evidence shows that the proofs were the first half dollars minted in San Francisco, prior to any business strikes.

The Smithsonian Institution specimen has been part of the National Numismatic Collection since the time of issue, when San Francisco Mint Superintendent Robert Aiken Birdsall preserved the piece and sent it to Mint Director James Ross Snowden. Walter Breen notes that the 1855-S proof half dollar was held in Division V, Number 79, of the Mint Cabinet, commenting: "an odd place for it, as this section consisted mostly of patterns and pioneer gold." Bill Bugert examined the 1855-S half dollar at the Smithsonian Institution in May 1989. At the time he graded the coin 63+, noted its bright proof surfaces, and observed a die crack between the D and S in the legend.

Walter Breen wrote of an example that appeared in a March 1956 Bolender sale. However, numismatist Scott Rubin checked the catalog and found that no such coin was offered. He checked further and found that Bolender did offer an 1855-S proof half dollar in his April 1953 sale. Lot 87 in that 1953 catalog was described as: "1855 San Francisco mint, half-dollar, Proof. Bluish and golden toned. The finest piece known to me, and lists uncirculated at \$150 in Guide Book. This specimen should be worth much more and cost \$167 several years ago." The coin was offered as part of the Louis L. Lincoln half dollar collection.

The third known proof, the piece offered here, has appeared in several auctions since its first appearance in 1955. This piece has brilliant proof surfaces with razor-sharp design motifs and no signs of weakness on either side. The obverse is bright silver with a splash of faint lilac toning near star 13, while the reverse has a delicate golden tone. There were no plates in the Bolender catalog, and the timing is such that the Lincoln specimen may be the same coin offered here. In fact, there is a high probability that it is the same coin, reducing the population from three coins to two, making this piece the only 1855-S proof half dollar available to collectors.

This coin is a numismatic showpiece in any collection and belongs in the cabinet of a numismatist who will appreciate its beauty, rarity, and historical importance.

Ex: Farish Baldenhofer (*Stack's*, 11/1955), lot 723; Reed Hawn (*Stack's*, 8/1973), lot 188; Matthew Bryan Collection (*NASCA*, 11/1977), lot 549; David K. Carnegie (*New England Rare Coin Auctions*, 11/1980), lot 751; Auction '86 (*Paramount*, 7/1986), lot 1646; *The Rarities Sale* (*Bowers and Merena*, 8/1998), lot 180; *Richmond Collection* (*David Lawrence*, 3/2005), lot 1797.

1856 Seated Liberty Half, PR66 Spectacular Multicolor Toning, Ex: Kaufman

5672 1856 PR66 NGC. Ex: Phil Kaufman. Although NGC has certified two finer proofs, both with Cameo designations, the resubmission factor may account for one of them. The Kaufman specimen is probably the second, or at worst, the third-finest known proof half dollar of the date. Only about 25 proof 1856 half dollars survive, the rarest Seated denomination of the year. In 1977, Breen stated that about 14 exist, raising the total to 20 to 25 in his *Complete Encyclopedia*. Wiley and Bugert, Dave Bowers, and Dave Akers all reported similar populations in later years. Most of the survivors are in lower numeric grades.

All details are complete and full, exactly as they appeared in the dies. Pristine surfaces are free of defects with deep mirrors and frosty devices. Like many proofs of the era, cameo contrast is subdued by moderate to deep toning. Both sides of this Premium Gem display light reddish-gold toning on the devices, framed by pale lilac-gray and electric-blue. Census: 2 in 66, 0 finer (11/12).

Ex: Milwaukee Signature (Heritage, 8/2007), lot 1796.

From The Greensboro Collection, Part II. NGC ID# 27TF, PCGS# 6410, CoinPlex ID# LHP1856

1857 Seated Half Dollar, PR67 Ex: Garrett-Kaufman

5673 1857 PR67 NGC. The Phil Kaufman 1857 proof half dollar ranks in the top two or three of the 70 coins certified by NGC and PCGS. An unknown number of 1857 proofs were struck. Previous researchers have estimated that between 13 and 16 pieces may exist. We believe the number to be considerably higher and estimate that between 25 and 45 proofs actually survive.

The Kaufman 1857 proof half dollar displays beautiful cobalt-blue, lavender, violet, and yellow-gold toning over both sides, being just a shade or two deeper on the reverse. The surfaces are fully struck throughout. Each side exhibits noticeable field-motif contrast, especially when the coin is rotated under a light source. As might be expected for the Superb Gem designation, the surfaces are impeccably preserved. Indeed, we are hard-pressed to locate pedigree identifiers for future catalogers and researchers.

Ex: Professor Anthon Collection, Part V (Cogan/Bangs, 10/1884), lot 239; John Work Garrett Collection; The Johns Hopkins University (Stack's 3/1976), lot 226; Phil Kaufman; ANA Signature (Heritage, 7-8/2008), lot 1829.

From The Greensboro Collection, Part II. NGC ID# 27TG, PCGS# 6411, CoinPlex ID# LHP1857

1858 Seated Liberty Half Dollar, PR67
Finest Certified at PCGS

1859 Seated Half, PR66
Extraordinary Toning

5674 1858 PR67 PCGS. Years ago, 80 coins was the reported mintage for all 1858 silver proof coins, although today we understand that the actual mintage was quite a bit higher, perhaps 200 to 300 pieces for each denomination. It is doubtful that the exact mintage will ever be ascertained, as contemporary records are lacking. During 1858, the Mint began widespread distribution of proof coins to collectors with greatly increased mintages over previous years.

On this 1858-dated Seated half dollar, the date is slightly above center in the space between the base and border, with the 5 nearly touching the base. Carefully made dies show few identifying characteristics. Short points project from dentils over the cap and star 9, and the rightmost part of the rock below Liberty's foot has missing detail from lapping. The reverse has numerous faint die lines in the fields, along with a projection from the right side of the fourth vertical stripe.

Both sides of this lovely Superb Gem proof have deeply mirrored proof surfaces with light cameo contrast. The design elements are bold, as expected. Delicate gold toning is lighter at the center with increasing intensity approaching the borders. Splashes of brilliant blue and pale violet add to the overall eye appeal of this example. The surfaces show faint planchet striations that are remnants of the minting process. An amazing coin for the specialist or type collector. Population: 1 in 67, 0 finer (11/12).

From *The Greensboro Collection, Part II*. PCGS# 6412, NGC ID# 27TH, CoinPlex ID# LHP1858

5675 1859 PR66 NGC. The *Guide Book* reports a mintage of 800 proofs for the 1859 Seated half dollar, using at least three different die pairs according to Breen. This Premium Gem proof shows some of the vertical shield lines from the first, fourth, and fifth lines extending upward into the horizontal stripes, but it is not an obvious match for these minor varieties. What is blatant is the tremendous eye appeal evident over pristine, fully struck surfaces. The incredible color includes shades of blue and rose with pinkish-gold and a bit of near-brilliance remaining. The strike is full throughout, another plus. A stunning example of this early proof Seated half. Census: 4 in 66, 3 finer (12/12). NGC ID# 27TJ, PCGS# 6413, CoinPlex ID# LHP1859

1859 PR66 Cameo Half Dollar
Among the Finest Known

5676 1859 PR66 Cameo NGC. One of the earliest Seated proof half dollar issues made for wide distribution, the 1859 has a mintage of 800 specimens, which were dispersed in sets. Many examples with little patina show strong contrast, but few coins combine the cameo appearance and great preservation of this PR66 Cameo survivor. Faint glints of champagne-gold color visit the gleaming fields, while the sharply struck devices are frost-white. A few tiny planchet flakes are scattered on either side of Liberty, and a Mint-made depression appears to the left of the date. Census: 1 in 66 Cameo, 1 finer (10/12).

From The Greensboro Collection, Part II. PCGS# 86413, CoinPlex ID# LHP1859CA

1860 Seated Half, Cameo Superb Gem
Seldom Available With Contrast

5677 1860 PR67 Cameo NGC. The proof half dollar series saw its first four-figure mintage in 1860, when official production reached exactly 1,000 specimens; the net mintage likely slides back into three figures to account for melting of unsold pieces. Offered here is one of just 13 Cameo examples certified by NGC, a coin tied with three others for finest in the Census (11/12). Rich rose, gold, and blue toning over each side lets both the frost of the devices and the mirrors of the fields shine through, and this Cameo Superb Gem thus supplies both patina and contrast, which add up to fantastic eye appeal.

From The Greensboro Collection, Part II. PCGS# 86414, CoinPlex ID# LHP1860CA

Top-Notch 1860 Half Dollar, PR67 Cameo
None Numerically Finer

5678 1860 PR67 Cameo PCGS. The year 1860 marked the third year of commercial proof set offerings by the Philadelphia Mint, and the popularity of the program was reflected in the generous proof mintage of 1,000 Seated Liberty half dollars. Unfortunately, demand fell short of predictions, possibly because of the economic uncertainty caused by events that led to the Civil War the following year. It is likely that many proofs went unsold and were melted after the end of the year. Walter Breen estimated only 525 examples were actually distributed.

The present coin is among the finest survivors of this small distribution. Richly frosted devices provide startling cameo contrast with the brightly reflective fields. The design elements are sharply detailed and the pristine surfaces show just a few wisps of golden-tan toning. Population: 3 in 67 (1 in 67+) Cameo, 0 finer (11/12).

From *The Richard P. Ariagno, M.D. Collection*. PCGS# 86414, CoinPlex ID# LHP1860CA

1861 Half Dollar, PR66 Cameo
Deeply Mirrored, Peripherally Toned

5679 1861 PR66 Cameo NGC. Heritage had the privilege of offering this specimen a touch over five years ago as part of the Jules Reiver Collection. At the time, it was graded PR65, a level that proved too conservative in its rating of both condition and contrast. Certainly the interplay between frosted devices and mirrored fields is at a Cameo level, and the mirrors are better-preserved than expected for a simple Gem. Blue and golden-tan border toning confirms the pedigree and further adds to the eye appeal.

Ex: *Jules Reiver Collection (Heritage, 1/2006)*, lot 21340, then graded PR65, realized \$4,887.50.

From *The Greensboro Collection, Part II*. PCGS# 86415, CoinPlex ID# LHP1861CA

1862 Cameo PR67 ★ Half Dollar
Peripherally Toned, Nearly Perfect

5680 1862 PR67 ★ Cameo NGC. A simply spectacular Civil War-era proof that offers gleaming mirrors and heavily contrasted devices beneath rich patina. Amber-gold centers fade through rings of peach and violet until they yield to the outermost bands of electric-blue and teal. The strike is razor-sharp, the surfaces are virtually perfect, and the eye appeal is incredible for this issue of 550 proofs. This is one of just two PR67 Cameo survivors tied for finest certified by NGC, with none at that level known to PCGS (12/12); interestingly, both of the NGC pieces received the Star designation, which may suggest that they are one and the same.

Ex: Dallas Signature (Heritage, 10/2008), lot 925; ANA Signature (Heritage, 8/2010), lot 3168.

From The Greensboro Collection, Part II. PCGS# 86416, CoinPlex ID# LHP1862CA

Superb Gem Proof 1863 Seated Half
Tied for Finest Certified

5681 1863 PR67 NGC. Milky chestnut-gold and powder-blue encompass both sides of this immaculate Civil War Superb Gem. The strike is bold overall despite minor incompleteness on the left-side stars, Liberty's forehead curls, and the eagle's left (facing) ankle. It is amazing that the present piece passed through generations of collectors without receiving hairlines, since "brilliant is best" was the dominant market philosophy for several decades. A mere 460 proofs were struck, and only a handful have survived in such lofty condition. Business-strikes are also quite scarce and underrated in high grade. Census: 3 in 67, 0 finer (11/12).

From The Greensboro Collection, Part II. NGC ID# 27TP, PCGS# 6417, CoinPlex ID# LHP1863

1864 Seated Half, PR66 Ultra Cameo Tied for Finest With This Finish

5682 1864 PR66 Ultra Cameo NGC. The 1850s and 1860s are not especially fertile ground for collectors seeking Ultra Cameo proof coinage. In the case of the 1864 half dollar, there are only four entries for such pieces, one certified as PR64, one PR65, and the other two rated PR66 (11/12). This is one of the finest pieces known, regardless of finish, exquisitely frosted on the sharply defined devices with faintly textured, deeply reflective mirrors around. Both sides present stark black-and-white contrast with no discernable color. Fantastic eye appeal in all respects.

From The Greensboro Collection, Part II. PCGS# 96418, CoinPlex ID# LHP1864DC

Superb Gem Proof 1865 Seated Half Only One Finer Coin at NGC

5683 1865 PR67 NGC. The 1865 Seated Liberty half dollar is of some importance to type collectors as the last Philadelphia Mint issue without the motto IN GOD WE TRUST. The strained economic conditions of the Civil War kept demand for proof sets low in 1865, and only 500 proof Seated Liberty half dollars were struck. Accordingly, the issue is scarce-to-rare in all grades, and examples in Superb Gem condition are very rare.

Few survivors can match the quality and eye appeal of the present coin. The design elements are sharply detailed throughout, and the deeply mirrored fields shine through iridescent shades of golden-brown, lime-green, and cobalt-blue patina. Census: 6 in 67, 1 finer (11/12).

From The Greensboro Collection, Part II. NGC ID# 27TS, PCGS# 6419, CoinPlex ID# LHP1865

1867 Seated Half, PR67 Ultra Cameo Finest Known of This Early With Motto Issue

5684 1867 PR67 Ultra Cameo NGC. This is the single finest proof 1867 half dollar certified by either NGC or PCGS. While NGC has certified three pieces at the PR67 grade level, only this one has received the Ultra Cameo designation. In fact, this is the only proof 1867 half dollar to receive such a designation in any grade. Similarly, a PR66 Deep Cameo piece is the only coin given such a designation by PCGS. For the collector who desires the finest possible quality, this is a most important opportunity. We believe this piece is the single finest proof 1867 half dollar that still exists today.

Both sides of this Superb Gem proof have deeply mirrored fields with fully lustrous and frosty devices, appearing as if someone carefully painted the devices with white, but of course this appearance is strictly the result of production from fresh dies with polished fields and unpolished design elements. Close examination reveals evidence of a specially prepared planchet, highly polished in preparation for the careful production required to produce proof coins. The centers on each side are fully brilliant with rich gold, lilac, and sky-blue toning near the borders and encroaching only slightly upon the stars and letters.

Little is known about the proof half dollars of this date. The original mintage was 625 coins, and most or all of those pieces were probably distributed. A survival rate of 40% to 50% is a good general rule, indicating that 250 to 300 proofs still exist today. Walter Breen reported With Drapery and No Drapery variations for these coins. Those lacking the drapery at Liberty's elbow represent later die states after the coinage dies had been lapped or resurfaced.

Ex: National Money Signature (Heritage, 3/2007), lot 833.

From The Greensboro Collection, Part II. PCGS# 96425, CoinPlex ID# LHP1867DC

Early 1868 Half Dollar, With Motto
PR67 Cameo, Among the Finest Graded

5685 1868 PR67 Cameo NGC. Despite the recorded proof production of 600 pieces in this Reconstruction-era year, Superb Gem examples of the 1868 Seated half are quite elusive in all contrast levels. NGC has certified five coins in PR67, with one PR68 finer. Those PR67s include two each in Cameo and Ultra Cameo, and the present Cameo piece is bettered only by a single PR67 ★ Cameo example (11/12). This charming and historic coin should nonetheless be a star of many a collector's holdings, with a rim of rose color accenting the pristine silver-gold surfaces in the centers of each side. Some interesting missing details, as made at the Mint (and clearly in the die), appear at Liberty's sandal and the rock just beneath, and on the lower feathers of the eagle directly under the shield and the left (facing) wing. The strike as produced by the dies is nonetheless full throughout.

From The Greensboro Collection, Part II. PCGS# 86426, CoinPlex ID# LHP1868CA

1871 Half Dollar, Superb Cameo Gem Proof
Tied for Finest Certified

5686 1871 PR67 Cameo NGC. The proof mintages of Seated halves from the first three years of the 1870s were curiously large — a reported 960 pieces, in the case of the 1871. Some of the reverse dies from previous years (1868-1870) were apparently reused on some proofs of 1871, including the present coin, which shows incomplete vertical stripes 1-3 in the shield, especially at the bottom of stripes 2-3. This piece has splendid and generous cameo contrast with a full strike over silver-white surfaces that are lightly gold-tinted. Census: 2 in 67 Cameo, 0 finer (11/12).

From The Greensboro Collection, Part II. PCGS# 86429, CoinPlex ID# LHP1871CA

1873 No Arrows, Closed 3 Half
PR67 Cameo
Only One Numerically Finer Coin at NGC

5687 1873 No Arrows, Closed 3 PR67 Cameo NGC. The year 1873 was a busy one at the Philadelphia Mint, although certain issues such as the Open 3 two cent piece may have been struck later. The Mint struck 600 proof No Arrows, Closed 3 half dollars, made none of the No Arrows, Open 3 variety, and then struck 550 Arrows, Open 3 halves. This Closed 3 specimen, certified PR67 Cameo, is among the few finest certified. The strike is bold but not full. Light lilac toning covers the centers, framed by narrow bands of cobalt-blue and sage. The surfaces are impeccably preserved. Census: 1 in 67 Cameo, 1 in 67 ★ Cameo, 1 in 68 (11/12).

Ex: Dallas Signature (Heritage, 12/2005), lot 844, which realized \$12,075; Baltimore Signature (Heritage, 7/2008), lot 572, which brought \$13,800.

From The Greensboro Collection, Part II. PCGS# 86431, CoinPlex ID# LHP1873NACL3CA

Superb Gem Proof 1873 Arrows Half Finest Certified at Either Service

5688 1873 Arrows PR67 Ultra Cameo NGC. While it is less well-known for the fact than many other issues sharing the trait, the proof half dollars of 1873 come in three different varieties. The No Arrows, Closed 3 was the first to be struck, to the tune of 600 pieces. The little-known (but prized by specialists) No Arrows, Open 3 proof half is an enigmatic rarity, possibly a short-lived transitional coin but more likely a deliberately minted delicacy.

The more familiar third (or, popularly, “second”) variety has the Open 3 date logotype with arrows flanking the date. As with the arrows’ first appearance in 1853, they marked a legally mandated change in weight; unlike in 1853, the actual weight difference was small enough to be almost laughable. The addition of the arrows was excuse enough for the Mint to strike more proofs for sale to collectors, though, and 550 specimens were added to the year’s tally.

Both sides of this Arrows Superb Gem have a high degree of field-to-device contrast, thanks to deeply mirrored fields and thickly frosted devices which combine for a powerful cameo effect under a thin veil of golden patina. This is the *only* Ultra Cameo proof 1873 Arrows half dollar that NGC has certified in any grade, and the closest rival in the PCGS *Population Report* is a single example in PR66 Deep Cameo (11/12). This incredibly important offering will make a wonderful addition to an advanced type collection.

From The Greensboro Collection, Part II. PCGS# 96434, CoinPlex ID# LHP1873ARRDC

1874 Arrows Half, PR67 Cameo Tied for Finest Certified

5689 1874 Arrows PR67 Cameo NGC. Whether series enthusiast or type collector, any numismatist on the lookout for a high-end Arrows, With Motto proof half dollar will want to take a close look at the present lot. And a great many collectors do keep a sharp eye out for this short-lived type. When the Mint converted to the metric system in 1873, there was a slight increase made to the weight of dimes, quarters, and halves. The Mint followed the form established 20 years previously when the weight was decreased slightly, and arrow-heads were added to each side of the date to indicate this decrease. In the case of the weight reduction in 1853, there was a need to designate such coins, as bullion hoarding had been widespread in previous decades because gold and silver coins had a greater intrinsic value than their face value. In the case of metric system conversion in 1873, there probably was no need for such a designation. In the case of the half dollar, its weight was only increased from 12.44 gm to 12.50 gm — hardly noticeable, but there it is. The coins were not only designated in 1873 but the following year also, thus giving modern-day collectors two years from which to choose this distinctive type.

This coin has obvious grade appeal and is tied for the finest Cameo example of the date in the combined certified population (11/12), and the overwhelming eye appeal gives the specimen even more validation. Gold-to-peach border toning gives way to pale gray at the centers. The toning is thin, permitting the full effect of mirrors that contrast well with the ample frost over the devices.

1875 PR66 Cameo Half Dollar Strongly Contrasted, Tied for Finest Known

5690 1875 PR66 Cameo NGC. This Premium Gem Cameo proof is marvelously well-struck and thoroughly appealing, a fitting representative of this proof emission of a recorded 700 coins that ushered in the last quarter of the 19th century. The fields are radiant and reflective with a generous layer of mint frost on both sides' devices and a total lack of relevant contact marks. The surfaces are silver-white with a slight golden tinge, and the strike is full throughout, save for minor weakness on Liberty's upper hair curls. Struck from the first die pair described in Breen's *Proof Encyclopedia*: metal spines up from Liberty's calf; unpolished surface between arrowheads. Census: 2 in 66 Cameo, 0 finer (11/12).

From *The Greensboro Collection, Part II*. PCGS# 86436, CoinPlex ID# LHP1875CA

1879 Half Dollar, Immaculate PR68 Tied for Finest Certified

5691 1879 PR68 NGC. Astonishing quality for this low total-mintage issue. Only 4,800 halves were struck for circulation, plus another 620 proofs. This low mintage of business strikes has placed a great deal of date pressure on the proofs. This is one of the three finest examples certified, all graded PR68 at NGC (11/12). This especially attractive coin has a different look on each side. The obverse is light, almost brilliant in the center with deeper reddish-golden patina at the margin. The reverse, however, is deep cobalt-blue. The mirrors are deeply reflective, and there are no discernable marks on either side.

Ex: *FUN Signature (Heritage, 1/2009)*, lot 3863, where it brought \$14,950.

From *The Greensboro Collection, Part II*. NGC ID# 27UE, PCGS# 6440, CoinPlex ID# LHP1879

1883 Seated Half Dollar, PR67 Cameo Low-Mintage Date, None Graded Higher

5692 1883 PR67 Cameo PCGS. The Seated Liberty half dollar business strikes from 1879-1890 (as well as the quarters and some of the dimes) have suffered from benign neglect by all but series specialists, as their miserly mintages — due to the enormous Morgan silver dollar coinages of that era, among other factors — have gone largely unrecognized. The effect of this has been to put added pressure on the proof issues from collectors seeking a choice example. In the case of the 1883 Seated half, only 8,000 business strikes were coined, compared to 1,039 proofs.

This silver-white specimen offers spectacularly brilliant, untuned surfaces with black-on-silver contrast against the snowy devices. This coin is essentially perfect and sharply struck. A trivial contact “dot” in the left obverse field, between stars 2 and 3, is mentioned for pedigree purposes. Population: 3 in 67 Cameo, 0 finer (10/12).

Ex: The Stephen Stokely #1 PCGS Registry Set of Proof Seated Half Dollars; Joseph Thomas Collection (Heritage, 4/2009), lot 2488.

From The Greensboro Collection, Part II. PCGS# 86444, CoinPlex ID# LHP1883CA

1884 Half Dollar, Lovely Toned PR68 One of Only Two PR68 Halves in the Entire Seated Half Series

5693 1884 PR68 PCGS. This is the “second die” described in Breen’s proof *Encyclopedia*, where he comments: “... recutting above l. base of 1, which is above left edge [of a denticle]; rev. of 1885 proofs, 1st white stripe polished, left end of scroll broken away.” This incredible, superlative example shows the “tab” toning favored by many numismatists and color aficionados, with copper-golden centers that meld into electric-blue and pink-champagne borders on both sides.

This is a special half dollar, one that was obviously struck with great care and pride of craftsmanship by Mint personnel 129 years ago. Despite the Breen comment above, there are no obvious signs of die lapping or polishing in any one particular area, aside from the missing scroll end. The dies do appear, however, to have been strengthened, particularly in the area around Liberty’s sandal and foot, which show three distinct, double-sided straps and separation of all the toes. All the star centrils are full, and the shield stripes, gown clasp, drapery folds, and all other details are essentially fully struck. There are no obvious hairlines, contact marks, or other impairments on this coin, which has clearly been preserved with the same care with which it was executed in the first place. The current PCGS population data show this coin to be **one of only two Seated Liberty half dollars of any date to be graded PR68** at that service (the other is an 1885), and one PR68 Cameo 1890 coin has been certified (10/12).

Ex: The Stephen Stokely #1 PCGS Registry Set of Proof Seated Half Dollars / ANA Signature (Heritage, 8/2006), lot 5255.

From The Greensboro Collection, Part II. PCGS# 6445, NGC ID# 27UK, CoinPlex ID# LHP1884

1886 Seated Half, PR67
Wonderfully Toned

5694 1886 PR67 NGC. CAC. Deep, entrancing shades consume each side of this wondrously well-preserved Superb Gem 1886 Seated half proof, struck to the extent of only 886 pieces during a time when even the business strikes were low-mintage issues — in this case 5,000 coins. The strike is complete, as expected, and glimmers of the mirrors peek through vibrant blue-green, azure, violet, and champagne toning in concentric rings. This coin is one only only six submissions in this grade at NGC, and a sole PR68 is finer (11/12). A wonderful coin for the color connoisseurs.

Ex: Central States Signature (Heritage, 4/2008), lot 1176.

From The Greensboro Collection, Part II. NGC ID# 27UM, PCGS# 6447, CoinPlex ID# LHP1886

1888 Half Dollar, Beautifully Toned PR68
The Finest Certified

5695 1888 PR68 NGC. Any high-grade 1888 proof half dollar is important as this issue is scarcer than its already low mintage of 832 pieces would indicate. However, this is the finest example certified by either of the two major services and it is a seemingly perfect coin. Both sides are covered with swirls of rich blue and rose colored toning with a small circle of brilliance at the upper right of the obverse. An exquisite and unimprovable proof Seated Half and one of the finest pieces we have seen of this or any other date.

Ex: Bowers and Merena (8/2000), lot 4180, where it brought \$5,750; FUN Signature (Heritage, 1/2003), lot 7243, unsold; Long Beach Signature (Heritage, 5/2003), lot 6235, where it sold for \$10,925.

From The Greensboro Collection, Part II. NGC ID# 27UP, PCGS# 6449, CoinPlex ID# LHP1888

1889 Superb Cameo Proof Half Dollar Low Total Mintage Date

5696 1889 PR67 Cameo NGC. Untoned, silver-white features are well-frosted over the devices and deeply mirrored in the fields. The surfaces show no distracting abrasions — a feature that confirms the validity of the PR67 designation. Virtually all major features are sharply struck, although we note some incomplete reverse detail on IN GOD WE TRUST that appears to be the result of a partially filled die. Produced toward the end of the Seated half dollar series, the 1889 has a limited mintage of 12,000 business strikes and 711 proofs. Census: 3 in 67 Cameo, 0 finer (10/12).

Ex: FUN Signature (Heritage, 1/2003), lot 7244; ANA Signature (Heritage, 7/2005), lot 6337.

From The Greensboro Collection, Part II. PCGS# 86450, CoinPlex ID# LHP1889CA

1890 PR67 Ultra Cameo Half Dollar Strongly Contrasted Surfaces One of the Finest Known

5697 1890 PR67 Ultra Cameo NGC. While the later proof Seated half dollar issues have high mintages when compared to the series as a whole, the 1890 is an exception. Its total production of just 590 pieces is the lowest such figure since 1877, though the 1890 is valued much the same as its more available counterparts. For the collector seeking a single example of this series as a proof, this 1890 offers excellent eye appeal as well.

This spectacular Superb Gem has everything going for it. The fully struck devices exhibit rich ivory frost and boldly contrast against the distinctly reflective mirrors. Gold-orange and cerulean patina at the margins adds to the coin's visual appeal while having little impact on the cameo effect. Add the incredible preservation, and the combination is irresistible. Census: 4 in 67 Ultra Cameo, 1 finer (10/12).

Ex: Long Beach Signature (Heritage, 2/2008), lot 640, which brought \$29,900.

From The Greensboro Collection, Part II. PCGS# 96451, CoinPlex ID# LHP1890DC

WALKING LIBERTY HALF DOLLARS

Elusive Gem 1917-D Half Dollar Underrated Reverse Mintmark Type

5698 1917-D Reverse MS65 PCGS. The 1917-D Walking Liberty half dollar saw only 765,400 examples of the Obverse Mintmark variety struck, compared with 1,940,000 of the Reverse Mintmark type. Despite the higher mintage, however, the Reverse Mintmark variant is seldom seen in the Gem grade of the present coin, and grade-for-grade it is far more elusive than its lower-mintage counterpart. Apparently fewer examples were set aside at the time of issue when the small D mintmark was moved to the reverse. In high grades this issue is among the rarest in the series after the 1918-D, 1919-D, and 1921-S. This piece is a silver-white, satiny Gem with some of the often-seen "halo" effect around the striding figure of Liberty on the obverse. The bold strike has created a partial split thumb, and there are no singular marks. Excellent eye appeal. Population: 37 in 65, 5 finer (11/12).

From The Western Reserve Collection. PCGS# 6571, NGC ID# 24PS, CoinPlex ID# WLM1917DREV

1917-S Reverse Half Dollar, Lustrous MS65 Sharply Struck, Few Certified Finer

5699 1917-S Reverse MS65 PCGS. CAC. Produced in sizeable numbers, the 1917-S Reverse is plentiful in grades up to and including AU. Mint State survivors, however, are scarce, and Gems are rare. This fully lustrous representative is bathed in delicate silver and gold iridescence that allows full appreciation of a softly frosted finish. The otherwise sharp strike wanes a bit in the centers, and one or two out-of-the-way abrasions are noted toward the rims, but the eye appeal and technical quality are both equally deserving of the Gem designation. Population: 42 in 65, 8 finer (10/12).

Ex: Long Beach Signature (Heritage, 6/2004), lot 6098, which brought \$10,350.

From The Western Reserve Collection. PCGS# 6573, NGC ID# 24PU, CoinPlex ID# WLM1917SREV

Near-Gem 1919-D Half Dollar Distinctly Difficult Date

5700 1919-D MS64 NGC. From a smallish mintage of less than 1.2 million pieces, the 1919-D Walking Liberty half dollar is the most challenging issue of the series in grades above the Choice level. The present coin is an attractive Choice example that shows some of the usually seen softness on the central devices. That being said, some emerging detail is evident on Liberty's thumb and head, and the feathers on the eagle's leg show more definition than the average specimen. The lustrous surfaces display a few hints of light gold toning, with no mentionable distractions. Census: 81 in 64, 4 finer (11/12). NGC ID# 24PZ, PCGS# 6578, CoinPlex ID# WLM1919D

Satiny Near-Gem 1919-D Half Dollar

5701 1919-D MS64 PCGS. The 1919-D Walking Liberty half dollar is an acknowledged key to the series in the higher Mint State grades, and it is likely the single most elusive issue of all at the Gem level. This silver-gray near-Gem is one of 71 submissions in this grade at PCGS, and only 11 are finer there; NGC has seen 82 grading events in MS64 with only four finer (12/12). Soft satin luster dominates each side, with some weakness on the central portions of Liberty. The reverse is a bit better-struck overall. There are few mentionable marks appearing on either side. PCGS# 6578, NGC ID# 24PZ, CoinPlex ID# WLM1919D

High-End Near-Gem 1919-D Half Dollar Among the Rarest Issues in This Grade

5702 1919-D MS64 PCGS. CAC. Even though the 1919-D Walking Liberty half dollar had a nominal mintage of 1.16 million coins, most of them appear to have circulated; even today, they occasionally turn up in accumulations of 90% silver, along with more-abundant dates such as the 1918-S and 1920-S. It appears as though precious few were saved for posterity, and today the issue is among the rarest of the series in high grades, and probably the sole rarest in Gem condition. This near-Gem is a silver-white “just-miss Gem” coin, a high-end piece with no discernible toning, typical satiny luster, and few marks for the grade. The strike through the centers is weak, a trait the issue is known for. Population: 71 in 64 (1 in 64+), 11 finer (11/12). PCGS# 6578, NGC ID# 24PZ, CoinPlex ID# WLM1919D

1919-S Half Dollar, Vibrant MS65 Second Rarest Series Issue in Mint State

5703 1919-S MS65 PCGS. From a small mintage of 1.5 million pieces, the 1919-S is the second-rarest Walking Liberty half dollar in Mint State grades. The date circulated extensively at the time of issue, and few examples were saved for numismatic purposes. Specimens in Gem condition are considered rare.

The present coin displays better than average details, although the characteristic softness is present on the central obverse and the eagle’s leg. Both sides exhibit vibrant mint luster and brilliant surfaces. Visual appeal is especially strong. Population: 39 in 65, 11 finer (10/12).

From The Western Reserve Collection. PCGS# 6579, NGC ID# 24R2, CoinPlex ID# WLM1919S

Frosted Gem 1920-D Half Dollar Impeccable Ice-White Surfaces

5704 1920-D MS65 PCGS. Ex: Dakota Collection. Gem 1920-D Walking Liberty half dollars may not be appreciated outside of series specialists, but the issue is an extremely elusive one on a par with some better-known members of the collection such as the 1919 and 1921. The present Gem example is one of only 41 submissions at this grade level at PCGS, surpassed by only six in MS66 (11/12). Radiant, frosty luster runs over ice-white surfaces that boast superlative eye appeal and few marks of any import. The bold strike over both sides is an added plus, and an interesting die crack appears on the reverse, running from the rim through TE to the top of the wing. For collectors who prefer their coins untuned yet completely original, this is not a piece that will be easily bettered.

From The Western Reserve Collection. PCGS# 6581, NGC ID# 24R4, CoinPlex ID# WLM1920D

1920-S Half Dollar, Gem Condition Possible Pryor Hoard Coin

5705 1920-S MS65 PCGS. CAC. At the Gem level, the 1920-S Walking Liberty half is seldom seen finer, as each service has certified only a handful of finer coins. PCGS has seen 46 grading events in MS65 with one in MS65+ and five finer (11/12). Of those 47 Gems, only eight also boast the CAC endorsement, including the present piece.

Jim Halperin writes of this issue on PCGS CoinFacts:

"James Bennett Pryor collected U.S. half dollars as a life-long passion and he indeed succeeded in putting together a complete 1794 to date set in fabulous condition. Along the way he had acquired an original roll of 1892-S Barber half dollars, which he sold to me in the mid 1970s, and two original rolls of 1920-S half dollars. He sold me the 1920-S half dollars in the late 1970s. They were frosty original coins that would grade MS64 to MS66 today, maybe even MS67 for the best one. It was an amazing deal and the only 'quantity' deal of this rare early Walking Liberty half dollar I have ever seen or heard of."

While we have no hint of the provenance of this coin, it certainly could be a survivor from the Pryor hoard. The eye appeal is far above the norm, with silver and ice-blue surfaces showing few marks amid satin luster. Minor strike weakness appears in the areas the issue is well-known for — Liberty's hand and the tops of the 19 in the date — but alert collectors will recognize the premium quality. PCGS# 6582, NGC ID# 24R5, CoinPlex ID# WLM1920S

Lively MS65+ 1920-S Half Dollar
Ex: Dakota Collection

5706 1920-S MS65+ PCGS. CAC. Ex: Dakota Collection. The Walking Liberty dates from 1919 and 1921 get most of the attention, leaving the coins of 1920 in the dust, but advanced collectors well know how conditionally challenging the 1920-S can be in Gem and (especially) better condition. This MS65+ survivor has significant, though by no means all-encompassing golden overtones with bright underlying luster and a few lavender hints at the margins. Details is typically soft on central features, though the thumb on Liberty's branch hand has a full outline. Population: 47 in 65 (1 in 65+), 5 finer (11/12).

From The Western Reserve Collection. PCGS# 6582, NGC ID# 24R5, CoinPlex ID# WLM1920S

1921 Walking Liberty Half Dollar, MS65
Low-Mintage Key

5707 1921 MS65 PCGS. Ex: Sounder. This is a white coin with just the slightest bit of golden toning to emphasize its pervasive brilliant luster. It is reasonably well-struck for the issue, with full skirt lines and good definition on Liberty's hand and thumb. The surfaces show a few minor abrasions, in line with the grade, along with evidence of a fairly strong die clash (as struck), particularly on the reverse. The low-mintage 1921, of course, is famous as one of the keys to the Walking Liberty half dollar series, and is often one of the last coins to be acquired in order to complete the set. This is one of the finest of the date available, as evidenced by its PCGS population of 53 in 65, four finer (10/12).

Ex: FUN Signature (Heritage, 1/2007), lot 1012, where it brought \$13,800.

From The Western Reserve Collection. PCGS# 6583, NGC ID# 24R6, CoinPlex ID# WLM1921

Gem 1921 Half Dollar
Rare at This Grade Level

5708 1921 MS65 PCGS. All of the celebrated, low-mintage 1921-PDS Walking Liberty halves need no introduction to series specialists. For the uninitiated, we note that the 1921 Philadelphia half dollar, with 246,000 pieces struck, is the second-lowest mintage of the series behind the 1921-D, at 208,000 coins. It is the higher-mintage 1921-S, however, that is generally acknowledged as the absolute rarest overall, despite its 548,000-coin production figure. The 1921 in Gem condition is still rare and quite in demand, although not so elusive as the 1917-S Obverse, the 1919-D and 1919-S, or the other two 1921 issues at that grade level. This MS65 PCGS example shows the bold strike the issue is known for, with a split thumb and much head detail on Liberty. The surfaces are frosty, mostly silver-white with slight pinkish hues. A small dark spot appears near the reverse rim at the ME of AMERICA but few marks occur, consistent with the grade. Population: 53 in 65 (1 in 65+), 4 finer (11/12). PCGS# 6583, NGC ID# 24R6, CoinPlex ID# WLM1921

1921-S Walking Liberty Half, MS62
Low-Mintage Key

5709 1921-S MS62 NGC. The record-breaking mintage of silver dollars in 1921 strained the resources of all three operating mints to the limit, resulting in a limited production of Walking Liberty half dollars that year. The San Francisco Mint achieved a modest production of 548,000 pieces, and the Denver and Philadelphia totals were even smaller. Perhaps because contemporary numismatists noticed the smaller mintages, more examples of the P- and D-mint issues were saved, making the 1921-S more elusive than either of its sisters today. In fact, the 1921-S is the rarest issue of the series in Mint State grades.

The present coin is a well-struck MS62 specimen with a touch of softness on Liberty's head and wreath hand, as always seen on this issue. The lightly marked surfaces display satiny mint luster complementing a few hints of gold and amber toning. Census: 8 in 62, 88 finer (11/12). NGC ID# 24R8, PCGS# 6585, CoinPlex ID# WLM1921S

1921-S Walking Liberty Half, MS62
Premier Series Rarity

5710 1921-S MS62 PCGS. Even though more than a half-million 1921-S halves were struck, few bothered to save them at the time of issue. Most likely the postwar recession made it difficult for the common man to think of anything as esoteric as the coin in his pocket when jobs were scarce. When a '21-S is found Uncirculated it invariably has satiny luster, as seen on this piece. Each side has even, subdued rose-lilac toning and there are remarkably few abrasions present. The strike details are also surprisingly strong for an early Walker. Quite a good value for this premier series rarity.

From The Western Reserve Collection. PCGS# 6585, NGC ID# 24R8, CoinPlex ID# WLM1921S

1923-S Half Dollar, Sharply Struck MS65
Scarce Semikey Issue

5711 1923-S MS65 PCGS. The 1923-S half dollar is rarer in Mint State than its rather sizable mintage of 2,178,000 pieces might suggest. In this regard, Jeff Ambio writes in his 2008 *Walking Liberty Half Dollar* reference: "... the 1923-S trails only the lower-mintage 1917-S Obverse, 1919-S and 1921-S as the rarest San Francisco Mint Walking Liberty Half Dollar."

Vibrant luster adorns the present Gem specimen, complementing the remarkably strong strike. The gown lines are sharply incised, and relatively strong (though not quite full) definition is seen on Liberty's branch hand. Impeccably preserved surfaces are essentially untuned. All in all, an outstanding S-mint representative. Population: 41 in 65 (1 in 65+), 8 finer (10/12).

Ex: FUN Signature (Heritage, 1/2009), lot 3916, where it brought \$13,800.

From The Western Reserve Collection. PCGS# 6586, NGC ID# 24R9, CoinPlex ID# WLM1923S

Satiny Gem 1923-S Half Dollar Seldom Seen Finer

5712 1923-S MS65 PCGS. Although the 1923-S half dollar had a mintage exceeding 2.1 million coins, its status as the only half dollar struck from 1922 through 1926 meant that demand for it was keen; most examples circulated. Today it is considerably rarer in Gem Mint State than collectors might believe. This example is one of only 41 such certified at PCGS, and only eight are finer (11/12). The frosted surfaces show little trace of color, but strike weakness through the center is almost a given on this issue, despite the rudimentary evidence of a partially split thumb. The few minor, scattered marks are in accord with the grade. This attractive example would be difficult to upgrade, given the paucity of finer survivors. PCGS# 6586, NGC ID# 24R9, CoinPlex ID# WLM1923S

EARLY DOLLARS

1794 Dollar, Choice XF The Famous Frothingham Specimen

5713 1794 XF45 PCGS Secure. B-1, BB-1, R.4. In his unpublished manuscript about the 1794 dollars, Jack Collins called Alexander Hamilton the “Grandfather of the 1794 Dollar.” He could equally be named the Father of the U.S. Mint. At the request of Congress, Hamilton prepared an exhaustive report on “a proper plan for the establishment of a national Mint.” His report was delivered to Congress on January 28, 1791, and by all accounts was a brilliant and clear report on the principal issues. Prior to that time, the colonial American money situation was certainly undesirable. Aside from Spanish colonial dollars, available coins were limited to whatever immigrants brought with them. Currency was limited to local issues, some based on shillings and others based on dollars.

To make matters worse, prior to the Declaration of Independence every individual colony had its own valuation. Neil Carothers wrote in *Fractional Money* (pp. 19-20):

“The shilling was a nominal unit, serving as a local measure of values and basis of monetary calculations. Each colony chose for itself the shilling and pence valuations of the sundry coins and commodities upon which it conferred legal tender. This practice is the outstanding feature in the history of colonial currency. It influenced the currency development of the United States long after the achievement of independence.”

At the beginning of his report, Alexander Hamilton discussed the valuation problem:

“The immense disorder which actually reigns in so delicate and important a concern, and the still greater disorder which is every moment possible, call loudly for a reform. The dollar originally contemplated in the money transactions of this country, by successive diminutions of its weight and fineness, has sustained a depreciation of five per cent., and yet the new dollar has a currency, in all payments in place of the old, with scarcely any attention to the difference between them. The operation of this in depreciating the value of property, depending upon past contracts; and, (as far as inattention to the alteration in the coin may be supposed to leave prices stationary) of all other property, is apparent. Nor can it require argument to prove, that a nation ought not to suffer the value of the property of its citizens to fluctuate with the fluctuations of a foreign mint, and to change with the changes in the regulations of a foreign sovereign. This, nevertheless, is the condition of one which, having no coins of its own, adopts with implicit confidence those of other countries.”

Hamilton continued: “The unequal values allowed in different parts of the Union to coins of the same intrinsic worth; the defective species of them which embarrass the circulation of some of the States; and the dissimilarity in their several moneys of account; are inconveniences, which, if not to be ascribed to the want of a national coinage, will at least be most effectually remedied by the establishment of one — a measure that will, at the same time, give additional security against impositions by counterfeit as well as by base currencies.”

Hamilton’s entire plan for the Mint was based on a detailed analysis and answers to six questions, and the Mint Act of April 2, 1792, essentially followed to the letter the answers that Hamilton recommended:

1. What ought to be the nature of the money unit of the United States?
2. What the proportion between gold and silver, if coins of both metals are to be established?
3. What the proportion and composition of alloy in each kind?
4. Whether the expense of coinage shall be defrayed by the Government, or out of the material itself?
5. What shall be the number, denominations, sizes, and devices of the coins?
6. Whether foreign coins shall be permitted to be current or not; if the former, at what rate, and for what period?

The inclusion of any 1794 dollar as the centerpiece of a collection establishes that collection as one of importance in the present numismatic world. This piece is known as the Frothingham specimen, and it has a rather unusual early history, being stored in an attic for many years, as noted in our provenance below. It is an amazing coin with a bold strike. The date and first few stars are all sharply defined. The surfaces are smooth and retain considerable original mint flash from the time the coin was made. The obverse has delightful warm gold toning with some faint blue and iridescent overtones. Weakness at the left obverse rim, and at ED STATES, results from peripheral obverse adjustment marks, some remaining and others carefully smoothed in past years. Martin Logies writes in *The Flowing Hair Silver Dollars of 1794*: “A careful examination of auction photos reveals that Liberty’s hair details have been expertly re-tooled, and the planchet adjustment marks at the left obverse rim have been partially smoothed out.”

Ex: Unidentified Troy, New York, collection formed between the 1840s and 1894; to the collectors’ heirs, who stored the collection for several decades in their attic; Charles French, who purchased the collection intact in the late 1930s; Dr. Frothingham (French’s 106th Sale, 11/1973), lot 737; purchased jointly by Julian Leidman, Mike Brownlee, and Ed Milas, Jr.; 1974 CSNS Sale (RARCOA, 5/1974), lot 257; The Coin Den; Bowers and Ruddy (6/1975), lot 963; purchased jointly by Julian Leidman, Robert Hughes, and Douglas Weaver; Robert J. Coulter; Jay Cammack; later, Superior (5/1987), lot 1932; John Koppell; Bowers and Merena (3/1989), lot 1932; American Rare Coin Fund; offered jointly with Bowers and Merena in A Cabinet of Rarities (Rare Coin Review, #78, 1990); Superior (10/1990), lot 3710; to a private collector; FUN Signature (Heritage, 1/2009), lot 3921. PCGS# 6851, NGC ID# 24WY, CoinPlex ID# EDO1794

1795 B-5, BB-27 Dollar, MS62 Three Leaves Reverse

5714 1795 Flowing Hair, Three Leaves MS62 NGC. B-5, BB-27, R.1. This is the plentiful variety with a prominent diagonal bar in the upper left obverse field, apparently in an early die state with no lapping or clash marks evident. Light flowlines are evident from most star points to the border, and microscopic die rust is visible near the date. The reverse has three delicate die cracks that are likely only visible on high grade pieces. A prominent flowline from the left stem end has been described as a die crack in past literature.

A lovely Mint State specimen, this Flowing Hair dollar has full satin luster on both sides with faint adjustment marks at the center and right side of the reverse. Those adjustment marks cause slight weakness at the center of the reverse on this otherwise boldly defined and nicely centered specimen. The lightly toned obverse shows hints of reddish-gold and powder-blue toning over the silver-gray surface while the reverse has a dusting of gold and iridescent toning over its similar silver-gray surface. Trivial surface marks are mostly visible in the open fields of the obverse and less so on the reverse, but there are no individually significant marks on either side. This is a highly attractive Flowing Hair dollar from the second and final year of the design, representing the only issue that is occasionally available in Mint State grades. Census: 13 in 62, 26 finer (11/12). NGC ID# 24WZ, PCGS# 6852, CoinPlex ID# EDO1795FH3LEAV

1795 B-9, BB-13 Dollar, MS62
Early Die State
Likely the Finest Known

5715 1795 Flowing Hair, Two Leaves MS62 NGC. B-9, BB-13, R.4. Bowers-Borckardt Die State I. An early die state with no clash marks or cracks visible on either side. Both sides have bold denticles with a nicely centered strike, yielding wide border details. Slight die roughness is noted above the date and near the bust tip, with the 7 and 5 each repunched. The obverse die was used for BB-11, 12, and 13 (B-3, 11, and 9), the first three 1795 silver dollar varieties coined, according to Bowers and Borckardt. After the present variety was minted, the reverse was used for B-4, BB-14.

The Notable Specimens section of the BB reference, compiled in the early 1990s and now out of date, is still the only published source of census information about the early dollars, although it was never intended as an official condition census. The finest piece listed there was the MS63 Auction '90 specimen, except that is actually a B-13 (BB-24) dollar. The next specimen, an AU55 appearing in the 1987 Bowers and Merena sale of the Saunders Collection, served as the plate coin for the BB book, and was the top listed B-9, BB-13 dollar in that record. Only one other top piece listed was the Atwater specimen, a Mint State coin with heavy planchet lamination defects. Those were followed by a dozen XF pieces.

Today, we know that the Cardinal Collection included an AU58 PCGS specimen in 2005, and the catalogers felt that was the finest known. The present MS62 NGC dollar is, in our opinion, the finest known B-9, BB-13 silver dollar, clearly finer than the Hesselgesser specimen listed on the PCGS Set Registry. This lovely dollar has light silver-gray surfaces with full frosty mint luster beneath wisps of champagne toning. Faint adjustment marks at the central obverse cause strike weakness at the central reverse. Small streaks of dark toning appear on the reverse. A splendid early dollar for the advanced variety specialist. NGC ID# 24WZ, PCGS# 6853, CoinPlex ID# EDO1795FH2LEAV

1796 Large Date, Small Letters Dollar, MS61 B-5, BB-65

Either Second or Third Finest Known

5716 1796 Large Date, Small Letters MS61 NGC. B-5, BB-65, R.2. Die State II. The diagnostic reverse die lump is attached to the right upright of I in AMERICA, but does not yet join the adjacent C. The obverse die was only used for B-5, and shows signs of lapping, especially among the upper hair curls that are incomplete. The lowest curl is also incomplete, with no central detail. No examples are known in an earlier die state with these features boldly defined, indicating that the die was lapped or polished prior to its first service at the Mint.

The B-5 dollar is the second most plentiful 1796 variety, following the B-4 die pairing. Examples are generally available in all circulated grades, but seldom in Mint State grades like this piece. In fact, this is one of just three Mint State pieces recorded in the Notable Specimens section of Bowers' *Encyclopedia*. One of the three is now part of the Eric Newman Educational Foundation museum, and unavailable to the current generation of collectors. An MS62 example appeared in the Cardinal Collection, the Newman coin is considered MS61, and this piece from the Alto Collection is certified MS61. It is either second or third finest known.

This deep lilac toned specimen has splashes of gold and blue on each side. The strike is exceptional with every hair detail on the obverse and every feather detail on the reverse boldly delineated. In fact, even the eagle's eye is boldly evident.

Ex: Stack's (12/1970), lot 1063; Stack's (9/1972), lot 978; Stack's (4/1975), lot 154; Queller Family Collection of Silver Dollars / Central States Signature (Heritage, 4/2008), lot 2011. PCGS# 6861, CoinPlex ID# EDO1796LDSL

1797 B-3, BB-71 Dollar, AU58
Ex: Hesselgesser Collection

1799 B-6, BB-162 Dollar, AU58, 7x6 Stars
Satiny, Lightly Marked Surfaces

5717 1797 10x6 Stars, Large Letters AU58 PCGS Secure. B-3, BB-71, R.2. Ex: Hesselgesser. Bowers-Borckardt Die State III, the usual die state with the obverse die noticeably lapped, and the reverse showing signs of lapping on the edges of the palm leaves in the right branch of the wreath.

Only a trace of wear appears on the high points of this beautiful Small Eagle dollar with nearly full luster. Both sides have wispy champagne toning at the centers with peripheral blue, violet, and reddish-gold toning. Light adjustment marks are evident at the central obverse, causing a deficient strike at the center of the obverse and reverse. An impressive early silver dollar from an important collection.

Ex: Dr. Hesselgesser Collection (*Goldberg Coins*, 9/2011), lot 5028. PCGS# 6865, NGC ID# 24X4, CoinPlex ID# EDO179710X6

5718 1799 7x6 Stars AU58 NGC. B-6, BB-162, R.4. Die State IV. Apricot and pearl-gray colors enrich this well-struck early silver dollar. Satiny luster extends into the fields, and only minor high-point rub on the devices separates this piece from a Mint State grade. The obverse is devoid of mentionable contact, and the reverse is also unmarked aside from a short, faint pinscratch above the beak. The late die state is characterized by several spindly die cracks that appear throughout the reverse border. The durable obverse die for Bolender-6 was eventually paired with six different reverses.

Ex: *Central States Signature* (Heritage, 5/2004), lot 7950. NGC ID# 24X7, PCGS# 6878, CoinPlex ID# EDO1799

1799 B-6, BB-162 Dollar, MS62
Ex: Hesselgesser
Condition Census Specimen

5719 1799 7x6 Stars MS62 PCGS Secure. B-6, BB-162, R.4. Ex: Hesselgesser. Bowers-Borckardt Die State III-IV, a later intermediate die state with a delicate crack from the left wing to STAT and another up to the right through ES. This lovely piece is an exceptional 1799 dollar, and ranks among the finest known examples of the B-6, BB-162 die marriage. It was listed first in the Bowers-Borckardt list of Notable Specimens. While there have been new discoveries since that time, the present piece is still clearly in the condition census. Both sides have delicate gold and iridescent toning over satin luster, with an exceptional strike showing only slight central weakness.

Ex: Chalkley Collection Sale (Superior, 1/1990), lot 2863; Dr. Hesselgesser Collection (Goldberg Coins, 9/2011), lot 5091. PCGS# 6878, NGC ID# 24X7, CoinPlex ID# EDO1799

Amazing 1799 8x5 Stars Dollar
B-23, BB-159, AU58+

5720 1799 8x5 Stars AU58+ NGC. B-23, BB-159, R.4. Bowers-Borckardt Die State II, an early form of the state with crack below B but not clearly through BE. This elusive die pair has its own *Guide Book* variety, thanks to a visually distinct nature that has eight stars jammed onto the left side of the obverse and only five stars to the right. Light gold and peach patina has violet touches to varying depths, and just a hint of old cabinet friction separates this generously lustrous piece from an even finer designation. NGC has graded just one finer example of the 8x5 Stars variety, an MS61 coin (11/12). PCGS# 6881, CoinPlex ID# EDO17998X5ST

1802/1 B-3, BB-234 Silver Dollar
Usual Late Die State, AU58

5721 1802/1 Wide Date AU58 NGC. CAC. B-3, BB-234, R.3. The large die chip in the right obverse field, midway between star 8 and Liberty's eye, is diagnostic for this variety, appearing on every known example. Although an early die state without this feature could exist, none are known. Steel-blue and iridescent toning surrounds the gorgeous natural lilac-brown color of this lovely dollar, with reflective fields. This piece may rank among the finest known examples of the variety. In 1993, Dave Bowers recorded two Mint State pieces and only four other AU coins. We believe this piece ranks favorably with the 10 finest known examples. Census: 18 in 58, 7 finer (11/12).

Ex: Dallas Signature (Heritage, 11/2007), lot 951, which realized \$17,250. PCGS# 6899, CoinPlex ID# EDO1802OVR1WIDEDT

1802/1 B-3, BB-234 Dollar, MS62
A Census-Level Specimen

5722 1802/1 Wide Date MS62 NGC. B-3, BB-234, R.3. Bowers-Borckardt Die State III, the usual state with an oblong die lump in the right obverse field. Easily a Condition Census specimen and possibly the finest known, this piece is the first example listed in the Notable Specimens roster of the Bowers-Borckardt reference. More recently, an MS63 PCGS example appeared in the Cardinal Collection sale, and a similarly graded MS62 NGC example of this variety appeared in the January 2006 American Numismatic Rarities sale. An MS61 PCGS specimen is part of the famous Hesselgesser Collection on the PCGS Set Registry.

This impressive overdate dollar has satin luster beneath delicate gold and champagne toning, gradually changing to steel-blue along the left side of the obverse and reverse. The strike is sharp, especially on the reverse, with only a few trivial marks.

Ex: Harley L. Freeman Collection (CSNS Sale, May 1977); Goshen Collection (Stack's, 2/1978), lot 310; Robison Collection (Stack's, 2/1982), lot 1881. PCGS# 6899, CoinPlex ID# EDO1802OVR1WID-EDT

PROOF EARLY DOLLARS

1803 Proof Dollar or Novodel, PR66 Second Auction Appearance of This Specimen Only Four Examples Known, B-7, BB-303

5723 1803 PR66 PCGS. B-7, BB-303, High R.7. The proof silver dollars of 1801-1803, known as novodels to present-day collectors, are among the rarest and most valuable issues in the U.S. federal coinage series. Closely associated with the famous 1804 dollar, these early proofs are even more elusive than that celebrated rarity. With a surviving population of just four examples, the 1803 proof Draped Bust dollar is actually twice as rare as the Class I 1804, which is represented by eight specimens in numismatic hands today.

Because the 1804 was recognized as a rare issue at an early date, it has always had an advantage over its less-numerous 1801-1803 counterparts, which were unknown before 1876, and has historically sold for much higher prices. The gap has narrowed considerably in recent years however, as collectors have become more aware of the true rarity and outstanding eye appeal of these early proofs. The PR65 Cameo PCGS example of the 1802 novodel offered in lot 2088 of the David Queller Family Collection (Heritage, 4/2008), realized \$920,000, and a similarly graded example in another Heritage auction last summer realized a respectable \$851,000. While the 1803 proof claims the same total number of specimens extant as the 1802, the 1803 issue appears at auction less frequently. Heritage Auctions is pleased to offer a magnificent Premium Gem specimen of this rare issue, in only its second auction appearance. It would be no surprise if this higher-graded 1803 specimen exceeds the \$1 million barrier that its 1802 counterparts have flirted with in recent years.

First Appearance

The proof dollars of 1801-1803 were unknown in any collection before 1876. In January of that year, Captain John W. Haseltine displayed a remarkable set of 1801-1803 proofs, accompanied by a Class III 1804 dollar, at Edward Cogan's sale of the Jewett Collection. Coin dealer Édouard Frossard left the following account of the event in the *Coin Collector's Journal* of March 1876:

"At the time of the Jewett sale, and while awaiting the hour of business, we had the pleasure, in common with several collectors present, of inspecting four American dollars, dates 1801, 1802, 1803 and 1804. The first three named are not particularly rare dates, and are generally found in collections, but what gave them very great value in the eyes of all present, was their perfectly uncirculated, in fact, proof condition. It is pretty well known that in the early days of the Republic but few coins were placed in collections in this country, hence a very limited number of proofs were struck."

Haseltine informed Frossard that the coins had been minted in the 1801-1804 time period and he had discovered the set in a private collection from England. This explanation was rejected by knowledgeable numismatists, who noticed several design features of the 1801-1803-dated proofs that differed from those found on coins from that era. The true story of the production of these beautiful coins is much more complex, and most of the details have only been established in recent times.

The Dies Are Made

Research by Eric Newman and Ken Bressett in *The Fantastic 1804 Dollar* has established the striking period for most of the Class I 1804 dollars as late in 1834 to early in 1835, when they were included in diplomatic presentation sets for various foreign rulers. In *Silver Dollars and Trade Dollars of the United States: A Complete Encyclopedia*, Q. David Bowers and Mark Borckardt suggest that the dies were actually produced in 1831, in preparation for a resumption of silver dollar coinage that was officially approved but never initiated. In any case, the dies for the Class I 1804 dollar must have been prepared before the final months of 1834, when the first coins were struck.

The evidence indicates the obverse dies for the 1802 and 1803 proof dollars were both completed before the 1801 and 1804 obverses. The engravers employed most of the same punches used on pre-1804 regular-issue silver dollars to create the dies for the novodels. In the case of the 1802 and 1803 issues, the central bust of Liberty is completely intact, while the 1801 and 1804 proofs show an incomplete lock of hair at the top of the head, caused when this small feature broke off the device punch. Since the 1802 and 1803 dies were both completed before the punch broke, they must have been produced before the Class I 1804 dies with the broken punch, no later than 1834. The 1801 die also shows the broken curl atop Liberty's head, and the stars and some of the numeral punches are of a style not used in the 1830-1835 period, indicating the die was completed at a later date than any of the others. The 1801-1803 proofs and the Class I 1804 dollar all employ the same reverse die, while the Class II and Class III 1804 dollars use a different reverse.

On the other hand, all known examples of the 1801-1803 novodels and the Class I 1804 dollars show evidence of being struck with a close collar. The coins all show a rim with a beaded border, rather than the elongated denticles of the earlier open-collar issues. Since close-collar technology was unavailable before the late 1820s, it is clear that the novodels were not struck until many years after the purported dates on the coins. The evidence agrees closely with Bowers and Borckardt's suggested production date of 1831 for the 1802, 1803, and 1804 dies, with the unfinished 1801 obverse completed at some later date.

Striking the Novodels

While it is clear that the dies for the 1802 and 1803 novodels were completed before the 1804 dies, all evidence indicates that the 1801-1803-dated coins were struck at a much later date. The reverse die used on these coins, christened reverse X by Newman and Bressett, sustained some damage in the form of a die crack through the letters NITED early in the striking run of the Class I 1804 dollars. The die crack became longer with each successive issue, eventually spreading to the feathers of the eagle's wing. The progression of this die crack has established the order of emission for the different issues, with the 1804 coming first, followed by the 1802, 1803, and 1801, in that order. All known examples of the 1801 and 1803 proofs show a common feature on the reverse, a linear depression from the area below UM in UNUM to the eagle's wing. This feature was undoubtedly the result of some foreign matter located on the surface of the die, and indicates that the 1801 and 1803 issues must have been struck at virtually the same time, one right after the other. Since the 1801-1803-dated coins were marketed as sets, it makes sense that they would all be struck at nearly the same time.

When the 1801-1803 novodels first appeared in 1876, collectors immediately noticed the high quality of all the coins and the absence of wear, toning, and signs of contact. This led contemporary collectors to conclude that the coins had been struck recently, and Haseltine experienced considerable difficulty in selling the initial offering because of the stigma attached to "restrike" issues of that era. Some numismatists believe the 1801-1803 novodels were struck earlier, because they have the same reverse die as the Class I 1804 dollars, but the consistently high quality of all the novodels, none of them grading less than PR64, mitigates against this. While some individual coins of the 1830s have been exceptionally well preserved, no other issue from that era boasts such uniformly high grades on all surviving examples. The Class I 1804 dollars range from VF condition for the Cohen coin to PR68 for the Sultan of Muscat specimen. The 1838-O half dollars range from Choice XF condition for the Boyd-Guggenheimer coin to PR64 for several specimens. The fact that all the 1801-1803 novodels appeared to be brand-new in 1876 is at least a strong indication that they were struck in the 1873-1876 time period. Regarding the reason why the reverse die from the Class I 1804 dollars was used, that is easily answered. Collectors had noticed the different reverse used on the Class II 1804 dollars circa 1858, as well as the lack of edge lettering on those coins, resulting in a great deal of controversy and the recall of all the coins. If the creators of the 1801-1803 proofs hoped to pass the coins off as legitimate items from those early dates, they had to use the "Original" reverse die to allay suspicion. It would have been a waste of time to strike more coins with the other reverse, called reverse Y by Newman and Bressett, because those coins would have been immediately rejected as restrikes.

Perhaps the most telling evidence that the 1801-1803 issues were struck at a later time than their 1804 cousins is the weight of their respective planchets. The Class I and Class III 1804 dollars were struck on planchets that conform either to the 416-grain standard of pre-1837 silver dollars, or to the 412.5-grain standard for silver dollars issued after 1837. The 1801-1803 proofs all weigh between 419 and 423 grains, which conforms to the 420-grain standard of Trade dollar planchets, which were not used before 1873. This establishes a tight three-year window for the striking of these novodels, between 1873 when Trade dollar planchets became available, and 1876 when the coins first appeared on the market.

It has been suggested by some well-respected researchers that the novodels could have been struck at an earlier date, using planchets that were discarded for being overweight and out-of-tolerance. This scenario seems unlikely, as a random sampling of discarded planchets should include both underweight and overweight examples, while all 1801-1803 novodels are remarkably uniform in weight. For the weights of so many coins to correspond so closely, they must have been deliberately designed to conform to the 420-grain standard, not just accidentally being overweight by almost exactly the same amount. It is worth noting that the Class II and Class III 1804 dollars, which were produced at an earlier date, all weigh considerably less than 420 grains.

The Mint's program of striking patterns and other delicacies in the 1870s was clandestine, insofar as the circumstances surrounding the creation of these issues was not revealed to the general public, but it was much different from Walter Breen's theoretical "Midnight Minters" of the 1850s. The patterns and novodels of the 1870s were produced with the knowledge and approval of the Mint hierarchy, for sale to collectors for the personal profit of the Mint personnel involved. The planchets used for the novodels could easily be accounted for by listing them among the total of proof Trade dollars produced for collectors during 1876, or any other year in the 1873-1876 time frame, many of which went unsold and were customarily melted after the end of the year. There was no need to avoid paperwork by selecting planchets from the discard pile, as the accounts could be easily balanced in this fashion.

The 1803 proofs show more evidence of the long period between the production of the dies and the actual striking of the coins than any of the other issues. Clear evidence of die rust is visible in a cluster of raised dots around star 4, and a smaller cluster is evident between the numerals 1 and 8 in the date on all known examples. A raised line appears in the obverse field, just in from the space between stars 5 and 6 on most examples, and at least two coins show a small circular depression below the lower-right serif of L in LIBERTY.

Having all these surface features in common makes plate-matching of early black-and-white auction catalog images a daunting task. For some time the number of surviving 1803 proofs was in doubt, because the present coin appeared for the first time in 1991, and plate-matching of earlier appearances was so uncertain. Only with the advent of modern color photography, which shows dramatically different toning patterns, were numismatists able to confirm that four specimens of the 1803 remain extant, instead of the three listed in earlier rosters.

Haseltine and Chapman

Haseltine changed tactics after his offering of the complete set of novodels (set number 1) at the Jewett sale met with such resistance. He decided to split the next set (number 2) into more than one offering, including an example of the 1801 in lot 338 of his Coin Sale in June 1877, “1801; brilliant proof; exceedingly rare in this condition and the only one I believe ever offered at auction.” Haseltine delayed offering the 1802 and 1803 novodels from this set until June 1880, when they appeared as lots 982 and 983 of the Haseltine Sale. The 1803 in lot 983 was described as, “1803; brilliant proof; sharp and beautiful; a companion piece to the preceding and equally as rare; only two others known.” Haseltine also noted that there were two other examples of the 1802 known to him in his description of the coin in lot 982. Thus, Haseltine established that, to the best of his knowledge, only three sets of novodels were available to collectors during the 1870-1880 time period.

Haseltine reverted to his earlier practice of marketing the 1801-1803 novodels at the same time (as he had done with set number 1 at the Jewett sale) in his Coin Sale of January 1879. This auction actually occurred between the offerings of the 1801 from set number 2 in 1877 and the appearance of the other coins from that set in 1880. Set number 3 was included in lots 282, 283, and 284 of the 1879 Coin Sale, with the 1803 described as:

“1803; brilliant proof; sharply struck; also an exceedingly rare dollar.

[The preceding dollars have never been offered at auction in proof condition and are the finest I have ever seen.]”

More than 30 years later, Samuel Hudson Chapman offered a set of novodels in lots 13, 14, and 15 of his catalog of the John P. Lyman Collection. Describing the 1801 in lot 13, Chapman noted:

“Struck between 1870 and 1876. When I entered this business in May 1876, these dollars of 1801, 2, and 3, were being offered by mint officials now deceased, but very few have ever appeared and I believe they are very rare. I have only known of about three sets.”

Chapman had started working as a teenager in Haseltine’s coin shop, so he was in a position to know about the novodels that passed through Haseltine’s hands during this time frame. The fact that he confirms Haseltine’s statement about three sets being sold, and the fact that we can trace three sets through Haseltine’s public offerings makes a convincing case that there were, indeed, only three sets of novodels marketed in the 1870s. We believe Haseltine and Chapman were telling the truth, as far as they knew, but some major surprises were in store for the future.

The Orphan 1802

The initial three sets of novodels were sold at different intervals over the years, and some sets were split up, with a couple of the 1801 proofs being lost in the process. There was always speculation that more than three sets had been produced, but no examples surfaced that could not be accounted for in the original three sets for 45 years after Haseltine first introduced them in 1876. That all changed with B. Max Mehl’s sale of Dr. G.F.E. Wilharm’s collection on February 15, 1921. Wilharm was a collector from Pittsburgh, and lot 592 of the catalog included a previously unknown example of the 1802 novodel:

“1802 Re-strike. Obverse from an unused die or from a new die made in the Mint about 1870-1876. From a different die than the usual restrikes of the early Dollars. This appears to be from the same die as the 1804. Edge lettered, the lettering doubled in the word CENTS. High wire edge. Perfect sharp brilliant proof. A similar specimen in the Lyman Sale brought \$40.00 in 1913. Should bring much more today.”

This lot description brings up a point of controversy concerning all novodels. Mehl describes the edge lettering as being doubled, like some of the Class III 1804 dollars, not crushed, as seen on the Class I 1804 issue. In *The Fantastic 1804 Dollar*, Eric Newman and Ken Bressett also describe the edge lettering of the 1801-1803 proofs this way and conclude that the coins were struck in a plain collar, with the edge lettering added by the Castaing machine after the coins were struck. Walter Breen also reports the edge lettering as “blundered.” However, in the descriptions for the 1802 novodels in the catalogs for the Norweb and Four Landmark Collections, Q. David Bowers described the edge lettering of the coins in those offerings as crushed and concluded that the edge lettering was added to the planchet before the coins were struck, with the lettering being compressed by the smooth collar during the striking process. Unfortunately, the edge of the present coin is no longer viewable, due to the PCGS holder, so we can offer no definitive information on this matter.

The appearance of the fourth example of the 1802 proof alerted the numismatic community to the fact that more than the three original sets of novodels had been produced, despite the corroborative reports of Haseltine and Chapman. It seems likely that a fourth set was struck and retained by some influential party at the Mint, possibly Henry Linderman himself, and not marketed through Haseltine, so he never knew of its existence. Rumors of a small hoard of 1801-1803 proofs in the possession of Linderman’s heirs have persisted until recent times, and some numismatists believe as many as 12 sets were minted. We feel that those estimates are exaggerated, as no such numbers have ever appeared on the market, but the possibility of an undiscovered hoard cannot be completely discounted. We can account for just two specimens of the 1801, four of the 1802, and four of the 1803 novodels today, 10 coins in all, making the four-set theory seem quite convincing.

The Present Coin

The coin offered here was an even bigger surprise than the Wilharm 1802 novodel when it first surfaced in 1991, dismissing forever the notion that only three sets of proofs were struck. Coin dealer Robert L. Astrich purchased the coin over the counter from an undisclosed source in 1991. Astrich, from Hempstead, Texas, is remembered as a genial man by several Heritage catalogers. Unfortunately, he died in 2009 and, if he knew anything more about the source of this remarkable coin, he took the knowledge to his grave. Astrich sold the coin shortly afterward, at the 1991 ANA Convention, to noted numismatist Ed Milas, who has also passed away since that time. This specimen has only been offered in one previous auction, the Bowers and Merena Rarities Sale in February 2007, where it realized \$672,500.

The surfaces of this spectacular Premium Gem display natural shades of dark gray and charcoal toning on both sides, with a brilliant spot of white at 9 o'clock on the obverse rim. Deep mirrors are evident beneath the patina, and the surfaces are free of all but the most insignificant distractions. A few almost imperceptible hairlines in the right obverse field are mentioned for completeness, but they do nothing to detract from the extraordinary eye appeal. The design elements display razor-sharp definition in most areas, but a few of the reverse stars are a little flat. Despite the deep patina, there are elements of field-device contrast, especially on the obverse. There is a small circular depression below the serif of the L in LIBERTY. The die break through NITED is clearly visible and extends to the feathers of the eagle's wing. Evidence of die rust appears at star 4 and between the numerals 1 and 8 in the date, as seen on all examples of the issue, and the diagnostic strike-through below UNUM is easily observed. This coin offers a unique package of historic interest and baffling mystery, due to its late appearance in numismatic circles. It possesses terrific visual appeal to complement the high technical grade, and few coins can match the absolute rarity of this piece. Heritage has been fortunate to handle three of the four known 1803 novodels, and we rank this coin as tied for finest seen with the magnificent specimen in lot 2200 of the Jack Lee Collection (Heritage, 11/2005). This offering represents an important opportunity for the discerning collector, as a comparable specimen may not become available for years.

Roster of 1803 Proof Novodels

The following roster was expanded and adjusted from the remarkable list in the Bowers-Borckardt *Encyclopedia* with the important assistance of Wayne Burt, Dan Hamelberg, Karl Moulton, Greg Reynolds, and Saul Teichman. As Saul Teichman notes, the great difficulty in tracing the coins is partially due to the fact that six of the 10 known 1801-1803 novodels passed through the Virgil Brand Collection, and three more were included in Waldo Newcomer's vast holdings. These collections were dispersed through largely undocumented private transactions, leaving little or no paper trail in most cases. The grades listed are per each coin's last auction appearance. Some examples have undoubtedly been resubmitted or crossed over in recent years.

1. **PR66 PCGS.** Possibly Mint Director Henry Richard Linderman; unknown intermediaries; Texas rare coin dealer Robert L. Astrich, purchased over the counter in 1991; purchased by Ed Milas at the 1991 ANA Convention; unknown intermediaries; Pre-Long Beach Rarities Sale (Bowers and Merena, 2/2007), lot 429, realized \$672,500; **the present coin.** Small circular depression below right corner of L in LIBERTY, brilliant white toning spot at 9 o'clock on the obverse, reverse stars slightly flat.
2. **PR66 NGC.** Captain John W. Haseltine; unknown intermediaries; Waldo Newcomer; B. Max Mehl, circa 1931; Colonel E.H.R. Green; Jack Roe; Ryan, Roe and Waltman Collections (Mehl, 6/1945), lot 428; Will W. Neil Collection (Mehl, 6/1947), lot 30; Amon G. Carter, Sr.; Amon Carter, Jr.; Amon Carter Family Collection (Stack's, 1/1984), lot 240; John Nelson Rowe III; L.R. French, Jr.; French Family Collection (Stack's, 1/1989), lot 14; Martin B. Paul; Walton Hood and Andrew Lustig; Auction '89 (Superior, 7/1989), lot 666; American Rare Coin Fund, L.P. (Hugh Sconyers); purchased by Bruce Amspacher on October 26, 1989; Seattle dealer William E. Spears; unknown intermediaries; Jack Lee Collection (Heritage, 11/2005), lot 2200. The Newman-Bressett plate coin, per Q. David Bowers. Dark cobalt-blue and gold toning, not plated in any auction appearance before Carter (1/1984).
3. **PR66 PCGS.** Captain John W. Haseltine; unknown intermediaries; Peter Mougey Collection (Thomas Elder, 9/1910), lot 965; John P. Lyman Collection (S.H. Chapman, 11/1913), lot 15; H.O. Granberg Collection (Mehl, 7/1919), lot 31; Virgil Brand, inventory number 92340; Armin Brand; unknown intermediary; World's Greatest Collection (Numismatic Gallery, 1/1945), lot 125; Dr. J. Hewitt Judd; *Illustrated History of United States Coins* (Abe Kosoff FPL, 1962), lot 45a; Golden Sale, Part II (Kreisberg/Schulman, 1/1963), lot 3049; Brand/Lichtenfels Collections (Kreisberg/Schulman, 3/1964), lot 1146; Armand Champa Collection (Bowers and Ruddy, 5/1972), lot 916; Auction '86 (RARCOA, 7/1986), lot 738; Walton Hood and Andrew Lustig; An Amazing Collection of United States Silver Dollars (Superior, 5/1991), lot 702; Kenneth Duncan and Jack Lee; Jay Parrino, advertised in *The Numismatist* in January 1993. Small circular depression below right corner of L in LIBERTY, lintmark on Liberty's cheek, mark in right obverse field near Liberty's hair.
4. **PR65 NGC.** Captain John W. Haseltine; Thomas Cleneay; Thomas Cleneay Collection (S.H. & H. Chapman, 12/1890), lot 954; C.S. Wilcox Collection (S.H. & H. Chapman, 11/1901), lot 324; Virgil Brand; probably Horace Brand; Adolphe Menjou Collection (Numismatic Gallery, 6/1950), lot 2078, plate looks like a stock photo reused from the World's Greatest Collection, but text indicates this is a different example; Autumn Sale (Stack's, 9/1978), lot 305; Ellis H. Robison; Robison Collection (Stack's, 2/1982), lot 1885; Illinois dealer Larry Whitlow; Larry Hanks, consigned to Auction '84 (Superior, 7/1984), lot 172, reserve not met; sold by Hanks to a Pennsylvania collector; Harry Einstein Collection (Bowers and Merena, 6/1986), lot 1735; Worrell Collection (Superior, 9/1993), lot 1303, mistakenly identified as the Carter specimen; August Sale (Superior, 8/1995), lot 228, again incorrectly identified as the coin in number 2 above; Texas collector Scott Gilchrist; Long Beach Signature (Heritage, 9/1999), lot 6484. The Bowers and Breen plate coin. Small mark between star 7 and L in LIBERTY, color spot near the rim outside star 5.

Other Appearances

- A. A specimen in the possession of Captain John W. Haseltine, exhibited as part of a complete set of 1801-1804 dollars at Edward Cogan's sale of the Jewett Collection in January 1876.
 - B. Coin Sale (Haseltine, 1/1879), lot 284.
 - C. Haseltine Sale (Haseltine, 6/1880), lot 983.
 - D. A specimen owned by Martin Logies, circa 2004.
 - E. A specimen exhibited by Steve Contursi at the Santa Clara Coin, Stamp and Collectibles Show on November 17, 2005.
- From *The Greensboro Collection, Part II*. PCGS# 6906, NGC ID# 24XG, CoinPlex ID# EDP1803

SEATED DOLLAR

1852 Seated Dollar, XF40
A Budget-Oriented Example

5724 1852 XF40 PCGS. The term condition rarity usually applies to coins that are in such high grade that they are rarely encountered. However, the term can occasionally be applied to coins that are lower grades than usually seen. This 1852 Seated dollar is just such a coin, and it is likely to garner substantial bidding interest from a large number of Seated dollar specialists whose budget prevents purchasing a Choice or Gem Mint State or proof specimen. This piece is one of only eight examples that PCGS has certified below AU50, while 41 pieces have been graded in AU50 or finer grades, including business strikes and proofs.

This splendid example has delightful pewter-gray surfaces with trivial, inconsequential marks, primarily on the reverse. Light wear is only slightly evident. We must emphasize the importance of this opportunity. PCGS# 6940, NGC ID# 24YR, CoinPlex ID# L\$M1852

1866 Motto Seated Dollar, MS64+
Beautifully Toned, Close to Gem

5725 1866 Motto MS64+ PCGS. This lovely toned 1866 Motto Seated dollar, a first-year type, is oh-so-close to the Gem category, where the issue shows a major price jump: The online PCGS Price Guide shows MS64+ coins at \$19,500, while MS65s are at \$90,000. The opportunity here is obvious. The moderately deep patina on this coin ranges from the prevailing blue hues to lavender and a patch of orange in the obverse fields. A few light slide marks are noted on the thigh of Liberty. This piece is extremely well-struck, close to full save for a couple of star centrils, which added to the beautiful color makes this coin a keeper. Population: 17 in 64 (2 in 64+), 8 finer (11/12). PCGS# 6959, NGC ID# 24Z9, CoinPlex ID# L\$M1866

PROOF SEATED DOLLARS

Choice Proof 1854 Seated Liberty Dollar
Second-Finest Cameo Example at PCGS
Spectacular Multicolor Toning and Contrast

5726 1854 PR64 Cameo PCGS. CAC. The 1854 Seated Liberty dollar is an elusive date in all formats. A nominal mintage of 33,140 business-strike examples was accomplished during the year, but the coins never circulated in the domestic economy because their intrinsic value was greater than their face value. The weight of the other silver denominations had been reduced the year before, but specifications for the silver dollar remained unchanged, perhaps because it had become a popular medium of exchange in the China trade, and careful Chinese merchants would have noticed the reduction and refused the “underweight” coins. With their silver content remaining constant, many 1854 silver dollars were shipped to China and the survival rate for the business-strike issue is quite low.

The mintage of proof Seated Liberty dollars in 1854 was not recorded, as the Philadelphia Mint did not begin its commercial proof set offerings until 1858. Before that date proofs were generally struck to order, and no specific mintage totals were kept. The mintage was undoubtedly small, probably no more than 50-100 pieces in all. PCGS estimates 40-50 examples survive today, but they have only certified 19 total specimens, and NGC has recorded 18 certification events, with an unknown number of resubmissions and cross-overs (11/12). Judging from the infrequent appearance of this issue at public auction, we suspect the PCGS estimate of survivors is too generous.

The limited availability of business-strikes has always put strong date-collector pressure on the small supply of proofs. Of course, early collectors usually preferred to update their collections by ordering proof sets from the Mint each year anyway, but that practice was not widely followed until commercial offerings began in 1858. In the case of the 1854 proof dollars, early numismatists realized there was something special about the issue almost as soon as the coins were released, and specimens began to appear at auction as early as the A.C. Kline Sale (Moses Thomas and Sons, 6/1855). Lot 435 of that sale includes the following, “Dollar, very rare, 1854, beautiful proof, fresh from the die.” Collector interest has always remained strong over the years, with recent sales including the spectacular PR65 Cameo PCGS specimen in lot 3965 of the FUN Signature (Heritage, 1/2009), which realized \$51,750.

The present coin is a delightful Choice proof that shows dramatic cameo contrast between the deeply reflective fields and the frosty devices. PCGS has certified only four coins with the coveted Cameo designation, with this example being the second finest (11/12). The design elements are sharply detailed in most areas, with just a touch of softness on the eagle’s left (facing) wing that is seen on almost all examples of this issue. The central devices are mostly brilliant white, and the fields are blanketed in iridescent shades of gold, sea-green, and cobalt-blue, increasing the impressive cameo effect. This coin possesses a complete package of absolute rarity, high technical grade, and outstanding eye appeal. The discerning collector should bid accordingly.

From The Teich Family Collection. PCGS# 86997, CoinPlex ID# L\$P1854CA

1854 Seated Dollar, PR65 Cameo Finest PCGS-Certified Proof, Ex: Jack Lee

5727 1854 PR65 Cameo PCGS. The Coinage Act of February 1853 served to reduce the weight of smaller-denomination silver coins, but it did not alter the weight of silver dollars. The coins continued to have a silver value greater than their face value and were highly sought by bullion dealers as well as individual hoarders. The result is a lack of circulation strike survivors from the 1854's mintage of 33,140 pieces. An additional explanation may be found in Walter Breen's *Complete Encyclopedia*. He noted that 10,000 of them were shipped to San Francisco on November 11, 1854, to serve as "small change." It is unfortunate that Breen did not reveal his source for this information. With 10,000 of them circulating in California, where the higher melt value would not have mattered, those coins are essentially gone today. They likely would have stayed in circulation for a long time before being melted. It is certainly possible that many examples of this mintage were shipped overseas in the Oriental trade. Businessmen in the Orient were simply not going to accept obsolete bank notes or any other kind of paper promise. These are some of the influences that turned circulation-strike dollars of 1854 into rarities.

The obverse of this Gem proof has a triangular defect near the base of Liberty, over the space between the digits 54. This characteristic looks very much like the top of a misplaced 4. Proof examples are extremely rare. The mintage of proof dollars is unknown, but it was certainly a small quantity. The PCGS *Population Report* indicates 40-50 known, and they have certified 19. Regardless of the number struck or the number surviving today, these coins are rare. And this example is the finest Cameo proof 1854 dollar ever submitted to PCGS. In fact, it is one of just four 1854 proof dollars given a Cameo designation; the other pieces grade PR62, PR63, and PR64. It is also the finest numerical proof dollar of this issue, as the next best certified by PCGS are PR64 and PR64 Cameo. Both sides of this Cameo Gem have deeply mirrored fields, significantly lustrous devices, and sharp design features. The obverse has brilliant gold toning and the reverse is fully brilliant. This impressive Gem will please everyone.

Ex: Heritage (11/2004), lot 7614; Bowers and Merena (3/2005), lot 2032; Heritage (11/2005), lot 2241; Estate of Jack Lee Collection (Heritage, 1/2009), lot 3965, where it realized \$51,750. PCGS# 86997, CoinPlex ID# L\$P1854CA

Toning-Enhanced Cameo PR64
1855 Seated Dollar

5728 1855 PR64 Cameo PCGS. CAC. Often it is the case that toning is the enemy of cameo contrast, but this is the rare exception to the rule. The fields offer delicate blue and peach tints to medium-gray bases that gleam with reflectivity. The boldly struck devices, by contrast, retain their essential frost and whiteness so that the whole cameo effect is magnificently rendered. All-around surface quality is excellent with just a few faults on each side. As a pre-1858 silver proof, this coin comes from an uncertain but small mintage.

Ex: The Empire Collection (Stack's, 11/1957), lot 1740.

From The Teich Family Collection. PCGS# 86998, CoinPlex ID# L\$P1855CA

1861 Seated Dollar, PR66 Cameo
Sharply Contrasted, Tied for Finest

5729 1861 PR66 Cameo NGC. The 1,000-coin proof mintage of the 1861 Seated dollar was the second highest annual total of the No Motto type. The proof dollar was originally offered as part of proof sets, but modern researchers believe that fewer than half the coins were actually sold, and the rest were melted. This coin exhibits a sharp strike and clean surfaces, except for a few minor flaws on and around Liberty's knees. Rings of iridescent copper and electric-blue on both sides frame pinkish-golden centers. NGC has graded just two Cameo coins as PR66, while PCGS recognizes none, and neither service has certified a finer Cameo example (11/12).

Ex: Long Beach Signature (Heritage, 9/2008), lot 2480; Los Angeles Signature (Heritage, 8/2009), lot 1155, where it sold for \$18,400. PCGS# 87004, CoinPlex ID# L\$P1861CA

Premium Gem Proof 1862 Seated Dollar
None Certified in Numerically
Finer Grades at NGC

5730 1862 PR66 NGC. The financial pressures of the Civil War brought about the suspension of specie payments in 1862, increasing the expense and difficulty of ordering proof sets during that era. Only 550 proof Seated Liberty dollars were struck, and some of them may have been melted. In addition, only 11,540 business-strike dollars were produced, putting significant date-collector pressure on the small supply of proofs. The 1862 is always in demand in today's market.

This example is a spectacular Premium Gem with sharply detailed design elements throughout and pristine, deeply mirrored fields. The surfaces are blanketed in attractive shades of champagne-gold and cerulean-blue toning. Eye appeal is terrific. Census: 9 in 66 (2 in 66+), 0 finer (11/12).

From The Big E Collection. NGC ID# 252G, PCGS# 7005, CoinPlex ID# L\$P1862

1864 Seated Liberty Dollar, PR68 Incredible Eye Appeal, None Certified Finer Only 470 Pieces Struck

5731 1864 PR68 NGC. Only 470 proof Seated Liberty dollars were struck in 1864, and the present coin is one of the finest-certified survivors of that paltry mintage. The strained economic conditions of the Civil War explain the low demand for proof coins during the 1860s. Silver and gold coins did not circulate in this country after 1861 because of public hoarding. The government suspended specie payments and would only exchange precious metal issues for payment in kind. This meant that in addition to the usual fee the Mint charged for proof coins, collectors actually had to pay for the silver (or gold) coins with other silver (or gold) coins that could only be obtained from bullion brokers at steep premiums. Few collectors cared to incur the extra expense and difficulty involved in ordering proofs under these circumstances.

The silver dollars were all issued with the proof sets, which began to appear on the secondary market almost immediately. One set was offered in lot 330 of the Fifth Semi-Annual Sale (W. Elliot Woodward, 10/1864), "1864 Splendid proof set, seven pieces." The lot realized \$8 to William Lilliendahl. This set must have been issued early in the year, as the sets issued in July contained the new two cent piece, and would have had eight total pieces. The price realized was quite high for coins issued only a few months prior to the sale with a face value of just \$1.94.

The coin offered here is a magnificent PR68 specimen with razor-sharp definition on all design elements and deeply mirrored fields that show no signs of contact. The virtually perfect surfaces are spectacularly toned in shades of slate-gray, sea-green, golden-brown, lavender, and cobalt-blue. Although this coin is not designated as a Cameo, the frosty obverse devices show distinct elements of contrast. Eye appeal is simply incredible. Although three PR68 1864 Seated Liberty dollars have appeared in the NGC Census for several years, we can find no auction records of any coins grading higher than PR67. Advanced collectors should bid accordingly. Census: 3 in 68, 0 finer (11/12). NGC ID# 252J, PCGS# 7007, CoinPlex ID# L\$P1864

PROOF TRADE DOLLARS

Gem Proof 1866 Seated Dollar With Motto
Rare Deep Cameo Example

5732 1866 Motto PR65 Deep Cameo PCGS. The design of the Seated Liberty dollar was adjusted in 1866 to include the motto IN GOD WE TRUST on a banner on the reverse, making the date an important one for type collectors. Only 725 proof specimens were struck, all for inclusion in the proof sets. Surprisingly, three obverse dies were prepared for this small mintage; this coin represents the scarcer variety with the date slanting up to the right and a spine from the top of the third leaf.

This spectacular Gem exhibits profound cameo contrast between the deeply mirrored fields and the richly frosted devices. The design elements are sharply detailed throughout, and the well-preserved surfaces show a few hints of light gold toning. Population: 4 in 65 Deep Cameo, 3 finer (11/12).

From The Richard P. Ariagno, M.D. Collection. PCGS# 97014, CoinPlex ID# L\$P1866MOTDC

1880 Trade Dollar, PR68 Cameo
Essentially Perfect

5733 1880 PR68 Cameo NGC. Both sides are fully brilliant with no evidence of toning. The fields of this example are deeply mirrored and essentially mark-free. The bright white devices on each side of this amazing piece are highly lustrous and contrast sharply against the depth of mirroring in the fields. The entire presentation is suggestive of the Ultra Cameo designation. Despite a stated mintage that approaches 2,000 specimens, coins of this quality are hard to come by, particularly with the contrast shown here. Census: 8 in 68 Cameo, 0 finer (11/12).

Ex: FUN Signature (Heritage, 1/2007), lot 1077; Central States Signature (Heritage, 4-5/2009), lot 2607, where it brought \$23,000.

From The Victoria Rose Collection. PCGS# 87060, CoinPlex ID# T\$P1880CA

MORGAN DOLLARS

Superb Gem Proof 1883 Trade Dollar
Boldly Toned Beauty

5734 1883 PR67 NGC. With the exceptions of the clandestine 1884 and 1885 "issues" (mintage between them: 15 coins), the 1883 is the last proof Trade dollar, and it was the final date to achieve wide distribution, no disclaimers necessary. This is a richly toned beauty with still-strong reflectivity filtering through lush patina that is heavy on lapis and citrine shadings with suggestions of sapphire, amethyst, and jade. Such jewel-tones are perfect for a Superb Gem such as this, boldly struck with only the tiniest faults visible to a sharp unaided eye. Census: 12 in 67, 2 finer (11/12). NGC ID# 27YV, PCGS# 7063, CoinPlex ID# T\$P1883

Gem 1879-O Dollar
Elusive Deep Mirror Prooflike

5735 1879-O MS65 Deep Mirror Prooflike NGC. The 1879-O Morgan dollar is relatively abundant in the Gem and even Premium Gem levels, but few indeed are the coins with either Prooflike or Deep Mirror Prooflike surfaces, where the certified populations are far smaller. While NGC has seen 151 submissions of this issue in MS65 (including Plus and Star coins), in MS65 Prooflike there are none, and four are MS65 Deep Mirror Prooflike, including this example (11/12). The mirrored fields are deeply reflective and contrast against essentially untuned gray-frosted devices on this relatively unmarked coin. A couple of small dark toning spots do little to interrupt the overall surface quality, and the strike is better than expected for this O-mint issue. NGC ID# 253V, PCGS# 97091, CoinPlex ID# M\$M1879ODMPL

1880-CC Morgan Dollar, MS67 Prooflike Finest Prooflike Specimen at NGC

5736 1880-CC MS67 Prooflike NGC. Prooflike and Deep Mirror Prooflike examples of this issue are not particularly rare, except in grades above MS65. In Superb Gem MS67 quality, this is the only existing example with no deeply mirrored examples graded. An extremely important opportunity to acquire the finest-certified Prooflike example of this issue. Borderline deep-mirrored fields surround highly lustrous devices. This is an exceptional example with sharp design elements. Just a trace of pale gold toning is visible on both sides, but this is essentially a brilliant Superb Gem Prooflike dollar. Census: 1 in 67 Prooflike, 0 finer (11/12).

From The Steve Reed Collection. NGC ID# 2542, PCGS# 7101, Coin-Plex ID# M\$M1880CCPL

1881-O Morgan Dollar, MS66 Prooflike The Single Finest Certified

5737 1881-O MS66 Prooflike NGC. Although Prooflike examples of the 1881-O are occasionally encountered, most of them show heavy bagmarks, making Gem and finer Prooflike coins a true rarity. Indeed, this Premium Gem Prooflike example is *the sole finest* seen by either NGC or PCGS. Relatively strong field-motif contrast is evident on both sides, which are untuned save for a whisper of soft gold color clinging to the rim areas. The design features display excellent strike for a New Orleans issue, including virtually full delineation in the hair over Liberty's ear and on the eagle's breast feathers. A few minor grazes in the right obverse field are all that preclude a finer numerical grade. This is a wonderful coin deserving of a generous bid.

From The Steve Reed Collection. NGC ID# 2548, PCGS# 7129, Coin-Plex ID# M\$M1881OPL

1886-O Morgan Dollar, MS64+
Great Eye Appeal

5738 1886-O MS64+ PCGS. CAC. It is estimated that 6 million to 8 million of the nearly 11 million 1886-O Morgan dollars were melted, likely under the terms of the Pittman Act. Near-Gems are scarce and Gem examples are virtually unobtainable. The present high-end near-Gem is one of only six 1886-O pieces graded MS64+ by PCGS with 4 finer. The untoned surfaces exhibit well struck design elements and just a few minor grazes that prevents full Gem classification. Both sides yield great overall eye appeal. PCGS# 7168, NGC ID# 254W, CoinPlex ID# M\$M1886O

1893-S Dollar, Toned AU53
Well-Detailed and Problem-Free

5739 1893-S AU53 NGC. Just the mention of an 1893-S Morgan dollar is enough to stir any series fan's blood, regardless of the grade. The issue has a cachet that is unique within the series, far more even than the 1895 proof, a coin that is unobtainable for many collectors. But the 1893-S is available in such a wide grade range, from AG3 to MS65 and (very seldom) finer, that nearly any numismatist — even the most budget-minded (or wallet-challenged) — can afford an acceptable example. While Bowers notes in various references that the 1893-S Morgan has an "average grade of Very Fine," that factoid disguises the wide grade range in which the coins appear. This is one of the finer high-end circulated examples obtainable. Much brilliance underlies the moderate blue and gray toning seen over each side. The strike details are strong and there are no obvious or detracting marks on either side. NGC ID# 255U, PCGS# 7226, CoinPlex ID# M\$M1893S

Popular Key 1893-S Morgan Dollar, MS64 Excellent Eye Appeal, Only Three Finer at NGC

5740 1893-S MS64 NGC. With a reported mintage of 100,000 pieces, the 1893-S silver dollar has the lowest mintage of any regular issue Morgan, making it the key date of the series (the supposed mintage of 12,000 circulation strike 1895 Morgan dollars, according to the *Annual Report of the Director of the Mint*, turned out to be an accounting-error entry as those pieces were of earlier date).

The low mintage of the 1893-S Morgan dollar was the result of several factors. First, the year 1893 saw a financial panic of a magnitude previously unrecorded in U.S. history engulf the country, causing financial institutions to fail, the plight of farmers to worsen, and labor unrest to increase. Second, there was an oversupply of silver dollars in Treasury vaults, resulting from the Sherman Silver Purchase Act of 1890, a step-child of the late 19th century Free Silver Movement. This act, a successor to the Bland-Allison Act of 1878, required the government to purchase \$4.5 million of silver bullion a month to be turned into Morgan dollars, which piled up in vaults. Third, the new president, Grover Cleveland, a gold-standard Democrat who opposed the silver interests, called for repeal of the Sherman Act. All the above, plus silver mine closings and dwindling silver supplies from Nevada's Comstock Lode resulted in fewer Morgan dollars being struck between 1893 and 1895.

While the record-low production at the San Francisco Mint helps explain the 1893-S Morgan dollar's scarcity today, particularly in Mint State, it is possible that they became rarer when tens of thousands of the coins were melted under the terms of the 1918 Pittman Act, according to Q. David Bowers in *Silver Dollars & Trade Dollars of the United States: A Complete Encyclopedia*. This act permitted the melting of up to 350 million silver dollars for conversion into bullion and shipment to Great Britain during World War I and for use in the production of subsidiary U.S. coins.

The 1893-S dollar is generally considered to be the most desirable single Morgan dollar issue struck at a branch mint. Specimens are highly desired in all grades, and not just among Morgan dollar date and mintmark collectors. Many others just desire to have an example of this classic rarity in their collection.

Most surviving 1893-S Morgan dollars are in the Good to Very Fine range, with the majority of known pieces in the single grade category of Very Fine. Bowers writes in *A Guide Book of Morgan Silver Dollars* that most such pieces circulated in the American West, "and for an appropriate but apparently restricted time, to bring them to this grade. Mint State coins exist. However, among the great Treasury release coins of 1962 through 1964, no bag or even small group was found." NGC has certified, to date, just 27 Uncirculated 1893-S dollars, and PCGS 37 Mint State specimens. A number of these are likely resubmitted or crossover coins.

Only one hoard of 1893-S Morgan dollars has been reported, 20 Uncirculated pieces in an original bag of 1894-S dollars. This bag was discovered, according to Neil Berman in an October 2007 *Numismatist* article, by John Love in Great Falls, Montana, in the 1950s.

The popularity of the 1893-S has resulted in a number of fakes. Indeed, some researchers think the number of counterfeits might exceed the number of genuine pieces! Fortunately for collectors, the entire issue was struck from one known die pair. Genuine coins show two diagnostics, a die polish line in the center of the crossbar of the T in LIBERTY and two tiny die chips that resemble "rabbit ears" in the left base of the R. These diagnostics are visible even on well-worn coins.

This near-Gem example displays pleasing luster on both sides, each of which shows hints of prooflikeness. Some field-motif contrast is evident when the coin is tilted under a light, especially on the reverse. The design elements are sharply impressed, including the hair above Liberty's ear, which is almost fully delineated. Soft rainbowlike toning resides along the upper obverse border; otherwise, the remaining surfaces are mostly untoned. A couple of unobtrusive grazes are visible between stars 3 and 4 and 4 and 5, and a couple of minute marks are seen on the left part of the neck. None of these detract and are mentioned solely for pedigree purposes. All in all, this coin displays excellent eye appeal. Census: 10 in 64, 3 finer (11/12).

From The Steve Reed Collection. NGC ID# 255U, PCGS# 7226, CoinPlex ID# M\$M1893S

Gem 1894-O Morgan Dollar High-Luster Condition Rarity

5741 1894-O MS65 NGC. The three dollar-coin issues of 1894, the first full post-Silver-Purchase year, offer a dramatic study in contrasts. The 1894 Philadelphia famously has a mintage of only 110,000 business strikes and is a celebrated rarity. The 1894 San Francisco has a higher mintage at 1.26 million coins and was paid out in quantity during the 1950s, creating high availability in the better Mint State grades.

The 1894-O arguably is the most problematic of the three issues. New Orleans struck nearly a half-million more silver dollars than San Francisco in 1894, and in worn grades the 1894-O easily is the least expensive of the three. Even in the lowest Mint State grades, the 1894-O rivals only its San Francisco counterpart. In Select condition, however, the 1894-O starts a hard charge in price due to condition scarcity. In near-Gem its price approaches or even overtakes the low-mintage Philadelphia issue, and at the Gem level, the 1894-O dollar is a no-questions condition rarity.

Neither NGC nor PCGS has recognized a coin in MS66 or better condition, making this Gem a supremely important example for the high-end collector. While it has the issue's usual weakness at the central obverse, the eagle's breast feathers are better-defined than usual. The luster too is above-average, rolling cartwheels with just a hint of apricot color on smooth silver surfaces. A diagonal scrape just below the eagle's neck is acceptable on the reverse of a Gem but precludes a finer designation. Census: 6 in 65, 0 finer (11/12).

From The Steve Reed Collection. NGC ID# 255W, PCGS# 7230, CoinPlex ID# M\$M1894O

Mint State 1895-O Morgan Dollar In-Demand Series Semikey

5742 1895-O MS61 NGC. The 1895-O Morgan dollar certainly hold its own in the rarity rankings against its illustrious siblings from Philadelphia and San Francisco. Most examples of the 1895-O dollar are well-circulated, and Mint State coins are few and far between. This MS61 example is one of 55 submissions in this grade at NGC, with one in 61+ and 52 finer (11/12). Full satin luster appears over grayish-white surfaces that show moderate marks, including some on the cheek of Liberty. The strike is about average for the issue, showing weakness in the hair over the ear. This is a nice, lower-end Uncirculated example of one of the series semikeys that would be a major upgrade for most sets. NGC ID# 255Y, PCGS# 7236, CoinPlex ID# M\$M1895O

1895-S Morgan Dollar, MS65 Prooflike Tied for Finest Certified

5743 1895-S MS65 Prooflike NGC. This semikey of the Morgan dollar series is available for a price in most circulated grades and even the lower tier of Mint State, but there is no denying its genuine scarcity at the Gem level. Adding Prooflike surfaces to the mix, as the present coin does, only reinforces the rarity and impressive eye appeal. Faint sky-blue tints settle on appreciably reflective surfaces, as do a few small patches of light cloud-gray. Strongly struck for the date with just a few minor flaws combining to account for the grade. Census: 8 in 65 Prooflike, 0 finer (11/12).

From The Steve Reed Collection. NGC ID# 255Z, PCGS# 7239, CoinPlex ID# M\$M1895SPL

1896-O Morgan Dollar, SP63 Possibly Unique Specimen Strike

5744 1896-O SP63 NGC. Attributing this coin as a Specimen, NGC suggests that it is a special coin, more important than Prooflike pieces, although falling short of a proof description. We are unable to find mention of any proof 1896-O dollars in the literature, save for a single "proof" example offered in M.H. Bolender's 183rd sale held on February 23, 1952, a coin that realized \$60 at a time when a typical 1896-O brought \$10 or \$12. Appearing as lot 309 in that sale, offering Bolender's personal silver dollar collection, the coin was described as "Proof. Slightly toned. Very rare branch mint proof, probably two or three known. Cost \$65."

The dull gray surfaces and sharp design features of this example are similar to Prooflike or Deep Mirror Prooflike coins. The surfaces are lightly hairlined with minor contact marks, also typical. However, this example is the only 1896-O dollar that comes to our attention with a description that suggests a special issue. Both sides are fully and deeply mirrored, with a bold strike showing slight merging of a few hair strands above the ear. All other aspects are bold, including the eagle's breast feathers. Here is an exceptional Morgan dollar for an advanced cabinet.

From The Steve Reed Collection. NGC ID# 2563, PCGS# 7242, CoinPlex ID# M\$M1896O

1901 Dollar, Lustrous MS64 Example Atypically Nice for This Challenging Issue

5745 1901 MS64 PCGS. CAC. This is a remarkable near-Gem example of the conditionally rare 1901 Morgan silver dollar. Despite an impressive mintage of nearly 7 million coins, few have survived in any Mint State grade. Rather than the usual “strike and store” policy that affected most Morgan dollar issues, these coins were actually placed into circulation at the time of issue. Examples that may not have entered circulation almost certainly met their fate under the Pittman Act of 1918.

In his *Silver Dollar Encyclopedia*, David Bowers described the typical Mint State 1901 Morgan dollar:

“Most Mint State 1901 dollars are poorly struck and have inadequate luster. A coin that is MS-60 to MS-62 from a technical viewpoint, can be dull and unattractive. As it this were not enough, most show unsightly bagmarks. ... higher grade Mint State dollars exist but are exceedingly rare. The typical specialist in silver dollars will often find that years elapse between stocking coins in as high as MS-63 grade. Forget about MS-64 and MS-65.”

For the collector who has a serious interest in this piece, we recommend reading the above comments while viewing the coin in person. The following will be noted: While not fully struck, it is a clear exception to the usual rule of poorly struck coins. Only one or two bag marks are visible on each side, none “unsightly.” Not only does this piece display adequate luster, it is highly lustrous, fully brilliant, and most attractive. This is an amazing near-Gem 1901 Morgan silver dollar, an exceptionally rare and highly desirable coin. It is almost exactly the opposite of the usually seen representative of this date. Population: 28 in 64, 3 finer (11/12).

Ex: *FUN Signature* (Heritage, 1/2007), lot 1126. PCGS# 7272, NGC ID# 256J, CoinPlex ID# M\$M1901

PROOF MORGAN DOLLARS

PR68 Cameo 1883 Morgan Dollar
Balance of Toning and Contrast

5746 1883 PR68 Cameo NGC. At 1,039 proofs struck, the 1883 Morgan dollar was the last year with a four-figure mintage for the finish until 1892, the debut of the Barber design, and the series never reached such heights after. This is a magnificently preserved specimen that combines intense contrast and rich patina. The obverse has wider coverage of silver, both frosted and mirrored, but also appreciable blue-violet patina. The reverse has greater coverage for the toning but also more intense contrast in the untuned areas. Gorgeous and among the elite survivors of the series. PCGS# 87318, CoinPlex ID# M\$P1883CA

Important 1895 Morgan Dollar, PR60
Distinctly Toned, Attractive for the Grade

5747 1895 PR60 NGC. Ownership of any 1895 Morgan dollar is a privilege that far more collectors want than ever can be satisfied. Even worn or harshly cleaned specimens from this proof-only issue of 880 pieces bring tens of thousands of dollars. This PR60 example is neither, which will please potential bidders, and while this coin comes by its grade honestly due to hairlines, a contact mark just off the endcap leaf on the olive branch, and a pinscratch underlining the words WE TRUST on the reverse, its calmly reflective luster and blue-inflected overtones make this coin attractive for general display. *From The J.D. Tanner Collection.* NGC ID# 27ZR, PCGS# 7330, CoinPlex ID# M\$P1895

1895 Morgan Dollar, PR62

Attractive and Affordable Example of This Key

5748 1895 PR62 PCGS. There is a sufficiently wide grade variance in the 1895 proof Morgan dollars that most collectors can stretch to afford an example in their price range, even if it may be a stretch, and predictably it is the last coin they acquire to complete their sets. The 1895 Morgan dollar was known as a rarity relatively soon after its release, but even so, researchers Jeff Garrett and Ron Guth estimate that 50 to 75 examples survive in circulated grades. Most of the unimpaired proofs are in the PR62 to PR64 grade range, but examples are found in just about any grade desired, from the lowest circulated grades — PCGS has certified an example in Proof 6 — to the highest proof grades.

This PR62 example will certainly please some lucky collector. Slight hairlining accounts for the lower grade, but the fields still retain considerable reflectivity. Another point of interest is the mint frost over the devices. This is especially evident on the reverse, but both sides exhibit a slight cameo contrast. At first glance this appears to be a brilliant 1895 dollar, but slight peripheral golden-brown color is noted on each side around the outer margins. The only surface flaw we see is Mint-made, a small, shallow planchet flake out of the field just below the right leg of the M in UNUM. As one would expect from this date, the strike details are fully brought up over each side.

From The Teich Family Collection. PCGS# 7330, NGC ID# 27ZR, CoinPlex ID# M\$P1895

1895 Dollar, Sharply Contrasted PR65 Cameo 'The Ultimate Silver Trophy Coin'

5749 1895 PR65 Cameo PCGS. The 1895 Morgan dollar, notoriously found only in proof format, has long been known as the "King of Morgan Dollars." While that is certainly true, we would offer an alternative moniker: The Ultimate Silver Trophy Coin.

We suggest this nickname with full awareness that some might object that the 1804 silver dollar is the correct candidate. The difference is, the 1895 Morgan dollar is a *trophy that can actually be won* by collectors who are not megawealthy.

It is true that no 1895 Morgan dollar will sell inexpensively at any major auction, but they span a wide grade range, and there is sufficient supply that *competitive bidding* can win a nice example.

It might be instructive to examine some recent auction records, by price, to see what the "trophy winners" got for their money:

—\$32,900. PR55 NGC. Lot 4259 in our Long Beach Signature (Heritage, 9/2012), was a lightly circulated proof that we described as a possible pocket piece with a few marks on Liberty's cheek and a planchet flaw. "Light rose-colored surfaces show significant deep gray patina surrounding the devices on each side."

—\$38,812.50. PR62 Cameo PCGS. From our Pittsburgh Signature (Heritage, 10/2011), lot 4314, a piece we cataloged as "excellently detailed" and "appreciably contrasted," despite some moderate hairlines and a contact mark on the jaw.

—\$39,000. PR58 PCGS. A piece sold on eBay, July 2012, no description available. (Reference: PCGS CoinFacts.)

—\$44,062.50. PR61 NGC. Lot 4260 in our Long Beach Signature (Heritage, 9/2012) was described as having some field hairlines but "fully detailed and showing fully evident proof surfaces."

—\$44,062.50. PR63 PCGS. For lot 4261 in our Long Beach Signature (Heritage, 9/2012), where we noted light hairlines but "none of the contact marks usually seen on proofs in this grade."

—\$49,938. PR64 Cameo NGC. From our Philadelphia Signature (Heritage, 8/2012), lot 5214: "A lovely example that displays pronounced cameo contrast on each side. The surfaces are untuned with a slight haziness."

—\$51,750. PR63 NGC. Lot 4461 in our Long Beach Signature (Heritage, 5/2012) was cataloged as "an exceptionally well-produced example with strong field-device contrast on each side, made even more apparent by the lack of toning. There are virtually no contact marks; just a few obverse hairlines ..."

—\$71,875. PR66 Cameo NGC. Lot 4462 in our Long Beach Signature (Heritage, 5/2012), described as "one of the best-preserved 1895 dollars."

—\$89,125. PR67 Ultra Cameo NGC. Lot 4150 in our Long Beach Signature (6/2011): "Unquestionably one of the finest 1895 dollars extant."

—\$109,250. PR68 Ultra Cameo NGC. Lot 4668 in the Baltimore auction (Stack's/Bowers, 6/2011), cataloged as "one of the most exquisite proof 1895 Morgans ever to grace one of our auctions."

—\$126,500. PR66 Deep Cameo PCGS. CAC. Lot 3773 in our FUN Signature (Heritage, 1/2012), "an essentially perfect specimen," tying the record for the issue with another PR66 PCGS coin from our Dallas Signature (Heritage, 7/2006), lot 3010. Lot 3772 in our FUN Signature (Heritage, 1/2012) was a second PR66 Deep Cameo PCGS example, lacking the CAC approval, which brought \$115,000.

"Beauty is in the eye of the beholder," goes the old bromide, and what is surprising to us in the above records is the wide variance in grade and surface finish, as well as in the prices realized. The ceaseless demand for The Ultimate Silver Trophy Coin shows no sign of letup.

This is a deeply mirrored proof that displays strong contrast on each side. The centers are more brilliant than not, and the peripheries display reddish-russet toning. The surfaces are extraordinarily clean and clearly suggestive of an even higher grade. PCGS# 87330, CoinPlex ID# M\$P1895CA

1895 Dollar, Brilliant PR67 Cameo Key Date With Only 880 Pieces Struck

5750 1895 PR67 Cameo NGC. The 1895 Morgan dollar is a famous and notorious issue in U.S. numismatics, one of the most curious mysteries of the “Hobby of Kings.” Only proofs are known of the 1895 silver dollar — no conclusive business strike has ever been found, even though 12,000 pieces were recorded as being struck. The *Guide Book* says simply in a footnote, “Beware of removed mintmark. Values are for Proofs. Circulation strikes are not known to exist.”

Q. David Bowers writes in his *Guide Book of Morgan Silver Dollars*, rather emphatically:

“In Philadelphia in 1895 no silver dollars were minted for general circulation, and production was limited to just 880 proofs for collectors. The Annual Report of the Director of the Mint stated that 12,000 circulation strikes were made, but later research by Henry T. Hettger would reveal that this was an accounting-entry error, and that the pieces were of earlier date.

“The production of dollars at the other two operating mints, New Orleans and San Francisco, was low for the era, creating varieties that a later generation would recognize as rare, especially in higher grades.”

There are actually only two realistic scenarios for the mythical 12,000 business strikes reported:

—Either they were never produced at all (meaning that they were dated 1894 in all likelihood); or

—If they were indeed produced and dated 1895, they remained unreleased in Treasury holdings until meeting a fiery doom in the vast Pittman Act meltings of some 270,370,722 silver dollars under the provisions of the Act of 1918 (with the actual meltings occurring in 1919 and continuing into 1920).

The other remote possibility — that some small handful is waiting to turn up somewhere — is rendered moot by the vast number of American collectors, the rising prices of silver over recent decades, and that most overseas hoards of American coins have been gold, not silver. *If any 1895 business strike Morgan dollars still exist, the evidence certainly suggests they would have been found by now.*

This is an exceptional 1895 Morgan; in fact, it would be an exceptional coin even if it were another nonkey date. Both sides are thoroughly brilliant, and the fields are impressively deep in their mirrored reflectivity. Contrasted against this mirroring is the significant mint frost over the devices. There are no singularly mentionable or noticeable contact marks on either side to distinguish this coin from the other 10 Cameo PR67 coins certified by NGC. Exceptional quality and a coin that will surely bring an impressive price when it crosses the auction block.

From The Douglas Collection. PCGS# 87330, CoinPlex ID# M\$P1895CA

1898 Silver Dollar, PR66 Deep Cameo Astounding Contrast

1898 Dollar, Ultra Cameo PR67 Extraordinary Field-Device Contrast

5751 1898 PR66 Deep Cameo PCGS. The year is well-known for its exceptional proofs of all denominations, struck near the close of the second Philadelphia Mint that would only remain operational for two more years. This Premium Gem Deep Cameo proof is a remarkable specimen, even for a year of well-produced proof coins.

Both sides are brilliant with deeply mirrored fields that frame the satiny, highly lustrous devices. Wisps of champagne toning on the sharply detailed design motifs enhance the eye appeal, creating a beautiful example that will serve the specialist or type collector. Population: 10 in 66 Deep Cameo, 12 finer (11/12). PCGS# 97333, CoinPlex ID# M\$P1898DC

5752 1898 PR67 Ultra Cameo NGC. The repeal of the Sherman Act in 1893 resulted in the closing of the mints to the free coinage of silver. This was a hard blow to the cause of bimetallism, in that it restricted the use of silver. It was followed by a lower price for that metal than had ever been known. However, agitation for bimetallism increased in America and took the form of advocating the free coinage of silver by the United States and was one of the principal issues in the presidential elections of 1896 and 1900. In both cases it was emphatically rejected.

While Americans were hashing out the issue of the free coinage of silver between 1896 and 1900, some of the most attractive silver proof coins ever produced were struck by the Mint. This is especially true of those from 1898, coins that are invariably deeply reflective and often show heavy frost over the devices. This is a lovely example of that production process. What is even more exceptional on this piece is the remarkable preservation of this coin's surfaces. They are virtually free of contact marks or any other form of post-striking defects. Brilliant throughout with immense eye appeal. Census: 36 in 67 (2 in 67+) Ultra Cameo, 0 finer (11/12).

Ex: Dallas Signature (Heritage, 10/2006), lot 2354. PCGS# 97333, CoinPlex ID# M\$P1898DC

1899 Morgan Dollar, PR67 Cameo Only One Finer Coin at PCGS

5753 1899 PR67 Cameo PCGS. The 1899 proof Morgan dollar boasts a nominal mintage of 846 pieces, and Walter Breen notes that there has always been some pressure on this small supply because of "vigorous speculator activity in uncirculated pieces." No doubt the turn-of-the-century date accounted for some of this unusual demand.

The present coin is a magnificent Superb Gem with razor-sharp definition on all design elements and virtually pristine surfaces. The frosty devices contrast profoundly with the liquid mirrored fields to create a startling black-on-white cameo flash when this coin is tilted in the light. This coin possesses tremendous eye appeal to complement its high technical grade. Population: 3 in 67 Cameo, 1 finer (11/12). PCGS# 87334, CoinPlex ID# M\$P1899CA

Bright, Contact-Free 1921 Zerbe PR67 Morgan The Sole Finest Certified

5754 1921 Zerbe PR67 NGC. The Zerbe proof 1921 Morgan dollars are a coin with an interesting back-story, one almost as colorful as the man responsible for their creation. Farran Zerbe was well-connected but not always well-liked in his own day; in fact, more than a few numismatists in the early 20th century appear to have actively despised him. Zerbe (1871-1949) was a numismatic writer, collector of numismatic literature and coins, and an entrepreneur of the first rank in the late 19th-early 20th century.

His overpromotion of the issues was to blame for some collectors' getting "burned" by the commemorative gold dollars of 1903-05 — the Louisiana Purchase/Lewis and Clark pieces. One of Zerbe's chief detractors was respected coin dealer Thomas L. Elder, who condemned Zerbe's activities as demeaning hucksterism.

Zerbe served as president of the American Numismatic Association from 1908-1910, yet some numismatists were dismayed when he bought *The Numismatist* from the heirs of George F. Heath, founder of the ANA, upon the occasion of Heath's sudden death.

Zerbe's promotion and influence were responsible for the creation of the five-piece 1915-S Panama-Pacific commemorative sets in gold and silver; yet when the ANA held its annual convention in 1915 in San Francisco, Zerbe's name served to keep away hordes of collectors, creating an all-time record-low attendance for the event, fewer than 20 persons in all.

The Zerbe proof Morgan dollars are another case in point; even today, some numismatists disagree over their status. Zerbe was the driving force behind the introduction of the Peace dollar, and the story is told that the Zerbe proofs were a sort of "consolation prize" to his not being able to have the Peace dollar launched within the calendar year 1921.

This Superb Gem is the nicest Zerbe proof we have ever seen. The fields are the brightest we can recall, with the characteristic die polishing lines visible, and the surfaces are bright throughout, showing light frost over the devices. The full strike is convincingly that of a proof. Unlike most Zerbe proofs, there are no obvious contact marks, but we note the diagnostic light die scratch is also faintly visible above the second U in UNUM. Although there are a handful of examples each at NGC and PCGS in the PR66 (or SP66) grade level, this piece is the sole Superb Gem certified at either service (12/12). As the PR66 examples are now bringing well into the five figures, we expect this piece will spur considerable excitement at auction. NGC ID# 257A, PCGS# 7341, CoinPlex ID# M\$P1921ZERB

PROOF PEACE DOLLAR

Notable PR64 1921 Peace Dollar Famed Matte or Satin Finish

5755 1921 Matte PR64 NGC. The competition that ended in the selection of the Anthony de Francisci designs for the Peace dollar, meant to commemorate the end of the Great War, specified that “on one side a Liberty head is to be used similar to that on the present coin, but made as beautiful and full of character as possible.”

As did Augustus Saint-Gaudens a decade and a half earlier with the double eagle, de Francisci not only modeled an aesthetic show-stopper in the Peace dollar obverse, but he chose a high-relief design that was, unfortunately, anything but practical for high-speed production. The last-minute modifications to the reverse die, undertaken by Mint engraver George T. Morgan on December 23, 1921, meant there was no time for production trials of the high-relief design. Roger Burdette writes in *A Guide Book of Peace Dollars* that “using a new high-relief design without proper testing was very risky, and it is a credit to the Mint staff that the first production coins turned out as well as they did.”

Concerning proof coinage, Burdette writes:

“Simultaneous with production of the 1921 circulation coins, engraver Morgan had Sandblast and Satin Proofs made. The Proof dies were from the same hubs as production dies but were made with greater care in impressing the design, and the coins were struck on a medal press. Also, while the coining department was busy, Morgan created new 1922-dated high-relief hubs similar to 1921’s in anticipation of continuing the high-relief design into 1922.”

Of course, the high-relief design was quite soon afterward abandoned, as striking difficulties with the production coins and drastically shortened die life became apparent.

Although the Matte Finish proofs were recognized early on, the Satin Finish proof 1921 Peace dollars were unknown until the 1975 ANA Convention, when the first examples were authenticated. The present Satin PR64 is one of six so certified at NGC, with three examples finer (6/12). The surfaces show golden-rose and light blue toning somewhat irregularly dispersed on each side with vivid, bright underlying luster. As expected from the production on a medal press, the piece is fully struck in the centers. A faint, shallow vertical mark in the left obverse field out from the L in LIBERTY may provide a pedigree marker, and the grade derives from several small but individually insignificant contact marks. This is an important and quite rare coin for Peace dollar collectors. NGC ID# 2826, PCGS# 7382, CoinPlex ID# P\$M1921MATTE

ERROR

Famous (2000)-P Mule Error, Lustrous Premium Gem Quarter Obverse, Sacagawea Reverse and Planchet

5756 (2000)-P Sacagawea Dollar — Muled With Statehood Washington Quarter Obverse — MS66 PCGS. Die Pair 1 (of 3), cracked through the F in OF on the reverse. This “mule” error, which combines a Sacagawea dollar’s planchet and eagle “tails” design with a “heads” side that shows George Washington and the legends from the Statehood quarter design from 1999 on. A “P” mintmark represents Philadelphia.

While the coin itself is dateless — in 2000, Washington quarters were dated on the reverse and Sacagawea dollars the obverse — the coins were identified and documented in 2000, the first year of Sacagawea dollar production, hence the date attribution. It is worth noting that in theory, similar errors could have been created from 2001 to 2008 while the Sacagawea dollar had an eagle on the reverse, but after the considerable public embarrassment these “mules” caused the U.S. Mint — the Office of Public Affairs released a statement on August 4, 2000, confirming the genuineness of at least four “mules” and citing rumors of further discoveries — one would expect the U.S. Mint to have been “on alert” during that time.

The market for these “mules,” ranked #1 in 100 *Greatest U.S. Error Coins*, has been unusual, to say the least. Early auction appearances were in the five-figure range, but the vast majority of the known coins were snapped up, at least in the early going, by a single collector, Tommy Bolack (as detailed in Appendix B of *100 Greatest U.S. Error Coins*). After almost a decade of exclusively private transactions for these coins, the auction route is making a comeback. It is clear the winning bidder will have to rise above the scrum to win this prize.

For now there are 11 confirmed distinct examples of these “mules,” though others may well exist. (The 11th piece did not come to light until 2011, after the publication of the reference.) Identifying this coin within that roster is tricky, as there are several MS66 PCGS examples from Die Pair #1 and the market for these coins was almost exclusively private from 2001 to 2011. This coin does not appear to be a match for the “Discovery” coin as pictured in the Bowers and Merena Sale of the Millennium from August 2000, but the “Fred Weinberg” and “Tommy Bolack 1” specimens remain possibilities.

This example is yellow at the base with a few grayish areas on the obverse and broad lavender-to-violet overtones on the reverse. The most notable shallow planchet voids, which may aid in future identification, are at the top of Washington’s temple and a pair in the field to the left of his nose. PCGS# 9584, NGC ID# 259K

1857 Nine-Piece Proof Set
Half Cent Through Dollar
All NGC-Certified, PR64 to PR66

5757 Half Cent PR65 Brown NGC. B. 1-B, R.4 as a proof. Identifiable as to variety by doubling seen on the T in CENT. The surfaces have toned deep blue-brown over each side, yet the mirroring in the fields is still evident and brightly shines through the patina. This Gem is fully struck, as expected, with wide, squared-off rims.

From The Douglas Collection. NGC ID# 26ZY, PCGS# 1332, CoinPlex ID# HFP1857BN

5758 1857 Braided Hair Large Cent PR66 Brown NGC. N-3, Low R.5. A bold die line on Liberty's bust truncation confirms this rare proof-only variety. The denticles and stars are each needle-sharp, and LIBERTY appears to be fully struck. The lovely chocolate-brown surfaces are accented with turquoise-blue in the recesses, beautifully preserved, and seemingly free from even the faintest contact. Only 12 pieces have been certified Proof 66 Brown by both services; none are finer (11/12).

Ex: Dallas Signature (Heritage, 11/2005), lot 142.

From The Douglas Collection. NGC ID# 2275, PCGS# 2000, CoinPlex ID# LGP1857SDBN

5759 1857 Flying Eagle Cent PR65 NGC. Provided one ignores the numerous pattern issues of 1856, fewer than 1,000 proof Flying Eagle cents were coined in the two years of the design, with an estimated 485 of those struck with the date 1857. Allowing for a degree of attrition, it seems reasonable to estimate that fewer than 600 specimens exist across both dates, with unimpaired survivors fewer still. Such statistics reinforce the value of this boldly impressed and exceptionally appealing Gem. The medium-brown surfaces display die polishing lines in the obverse fields amid vivid splashes of midnight-blue, violet, and pink. The fields are well-preserved and free of major distractions, as befits the grade. Struck with the reverse rotated about 30 degrees clockwise. Census: 7 in 65, 0 finer (11/12).

Ex: FUN Signature (Heritage, 1/2007), lot 786; Central States Signature (Heritage, 5/2007), lot 2024.

From The Douglas Collection. NGC ID# 227B, PCGS# 2040, CoinPlex ID# FEP1857

5760 1857 Three Cent Silver PR65 NGC. The 1 in the date is very low. Sharply struck on all design elements and free of clash marks, this Gem proof has a dense layer of mottled toning across each side. Free of contact marks or other distractions, this piece belongs in the collection of a numismatist who enjoys original patina. With only an estimated 75 pieces struck, there are probably no more than 25 to 30 proofs that still survive. Census: 14 in 65, 7 finer (11/12).

Ex: ANA Signature (Heritage, 8/2007), lot 299.

From The Douglas Collection. NGC ID# 27C4, PCGS# 3704, CoinPlex ID# 3SP1857

5761 1857 Half Dime PR64 NGC. This 1857 half dime is one of 16 to 20 proofs estimated known for the year. This bright near-Gem is visited by whispers of barely discernible gold-tan color. Well struck, with somewhat grainy motifs, and striae in the obverse fields. Some roller marks are visible on the upper obverse.

Ex: Phoenix Signature (Heritage, 3/2008), lot 375.

From The Douglas Collection. NGC ID# 235M, PCGS# 4436, CoinPlex ID# SHP1857

5762 1857 Dime PR66 NGC. Part of the challenge presented by an 1857 proof set is the absolute as well as condition rarity of the coins included in the set. In the case of the dime, it is estimated that 70 pieces were struck. Probably 30 to 50 pieces are known today in all grades. This is among the finest. Rich golden-rose and cobalt-blue toning is seen over the obverse, while the reverse is mostly golden with just a bit of peripheral blue. The bright mirrored fields flash forcefully through the toning and leave no doubt about the proof status of this piece. Full definition on the devices further confirms it. There are no mentionable or noticeable contact marks on either side. Census: 4 in 66, 3 finer (11/12).

From The Douglas Collection. NGC ID# 23CB, PCGS# 4746, CoinPlex ID# SDP1857

5763 1857 Quarter PR66 NGC. Deeply reflective fields shine brightly through the golden-brown central toning that turns blue around the margins. As with all proofs from this year, the mintage started out low and the number of survivors today is even less. Perhaps as few as 15-20 proof quarters were struck in 1857. This is one of the finest and is tied with two other PR66 coins at NGC (11/12).

From The Douglas Collection. NGC ID# 23WJ, PCGS# 5553, CoinPlex ID# SQP1857

5764 1857 Half Dollar PR66 NGC. As a testament to the strength of this Platinum Night Auction, we have two examples of the proof 1857 half dollar. This is significant as an unknown, but small number of proofs are believed known today, probably only two to three dozen individual pieces. This is a magnificent, brightly mirrored proof that also shows significant mint frost over the devices. The wonder is why it is not designated as a Cameo. Obverse striking detail is intricate with especially deep definition on Liberty's hair. The feathers on the eagle's leg on the reverse is just a bit shy of complete. Much brilliance is evident on each side with dusky rose and blue patina around the margins.

From The Douglas Collection. NGC ID# 27TG, PCGS# 6411, CoinPlex ID# LHP1857

5765 1857 Seated Dollar PR65 NGC. The Seated dollar is the crown-sized coin in this wonderful proof set and the capstone of the year, with an unknown mintage. Estimates are at least 50 pieces and range upward to 100 proofs. What is telling are the number (or lack thereof) of high-grade examples. In Gem only three others have been certified by NGC with 12 finer (surely quite a few duplicates are contained in that number). The hazy blue surfaces show an underlying reddish tint, and the mirrored flash is partially subdued, but when angled just so beneath a light the proof finish flashes forth. Sharply struck throughout with no obvious contact marks.

Eight-Piece 1877 Proof Set Cent Through Trade Dollar Sold as Individual Lots

This is a completely matched and complete proof set (including gold) all sold as individual lots, each of the minor coins through Trade dollar grading either PR66 Cameo or PR66 Ultra Cameo. Please also see the 1877 gold coins in our Platinum Night session, ranging from PR65 to PR67 and all designated Cameo or Ultra Cameo.

5766 1877 Cent PR66 Red Cameo NGC. Generous eye appeal is the hallmark of this key-date 1877 Indian cent, popular in either proof or business-strike format and seldom seen in so fine a grade. The present Premium Gem Red Cameo proof is among the few finest survivors of the original proof mintage of 900 pieces, a complement to the low business-strike production of 852,500 coins. The surfaces display bright, variegated yellow-red color. Considerable field-device contrast is evident on each side, and there are simply no mentionable drawbacks, in terms of either carbon or contact, on this lovely coin. Census: 1 in 66 Cameo, 0 finer (11/12).

From The Dr. James Olsen Collection. PCGS# 82320, CoinPlex ID# INP1877RDCA

5767 1877 Three Cent Nickel PR66 Ultra Cameo NGC. A meager 900 proofs constituted the entire production of three cent nickels in 1877, making this year far and away the key to the series, a popular coin even when found in circulated (impaired proof) condition. Optimal field-device contrast prevails on both sides, with the silver-white surfaces showing little trace of color otherwise. This incredible Premium Gem is the only Ultra Cameo of the issue in any grade at NGC (11/12).

From The Dr. James Olsen Collection. PCGS# 93773, CoinPlex ID# 3CP1877DC

5768 1877 Shield Nickel PR66 Cameo NGC. Just a trace of gold patina complements the pristine silver-gray surfaces with gray-white device high points providing plenty of cameo contrast on this Premium Gem 1877 Shield nickel. The surfaces are unmarked, well-struck, and extremely eye-appealing. Like its three cent nickel counterpart, the Shield nickel of 1877 was also a proof-only issue, struck to the recorded extent of 900 pieces, according to the *Guide Book* — or 510-plus according to Breen — or 1,250 according to Bowers. The series and issue are so popular today, it matters little. Census: 76 in 66 (1 in 66+) Cameo, 3 finer (11/12).

From The Dr. James Olsen Collection. PCGS# 83831, CoinPlex ID# SNP1877CA

5769 1877 Dime PR66 Cameo NGC. Type II Reverse, E in ONE relatively distant from wreath. This Premium Gem Cameo proof Seated dime is an excellent match in quality and contrast for the other coins in this complete eight-piece minor proof set. There is no trace of color over the silver-white surfaces, which show excellent contrast and no relevant marks on either side. Census: 5 in 66 Cameo, 0 finer (11/12).

From The Dr. James Olsen Collection. PCGS# 84774, CoinPlex ID# SDP1877CA

5770 1877 Twenty Cent Piece PR66 Cameo NGC. The twenty cent piece's short career in the annals of American numismatics saw the production of just four proof issues from 1875 through 1878, with the last two proof-only, 510 pieces in the case of the 1877 according to the *Guide Book*; Breen quotes a figure of 350 pieces. But the mintage matters not a whit with a piece of such high quality, a deeply contrasted silver-white Premium Gem with little trace of color on surfaces that are well-struck and essentially pristine. It is easy to see how the populace of the day could confuse these odd-denomination coins with the Seated quarter, dooming the issue to an early death. This is a super example for type-set purposes. Census: 7 in 66 Cameo, 0 finer (11/12).

From The Dr. James Olsen Collection. PCGS# 85305, CoinPlex ID# TWP1877CA

5771 1877 Quarter PR66 Cameo NGC. None of the various authorities can seem to agree on net production figures for the 1877 proof coinage, the quarter being a case in point: See the Breen *Proof Encyclopedia* quarter entries for 1877 and 1878 for some creative accounting. What is relevant to the present piece is that it is, like other members of this complete 1877 proof set, among the few finest survivors, a coin of marvelous quality. The surfaces are completely silver-white with bold contrast and an equally powerful strike. Minor die cracks appear around the lower reverse periphery. Unlike some of the smaller-denomination proofs dated 1877, the quarter saw an enormous production of business strikes, nearly 11 million pieces. Census: 6 in 66 Cameo, 3 finer (11/12).

From The Dr. James Olsen Collection. PCGS# 85578, CoinPlex ID# SQP1877CA

5772 1877 Half Dollar PR66 Cameo NGC. This deeply contrasted silver-white Premium Gem proof 1877 Seated half is another excellent match with the other coins in this complete proof set, an unmarked and boldly struck piece with excellent eye appeal, especially for collectors who prefer their coins untuned. The surfaces are fully struck throughout, and the sole mentionable marks are a couple of tiny ticks on Liberty's left (facing) arm. Only a handful of examples at both services combined can claim this high grade. Census: 5 in 66 (1 in 66+) Cameo, 0 finer (11/12).

From The Dr. James Olsen Collection. PCGS# 86438, CoinPlex ID# LHP1877CA

5773 1877 Trade Dollar PR66 Cameo NGC. Breen notes the reported proof mintage figure of 510 pieces but says:

"Actual mintage unknown; sole source for all these figures J.P. Kimball, in 1887 Director's Report. I have seen the monthly reports which were his source ... but not the daily delivery figures which might clarify the matter. I mention this specifically because the 1877 Trade dollar is a much rarer coin in proof state that its mintage figure suggests."

This gleaming Premium Gem is well-struck overall despite a hint of softness on Liberty's head, and the silver-white surfaces offer excellent contrast and minimal evidence of contact. Repunching appears on the 1 in the date. A top-notch conclusion to this well-matched minor proof set. Census: 4 in 66 Cameo, 1 finer (11/12).

Please also see the gold 1877 proofs from the set offered individually in our Platinum Night sessions.

From The Dr. James Olsen Collection. PCGS# 87057, CoinPlex ID# T\$P1877CA

1883 Nine-Piece Proof Set All PCGS-Certified, PR62-PR66

5774 1883 Nine-Piece Proof Set PCGS. CAC. Included in this proof set are:

Indian Cent PR62 Brown PCGS. CAC. Both sides are deep brown, and there a carbon spot in the reverse field below the N in CENT.

Three Cent Nickel PR64 PCGS. CAC. Light streaky golden-gray toning appears over each side and is sufficiently deep to partially subdue the mirrored flash in the fields. Essentially contact-free.

Shield Nickel PR65 PCGS. CAC. The three different types of nickels struck in this year contribute to the fascination of a proof set from 1883. Pale golden-lilac patina is seen over each side of this moderately reflective proof. Fully struck.

Liberty Nickel No CENTS PR65 Cameo PCGS. CAC. This one-year type is needed by collectors of both proof and Uncirculated type sets. This cameo example has hazy pastel patina over each side with deeply reflective mirrors in the fields.

Liberty Nickel With CENTS PR65 PCGS. CAC. Slight hazy patina in the fields only mildly affects the bright reflectivity of the proof mirrors. Attractive surfaces.

Seated Dime PR66 PCGS. CAC. Each side is deeply toned in shades of gray-rose and cobalt-blue. The reverse is a bit lighter than the obverse, and thus the fields are noticeably brighter on that side.

Seated Quarter PR64 PCGS. CAC. Deep blue-gray and pale rose toning covers each side and partially subdues the mirrors in the fields. A grade-limiting staple scratch arcs across the left part of the obverse and another is seen below the base of the rock.

Seated Half PR65 PCGS. This low-mintage issue has nicely reflective fields, but the mirrored flash is partially subdued by the depth of the blue-gray and rose toning that covers each side. Only the top of Liberty's head shows any weakness of strike.

Morgan Dollar PR65 PCGS. Like the other coins in this set, the dollar has similar blue-gray and rose toning over each side. The fields, especially those on the reverse, flash brightly when held beneath a light. A long, shallow area of planchet porosity is seen in the left obverse field. (Total: 9 coins) PCGS# 7318, NGC ID# 27Z7, CoinPlex ID# M\$P1883

GOLD DOLLARS

Singular MS68 1850 Gold Dollar Finest in Combined Population

5775 1850 MS68 NGC. CAC. Any discussion of this coin must start with its grade. This is the *single finest example* of the date in the major grading services' combined certified population (11/12): no ties, no "other-service" shenanigans, no exceptions. The nearest PCGS-graded coins come from a trio of MS67 listings (which may involve resubmissions, as there is only one MS66 coin in the *Population Report*), and NGC recognizes no coins but this in numerical grades above MS66.

To put this coin in a broader context, there are only 14 Type One gold dollars of any date in the MS68 grade range and a mere six coins in MS69 (11/12). These numbers back up what common sense presupposes: Any Type One gold dollar is a fantastic rarity in grades beyond Superb Gem. That this second-year coin is in clear first place for its issue is icing on the proverbial cake for type collectors, though for date enthusiasts it becomes a point of supreme importance.

Whether one collects by date or type, this MS68 gold dollar is an absolute dream. Intricately detailed devices show a single small copper spot on the top curve of the hair behind Liberty's coronet, a useful pedigree marker for identifying future appearances. Faint glimmers of both green and orange give the yellow-gold surfaces touches of color, while the luster, flashy at certain angles and swirling through others, is utterly untouched by the pedestrian faults seen on virtually all other coins. The CAC label backs up this assessment. A magnificent coin that must be seen to be believed.

From The Victoria Rose Collection. NGC ID# 25BF, PCGS# 7509, CoinPlex ID# G\$M1850

1855 Type Two Gold Dollar, MS65
Rare in Gem Condition

5776 1855 MS65 NGC. The Type Two gold dollars of 1854 and 1855 are sometimes called, more formally, the Indian Princess, Small Head design to distinguish them from the Type One Liberty Head coins that precede them and the Type Three Indian Princess, Large Head coins that follow. While NGC and PCGS have certified perhaps 2,000 Mint State coins, the preponderance of them are in grades from MS60 through MS64, Gems are only occasionally available, and a few wonder coins are known at the MS66, MS67, and MS68 levels (the last a single piece at NGC).

Given the steep grade-to-price curve that the Type Two gold dollars follow, many collectors opt for a nice MS63 or MS64 coin with good eye appeal over the much-costlier pieces in Gem and finer condition. Such a compromise is unnecessary with this piece. The surfaces are a wonder to behold. Each side shows die striations in the fields that in turn yield a bright, semiprooflike glow to both obverse and reverse. The strike details are uncommonly strong with only slight softness noted on the top of the 8 in the date. This is the coin for the collector who has been holding out for just the right example.

Ex: ANA Signature (Heritage, 8/2010), lot 3381, where it brought \$23,000.

From The Victoria Rose Collection. NGC ID# 25C4, PCGS# 7532, CoinPlex ID# G\$M1855TY2

1855-C Gold Dollar, AU58
Scarcer Variety 1

5777 1855-C AU58 NGC. Variety 1. Two varieties are now known of the 1855-C; this is the rarer one with the 5 in the date centered under the A. The second variety has the final 5 to the right below the A in DOLLAR. The second variety usually also has the digit 8 sharply defined. Predictably, the 8 is weak on this piece.

This piece is just a bit weak at the centers but overall is a superior example of this popular one-year type with virtually perfect surfaces below rich natural orange-gold color. As nearly every known 1855-C gold dollar has been cleaned or dipped at one time, the collector who appreciates originality should pay careful attention to this coin.

Ex: North Georgia Collection (Heritage, 1/1999), lot 7731; FUN Signature (Heritage, 1/2008), lot 3047, where it brought \$20,765. NGC ID# 25C5, PCGS# 7533, CoinPlex ID# G\$M1855CTY2

1872 Gold Dollar, Superb Gem Quality Formerly in David Akers' Personal Collection

5778 1872 MS67 PCGS. CAC. The 1872 gold dollar boasts a minuscule mintage of 3,500 pieces, low even by gold dollar standards. In his series reference, Q. David Bowers notes, "All 1872 gold dollars are rare." Most examples seen are in AU or lower Mint State grades. Superb Gem examples are extremely rare. Currently, PCGS has certified eight examples in MS67, with none finer, while NGC has graded no coins in this grade, with two finer (11/12). The present coin has boldly impressed devices that contrast starkly with the reflective, prooflike fields. The lovely greenish-gold surfaces complement the crisp design elements to create a visual treat for the discerning collector. David Akers informed us in 2010 that he obtained this coin from the heirs of an old-time collector, who purchased it directly from Wayte Raymond. The coin had been off the market for generations.

Ex: The Personal Collection of David W. Akers / ANA Signature (Heritage, 8/2010), lot 3389, where it brought \$14,950.

From The Ives Devos Collection. PCGS# 7572, NGC ID# 25D9, CoinPlex ID# G\$M1872

PROOF GOLD DOLLARS

1849 No L Gold Dollar, PR64 ★ Cameo Finer of Two Certified Specimens A Landmark Numismatic Offering

5779 1849 No L PR64 ★ Cameo NGC. The debate over proof 1849 No L, Open Wreath gold dollars boils down to a four-word question that only seems simple: “What makes a proof?”

Perhaps the only universal criterion for “proof” in U.S. numismatics is the intent to make a special coin. While there are varying degrees of quality for regular-issue or business-strike coins, a proof is meant to be set apart from those peers — apart and above. That said, the difference between a quality “prooflike” business strike and a true proof can be hard to discern, and the farther back in U.S. numismatic history one goes, the hazier the boundary gets. This is especially true in the pre-1858 era, when proof production was irregular and many protocols that apply to later 19th century issues were not in place.

Further complicating matters for the 1849 No L, Open Wreath gold dollar proofs is that the mintage was relatively small (Q. David Bowers estimates 10,000 pieces in *A Guide Book of Gold Dollars*) and many coins were saved, so the proportion of “prooflike” survivors is high — muddling the question of whether true proofs exist. In his *Guide Book* on the subject, Bowers recounts how esteemed experts can disagree on whether or not a coin is a true proof, using a coin in a Bowers and Merena auction as an example (*italics his*):

“At the viewing of the lot, qualified observers were divided in their opinions, but one suggested that all that was needed was to have it certified ‘Proof’ and that would end the matter; today, it is not unusual for opinions to change into facts (sort of) by this method!”

The one coin that has the most published acceptance of any claimed proof 1849 gold dollar (“unquestioned” according to Bowers, “indisputable” per Garrett and Guth in their *Encyclopedia of U.S. Gold Coins*), acquired in 1849 and now in the National Numismatic Collection of the Smithsonian Institution, has been harshly cleaned on the reverse; effectively, it is called a proof based on one side’s “prooflikeness,” for its acquisition the same year it was struck is mere circumstantial evidence.

Leaving cynicism about grading services aside for a moment, the existence of proof 1849 No L, Open Wreath gold dollars rarely has been in question, even as the statuses of various coins have come under scrutiny. (Mint records do not indicate the striking of any proofs, but as the historical record shows, this is hardly a disqualifier.) Walter Breen gave multiple estimates of the number of proofs extant, never more than a dozen; David Akers too evolved with time, from “seven to eight” with two auction appearances in his landmark book series from the 1970s to “nine or 10” in his 1984 cataloging of a coin he believed to be a proof.

Returning to the grading services, while PCGS has certified no 1849 gold dollars as proofs, NGC recognizes two. This PR64 Cameo example was the first to be certified, as it is mentioned in the first (2006) edition of Garrett and Guth, whereas the PR62 specimen also in the Census Report goes unmentioned and so must have been certified later. Based on the Star designation, NGC recognizes this coin’s eye appeal and quality by proof standards, which crystallizes how strongly NGC felt about the topic when it encapsulated the piece.

The overriding question for this specimen is not “What makes a proof?” but rather “What else could this coin be?” The deep mirrors, pale sun-yellow or glossy “black” depending on the angle of the light, do not suggest a “prooflike” trick but an honest attempt at making a coin special; the same goes for the frost on Liberty’s portrait, the 13 stars around that show complete centers (!), and the reverse wreath. Light linear flaws through the letters ITE of UNITED suggest die cracks, but this alone has little bearing on the coin’s proof status. Three parallel depressions between the left ribbon end and the U of UNITED may serve as a pedigree marker. PCGS# 87592, CoinPlex ID# G\$P1849CA

Sole Collectible Proof 1850 Gold Dollar An 'Old Friend' Returns

5780 1850 PR60 PCGS. *Friday, February 3, 1995, Long Beach, CA.* Lot 5301, an 1850 gold dollar described as a "possible proof," comes up for auction. It starts a bidding war. The winner walks away with the coin for \$7,480, a staggering sum for what was then a controversial piece. Walter Breen was on the record as proclaiming the one-time existence of a gold proof set for 1850, citing correspondence from Mint Director Robert M. Patterson, but the set and all coins in it were thought long-lost. Though a number of numismatic experts — including Jeff Garrett, Art Kagin, Julian Leidman, Jim Halperin, Sal Fusco, and John Pittman — believed the lot to be a proof gold dollar, none of the major grading services of the time (ANACS, NGC, and PCGS) would certify it as such.

Time, of course, has vindicated the winning bidder and all the underbidders who drove this coin to its impressive final price. PCGS came around and certified the coin as PR60, and Jeff Garrett went on to write the *Encyclopedia of U.S. Gold Coins* with Ron Guth, in which they included the following notes about proof 1850 gold dollars:

"The only 1850 gold dollar that can lay claim to Proof status was last sold in 1995. The coin is fully mirrored and extremely well struck. There are scattered lint marks that would lend credence to die polish. Unfortunately, the coin has been lightly burnished at one time. Another example is rumored to exist in a museum collection in France."

Unless that French museum decides to deaccession its rumored proof 1850 gold dollar or another example emerges from the woodwork, this is the sole proof 1850 gold dollar that is available to collectors. Though hairlined, its reddish-gold surfaces gleam with deep and reflective luster. Of note on the dies is a brief web of small cracks through the end of UNITED and the start of STATES on the reverse; depressions that can serve to identify this piece in the future include a lint mark between the 1 of UNITED and the rim as well as a narrow rectangular depression that appears as a horizontal "dash" to the left of the 1 on the reverse.

More than 18 years have passed since this coin last appeared at auction. It seems all but certain that the underbidders will have a long time to regret this coin getting away. Bid accordingly.

Ex: Long Beach (Heritage, 2/1995), lot 5301, uncertified but offered as "MS63 Cleaned," realized \$7,480; later, Park Avenue Collection. PCGS# 7593, CoinPlex ID# G\$P1850

1856 Gold Dollar, PR67 Ultra Cameo Probably Fewer Than 15 Examples Struck None Certified in Higher Numeric Grades

5781 1856 Slanted 5 PR67 Ultra Cameo NGC. Probably fewer than 15 proof Type Three gold dollars were struck in 1856, and the issue is very rare today. The Type Three design was introduced in 1856 because of striking problems that plagued the older Type Two motif. Two different date styles were used on business strikes of this year, one with an Upright 5 and the other with a Slanted 5. All proofs were struck with a Slanted 5, but the term “italic” is actually more correct for the numeral style used on these coins.

The rare 1856 proofs have always been popular with collectors, and examples began to appear at auction as early as the John F. McCoy Sale (W. Elliot Woodward, 5/1864). Lot 2001 of that catalog reads simply “1856 Dollar, brilliant proof.” It realized \$26 to William Lilliendahl. Collector interest has always been high for this issue, which historically shows up at auction infrequently. Its status as a trophy coin has resulted in more auction appearances in recent years, but the surviving population probably does not exceed 10 specimens. Recent sales include the spectacular PR66 ★ Ultra Cameo NGC coin in lot 2091 of the FUN Signature (Heritage, 1/2010), which realized \$86,250.

The present coin is a magnificent PR67 Ultra Cameo specimen, probably slightly superior to the terrific coin in the 2010 FUN sale, which was the highest-graded piece ever offered at auction until now. This coin features deeply mirrored fields that contrast profoundly with the frosty devices to produce a stunning cameo effect. An interesting network of clash marks is evident on both sides. The bright lemon-yellow surfaces are virtually free of imperfections and the design elements are sharply detailed throughout. Eye appeal is tremendous. This coin should find a home in the finest collection or Registry Set. Census: 1 in 67 Ultra Cameo, 1 in 67★ Ultra Cameo, 0 finer (11/12).

Roster of 1856 Proof Gold Dollars

1. **PR67 Ultra Cameo NGC.** A piece brokered by Todd Imhof to a private gold collector. **The present coin.**
2. **PR66 ★ Ultra Cameo NGC.** Rarities Sale (Bowers and Merena, 7/2002), lot 677; FUN Signature (Heritage, 1/2010), Lot 2091.
3. **PR66 Cameo NGC.** John F. McCoy Collection (W. Elliot Woodward, 5/1864), lot 2001; William Lilliendahl; Sixth Semi-Annual Sale (Woodward, 3/1865), lot 2830; Mendes I. Cohen Collection (Edward Cogan, 10/1875), lot 242; Lorin G. Parmelee Collection (New York Coin & Stamp, 6/1890), lot 1267; William H. Woodin Collection (Thomas Elder, 3/1911) lot 856; Virgil Brand, ledger number 57034; F.C.C. Boyd; World's Greatest Collection (Numismatic Gallery, 1/1946), lot 11; Memorable Collection (Numismatic Gallery, 3/1948), lot 11; Thomas Melish (Abe Kosoff, 4/1956), lot 1750; John Jay Pittman (David Akers, 10/1997), lot 872; Smith/Youngman Collection (Bowers and Merena, 3/2003), lot 2043; J.B. Worthington Collection (American Numismatic Rarities, 5/2005), lot 360.
4. **PR65 Ultra Cameo NGC.** Pre-Long Beach Auction (Superior, 5/2004), lot 2252; Bob Simpson; Boston ANA Signature (Heritage, 8/2010), lot 3392; Beverly Hills Signature (Heritage, 11/2011), lot 001-668.
5. **PR65 Deep Cameo.** Smithsonian Institution.
6. **PR65 PCGS.** FUN Signature (Heritage, 1/2007), lot 3364.
7. **PR64 PCGS.** Spring Sale (Stack's, 4/1978), lot 769; King of Siam Sale (Superior, 1/1993), lot 1266; ANA Signature (Heritage, 8/1996), lot 8125; FUN Signature (Heritage, 1/2012), lot 4710.
8. **PR64 PCGS.** Stickney Collection (Henry Chapman, 6/1907); lot 771; Clapp Collection (1942); Eliasberg Collection (Bowers and Ruddy, 10/1982), lot 31; Connoisseur Sale (Superior, 1/1989), lot 259; Ed Trompeter Collection (Superior, 2/1992), lot 2; Commodore Matthew C. Perry Collection (Bowers and Merena, 1/1995), lot 1145.
9. **PR64 PCGS.** Harry Bass purchased this coin from Bowers and Ruddy on 12/27/1971; Harry W. Bass, Jr. Collection, Part III (Bowers and Merena, 5/2000), lot 28.
10. **Proof.** Wayte Raymond; private collection since 1938; David Akers; Auction '85 (Paramount, 7/1985), lot 1367; Harry W. Bass, Jr. Core Collection.

Other Examples

- A. **Proof.** Charles Jay Collection (Stack's, 10/1967), lot 217; Public Auction Sale (Stack's, 11/1994), lot 1162
- B. **Proof.** R.C.W. Brock; University of Pennsylvania; Philip H. Ward, Jr. Collection (Stack's, 4/1964), lot 1603.
- C. **Proof.** Major Lenox R. Lohr (Stack's, 10/1956), lot 967, sold to “Dr. L.” per Walter Breen.
- D. **Proof.** Brock; Morgan; ANS, reported by Walter Breen, may be the same as B above.
- E. **Proof.** Forty-Fifth Catalog (New Netherlands, 4/1955), lot 763; Q. David Bowers.
- F. **PR65 NGC.** The Riordan/Suwannee coin handled by Jeff Garrett in 2005 as part of a complete set of Type Three gold dollars in proof.
- G. **Very Choice Brilliant Proof.** Public Auction Sale (Stack's, 11/1994), lot 1162.

From The Ives Devos Collection. NGC ID# 25DX, PCGS# 97606, CoinPlex ID# G\$P1856SL5DC

PR65 Cameo 1857 Gold Dollar
Very Rare Pre-1858 Proof Gold

5782 1857 PR65 Cameo NGC. Prior to 1858, the U.S. Mint had no organized program for selling proof sets to collectors, and so production of proofs was small and erratic. This held true especially for gold coins; Garrett and Guth state of the proof 1857 gold dollar: "The mintage is unknown, but it may be somewhere in the 15 to 18 coin range. There are probably about 10 coins still remaining." This Gem Cameo specimen is a glittering prize with intricately detailed and generously frosted devices. Small lint marks at the lower obverse and reverse, among other places, will aid in future pedigree identification. Census: 3 in 65 Cameo, 1 finer (11/12).

Ex: The Frog Run Farm Collection (ANR, 11-12/2004), lot 1663.

From The Ives Devos Collection. PCGS# 87607, CoinPlex ID# G\$P1857CA

1859 Gold Dollar, PR66 Ultra Cameo
Tied for Finest Known, Ex: Simpson

5783 1859 PR66 Ultra Cameo NGC. Ex: Simpson. Reverse Die One. The 1859 is the first year for which a mintage figure was reported for proofs, and just 80 examples were issued in that format. Not surprisingly, this issue is seldom encountered, and NGC and PCGS combined report just 28 examples in all grades, a figure which would include pieces submitted multiple times. Ultra or Deep Cameo specimens are extremely challenging, and the present coin is tied with one other as the finest graded by NGC (11/12).

This piece is sharply struck save for a touch of softness on the DO in DOLLAR. The watery fields show excellent cameo contrast against the frosted devices. Pleasing bright yellow-gold color covers both sides. Slight granularity in the fields gives this piece a lovely orange-peel appearance.

Ex: Bob Simpson Collection / ANA Signature (Heritage, 8/2010), lot 3395, where it realized \$32,200.

From The Ives Devos Collection. NGC ID# 2500, PCGS# 97609, CoinPlex ID# G\$P1859DC

1860 PR66 Cameo Gold Dollar
Seldom Seen Date as a Proof

5784 1860 PR66 Cameo NGC. According to Mint records, 154 proof gold dollars were produced at Philadelphia in 1860, although it is believed that fewer than 50 pieces have survived into the 21st century. This specimen is certainly among the finest of those extant. The mirrored fields are colored an even orange-gold, but surrounding the frosted head of Liberty is a thin line of light yellow-gold, highlighting the cameo effect. One small area of brilliance (actually die polishing) occurs just below the ear of the frosted head, giving the appearance of a sparkling gem earring. The reverse is equally attractive from a color standpoint, but light porosity shows at the O in DOLLAR, and a minute, curved lintmark above the A. These minor imperfections are only mentioned for future identification purposes. Sure to be a popular item in the sale. Census: 2 in 66 Cameo, 0 finer (11/12).

Ex: *FUN Signature (Heritage, 1/2007), lot 3367.*

From *The Ives Devos Collection*. NGC ID# 250000, PCGS# 87610, CoinPlex ID# G\$P1860CA

Glittering 1861 Gold Dollar, PR66 Cameo

5785 1861 PR66 Cameo NGC. A total of 349 proof coins are recorded for the 1861 gold dollar production, an enormous quantity in context of the time and series. The 1862 had a nominal — yet typical — proof emission of 35 pieces. Garrett and Guth comment that both proof dollars are about equally rare, concluding that the vast majority of 1861s must have been subsequently melted. Could there have been an anticipated demand for first-year Civil War gold dollar proofs that failed to materialize? Breen's *Proof Encyclopedia* gives the mintage at 349, but other than noting “very rare, less than 20 now being traced, including the [Smithsonian] and ANS coins” provides no other clues. The combined NGC/PCGS population data bear out the disparity between the recorded mintage and present-day rarity: There are only 40 or so examples certified by the two services.

The fields are deeply mirrored on this Premium Gem, with bright yellow-gold surfaces, no significant contact marks, and splendid contrast with the well-frosted devices. A decisive strike imparts exquisite definition to the design features, enhancing even more the coin's outstanding eye appeal. Census: 6 in 66 Cameo, 4 finer (11/12).

Ex: *Central States Signature (Heritage, 4-5/2009), lot 2664.*

From *The Ives Devos Collection*. NGC ID# 250000, PCGS# 87611, CoinPlex ID# G\$P1861CA

1862 One Dollar Gold Appealing Gem Proof

5786 1862 PR65 PCGS. Ex: H.W. Bass, Jr. Only 35 proof examples were reportedly struck of the 1862 gold dollar, although perhaps only two dozen or so survive today. PCGS gives that estimate, adding that only about five are in the Gem proof grade or finer. We have noted before how *minuscule* the date digits are on 1862-dated gold coinage from the gold dollar through half eagle (and much Civil War-dated coinage generally), although we have no idea if it relates in any larger way or not; we certainly do believe, however, that the varying sizes of the date digits on proof coinage are an understudied area of American numismatics. The date is tiny, but nonetheless boldly impressed into the die, and low in the field below the denomination. Breen notes the die polish that proofs display in the foremost head-dress feather and some of the "hollow" leaves on the reverse. Much cameo contrast is present on the deep reddish-gold surfaces of this piece and a slight turn reveals the desired "gold on black" effect, but no Cameo designation was given (perhaps indicative of when this piece was certified). A couple of minor ticks in the reverse right field, about level with the bottom serifs of the 1, provides a pedigree marker. The obverse appears virtually pristine, and both sides display moderate orange-peel texture. An extremely appealing coin. Population: 6 in 65, 2 finer (11/12).

Ex: Doug Weaver, June 9, 1973; Bass III (*Bowers and Merena*, 5/2000), lot 37.

From The Dr. James Olsen Collection. PCGS# 7612, NGC ID# 2500000, CoinPlex ID# G\$P1862

Deep Cameo Gem Proof 1862 Gold Dollar One of 35 Specimens Coined

5787 1862 PR65 Deep Cameo PCGS. Even in the first full year of the Civil War, the U.S. Mint's nascent proof-set sales system continued. Though records indicate that only 35 proof gold dollars were struck, it is clear that a certain numismatic elite kept up its coin-collecting activities. (One wonders how many of those purchasers had been among the picnickers at the First Battle of Bull Run/Manassas the year before.) In any case, the 1862 proof gold dollar is rare regardless of condition, to say nothing of a Deep Cameo Gem specimen such as this orange-gold beauty. Saturated mirrors with just a touch of clouding surround richly frosted and intricately detailed devices. Population: 2 in 65 Deep Cameo, 1 finer (11/12).

From The Ives Devos Collection. PCGS# 97612, NGC ID# 2500000, CoinPlex ID# G\$P1862DC

Premium Gem Proof 1863 Gold Dollar Contrasted Coin in Green Label Holder

5788 1863 PR66 PCGS. CAC. An extremely small mintage of just 50 proof gold dollars was accomplished in 1863, and likely some of those coins went unsold and were melted after the close of the year. Probably no more than 35 examples were actually distributed, and only 18-24 specimens remain extant today.

The coin offered here is the single finest certified at either of the leading grading services. Although not designated as a Cameo, this coin shows definite elements of contrast between the sharply detailed design elements and the brightly mirrored fields. No mentionable distractions are evident, and eye appeal is extraordinary. Housed in a green label holder. Population: 1 in 66, 0 finer (11/12).

From *The Ives Devos Collection*. PCGS# 7613, NGC ID# 25000000, CoinPlex ID# G\$P1863

Gorgeous 1864 Gold Dollar PR65 ★ Cameo NGC

5789 1864 PR65 ★ Cameo NGC. The 1864 proof gold dollar, showing a mintage of 50 coins, is an incredible rarity. David Bowers, writing in *A Guide Book of Gold Dollars*, says likely no more than 25 or so pieces were distributed from the original mint figure. He also estimates the extant population to be 12 to 15 examples, a figure (allowing for resubmissions) consistent with the combined certified population.

The deeply mirrored fields yield stunning contrast with the frosty motifs. Additionally, a solid strike delivers bold delineation to all of the design elements, heightening this variance even more. Peach-gold surfaces are impeccably preserved. A minor graze on Liberty's cheek and a couple of inoffensive field marks are all that stand in the way of an even higher numerical grade.

Ex: *Central States Signature* (Heritage, 4-5/2009), lot 2665.

From *The Ives Devos Collection*. NGC ID# 250000000, PCGS# 87614, CoinPlex ID# G\$P1864CA

Charming PR65 Cameo 1865 Gold Dollar Original Mintage 25 Pieces

5790 1865 PR65 Cameo NGC. The reported mintage of “original” Proof 1865 gold dollars is 25 pieces. The original is distinguished from the restrike, which is thought to have been coined in the middle 1870s, by a low and level date (the date on the restrike slopes up to the right). Only about 13 originals are thought to exist. This Cameo Gem representative displays sharply struck devices that contrast sharply with the reflective fields. Bright apricot-gold surfaces are well-preserved with a few splashes of deeper orange-gold. Numerous die striations (as struck) are noted on the reverse. Census: 8 in 65 Cameo, 2 finer (11/12).

Ex: Central States Signature (Heritage, 4-5/2009), lot 2665.

From The Ives Devos Collection. NGC ID# 25000000000, PCGS# 87615, CoinPlex ID# G\$P1865CA

Intensely Contrasted 1866 Gold Dollar PR67 Ultra Cameo

5791 1866 PR67 Ultra Cameo NGC. Pale yellow-gold color with elements of richer orange that are most prominent around the well-frosted central devices. The fields on both sides show a touch of the delicate “orange-peel” texture that is a hallmark of true proofs, yet the intense mirrors leave no doubt as to this coin’s Ultra Cameo status. Magnificently preserved and all-around gorgeous, this specimen of the proof 1866 gold dollar, one of only 20 in the recorded mintage, is a coin to be pursued when it is on offer and cherished once won. Census: 4 in 67 Ultra Cameo, 0 finer (11/12).

From The Ives Devos Collection. NGC ID# 25000000000, PCGS# 97616, CoinPlex ID# G\$P1866DC

Cameo PR66 1867 Gold Dollar Reverse Approaches Ultra Cameo

5792 1867 PR66 Cameo NGC. "Mintages have little correlation with reality." While this sentence is applied more commonly to late-date double eagles or Morgan dollars, it is just as true for many issues of 19th century proof gold. While Mint records list 50 proofs struck for the 1867 gold dollar, an uptick from the 25 and 30 pieces listed for 1865 and 1866, the proof 1867 gold dollar is far scarcer than either date in practice. This pale but well-contrasted yellow-gold specimen has great detail. The reverse, which approaches Ultra Cameo quality, is a true delight. Census: 4 in 66 Cameo, 0 finer (11/12).

From The Ives Devos Collection. NGC ID# 25EA, PCGS# 87617, CoinPlex ID# G\$P1867CA

Finest Known 1868 Gold Dollar Profoundly Contrasted PR66+ Ultra Cameo

5793 1868 PR66+ Ultra Cameo NGC. The mintage figures for proof gold dollars during and immediately after the Civil War are tiny by any measure, ranging from 25 to 50 proofs per year and 25 for the 1868. NGC and PCGS combined have seen only 17 certifications, including non-Cameo, Cameo, and Ultra/Deep Cameo coins, and it is a sure bet that a number of those are resubmissions. The number of true unimpaired proofs could be as few as a dozen, although some deeply mirrored business strikes have passed incorrectly as proofs on occasion, for example the Eliasberg coin. Garrett and Guth note in their gold reference that all true proofs are struck with a medal turn rather than coin turn, so that the two sides align at top and bottom. That characteristic appears on this no-questions example, with further confirmation coming from the slight orange-peel effect appearing in the fields. This piece is sharply detailed throughout. Brightly reflective orange-gold surfaces display strong gold-on-black cameo contrast. This is the sole finest at NGC, finer than any at PCGS, and the only certified Ultra Cameo (11/12).

From The Ives Devos Collection. NGC ID# 25EB, PCGS# 97618, CoinPlex ID# G\$P1868DC

1869 PR64 Cameo Gold Dollar
Perhaps 15 Pieces Survive

1871 Gold Dollar, PR65 Cameo
Rarely Encountered Proof Issue

5794 1869 PR64 Cameo PCGS. CAC. Due to the considerable difference in size, collectors often fail to realize that the obverse design of the Type Three gold dollar is the same as that of the three dollar gold piece. Dr. Robert Loewinger's interesting *Proof Gold Coinage of the United States* mentions a curious feature little noticed on proof gold dollars made during the years 1862-73 and 1875-76: Lapping typically produces a tiny mirrored area within the middle of the first feather in the headdress, with a smaller area between the tops of feathers 4 and 5 and an even smaller area between feathers 5 and 6. The proof mintage of the 1869 gold dollar was a minuscule 25 pieces, and today perhaps 15 pieces survive. All are very rare. Garrett and Guth note that most pieces, such as the present example, are "Choice at best," with "raised reverse die scratches that, at first, appeared to be deep hairlines." This is a bright, deeply mirrored coin that has significant mint luster over the devices, producing the desirable cameo effect. By way of identification, a razor-thin mark angles down from the bust of Liberty on the obverse; on the reverse a curved lint mark is below the 9 in the date. Population: 1 in 64 Cameo, 1 finer (11/12).

Ex: Long Beach Signature (Heritage, 2/2009), lot 2395.

From The Ives Devos Collection. PCGS# 87619, NGC ID# 25EC, CoinPlex ID# G\$P1869CA

5795 1871 PR65 Cameo PCGS Secure. CAC. In his *Guide Book of Gold Dollars*, Q. David Bowers suggests that perhaps nine to 11 proof 1871 gold dollars are still extant, commenting: "The 1871 is a landmark rarity — a focal point of Proof gold dollars of the era — sharing the limelight with the Proof 1874. ... Based upon the rarity today, it is likely that no more than 20 were sold."

The figure of 20 pieces sold is even smaller than the official mintage of 30 specimens, and a further indication of this date's inherent rarity. The dedicated proof gold collector would do well to consider this gleaming Gem Cameo specimen, moderately contrasted with charming lemon-yellow mirrors under light patina. Great all-around eye appeal. Population: 1 in 65 Cameo, 0 finer (11/12).

From The Ives Devos Collection. PCGS# 87621, NGC ID# 25EE, CoinPlex ID# G\$P1871CA

1872 Ultra Cameo Gold Dollar, PR66 Pronounced White-on-Gold Contrast

5796 1872 PR66 Ultra Cameo NGC. Many of the 30 gold dollar proofs struck in 1872 have apparently survived to the present day, judging from perusal of NGC/PCGS population data. However, few can match the beauty of this Premium Gem Ultra Cameo. It is one of seven Ultra/Deep Cameos seen by the two services (none have been certified by PCGS), some of which are likely resubmitted coins. Both sides present a stunning gold-on-black appearance, and each exhibits crisply struck, frosted design elements. The impeccably preserved yellow-gold surfaces are just a faint handling mark or two from an even higher grade. This piece possesses outstanding technical quality and aesthetic appeal.

Ex: Central States Signature (Heritage, 4-5/2009), lot 3593.

From The Ives Devos Collection. NGC ID# 25EF, PCGS# 97622, CoinPlex ID# G\$P1872DC

1873 Gem Proof Gold Dollar Only 25 Proofs Struck

5797 1873 Closed 3 PR65 NGC. Although many business-strike examples were struck using Open 3 dies, all proof 1873 gold dollars were produced with the earlier Closed 3 punch. The reported mintage was only 25 pieces, and no more than 9-12 examples are extant today in all grades, making this issue one of the greatest rarities of the series. The proof mintage suffered from low production values in 1873, and poorly finished dies, spaced too far apart, gave many examples a granular appearance, with significant loss of detail. This well-detailed Gem shows these effects to a small degree, but it remains one of the finest surviving examples. The brightly reflective fields are a pleasing yellow-gold with green highlights and only minor signs of contact. Census: 2 in 65, 0 finer (11/12).

From The Ives Devos Collection. PCGS# 7623, CoinPlex ID# G\$P1873CL3

1874 Gold Dollar, Gem Proof
Only 20 Proofs Struck
The Only PCGS PR65

5798 1874 PR65 PCGS. The incredibly low proof production of this issue is only 20 coins, and 139 years later the 1874 gold dollar proof is rare in all grades. A quick check of our Permanent Auction Archives underscores just how elusive the issue truly is. In the past 17 years we have only offered one proof 1874 gold dollar, this same piece in 2009. Indeed, this coin may be the only other Gem offered at public auction since a Bowers and Merena auction in May 2000. Writing in 2006, Garrett and Guth noted that “only four coins have been offered at public auction in the last decade. Two of those auctioned off were in the fabulous Harry W. Bass Jr. Collection.”

The present piece is a golden Gem with bright yellow-gold fields and deeper orange devices, presenting an appealing contrast. Struck on a striated planchet, the surfaces are nearly flawless and, in fact, appear even finer than PR65. This piece is the only Gem specimen of the issue certified at PCGS, and there are none finer (11/12). There are three PR64 pieces, including one PR64 Cameo and two non-Cameo coins.

Ex: Long Beach Signature (Heritage, 2/2009), lot 2396.

From The Ives Devos Collection. PCGS# 7624, NGC ID# 25EH, Coin-Plex ID# G\$P1874

Extremely Rare 1875 Gold Dollar PR66 Deep Cameo, Tied for Finest at PCGS

5799 1875 PR66 Deep Cameo PCGS. CAC. Save for the double eagle, even the circulation-strike gold coinage of 1875 consists of celebrated rarities, and the three dollar gold saw only proof coins minted. The 1875 eagle had the lowest recorded business-strike mintage of any U.S. gold coin, at 100 pieces. Both the gold dollar and quarter eagle were struck to the extent of a meager 400 business strikes each.

The proof gold coins dated 1875 are rarer yet, with only 20 pieces of each denomination reportedly coined, plus later restrikes of the three dollar gold. As with other gold (particularly) coins where the monetary incentive for a one-point bump in grade can translate into many thousands of dollars of profit, the certified populations seem hopelessly inflated, likely double the actual amount surviving. NGC and PCGS combined account for 30 unimpaired (PR60 and above) submissions in all contrast levels, non-Cameo, Cameo, and Deep/Ultra Cameo — not *separate coins* — but we believe that the true number of survivors is no more than 16 different pieces at the outside.

The present Premium Gem Deep Cameo example is certified by PCGS and certainly among the few finest survivors of the issue, one of only two in the grade at that service with none finer (11/12). Copious luster abounds from the pristine orange-gold surfaces, which demonstrate deep field-device contrast and no overt marks. A couple of tiny field grazes may require a loupe to locate. An extremely rare coin, and conditionally even more so. This is the numerically finest Deep Cameo PCGS example we have ever offered since we began our Permanent Auction Archives, although a PR66 ★ Ultra Cameo NGC piece that we handled four years ago in our Dallas Signature (Heritage, 10/2008), lot 1896, realized \$40,250.

From The Ives Devos Collection. PCGS# 97625, NGC ID# 25EJ, CoinPlex ID# G\$P1875DC

1876 Gold Dollar, PR65 Ultra Cameo Centennial Memento

5800 1876 PR65 Ultra Cameo NGC. In 1876 officials from the Centennial Exposition in Philadelphia invited Mint officials to set up a coinage display, but they declined. Nonetheless, the 1876 gold proof coins saw a marked increase to 45 pieces of each denomination from the 20-coin proof gold mintages that bookend it on either side. The greater production was likely an anticipation of higher demand due to the Centennial. While some examples were likely melted as unsold later, the significance of the date also likely meant that the remaining specimens were likelier to be preserved. Somewhere around 25 to 35 pieces appear to survive today. This piece boasts optimal contrast over orange-gold surfaces that reveal a bold strike and no singular marks. A loupe reveals a few field hairlines of little account. Census: 2 in 65 Ultra Cameo, 4 finer (11/12). NGC ID# 25EK, PCGS# 97626, CoinPlex ID# G\$P1876DC

1876 Gold Dollar, PR66 ★ Ultra Cameo Finest Known of This Rare Date

5801 1876 PR66 ★ Ultra Cameo NGC. Though its mintage was a mere 45 proofs, the 1876 gold dollar proofs mark a dramatic increase in the availability of the denomination in proof format, though any example remains an absolute rarity, much less a beautifully preserved specimen such as the present coin. Pale yellow-gold surfaces are boldly mirrored with small pools of orange-peel texture, while the fully detailed devices display absolute, blossoming frost that made both the Ultra Cameo and Star designations unavoidable conclusions. Census: 1 in 66 Ultra Cameo, 0 finer (11/12). *From The Ives Devos Collection.* NGC ID# 25EK, PCGS# 97626, CoinPlex ID# G\$P1876DC

Underrated 1877 Gold Dollar
PR65 Cameo

5802 1877 PR65 Cameo NGC. The gold dollar proofs of 1877 were struck in the tiny recorded amount of 20 pieces, and we would be surprised if 15 separate coins survive today — possibly no more than 13. This is despite the 22 submissions at NGC and PCGS combined — more than the original mintage, a figure obviously riddled with duplications. Garrett and Guth write that “the date is very rare in any grade of true Proof,” and the present PR65 Cameo is the only such at NGC, although that service shows three in PR66 Cameo along with two in PR65 Ultra Cameo (one with a Star) and three in PR66 Ultra Cameo (one also with a Star). Again, these grading events are highly suspect as being *all different coins*.

This Gem proof shows blatant contrast over orange-gold surfaces that show few signs of contact, although the CA in AMERICA are softly struck, apparently as made at the Mint. The strike otherwise is bold, and this piece boasts generous eye appeal. As one of the nicest survivors of this extremely underrated issue, this piece should see spirited bidding at auction.

From The Dr. James Olsen Collection. NGC ID# 25EL, PCGS# 87627, CoinPlex ID# G\$P1877CA

1877 Gold Dollar, PR66 ★ Ultra Cameo
Series Key, Only 20 Proofs Struck

5803 1877 PR66 ★ Ultra Cameo NGC. Proof gold dollars of 1877, having a minuscule mintage of 20 pieces, are extremely rare. A mere 11 to 14 examples are extant. To date (11/12), NGC and PCGS have graded a total of 21 specimens, a number of which are obviously resubmitted or crossover coins. “Regular” proofs make up five of the total, the finest PR65. Cameo examples account for 11 of the certified coins, with PR66 being the finest, and Deep/Ultra Cameos five coins. Of the latter, three are PR66 with none graded higher. NGC has assigned the Star designation to just one of the PR66 Ultra Cameos, the coin offered in the present lot. Both sides show bright yellow-gold, and the light striations in the field produce a strong cameo effect. For those making notes about die states, we notice die crumbling on UN. The only noticeable mark is a shallow pinscratch from the bottom of the I in UNITED.

From The Ives Devos Collection. PCGS# 97627, CoinPlex ID# G\$P1877DC

1878 Gold Dollar, PR64 Cameo
Ex: Trompeter Collection

5804 1878 PR64 Cameo PCGS. Ex: Trompeter Collection. Only 20 proof 1878 gold dollars were minted on February 9, and auction records are few. Possibly up to a dozen survive, although the total population may be as few as eight or nine coins. The Ed Trompeter Collection was a remarkable assemblage of proof gold coins from gold dollars to twenty dollar gold pieces. Trompeter was fond of saying that "real men collect proof gold by date." Although slightly hairlined, this gleaming Choice Cameo proof has a natural light haze of its deeply mirrored orange-gold fields and frosty, highly lustrous devices. PCGS has graded nine 1878 gold dollars in two numeric levels, and with three designations, including two in PR64 Cameo and two in PR65 Cameo. The others include one PR64, two PR65, and two PR65 Deep Cameo (11/12). We suspect some resubmissions are included in those figures.

Ex: N.M. Kaufman Collection (RARCOA, 8/1978), lot 647; Ed Trompeter (Superior, 2/1992), lot 24.

From The Ives Devos Collection. PCGS# 87628, NGC ID# 25EN, CoinPlex ID# G\$P1878CA

1878 Gold Dollar, Deep Cameo PR65
Only 20 Pieces Struck

5805 1878 PR65 Deep Cameo PCGS. Although the final six dates of gold dollars have proof mintages of more than 1,000 pieces, only 20 proof gold dollars were issued in 1878, along with 3,000 business strikes. As a result, the proof 1878 is rare today, and PCGS has certified only nine examples in all grades. Among those, none are certified in grades above PR65, and only one other specimen is certified by PCGS as Deep Cameo (11/12). This is a crisply struck Gem with sun-gold centers and cherry-red margins. Void of post-strike detractors, and the sole imperfections are a tiny lint mark on the obverse field near the profile and minor incompleteness of strike on portions of the central reverse field. Minor repunching is present on the base of the 1 and the loops of the first 8 in the date.

From The Ives Devos Collection. PCGS# 97628, NGC ID# 25EM, CoinPlex ID# G\$P1878DC

1879 Gold Dollar, PR64 Deep Cameo
Stunning Field-Motif Contrast

5806 1879 PR64 Deep Cameo PCGS. CAC. Slight variations exist in the estimated number of 1879 gold dollar proofs that have survived to the present day from the original mintage of 30 pieces. The PCGS Population Report presents a range of 15 to 20 known, Walter Breen in his *Proof Encyclopedia* says less than 18 survive, and David Bowers in his *Gold Dollars* book gives the estimated population as 14 to 17. To date, PCGS and NGC have graded a total of 34 specimens, some of which are obviously resubmitted or crossover coins.

The yellow-gold surfaces of this near-Gem Deep Cameo display a stunning gold-on-black appearance when the coin is viewed from directly overhead. Crisp definition is apparent on the design elements, with only the BER of LIBERTY showing the usual softness. PCGS# 97629, NGC ID# 25EN, CoinPlex ID# G\$P1879DC

1879 Gold Dollar, Deep Cameo PR66
Remarkable Field-Device Contrast
Only 30 Proofs Struck

5807 1879 PR66 Deep Cameo PCGS. CAC. Without exception, every regular-issue proof gold coin dated 1879 is an important rarity. Only 30 proofs of each denomination were coined, and few survive today. Auction records suggest that the proof gold dollars are not as rare as the larger-denomination pieces, although many deceptive first-strike coins exist, some of which have been called proofs in the past. Both proofs and business strikes were produced from the same die pair, creating further confusion.

However, there is no doubt about the proof status of this beauty. It displays amazingly profound cameo contrast, with brilliant yellow-gold luster on the devices and deeply mirrored fields. This piece is likely the second-finest known, behind a PR66 Deep Cameo that we handled in 2003, which now is apparently in a PR66+ Deep Cameo PCGS slab. There are no finer examples in any designation.

There are about a dozen examples known, possibly as many as 15, including two in the Smithsonian Institution and one in the Western Heritage Museum, ex: Byron Reed. Others include the Garrett, Eliasberg, Bass, Carter, and Trompeter specimens, all different coins from this piece.

Ex: *FUN Signature* (Heritage, 1/2007), lot 3768.

From *The Ives Devos Collection*. PCGS# 97629, NGC ID# 25EN, CoinPlex ID# G\$P1879DC

1881 Deep Cameo Proof Gold Dollar Rarely Seen With Contrast

5808 1881 PR66 Deep Cameo PCGS. CAC. From 1862 until 1880, proof gold dollar production languished between 20 and 50 pieces, but in 1881, the mintage jumped to 87 specimens. This increase was not enough, however, to keep the 1881 from being scarce in an absolute sense and a rarity with the Deep Cameo effect seen on this Premium Gem. Each side is profoundly mirrored with great black-and-gold contrast. The fields and the exquisitely frosted devices are equally well-preserved. A tiny unfinished area between the D of DOLLAR and the wreath is a diagnostic for proofs, according to David Akers. Population: 5 in 66 Deep Cameo, 0 finer (11/12).

Ex: Los Angeles Signature (Heritage, 8/2009), lot 1201.

From The Ives Devos Collection. PCGS# 97631, NGC ID# 25ER, CoinPlex ID# G\$P1881DC

Superb Cameo Gem 1883 Gold Dollar Among the Finest Known

5809 1883 PR67 Cameo NGC. The mintage for proof gold dollars from this year was 207 pieces, but examples are not significantly more available than those from the previous year, when only 125 proofs were coined. While no hard and fast die characteristics are known for proofs versus first-strike coins intended for circulation, this piece shows the orange-peel surface always seen on proofs. Each side is wonderfully preserved and there are no reportable contact marks, nor would one expect to see any on a Superb Gem. The devices are noticeably frosted and provide strong contrast against the deeply reflective fields. One of the finest examples known of this late-date gold dollar. Census: 5 in 67 Cameo, 1 finer (11/12).

From The Ives Devos Collection. NGC ID# 25ET, PCGS# 87633, CoinPlex ID# G\$P1883CA

1884 Gold Dollar, PR67
Moderately Contrasted

5810 1884 PR67 PCGS. CAC. Semicontrasted on the obverse, not uncommon for this high-mintage (1,006 pieces) later proof gold dollar issue, though the pale yellow-gold reverse displays full frost-and-mirrors. The detail and preservation are both magnificent, with only a small fault appearing off the base of the U in UNITED. While the issues of the 1880s are popular entry-points for proof gold collectors, an elite Superb Gem such as the present gold dollar is in the province of the connoisseur, whether established or emerging. PCGS has graded five non-Cameo examples as PR67 and none numerically finer (11/12).

From The Ives Devos Collection. PCGS# 7634, NGC ID# 25EU, CoinPlex ID# G\$P1884

1885 Gold Dollar, PR68 Ultra Cameo
Finest Known of This Higher-Mintage Date

5811 1885 PR68 Ultra Cameo NGC. Starting in 1884, mintages of proof gold dollars soared from the low three figures to the low four figures, and the six “thousand-coin” dates from 1884 to 1889 are well-established as the most common classic proof gold issues. Of the six years, the 1885 attracted special attention from Garrett and Guth, who wrote in their 2006 edition of the *Encyclopedia of U.S. Gold Coins*, “The 1885 issue is one of the most readily available gold dollars to locate in Proof. More representatives of this date have been offered at auction than any other.”

Yet the authors also offer a caution: “A high mintage figure, and the fact that many business-strike coins are exceedingly deceptive, makes the date seem more common than it is. True Proofs can be very difficult to determine, and many top professionals cannot agree on some coins.” Every once in a while, though, a coin comes along that leaves no doubt.

Every facet of this specimen fairly screams “proof.” The intensely reflective yellow-gold mirrors that put even the deepest Prooflikes to shame, the thick frost across exquisitely textured devices that show the finest details on the bow of the wreath, the resultant contrast, and the partial wire rim on the reverse — all are marvelous. If the proof 1885 gold dollar is considered a type coin, then this is its ultimate exemplar. As befits such a singular piece. Census: 1 in 68 Ultra Cameo, 0 finer (11/12).

From The Ives Devos Collection. NGC ID# 25EV, PCGS# 97635, CoinPlex ID# G\$P1885DC

1886 Gold Dollar, PR66 Cameo Only 10% Survive From the Original Mintage

1889 Gold Dollar, PR66 Cameo Strongly Contrasted, Surprisingly Scarce

5812 1886 PR66 Cameo PCGS. CAC. While the official mintage of proof gold dollars in 1886 was 1,016 specimens, probably only 100 to 140 pieces have survived. Bowers succinctly writes: "Proofs are much less available than the generous mintage figure suggests." Condition rarity is also in play with a coin so fine as this Premium Gem specimen, a bounteously mirrored lemon-yellow example with sharp and frosty devices jutting out from the fields. This well-preserved and gorgeous specimen is tied for numerically finest among four Cameo coins listed in the PCGS Population Report (11/12).

From The Ives Devos Collection. PCGS# 87636, NGC ID# 25EW, CoinPlex ID# G\$P1886CA

5813 1889 PR66 Cameo PCGS. The mintage for proof 1889 gold dollars was a record-breaking 1,779 pieces. However, far fewer are known today than the mintage would indicate. Garrett-Guth put the number of survivors on par with 1888, a date with a much lower mintage of only 1,079 pieces. The few high-grade proofs of this date that do exist are often high-quality with a good percentage showing cameo contrast. This is just such a deeply mirrored, strongly contrasted Cameo coin. The yellow-gold surfaces are essentially free from post-striking impairments. There are, however, a couple of Mint-made flaws; specifically, a shallow planchet flake on the obverse, a couple of minor lint marks, and alloy spots scattered across the obverse. A high-grade example of this surprisingly scarce, final-year issue. Population: 4 in 66 Cameo, 0 finer (11/12).

From The Ives Devos Collection. PCGS# 87639, NGC ID# 25EZ, CoinPlex ID# G\$P1889CA

EARLY QUARTER EAGLES

1797 Quarter Eagle, BD-1, AU53
Rare Early Gold Issue
Only Four Finer Coins at PCGS

5814 1797 AU53 PCGS. BD-1, R.6. Bass-Dannreuther Die State b/a. Following the initial production of 66 quarter eagles that were delivered on September 21, 1796, mintages of this unwanted denomination remained small for many years. Less than 3,000 quarter eagles were coined during the first three years of the denomination, including 432 coins delivered on January 14, 1797, and a mere 427 coins delivered later in 1797, according to Mint records. Today, we believe that the January deliver were 1796 With Stars coins, and the later deliveries were dated 1797.

Only a couple dozen of those 1797 quarter eagles exist today, according to John Dannreuther, who estimates that 20 to 25 pieces are known. Those coins rarely appear in the marketplace, with just seven different specimens appearing in our auctions since the January 1993 beginning of our Permanent Auction Archives.

It is likely that the obverse die cracked during the hardening process before any coins were struck, Mint employees having no opportunity to create a new die. All known 1797 quarter eagles have a prominent die crack at the right side of the obverse, from the Y in LIBERTY to star 8 and down through the field to stars 12 and 13, with one specimen showing a massive cud obliterating the stars to the right.

The reverse die was used to strike the JR-1 1798/7 dimes as well as this quarter eagle variety, apparently after the quarter eagles, as none are known with the later die states that the dimes show.

The present example shows exuberant surfaces that show considerable luster remaining for the grade, with yellow-gold coloration. A few small ticks and abrasions appear scattered about under a loupe, none worthy of note. The strike is a trifle weak in the centers of each side, but all these footnotes are minor compared to the excellent eye appeal of this very rare coin. Population: 4 in 53, 4 finer (12/12). PCGS# 7648, NGC ID# 25F4, CoinPlex ID# G2E1797

1798 Quarter Eagle, Semireflective MS62 Wide Date, Five Berries, BD-2, R.5

5815 1798 MS62 NGC. Wide Date, Five Berries, BD-2, R.5. Die State a/a. The 1798 quarter eagles were struck in the reported amount of a skimpy 1,094 coins, and they break down into two monogamous die pairings, i.e., each obverse and reverse die was used together, once, to create the two varieties known, with no crosslinked dies. The BD-1 is the Close Date, Four Berries, ranked High R.5 by Bass-Dannreuther, while the BD-2 is the Wide Date, Five Berries, ranked "only" R.5, or merely "rare." Both varieties in the scheme of things are rare, although the BD-1 is a bit more so. As Bass-Dannreuther rightly point out, both varieties would be expectedly rare, given the minuscule mintage. Bass-Dannreuther estimate that 45 to 55 examples survive of the BD-2, compared to 25 to 30 survivors of the BD-1. This would equate to 70-85 survivors in all, or a survival rate of 6%-8% (assuming that the 1,094 coins were all dated 1798 and that no other 1798-dated coins were struck earlier or later).

Such mathematical games are perilous to play when early gold and the U.S. Mint are involved, as any serviceable die would do in a pinch. Still, it would not surprise us to discover that both varieties were rarer than Bass-Dannreuther estimate, possibly quite a bit.

This MS62 NGC-graded example of the BD-2 Wide Date appears to be in the prime (uncracked) state of the dies on each side, showing bright, semireflective fields with full mint luster remaining. Numerous small- to medium-sized abrasions appear over each side that help determine the grade. The strike is somewhat weak in the centers, and a furrow-shaped planchet depression runs from the bottom of L to the top of Liberty's cap. Strong die striations appear on the reverse, the product of heavy die polishing, but no planchet adjustment marks occur on either side.

This is only the third example of the Wide Date, Five Berries variety we have offered in this grade since we began our Permanent Auction Archives. An MS62 PCGS example in our FUN Signature (Heritage, 1/2011), lot 5019, brought \$115,000. Census: 3 in 62, 1 finer (12/12). NGC ID# 25F5, PCGS# 7649, CoinPlex ID# G2E1798

1804 BD-2 Quarter Eagle, AU58
14 Star Reverse

5816 1804 14 Star Reverse AU58 NGC. Breen-6119, BD-2, R.4. The 14 Stars reverse die was used for dimes and quarter eagles, and in the latter series it is the only easily located variety, although no early quarter eagle is readily available. The other variety, with 13 stars on the reverse, is a celebrated quarter eagle rarity. Lightly cleaned long ago, this satiny bright yellow near-Mint quarter eagle has faint horizontal adjustment marks near the obverse periphery, along with light hairlines and trivial handling marks. Blushes of lilac patina on the reverse add to its eye appeal. NGC ID# 25F8, PCGS# 7652, CoinPlex ID# G2E180414STREV

1806/4 Quarter Eagle,
Bright Yellow-Gold MS62
BD-1, Unusual 8x5 Star Arrangement
Among the Finest Known

5817 1806/4 8x5 Stars MS62 NGC. BD-1, High R.4. Bass-Dannreuther Die State b / b. In this die state die cracking is clearly seen across the tops of the letters in LIBERTY. The crack that connects the stars on the left side of the obverse is extremely faint; so faint we didn't pick it up when first looking at this coin. Only one die state is known for the reverse; unsurprising since only 1,136 pieces were struck. Both sides show evidence of heavy die lapping, evident from the prominent horizontal die striations in the fields on both obverse and reverse. The study of die states for this issue reveals an interesting and unexpected feature. John Dannreuther theorizes that a perfect obverse may not exist, or ever have existed. The reason is that the obverse partially cracked (apparently through LIBERTY first) in the overdating process. No perfect, uncracked obverses have been reported. Further examination of the dies reveals the reverse die was later paired with the single 1807 dime obverse die. While the reverse die here is unclashed, it repeatedly clashed when used for the later-date dime reverse; however, it never broke but was retired eventually when it was "bent."

In 1806 the mintage of quarter eagles totaled only 1,616 pieces. Two dies were used to strike this small number, and both are easily discernible from the other, making this year easily collectible by subtype. The first subtype is this star arrangement, 8x5, the second has the more traditional 7x6 arrangement.

The average grade found for the 8x5 star 1806/4 quarter eagle is AU51.3. That places this piece far above the average, and actually within the lower realm of the Condition Census. The heavily lapped fields are responsible for the bright, semireflectivity seen on each side. Heavy crisscrossing die adjustment marks are seen on the figure of Liberty. This was a common occurrence on early gold and silver coins as the Mint was especially careful to produce a coin of precise weight. Central details are softly defined on each side, which is expected for this denomination. There are numerous small abrasions scattered about, but the most obvious ones are seen in the left obverse field. Each side displays bright yellow-gold color. Census: 3 in 62, 3 finer (12/12). NGC ID# 25FA, PCGS# 7654, CoinPlex ID# G2E1806OVR4

1807 Quarter Eagle, BD-1, AU58
An Attractive Type Coin

5818 1807 AU58 NGC. BD-1, R.3. CAC. The sole dies for this scarce date. The 1807 concludes the Draped Bust, Stars type of quarter eagle. The estimated mintage is given as 6,812 pieces, of which 250 to 350 are thought to exist. NGC and PCGS combined have graded 243 coins, a number of which are likely resubmissions. Certified examples are spread across the grading continuum, but concentrated in the Very Fine to low-end Uncirculated grades.

The yellow-gold surfaces of this near-Mint State specimen are tinged with reddish-gold around the peripheries and retain a good amount of mint luster in the recessed areas. The design features are generally well-struck, though some of the shield lines and breast feathers reveal the usual softness. Both sides are devoid of mentionable contact marks, and adjustment marks are completely absent.

While the 1807 is the most “common” date of the Draped Bust, Stars type quarter eagle, early gold coins do not frequently come this nice. As such, this piece will serve as one of the highlights of a high-grade type collection. NGC ID# 25FC, PCGS# 7656, CoinPlex ID# G2E1807

VF Details 1808 Quarter Eagle, BD-1
Challenging Type Issue
Worthy Example

5819 1808 — Cleaning — PCGS Genuine. VF Details. BD-1, R.4. The quarter eagle was a neglected denomination through most of its early history, and two of the most challenging type coins fall under that umbrella: the 1796 No Stars quarter eagle and the 1808 Capped Bust to Left two and a half. Collectors may quibble over the 1796 No Stars as a separate type, but there is little “wiggle room” around the 1808 quarter eagle, which is the sole use of John Reich’s Draped Bust obverse on the denomination. While this moderately worn coin does have a degree of artificial brightness from a past cleaning, the butter-yellow surfaces largely have mellowed, and this is a “capstone” piece that many collectors would be proud to own. PCGS# 7660, NGC ID# 25FD, CoinPlex ID# G2E1808

CLASSIC QUARTER EAGLE

Magnificent MS64 1839-O Quarter Eagle
Classic Head, Obverse Mintmark

5820 1839-O MS64 PCGS. CAC. Breen-6152, Variety 27. Wide Fraction on a reverse also showing a die crack between the topmost leaf of the olive branch and the I of UNITED. While all Southern gold enjoys popularity, early dates from the 1830s that show the mintmark on the obverse make for easier display of their coins' distinctive qualities. This 1839-O quarter eagle, from the final year of the Classic Head design, has softly frosted yellow-to-orange luster and warm, inviting eye appeal. The strike is uneven on the margins and soft on the highest points of Liberty's hair, yet the luster is undisturbed. This Condition Census-worthy coin is housed in a green label holder. Population: 4 in 64, 0 finer (11/12). PCGS# 7701, NGC ID# 25G7, CoinPlex ID# G2E1839O

LIBERTY QUARTER EAGLES

1843-O Quarter Eagle, Small Date
Conditional Rarity Near-Gem

5821 1843-O Small Date, Crosslet 4 MS64 PCGS. Variety 2. High date, mintmark closer to branch than claws, lapped stars. The quarter eagles struck in New Orleans in 1843 were produced in an enormous amount for the time and denomination, more than 288,000 coins in two main types, Small Date (Crosslet 4) and Large Date (Plain 4). The 1843-O Small Date is far more abundant than the 1843-O Large Date, which is among the rarest O-mint Liberty quarter eagles. The 1843-O Small Date, however, is quite elusive in Mint State grades, particularly MS62 and higher. The present near-Gem corresponds to the lapped stars variety Winter mentions but the date is high rather than low, and the mintmark is repunched rather than strike-doubled; stars 6-10 become progressively weaker from lapping or die-polishing, with star 10 only partially showing one point. A series of small die lumps appears on Liberty's neck. This near-Gem offers thick mint frost over surfaces that are far better-preserved than normally seen for the issue. Pleasing orange-gold color and a decent strike complete the eye appeal. Population: 6 in 64, 0 finer (11/12). PCGS# 7731, NGC ID# 2874, CoinPlex ID# L2M1843O

1846-C Quarter Eagle, MS64 Ex: Bass, Finest Known Example

5822 1846-C MS64 PCGS. Variety 1. Sole dies for the year. This piece previously appeared in the 2001 Atlanta ANA Auction as lot 7610, with a couple of prior Heritage appearances. We described it then essentially as follows:

"Even though it successfully reopened after the July 28, 1844 fire, the Charlotte Mint managed to strike only 4,808 quarter eagles in 1846. This coin exhibits a typically strong strike with a remarkable amount of detail displayed on the hair, star radials, and feathers. The eagle's left (facing) leg, however, is slightly flat. The bright, yellow-gold surfaces carry abrasions that befit a Choice specimen, with only one worthy of singular mention, that being located on Liberty's cheek. Since the mint used heavily rusted dies to coin this issue, regions of granularity are evident around the date, within portions of the legends on the reverse, and around the upper obverse rim. A prized condition rarity from the Tar Heel state that belongs in a superior collection of Charlotte gold coinage."

No appreciation of this coin, however, is complete without its impressive pedigree dating back more than a century. It is presented below.

Ex: David Wilson Sale (S.H. Chapman, 3/1907); John H. Clapp, later Clapp Estate (1942); Louis E. Eliasberg, Sr.; U.S. Gold Coin Collection (Bowers and Merena, 10/1982), lot 137; Harry W. Bass, Jr.; Bass II (Bowers and Merena, 10/1999), lot 381; various intermediaries; Atlanta ANA (Heritage, 8/2001), lot 7610; Central States Signature (Heritage, 4/2012), lot 5216. PCGS# 7741, NGC ID# 25H2, CoinPlex ID# L2M1846C

PROOF LIBERTY QUARTER EAGLES

1862 Quarter Eagle, PR65, Ex: Trompeter Likely Rarer Than the Proof-Only 1863

5823 1862 PR65 PCGS. Ex: Trompeter. Quarter eagle proofs dated 1862 are seldom seen in any grade, much less in the Gem category of the present example, where it is the sole such certified at PCGS with none finer (11/12). Only two Gem proofs are reported at PCGS — the present Gem, and a second specimen in PR65 Cameo. There are none numerically finer at PCGS, and no Deep Cameos.

NGC shows three submissions in PR65 Cameo and one in PR66 Cameo, along with two PR65 Ultra Cameo and one PR66 Ultra Cameo. There are a total of 20 submissions of unimpaired (PR60 or above) proofs at both NGC and PCGS combined, including, almost certainly, resubmissions that inflate the populations. PCGS CoinFacts provides an estimate of only 16-17 survivors out of the original reported mintage of 35 coins, and Garrett and Guth surmise that “probably fewer than 15 coins” survive; whatever exact number of coins remains, it includes examples off the market — presumably forever — in the collections of the Smithsonian and the ANS.

Notwithstanding the number of survivors, the 1862 proof quarter eagle’s reputation has undoubtedly been overshadowed by the 1863 quarter eagle, which was a proof-only issue with no circulation strikes produced. Garrett and Guth estimate that 15 to 20 examples survive of the 1863 in all grades.

It thus appears that the 1862 quarter eagle is a bit rarer than the illustrious 1863 issue, considered a legendary rarity among U.S. coins. This piece, however, from the famed collection of proof gold assembled by Ed Trompeter, has added cachet that no other example can match. It also boasts superb aesthetic quality in its own right. The surfaces display deep orange-gold coloration, with much contrast between the fields and devices. The surfaces are fully struck throughout both sides, and to mention any of the tiny signs of contact would overemphasize their importance. A small, curving strikethrough running from the eagle’s right (facing) upper wing provides a pedigree marker. A coin with marvelous eye appeal and a remarkable provenance.

Ex: *Theodore Ullmer Collection* (Stack’s, 5/1974), lot 368; *Ed Trompeter Collection* (Superior, 2/1992), lot 42, where it brought \$23,100.

From *The Dr. James Olsen Collection*. PCGS# 7888, NGC ID# 287G, CoinPlex ID# L2P1862

1872 PR63+ Cameo Quarter Eagle One of Only 30 Proofs Struck

5824 1872 PR63+ Cameo NGC. As with all proof gold from this era, the mintage was exceptionally limited. In 1872, only 30 proof quarter eagles were produced, and it is estimated that today a mere 12 to 18 pieces are known in all grades. The PR63 and PR63 Cameo grade levels seem to be the highest grades one is likely to encounter. Just a small handful of coins are known finer. This is a lovely reddish-tinted orange-gold example. A few light hairlines are barely detectable and there are a few contact marks, the most obvious located in the left reverse field to the left of the eagle's body. Nicely and noticeably contrasted on each side. Census: 4 in 63 (2 in 63+) Cameo, 6 finer (11/12). NGC ID# 287T, PCGS# 87898, CoinPlex ID# L2P1872CA

1876 Two and a Half, PR65 Cameo The John Jay Pittman Example

5825 1876 PR65 Cameo NGC. Ex: Pittman. The recorded mintage of the 1876 proof quarter eagle — generous for such an issue from the 1870s — was 45 pieces, more than double the preceding and following years. While it is rare, it is generally more available than the other issues from this decade. The Centennial date made it popular in the past and continues to do so today. The 1876 quarter eagle is, however, doubly popular: Even the 1876 circulation strike quarter eagles were a low-mintage product, struck in the extent of only 4,176 pieces.

The 1876 quarter eagle proofs had a low mintage that made them rare virtually from the day they were issued. As with so many other gold proof issues, the population data appear riddled with duplications; in fact, the combined NGC and PCGS reports show 45 examples in all grades and levels of contrast — equal to the entire original mintage. The figure of 10 submissions in PR65 Cameo, the grade of the present coin, at NGC with none finer should also be taken with a grain of salt (11/12).

This piece was formerly offered as lot 1834 in the John Jay Pittman Collection (Akers, 5/1998), where it was described in part as:

"Proof, nearly in the Choice category. ... Very sharply struck with a square edge, deep mirror fields and brilliant medium yellow gold color. There are some light hairlines and trivial contact marks in the field in front of Liberty's face and some light hairlines above the eagle's head. There is a partial wire rim on the obverse. JJP acquired this Proof as part of a partial 1876 gold Proof set from B.A. Seaby of London, England, on 8/25/47. He paid \$500 for the set which consisted of the Gold Dollar, Quarter Eagle, Three Dollar Gold piece and the Half Eagle. At the time JJP made his purchase, it was the most money that he had ever spent on one item, although the item did consist of four individual coins."

With the impeccable Pittman provenance and compelling Gem proof surfaces, this coin should spur spirited bidding as one of the finest survivors of the issue. NGC ID# 287X, PCGS# 87902, CoinPlex ID# L2P1876CA

1877 Quarter Eagle, PR67 Ultra Cameo Rare in Proof or Business Strike Format

5826 1877 PR67 Ultra Cameo NGC. As one might surmise from the Superb Gem Ultra Cameo grade, this is an absolutely stunning coin, regardless of the date. But coupling the 1877 date with the incredibly high surface quality of this piece moves it into a whole new realm of desirability.

The 1877 gold pieces in proof format, one dollar through double eagle, were each struck in an amount recorded as 20 pieces per. While this is typical for the era of the late 1860s-early 1870s and quite low by any objective measure, the 1877 quarter eagle is also, in the words of Jeff Garrett and Ron Guth, “one of the rarest Proof quarter eagles from the 1870s,” with the authors estimating that only 10 to 12 survive. Further, the 1877 saw a low production of circulation strikes, a meager 1,632 pieces, making the date among the lowest-issue business-strike productions in the series — and doubly popular for that reason.

The current certified populations for the 1877 two and a half show four non-Cameo submissions at PCGS, the finest a single PR66, along with one in PR66 Deep Cameo. At NGC the data show six others, including one lightly circulated PR55 example, one PR61, two in PR67 Ultra Cameo and one in PR68 Ultra Cameo.

The present coin is clearly among the finest survivors, technically and aesthetically. The orange-gold, fully struck surfaces display exceptionally deep field-device contrast even when viewed straight-on, and it takes close examination to discern a faint contact mark on Liberty’s chin. Both sides show a moderate orange-peel effect, but there are simply no mentionable factors that detract from the extreme quality and eye appeal present. Census: 2 in 67 Ultra Cameo, 1 finer (11/12).

From The Dr. James Olsen Collection. NGC ID# 287Y, PCGS# 97903, CoinPlex ID# L2P1877DC

1905 Quarter Eagle, PR67 ★ Cameo
Only One Finer Cameo Coin at NGC

5827 1905 PR67 ★ Cameo NGC. The Mint favored an all-brilliant finish on proof coins after 1902. Only a small percentage of the 144 proof Liberty quarter eagles struck in 1905 have enough mint frost to produce noticeable cameo contrast, but this magnificent Superb Gem exhibits a startling black-on-gold flash when tilted in the light. Razor-sharp definition is present on all design elements and the deeply mirrored fields show no mentionable defects, even on close inspection. Tremendous eye appeal complements the high technical grade. Census: 3 in 67 Cameo, 1 in 67 ★ Cameo, 1 in 67+ Cameo, 1 finer in 68 Cameo (11/12). NGC ID# 288V, PCGS# 87931, CoinPlex ID# L2P1905CA

THREE DOLLAR GOLD PIECES

Choice AU 1854-D Three Dollar
Relatively Unmarked Yellow-Orange Example
High-Demand, Low-Mintage Issue

5828 1854-D AU55 NGC. Variety 1-A. One of the many pleasures of cataloging Heritage lots is the exciting prospect of describing multiple examples of some of America's most popular and tantalizing coinage issues, many in higher grades than "common collectors" (the present cataloger included) can attain. But "looking is free," as we heard a major dealer say recently on the bourse floor. Today we get to examine side-by-side two examples of the 1854-D Dahlonega three dollar gold in AU55, one from NGC and one from PCGS.

Although the San Francisco branch mint would open in 1854 and strike its first examples of the three dollar gold issue in 1855, it would strike a smattering of later issues within the series, including coins in 1856, 1860, and 1870 (this last a currently unique specimen). But while both New Orleans and Dahlonega would strike three dollar gold issues in the denomination's debut year of 1854, neither mint would produce any further examples later in the series. While the 1854-O saw a substantial production of 24,000 coins, the 1854-D was struck in a tiny amount of 1,120 pieces, making it one of the lowest mintages in the entire series, one that was apparently not saved in any appreciable quantity.

Coming early in the series (and at a time when the few well-heeled numismatists preferred proof specimens and ignored mintmarks), the 1854-D stands in direct contrast to the issues of the late 1870s through 1889, when there were many more knowledgeable collectors acutely aware of mintage figures. Of course, only a single die pair was required for the entire production, with the date low and even in the reverse field and the 54 touching. The large D mintmark tilts ever so slightly leftward at the top; Doug Winter opines that this mintmark was also used on "one of the 1854-D half eagle varieties."

This Choice AU NGC-graded piece is quite sharply struck, although more yellow-orange than the reddish-orange PCGS example in this sale in the same grade. Few marks of any consequence appear on either side, and the merged dentils around much of the obverse rim and the V-shaped clash mark before Liberty's throat are diagnostic. The minor high-point rub on the hair below LIB and over the ear are in concert with the grade. This piece will undoubtedly see the same strong demand that any other piece in this grade — and in this auction — will experience. NGC ID# 25M4, PCGS# 7970, CoinPlex ID# G3M1854D

Choice AU 1854-D Three Dollar Sole D-Mint in the Series Very Rare at This Grade Level

5829 1854-D AU55 PCGS. CAC. Variety 1-A. As noted for the NGC coin in the same grade, this is a second AU55 example of the coveted 1854-D three dollar gold, here certified and encapsulated by PCGS.

It takes a major auction such as the Heritage Platinum Night offerings to bring such coins to market, as they are far from commonplace. Only a meager 1,120 pieces were coined at the remote Southern facility more than 150 years ago, and few have survived today in any condition remotely comparable. The average certified survivor at NGC and PCGS combined — populations that we believe represent the top end, if not necessarily the entirety, of all survivors — is somewhere between Choice XF and AU, and even in those grades, the 1854-D is quite appealing and collectible. Doug Winter writes in his reference on Dahlonega gold coins that the 1854-D is a “rare coin in About Uncirculated. It is very rare at the About Uncirculated-55 level and it is currently extremely rare in full Mint State.”

The 1854-D is also in demand, of course, as the first-year and only Dahlonega issue in the entire three dollar gold series, a distinction it shares with its New Orleans Mint counterpart. The present Choice AU piece is one of 19 submissions at PCGS in this grade (including an absolute certainty of duplications) with 12 finer — eight in AU58 and four in Mint State, one MS60, two MS61, one MS62. NGC shows similar populations, although more in AU58 and MS62. Again, these must not be considered all separate coins; they most certainly are not (11/12).

Strong luster and rich orange-red color are hallmarks of this AU55 example, although the surfaces are further blessed with a bold strike on the lower reverse — a trait seldom seen on the issue — and the strike elsewhere is strong as well. A V-shaped die clash mark appears in front of Liberty’s neck, and the obverse rim shows merged denticles around much of that side, both diagnostic of genuine examples. The reddish patina deepens noticeably around the peripheries. A super example of this Dahlonega Mint rarity, with the CAC endorsement a further enticement.

Ex: Long Beach Signature (Heritage, 6/2002), lot 6665, which brought \$20,700. PCGS# 7970, NGC ID# 25M4, CoinPlex ID# G3M1854D

Seldom-Seen Gem 1857 Three Dollar Scarce Variety, Missing Part of Obverse I's

5830 1857 MS65 NGC. The antebellum production figure for the 1857 three dollar gold issue was 20,891 pieces, but issues from early in the series appear not to have been saved in any significant way, and the few collectors of the time preferred proofs to business strikes. Bowers wrote in his 2005 series reference that only 45 to 60 Mint State coin survive today, although changing grading standards may make that estimate outdated. PCGS shows 65 submissions in all Mint State grades, while NGC shows 106 grading events — but both figures are certainly rife with duplications.

The present piece in Gem condition and certified by NGC is certainly among the few finest survivors of this issue, the sole NGC example in this grade and surpassed by a single MS66 NGC coin. The finest at PCGS are one each in MS65 and MS65+ (11/12). This orange-gold piece is remarkably free of even small signs of contact, and the minor strike softness that appears on the hair at the ear is typical for the issue. Generous luster liberally coats both sides with orange-gold coloration accented by deeper glints of amber near the rims. Note that *this piece is a rare variety as well*, missing the upper-left serifs on the I's in UNITED and AMERICA on the obverse, and the date on the reverse is higher. Bowers notes that "this variety is much scarcer" than the variety with normal legends. More importantly, this Gem appears to be the finest example we have offered at auction since 1998. Astute collectors will act accordingly. Census: 1 in 65, 1 finer (11/12). NGC ID# 25MA, PCGS# 7976, CoinPlex ID# G3M1857

1858 Three Dollar Gold, MS62 Rarest Series Issue From the 1850s

5831 1858 MS62 NGC. The 1858 three dollar gold was a meager production of only 2,133 circulation strikes plus a handful of proofs, estimated by Bowers at 10 to 14 pieces. He writes that "as the limited mintage suggests, the 1858 is the rarest three-dollar gold piece of the 1850s. So far as is known, all went into circulation and none were deliberately saved." Well-heeled collectors of the day, of course, preferred proof examples to business strikes. The present MS62 NGC example takes a two-toned approach, mellow orange-gold around the peripheries with a distinctive touch of lilac framing the facial features of Liberty. A couple of thin marks on the cheek and into the left obverse field help account for the grade, as does a comma-shaped mark near 6 o'clock on the lower reverse at the rim. The strike is surprisingly sharp on the central details of each side, further enhancing the considerable eye appeal. Census: 3 in 62, 1 finer (11/12). NGC ID# 25MC, PCGS# 7978, CoinPlex ID# G3M1858

1862 Three Dollar Gold Piece, MS64
Only Seven Finer at PCGS

5832 1862 MS64 PCGS. Specialists will understand the rarity of this issue, from a mintage of only 5,750 business strikes. The denomination was produced in small quantities in most years, and mintages diminished as the Civil War wore on. In fact, only three later issues had higher mintages, 1874, 1878, and 1887.

This Choice Mint State piece has highly lustrous yellow-gold surfaces with reflective fields that result from heavy striae on both sides. The upper obverse and lower reverse show slight design weakness, and the surfaces are minimally marked. An impressive specimen rarely found so nice. Population: 11 in 64, 7 finer (11/12). PCGS# 7983, NGC ID# 25MH, CoinPlex ID# G3M1862

1863 Three Dollar Gold, Remarkable MS66+

5833 1863 MS66+ PCGS. CAC. The Indian Princess three dollar gold piece was introduced in 1854 with a design by Mint Engraver James B. Longacre. There were high hopes for the new odd-denomination coins, and three different mints struck them in their debut year.

The denomination, nonetheless, failed miserably.

It was never very popular with the general public, and some numismatists doubt the theories about its purported usefulness for purchasing 100 three-cent stamps or for obtaining 100 three cent silver pieces, which were also current in 1854.

Mintages for the series sank rapidly, and the Civil War, beginning in 1861, ensured that later issues would be struck in even smaller numbers. The recorded production figures for circulation strikes decreased every year during the five calendar years of the Civil War, from 5,959 pieces in 1861 to 1,140 coins in 1865.

The 1863 threes were struck in the amount of an even 5,000 pieces, but most of the issue saw little if any circulation; in fact, most gold and silver coins were hoarded throughout most of the Civil War and for many years thereafter. The Civil War may have accounted for the preservation of some exceptional Mint State examples, but perhaps only 15 Gem-or-finer coins survive today. The present piece is certified MS66+ by PCGS and shows the heavy clash marks on both sides that many survivors display; much of the profile of Liberty shows doubled outlines from the wreath on the reverse, slightly shifted between the two clashes in an interesting effect. A similar effect appears on the reverse.

The aesthetic appeal of this coin is truly incredible, a piece that many numismatists would revel in seeing in person. Thick luster complements surfaces that range from yellow-gold to orange-gold with glints of mint-green. As expected from the high grade, Liberty's cheek in particular but the surfaces overall are notably free of distracting marks. A small diagonal tick to the right of the 3 in the date serves as a pedigree marker but is trivial otherwise. Some strike softness appears on the bowknot, but this piece is one of remarkable quality throughout. Population: 5 in 66 (1 in 66+), 3 finer (11/12). PCGS# 7984, NGC ID# 25MJ, CoinPlex ID# G3M1863

1878 Three Dollar Gold Piece, MS65 Popular Type Issue

Gem 1879 Three Dollar Fully Lustrous and Minimally Marked

5834 1878 MS65 PCGS. The 1878 three is well-known as the ideal type coin in the series, from a mintage of 82,304 coins, second-highest only to the 1854. It follows that those two issues have the highest number of coins certified at PCGS, and the 1878 outnumbers the higher-mintage 1854 nearly two to one, and nearly 10 to one in Gem grades. Clearly a novel issue in 1854, the three dollar gold piece was unnecessary in commerce and was little-used in 1878. This Gem exhibits brilliant orange-gold surfaces with frosty luster and exceptional eye appeal. A few trivial marks are evident on each side, preventing an even higher grade.

From The Victoria Rose Collection. PCGS# 8000, NGC ID# 25MZ, CoinPlex ID# G3M1878

5835 1879 MS65 NGC. The 1879 three dollar gold, mintage 3,000 circulation strikes, ushered in the final decade of low mintages that would conclude the series in 1889. By comparison, more than 80,000 pieces had been struck the previous year, in 1878. While NGC and PCGS each show more than 100 submissions of the 1878 in Gem grade, for the 1879, NGC shows 20 submissions (including one Prooflike coin) in MS65, with three finer; PCGS shows 37 in MS65, with six finer (11/12). This Gem NGC example offers full mint luster over surfaces that show lovely medium orange-gold color. Only a few of the most minor marks are scattered about, consistent with the grade.

From The Flagg Family Collection. NGC ID# 25N2, PCGS# 8001, CoinPlex ID# G3M1879

Appealing 1885 Three Dollar, MS65 An Important Condition Rarity

5836 1885 MS65 PCGS. CAC. Despite the low mintage of 801 circulation strikes, the 1885 three dollar has a reasonably high survival rate. It is estimated that 165 to 220 pieces are extant, 75 to 100 of which are probably Mint State. Uncirculated examples are concentrated in the MS60 to MS64 range, and Gem and finer coins are rare. PCGS and NGC combined have seen only 10 Gem specimens and seven coins finer, some of which are likely resubmissions.

The peach-gold surfaces of this MS65 offering display prooflike fields (not so designated by PCGS) that display noticeable contrast with the motifs. The design elements are well-struck, a typical characteristic of the issue. A few minute grazes in the fields preclude an even finer grade. All in all, this piece exhibits excellent overall eye appeal and will make a wonderful addition to a high-grade gold collection. Population: 10 in 65, 7 finer (12/12). PCGS# 8007, NGC ID# 25N8, CoinPlex ID# G3M1885

Premium Gem 1888 Three Dollar Gold Only Two Numerically Finer Examples at PCGS

5837 1888 MS66 PCGS. The three dollar gold denomination was winding down in 1888, and the series was discontinued the next year. Only 5,000 business-strike examples were struck, but some astute numismatists, like J.W. Scott and George Earle, had the presence of mind to save many high-quality specimens at the time of issue. The 1888 is probably the most available issue of the decade, but it is still quite rare at the MS66 level and almost unobtainable any finer.

This spectacular Premium Gem is well-detailed, and the light orange and rose-gold surfaces display vibrant satiny mint luster. No mentionable distractions are evident, and eye appeal is terrific. Population: 32 in 66 (1 in 66+), 2 finer (11/12).

From The Richard P. Ariagno, M.D. Collection. PCGS# 8010, NGC ID# 25NB, CoinPlex ID# G3M1888

PROOF THREE DOLLAR GOLD PIECES

1862 Three Dollar, PR66 Ultra Cameo One of the Two Finest Certified

5838 1862 PR66 Ultra Cameo NGC. According to Walter Breen's *Proof Encyclopedia*, the 1862 three dollar gold issue in proof format is "about equally rare with the quarter eagle," that is, quite rare in the scheme of proof gold overall. The estimates for survivors of that issue, the quarter eagle, range from about 11 to 17 pieces, although we are sure that Breen intended the lower number, as that was his estimate; higher numbers more recently come from PCGS and Garrett-Guth.

As with all other proof gold issues dated 1862, the three dollar was struck in the recorded amount of 35 pieces, although the Mint for decades had a habit of reporting the proofs struck rather than the number actually sold, usually consigning leftovers to the crucible at the end of the year without further ado (or mention). Of course, attrition usually took its toll as well. The current population data show eight submissions at PCGS including one piece in PR65 Deep Cameo, with nine grading events at NGC, including the present piece as one of two tied for the finest at PR66 Ultra Cameo.

The surfaces are essentially pristine and awash in profoundly deep field-device contrast, with ample quantities of the "gold on black" effect that collectors so prize in their proof gold coinage. The strike is full throughout. The coloration ranges from pale yellow-gold to deeper reddish-gold near the rims, and there are no singular marks, as expected at the Premium Gem grade level. The reverse die is slightly rotated with respect to the obverse. This piece is otherwise an excellent match for the other members of this complete 1862 gold proof set, all being offered as individual lots.

This is the sole finest example of this issue we have ever offered, by one grade point. The ex: Dr. Loewinger PR65 Deep Cameo example in our FUN Signature (Heritage, 1/2007), lot 3122, realized \$69,000, and we expect that this remarkably fine coin will also bring strong bidding.

From The Dr. James Olsen Collection. NGC ID# 28A2, PCGS# 98025, CoinPlex ID# G3P1862DC

1872 Three Dollar, PR65 Cameo Outstanding Eye Appeal

5839 1872 PR65 Cameo PCGS. The 1872 three dollar piece had a reported mintage of 30 proofs, 20 to 25 of which are estimated to survive. The proofs are subject to date pressure by collectors because of the rarity of the 1872 business strike, that saw only 2,000 coins produced and perhaps somewhat fewer than 245 extant. PCGS has graded two proofs in Gem condition and none finer, including the solitary PR65 Cameo in the present lot.

Gorgeous field-motif contrast is present on both sides of this peach-gold example, each of which exhibits exquisitely struck design elements. There are no marks worthy of mention. This impeccably preserved Gem yields outstanding eye appeal. PCGS# 88035, NGC ID# 28AC, CoinPlex ID# G3P1872CA

1876 Three Dollar, PR64 Cameo Very Rare Proof-Only Date

5840 1876 PR64 Cameo NGC. The 1876 three dollar gold, like the 1875 three, is a proof-only issue, produced in an unknown quantity estimated at 45 coins, according to the *Guide Book*. The coinage of 1876 is a predilection for some collectors interested in America's Centennial, and proof gold collectors will find their specialty intersecting with that in this delightful 1876 three dollar gold, certified PR64 Cameo.

Any proof three dollar gold piece is a rarity — even more so than 19th century proof gold in general — and as a proof-only issue, the 1876 approaches the status of “legendary rarity.” For the hardy collectors assembling a complete year set of three dollar gold coins, for the 1875 and 1876 issues, a proof must be chosen. No business strikes exist.

Q. David Bowers, estimating a proof mintage of 65-75 coins, writes in *The United States \$3 Gold Pieces 1854-1889* concerning the 1876 proof threes:

“The 1876 \$3 is in essence déjà vu 1875 all over again. Only Proofs were struck, no coins at all for circulation. The Mint stated that just 45 were made, but many numismatists believe that a few more were coined and not reported. Similar to the 1875, the 1876 is a famous rarity. Indeed, it is the second-rarest Philadelphia Mint three dollar coin, but is not the rarest *Proof*.”

Garrett and Guth go a step further, enumerating two deliveries of 20 and 25 proofs in February and June 1876, respectively, then adding that “an unknown number of additional Proofs were made at an unknown date from a different obverse die.” Regardless of the exact number produced, the issue is in great demand for all of the reasons cited above.

This near-Gem Cameo proof is sure to incite spirited bidding when it crosses the auction block. It keeps company in this series with other important rarities, not only the very rare 1875 proofs but also the unique 1870-S. The surfaces are bright orange-yellow, with tremendous reflectivity and field-device contrast. The strike is full throughout both sides. For pedigree purposes we note a couple of tiny ticks behind the head, and a thin mark in the left obverse field, below the N of UNITED. These minuscule contact marks are well within the confines of the near-Gem grade and fail to dampen the enormous eye appeal. This splendid piece represents an important opportunity for several different collector specialties. Census: 12 in 64 Cameo, 8 finer (11/12).

Ex: Long Beach Signature (Heritage, 9/2010), lot 5305, where it realized \$54,625.

From *The Ives Devos Collection*. NGC ID# 28AJ, PCGS# 88040, CoinPlex ID# G3P1876CA

Seldom-Seen Gem Proof Ultra Cameo 1877 Three Dollar Gold

5841 1877 PR65 Ultra Cameo NGC. The 1877 three dollar gold occupies a chronological position within the series about two-thirds of the way towards the end, but the proof mintage of 20 pieces (according to the *Guide Book* and Garrett-Guth) was nonetheless among the lowest in the series, at least for the post-1858 coins.

The 1877 proof threes are an issue that apparently has stirred, if not controversy, at a minimum *disagreement* among some of the leading numismatic researchers. In a nutshell, Garrett and Guth argue that only 20 proofs were struck, all from a single obverse die, in two deliveries of 10 pieces each, one on February 24 and one on May 31, "all from the same die pair. Later versions show evidence of die rust on the obverse. Proofs have a very low date compared to the nearly centered date on circulation strikes."

An opposing view is put forth by Q. David Bowers and Doug Winter, who write that "two obverse dies were used. On one, less than 50% of the J.B.L. initials are visible on the neck truncation, and there is no evidence of rust. The other obverse die, with a rust spot below Miss Liberty's ear and a 'teardrop' near the eye was used to coin Proofs of 1877 to 1880." Bowers and Winter posit a total proof production of 30 pieces, including the later restrikes from the apparently different (rusty) die.

In either scenario, however, the 1877 proof threes turn out to be remarkably rare, especially in the high grade of the present Gem Ultra Cameo proof. Even the circulation strike threes of 1877 are rare; Bowers writes that "of all circulation strike issues in the \$3 series (excluding 1870-S) the 1877 in Mint State has appeared less often in early auction catalogs."

This Gem Ultra Cameo proof is the sole such certified at NGC, although there is one finer in PR66 Ultra Cameo. There is an obvious rust spot on Liberty's lower hair which would intersect a line drawn from the E in UNITED to C in AMERICA, and some other small rust spots appear elsewhere on the portrait. The initials JBL are largely discernible. Blatant cameo contrast prevails on orange-gold surfaces that seem free of distractions. Even in this complete 1877 proof set sold as individual lots, this piece stands out as a coin of remarkable quality.

From The Dr. James Olsen Collection. NGC ID# 28AK, PCGS# 98041, CoinPlex ID# G3P1877DC

1879 Three Dollar, PR63 Cameo
One of Perhaps 15 Proof Survivors

1881 Three Dollar, PR65 Cameo
Deeply Contrasted and Virtually Pristine

5842 1879 PR63 Cameo PCGS. Loads of eye appeal are blatant upon first glance at this Select Cameo proof 1879 three dollar gold, a coin that with its profound field-device contrast certainly appears on the cusp of a Deep Cameo designation. The surfaces yield the desired "gold on black" appearance when tilted beneath a light. A few tiny contact marks appear under magnification but fail to dampen the excellent eye appeal. A meager complement of 30 proofs was struck alongside the 3,000 circulation strikes for the 1879, and it is doubtful that more than half that number survives today, despite the population reports inflated with duplicates. The needle-sharp strike on this piece is another plus. Population: 2 in 63 Cameo, 2 finer (11/12). PCGS# 88043, NGC ID# 28AM, CoinPlex ID# G3P1879CA

5843 1881 PR65 Cameo NGC. The 1881 proof three dollar gold mintage was reportedly 54 pieces, making it one of the larger-mintage survivors from the last decade of the series coinage. PCGS estimates that about 40 pieces exist today, including Cameo and Deep/Ultra Cameo examples. The present Gem Cameo NGC example is, in any case, one of the nicest survivors of the original production; NGC accounts for eight Gem Cameo proofs with one PR66 finer, and there are two PR67 Ultra Cameo pieces also numerically finer (11/12). The field-device contrast on this orange-gold Gem proof is quite deep, and it requires a loupe to see a few tiny fields marks that are in concert with the grade. A couple of scrapes on the left-reverse slab must not be confused with contact. All of the high points are unmarked, and the strike is full in all areas. An excellent type coin of this odd denomination for a proof gold set. NGC ID# 28AP, PCGS# 88045, CoinPlex ID# G3P1881CA

1881 Three Dollar Gold, PR66 Cameo Rare Low-Mintage Date

5844 1881 PR66 Cameo NGC. The 1881 is an especially popular date in the series of three dollar gold pieces, obviously stemming from its minuscule business strike production of just 500 coins. The distribution of proofs was actually stepped up to a new high of 54 pieces in 1881, and a decent percentage remain today, perhaps numbering as high as 45-55 coins. The accepted number of proofs struck and delivered has varied considerably over the years, as pointed out in the Bowers-Winter series reference. The official delivery was recorded as 40 complete gold proof sets, all of which were delivered on February 9, plus 20 gold dollars and 10 three dollar gold pieces. These extra 10 three dollar pieces were delivered on March 29. However, Walter Breen read the records of Chief Coiner Archibald Loudon Snowden, where he recorded the number to actually be 54 proofs, the number that has remained as the official and accepted proof mintage.

This specimen is among the finer pieces known of this elusive and popular date, with immaculate two-toned surfaces draped in even orange-gold patina. The surfaces are free from any noticeable or detracting blemishes. Close inspection shows the orange-peel texture seen on many proof gold coins from the latter 19th century. This effect was created by placing the planchets in an annealing furnace that had previously been used for silver or copper coins, but was overheated for gold. It is an interesting effect, and one that is seldom seen past 1900. Census: 1 in 66 Cameo, 0 finer (11/12).

Ex: New York Signature (Heritage, 11/2003), lot 7438, where it brought \$36,800.

From The Flagg Family Collection. NGC ID# 28AP, PCGS# 88045, CoinPlex ID# G3P1881CA

1882 Three Dollar, PR64 Cameo
Lovely Two-Toned Coin

5845 1882 PR64 Cameo NGC. CAC. A meager 76 proofs were made of the 1882 three dollar gold, complementing the equally skimpy production of 1,500 business strikes. The proofs display a perfect 2 in the date, while the circulation strikes show repunching on the 2. The present near-Gem Cameo proof is one of 16 submissions in this grade at NGC with 14 finer — including duplications (11/12). Much contrast is evident on each side of this lovely coin, with orange-gold surfaces overall. Only a few minor signs of contact appear along with a notable orange-peel effect.

From The Richmond Hill Collection. NGC ID# 28AR, PCGS# 88046, CoinPlex ID# G3P1882CA

1886 Three Dollar, PR65 Ultra Cameo
Profoundly Contrasted and Fully Struck

5846 1886 PR65 Ultra Cameo NGC. This splendid Gem Ultra Cameo proof 1886 three dollar gold is one of 142 pieces struck during the series' waning years, which would end in 1889. This complements a circulation-strike coinage of only 1,000 pieces, but both formats were saved in larger quantities later in the series than for the earlier issues. It is difficult to imagine an example with deeper field-device contrast than the present piece, which shows a profound gold-on-black contrast straight-on to the viewer. The surfaces are orange-gold with excellent luster and show a definite orange-peel effect, and they appear virtually unmarked, an impression that examination under a loupe merely serves to confirm. Census: 3 in 65 Ultra Cameo, 4 finer including a 66 ★ Ultra Cameo example (11/12). NGC ID# 28AV, PCGS# 98050, CoinPlex ID# G3P1886DC

Near-Gem Proof 1887 Three Dollar
Unacknowledged Cameo Contrast

5847 1887 PR64 NGC. The nominal mintage for the proof 1887 three dollar gold piece is 160 specimens, and while the issue is among the more accessible of its series in a relative sense, it remains scarce regardless of condition in the broader view. This near-Gem representative has clear contrast and almost assuredly was certified prior to PCGS recognizing coins as Cameo or Deep Cameo. Though a few areas of cloudiness are visible on the yellow-gold fields, the gleam there remains as strong as ever, and the frost across well-defined devices is delightful. A great odd-denomination example. NGC ID# 28AW, PCGS# 8051, CoinPlex ID# G3P1887

1887 Three Dollar, PR64 Deep Cameo
Profound Surface Contrast

5848 1887 PR64 Deep Cameo PCGS. In the third calendar year before the unusual three dollar gold series terminated for good in 1889, the Philadelphia Mint struck 160 proofs to complement the 6,000 business strikes for the year 1887. That amount would turn out to be the largest for the business strikes through the series' end, although the 1888 proof total, at 291 pieces, would be nearly twice as large as that of 1887. In 1889 both formats would be down, 129 proofs and 2,300 circulation strikes, but both were likely saved in greater quantity due to their last-year status. Profound field-device contrast dominates both sides of this orange-gold near-Gem proof 1887, with reflective fields that fade to black against the frosted devices. It takes a loupe to see the few minuscule contact marks in the fields that determine the grade, but they are far from overt and detract little from the obvious eye appeal. Population: 4 in 64 Deep Cameo, 4 finer (11/12). PCGS# 98051, NGC ID# 28AW, CoinPlex ID# G3P1887DC

1888 Three Dollar, PR65 Cameo
Outstanding Eye Appeal

5849 1888 PR65 Cameo PCGS. CAC. The 1888 three dollar gold supposedly has the highest proof mintage of any three dollar gold piece (according to Jeff Garrett and Ron Guth, 2008). David Bowers (2005), on the other hand, contends: "Possibly 291 were struck, but not all were sold." In any event, Bowers estimates 200 proofs were produced. Of these, he gives an estimate of 120 to 150 extant pieces.

The present PR65 Cameo specimen displays beautiful orange-gold color throughout both sides and pronounced field-motif contrast. The design elements are exquisitely struck. This piece has been exceptionally well cared for as there are no mentionable post-strike marks. The foregoing attributes add up to outstanding eye appeal. Population: 5 in 65 Cameo, 3 finer (12/12). PCGS# 88052, NGC ID# 28AX, CoinPlex ID# G3P1888CA

Final-Year 1889 Three Dollar
Deep Reddish-Tinted PR64 Cameo

5850 1889 PR64 Cameo PCGS. CAC. It is an interesting observation that the Mint produced (or reported, at the very least) a much larger proof manufacture of 1888-dated three dollar gold pieces than those bearing the 1889 date, specifically 291 of the former, as opposed to only 129 of the latter. Bowers' series reference says that the three dollar gold denomination ended "without fanfare in 1889 with a circulation strike mintage of 2,300 coins, many of which were never released." The low business-strike emission exerts upward pressure on proofs, about which Bowers says that proofs bearing the 1889 date are "generally regarded as among the rarest of this era, certification data notwithstanding."

The surfaces on both sides of this PR64 Cameo piece offer wonderfully stark black-on-gold contrast and certainly appear to verge on a Deep Cameo designation. Reddish-gold high-point accents add to the allure, although minor contact marks in the fields, mostly on the obverse, explain the grade. This piece nonetheless remains highly desirable, with broad appeal. Population: 8 in 64 Cameo, 6 finer (11/12).

Ex: Long Beach Signature (Heritage, 9/2009), lot 1537.

PROOF FOUR DOLLAR GOLD PIECES

1879 Flowing Hair Stella, PR58
Judd-1635, Important U.S. Pattern

5851 1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR58 PCGS. Likely Judd-1635 or Pollock-1833, struck in standard 90% gold, as were all of the four dollar gold pieces, in our opinion. The standard diameter for half eagles was 21.6 mm. (0.850 inch), and Andrew Pollock, III, notes that observed diameters for the four dollar gold pieces was between 0.850 and 0.852 inch. The four dollar and five dollar gold pieces were clearly the same diameter.

Unless the metric alloy was authorized for regular coinage production, and today we know that no such authorization materialized, there was no reason for Mint personnel to take the time and effort to create planchets of a nonstandard composition. These four dollar gold pieces were the same diameter as half eagles, so planchet production was merely a process of rolling the strip slightly thinner than that used for half eagles. The same planchet cutter was used for both denominations.

The 1879 Flowing Hair stella struck in gold ranks among the most famous pattern coins in U.S. Mint history, likely the result of its listing in the *Guide Book* for many years. This extremely important example shows a trace of wear on the high points and should receive considerable bidding interest from those who are unable to afford a high grade proof. Both sides retain noticeable proof surface with a few scattered marks consistent with the grade. The surfaces display rich green-gold with light orange overtones. An exceptional opportunity.

From The J.D. Tanner Collection. PCGS# 8057, NGC ID# 28AZ, CoinPlex ID# G4P1879FLOW

1879 Flowing Hair Stella, Judd-1635, PR62 Collected as Both Pattern and Type Coin

5852 1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR62 PCGS. No. 18 on the list of *100 Greatest U.S. Coins*: not too shabby a performance for a pattern that started out as a rather bizarre, impractical experiment at international currency reform. Jeff Garrett, with Ron Guth, ranks both the 1879 and 1880 stellas — four types are known in all — at number 18 in the third edition of the noted reference. (The notion of lumping together the 1879 Flowing Hair with the three other stella variants is a bit bizarre as well, as the others are at least R.6 or higher — the 1879 Coiled Hair, and the 1880-dated examples of both designs.)

In any case, the 1879 Flowing Hair stella's very *availability*, compared to the rest of the series, makes any example offered at auction the subject of intense bidding and feverish demand. (It must be mentioned, too, that the odd denomination adds to the appeal: Between the two cent bronze, the three cent nickel or silver, and the four dollar gold, advanced collectors can play a mighty game of "show and tell" with their noncollector friends.)

The stella or four dollar gold never had any serious chance at success, as it approximated but did not equal any of various circulating European currencies of its time — sort of an early euro experiment. Given the current economic mess in the European Union, that should give some idea of the stella's viability at the time.

The current PR62 example, certified by PCGS, shows clearly the die striations through the central high points. It is our belief that all pieces possess these striations, since the stellas were struck on shaved-down half eagle planchets of normal fineness rather than struck in the special metric alloy noted on the obverse. (We are still waiting for someone to perform nondestructive metallurgical analysis to prove or disprove this theory once and for all.) The fields are deeply reflective, the devices mildly frosted. Deep reddish-orange coloration prevails against glints of hazel around the device margins. A few hairlines in the fields, rather than overt contact marks, are the grade determinant. As an especially attractive example for the grade, we think this piece should see spirited bidding — both from American and our increasingly international contingent, as a coin that has managed finally to transcend its former limitations. PCGS# 8057, NGC ID# 28AZ, CoinPlex ID# G4P1879FLOW

1879 Flowing Hair Stella, PR66 Cameo One of the Finest of This Popular, Experimental Coin

5853 1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR66 Cameo NGC. The stellas might have succeeded had they not tried to be too many things to too many people. The idea of an international coinage was not a new one in 1879, when the Hon. John A. Kasson began his support for the idea of the stella, to approximate the value of several currently circulating European currencies, including those of France, Austria, Spain, Italy, and Holland. The 1874 Bickford gold eagle, Judd-1373, was one earlier experiment that expressed its denomination in dollars as well as several other foreign currencies. The stella's first major drawback can be imputed from the arcane inscription encircling the obverse rim, one that spells out (to the informed) its metallic composition. The stella failed in part because it got entangled with the eccentric notions propounded by Dr. Hubbell. Walter Breen writes in the *Proof Encyclopedia*:

"Perhaps unfortunately, it [the stella] in some way became tied up with the 'metric' gold alloy proposed by one of the Mint's perennial hangers-on, Dr. Wheeler H. Hubbell. This called for 60 parts gold, 3 parts silver, 7 parts copper per 70 parts total composition — amounting to 5% debasement (offset by overweight) in the vain hope of stabilizing the world market ratio between gold and silver (something no coinage whatever could do, as it depends wholly on the available supplies of those metals and market manipulations thereof). The proposal might have become law had it not been conjoined to the Hubbell alloy."

The "5% debasement" Breen refers to is that a standard 90% fine gold coin would have been 63 out of 70 units pure gold, while a stella was about 85.7% (60 parts out of 70) gold. The 1879 Flowing Hair stella was the only one of the four stella issues that appears to have been circulated freely before Congressmen formed their opinions and evaluations. The other three stella issues were all clandestinely produced Mint delicacies, members of a long string of such sweetmeats that emanated from the Mint during this timeframe. It is the relative availability of the 1879 Flowing Hair compared to the other three issues — all extremely rare — that has made it so popular.

This is among the finest known of the 400 or so estimated to have been struck. The surfaces are bright yellow gold with heavily frosted devices. This frost contrasts markedly against the depth of mirroring in the proof fields. Close examination reveals a few tiny contact marks, but none are apparent without magnification. The always-seen diagonal die striations or roller marks are evident on the central devices on each side. Census: 19 in 66 Cameo, 7 finer (11/12).

From The Victoria Rose Collection. NGC ID# 28AZ, PCGS# 88057, CoinPlex ID# G4P1879FLOWCA

1879 Flowing Hair Stella, PR67 Cameo Classic Pattern Rarity, Judd-1635 Among the Finest Certified

5854 1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR67 Cameo NGC. From a design by Chief Engraver Charles Barber, the 1879 Flowing Hair stella, designated as Judd-1635 in the standard pattern reference, is one of the most popular pattern issues of all time. Originally produced to demonstrate a proposed international coinage, similar in concept to the Euro of today, records indicate that 15 stellas were originally struck and distributed to the Congressional Committee on Coinage as part of three-piece sets that also included two goloid metric dollars, Judd-1617 and Judd-1626. The sets were supposedly struck in Dr. Wheeler Hubbell's patented goloid alloy, consisting of gold, silver, and copper in various proportions.

The "goloid" sets proved extremely popular, and another 400 sets were ordered and offered for sale at \$6.10 to congressmen. These sets were produced in standard silver and gold alloy, and many researchers doubt that any sets were actually struck in the goloid mixture. A few examples have been tested in recent times, with nondestructive testing, but all results have been inconclusive, at best. Unsold sets were offered to collectors at a steep markup of \$15 per set. The 1879 Flowing Hair stellas were particularly popular, and it seems likely that at least 700 of these coins were eventually struck at different intervals over the next few years. Four dollar gold coins were also produced in a Coiled Hair design by Assistant Engraver George Morgan in 1879, and both Flowing Hair and Coiled Hair stellas were also struck with an 1880 date, but none of these later issues was produced in significant numbers, and all are very rare today.

Unfortunately, there were many practical objections to the proposed international coinage, and no coins were ever produced for circulation. The goloid sets were immediately popular with collectors, many of whom resented the preferential treatment congressmen and other insiders were given in the distribution of the sets. The sets began appearing at auction as early as the Twelfth Sale of Coins and Medals (S.K. Harzfeld, 6/1880), when a set was offered in lots 393-395. After describing the coins in their separate lots, Harzfeld published a long discussion of the issue, including the following:

"This is one of the original 15 sets, submitted to Congress. As to the value, I need only say that a gentleman at Washington refused, some time ago, \$100 for one of these original sets. The pieces will be sold separately, without reserve, to the highest bidder; but should there be a fair bid for the lot, when the first piece is put up, the right is reserved to sell the three pieces as a set. The pieces are the more desirable, as there is not the least doubt that they will not be accepted for our coinage."

"The adoption of the Gold piece instead of improving our coinage would be a decidedly retrograde movement. Not merely that, for the old design of the United States coinage some 75 years ago, was more beautiful, and more practical for the purpose of circulation. The 'Goloid Dollar' being the size of a Half Dollar, would open the door to wholesale counterfeiting, and deceiving the unwary, as its general appearance does not indicate the little gold in it. And as to the Metric Dollar, the 4.2 parts gold in it, may just as well be left out. But the most important objection is, that the acceptance of 'goloid' would force the U.S. Government to pay a royalty to Mr. Hubbell, the 'original inventor' as he styles himself, of this metal for coinage."

The coins sold as a set for \$32.50, considerably more than the standard asking price of the year before, but less than the \$100 Harzfeld's Washington collector refused for his set. Apparently, Congress agreed with Harzfeld's assessment of the coinage, as none of the issues were ever adopted.

Collectors continued to prize the stellas, and prices realized rose steadily whenever the coins appeared at auction. Writing in *The Numismatist* in March 1911, Edgar Adams remarked:

"No United States pattern or regular gold piece seems to have acquired anything approaching the interest and popularity of the stella, and that this popularity is not diminishing by the advance of time, is well proved by the steady increase in the premium that is paid for specimens, no matter how often they are put up for auction."

Adams' words hold true today, as public offerings realize higher and higher prices with successive appearances. Recent sales include the magnificent PR67 Cameo example offered in lot 235 of the Superior auction of May 2008, which realized \$402,500.

The present coin is one of the finest surviving examples, with incredible eye appeal and unsurpassed technical quality. The design elements are richly frosted, producing a stunning black-on-gold cameo flash when the coin is tilted in the light. Razor-sharp definition is apparent in most areas, but the mysterious striations seen on all known specimens soften the detail in Liberty's hair just a touch. The vibrant mirrored surfaces glow with yellow-orange sunset colors, highlighted by shades of rose and lilac. Traditionally collected with the pattern series, the 1879 Flowing Hair stella has long been adopted by mainstream collectors, as well. The issue has been included in the *Guide Book* since the 1940s and is included in the 100 *Greatest U.S. Coins*. Census: 14 in 67 Cameo, 0 finer (12/12).

Ex: *Pre-Long Beach Sale* (Ira and Larry Goldberg, 9/2008), lot 1245. NGC ID# 28AZ, PCGS# 88057, CoinPlex ID# G4P1879FLOWCA

1879 Flowing Hair Stella, Judd-1635 PR67 Cameo, One of the Few Finest Available

5855 1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR67 Cameo NGC. CAC. Some coins just naturally stand out from the crowd, even in a well-dressed bunch such as the many memorable coins populating this Platinum Night offering. Not to diminish any other lots in this session, but the stellas are at the top of many collectors' "dream lists," even if they never even put them on their "wish lists" due to their expense.

And all of the above applies to *any stella, in any grade*; as we wrote recently about a "problem" example, "It's still a stella."

The Present Example, Among the Few Finest Available

The present piece is among the few finest available examples of the "type" 1879 Flowing Hair — the only remotely obtainable issue for most collectors of the four 1879-1880 designs, Flowing Hair and Coiled Hair. Certified in the incredible grade of PR67 Cameo, this piece is numerically surpassed by only a single PR68 Ultra Cameo NGC example. There are two other Ultra Cameo submissions in PR67 ★. Among Cameo coins, NGC has seen 10 PR67 Cameo submissions (including the present piece), of which three also bear the Star designation (12/12). The numerically finest at PCGS are one PR67 Deep Cameo, two PR67 Cameo coins and one non-Cameo PR67+.

This PR67 Cameo NGC-certified example is blessed with an unusually strong strike throughout both sides. Note that the hair detail is essentially complete, despite the die striations that appear on every example we have ever examined (more on this below). The die striations are faintly seen and vertical on the obverse; on the reverse, they are so faint as to require a loupe to see, and again vertically oriented. The contrast between fields and devices is profound, and the enormous aesthetic appeal is heightened by consistent, mostly yellow-gold color with a mere tad of orange present. As demanded at this grade level, the surfaces are near-perfect, limiting pedigree markers to those produced at the Mint. For completeness, we mention a few tiny brownish-orange specks present from incomplete mixture of the alloy, specifically in four of the fields around the central star, excluding the right field close to GLORIA.

The Facts — and the Legends

Facts are few, legends are many when it comes to the 1879- and 1880-dated stellas. We have had the privilege to examine quite a few stellas in our career, and for our money, we are not even convinced of the "Barber-Morgan bifurcation" — that Charles Barber designed the Flowing Hair stellas of 1879-1880 and George T. Morgan the 1879-1880 Coiled Hair issues. We have remarked before on the noteworthy size difference between the date digits on the two different 1880 stella issues — tiny and off-center, actually touching Liberty's lower hair locks on the 1880 Flowing Hair, large (or normal size, as on the 1879 pieces) on the 1880 Coiled Hair. If Charles Barber produced the obverse dies for both the 1879 and 1880 Flowing Hair issues, why would he have chosen such radically different-size dates?

The timeframe in which the stellas were produced was one of a remarkable number of behind-the-scenes high-jinks at the Mint. The disgraced former Mint director Henry R. Linderman had resigned his post in December 1878 after being charged by Congress with professional misconduct in June of that year, and he died in January 1879, the charges against him still unresolved. Nonetheless, the string of pearls continued under his successor, Horatio C. Burchard.

Q. David Bowers writes in his reference on three dollar gold:

"Behind-the-scenes capers continued in Philadelphia, including the production of the beautiful 1879 'Schoolgirl' silver dollar, by George T. Morgan — which no member of the public ever had a chance to buy, except through favored dealers with Mint connections. Pattern \$4 gold Flowing Hair gold stellas were made, but apart from those given out to congressmen and senators, the Mint held onto them tightly — causing a furor hotly discussed in catalogues and other publications of the era. Other varieties of 1879 and 1880 \$4 coins were made secretly."

At one time it was believed that "original" 1879 Flowing Hair stellas were struck in some limited amount — usually given as 15 pieces — which lack the die striations that appear on both sides. These pieces were supposedly struck in the nominal, curious metric alloy that the obverse inscriptions allude to, six-sevenths gold and silver with one-seventh copper alloy. At a later date, the 400-or-more "restrikes" were supposedly produced, showing the die striations and produced from regular .900 fine gold. But as we wrote in the Lemus-Queller catalog, which contained a number of pattern stella issues,

"As time goes by and no pieces appear to lack the striations, many numismatists have concluded that neither were the pattern gold pieces produced in that odd metric alloy, but rather they were struck on regular 900 fine planchets rolled out to 80% of the thickness of a half eagle, accounting for the roller marks or die striations seen on all known gold pieces."

Top-Ranked Examples: Recent Auction Appearances

This ranking of top-condition stellas is limited to 1879 Flowing Hairs.

PR68 Ultra Cameo NGC. (Stacks-Bowers, 6/2012), lot 4265. \$411,250. The sole numerically finest certified at either service.

PR67 ★ Cameo NGC. FUN Platinum Night (Heritage, 1/2012), lot 4833. \$264,500.

PR67 ★ Cameo NGC. FUN Signature (Heritage, 1/2010), lot 2148. \$299,000.

PR67 Cameo NGC. Pre-Long Beach Elite Sale (Superior, 5/2008), lot 253. \$402,500.

PR67 Cameo PCGS. Dallas Signature (Heritage, 11/2006), lot 2152, unsold.

1880 Flowing Hair Stella, PR66 Rare Judd-1657, Pollock-1857 Only 15-20 Examples Known

5856 1880 Flowing Hair, Judd-1657, Pollock-1857, R.6, PR66 NGC. The 1880 Flowing Hair stella is one of the most famous rarities in American numismatics. Technically a pattern issue, and one that was never authorized for regular coinage, the stella has survived and prospered as a collectible issue, and is regularly featured in numismatic publications such as *A Guide Book of United States Coins*, alongside regular U.S. gold coin types.

The stella or four dollar gold piece was not well known until it was publicized by Edgar H. Adams in the early 20th century. Fortunately, several hundred pieces had survived, despite their gold content and lack of previous numismatic attention. Most of the survivors (and most of those originally produced) are of the 1879 Flowing Hair type, which may have had a total mintage of 700 coins or more, although not all of them were made at the same time. The 1879 Flowing Hair production was followed by the much smaller mintage of 1880 Flowing Hair stellas, which was probably no more than 25 examples; only 15 to 20 of those coins are currently known to exist. Stellas were also made in 1879 and 1880 of a different design known as the Coiled Hair variety. The Coiled Hair stellas are all rare, with around 10 to 12 examples known from each of the two years mentioned.

The current offering is a lovely Premium Gem example that any collector would be proud to own. It was previously sold as part of a complete set of all four stella varieties; first by B. Max Mehl in 1947, and later by Stack's as part of their 1976 ANA auction (see pedigree data below). The coin is well-struck with watery reflectivity in the fields, and shows even honey-gold coloration across both sides. The reverse has a prominent stain on the E of ONE and a dot (probably a tiny planchet flaw) below M of UNUM, which serve as definitive pedigree markers. Of the 10 non-Cameo coins NGC has graded, this specimen is the second finest, behind a single PR67 ★ example (12/12). This coin has been off the market for nearly five years, and a similar time interval may pass before a comparable example becomes available.

The following roster is by no means complete, as early auction appearances, and some in modern times, are impossible to match with the primary pedigree chains, due to poor quality images, terse descriptions, and the general lack of pedigree identifiers on the individual coins. A list of some earlier appearances is available on USPatterns.com.

Roster of 1880 Flowing Hair Stellas:

- 1. PR66 NGC.** Will Neil Collection (B. Max Mehl, 6/1947), lot 2604 sold as part of a set for \$3,850; Grant Pierce; 1976 ANA (Stack's, 8/1976), lot 2920 sold as part of a set for \$225,000; Western Collection (Stack's, 12/1981), lot 1138, realized \$41,000; Summer FUN Signature (Heritage, 6/2008), lot 1960, realized \$431,250; **the present coin.**
- 2. PR64 PCGS.** Jerome Kern; Golden Jubilee Sale (B. Max Mehl, 5/1950), lot 244; Amon Carter, Sr.; Amon Carter, Jr. (Stack's, 1/1984), lot 633, realized \$68,750; Ed Trompeter Collection (Superior, 2/1992), lot 135, realized \$77,000; Somerset Collection (Bowers and Merena, 5/1992), lot 1470, realized \$39,050; Long Beach Signature (Heritage, 9/1998), lot 7106, realized \$103,500; FUN Signature (Heritage, 1/2001), lot 8171, realized \$94,875.

3. **Gem Brilliant Proof.** Massachusetts Historical Society (Stack's, 10/1970), lot 807, realized \$13,000; Stack's FPL Summer 1997 offered as part of a four piece set for \$875,000; Americana Sale (Stack's, 1/1998), lot 1498, still part of the set, unsold.
 4. **Gem Brilliant Proof.** Winner F. Delp Collection (Stack's, 11/1972), lot 791, realized \$17,000.
 5. **PR65 NGC.** 1974 ANA (Paramount, 8/1974), lot 873, realized \$40,000; Gold Rush Collection (Heritage, 1/2005), lot 30043, realized \$264,500.
 6. **PR65 NGC.** Rio Rancho Collection (Superior, 10/1974), lot 134, realized \$35,000; Auction '79 (Stack's, 7/1979), lot 801, realized \$50,000; Auction '80 (Superior, 8/1980), lot 386, realized \$105,000; Blevins/Bodway Collections (Superior, 6/1988), lot 6731, realized \$84,700; Chris Schenkel Collection (Bowers and Merena, 11/1990), lot 508, realized \$231,000; Long Beach Signature (Heritage 2/1995), lot 5837, realized \$77,000.
 7. **Brilliant Proof.** Winthrop Collection (Bowers and Ruddy, 9/1975), lot 583, realized \$31,000; Gainsborough (Abner Kreisberg, 9/1980), lot 1275, realized \$52,000.
 8. **PR65 NGC.** John Work Garrett; Johns Hopkins University; Garrett Collection, Part I (Bowers and Ruddy, 11/1979), lot 432, realized \$65,000; Jascha Heifetz Collection (Superior, 10/1989), lot 4297, realized \$297,000; Swan/Sweet Collections (Bowers and Merena, 3/2004), lot 2621, realized \$310,000; Dallas Signature (Heritage, 11/2006), lot 2153, realized \$287,500; Dallas Signature (Heritage, 4/2007), lot 1694, realized \$316,250; Husky Collection (Stack's, 6/2008), lot 2051.
 9. **Choice Brilliant Proof.** Possibly Belden Roach Collection (B. Max Mehl, 2/1944), lot 803; Auction '80 (Stack's, 8/1980), lot 1451, realized \$65,000.

EARLY HALF EAGLES

1795 Small Eagle Five Rare BD-8 Variety

5857 1795 Small Eagle PCGS Genuine. BD-8, High R.5. Bass-Dannreuther Die State a/a. The PCGS number ending in .92 suggests Cleaning as the reason, or one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been lightly cleaned. The 1795 Small Eagle half eagle represents the first year of the denomination, with a reported mintage of 8,707 pieces, and 12 die varieties known for the date and type. This coin is an example of the rare BD-8 variety, with one star point at the cap and three berries in the reverse wreath. No more than 30-40 examples of the BD-8 survive today in all grades, and the variety probably accounted for 500-1,000 pieces of the reported mintage.

The coin offered here is a well-detailed and well-preserved example that retains much of its original design detail. The light yellow and greenish-gold surfaces show prooflike reflectivity in most areas, despite a few signs of a light cleaning in previous years. Still an attractive specimen of this elusive, first-year U.S. gold issue. PCGS# 8066, NGC ID# 25ND, CoinPlex ID# E5M1795SMEAG

1795 Small Eagle Five, AU55, BD-3 First-Year Type Representative

5858 1795 Small Eagle AU55 NGC. BD-3, High R.3. Bass-Dannreuther Die State b/b. The flag of the 5 lying barely over the bottom of the bust, star 1 below and touching the curl, and star 11 intersecting the Y of LIBERTY are diagnostic for this obverse. The reverse shows a leaf touching the bottom of U, a second touching the bottom of N, and a third leaf extending beneath the I, with the wreath exhibiting two berries inside, two outside.

After two years in which the Mint could make only copper, first, and then silver coins, bureaucratic obstacles to the coinage of gold were finally removed by 1795. The 1795 half eagle issue was the first issue in gold of the “official” U.S. Mint, and the five dollar series would be the workhorse denomination for commercial transactions, particularly international ones and high-value swaps, right through to the introduction of the gold double eagle in 1850.

The first Mint Chief Engraver, Joseph Wright, unfortunately died of yellow fever in 1793, after which Director David Rittenhouse hired Robert Scot (1744-1823), a native of Edinburgh, Scotland, to fill the post. The 1795 five dollar coins, all with the Small Eagle reverse, were the first gold coin dies Scot produced.

The reported production of 8,707 half eagles for 1795 was achieved using a combination of eight obverse and nine reverse dies, mated in various combinations to produce the 12 acknowledged varieties. At one time numismatists wrongly believed that there were 14 or even 16 varieties. John Dannreuther writes, “Harry Bass studied the early half eagle series as intensely as anyone and he was unable to acquire more than 12 varieties — he owned more than 20 examples of this date and his notes were quite complete.”

The fields on this Choice AU example of the BD-3 show slight reflectivity. The surfaces have taken on a light reddish cast, but are primarily yellow-gold. The strike is particularly strong on this piece. Small abrasions appear, save for two tiny planchet voids in the lower right obverse field and a couple of pecks in the fields on each side of the wreath on the reverse. NGC ID# 25ND, PCGS# 8066, CoinPlex ID# E5M1795SMEAG

Choice AU 1795 Small Eagle, BD-3 Minimally Abraded Surfaces

5859 1795 Small Eagle AU55 NGC. CAC. BD-3, High R.3. Danreuther Die State b/b. The tip of the 5 in the date barely touches the drapery at the bottom of Liberty's bust. Star 1 is below the lowest hair curl and touches it with one point. Star 11 is clearly intersecting the Y in LIBERTY, and stars 11-12 are closely overlapping. The stars overall are awkwardly placed around the perimeter, 15 stars in all, 10 on the left side and five on the right. This obverse die was previously used for the BD-2 and would be used again for the BD-4.

The reverse die has the wreath showing two berries each inside and outside. The longest leaf on the bottom of the palm frond extends to the center of the U in UNITED. A second leaf runs to beneath the center of the N, and the topmost, longest leaf extends to beneath the left serif of the I in UNITED.

This is the sole use of this reverse die, curiously so, as there are no examples known that show some heavy die crack (terminal die state) that might have forced the retirement of this die. At High R.3, the BD-3 is by far the most relatively "available" of the 12 die marriages known for the date. In true contrarian fashion, however, the BD-3's availability increases its intense demand, stemming from first-year-of-type collectors, early gold specialists, and many other factions of the collecting community.

This Choice AU NGC example with CAC endorsement displays only minor traces of friction on the high points of each side, but traces of luster remain around the devices. The surfaces are bright yellow-gold save for reddish device outlines. There are minimal abrasions: The only mark of any merit is a curved lint mark in the lower right obverse field. Some strike softness appears in the centers, and no adjustment marks are evident. NGC ID# 25ND, PCGS# 8066, CoinPlex ID# E5M1795SMEAG

1795 Capped Bust Right Five, MS61 Small Eagle Reverse, Rare BD-4 Variety

5860 1795 Small Eagle MS61 PCGS. BD-4, R.5. Bass-Danreuther Die State c/a. Under the provisions of the Mint Act of 1792, the assayer and the chief coiner were required to post bonds of \$10,000 dollars before they could begin working with precious metals. This was an enormous sum in the 18th century, and neither Assayer Albion Cox nor Chief Coiner Henry Voigt could afford to post such an amount when the Mint opened in 1792. This caused a delay in the coinage of business-strike gold and silver coins, until the amount of the bonds was reduced by Congress in 1794. Accordingly, silver coinage began in earnest in 1794, and gold coinage commenced in 1795.

A small mintage of 8,707 half eagles was accomplished in 1795 using the Small Eagle reverse design. There are 12 different Small Eagle die varieties known for the date. A few years later, probably in 1798, some 1795-dated obverse dies were matched with Heraldic Eagle reverses to create three die varieties of that design. The present coin is a representative of the rare BD-4 variety, identified by the position of star 11 joining Y in LIBERTY, and the three berries in the wreath on the reverse. The BD-4 variety probably accounted for 1,000-1,500 pieces of the reported mintage, with a surviving population of 60-75 examples in all grades.

This delightful Mint State specimen displays pleasing yellow-gold surfaces that show only minor signs of contact. The design elements are well-detailed, with just a touch of softness on the centers. Vibrant mint luster adds to the excellent visual appeal. This coin will be a welcome addition to a fine collection of early gold. Population: 19 in 61, 35 finer (11/12).

From The Dr. James Olsen Collection. PCGS# 8066, NGC ID# 25ND, CoinPlex ID# E5M1795SMEAG

1795 Small Eagle Five Dollar, MS65 Prooflike BD-6, The Finest Certified Prooflike Example

5861 1795 Small Eagle MS65 Prooflike NGC. BD-6, R.5. S over D. Bass-Dannreuther Obverse Die State d / Reverse State d. This wonderful coin is a certified Gem Prooflike specimen of the popular 1795 Small Eagle five dollar *Guide Book* variety. These coins are extremely important as the first gold coins of any denomination struck at the U.S. Mint, and specialists and type collectors alike accordingly pursue them with inordinate zeal. On this specific BD-6 die pairing, the 1 in the date is slightly to the right of and not touching the lowest curl of hair, while star 1 shows a single point touching the back portion of that same curl. The flag of the 5 overlies the drapery at the bust truncation. The 1, 7, and 5 in the date are much taller than the 9. The 15 Star obverse has the stars arranged 10 and 5 (as on all 1795 Small Eagles). A single point of star 15 touches the forepart of the bust, and a point of star 11 nearly touches the Y in LIBERTY.

The reverse is easily identified by the S/D in STATES, making this a popular variety if not necessarily one that carries any added hefty premium; this is due to the issue's popularity overall (regardless of the particular variety) as a first-year type coin. The blundered reverse die was first used on the exceedingly rare (8-12 known) BD-5, in conjunction with a different obverse, and then the reverse was reused on the BD-6.

The reverse die of this variety, and to a lesser extent the obverse, shows numerous blundered "scoop marks" through the dentils. John Dannreuther writes about the BD-5 pairing:

"This reverse (and obverse) also was the inspiration for a new theory about how the dentils were produced on early U.S. coinage dies. Previously, researchers have assumed that the dentils, the teeth-like objects around the periphery of coins, were simply punched into the dies using either a single punch or a gang punch. A punch likely was only the first tool used, as each dentil seems to have been finished by scooping or engraving these ornaments. In fact, the drunken die cutter theory for this reverse (and obverse) may be true!"

Dannreuther continues in the same vein in a footnote about the Mint providing money for a daily beer allotment.

The combination of the various "scoop marks" on both sides of the present BD-6 variety, the blundered S/D on the reverse, and the advanced die states on both sides combine with the needle-sharp strike, prooflike surfaces and marvelous preservation to create a coin that is among the most fascinating artifacts of early U.S. Mint production.

The obverse shows "scoop marks" on dentils on each side of the L in LIBERTY, and from that further to the right, a small, wispy die crack connects with IB. At least 13 dentils on the obverse show scoop marks or similar anomalies. Another thin die crack runs from the rim to the drapery near star 15. Another crack runs from the rim to an outer point of star 4, and there appear to be a couple of small cracks starting to form near the centering dot in Liberty's hair.

The reverse shows even more goofs and blunders, with several of the scoop marks quite lengthy and sometimes joining with letters about the periphery: above D; a couple between (E)D and S(T); two each above TE(S); four above the last S; two long, curving ones between OF and A; one each on either side of the I in AMERICA. Complementing these blunders and the S/D are die cracks — some light, some heavier — connecting many of the letter tops.

Besides the 1795 Small Eagle fives, the *Guide Book* also lists the anachronistic 1795 Heraldic Eagle (or Large Eagle) reverse half eagles — which in all likelihood were made in 1798, along with the Heraldic Eagle reverse 1797 7/5 overdate, the 1797 16 Star obverse, and the 1797 15 Star obverse varieties. Furthermore, all of the latter varieties' mintages are thought to be included in the figure of 24,867 half eagles manufactured for the year 1798.

As noted, the 1795 Small Eagle five dollar coins were the first gold coins of any denomination produced by the fledgling U.S. Mint. They were produced in the Mint's third year of operations after the first year, 1793, saw only copper cents and half cents produced, and the second year, 1794, saw the striking of the first silver coins as well as more copper. That the gold coinage was delayed to the third year is attributed to the onerous requirement for the assayer, chief coiner, and treasurer to post surety bonds of \$10,000 each. The gold coins were struck only after the figure was reduced and the bonds posted.

The Bass-Dannreuther *Early U.S. Gold Coin Varieties* lists an even dozen die pairings for the 1795 half eagles, a number that differs from some earlier studies suggesting 14 or even 16 1795 Small Eagle marriages. Of those dozen die marriages, their rarity factors range, according to Bass-Dannreuther, from High R.3 (175-225 known) for the BD-3 — by far the most available — to numerous ranked R.5, including the present BD-6 example, estimated at 60-80 surviving in all grades. At the extreme end of the rarity rankings, there are three die marriages of the 1795 Small Eagle rated at least R.7 (8-12 known), with one, the BD-11, rated High R.7 at 3-5 known.

Of course, if one adds the conditional rarity of this Gem Prooflike specimen to its rarity ranking, it increases exponentially. NGC has certified five non-Prooflike examples of the 1795 Small Eagle, all varieties, in MS65, with a single MS66 finer. **Among Prooflike examples, this is the sole finest certified and only Gem Prooflike specimen at NGC.** PCGS has certified two Gem non-Prooflike examples as the finest. The possibility of duplications in the data is highly likely.

This coin sparkles with mirrorlike fields on both sides. The greenish-gold surfaces are free of significant contact marks, although a small area of wispy lines appears near the obverse rim at stars 4 and 5. The strike is full throughout or virtually so, with amazingly well-detailed design elements on each side. There are no visible planchet adjustment marks anywhere, furthering the amazing appeal.

This coin is sure to elicit immense collector interest, given its historicity and incredible desirability. Census: 1 in 65 Prooflike, 1 finer (12/12). PCGS# 78066

1795 Capped Bust Right Half Eagle, MS62 Rare Large Eagle Type, BD-15 Only Three Finer Coins at PCGS

5862 1795 Large Eagle MS62 PCGS. BD-15, High R.5. Bass-Dannreuther Die State c/c. In the early days of the U.S. Mint it was common practice to preserve coinage dies that were still fit for service at the end of the year for use in future years. Three 1795-dated obverse dies were preserved in this manner, and combined with two Heraldic Eagle reverse dies to produce three die varieties of 1795 Heraldic Eagle half eagles. These coins were probably actually struck in 1797 or 1798. There were 12 varieties of 1795 Small Eagle half eagles produced in 1795, so the Heraldic Eagle varieties are listed as BD-13, BD-14, and BD-15 in the Bass-Dannreuther series reference.

The present coin is an example of the BD-15 variety, with a low 9 in the date, and the foot of the first A in AMERICA atop the fourth wing feather on the reverse. The BD-15 is seen more often than the other two Heraldic Eagle varieties, but it is still quite rare, with a surviving population of 30-35 examples in all grades. There are no recorded mintage figures for the issue, but the BD-15 probably had a production total of 500-1,000 pieces.

The 1795 Heraldic Eagle half eagle has always been highly regarded by numismatists, and early catalogers noticed the varieties by the early 1860s. An example in the Sixth Semi-Annual Sale (W. Elliot Woodward, 3/1865) was described as:

"1795 With the large eagle, rev. of 1798; in splendid uncirculated condition; of the highest rarity."

This early auction citation might well be an early appearance of the coin offered here, as few high-quality specimens are known. The lot realized \$37.50 to George Seavey, a strong price at the time. The popularity of the 1795 Large Eagle five has steadily increased over the years. Recent auction sales include the impressive MS62 PCGS specimen in lot 4839 of the FUN Signature (Heritage, 1/2012), which realized \$149,500.

This attractive MS62 specimen was struck from a late state of the dies, with a number of die cracks evident on both sides. The cud above TE of STATES had not yet formed when this piece was struck, however. The design elements are well-detailed, showing just a touch of softness on the eagle's head and Liberty's hair. The lightly marked greenish-gold surfaces display prooflike reflectivity in many areas. We expect intense competition from early gold specialists when this lot is called. Population: 8 in 62, 3 finer (11/12).

From The Dr. James Olsen Collection. PCGS# 8075, NGC ID# 25NK, CoinPlex ID# E5M1795LGEAG

1797 Small Eagle, 15 Stars Five Dollar Extremely Rare BD-2, AU Details

5863 1797 Small Eagle, 15 Stars — Repaired — NGC Details.
AU. BD-2, R.7. Bass-Dannreuther Die State b/d, the reverse with bisecting crack and a further crack down that would reach the rim if not for apparent smoothing in the area. The repair on the obverse of this bright yellow-gold coin is far more obvious, a dull patch tucked behind Liberty's head. Even with the obviousness of the repair, the sheer rarity of any 1797 half eagle — all die pairs range from unique to “merely” very rare — renders any survivor a prize, no matter the condition. For reverse-up display in particular, this coin in a near-terminal die state has plenty to offer.

From The Richmond Hill Collection. NGC ID# 25NF, PCGS# 8069, CoinPlex ID# E5M1797MEAG15ST

1797 Capped Bust Right Half Eagle, AU50 Celebrated Rare Early Date BD-3 Variety, 16 Stars

5864 1797 Small Eagle, 16 Stars AU50 PCGS. BD-3, R.6. Bass-Dannreuther Die State a/c. The reported mintage of half eagles for 1797 was a meager 3,609 pieces, with four die varieties known for the date. The 1797 is known in two obverse subtypes, one with 15 stars and the other with 16 stars, reflecting the admission of Tennessee to the Union on June 1, 1796. All varieties are very rare, with one, the BD-4, currently considered unique. The present coin represents the more available BD-3 variety, with a 16 star obverse and the two berries outside the wreath on the reverse. Calling the BD-3 "available" is quite deceptive, as the surviving population numbers no more than 20-25 pieces in all grades. This variety probably accounted for 1,000-1,500 pieces of the reported mintage, based on the number of survivors known today.

The rarity of the 1797 half eagle was appreciated by collectors at an early date, and the two obverse subtypes were recognized by catalogers from the earliest days of the hobby. An example of both types appeared in the Sixth Semi-Annual Sale (W. Elliot Woodward, 3/1865), where lots 2748 and 2749 read:

"2748 1797 Small eagle; rev. fifteen stars; fine and excessively rare.

"2749 1797 Sixteen stars (small eagle reverse); exceedingly fine, and as rare as the last."

Woodward's curious wording makes it seem as if the 15 stars were located on the reverse on the coin in lot 2748, but this is undoubtedly just a lapse in grammar, as none of the varieties are known with reverse stars. Lot 2748 realized \$22 to Mendes I. Cohen, and lot 2749 brought \$25 to J.O. Emery. The 1797 16 Stars half eagle appears at auction less than once per year, on average, and each appearance inspires intense competition from date, type, and variety collectors. Recent sales include the attractive AU53 NGC example in lot 4700 of the Summer FUN Signature (Heritage, 7/2011), which realized \$132,250.

The coin offered here is a lightly circulated example from a late state of the dies. An extensive network of die cracks is evident on the reverse, including the four major cracks detailed in the Bass-Dannreuther reference. The reverse die was close to failure when this coin was struck. The design elements are well-detailed, showing only light wear on the devices, and the pleasing greenish-gold surfaces retain traces of original mint luster. A few minor contact marks are consistent with the grade. Population: 1 in 50, 9 finer (11/12). PCGS# 8068, NGC ID# 25NF, CoinPlex ID# E5M1797SMEAG

1798 BD-4 Half Eagle, AU58
Usual Reverse Rim Breaks

1800 BD-2 Half Eagle, MS61
Late Die State

5865 1798 Large Eagle, Small 8 AU58 NGC. BD-4, R.4. Heavy rim breaks along the upper reverse border immediately identify this variety, one of the plentiful 18th century gold die marriages. About 100 examples are known over a wide range of grades from worn to Mint State. This near-Mint specimen will make a nice addition to an advanced cabinet or type set. Although weakly detailed at the centers, the peripheral elements are sharp. The impression is nicely centered, and the surfaces are pleasing with minimal handling marks. The fields of this brilliant yellow specimen are mildly reflective. Census: 18 in 58, 15 finer (11/12). NGC ID# 25NP, PCGS# 8079, CoinPlex ID# E5M1798LGEAGS8

5866 1800 MS61 NGC. CAC. Breen-6438, BD-2, High R.3. Bass-Dannreuther Die State c/d. The obverse has a light crack through IB that continues to the base of E and R. The reverse has clash marks with delicate die cracks from the border to both wing tips. Four of the five 1800 half eagle varieties are from a single obverse die with a Blunt 1 date. The space between clouds 4 and 5 is below the right edge of the upright of the E in STATES on this variety. That cloud space is farther left on all other reverse dies mated with this obverse.

This pleasing Mint State specimen has brilliant orange-gold surfaces with satin luster and pleasing surfaces showing only minimal marks. Slightly weak at the center as usual. Census: 39 in 61 (1 in 61+), 59 finer (11/12), for all 1800 varieties. NGC ID# 25NW, PCGS# 8082, CoinPlex ID# E5M1800

1803/2 Half Eagle, MS62
BD-4, Bright Yellow-Gold Surfaces

5867 1803/2 MS62 NGC. CAC. BD-4, R.4. Obverse State c / Reverse State c. There are four die marriages of 1803/2 half eagles, but BD-4 is immediately identifiable by the presence of a right foot on the T in LIBERTY. The left foot on the Y is defective, but this cannot be used as a diagnostic, since the other obverse die (for BD-1 through BD-3) shows the same characteristic. This bright, yellow-gold example is well struck aside from the left border of the shield. The reverse is fully lustrous, and the fields show only minor contact. A solitary faint vertical mark on the cheek can only be seen beneath a loupe. A desirable example of this elusive Heraldic Eagle date.

In this late but not terminal die state, the crack connecting the digits of the date extends nearly to star 1. Other cracks are noted through LIBER and joining stars 1-6. NGC ID# 25NY, PCGS# 8084, CoinPlex ID# E5M1803OVR2

1804 Small 8 Five Dollar, MS62
BD-1, Attractive, Well-Struck Example

5868 1804 Small 8 MS62 PCGS. CAC. BD-1, High R.4 The Small 4 obverse, which comes with two different reverses. BD-1 is identified by a long, straight die line from the left shield tip to the eagle's beak. BD-1 was struck earlier than BD-2, since the vertical die crack through the 0 in the date is light on BD-1 and heavy on BD-2. Unlike the earlier die state Bass specimen, the present piece exhibits a relatively large cud over the T in UNITED. The strike is crisp, since only the left (facing) claw is soft. Minor adjustment marks cross the high points of the lower shield, as made. A smooth and slightly subdued canary-gold example without identifiable pedigree markers aside from a short, hair-thin scratch between the cap and obverse star 5.

Ex: FUN Signature (Heritage, 1/2007), lot 3503. PCGS# 8085, NGC ID# 25P2, CoinPlex ID# E5M1804

1805 BD-3 Half Eagle, MS62
Early Die State

1808 Capped Bust Left Five, MS63
Popular BD-3 Variety

5869 1805 MS62 NGC. BD-3, R.5. This early die state shows evidence of denticles at the upper reverse, where a narrow rim break is normally seen, above and right of the final S.

Prior to the publication of *Early U.S. Gold Coin Varieties* in 2006, there was considerable confusion surrounding the half eagle die varieties of 1805 and 1806. Some coins were routinely offered as “new varieties” because they didn’t match anything in Walter Breen’s 1960s-era monograph. One later author described seven 1805 half eagle varieties, and noted that five of those seven were unlisted in Breen. Finally, using the observations of Harry Bass, John Dannreuther correctly published the five known varieties in his 2006 reference, creating order out of chaos. All that remains is an accurate condition census for the early gold coins.

This lovely Mint State piece has mostly sharp details, showing weakness only at the root of the left (facing) wing near the shield. Both sides have reflective fields with brilliant yellow surfaces and faint splashes of powder-blue toning. Census: 39 in 62, 44 finer (11/12), for all varieties. NGC ID# 25P4, PCGS# 8088, CoinPlex ID# E5M1805

5870 1808 MS63 PCGS. BD-3, R.4. Bass-Dannreuther Die State b/e. A substantial mintage of 55,578 half eagles was accomplished in 1808. Including overdates, there are four die varieties known for the date. The present coin represents the BD-3 variety, identified by the Normal 5D in the denomination. The BD-3 is a scarce variety, with a surviving population of 100-125 examples in all grades. The BD-3 probably accounted for 10,000-15,000 pieces of the reported mintage.

This impressive Select specimen is sharply detailed, with clash marks on both sides that identify a late state of the dies. The light orange-gold surfaces are brightly lustrous and show only a few minor contact marks. Eye appeal is outstanding. Population: 17 in 63, 16 finer (11/12). PCGS# 8102, NGC ID# 25PA, CoinPlex ID# E5M1808

1808 BD-3 Half Eagle, MS64
Only Two Finer PCGS Coins

5871 1808 MS64 PCGS. Close 5D, Breen-6456, BD-3, R.4. This variety has confused many notable numismatists over the past century. Part of the reason is its similarity to BD-2, which shares the same reverse die. One way to tell the two varieties apart is to examine the exact center of the obverse. BD-3 shows a tiny dot, probably from a compass point when the die was first laid out. BD-2 instead has a small incused circle in the same location. BD-3 and BD-4 use the same obverse die, further complicating matters. Clapp and Newcomer failed to collect or designate BD-3, but Edgar H. Adams noted it as his number 3. Breen (1966) listed two 1808 die pairs, 3-A and 4-A, that each turned out to be different die states (unclashed and clashed) of BD-3. Miller (1997) continued Breen's error, as Bass' research was yet unpublished. The present piece is in the unclashed die state, which Dannreuther catalogs as Obverse State a and Reverse State d.

This boldly struck near-Gem has original green-gold toning with hints of peach across the open fields. The surfaces are impressively smooth, and in fact the only feature that can be used for pedigree purposes is a tiny area of dark toning near the left foot of the I in UNITED. Unquestionably among the finest known 1808 BD-3 half eagles.

PCGS reports 14 pieces certified as MS64, with two finer (11/12). However, these figures combine BD-3 and BD-4 examples, and there may be resubmissions as well.

1811 Small 5 Half Eagle, BD-2, MS63
Attractive, Conditionally Scarce Example

5872 1811 Small 5 MS63 NGC. BD-2, R.3. Bass-Dannreuther Die State d/a. The half eagles of 1811 fall neatly into two obverse categories — Tall 5, Small 5 — and the reverses are monogamously paired to each obverse, showing minor differences of the fletchings in relation to the denomination. The Small 5 reverse, as here, shows the point of the fletchings positioned midway across the flag of the 5. The Small 5 half eagle is among the more frequently seen issues from the decade of the 1810s, making it a popular choice for type purposes. This Select Mint State example shows dominant golden-yellow color with some deeper tinges of lilac on the high points. A couple of shallow linear scrapes appear in the left obverse field, before Liberty's mouth. The reverse is somewhat softly struck on the eagle feathers but shows few signs of contact. Census: 25 in 63, 21 finer (11/12).

From The Flagg Family Collection. NGC ID# 25PH, PCGS# 8109, CoinPlex ID# E5M1811

1812 Capped Bust Half Eagle, BD-1, MS62
An Excellent Type Coin

5873 1812 MS62 PCGS. CAC. BD-1, R.3. Wide 5D. The feather tip is positioned over the right edge of the flag of the 5, and the D is wholly under the branch stem (BD-2, Close 5D, has the D mostly under the arrow feather). BD-1 is the more available of two die pairs for the year, though still scarce in an absolute sense.

The semibright yellow-gold surfaces of this MS62 example display nearly full luster. Strong dentilation is apparent on both sides, and the design elements are well-centered on the planchet. The obverse design detail is strong, while a few areas on the reverse are not fully brought up, not uncharacteristic of the type. Some short, light adjustment marks are visible at URIB on the reverse ribbon. A few minute marks scattered about are inconsequential. Interestingly, the curved die line mentioned by Dannreuther and Bass (2006) that runs through the horizontal shield lines and ends in the left (facing) wing on many specimens of this variety is present on this coin.

This is a terrific-looking coin that will fit comfortably in a high-grade type collection. As such, it is worthy of a generous bid. PCGS# 8112, NGC ID# 25PL, CoinPlex ID# E5M1812

Select 1813 Half Eagle, BD-1
First Year With Small Bust

5874 1813 MS63 PCGS. BD-1, R.2. Bass-Dannreuther Die State a/a. The obverse of the half eagle was redesigned in 1813, with the bust slightly smaller to allow the stars to be arranged in a continuous arc, instead of being broken up by the portrait. A substantial mintage of 95,428 half eagles was achieved, with two die varieties known for the date. This coin is an example of the more available BD-1 variety, with the Sin STATES positioned over the right side of E in the ribbon. The surviving population probably includes 450-650 examples in all grades, and the BD-1 dies were used to strike 60,000-75,000 pieces of the reported mintage.

This impressive Select specimen exhibits sharply detailed design elements and vibrant mint luster over lightly marked orange-gold surfaces. The 1813 is always popular with type collectors, as one of the few available issues of this important design type. Population: 66 in 63 (1 in 63+), 52 finer (11/12). PCGS# 8116, NGC ID# 25PM, CoinPlex ID# E5M1813

LIBERTY HALF EAGLES

Top-Notch 1839-C Half Eagle, MS62
The Garrett Collection Example
Among the Last Designs of
Christian Gobrecht?

5875 1839-C MS62 PCGS. Ex: Garrett. Only a single die pair was required to strike the 1839-C half eagles, in an amount of 17,205 pieces. The 1839-C half eagles form a one-year type along with their Dahlonega cousins, the only Liberty Head fives with the Obverse Mintmark motif. (The 1838 branch mint half eagles are also a one-year type, with the Classic Head Obverse Mintmark style.) But notice that the portrait of Liberty and subtle details of the reverse eagle design on the 1839-dated coins also differ from the 1840-dated pieces.

Numismatic researcher John Dannreuther has written a thought-provoking article published in 2009 on the PCGS website, titled "Robert Ball Hughes: More Than a Coin Designer?" Dannreuther believes that the 1839 half eagle designs were among the last of Christian Gobrecht.

It was certainly not hyperbole to call this piece one of the finest known 1839-C half eagles, although we believe the MS62 grade is accurate. The surfaces show a deep reddish-orange color with minor hints of lilac, and the portrait shows accents of lighter golden-yellow. The luster thins slightly in the fields, but there is no trace of surface friction. The reverse is remarkably well-struck, and the central obverse as well, although some of the stars ringing the obverse rim are incomplete. Population: 2 in 62, 3 finer (11/12).

Ex: *Garrett Collection Part I* (Bowers and Ruddy, 11/1979), lot 480. PCGS# 8192, NGC ID# 25S8, CoinPlex ID# L5M1839C

1841 Five Dollar, MS64
Scarce Early P-Mint

5876 1841 MS64 NGC. Ex: Freedom Collection. This is a flashy yellow-gold near-Gem, boldly struck with a bright semiprooflike sheen on both sides, showing only a few tiny marks in the field areas. The 1841 half eagle, with just 15,800 pieces struck, is an issue that can only infrequently be located in any condition. Some numismatists believe the 1841 Philadelphia issue is scarcer than its counterparts from Charlotte and Dahlonega, and population data from NGC and PCGS would seem to confirm that opinion. This piece, like the handful of other Uncirculated coins known, probably originated from a small hoard discovered in the early 1950s. Its desirability as one of the finest-known 1841 fives is almost matched by its importance as a high-grade No Motto type coin. Census: 7 in 64, 1 finer (10/12).

Ex: *FUN Signature* (Heritage, 1/2007), lot 3546. NGC ID# 25SN, PCGS# 8202, CoinPlex ID# L5M1841

Mint State 1842-C Large Date Half Eagle Far More Boldly Struck Than Normal

5877 1842-C Large Date MS61 PCGS. CAC. Variety 1. Die State I. No crumbling appears at ST on the reverse, which characterize the Die State II coins. Both the 1842 Philadelphia and 1842 Charlotte half eagle issues had mintages of around 27,000 circulation strikes, with Dahlonega making a large production of nearly 60,000 pieces and New Orleans the smallest, at 16,400 coins. Several varieties appear among the half eagle issues of the year, due to variations in the size of the lettering on reverse and/or the date on the obverse. The 1842-C Large Date half eagle is seen more frequently than the 1842-C Small Date, but it is scarce in its own right. The finest known is the former Eliasberg Collection example, certified MS65 by NGC. Doug Winter estimates that seven to nine examples survive in Mint State, so the present MS61 PCGS example likely lies only slightly outside of the Condition Census. Full mint luster is present on surfaces that range from honey-gold at the rims to yellow-gold in the centers. Extensive scattered small yet minor marks, more prominent on the obverse, determine the grade. The strike, however, is far bolder than normal, and adds to the already significant eye appeal. Population: 1 in 61, 5 finer (11/12). PCGS# 8209, NGC ID# 25SW, CoinPlex ID# L5M1842CLD

1847-D Variety 20-I Half Eagle, MS63 Tied With One Other for Finest at NGC

5878 1847-D MS63 NGC. Variety 20-I. Previously Variety 17-I. The 1847-D is one of the plentiful issues in the Dahlonega half eagle series from a mintage of 64,405 coins, although high-grade specimens are rarely encountered. In fact, this piece and one other MS63 are the two finest that NGC has certified, and PCGS has also graded just two MS63 examples as the finest (12/12).

This piece is the usual late die state with a prominent die crack through the denomination, from the border left of the F, through that letter to the tops of IVE D and the period, back to the border over the final A in AMERICA. The surfaces of this beautiful Select Mint State specimen are brilliant yellow with satin luster and generally bold design features. A few scattered marks are consistent with the grade.

Ex: Stack's-Bowers (3/2010), lot 3756. NGC ID# 25TP, PCGS# 8234, CoinPlex ID# L5M1847D

1851-O Half Eagle, MS62
An Appealing condition Rarity

5879 1851-O MS62 PCGS. CAC. Variety 2. The New Orleans Mint resumed production of half eagles in 1851 after a four-year hiatus. Just 41,000 were struck, most of which entered circulation. Survivors are usually seen in Very Fine and Extremely Fine, and About Uncirculated pieces are rare. PCGS and NGC combined have seen a mere 10 Mint State pieces, most between MS60 and MS62.

The peach-gold surfaces of this MS62 example are generally well struck except for the usually seen softness in the hair below ER of LIBERTY and on the claws and arrow feathers. Unlike many examples that have a subdued appearance, this piece displays a more “vibrant” look with its rather nice luster. A few minute marks limit the grade, but these are not as numerous or detractive as normally seen on surviving examples. In sum, this is a nice looking, appealing coin. Population: 2 in 62, 2 finer (12/12). PCGS# 8249, NGC ID# 25U9, CoinPlex ID# L5M1851O

Near-Gem 1852-C Half Eagle
High-Grade Charlotte Gold

5880 1852-C MS64 NGC. Variety 1. The more common of two varieties for the year with the 1 in the date touching the truncation of the bust. The 1852-C half eagle is one of the few outlets available for truly high-grade Charlotte gold, though the inevitable pressure to resubmit in the hopes of winning the “upgrade lottery” makes the issue seem more available than it is; the *Census Report* lists nine certification events for the issue in MS64 and only one finer, and one can only guess as to how many of those events represent intact “slabs” today (11/12).

The yellow-gold color on this near-Gem has a touch of the antique. The luster offers a surprising amount of contrast between subtly frosted, well-defined devices and semireflective fields. Scattered light abrasions affect each side, but the collective appearance is well within the bounds of the grade. NGC ID# 25UB, PCGS# 8251, CoinPlex ID# L5M1852C

1860-D Variety 45-JJ Half Eagle, MS62 Only Two Finer PCGS Specimens

5881 1860-D Medium D MS62 PCGS. Variety 45-JJ. Variety 38-FF in the previous edition. This variety has a medium mintmark on the reverse and is attributed by the upright of the D situated over the VE of FIVE. The 1860-D is most often seen in Extremely Fine grades, and is more available in the lower levels of About Uncirculated than its small mintage of 14,635 would suggest. It is rare in high-end AU, and extremely rare in Mint State.

A relatively sharp strike brings out strong definition on most of the design elements, including all of the star centers and the hair at Liberty's forehead, areas that are sometimes weak. The usual softness occurs on the curl beneath Liberty's ear and on the eagle's neck feathers, and a scattering of light marks occasionally interrupts the luster flow. Overall, this coin radiates pleasing eye appeal. Population: 9 in 62, 2 finer (11/12). PCGS# 8286, NGC ID# 25VH, CoinPlex ID# L5M1860D

1867-S Half Eagle, AU58 Tied for Finest Certified

5882 1867-S AU58 NGC. With a mintage of 29,000 coins, the 1867-S half eagle is recognized as a scarce issue, and one that is usually found in worn condition, as nearly all of those freshly minted coins entered circulation. In fact, the average certified grade is just 36. Equally important is the high-grade population. The finest grade assigned by NGC or PCGS for the 1867-S half eagle is AU58. This piece is equal to the best coins ever certified, and only five have been graded this high at both services. This lovely specimen has brilliant yellow surfaces with nearly full satin luster and trivial surface marks. The strike is a trifle weak, but that is typical of all surviving specimens. Here is an extremely important opportunity for the advanced collector. Census: 3 in 58, 0 finer (11/12). NGC ID# 25W4, PCGS# 8314, CoinPlex ID# L5M1867S

PROOF LIBERTY HALF EAGLES

1862 Five Dollar, PR64 Ultra Cameo
Civil War Survivor With
Optimal Surface Contrast

5883 1862 PR64 Ultra Cameo NGC. As with all American gold proof issues dated 1862, the recorded mintage was 35 pieces for the half eagle, along with its sibling denominations from the one dollar gold through twenty dollar. These coins were likely all struck early in the year for assembly into sets, and it is possible that several examples of each denomination were melted later as unsold. It was certainly common Mint practice of the time, and it is noteworthy that Walter Breen provides an estimate of only 11 to 15 or so survivors for each denomination in his *Proof Encyclopedia*. While modern estimates of survivorship are slightly higher in some cases, they are not that far from his estimates of nearly 25 years ago (1989).

The year 1862 was noteworthy, of course, for the bloody, disastrous Civil War that raged in the East and South. The year was one in which much of the American populace went from believing the war would soon end to believing that the conflict would be epic and horrific, which it unfortunately did turn out to be. A consequence was that gold and silver coins (first) were hoarded, then minor coinage altogether; paper currency, private scrip, encased postage currency, and merchant tokens had to fill the void.

It may have been that as the political scenario worsened so dramatically during the year, many American collectors decided they simply had better things to do with their money than tie up five or ten or twenty dollars on a current proof gold coin from the U.S. Mint in Philadelphia — leaving the Mint with unsold coinage at year-end.

The date 1862 on the present PR64 Ultra Cameo half eagle is small, but it is deeply impressed into the die. The strike itself is quite bold on this near-Gem, close to full save for a hint of softness on Liberty's forelock and hair below the coronet. Deep field-device contrast occurs over bright yellow-gold surfaces, and pronounced die striations appear in the fields on each side. Census: 3 in 64 Ultra Cameo, 2 finer (11/12).

From The Dr. James Olsen Collection. PCGS# 98452, CoinPlex ID# L5P1862DC

Select Cameo Proof 1867 Half Eagle Early With Motto Issue

5884 1867 PR63 Cameo PCGS. The official proof mintage of 50 specimens was the highest for the denomination for two years around, but Garrett and Guth note that the number of survivors is comparable to that for the surrounding years. This Select Cameo coin has considerable contrast, more in the frosted devices than in the partly toned-over fields. Light hairlines and a scattering of contact marks contribute to the grade. Despite these faults, the coin remains pleasing to the unaided eye and a notable representative of an early With Motto proof half eagle issue. Population: 1 in 63 Cameo, 3 finer (11/12). PCGS# 88462, NGC ID# 28C4, CoinPlex ID# L5P1867CA

Top-Notch 1877 Half Eagle, PR65 Cameo Among the Rarest Gold Proofs of the 1870s

5885 1877 PR65 Cameo NGC. The 1877 half eagle proof is an issue that is exceedingly rare, surviving to the extent of less than 10 pieces in all probability, and that figure includes examples in the Smithsonian and ANS collections. The original mintage for the proofs of each denomination was 20 pieces (reportedly, at any rate), but today Garrett and Guth call the 1877 proof fives “a rarity of the highest magnitude.”

NGC currently shows only four grading events for the issue: this piece and one other in PR65 Cameo, along with a PR64+ Ultra Cameo and a PR66 Ultra Cameo. At PCGS four others appear, three in PR64, one in PR65 Deep Cameo. This makes a total of only eight submissions in all grades at both services combined, with some duplications likely.

As far as we can determine, the present piece represents the first auction appearance at Heritage of a proof 1877 half eagle since we began maintaining our Permanent Auction Archives in 1993. Several auctions of PR64 PCGS examples occurred between 1990 and 2002 at various other numismatic companies, including Stack’s, Bowers and Merena, and Superior, but none have occurred since 2002. Garrett and Guth, in the 2008 second edition of their *Gold Encyclopedia*, mention a 2005 auction of an uncertified proof that sold for \$51,750. PCGS CoinFacts shows no auction results at all.

Clearly, the 1877 half eagle is one that cannot be expected to appear at auctions even infrequently. The present PR65 Cameo NGC piece represents an opportunity for prospective bidders must make the most of the present opportunity to acquire one of the finest survivors of this extremely rare issue. Ample luster and a sharp strike appear over peach-gold surfaces with blatant field-device contrast. There are no overt marks, but magnification reveals a couple of almost imperceptible straight slide marks on the high points of Liberty’s cheek. A tiny dark fleck near the rim at star 13 provides a pedigree marker. The surfaces display a moderate orange-peel effect. A bit of strike softness occurs on the high points of Liberty’s hair, and correspondingly on the reverse on the arrow fletchings. These are minor quibbles, however, that do nothing to diminish either this coin’s rarity in the marketplace or its desirability to collectors. Census: 2 in 65 Cameo, 0 finer (11/12).

From The Dr. James Olsen Collection. NGC ID# 28CE, PCGS# 88472, CoinPlex ID# L5P1877CA

1885 Half Eagle Superb Gem Proof Ultra Cameo Tied for Finest Certified

5886 1885 PR67 Ultra Cameo NGC. The 1885 half eagle saw a proof mintage of 66 pieces, complementing a healthy quota of more than 600,000 business strikes. Nonetheless, far fewer proof examples survive today than the production total suggests. Walter Breen wrote in his 1989 *Proof Encyclopedia* that “[the issue is] extremely rare, more so than its mintage suggests; enough so as to be almost a forgotten coin.” He provided no estimate of survivors beyond writing the issue was rarer than the 1885 quarter eagle, of which he estimated 30 proofs survive.

Two decades later, in 2008, Jeff Garrett and Ron Guth had lowered the estimated survivors even further, commenting, “There are perhaps 20 or so examples known. Many coins of the original mintage probably entered circulation or were melted as unsold.” Their estimate also includes the two proof coins in the Smithsonian, which would leave only 18 or so available to collectors.

As in so many other cases, the certified populations do little to add clarity to the situation, as the combined total of 40 unimpaired proofs at NGC and PCGS combined appear overblown with duplications.

In any case, the present Superb Gem Ultra Cameo proof is one of six such submissions at NGC, and there are none finer, making this piece tied for the highest graded at either service (11/12). (The finest Deep Cameo at PCGS is a sole example in PR65.) The viewer is greeted by a blatant display of contrast on each side of this piece, producing a “gold on black” effect. There are no mentionable signs of contact, although a few faint field hairlines appear under a loupe, intermingled with abundant orange-peel texture. For pedigree purposes we mention a tiny planchet defect, as made, on Liberty’s chin.

From The Victoria Rose Collection. NGC ID# 28CN, PCGS# 98480, CoinPlex ID# L5P1885DC

INDIAN HALF EAGLES

Near-Mint 1909-O Five Dollar
Beautiful Yellow-Gold Surfaces

5887 1909-O AU58 NGC. The 1909-O half eagle is an anachronism from the New Orleans Mint, the last O-mint issue in any gold series, and the only Indian Head five with the sought-after O mint-mark. The 1909-O half eagle is probably the series issue that is the best-known to casual collectors, if not necessarily the priciest or rarest in all grades. The 1909-O also wins the low-mintage sweepstakes for the set, struck in the amount of only 34,200 pieces. The color is beautiful yellow-gold, and only minor rub separates this piece from Mint State and a much-higher price. A nice collector-grade example of this issue, one always in hot demand.

From The Richmond Hill Collection. NGC ID# 25ZK, PCGS# 8515, CoinPlex ID# I5M1909O

1913-S Indian Half Eagle, Fabulous MS66 Ex: Price, O'Neal

5888 1913-S MS66 PCGS. The 1913-S Indian half eagle is one of the great condition rarities in the series. This specimen is the single finest example that PCGS has certified, with the NGC *Census Report* showing two submissions certified in MS66. When David Akers offered this 1913-S Indian half eagle, he called it “the second finest example of this issue that I have seen, surpassed only by the incredible Dr. Steven Duckor specimen I sold with his Indian Head Half Eagle collection in Auction ‘90.” The current specimen is the only MS66 PCGS coin with none finer, and it is even finer than the Duckor specimen, which has since been certified MS65 PCGS.

A large number of 1913-S half eagles have surfaced over the past decade, making the date appear more common than others in the series. However, nearly all of those coins are lower-grade pieces. The rarity of this issue in high grade remains considerable. Fuljenz comments in *Indian Gold Coins of the 20th-Century*:

“The 1913-S Half Eagle is usually seen in AU grades and it is scarce in the lower Uncirculated grades. It becomes extremely scarce in MS63 and it is very rare in MS65. Gems are extremely rare.”

Although the mintmark is a trifle weak on this specimen, it is still completely visible and actually looks like an S, rather than the usual blob of metal seen on most specimens. The strike is substantially sharper than usual for the issue. The surfaces have a few trivial marks and hairlines, but they are insignificant and clearly insufficient to lower the grade. The luster is remarkable, with lovely orange and yellow color on both sides. In its 1999 auction appearance, the cataloger used a single word to describe this specimen: Incredible.

An old provenance indicates that this example has only been offered publicly on two previous occasions, in 1998 and 1999. David Akers notes that Dr. Price acquired this piece from “an old-time collection that was assembled in the 1930s and 1940s and, until purchased by Dr. Price, it had been off the market for more than 40 years.”

Only three auction appearances have offered an MS66 1913-S half eagle, including the two previous appearances of this piece and the earlier appearance of the Duckor specimen in Auction ‘90. Behind those appearances are a small number of MS65 coins and several lower-grade pieces. When David Akers revised his *Handbook*, he recorded the 1999 auction appearance of this coin as the only MS66 coin in his record of Significant Examples. A roster of the finest specimens includes just two coins, the Duckor specimen and the Price specimen. The Duckor coin may now be one of the examples that is certified MS66 NGC, while the Price coin is offered here. Population: 1 in 66, 0 finer (12/12).

Ex: An old-time collection; Dr. Thaine B. Price Collection (David Akers, 5/1998), lot 32; Bowers and Merena (1/1999), lot 1447; Jim O’Neal Collection of \$5 Indians / FUN Signature (Heritage, 1/2011), lot 5149, where it brought \$218,500. PCGS# 8526, NGC ID# 25ZP, CoinPlex ID# 15M1913S

1914-D Half Eagle, MS65
Only Three or Four Finer

1915 Half Eagle, Seldom-Seen Gem
A Top-Notch Example

5889 1914-D MS65 PCGS. A review of our Auction Archives may prove to be misleading, as there are 10 auction appearances of this issue in the higher MS66 PCGS grade. However, those 10 appearances represent exactly two coins. One of those finer pieces realized \$52,875 in our August 2012 sale, and the other realized \$86,250 in our April 2010 sale. Five examples graded MS65 PCGS have appeared in our auctions, representing four different coins. The present specimen is a fifth example, with frosty gold luster, minimal surface marks, and excellent eye appeal. The strike is bold, including a strong mintmark. Wisps of pale blue toning appear on the brilliant yellow surfaces of this lovely Gem. Population: 13 in 65, 3 finer (11/12). PCGS# 8528, NGC ID# 28DV, CoinPlex ID# I5M1914D

5890 1915 MS65 PCGS. The 1911-1913 Indian half eagle issues from the Philadelphia Mint are each among the most available issues of the series up to the Gem level, a function of their overall high-quality production values. Most are well-struck with excellent luster over fine-grained surfaces. This 1915 half eagle in Gem condition shows many of the same qualities, but it is considerably more elusive in the MS65 grade than the dates mentioned above. The orange-tinted surfaces on this piece are exemplary: boldly struck with full glowing luster and only a few tiny marks away from the prime focal points. Population: 46 in 65 (3 in 65+), 0 finer (11/12). PCGS# 8530, NGC ID# 28DX, CoinPlex ID# I5M1915

PROOF INDIAN HALF EAGLES

Mint State 1929 Half Eagle
Depression-Era Melt Rarity

5891 1929 MS61 NGC. The mintage figure of 662,000 pieces given for the 1929 half eagle is as meaningless as its 1929-1932 counterparts in the double eagle series, as most of each of these issues were melted en masse within a few years of its production. Few circulated examples of the 1929 half eagle are known. The present MS61 NGC example offers far more eye appeal than the grade might imply. The antique-gold mattelike surfaces show a few scattered marks, including one singular triangle-shaped hit near the Indian's eye, but the color, bold strike, and engaging mint luster are all equally appealing.

From The Richmond Hill Collection. NGC ID# 2800, PCGS# 8533, CoinPlex ID# I5M1929

1910 Half Eagle, PR63
Roman Finish Format

5892 1910 PR63 PCGS Secure. The 1910 Indian half eagles set the mintage record for proofs within the series, at 250 pieces. However, most were probably melted as unsold at year's end. The 1909 and 1910 gold proof coinage was of the Roman or Satin Finish format, brighter than the dark sandblast or matte proofs that occurred at the inception of the new series in 1908. The 1910 today only survives to the extent of a few dozen pieces, roughly equal to other series issues with lower proof production figures. PCGS estimates that 60 to 75 examples survive of the 1910 half eagle, while they give a survival 70 to 90 for the 1912 matte proof, with a reported proof mintage of 144 pieces.

The present Select proof certified by PCGS is fully struck throughout, showing far more detail than most circulation strikes of the series will ever display. Note the complete tiny, intricate feathers on the forepart of the eagle's breast and the subtle detailing throughout the Indian's headdress. The surfaces are a bright lemon-yellow and the fields are lightly hairlined on each side, more noticeable on the reverse. Population: 4 in 63, 21 finer (11/12). PCGS# 8541, NGC ID# 280000, CoinPlex ID# I5P1910

EARLY EAGLES

1795 Eagle, AU Sharpness First-Year Type Coin, BD-1

5893 1795 13 Leaves — Reverse Repaired, Cleaned — NGC Details. AU. BD-1, High R.3. The BD-1 variety is identified by the position of star 11 close to the Y in LIBERTY, and the leaf nearly touching U in UNITED. The year 1795 saw the first coinage of gold denominations at the Philadelphia Mint, and a small mintage of 5,583 Capped Bust Right eagles was accomplished. The coins are prized by date and type collectors in all grades and conditions. Numismatists recognize five different die varieties for this issue, all of them High R.3 or scarcer. This coin represents the BD-1 variety, which is seen more often than any other variety of the year, but is still quite scarce in absolute terms.

This coin shows AU sharpness on the design elements but extensive repair is evident on the lower reverse surfaces, below the branch. The surfaces are a vivid greenish-gold color and retain much original mint luster. A still-attractive example of this important first-year issue. NGC ID# 25ZT, PCGS# 8551, CoinPlex ID# E101795

1795 Capped Bust Right Eagle, MS61 Sought-After First-Year Type Coin Popular BD-1, 13 Leaves Variety

5894 1795 13 Leaves MS61 NGC. BD-1, High R.3. Bass-Danneuther Die State b/a. The Philadelphia Mint produced ten dollar gold pieces for the first time in 1795, when a small mintage of 5,583 pieces was reported. Five die varieties are known for the date, all employing the Small Eagle reverse. The present coin represents the BD-1 variety, with the 5 in the date overlapping the bust, star 11 near Y in LIBERTY, and a leaf nearly touching U in UNITED on the reverse. This was the only use for the obverse die, but the reverse was used to strike the BD-2 variety of this year, as well. The BD-1 is an available issue in the context of the series, with a surviving population of 225-325 examples in all grades. From delivery records, it seems that the BD-1 accounted for at least 2,795 pieces of the reported mintage.

The eagles of 1795 were collected avidly from the earliest days of the hobby, and examples appeared at public auction as early as the A.C. Kline Sale (Moses Thomas & Sons, 6/1855), where the cataloger described the coin in lot 169 as a proof 1795 eagle. Undoubtedly the coin was a prooflike business strike, as no true proofs were produced until much later. Interestingly, this sale occurred three years before the Mint began its program of commercial proof set offerings, so the cataloger had probably seen only a few real proof coins and was unfamiliar with all the characteristics of proof issues.

This attractive Mint State specimen exhibits sharp definition on many of the design elements, with just a touch of the customary softness on the eagle's breast. The pleasing greenish-gold surfaces display bright satiny mint luster on both sides, with a scattering of minor contact marks that explain the grade. Visual appeal is quite strong, and we expect spirited bidding from type collectors and early gold specialists when this lot is called. Census: 21 in 61, 36 finer (11/12).

From The Dr. James Olsen Collection. NGC ID# 25ZT, PCGS# 8551, CoinPlex ID# E101795

1795 BD-1 Eagle, MS63 13 Leaves Reverse

5895 1795 13 Leaves MS63 PCGS. CAC. BD-1, High R.3. The U.S. Mint produced gold coins for the first time in 1795 starting with half eagles, beginning the ten dollar gold series in September. A modest mintage of 5,583 eagles dated 1795 was achieved during the fiscal year, with deliveries taking place from September 27, 1795, through March 30, 1796. Five different die marriages are known for the date, of which BD-1 is the most "common." The BD-1 obverse die is characterized by the closely spaced date, with the 1 close to the curl, and the tip of the 5 overlapping the bust. Star 11 is extremely close to Y in LIBERTY, and there are two lumps visible in the field near Y. The reverse die has 13 leaves in the palm branch, one of which nearly touches U in UNITED.

In *Early U.S. Gold Coin Varieties*, John Dannreuther estimates a total surviving population of 225-325 examples of the BD-1 variety in all grades. The date may be available in the context of early U.S. gold coinage, but it is scarce in absolute terms. In Choice Uncirculated grades, it is quite rare. NGC has certified only 12 coins at the MS63 level, with seven finer; PCGS has graded only 10 examples at the Choice level, with six finer (11/12).

The present coin is a fantastic representative of this historic date. The strike is admirable for such an early issue. Some softness is noted on the central details, but the peripheries are sharp, showing bold detail on the stars. The surfaces display thick mint frost with some semiprooflike areas in the reverse field. The surfaces are amazingly clean, displaying just a few field marks and tiny planchet flaws visible through a glass. A truly extraordinary prize for the type collector or early gold aficionado. PCGS# 8551, NGC ID# 25ZT, CoinPlex ID# E101795

1796 Small Eagle Ten, BD-1, MS61 Sole Die Pairing of the Year More Elusive Than the 1795 Issue

5896 1796 MS61 NGC. BD-1, R.4. The 1796 ten dollar gold pieces featured the Small Eagle reverse with the obverse stars arranged 8 left and 8 right, 16 in all. The die must have been prepared and the coins struck after June 1, 1796, when Tennessee became the 16th state to be admitted to the Union. (In contrast, all three known obverses for the 1795-dated eagles have 15 stars arranged asymmetrically, 10 left, 5 right, although some could obviously have been struck in the calendar year 1796.) It is interesting to ponder why the 1795-dated eagles show an asymmetrical star arrangement, while the 1796 is symmetrical; it would have been just as easy to arrange the stars 10 and 6 or 9 and 7.

The Small Eagle tens were produced only dated 1795, 1796, and 1797 before the reverse design was changed to the Large Eagle (Heraldic Eagle) motif for the remainder of the series, through 1804. John Dannreuther writes that the Small Eagle reverse coins were actually struck only from September 1795 until about June 1797. The 1796- and 1797-dated eagles, despite the published mintages, are seen far less frequently overall than the 1795 tens, of which five varieties are known.

This Mint State 1796 Small Eagle ten would make an excellent type coin for any collector who desires to find “something different” rather than the usual first-year 1795 type. This piece is boldly lustrous with yellow-gold accented by reddish patina around the device outlines and at the rims. A bold die crack vertically bisects the portrait of Liberty from above the cap to the bottom of the bust, and the crack from star 15 of state d runs to the rim, but none of the other cracks from that state appear. No obvious clashing or cracks appear on the reverse. This piece shows a few distributed marks and wispy scrapes that account for the grade, but there are no overly severe marks. No planchet adjustment marks appear on either side. This piece offers fantastic eye appeal overall, a super combination of rarity, quality, and historic interest.

From The Victoria Rose Collection. NGC ID# 25ZW, PCGS# 8554, CoinPlex ID# E101796

1797 Capped Bust Right Ten, BD-1, MS63
Rarest Small Eagle Date
Finest-Known Example, Ex: Amon Carter

5897 1797 Small Eagle MS63 NGC. BD-1, R.5. Bass-Dannreuther Die State b/b. The 1797 Capped Bust Right ten dollar gold piece is the rarest date of the short-lived Small Eagle design type. The Small Eagle reverse was only employed for three years, and David Akers opined, "...one could reasonably assume that the 1797 Small Eagle is nearly twice as rare as the 1796, and almost four times as rare as the 1795." Heritage Auctions is privileged to offer this magnificent MS63 example of a classic rarity, which we believe to be the finest-known specimen with no serious contender.

The year 1797 was a transitional one for the highest gold denomination, as the reverse was changed to the Heraldic Eagle motif later in the year. Thus the 1797 is the last issue of the Small Eagle type, an important consideration for advanced type collectors. Only a single die variety is known for the 1797 Small Eagle ten, designated BD-1 in John Dannreuther's *Early U.S. Gold Coin Varieties*, while the Heraldic Eagle design of that year boasts three different varieties. The 1797 BD-1 obverse is quite distinctive, crowding 12 of the 16 stars on the left side of the coin, with just four on the right. Two points of star 1 actually touch the 1 in the date, and the remaining left-hand stars are tightly spaced in an arc reaching the top of Liberty's cap.

The unusual 12x4 obverse stars arrangement was noticed by numismatists at an early date, and catalogers began to take notice of it as early as the John F. McCoy Sale (W. Elliot Woodward, 5/1864) where, judging from the description, lot 1932 might well be an early appearance of the present coin:

"1797 With small eagle reverse, four stars facing. This splendid piece is in almost proof condition and one of the rarest of the American gold series."

The lot realized \$51 to Mendes I. Cohen, the highest price paid for any early eagle in the sale. The 1797 Small Eagle consistently brings high prices in its infrequent auction appearances. Recent sales include the attractive MS62 NGC specimen in lot 1527 of the Old West and Franklinton Collections (American Numismatic Rarities, 8/2006), which realized \$276,000.

The mintage for the 1797 Small Eagle ten is recorded as a mere 3,615 pieces, but even this low production total may be too high. Die evidence shows that the reverse die was used first in 1796 to strike the early die states of the 1796 eagle. Then, the reverse die was combined with the 1797 obverse to strike the coins for that year. Afterward, the reverse was remarried with the 1796 obverse to produce the 1796-dated Bass-Dannreuther Die State d/c coins. Since some 1796-dated coins were minted after the 1797 issue, they may have been included in the mintage totals for the year. The 1797-dated eagles probably account for no more than 1,250 pieces of the reported mintage. PCGS currently estimates the surviving population at 50-60 pieces in all grades, which agrees closely with John Dannreuther's estimate of 55-65 coins still extant. PCGS has certified a total of 22 specimens, with a single example in MS60 condition, and the rest in circulated grades. NGC has recorded 28 submission events, with nine coins in various levels of Mint State, and this single MS63 example as the finest (11/12). These figures include an unknown number of resubmissions and crossovers.

The earliest appearance of the present coin that we can trace with any degree of certainty is lot 309 of the Belden Roach Collection (B. Max Mehl, 2/1944). Mehl described the lot as:

"1797 The extremely rare variety with small eagle on reverse. Eleven stars to left and four to right of bust. Beautiful uncirculated specimen with brilliant semi-proof surface, almost equal to a brilliant proof. Listed at \$175.00 in only very fine. This gem coin is worth at least double that."

Interestingly, Mehl counted the left-hand stars incorrectly, probably missing the first star that seems separate from the rest because it is joined to the date. Famous Fort Worth collector Amon Carter, Sr. purchased the coin for \$290, not quite as much as Mehl was hoping for, but still a strong price at the time. The coin remained in the Carter Family Collection for almost four decades, until that remarkable gathering was sold by Stack's in January 1984. It recently appeared in a flurry of Goldberg sales before being offered here by our present consignor.

This spectacular Select specimen is the single-finest certified example of this rare issue and it occupies the number one position in Anthony Taraszka's list of Significant Specimens. The design elements are well-detailed, with just a touch of softness on Liberty's hair and the eagle's head, as always seen on this issue. There is a prominent obverse die break from the rim at 4:30 into the field, almost to Liberty's throat. This crack is seen on the great majority of 1797 Small Eagle coins, but Harry Bass had one example that did not show the feature. The attractive yellow and greenish-gold surfaces display the prooflike luster mentioned in the description in the Roach catalog, with only minor signs of contact. A few interesting planchet adjustment marks, as struck, are evident on the bust. This coin possesses terrific eye appeal, the highest available technical grade, and great historical interest. As the finest-known specimen, it should find a home in the finest collection or Registry Set.

Ex: Belden Roach Collection (B. Max Mehl, 2/1944), lot 309; Amon Carter, Sr.; Amon Carter, Jr.; Amon Carter Family Collection (Stack's, 1/1984), lot 730; Ohringer Family Trust Collection (Ira and Larry Goldberg, 9/2008), lot 1272; Pre-Long Beach Sale (Goldbergs, 2/2009), lot 1521; Pre-Long Beach Auction (Goldbergs, 5/2009), lot 1324; Pre-Long Beach Auction (Goldbergs, 9/2010), lot 2962; Pre-Long Beach Auction (Goldbergs, 1/2011), lot 2174. NGC ID# 25ZX, PCGS# 8555, CoinPlex ID# E101797SMEAG

1797 BD-4 Eagle, AU58
Heraldic Eagle Design
Rare Perfect Reverse State

5898 1797 Large Eagle AU58 NGC. Breen-6834, BD-4, High R.4. Bass-Dannreuther Die State d/a. The obverse is always seen in this late die state with two cracks through the final 7 that have joined into a small die break at that digit. The reverse of this example is perfect and uncracked, and only a few examples are known in that early die state. The late Harry Bass had one example in this state, and another in the later die state with reverse die cracks. Another early state example is part of the ANS collection.

Although both sides exhibit trivial handling marks, this lustrous near-Mint specimen has brilliant green-gold surfaces with a nicely centered strike. An impressive example for the specialist or type collector. NGC ID# 25ZY, PCGS# 8559, CoinPlex ID# E101797LGEAG

BD-1 1798/7 Eagle, 9x4 Stars

5899 1798/7 9x4 Stars PCGS Genuine. BD-1, High R.4. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been repaired and cleaned. The obverse has many pinpoint marks, as sometimes seen on jewelry pieces, although there is no indication of solder or rim damage. Repaired near the first three obverse stars, and the left obverse field may have been whizzed. Bass-Dannreuther Die State c/b with a prominent vertical die crack through the cap and the L in LIBERTY. Both sides have noticeable luster, and as a representative of the sole 9x4 stars die marriage, an important survivor. PCGS# 8560, NGC ID# 25ZZ, CoinPlex ID# E10179879X4ST

1798/7 Eagle, 7x6 Stars, BD-2
Exceedingly Rare Variety

1801 Eagle, BD-2, Excellent for Type
Sharply Struck Mint State Example

5900 1798/7 7x6 Stars PCGS Genuine. BD-2, Low R.6. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been tooled and cleaned. In *any* condition the 1798/7 eagle with stars arranged seven left, six right is an issue that is exceedingly rare, with Bass-Dannreuther estimating that only 20 to 30 examples survive. Akers writes that this issue is second in rarity among 1795-1804 eagles only to the 1795 Nine Leaves. A wealth of pleasing detail remains on this piece, despite the smoothing that is more prominent on the obverse but seen on both sides, likely to remove larger signs of contact; smaller marks remain scattered about. The intermediate die state is interesting; several of the State b obverse cracks show, yet none of the cracks appear on the reverse through the tops of UN and TED. PCGS# 8561, NGC ID# 2622, CoinPlex ID# E10179877X6ST

5901 1801 MS61 NGC. BD-2, R.2. Bass-Dannreuther Die State a/a. The BD-2 eagle die pairing of 1801 is the most available among the early eagles, making it a target for type collectors. This Mint State example is from the scarcer prime die state on both sides, showing no evidence of clashing or die lapping. The bright, semireflective fields show areas of mint frost intermingled. The strike is uniformly sharp throughout, the surfaces showing exceptionally strong detail on both the hair strands and the eagle's feathers above the shield. The color is pale green-gold with a significant complement of light reddish patina. Accounting for the grade, the obverse fields show numerous small- to medium-sized marks, yet the reverse is surprisingly clean. NGC ID# 2627, PCGS# 8564, CoinPlex ID# E101801

1803 Capped Bust Right Eagle, MS63 Mysterious Extra Star Variety, BD-5 Only One Finer Coin at PCGS

5902 1803 Extra Star MS63 PCGS. BD-5, High R.4. Bass-Danneuother Die State g/b. The 1803 Capped Bust Right eagle claims a mintage of 15,017 pieces, with six die varieties known for the date. A single obverse was used to coin all six varieties, and the reverse is known in two major subtypes, one with small reverse stars and the other with large reverse stars. The coin offered here represents the very scarce BD-5 variety, showing large reverse stars and an intriguing small extra star imbedded in the last cloud.

Although this variety was known to earlier numismatists, the extra star was unnoticed until Harry Bass discovered it on a specimen he purchased in 1966. The reason for the extra star has never been satisfactorily explained. The BD-5 variety probably accounted for 3,000-5,000 pieces of the reported mintage, with a surviving population of 90-110 examples in all grades.

The present coin is an impressive Select specimen with well-detailed design elements that show just a touch of softness on the lower bust, possibly due to some planchet adjustment marks that are faintly visible at various angles in this area. The pleasing surfaces retain almost all of their original mint luster under attractive shades of orange-gold, olive, and rose patina. No large or distracting contact marks are evident, but a dent in the first strand of Liberty's hair, at the top of the neck, is mentioned for pedigree purposes. This coin will be a welcome addition to a fine collection of early U.S. gold. Population: 2 in 63, 1 finer (11/12).

Ex: Ohringer Family Trust (Ira and Larry Goldberg, 9/2008), lot 1277. From The Victoria Rose Collection. PCGS# 88565, CoinPlex ID# E101803XTRASTAR

LIBERTY EAGLES

1858 Eagle, Eye-Appealing AU53
Low Mintage of 2,521 Circulation Strikes

5903 1858 AU53 NGC. CAC. The 1858 eagle had a remarkably low production of only 2,521 circulation strikes. Garrett and Guth state that business strikes in AU are rare. The present AU53 example is one of four such at NGC, and 10 are finer. The typical circulated 1858 is heavily worn and/or abraded, usually no better than Choice XF. This piece is *far* nicer, with a bold strike and excellent eye appeal over the mostly yellow-gold surfaces that take on reddish-orange patina around the margins. Each side is peppered with numerous small marks, but the only abrasions worthy of individual note cross the end of the coronet and another above the eagle's head. Collectors seeking a new numismatic challenge might do well to consider the Type One (No Motto) eagle series.

From The Richmond Hill Collection. NGC ID# 263W, PCGS# 8625, CoinPlex ID# LTM1858

1869 Eagle, Reflective AU58
Only 1,855 Pieces Struck

5904 1869 AU58 NGC. Liberty Head eagle production was low from 1861 until the end of the 1870s. In 1869 Philadelphia minted just 1,830 business strikes. The rarity of this date is such that 1869-S tens with weak mintmarks have been offered as Philadelphia examples, though both issues are rare in all grades and virtually unknown in Mint State. Of the Philadelphia issue Garrett and Guth (2006) note that "Extremely Fine examples are very rare, and About Uncirculated examples are extremely rare."

This example displays uniform honey-gold color with a hint of cinnamon toning. As expected from the assigned grade, there are minor abrasions collected from the time in circulation, a short scratch above the date the most obvious. Even so this is an attractive coin, desirable both from the standpoint of rarity and as a representative from the historic but often troubled post-Civil War era of U.S. history. Census: 6 in 58, 1 finer (11/12).

Ex: Long Beach Signature (Heritage, 9/2008), lot 3895; Houston Signature (Heritage, 12/2008), lot 2137. NGC ID# 264R, PCGS# 8655, CoinPlex ID# LTM1869

1878-CC Liberty Eagle, AU50
Low-Mintage Branch Mint Key

5905 1878-CC AU50 NGC. Variety 1-A. One of the rarest issues of the series, the 1878-CC Liberty eagle claims a low mintage of just 3,244 pieces. As collecting large-denomination gold coins became popular only in the 1930s and collecting mintmarked issues was in disfavor until the 1890s, few examples of the 1878-CC were saved for numismatic purposes. Doug Winter estimates the surviving population at 45-55 examples in all grades, with most examples seen in the VF grade range.

This coin is a lightly circulated example with just a touch of wear on the well-detailed design elements. The still-lustrous orange-gold surfaces show a few minor abrasions, none large or distracting. This coin is a prize for the discerning collector of Western gold. Census: 6 in 50, 23 finer (11/12). NGC ID# 265K, PCGS# 8681, CoinPlex ID# LTM1878CC

Rare 1883-O Ten Dollar, XF45
Above-Average Surfaces

5906 1883-O XF45 NGC. Variety 1. A single variety is known. The 1883-O ten dollar, from a low mintage of just 800 pieces, is difficult to locate in any grade. Only 35 to 45 pieces are thought to have survived to the present day, mostly in Very Fine and Extremely Fine. This estimate more or less agrees with the 47 coins graded by NGC and PCGS, especially considering that a number of certified pieces are likely resubmissions.

Choice XF examples, such as the coin in this lot, are rare, and About Uncirculated coins are very rare. Only one specimen has been certified Mint State — an MS61 NGC example.

Both sides display an orange-gold hue laced with subtle hints of soft green. The design elements are relatively well-defined, probably slightly better than the typical example, which is poorly struck. More specifically, a few stars exhibit radials, and none can really be considered “very flat,” as usually seen. Most of Liberty’s hair is fairly strong, though that above the ear is weak. The reverse is uniformly sharp, which is typically seen. Most of the marks scattered about are minute, with only three or four more moderate-sized. The significant point here is that the surface marks are atypical, and *not* what gold specialist Douglas Winter (2006) says: “The surfaces are invariably covered with heavy abrasions ... planchet cracks or laminations.” Winter further states: “Any piece ... which is not covered with deep marks is extremely desirable and should command a strong premium over a typical unappealing example.” This is just such a coin. Census: 3 in 45, 14 finer (12/12). NGC ID# 2668, PCGS# 8701, CoinPlex ID# LTM1883O

PROOF LIBERTY EAGLES

1861 Eagle, Gem Cameo Proof Sole Finest Graded, Perhaps 10 Survive

5907 1861 PR65 Cameo NGC. Rounded hairbun. When Jeff Garrett and Ron Guth wrote the first edition of their popular *Encyclopedia of U.S. Gold Coins 1795-1933*, they stated that the 1859, 1860, and 1861 proof eagles all appeared to have “identical” survival rates, i.e., far lower than their recorded mintages of 80, 50, and 69 pieces, respectively. It is likely that only around 10 examples survive of each issue, including examples in the Smithsonian and the ANS collections.

Perhaps that figure, 10, marks the number of active proof gold collectors in America around 1860. The rest of the mintage may have been melted as unsold, common Mint practice at the time.

The 1861 proof eagle issue was, after all, struck a mere three years after the Mint began public marketing of proof coins for sale to collectors rather than as delicacies for the well-connected, and there were not yet many collectors who were interested in plunking down large sums of money for proof examples of the current year’s coinage. It was an era when collecting Washingtonia and Colonial coinage was in vogue, as well as that of the ancient world. Collectors who endeavored to assemble date sets, even of the “old coppers,” were somewhat frowned upon in various quarters, a low and faintly embarrassing aberration.

Concerning the 1861 eagle proof, the authors wrote in the first edition that there were nine grading events all at the PR64 level at NGC and PCGS, “indicating a number of resubmissions.” In the 2008 second edition they wrote that “the resubmissions proved successful, as now one example has been graded as PF-65 Cameo by NGC.”

This is that coin. The fields are deeply mirrored, and the surfaces display a marked cameo contrast, with light but noticeable frost on the devices. A few light, wispy hairlines appear under a loupe, but there are no noticeable contact marks on either side, befitting the Gem proof grade. Pleasing medium yellow-gold color is an added plus. No others have been certified at this lofty level in the intervening four years, at either service.

As the sole finest certified of this early proof gold issue, this piece should generate remarkable interest, even among this noteworthy Platinum Night session. NGC ID# 28EX, PCGS# 88797, CoinPlex ID# LTP1861CA

1862 Eagle, PR64 Ultra Cameo Seldom Seen in Any Grade, Only 35 Struck

5908 1862 PR64 Ultra Cameo NGC. The present 1862 eagle, certified PR64 Ultra Cameo by NGC, is yet another member of the complete six-piece 1862 gold proof set being offered as individual lots in our Platinum Night auction. Unlike on the one dollar through half eagle denominations, the 1862 proof gold eagle and double eagle each have largish — proportionally speaking — date logotypes. The reported mintage was in each case 35 pieces, although far fewer examples of each denomination survive today.

PCGS estimates that only 12 to 15 examples exist, and its population data show nine submissions of the 1862 eagle, all in the PR64 grade — five in PR64 and four in PR64 Cameo. NGC shows a total of six submissions — two each in PR64 Cameo and PR65 Cameo, one each in PR64 Ultra Cameo and PR65 Ultra Cameo. These 15 grading events almost certainly represent a number of submissions, given the strong monetary incentives for even a one-point grade bump of this rare issue.

Delving into our Permanent Auction Archives reveals that only a single time previously since 1993 have we offered an Ultra Cameo example, the ex: Dr. Loewinger (proof gold expert and author of *Proof Gold Coinage of the United States*) PR65 Ultra Cameo example in our FUN Signature (Heritage, 1/2007), lot 3136, which brought \$115,000. More recently, a PR64 Cameo PCGS example with CAC approval brought \$103,500 in our Chicago Signature (Heritage, 8/2011), lot 7619.

Given that perhaps only a dozen survivors exist of this issue, including examples ensconced in the Smithsonian and ANS collections, it is unsurprising that Heritage has seen no other offerings of the 1862 eagle. The present near-Gem displays blatant field-device contrast that produces an intense gold-on-black effect at first glance, a coin with remarkably good eye appeal. Under a loupe we note a few wispy field hairlines, along with a couple of small contact marks near star 13 and on the chin of Liberty that likely determine the grade. The strike is impeccable, and given the rarity and excellent eye appeal otherwise, the minor surface marks are of little consequence. Census: 1 in 64 Ultra Cameo, 1 finer (11/12).

From The Dr. James Olsen Collection. PCGS# 98798, CoinPlex ID# LTP1862DC

1876 Eagle, PR64 Ultra Cameo Highly Attractive and Seldom Seen Finer

5909 1876 PR64 Ultra Cameo NGC. CAC. The recorded mintage of each proof gold coin for 1876, the American Centennial year, was 45 pieces, although the Mint may not have actually distributed that many examples. As in other similar cases, the certified populations seem overlarge, a total of 37 unimpaired proofs between NGC and PCGS combined. We suspect, however, that the true number of survivors is in the range of 24 to 30 pieces.

Like other proof gold coins dated 1876, the eagle is in demand due to its historic date as well as due to the low mintage of business strikes. The year 1876 saw a general paucity of gold coins — gold dollars through eagles — coined for circulation in the United States; the double eagle was a special case, popular for international banking. As background, Germany's abandonment of a silver standard in favor of a gold standard in 1872 resulted in its dumping of millions of ounces of silver onto the market, reducing the price of silver as compared to gold. Most gold coins, in any case, had not been available in the East and Midwest areas of the United States for nearly 20 years, since the Civil War, and it would be late 1878 before true parity would be achieved between gold, silver, and paper currency, with each circulating freely.

Note the disparity between the Philadelphia circulation-strike mintages of gold coins in 1876: gold dollar 3,200 pieces; quarter eagle 4,176; half eagle 1,432; eagle 687; double eagle 583,860. Bowers points out that the European bankers' fears of a silver standard in the United States resulted in a "vast outflow of double eagles," beginning around 1876.

Given the remarkably low business-strike mintage of 687 pieces for the 1876 eagles, the proof 1876 tens are even more in demand from series specialists. The present near-Gem proof displays strong gold-on-black contrast between fields and devices, fully within the Ultra Cameo designation. The medium honey-gold surfaces show a few light field hairlines, one minuscule tick on Liberty's cheek, and a shallow mark in the right field behind her head, out from stars 12 and 13. A tiny dark spot in the center of the bust truncation provides a pedigree marker. The reverse shows virtually no field marks, just very light hairlining as seen on the obverse, consistent with the grade. This PR64 Ultra Cameo piece with CAC endorsement is one of only two in this grade, with a single PR65 Ultra Cameo finer (11/12). PCGS# 98816, CoinPlex ID# LTP1876DC

1877 Ten Dollar, PR65 Cameo Perhaps 10 Pieces Known Today in All Grades Tied for Finest Certified

5910 1877 PR65 Cameo NGC. This 1877 eagle, certified PR65 Cameo by NGC, is yet another member of this well-matched complete 1877 proof set, 14 pieces in all, including the minor coinage through Trade dollar (listed under Early Proof Sets), and the five gold proof coins in this Platinum Night auction, all offered as individual lots.

As with the other proof gold coins dated 1877, the eagle was struck in the reported amount of 20 pieces. Today two complete 1877 proof sets survive, one in the Smithsonian Institution holdings, a second in the collection of the American Numismatic Society. Walter Breen reports two deliveries of 10 sets each in his *Proof Encyclopedia*, one on February 24, one on May 31.

It is likely that less than half of the original mintage survives today, perhaps 10 coins in all including the museum specimens. The 1877 proof eagle is under severe date pressure from collectors of business strikes as well. The circulation-strike 1877 eagles were struck to the memorably low extent of a meager 797 coins, one of the lowest production figures in the entire Liberty Head series. The 1875 eagle had 100 circulation strikes, with the 1876 at 687, then the 1877 at 797 pieces, all incredibly low mintages.

For the proof 1877 eagle, NGC lists only three grading events, one each in PR64 Cameo (the ex: Trompeter coin), PR65 Cameo (this piece), and a PR65 Ultra Cameo. At PCGS, there are two in PR64 — five submissions at both services combined.

We offered the ex: Trompeter PR64 NGC coin (formerly in the Garrett Collection) in our FUN Signature (Heritage, 1/1999), lot 8239, where it realized \$36,800. It came up for auction again in our Columbus Central States Signature (Heritage, 4/2002), lot where it realized \$39,100 a decade ago. Those are the last auction offerings of any proof 1877 eagle that we can find, *more than 10 years ago*.

The present piece thus represents a signal chance to acquire one of the finest certified examples of this incredibly rare and in-demand issue. The surfaces are lovely with significant field-device contrast over each of the reddish-gold sides. Close examination shows a few wispy hairlines, and two shallow diagonal slide marks appear on the upper and lower portion of the face of Liberty. Tiny specks of die rust also appear on the face, a trait this piece has in common with the Trompeter coin.

From The Dr. James Olsen Collection. PCGS# 88817, CoinPlex ID# LTP1877CA

Choice Proof 1884 Liberty Ten
Very Rare in High Grade
Ex: Farouk-Norweb

5911 1884 PR64 PCGS. Only 45 proof Liberty eagles were struck in 1884, and probably no more than seven to 10 examples survive today. The 1884 is particularly rare in high grade, and no coins have been certified in grades above the Gem level. The present coin claims a distinguished pedigree, first to the famous Norweb Collection, and before that to the fabulous collection of King Farouk of Egypt. Interestingly, the cataloger of the Farouk offering transposed the numerals of the date when this coin was described as part of lot 210, listing the coin as an “1848 brilliant proof.” This has undoubtedly caused some confusion over the years.

This stunning Choice specimen displays sharply detailed design elements throughout, with deeply mirrored yellow and greenish-gold surfaces that show only a few minor hairlines and contact marks. Eye appeal is outstanding. Housed in a green label holder. Population: 3 in 64, 1 finer (11/12).

Ex: *Palace Collections of Egypt (Sotheby's, 2/1954), lot 210; Norweb Collection, Part II (Bowers and Merena, 3/1988), lot 2237. PCGS# 8824, NGC ID# 28FN, CoinPlex ID# LTP1884*

1894 Eagle, Cameo Select Proof
Mintage 43 Specimens

5912 1894 PR63 Cameo NGC. Mint records list just 43 specimens for this issue. Garrett and Guth point out the issue's relative rarity compared to the year before in several areas, including the mintage, certification events, and auction appearances. This is an impressively contrasted orange-gold Cameo coin with light patina over areas of the periphery and a series of grade-defining scuffs in the left obverse field. The specimen is highly appealing despite this fault. A semicircular lint mark at the back of Liberty's jaw may serve as a future pedigree marker. Census: 4 in 63 Cameo, 10 finer (11/12). *From The Richmond Hill Collection. NGC ID# 28FZ, PCGS# 88834, CoinPlex ID# LTP1894CA*

‘Semibrilliant’ 1902 Eagle, PR64
Rich Orange-Gold Color

5913 1902 PR64 PCGS Secure. The year 1902 was that in which the Mint switched from its former highly contrasted proof gold format — consisting, in the ideal at any rate, of deeply frosted devices complementing brilliantly mirrored fields — to one of a low-contrast format that Walter Breen calls “semibrilliant” in his *Proof Encyclopedia*. The reasons for this changeover are undocumented, although it was a time of worldwide experimentation with varying proof formats. The present near-Gem proof 1902 eagle is one of 113 reported struck. It boasts rich orange-gold surfaces that are fully struck and conform to the new ideal, showing little evidence of contrast on either side. A few tiny field contact marks explain the grade but do not dampen the appeal. Population: 18 in 64, 7 finer (12/12). PCGS# 8842, NGC ID# 28G9, CoinPlex ID# LTP1902

1902 Near-Gem Proof Ten Dollar
Dazzling, No-Contrast Surfaces

5914 1902 PR64 NGC. CAC. The 1902 proof ten has an original mintage of 113 pieces, but no more than 30-35 are believed to survive today as recognizable proof strikings. Curiously, even with this low survival rate, the 1902 is one of the most available proof issues of the Liberty ten dollar type — which points out the extreme rarity of these pieces in any date or grade. This highly reflective example was struck in the no-contrast method of proofing, popular after the turn of the century. The coin actually presents exceptionally well for a PR64, with no mentionable distractions. Rich tan-golden color overall. Census: 11 in 64, 5 finer (10/12).

Ex: Long Beach Signature (Heritage, 9/2006), lot 3887. NGC ID# 28G9, PCGS# 8842, CoinPlex ID# LTP1902

1903 PR65 Ten Dollar, Scarce in Gem
Rich Orange-Gold Color

5915 1903 PR65 NGC. CAC. After the Mint switched to the no-contrast method of proofing in 1902, Cameo gold coins became almost non-existent. Only six Cameo tens dated 1903 have been certified by both of the major services combined (12/12). But Gems are also scarce. NGC has only certified seven Gem proofs with seven more finer. The obverse of this piece shows the all-brilliant proofing method with equally bright fields and devices. However, the reverse does display just the slightest evidence of mint frost over the devices, proving that the previous method of proofing (with contrast) was difficult to subdue. The surfaces display even orange-gold patina over each side, and there are virtually no mentionable pedigree identifiers present. NGC ID# 28GA, PCGS# 8843, CoinPlex ID# LTP1903

1906 Near-Gem Proof Ten Dollar
Rich Orange-Gold Color

5916 1906 PR64 PCGS. CAC. In spite of the number of examples of this date present in this auction, the 1906 proof ten is actually quite a scarce coin. Perhaps three to four dozen pieces remain today in all grades and degree of contrast, but high-grade examples are challenging. For example, in PR64 PCGS has only certified 13 pieces with seven finer (minus the inevitable resubmissions). And that parenthetical reference to resubmissions does call into question just how many high-grade 1906 proof tens actually exist. Are there 2, 3, 6 pieces inflating the PR64 population data? In any case, this is a lovely, high-end example that has rich, even orange-gold color. Close examination with a magnifier reveals just the faintest hairlines on the obverse. The only identifying mark is a tiny one below star 6 on the obverse. Excellent value for the grade. PCGS# 8846, NGC ID# 28GD, CoinPlex ID# LTP1906

Gem Proof 1906 Ten Dollar
Green Insert, Gold CAC Label

5917 1906 PR65 PCGS. CAC Gold Label. The green insert of this older PCGS holder, long a clue that a coin's grade might be understated, has backup in the form of a gold CAC sticker that indicates this "Gem" proof exceeds the consortium's standards for a PR65 survivor. Looking beyond the labels, this is a simply gorgeous coin with obvious cameo contrast on the obverse, where Liberty's lightly frosted and pale yellow portrait emerges from gleaming fields with a distinctly orange cast. A boldly struck beauty with memorable eye appeal that can slot into even the finest cabinet with ease. One of just 77 specimens struck for the year. Population: 5 in 65, 2 finer (11/12). PCGS# 8846, NGC ID# 28GD, CoinPlex ID# LTP1906

1906 Ten Dollar Liberty, PR64 Cameo
Sharply Contrasted

5918 1906 PR64 Cameo NGC. CAC. In David Akers' 1980 ground-breaking work on the ten dollar series he estimated there were 25 to 30 proof 1906 tens extant. This was six years before PCGS began certifying coins and population data first became available. His estimate was based on the auction appearances he knew about plus the coins he encountered at various coin shows over the years. Today we believe the number known to be slightly higher but not by much. Probably around 35 proofs are known in all grades. Cameo examples are notably scarce with only five pieces certified in PR64 and 10 finer; there is only one Ultra that has been graded (12/12). The devices are noticeably frosted and contrasted against the depth of mirroring in the fields. The obverse displays rich orange-gold color, while the reverse is several shades lighter with more of a tendency toward yellow-gold. A few wispy hairlines can be seen when closely examined, but there are no obvious contact marks. The strike details exhibit pinpoint definition on each side. NGC ID# 28GD, PCGS# 88846, CoinPlex ID# LTP1906CA

1906 Eagle, PR67 Cameo Seldom-Seen Liberty Head Proof With Strong Contrast

5919 1906 PR67 Cameo NGC. Both the high technical grade and the Cameo designation make this coin a standout example of the 1906 eagle, certified PR67 Cameo by NGC. The 1907 Liberty Head eagle would be the last of the design, replaced later in the same year by the Indian Head design of Augustus Saint-Gaudens.

The 1906 and 1907 Liberty head tens were both struck in proof format, nominal amounts of 77 pieces for the 1906 and 74 for the 1907, and accordingly representing the last two proof issues of the design. These proof mintages are not significantly different from several earlier issues of the late 1890s-early 1900s. It is safe to say, however, that more of these proof issues were likely saved than the proofs from several decades earlier; ten dollars was a lot of money during the late 19th century, and the temptation was everpresent to spend such coins during hard times. Recent estimates put the number of survivors in all grades for the 1906 at about 35-40 pieces, perhaps half of the original mintage.

The present 1906 eagle is certified PR67 Cameo by NGC, making it one of only two such at that service with none finer in the Cameo class (11/12). We at Heritage have been privileged to offer examples of such superb quality less than once per year over the past few years. One example graded PR67 Cameo failed to meet its reserve in 2008, and a second coin in the same grade realized \$60,375 in our Los Angeles Signature (Heritage, 7/2009), lot 1305. At its second appearance in our Fort Worth ANA Signature (Heritage, 3/2010), lot 2518, the piece realized \$63,250. A PR66 Ultra Cameo NGC example also brought \$63,250, the latter in our Phoenix ANA Signature from a year earlier (Heritage, 3/2008), lot 1598.

The viewer of this coin will require no effort to discern the perceptible gold-on-black cameo contrast, despite the issue's production during the Mint's so-called "semibrilliant" proof coinage era, post-1902. The strike is impeccable over both sides. A few wispy field hairlines are of little import, and the prevailing color is a beautiful medium yellow-gold. Census: 2 in 67, 0 finer (11/12).

From The Victoria Rose Collection. NGC ID# 28GD, PCGS# 88846, CoinPlex ID# LTP1906CA

INDIAN EAGLES

Uncirculated Details 1907 Wire Rim Ten

5920 1907 Wire Rim — Cleaning — PCGS Genuine. Unc Details. This popular version of the Saint-Gaudens eagle has a prominent knife rim or “Wire Rim” around both sides and periods after LIBERTY and flanking the reverse words. While this example has its share of issues — its yellow-gold surfaces are altogether too bright from cleaning, while a sizable nick appears near 7 o’clock on the obverse — as part of a net mintage of only 472 pieces that has its own entry in the *Guide Book*, this coin will have many collectors clamoring to own it. An important coin for those who might have thought the issue out of reach otherwise.

From The Richmond Hill Collection. PCGS# 8850, NGC ID# 268B, CoinPlex ID# ITM1907WIRE

1907 Wire Rim Ten Dollar, MS66 Bright Surfaces, Deep Orange-Gold Patina

5921 1907 Wire Rim MS66 NGC. CAC. Although many collectors assemble their sets by type or by date, the collecting of a complete run of 1907-dated eagles would make a healthy flock in itself. The set would start with the three 1907-PDS Liberty Head issues, one of which, the 1907-S, is far more elusive in Mint State than generally thought. The Wire Rim 1907 eagle of the Saint-Gaudens design would follow, of course; even though the Wire Rim is classified as a pattern, the point is moot due to the large number of collectors who include it in the complete set. Perhaps a couple of hundred examples survive today over a wide grade range, including some “affordable” and some spectacularly nice pieces. The Rolled Rim 1907 would be the fifth entry in the set, a melt rarity since all but 50 or so were melted at the insistence of Charles Barber. The final issue in the set would be the modified Barber 1907 eagle, known as the No Periods to distinguish it from the Wire Rim and Rolled Rim, both of which have periods or triangular stops in the legends.

The present 1907 Wire Rim would certainly be an excellent start on this new collecting challenge. The surfaces exhibit the always-seen swirling die polish marks in the fields, which impart a predictable brightness to the surfaces. This example displays even, rich orange-gold color; quite different from the usual yellow-gold most Wire Rims show. The surfaces are essentially perfect with no distinctive contact marks on either side. Census: 20 in 66 (1 in 66+), 9 finer (12/12). NGC ID# 268B, PCGS# 8850, CoinPlex ID# ITM1907WIRE

LIBERTY DOUBLE EAGLES

Premium Gem 1907 Saint-Gaudens Ten
No Periods Issue

5922 1907 No Periods MS66 PCGS. CAC. After a few iterations of the Saint-Gaudens eagle issue that saw limited mintages, the design made its broader debut with the 1907 No Periods design (so named for the lack of the periods that had flanked the words in E PLURIBUS UNUM, among other places). Predominantly yellow-gold luster is generous and occasionally frosty where die erosion is present. A handful of tiny marks and shallow scrapes are visible on each side, but not one of these flaws poses a threat to the coin's Premium Gem status. Finer examples are condition rarities. Population: 96 in 66 (12 in 66+), 7 finer (11/12). PCGS# 8852, NGC ID# 28GF, CoinPlex ID# ITM1907NM

1850-O Liberty Double Eagle, AU53
First Branch Mint Twenty

5923 1850-O AU53 NGC. CAC. Variety 1. The 1850-O Liberty double eagle was the first twenty dollar gold piece struck at a branch mint. A sizeable mintage of 141,000 pieces was accomplished, but the issue circulated heavily at the time of issue and few examples were saved for numismatic purposes. The surviving population numbers no more than 500-600 pieces, with most examples seen in the VF-XF grade range. The 1850-O is very scarce in AU grades, and only a handful of Mint State coins are known.

The present coin is well-detailed with some softness on Liberty's hair and light wear on the device high points. This is the scarce variety with the mintmark away from the tail feathers. The vivid greenish-gold surfaces retain much original mint luster and show a scattering of minor abrasions that define the grade. Census: 46 in 53, 50 finer (11/12). NGC ID# 268G, PCGS# 8903, CoinPlex ID# 20M1850O

Near-Mint 1851-O Double Eagle
Southern Gold Type Coin

5924 1851-O AU58 NGC. Variety 1. Southern gold type collectors long have flocked to the 1851-O to get the New Orleans twenty "on the cheap." Enthusiasts realize, however, that even the most accessible such coin comes at a price above a certain grade level. This near-Mint representative is noteworthy, more so than the resubmission-heavy NGC *Census Report* listing of 57 coins in AU58 condition. The green-gold surfaces show considerable remnants of prooflikeness around the devices and only a few lines of reed marks attract any negative attention.

Ex: Long Beach Signature (Heritage, 9/2002), lot 8620. NGC ID# 268J, PCGS# 8905, CoinPlex ID# 20M1851O

Mint State 1851-O Double Eagle
Green Label Holder

5925 1851-O MS60 PCGS. Variety 2. Many Southern gold issues have a glut of coins in the AU grade range of the various population reports that has little to do with the actual population in such condition but tells much about the gap in price between coins on either side of the "slider" line. This MS60 coin is on the better side, and thanks to the green-label PCGS holder, any resubmission malarkey was kept to a minimum. This broadly lustrous coin is the real Mint State deal, lightly scraped on the cheek with a scattering of obverse abrasions but all-around desirable. Several lines of medium-depth reed marks appear at right on the reverse. Population: 2 in 60, 8 finer (11/12). PCGS# 8905, NGC ID# 268J, CoinPlex ID# 20M1851O

1852-O Liberty Twenty, AU58
Popular Branch Mint Type Coin

5926 1852-O AU58 NGC. Variety 1. Despite a modest original mintage of 190,000 pieces, the 1852-O is the most common O-mint double eagle of the 1850-1852 era in high grade, making it a popular choice of mintmark type collectors. Probably more than 1,000 examples of this date still survive in all grades, but the 1852-O does become very scarce at the near-Mint level.

The present coin is a satin-finished example whose lightly rubbed surfaces reveal flashes of original luster at most angles. The devices are sharply impressed, and the number of abrasions is consistent with the assigned grade. A bright, yellow-gold representative. One diagonal scratch is seen across Liberty's hair and neck. Census: 76 in 58 (3 in 58+), 15 finer (11/12). NGC ID# 268L, PCGS# 8907, CoinPlex ID# 20M1852O

Condition Rarity 1857-O Double Eagle, AU55
Above-Average Strike and Eye Appeal

5927 1857-O AU55 NGC. Variety 1. After the small production of New Orleans double eagles from 1854 through 1856, the mintage rose sharply to 30,000 coins in 1857, most of which were widely distributed and extensively circulated. The average 1857-O twenty seen today grades Very Fine to low-end About Uncirculated. The yellow-gold surfaces of the present Choice AU specimen display hints of field-device contrast, especially on the reverse. An above-average strike imparts relatively strong detail to the design elements, including the eagle's plumage, the dentils on both sides, and the mintmark, areas that are usually weak. Perhaps the most notable attribute of this coin is the lack of very heavy abrasions that plague most surviving specimens. The few marks visible are light and unobtrusive. The foregoing characteristics add up to above-average eye appeal for this piece. NGC ID# 2694, PCGS# 8921, CoinPlex ID# 20M1857O

Gorgeous MS66 1857-S Double Eagle An S.S. Central America Treasure

5928 1857-S MS66 PCGS. CAC. Spiked Shield, Variety 20A. Ex: *S.S. Central America*. SSCA 2796. The *Central America* went from being an almost-forgotten maritime disaster to an oft-told treasure tale after the discovery of the wreck — and the golden cargo within. This Premium Gem 1857-S double eagle was one of thousands packed tightly together on the ship and bound for New York with who-knows-what eventual fate when a hurricane sank the *Central America*. After more than a century and a quarter, this coin and its fellows changed collector understanding of the 1857-S double eagle forever.

Despite being packed for shipping, riding through two rough oceans, sinking in a hurricane, and being raised from the ocean floor, this Premium Gem has come through hardly the worse for events (and obviously with no wear). Canary-gold luster, bright and pale, deepens slightly toward the rims. A tiny mark along Liberty's chin is well within the bounds of the grade. Offered alone (no box or paperwork), but this coin and its gold-insert holder carry their own credentials.

From *The Richard P. Ariagno, M.D. Collection*. PCGS# 8922, NGC ID# 2696, CoinPlex ID# 20M1857S

1860-O Double Eagle, XF40 Traces of Prooflike Surface Remain

5929 1860-O XF40 PCGS. Among double eagles struck in New Orleans, the 1854-O and 1856-O issues get the lion's share of attention, but several other issues are extremely challenging. They include the 1860-O, which is rare in any grade and quite a popular issue. While higher-grade pieces appear from time to time, examples in any grade are in demand. Jeff Garrett and Ron Guth suggest "it is probably the fourth or fifth rarest New Orleans double eagle."

Housed in a green-label PCGS holder, this pleasing 1860-O double eagle offers honey-gold surfaces with lighter yellow near the borders. Considerable luster remains on both sides with traces of prooflike reflectivity still visible around the devices. The strike is better than average for the issue, including mostly strong star details along the left obverse. The high-point definition of the hair is soft, as usual. Perhaps most important is the surface quality, showing few marks of any kind on either side. Population: 9 in 40, 33 finer (11/12). Ex: *Scorpio Monetary; Houston Signature (Heritage, 12/2008)*, lot 2262, which brought \$27,600. PCGS# 8930, NGC ID# 269E, CoinPlex ID# 20M1860O

1860-O Double Eagle, Choice AU Among the Five Rarest O-Mint Twenties

5930 1860-O AU55 NGC. The drumbeats of the impending Civil War could be heard growing louder in the distance in 1860 New Orleans. Louisiana was one of 11 Southern states that seceded from the Union after Abraham Lincoln, candidate of the Republican anti-slavery party, was elected president late in the year.

The mint in New Orleans during 1860 was largely concerned with producing minor silver coins, apparently at the expense of gold coinage. Half dimes, quarters, half dollars, and Seated dollars were struck in generous quantities.

Among gold coins, however, New Orleans struck only 11,000 eagles and 6,600 double eagles, the latter figure representing the third yearly decline in a row: 35,250 pieces for the 1858-O; 9,100 pieces for the 1859-O, and the 6,600 mentioned previously for the 1860-O, a figure that was the lowest since the illustrious 1854-O and 1856-O issues. Grouping the 1860-O with the 1854-O and 1856-O is entirely proper, as the 1860-O is, overall, probably the fourth- or fifth-rarest O-mint double eagle.

Such a low production meant that the issue was rare virtually from the day it was struck, but there were few collectors of the era interested in (and financially capable of) “putting back” high-value mintmarked modern issues at face value; that was a style of collecting that was decades in the future, and the few well-heeled numismatists of the day preferred proof coinage from the Philadelphia Mint.

This Choice AU example boasts bright yellow-gold surfaces with a light tinge of green. The strike is remarkably bold on each side, displaying full stars around the obverse periphery, strong hair detail, and impressive articulation throughout the reverse. The fields are bright and semiprooflike. Numerous small- to medium-sized abrasions appear scattered about, none worthy of individual mention. Census: 5 in 55, 10 finer (11/12). NGC ID# 269E, PCGS# 8930, Coin-Plex ID# 20M1860O

Historic 1861-O Twenty, XF, Issue Struck Under Three Different Authorities

5931 1861-O XF40 NGC. The 1861-O double eagle was struck under three different governing authorities: the United States, the State of Louisiana, and the Confederacy. It is impossible to state with certainty who struck which coins. Jeff Garrett and Ron Guth (2006) estimate that fewer than 200 coins are known in all grades, most of which are Very Fine, Extremely Fine, or low-end About Uncirculated.

The brassy-gold surfaces of this XF example retain traces of luster in the protected areas. The design features reveal the typical softness in portions of Liberty's hair and in some of the obverse star centers. Distributed minute marks are less numerous and severe than typically encountered on surviving examples.

Ex: FUN Signature (Heritage, 1/2009), lot 4143. NGC ID# 269J, PCGS# 8934, CoinPlex ID# 20M1861O

1861-O Double Eagle, Almost Uncirculated Apparently Struck Under Federal Control

5932 1861-O AU50 PCGS. Aside from appearance and grade, the main question about any 1861-O is, who struck it? The general assumption is coins that are strongly defined on the bottom of the digits of the date were struck under federal control of the mint. During the period from January 1 to January 26 the federal government is estimated to have struck 5,000 pieces. After the takeover of the mint by the State of Louisiana on January 26, it is believed that approximately 9,750 double eagles were minted. Then a final 2,991 pieces are estimated to have been produced under the Confederacy.

The method for determining who struck which coins is dealt with in Doug Winter's latest book on New Orleans gold:

"Many researchers have assumed that the weak date coins are connected to the Confederacy. The weak date coins show no evidence of the obverse die crack as seen on the strong date coins and this suggests that a second obverse was, in fact, used. The obverse crack is too deep to have been completely removed by die lapping. It is not clear whether the weak or strong date coins were struck first. It is certainly plausible that the weak date coins were made first, the die was repaired, the defective die was removed from service and then the strong date coins were made; first with no defects and then later with the obverse die crack."

This particular coin has equally strong detailing on the tops and bottoms of the digits in the date, and the die crack is evident. It is also an especially attractive example for this normally problem-laden issue. Generally an 1861-O is found with heavy, widespread abrasions. This piece is notably clean. As further reinforcement of when this coin was struck, i.e., early in the year, the devices are still outlined on each side by the mirrorlike finish of a new die. After a few thousand strikes this finish diminishes, but on this coin only light handling in the more exposed areas has subdued the original reflectivity. This light handling also gives the coin a two-toned appearance with the majority of the coin a deeper orange-gold and the mirrorlike outline around the devices bright yellow-gold. The surfaces are sharply defined as well; the only notably weak area on either side is the hair curls around Liberty's face.

Ex: Houston Signature (Heritage, 12/2008), lot 2265. PCGS# 8934, NGC ID# 269J, CoinPlex ID# 20M1861O

Rare 1861-O Double Eagle, Choice AU Historic Civil War Issue Struck Under Three Different Governments

5933 1861-O AU55 PCGS. Struck under three different governing authorities to the extent of a meager 17,741 pieces during the course of the year, the 1861-O double eagle would become a historic rarity, the last O-mint double eagle produced until the 1879-O.

The Civil War and its geographic ramifications were to blame, of course. During the year 1861, the New Orleans Mint was under the control of three different political entities:

- From January 1 to January 25, the New Orleans Mint was a facility of the U.S. government;
- Louisiana seceded from the Union on January 26, 1861, making the mint the property of the State of Louisiana, through March 20; and, finally,
- Louisiana joined the Confederate States of America (“the Confederacy”) on March 21.

Walter Breen writes in his *Complete Encyclopedia* that the mint-age included 5,000 coins for the Union, 9,750 for the State of Louisiana, and 2,991 pieces for the Confederacy, but adds, “these cannot be told apart with certainty.” Doug Winter, in an interesting discussion on PCGS CoinFacts, identifies three die states for the obverse:

- Weak date;
- Weak date with scribe lines beneath the date, partially restoring the 8; and
- Strong date with die crack from star 2 into the obverse field near the chin.

Winter writes on CoinFacts:

“When one considers that the Confederacy is said to have struck approximately 17% of the original mintage figure of this issue (2,991 of the 17,741 struck) this is almost exactly the percentage of the coins that exhibit the strong date with the crack. It is my belief that these are the coins produced by the Confederacy.”

This conclusion is contrary to some other researchers (such as Bowers) who believe that the CSA strikes might be those with the weak date and scribe lines beneath the date, indicating that “at the New Orleans Mint no numeral punches were on hand for such work; otherwise a complete 8 could have been punched into the working die.”

The 1861-O double eagle is a Type One issue that is rare in any grade — and die state. This Choice AU example is far finer than the norm and shows the typical weak date of 75% of all examples. Deep orange-gold color dominates most of each side with tinges of lilac over the high points. The reverse still retains partial mirroring around the devices from die polishing. Save for the bottom of the date, the strike is sharp. Small- to medium-sized marks scattered about included one notable scrape at the top of obverse, above the hair of Liberty. Population: 16 in 55, 6 finer (11/12). PCGS# 8934, NGC ID# 269J, CoinPlex ID# 20M1861O

Select 1865 Double Eagle
S.S. Republic Salvage

5934 1865 MS63 NGC. CAC. Ex: *S.S. Republic*. A bright and beautiful piece with the pale yellow-gold luster that is something of a signature for *S.S. Republic* gold, though the reverse also adds a touch of peach. While other shipwreck issues, most famously the 1857-S twenty, are available as Type One double eagle type pieces, the 1865 is the most prominent Philadelphia option in the better Mint State grades due to the *Republic* coins. This Select example has a couple of light ticks on the cheek and a handful of wispy abrasions as well as shallow luster scrapes in the reverse fields, but the all-around eye appeal is grand. Offered alone (no box or papers). NGC ID# 269U, PCGS# 8943, CoinPlex ID# 20M1865

Choice XF 1866-S Double Eagle
Scarcer No Motto Type

5935 1866-S No Motto XF45 PCGS Secure. The Philadelphia Mint struck only Type Two double eagles in 1866, but the San Francisco Mint coined a small number of twenty dollar coins of the old Type One design before switching over to the new style later in the year. The 1866-S No Motto issue is much rarer than its With Motto counterpart, and is actually one of the rarest Type One double eagles on the market today. The surviving population numbers no more than 200 pieces in all grades, and XF45 specimens are very scarce.

The coin offered here shows light wear on the devices, but retains almost all of its original design detail, with pleasing orange-gold surfaces and traces of slightly subdued mint luster. Population: 52 in 45, 36 finer (11/12). PCGS# 8945, NGC ID# 269W, CoinPlex ID# 20M1866SNM

1866-S No Motto Twenty, AU53 Notably Rare Type One Issue

5936 1866-S No Motto AU53 NGC. The decade of the 1860s produced two S-mint double eagle keys in the series, the 1861-S Paquet, of which 19,250 were struck, and the 1866-S No Motto, of which 120,000 were reportedly produced. Garrett and Guth estimate that 100 of the former survive, and perhaps only 200 of the latter.

The 1866-S No Motto is an oddball issue, in that the With Motto design came into being in this year. The Philadelphia Mint manufactured nearly 700,000 examples of the With Motto; San Francisco produced more than 840,000 pieces of the With Motto issue. But apparently, at least two mintmarked reverse dies were left over from the No Motto issue in San Francisco, which were used to make the No Motto coins.

For reasons that are unclear today, few of those coins survived.

Obverse dies dated 1866 were sent to San Francisco in November 1865, but the With Motto reverse dies were not sent until March 1866; the No Motto coins were produced in the interim.

It is not wild speculation to ponder the possibility that the No Motto coins — or most of them, at any rate — were held in storage until a sufficient number of With Motto coins had been produced, at which time the No Motto coins were melted and recoinced into With Motto pieces. (Breen in his *Complete Encyclopedia* fails to explain why an issue with a putative mintage of 120,000 pieces is so rare today. He does provide the comment “Usually F to VF. Prohibitively rare in AU.”)

The finest examples that we have offered at Heritage to date are a single MS62, four AU58 and five AU55 pieces, followed by a slightly larger complement of AU53 coins such as the present example. Orange-gold surfaces retain part of the luster on each side. There are a few of the expected signs of contact, but the only mentionable abrasions are some small ones on Liberty’s cheek, neck, and in the left (facing) obverse field. The strike is well-executed overall, despite a couple of obverse stars along the periphery lacking their centrils. The reverse is choice for the grade. Census: 23 in 53, 29 finer (11/12). NGC ID# 269W, PCGS# 8945, CoinPlex ID# 20M1866SNM

Popular 1866 Motto Double Eagle, MS61 Rare in Mint State

5937 1866 Motto MS61 PCGS. CAC. The 1866 Philadelphia issue double eagle marks the introduction of the Type Two design with the motto IN GOD WE TRUST added to the reverse, and is perennially popular as such among collectors. With a plentiful mintage approaching 700,000 circulation strikes, the 1866 With Motto can be located through Extremely Fine with little difficulty. About Uncirculated pieces are scarce, and Mint State examples are very rare. Both sides of this MS61 specimen display apricot-gold color and well-struck design elements. Scattered light marks preclude a higher grade. Nevertheless, this is a rather nice piece, attested to by the CAC label. Population: 15 in 61, 2 finer (11/12). PCGS# 8949, NGC ID# 269X, CoinPlex ID# 20M1866

Choice AU 1891-CC Double Eagle Scarce Low-Mintage Issue

5938 1891-CC AU55 PCGS. Variety 1-A. The 1891-CC Liberty double eagle is a scarce coin, unlike the other Carson City gold issues of this date. Only 5,000 pieces were struck, the second-smallest production total of any CC-mint twenty, after the famous 1870 issue. No more than 150-200 examples remain extant in all grades, and the 1891-CC is very scarce in Choice AU condition.

The present coin is an attractive AU55 specimen, with well-struck design elements that show just a touch of wear on the high points. The pleasing orange-gold surfaces are brightly lustrous, with semiprooflike reflectivity in sheltered areas. The surfaces show the expected number of minor abrasions for the grade. Population: 25 in 55, 36 finer (11/12). PCGS# 9017, NGC ID# 26C3, CoinPlex ID# 20M1891CC

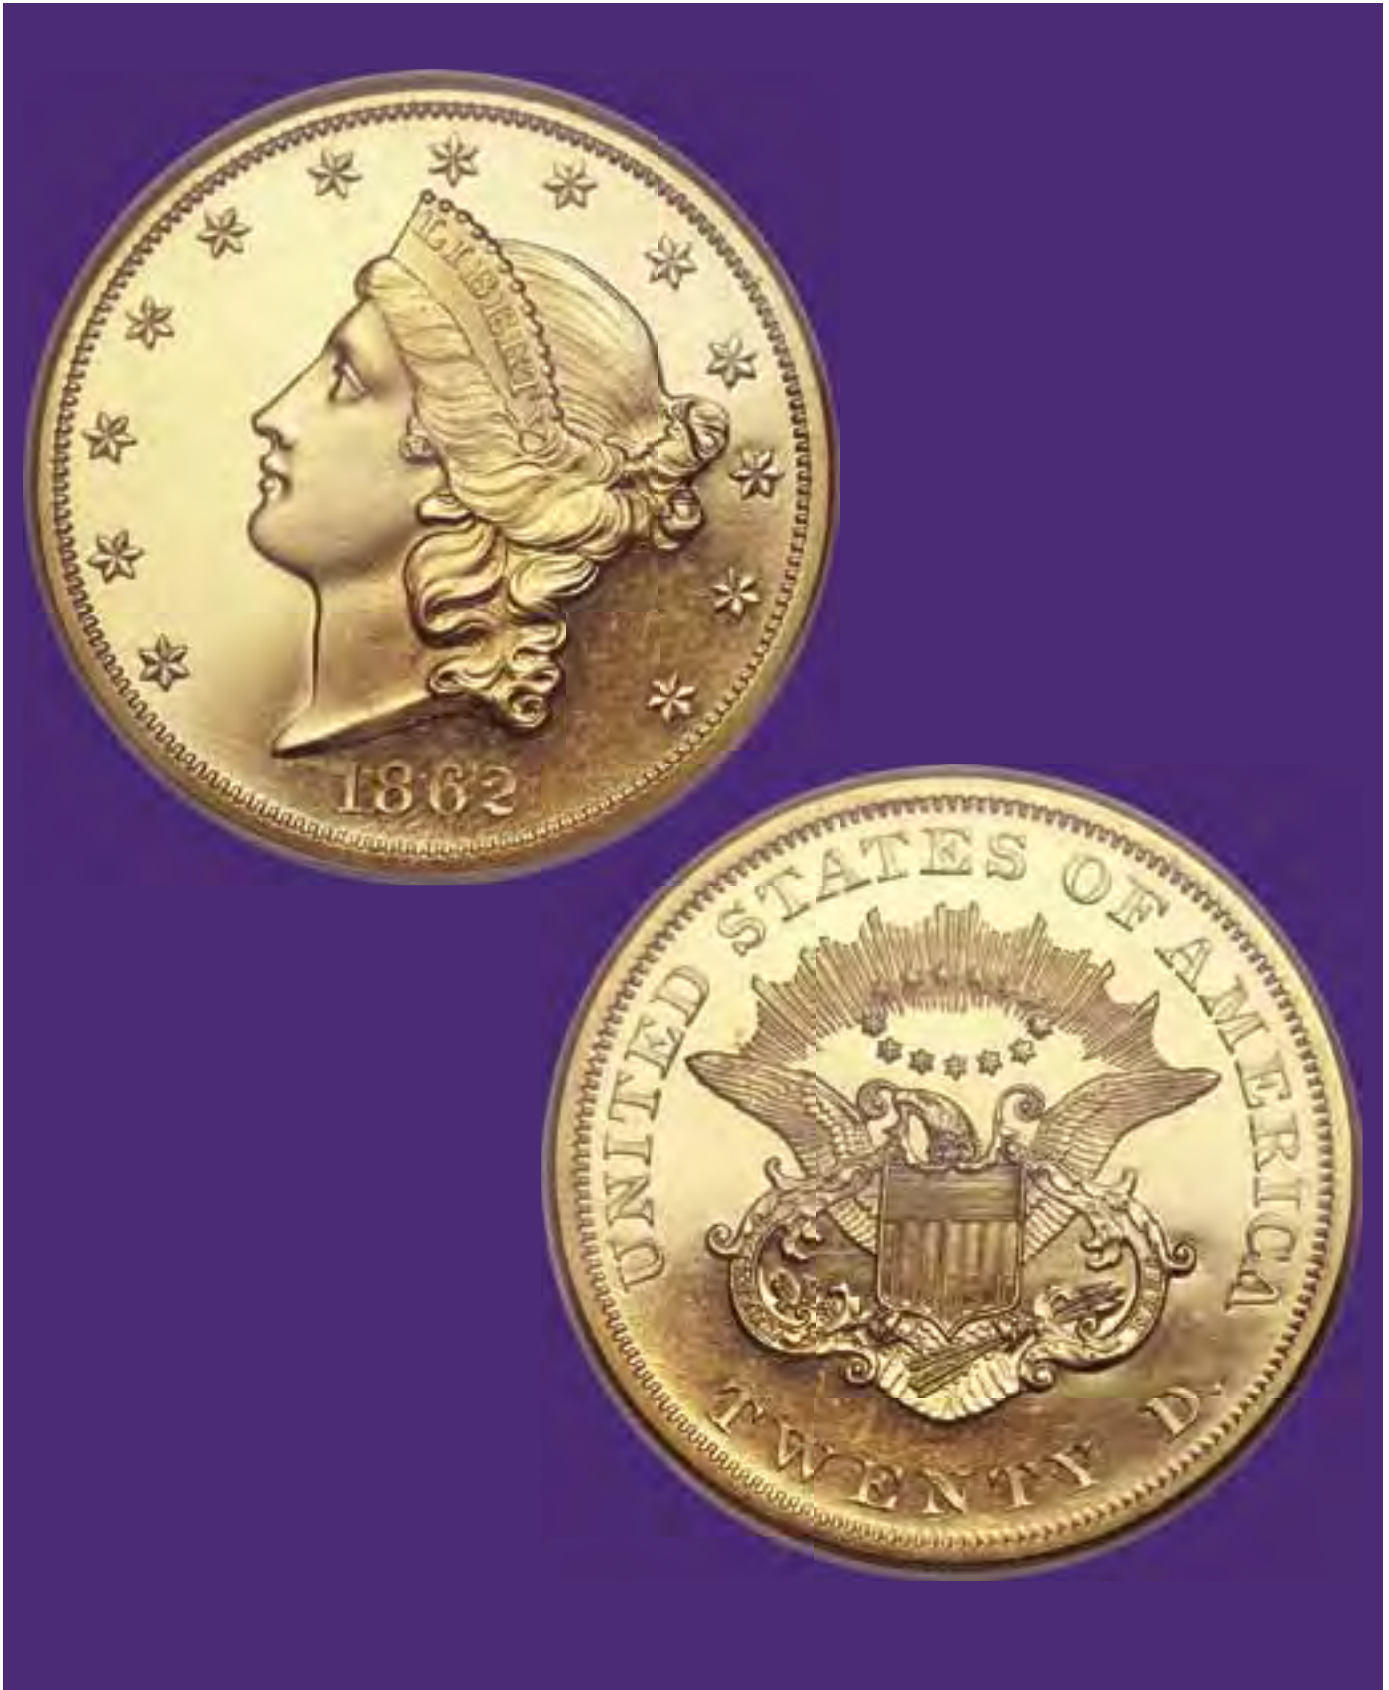

Bright MS62 1892-CC Double Eagle
Penultimate Carson City Issue

5939 1892-CC MS62 NGC. CAC. The 1892-CC is the penultimate Carson City date of production and the last full year of issue, as the minting operations in Nevada were shut down before half of 1893 was done. This MS62 survivor from late in the Old West facility's life has reflective fields and more frosty characteristics on the central devices. Though flatly struck, particularly on the stars surrounding the portrait, this coin has great eye appeal for the grade thanks to the effusive luster. Broadly distributed light to moderate abrasions account for the grade. Census: 39 in 62, 5 finer (11/12). NGC ID# 26C6, PCGS# 9020, CoinPlex ID# 20M1892CC

PROOF LIBERTY DOUBLE EAGLES

1862 Double Eagle, PR64 Cameo Perhaps a Dozen Survive Remarkably Well-Preserved Example

5940 1862 PR64 Cameo NGC. The present PR64 Cameo 1862 double eagle, certified by NGC, is the final member of a complete six-piece proof gold set of 1862 offered individually in this Platinum Night session. The mintage of each denomination, gold dollar through double eagle and including the three dollar, was reported as 35 pieces, and Walter Breen documents two complete proof sets, one now in the Smithsonian Institution and a second in the holdings of the American Numismatic Society. Walter Breen calls the double eagle “in the same rarity class with the eagle and half eagle,” meaning that likely only a dozen or so pieces exist today. PCGS provides an even lower estimate of 10 to 12 pieces surviving.

It would be difficult to overstate the importance of this Type One proof double eagle, which hails from the early Civil War era, in addition. The earliest date for which Liberty Head double eagle proofs are offered — and once in a great while, at that — is the 1859, of which Garrett and Guth surmise that perhaps nine survive, including the Smithsonian and ANS examples. For the 1862, the authors estimate that a dozen are known, again including two museum examples. They write that “any Type 1 double eagle is a major rarity in Proof, and the demand far outstrips the supply.”

The combined certified populations at NGC and PCGS stand at nine pieces, including a couple of likely resubmissions, with a cluster of coins in the PR64 Cameo grade of the present piece — one at PCGS and three at NGC.

The 1862 proof double eagle is so rare overall that auction appearances are few and far between; in fact, Heritage has offered examples only twice before since we began our Permanent Auction Archives in 1993. A PR64 NGC non-Cameo example that we offered back in 1999 in our Central States auction (Heritage, 4/1999), lot 6260, brought \$78,775. And more recently, a PR65 Deep Cameo PCGS example (formerly in the collection of proof gold expert Dr. Robert J. Loewinger) in our FUN Signature (Heritage, 1/2007), lot 3142, garnered \$253,000.

Another example in the same grade as this coin, PR64 Cameo NGC, appeared in a May 2006 Superior sale, lot 952, which brought \$241,500. As we lack access to that catalog, we cannot readily say it is the same coin in another appearance or not.

The present coin is certified in an NGC old-style no-line holder, displaying deep field-device contrast and blatant eye appeal at first glance. The orange-gold surfaces reveal a few faint hairlines in the fields under a loupe, but there are no overt marks on either side. This is a piece that appears to verge on an Ultra Cameo designation, and one that has been carefully preserved, remarkably so, for many decades. This piece is a more-than-fitting capstone to this remarkable offering of 1862-dated proof gold coins. Census: 3 in 64 Cameo, 0 finer (11/12).

From The Dr. James Olsen Collection. NGC ID# 26DD, PCGS# 89074, CoinPlex ID# 20P1862CA

1877 Twenty, PR65 Ultra Cameo, One of Two at NGC
Capstone to the Complete Proof Set
Finest of at Most 10 Available to Collectors

5941 1877 PR65 Ultra Cameo NGC. The present 1877 double eagle, certified PR65 Ultra Cameo by NGC, is an incredibly fitting capstone to a monumental offering of a complete 14-piece 1877 proof set, including all the minor coinage, the Trade dollar, and five gold pieces, all offered as individual lots. The five proof gold lots including the three dollar are in our Platinum Night offerings, and the minor coinage through Trade dollar are listed in their respective sections elsewhere in this auction.

The 1877 date as a whole, of course, needs no introduction to most collectors. The 1877 Indian cent is hands-down the most desirable and collected key to the Indian cents, and series specialists also know that the three cent nickel and Shield five cent nickel are equally sought-after proof-only key dates within their respective series as well.

But what makes this complete set even more remarkable is its phenomenal *quality and consistency*. Each one of the 14 coins in the set is a Gem proof with the Cameo designation from NGC at a minimum, and several of the pieces bear the Ultra Cameo designation. Each one of the minor coins grades PR66 Cameo or Ultra Cameo.

Among the five gold pieces, again PR65 Cameo is the minimum, although this double eagle is certified PR65 Ultra Cameo, and the quarter eagle grades PR67 PR67 Ultra Cameo.

Except for the most well-heeled, collectors may not be as familiar overall with the proof gold pieces of 1877, but they are equally legendary. The reported mintage of each denomination was a skimpy 20 proofs, and for most of them scarcely half survive today, including two complete proof sets in the Smithsonian and ANS.

The 1877 twenty dollar proof is the first of the Type Three double eagles, with the complete denomination TWENTY DOLLARS spelled out on the reverse, an attribute that will appeal to first-year-of-type collectors.

It is doubtful that more than 10 are available to collectors in all grades including a couple of impaired proofs, as we believe that no more than a dozen survive including the two museum pieces. The unimpaired proofs likely number only six to eight coins.

Despite the meager number of survivors, the fact remains that in any case, *the present piece is tied for the finest known with one other submission at NGC in PR65 Ultra Cameo*, which may or may not represent a duplication. This piece is far and away the finest we have ever had the privilege to offer at Heritage, as it has been longer than eight years since we even offered a PR64 Ultra Cameo, an NGC-certified coin that realized \$42,550 in our Pittsburgh Signature (Heritage, 8/2004), lot 7690. Three full years had passed previously to that, back in 2001, since we offered the same coin.

Full, engaging, and profound field-device contrast is the hallmark of this remarkable PR65 Ultra Cameo example. A deep, satisfying gold-on-black effect prevails on the orange-gold surfaces on each side, which demonstrate a full strike. There is an absence of all but the most minor distractions, and even those — a couple of tiny contact marks on the cheek, and minuscule field marks — do nothing to detract from the immense quality and importance of this piece.

Collectors who have been seeking the finest possible example of this elusive issue: Your search ends here. Census: 2 in 65, 0 finer (11/12). *From The Dr. James Olsen Collection. PCGS# 99093, CoinPlex ID# 20P1877DC*

1894 Double Eagle, PR66 Ultra Cameo
Only 50 Examples Struck
Tied for Finest Certified

5942 1894 PR66 Ultra Cameo NGC. CAC. The 1894 Liberty double eagle claims the lowest proof mintage of the decade, at a meager 50 pieces. The 1894 proof twenty is even more difficult to locate than that small production figure would indicate, suggesting that the rate of attrition was quite high for the issue. NGC and PCGS have combined to certify a total of 27 coins in all grades (12/12), but that total undoubtedly includes some resubmissions and crossovers. Jeff Garrett and Ron Guth offered the following commentary on the 1894 proof double eagle in their *Encyclopedia of U.S. Gold Coins 1795-1933*:

"The population numbers for the 1894 double eagle must be studied carefully to understand the rarity of the 1894 Proof issue. Many of the coins certified have been in various states of impairment. Very few choice examples are known. Of the original mintage, there are probably only 15-20 coins known. These include multiple examples housed in museum collections. One of the finest examples seen in recent years has been a PF-64 coin that sold at auction in early 2005 for \$54,625."

Interestingly, the coin referred to in the above citation is none other than the present specimen, when it appeared in lot 30544 of the FUN Signature (Heritage, 1/2005). As a measure of the rarity of the 1894 proof twenty, we can find no record of any public offering of this issue since that time, and the price realized still stands as the record for any auction appearance of this issue today. Of course, prices on all coins have changed dramatically over the last eight years, and even a record price in 2005 is no indication of what the piece will bring in 2013.

Although a few collectors, like Virgil Brand and John M. Clapp, began systematically collecting large denomination gold coins in the 1890s, it was not until the late 1930s that collecting double eagles became widely popular. The few early specialists that did collect double eagles usually acquired them as part of complete gold proof sets, ordered from the Philadelphia Mint every year. Today numismatists recognize proof coins as different issues from their business-strike counterparts, usually employing different dies and different production methods, etc. In earlier times a proof coin was considered to be a sort of super high-grade specimen of the yearly coinage, not a separate issue from the business-strike coins at all. This attitude is reflected in the description of lot 354 of the David S. Wilson Collection (S.H. Chapman, 3/1907):

"1894 \$20, \$10, \$5, \$21/2. Of the \$21/2 4,122 were struck. Complete set. 4 pcs."

Note that Chapman included the mintage figures for both business-strike and proof coins in his quarter eagle totals. Because collectors did not consider the proofs special separate issues, many coins were sold cheaply, or even spent at face value, during hard times in the late 19th and early 20th centuries. Because few collectors were actively collecting large gold coins, the double eagles were particularly vulnerable to this kind of attrition. The large face value of the double eagles made it very tempting to spend them when financial pressures loomed, while it was easier to justify holding on to the smaller denominations. These circumstances account for the number of impaired specimens noted by Garrett and Guth.

The present coin is a spectacular Premium Gem, with stunning cameo contrast between the richly frosted devices and the deeply mirrored fields. The virtually pristine surfaces show the orange-peel texture of the best 19th century gold proofs. The design elements display razor-sharp detail throughout and eye appeal is tremendous. The coin offered here combines great historic interest, absolute rarity, and the highest available technical grade in one irresistible package. It may be years before a comparable specimen becomes available. Census: 2 in 66 Ultra Cameo, 0 finer (12/12).

Ex: FUN signature (Heritage, 1/2004), lot 30544, realized \$54,625. NGC ID# 26EF, PCGS# 99110, CoinPlex ID# 20P1894DC

1906 Near-Gem Cameo Proof Noticeably Contrasted

5943 1906 PR64 Cameo NGC. The year 1901 is the last in the Liberty Head proof gold series for which Cameo and Deep/Ultra Cameo coins are fairly obtainable, for a price. The Mint decided in 1902, for reasons that are lost in the mists of time, to change the “deeply mirrored fields against thickly frosty devices” format for proof gold to one that showed far less contrast, a format that Breen calls “semibrilliant.” A glance at the NGC *Census Report* will quickly confirm that for several proof Liberty Head twenty dates after 1901, there are no (or only a small handful of) Ultra Cameo pieces certified, while most of the issue is regular uncontrasted proofs or Cameo-designated coins.

As a later entry in the Liberty Head series, it appears that more of the 1906s actually issued have survived to the present day, perhaps 50 to 60 examples of the original mintage of 94 pieces. At the PR64 Cameo grade of the present piece, it is one of nine submissions at NGC, with seven Cameos finer, and there are also 23 non-Cameos at that service. All told, there are 43 submissions at NGC and 56 at PCGS for a total of 99 pieces, more than the original number reported made. It is a certainty that a goodly number of those certification events represent duplicate coins.

This piece boasts extraordinarily deeply mirrored fields with bright yellow-gold color prevailing against a slight overlay of reddish patina. The devices are not quite frosted sufficiently to merit the Ultra Cameo designation, although the cameo contrast is evident. Light hairlining in the fields and a couple of microscopic field contact marks that require a loupe to see explain the numeric grade. NGC ID# 26EU, PCGS# 89122, CoinPlex ID# 20P1906CA

1907-D Liberty Double Eagle, PR62
Sole Branch Mint Proof
Struck in Denver This Year
Ex: Farouk

5944 1907-D PR62 NGC. Ex: Farouk. Only one branch mint proof double eagle is known to have been produced of the 1907-D, and that was on September 30, 1907. Undoubtedly, these coins were struck to commemorate the end of the long-running Coronet design, which was first struck for regular coinage in 1850.

For a mint that had only been in operation for two years, this coin shows that the Denver facility was able to produce a remarkably high-quality proof. It is, in fact, consistent in quality with proofs struck in the Philadelphia Mint in the early years of the 20th century. There is no contrast evident on either side, but many Philadelphia proofs showed no contrast either during this period, and none were purposely made that way beginning in 1902. Die polish is complete and covers all areas of the fields right up to the rims and all the devices, something that is not seen on all branch mint proof dollars from the New Orleans or Carson City mints. Close examination with a magnifier shows tiny lint marks that were struck into the coin, evidence that the dies were wiped with a cloth, and because of static electricity, some of the lint from the cloth adhered to the dies, thus being transferred onto the coin. As one would expect from a multiply struck proof, the design elements are completely brought up in all areas.

This piece was once a part of the King of Egypt's collection of coins. According to John Pittman, King Farouk had a conservator who cleaned his coins. Not all of Farouk's coins were cleaned, though, and we are unsure what criteria the "conservator" used to select the coins to be cleaned, but this piece was one of them. The surfaces are noticeably hairlined on each side. That said, the hairlining is just about the only detracting technical element keeping this coin from a higher grade. The only surface flaws worth mentioning are a vertical milling mark on Liberty's neck and a short planchet flaw in the field by star 12.

Branch mint proofs are among the rarest of the rare in U.S. numismatics. They are incompletely understood even by experts as so few pieces are known, and some grading services shy away from encapsulating certain issues. However, the coins speak for themselves, and it is apparent they were specially prepared and an attempt was made to produce a proof product that would be comparable to that struck in the Philadelphia Mint. This is a unique offering from the Denver Mint, and it may be many years before this proof 1907-D is available again in public auction.

Ex: Palace Collection / Farouk (Sotheby's, 2-3/1954), lot 184, part of a 34-coin lot; Kreisberg-Schulman (10/2/1959), lot 1844; Kreisberg-Schulman (2/1960), lot 2931; Ronnie Carr; FUN Signature (Heritage, 1/2004), lot 3227, where it brought \$46,000.

Cameo PR66 1907 Liberty Double Eagle Last of Kind, Surprisingly Well-Frosted

5945 1907 Liberty PR66 Cameo NGC. While the Liberty Head double eagle design created by James B. Longacre went through three major design types (No Motto, With Motto, Twenty Dollars) and a one-year production anomaly (the Paquet reverse), the essence of the devices carried through from the unique prototype in 1849 to Roosevelt's declaration of "atrocious hideousness" and the debut of the Saint-Gaudens design in 1907. Before the fraught evolution of the Saint-Gaudens twenty finished near the end of that year, the Philadelphia Mint struck proofs of the Liberty type, 78 specimens to send off the series.

While that figure is lower than for the years immediately preceding (compare 94 proof double eagles struck at Philadelphia for 1906), the survival rate is roughly equivalent, according to Garrett and Guth, who suggest "40 to 50" pieces extant. High-grade examples, of course, pose a significantly greater challenge than lesser coins, particularly when the collector seeks an example with what passes for contrast in the post-brilliant era. It is worth remembering that all proof Saint-Gaudens twenties are matte or satin in finish, leaving a cameo effect out of the question.

This PR66 Cameo coin has great contrast for its time, and the frost over the boldly impressed devices on each side is delicate but intact. Gleaming fields around are carefully preserved, and the piece is an all-around delight. Resubmissions to NGC give an inaccurate impression of the number of PR66 Cameo survivors, but that service has certified just two numerically finer Cameo pieces (12/12). NGC ID# 26EV, PCGS# 89123, CoinPlex ID# 20P1907CA

HIGH RELIEF DOUBLE EAGLES

Wire Rim 1907 High Relief, MS63
Modeled After the Nike of Samothrace

5946 1907 High Relief, Wire Rim MS63 PCGS. Augustus Saint-Gaudens had a lifelong involvement with working in smaller, coin-like endeavors, beginning in his youth as a cameo cutter, and later on private medals for his friends. The well-known John Singer Sargent medal displays Saint-Gaudens' familiarity with Roman cast medallions. He was also a great admirer of the Renaissance medals of Pisanello, whose influence can readily be seen on the Washington Centennial inaugural medal of 1889. The reception by the arts community of that medal was curiously prescient of the reception Saint-Gaudens would receive in 1907 with the striking of the new double eagles. Charles de Kay noted in *Harper's Weekly* the "satiny look of laid 'linen' paper" created by the fine tooling of the surface. He also commented on the depth of relief, comparable to the Greek coins of antiquity. He concluded his article by remarking on the banal character of contemporary U.S. coinage. Years ahead of his time, it was not until late 1904 that Saint-Gaudens would be called upon by President Roosevelt to spearhead the redesign of American coinage. His best-known achievement was the creation of the High Relief double eagle, a coin that was struck like those of the ancient Greeks and based on a Classical sculpture, the Nike of Samothrace. The devices are deeply incised on each side and this MS63 gives the collector excellent value with few surface flaws, the only ones of note located at the top of the sun and just above on the rays. The satiny mint luster shows the usual light reddish patina.

PCGS# 9135, NGC ID# 26F2, CoinPlex ID# SGM1907HRWIRE

1907 High Relief Twenty, MS63
Complete Wire Rim Around the Obverse

5947 1907 High Relief, Wire Rim MS63 NGC. The extruded metal, also known as a wire rim, or in Mint parlance a "fin" or "burr" completely surrounds the obverse of this High Relief, and is much less-pronounced on the reverse but still apparent around half that side. The subtle glow of satiny mint luster adds considerably to the overall appeal of this MS63. We see no overt marks that detract from the appearance and grade of this piece; well, maybe one, a small cluster of ticks below the eagle's head, but this is slight in the overall scheme of things. Moderate reddish patina is present on each side of this fully struck and highly attractive High Relief. NGC ID# 26F2, PCGS# 9135, CoinPlex ID# SGM1907HRWIRE

1907 Wire Rim Twenty, MS63
Nearly Complete Wire Rim Around Each Side

MCMVII High Relief Twenty, MS63
Wire Rim Variant

5948 1907 High Relief, Wire Rim MS63 NGC. Seldom is a High Relief encountered with a wire rim as pronounced as seen on this piece. It is an old story, but one that bears retelling, that the Wire Rim variant valued so highly by today's collectors was actually viewed by Mint officials as a striking defect, and one they unsuccessfully tried to eliminate. The problem was apparently one of extreme pressure from three blows from a hydraulic press. The collar and die faces could not hold together under that pressure, and the result was a fine rim of extruded metal around parts of the coin where even the slightest space existed. In addition to the pronounced and nearly complete "fin" or wire rim, this is a remarkably well struck High Relief. The satiny mint luster shines with underlying bright, yellow-gold color while displaying the even, reddish-gold usually found on this one-year type coin. Close examination reveals a number of small, but individually insignificant contact marks. NGC ID# 26F2, PCGS# 9135, CoinPlex ID# SGM1907HRWIRE

5949 1907 High Relief, Wire Rim MS63 PCGS. A beautiful illustration of the glorious Augustus Saint-Gaudens design, this Select Mint State High Relief double eagle is a lovely representative of the first variety with a wire rim. It is sharply detailed in lovely orange-gold brilliance, with a hint of light olive along the borders. Both sides are fully lustrous with frosty mint surfaces that show only a few scattered marks to prevent a higher grade. This piece clearly shows the painstaking care that was a necessary part of any sculpture. The striding figure of Liberty and the majestic eagle are glorious representatives of a great nation.

From The J.D. Tanner Collection. PCGS# 9135, NGC ID# 26F2, CoinPlex ID# SGM1907HRWIRE

1907 Twenty Dollar High Relief, MS64+ Pronounced Wire Rim Around Each Side

5950 1907 High Relief, Wire Rim MS64+ PCGS. CAC. After a long and highly successful career that culminated as America's preeminent sculptor, Augustus Saint-Gaudens was presented with the opportunity to leave a lasting legacy when President Roosevelt tapped him to redesign American coinage. The redesign of all the denominations was too much for him, or any individual. However, with his design for the double eagle he was able to capture the spirit and vitality of what would become The American Century. This high-end MS64 example is remarkably well-preserved with soft, frosted mint luster and no noticeable contact marks. One small alloy spot is located at 3 o'clock near the obverse rim. For specialists, the wire rim is almost complete around each side. PCGS# 9135, NGC ID# 26F2, CoinPlex ID# SGM1907HRWIRE

Wire Rim, High Relief 1907 Twenty, MS65

5951 1907 High Relief, Wire Rim MS65 PCGS. Recently we sold what is now known as the "Genesis Letter" in our 2012 Philadelphia Auction, lot 5433. That letter was the beginning of what has been termed the renaissance of American coinage. In it President Roosevelt stated to Treasury Secretary Leslie Mortier Shaw his now-famous comment about American coinage at the turn of the 20th century, and asked Shaw about the possibility of coinage redesign:

"I think our coinage is of atrocious hideousness. Would it be possible, without asking permission of Congress, to employ a man like Saint-Gaudens to give us a coinage that would have some beauty?"

Shaw replied that he did not see any problem with the president's request. Roosevelt then invited Saint-Gaudens to the White House for dinner on January 12, 1905 and the sculptor accepted the president's challenge to design a new coinage of greater artistic merit, like the high-relief coins of ancient Greece. As expected of Saint-Gaudens, who was a laborious, methodical worker, the redesign efforts were slow in coming. Looking back on the designs today, this is somewhat surprising as all the motifs for the ten and twenty dollar coins were directly borrowed from his own previous compositions, or in the case of the twenty dollar reverse, from the Flying Eagle cent. It wasn't until November 1905 that Saint-Gaudens had preliminary sketches of the ten dollar, and a written idea of what he had in mind for the obverse of the double eagle:

"... some kind of a (possibly winged) figure of Liberty striding energetically forward as if on a mountain top, holding aloft on one arm a shield bearing the stars and stripes with the word 'Liberty' marked across the field, in the other hand perhaps a flaming torch; the drapery would be flowing in the breeze. My idea is to make it a living thing and typical of progress."

This idea for the twenty dollar obverse was strikingly similar to his figure for Liberty in his Sherman Monument; however, for the coin he eventually dropped the wings and shield. Once Saint-Gaudens' concepts were translated into coin form, their three-dimensionality and high degree of workmanship have elevated them to the most artistically accomplished coinage of all time.

This Gem example has a prominent wire rim, evocative of the high striking pressure used on these pieces. Apricot-gold surfaces are lightly patinated, but aside from a shallow abrasion in the left-side reverse rays, the surfaces are free of individually mentionable marks. High eye appeal. PCGS# 9135, NGC ID# 26F2, CoinPlex ID# SGM-1907HRWIRE

1907 Wire Rim High Relief Twenty, MS66 Extraordinary Satiny Surfaces

5952 1907 High Relief, Wire Rim MS66 NGC. For his 13th birthday, Augustus Saint-Gaudens was apprenticed to a cameo-cutter named Louis Avet. The training for the sculptor he was to become was superb, but the working conditions were not. Avet would fly into rages, and Saint-Gaudens later recalled this time as “a miserable slavery.” In *The Greater Journey*, David McCullough goes into considerable detail about cameo-cutting and its significance in mid-19th century decorative art. The following paragraph reveals much about the boy’s early training and how these habits endured throughout Saint-Gaudens’ lifetime, and eventually served him as designer of the ten and twenty dollar gold pieces of 1907.

“To work with painstaking care was of the essence. There could be no rushing the process. The success of a cameo was in its design, and thus Gus learned the infinite importance of design to any work to be taken seriously. In little time he was producing remarkably accomplished, even exquisite, work.”

This “painstaking care” is abundantly evident on the sculptural, three-dimensional design seen on this High Relief double eagle. The figure of Liberty appears to be able to walk right off the coin. The wire rim is essentially complete around each side, and is especially pronounced on the right rim of the obverse. The surfaces glow with thick, satiny mint luster and each side is mostly yellow-gold with just the slightest hint of reddish patina present. There are predictably no noticeable contact marks on this extraordinary High Relief.

From The Victoria Rose Collection. NGC ID# 26F2, PCGS# 9135, CoinPlex ID# SGM1907HRWIRE

MCMVII High Relief, Wire Rim Twenty, MS66 Extraordinary Mint Luster and Overall Quality

5953 1907 High Relief, Wire Rim MS66 NGC. When looking for the source of inspiration for Augustus Saint-Gaudens' Liberty on the 1907 High Relief, one need not look too far. Several of his works are self-referencing, and the striding Liberty used on the twenty is similar in concept and design to the powerful, striding figure in *The Puritan* (1883-1886), which is located in Merrick Park, Springfield, Massachusetts. Regarding *The Puritan*, Thayer Tolles points out in her reference *Augustus Saint-Gaudens in the Metropolitan Museum of Art* that lacking an individual portrait of the Puritan,

"... it depicts not accurate physiognomy but rather the quintessential historical ideals associated with seventeenth-century pilgrims to the New World—stalwartness, uprightness, and religious fervor."

Seeing the compositional similarities between *The Puritan* and the striding figure of Liberty on the twenty dollar gold piece two decades later, one can easily adapt Tolles' observation: Lacking an individual portrait that represents Liberty, it depicts the quintessential ideals associated with the concept of Liberty of stalwartness, uprightness, and justice.

It was Saint-Gaudens' ability to depict these "quintessential ideals" that have given his Liberty on the 1907 High Relief a popularity that has endured through the generations. In fact, a slightly modified version is still used today on the Mint's gold bullion coins, underscoring the timeless appeal of his vision of Liberty. This is an extraordinary High Relief, one similar in texture to the preceding lot. The surfaces are thick and satiny with just the slightest hint of reddish patina. The wire rim is pronounced over each side, especially so on the right side of the obverse. This remarkable coin might well have been graded even higher, were it not for a solitary mark in the right obverse field and a rim bump over D S in UNITED STATES on the reverse.

From The Victoria Rose Collection. NGC ID# 26F2, PCGS# 9135, CoinPlex ID# SGM1907HRWIRE

1907 Wire Rim, High Relief Double Eagle Exceptional, Satin-Surfaced MS66 Example

5954 1907 High Relief, Wire Rim MS66 NGC. Numismatists know little about the personality of the famous designer of the ten and twenty dollar gold pieces from 1907, other than the often-exaggerated conflict between Augustus Saint-Gaudens and Chief Engraver Charles Barber. His personal determination to become a first-rate sculptor went back to his days as a student in Paris. His mother was Irish and his father French.

After several years of study at the École des Beaux-Arts, Saint-Gaudens declared in 1870, "I am heart and soul in the French cause." He said this as Prussian troops were advancing on Paris, and a decision about his future was imminent. He could go with his "heart and soul" and enlist in the French army, like his wrestling-partner Alfred Garnier and fellow-sculptor Olin Warner, or he could join the thousands of other Americans who saw the dire short-term future for the French capital.

Saint-Gaudens wrote to Garnier (in French), "I feel persuaded you think me a coward, and I don't blame you!" But he quickly answered this self-accusation by stating that if it were not for his parents, he would enlist. "But they are getting old, and love me. They have worked all their lives, are poor, and are still working. What would happen if they should lose me now?"

Saint-Gaudens' life mission to become a preeminent sculptor was set. Rather than enlisting in the French army and likely dying, as happened to painter Frederic Bazille in 1870, or retreating to America, instead, he found a third path and set out for Rome to advance his education as a sculptor. This youthful decision to pursue sculpting at all costs explains much about his three-dimensional mindset and the ultimate design of the High Relief double eagle.

This remarkable high-grade example has been meticulously preserved since the year of issue. The mint luster is thick and satiny and displays a pronounced yellow cast rather than the usual reddish hue. The strike details are strongly brought up in all areas. This is truly a coin that must be seen in person in order to be fully appreciated. NGC ID# 26F2, PCGS# 9135, CoinPlex ID# SGM1907HRWIRE

Premium Gem 1907 High Relief Twenty A Complete Wire Rim is Present Exceptional Quality

5955 1907 High Relief, Wire Rim MS66 NGC. CAC. Robert Gould Shaw was born in October 1837. Commander during the Civil War of the all-black 54th Regiment, he died in 1863 at age 25 along with many of his men in a failed attempt to wrest control of Fort Wagner, near Charleston, South Carolina, from the Confederates. An idealist and Unitarian, Shaw was exposed at a young age to the ideas of Ralph Waldo Emerson, Nathaniel Hawthorne, and Harriet Beecher Stowe. Upon taking command of the regiment, when he learned that the black soldiers would receive less pay than white ones, he urged his men to boycott until the injustice was rectified and they received full back pay.

Augustus Saint-Gaudens designed the Shaw Memorial in Boston to commemorate Shaw's heroism, and Shaw would later become the principal subject of the 1989 movie *Glory*, starring Matthew Broderick. Clearly, Saint-Gaudens viewed his work on the Shaw Memorial to be of paramount importance, taking an extraordinarily long time to work on the piece. Henry J. Duffy and John Dryfhout write in *Augustus Saint-Gaudens: American Sculptor of the Gilded Age*:

"The composition grew from the original concept of an equestrian statue of Shaw alone to a great sculptural relief that includes the marching men. The twenty-three individually modeled faces of the infantrymen in the final piece are represented in five sketch models from the forty originally done. These heads, modeled from life, provided the sculptor a full range in age and character. Moreover, the work represents perhaps the first time that African Americans were represented realistically in sculpture, not as stereotypes. ..."

From concept to creation, the sculptor worked on the monument for 14 years, and tweaking the design even after it was unveiled.

In numismatic terms, Saint-Gaudens also took an extraordinarily long time to design and create the plaster models for the ten and twenty dollar gold pieces — although there is nothing like a bit of presidential pressure from a Rough Rider to speed things up a bit. President Roosevelt and Saint-Gaudens agreed on the initial concept — three high-relief coin designs recalling that of ancient Greece — during dinner at the White House in 1905. Saint-Gaudens died in August 1907, never having seen the coins released into circulation. He saw earlier versions of the ten and twenty dollar coins, their designs modified after his death to meet the needs of high-speed Mint production and to stack properly. It is generally unappreciated, however, that the speed at which Saint-Gaudens worked on the ten and twenty dollar gold coin designs was rapid, relative to other commissions. One wonders if Saint-Gaudens' knowledge that he had cancer or the impending end of Roosevelt's presidential term — he declined to run for reelection in 1908 — had the greater influence.

The care Saint-Gaudens gave to this presidential commission is readily evident when one views this high-grade example struck in High Relief. It gives the viewer a true three-dimensional effect, and the surfaces glow with bright, satiny mint luster. There are no apparent contact marks on either side, certainly none that can be used as pedigree identifiers. The wire rim encircles each side, and as usual is more pronounced on the obverse. NGC ID# 26F2, PCGS# 9135, CoinPlex ID# SGM1907HRWIRE

1907 High Relief Double Eagle, MS61
Much Scarcer Flat Rim Variant

Flat Rim 1907 High Relief Twenty
Select Mint State

5956 1907 High Relief, Flat Rim MS61 NGC. Mint personnel called what we know as the wire rim a "fin." And the presence of a fin was definitely an undesirable trait on coinage. After most High Reliefs had been struck, attempts were made to eliminate this "flaw" but most were unsuccessful. As a result, Flat Rim High Reliefs are four to five times scarcer than their Wire Rim counterparts. The elimination of the offending fin was successful on the obverse of this coin, but less so on the reverse. The surfaces show an overall brightness and uniform light reddish patina. A loupe reveals numerous tiny contact marks, but none are large or even noticeable to the unaided eye. We predict this will prove to be a popular lot as it offers so much obvious appeal. PCGS# 9136, CoinPlex ID# SGM1907HRFLAT

5957 1907 High Relief, Flat Rim MS63 PCGS. A minority of the 1907 High Relief double eagles are Flat Rim coins with little to no evidence of the knife-edge or "Wire Rim" so prevalent on the type. This luminous example is moderately patinated and shows a mix of wispy abrasions and a few small, sharp marks, yet the sculptural qualities of the design and the all-around appeal make this a rewarding coin to behold. The 1907 High Relief twenty dollar design is an icon of U.S. coinage and prized by collectors around the world. This is a great opportunity to own an example in a decent Mint State grade for a relatively small premium over the price for a worn or impaired example. PCGS# 9136, CoinPlex ID# SGM1907HRFLAT

MCMVII Flat Rim High Relief Twenty, MS64
Very Scarce With Rims as Seen Here

5958 1907 High Relief, Flat Rim MS64 NGC. This coin is so close to lacking any trace of a wire rim. Later strikes of the High Relief attempted to eliminate the “fin” or “burr,” as it was termed by Mint employees, seen as a striking defect. This never was more than an attempt, though, as almost all Flat Rim twenties show at least some trace of extruded metal. This piece has just a bit on the reverse, from 5 to 10 o’clock, and very slight at that. The obverse is completely free from the wire rim. The surfaces are satiny, as always, with yellow-gold color that has taken on a bit of reddish hue. There are no mentionable contact marks on either side of this exceptional MS64. PCGS# 9136, CoinPlex ID# SGM1907HRFLAT

1907 High Relief Saint-Gaudens Twenty, MS65 Important One-Year Low-Mintage Issue America's Most Beautiful Coin Design

5959 1907 High Relief, Flat Rim MS65 PCGS. The son of Augustus Saint-Gaudens, Homer, wrote reminiscences of his father's life in an article published in the June 1927 issue of *The Mentor*. The first page of the article strongly underscores two points in the youth of his father's life: his persistence and cameo-cutting. The importance of cameo-cutting has often been overlooked in the development of Saint-Gaudens as an artist. At the age of 14 he was an apprenticed cameo-cutter, and this craft enabled him to earn a living wage while still in New York City. When he emigrated to Paris, he was less successful because of the abundance of talented cutters in that city. Nevertheless, he persisted, and even after he was admitted to the École des Beaux-Arts, he continued to support himself and his studies.

After he left Paris in the wake of the Franco-Prussian War in 1870, he set up shop in Rome. Once again, he returned to cameo-cutting in order to support himself until payment arrived for his first monumental work "Hiawatha." Cameo-cutting was particularly suitable training for the various bronze and plaster plaques he made throughout his later professional life, and it was invaluable when he was called upon by President Roosevelt to redesign the ten and twenty dollar coins.

High Relief double eagles are a blend of both his early skills as a cameo-cutter and his later talent for naturalistic renderings of subjects in sculptural form. The blend of both talents in the form of the 1907 twenties brought out a problem he had not previously encountered; the coins were wonderfully designed but their high relief rendered them unsuitable for high-speed coinage production. Nevertheless, President Roosevelt continued to champion the coins even after the sculptor's death in August 1907, and ordered production to commence even if it took all day and night to strike a single coin. Production was not quite that slow, but because of the high relief and multiple blows required by a hydraulic press, only 12,367 pieces were struck.

The High Relief Saint-Gaudens double eagles are known in both Wire Rim and Flat Rim varieties. This delightful Gem represents the much scarcer Flat Rim type, issued later in the year. The central design elements are sharply rendered, as expected with this issue, but the peripheries show the typical softness, due to the curvature of the fields. The pleasing yellow and rose-gold surfaces radiate vibrant mint luster, with only minor signs of contact and outstanding visual appeal. PCGS# 9136, CoinPlex ID# SGM1907HRFLAT

Flat Rim MCMVII Double Eagle, MS66 One of the Finest We Have Seen

5960 1907 High Relief, Flat Rim MS66 NGC. In a letter from Theodore Roosevelt to Augustus Saint-Gaudens dated November 14, 1905, the president told the sculptor that he had summoned Mint officials to see if he could persuade them of the desirability of producing coins "of the Grecian type but with raised rims [that] will meet the needs of the day." The Saint-Gaudens design as finally struck by the Mint in late 1907 did indeed imitate coins "of the Grecian type," but the problematic part of Roosevelt's original communiqué was with the "raised rims." The rims were raised, as required of any coin intended for circulation; however, since three blows and 150 tons of pressure from a hydraulic press were required to produce each coin this forced a thin "fin" of extruded metal up between the surface of each side and the collar. This "fin" or "burr" was seen as a striking defect, and Mint Director Frank Leach ordered it eliminated. Only the later strikings show what we now know as the Flat Rim, and even on these coins there is only a lessening not elimination of the wire rim. Perhaps intention is what we see on this coin. The intention to at least minimize the wire rim. It wasn't completely successful, however. This piece shows a slight wire rim on the right portion of the obverse rim and much of the upper reverse rim. Otherwise, the surfaces are remarkably lustrous and yellow-gold in color with only one mark of any note, that located above the sun on the lower reverse.

From The Douglas Collection. PCGS# 9136, CoinPlex ID# SGM-1907HRFLAT

PROOF HIGH RELIEF DOUBLE EAGLE

Near-Pristine MCMVII High Relief, PR66 An Unquestioned Proof Strike

5961 1907 High Relief PR66 NGC. The 1907 High Reliefs to this day remain a controversial issue when it comes to the proof format, with PCGS refusing to certify such pieces, yet NGC clearly acknowledging them. The present Premium Gem proof certainly bears all the hallmarks of those proofs, including an absolutely full strike throughout both sides. All the pillars of the Capitol building are “countable,” to use Breen’s phraseology. The surfaces are mostly yellow-gold color complementing a bit of light reddish patina. There is a complete wire rim around the obverse and about half of the reverse.

Regarding the proof 1907 High Relief twenties, Jeff Garrett, one of the coauthors of *Encyclopedia of U.S. Gold Coins 1795-1933*, posts these comments on the useful NGC Coin Explorer web site:

“Around the late 1960s or early 1970s experts began to describe certain 1907 High Relief Double Eagles as Proof. These coins are certainly different, but not exactly like the latter Proof Double Eagles of the series. There are no mintage figures and the origins of the coins are a mystery. The coins have deep swirling die lines and exhibit a satiny surface similar to the Roman finish Proof gold coins. A fairly large number exist and it is my opinion that they are the result of experimentation with the new design by Mint employees. Many, if not the great majority of the original mintage was saved when the 1907 High Reliefs were issued.”

Beyond the full strike and pristine preservation, the present PR66 NGC example also boasts a typical (if that is the right word for such an extraordinarily beautiful finish) satiny surface texture. The swirling die polish lines are abundantly in evidence.

This PR66 NGC piece is one of 23 submissions in this grade, a total that includes one PR66 ★ and three PR66+ (12/12). But beyond any labels or monikers or plastic encapsulations, this coin is a piece that speaks volumes for itself, with no need for third-party assistance. Only a few trivial contact marks separate this piece from an even finer grade PCGS# 9132, CoinPlex ID# SGP1907XHRINV

SAINT-GAUDENS DOUBLE EAGLES

Gem 1908-S Twenty Dollar Among the Finest Known at NGC

5962 1908-S MS65 NGC. The usual narrative for most of the rare mintmarked Saint-Gaudens double eagle issues from later in the series is one of high mintage — coupled with limited distribution, in many cases — and subsequent high meltage after the Gold Recall of 1933. The story for the 1908-S, however, is one of genuinely low mintage, even though most examples of the 22,000 pieces struck appear to have been released, based on the condition curve of the surviving pieces. The minuscule production places the 1908-S as the lowest among regular issues of the Saint-Gaudens, With Motto subtype. Bowers estimates that from 1,200 to 1,800 examples exist today in circulated and Mint State grades combined, for “raw” and certified pieces. That figure is consistent, or possibly an overestimate, based on certified totals at NGC and PCGS combined, 933 coins with a certainty of duplications.

The average certified survivor at NGC and PCGS — presumably the top end of the entire population — is around AU55, although certified examples range all the way from a single Fine specimen (at PCGS) up through a handful of coins in MS66 and MS67.

The present Gem is exceptional, as the issue is considered very rare in MS65 or finer; despite the wider availability of examples in the lower Mint State grades, the survivors thin out sharply above MS64. This piece offers sharp striking details overall, as usual on this well-produced issue. Vibrant luster appears throughout, with attractive greenish-gold surfaces. A few minor handling marks near the obverse rays explain the grade but are the only discernible blemishes. Census: 8 in 65, 5 finer (11/12).

Ex: Summer FUN Signature (Heritage, 7/2010), lot 4946. NGC ID# 26FA, PCGS# 9149, CoinPlex ID# SGM1908S

Premium Gem 1914 Double Eagle Notable Condition Rarity

5963 1914 MS66 NGC. No explanation of the 1914 double eagle's low mintage is complete without examining the nature of American-European trade at the time. Such trade was conducted largely in gold, which, irrespective of the issuing nation or the denomination stamped upon a coin, had an empirically testable intrinsic value that had no chance of vanishing overnight as the result of a political machination. As the tensions between the Triple Alliance and Triple Entente increased, the uncertainty affected commerce as well, and with the onset of what would be known first as the Great War and later World War I, the vessels carrying goods across the Atlantic became targets for submarine warfare, which put a chill over shipping.

Mintages for the double eagle (the largest regular U.S. gold denomination) at the East Coast Mint in Philadelphia hit a local low of 95,200 pieces in 1914, the year Archduke Franz Ferdinand of Austria was assassinated and full warfare broke out on the Continent. The coins that survive today largely are unspent or Mint State pieces, though usually with heavy marks that keep the coins out of the better Mint State tiers. While the 1914 double eagle is available for a price in grades through MS64, it is an extreme condition rarity in MS66 and unavailable numerically finer. This Premium Gem has strong yellow-gold "cartwheel" luster with apricot aspects and a narrow line of orange slanting through the rays of the reverse sun. The detail is above-average, as is the preservation, and the coin's overall eye appeal is stunning. A copper spot touching the left side of the L in LIBERTY may serve as a future pedigree marker. Census: 1 in 66, 0 finer (11/12). NGC ID# 26FS, PCGS# 9164, CoinPlex ID# SGM1914

Lustrous MS62 1920-S Double Eagle West Coast Melt Rarity

5964 1920-S MS62 PCGS. CAC. The mintage provides only an upper bound to the possible number of survivors for an issue. How many examples actually have made it to the present can be a far different story, and the mirror-twin distortions of mass saving and mass melting have turned rarity for a number of dates. The double eagles dated 1920 are a case-in-point: the 1920 Philadelphia issue saw production of 228,250 pieces, whereas the San Francisco Mint struck 558,000 of the big coins — yet today, the 1920 is one of the more common issues of the series, while the 1920-S is a prestigious rarity.

What happened? The 1920-dated double eagles were the first of that denomination since 1916 at San Francisco and 1915 at Philadelphia. World War I disrupted the international commerce that had become a prime reason for the denomination's existence. While enough 1920-dated Philadelphia double eagles went overseas for that issue to be accessible in this post-repatriation era, the 1920-S apparently languished in government holdings and never was paid out except in dribs and drabs. The subsequent San Francisco double eagle issue, the 1922-S, suffers from a similar problem of mass melting but to a lesser extent.

As an MS62 representative that is attractive, this coin hits a "sweet spot" for many collectors. Both sides have scattered small marks and Liberty's knee has a touch of flatness, but the warm yellow-gold luster across each side is rewarding. The plastic over the middle of the eagle has a wedge-shaped flaw that should not be read as damage to the coin. Population: 17 in 62 (1 in 62+), 28 finer (11/12). PCGS# 9171, NGC ID# 26FZ, CoinPlex ID# SGM1920S

Select Mint State 1921 Double Eagle Famous Start-of-Decade Melt Rarity

5965 1921 MS63 PCGS. Collectors are most familiar with the 1921 double eagle as a major melt rarity, released only in dribs and drabs and never found in quantity in the collectible era. What is not so well known is that the 1921 double eagle almost was not produced at all, and its creation and the survival of a relative handful of specimens derive from a complex sequence of events.

The 1920s were bookended by a pair of economic depressions. The second, the Great Depression, is far more famous and linked to the late-date Saint-Gaudens double eagles from 1929 on, all of which were heavily melted and difficult to obtain today in varying degrees. At the start of the 1920s, however, the United States was experiencing an economic downturn following World War I. As seen with other major wars, when the period of wartime production ended, a series of shocks hit the economy: manufacturers of tin-hats and M1903 Springfield rifles saw their orders plummet, for example, and formerly conscripted soldiers returned to civilian life, resulting in a glut of labor and the failure of many men to find work right away.

With the slowdown in business activity came a corresponding decrease in the demand for coinage. Low-mintage dates abound up and down the denominations in U.S. coinage between 1919 and 1921, particularly for dimes and half dollars, but gold production too was affected. The 1921 double eagles, for example, were not struck until the last two months of the year, as the government had no need of the coins themselves as circulating money, nor as backing for an issuance of Federal Reserve notes redeemable in gold, until the depression was over.

The 1920 double eagles too were struck as part of the "Reserve Funds," kept separate or "under seal," as noted in correspondence between Dr. Thomas Louis Compartment, keeper of the Philadelphia Mint Cabinet, and the custodians of the Connecticut State Library collection of U.S. Coins, first original owner Joseph P. Mitchelson and later Connecticut State Librarian George S. Godard. (Excerpts from their letters appear in Roger W. Burdette's *Renaissance of American Coinage* series.)

Burdette writes: "The 1920 \$20 coins were eventually released into circulation; however the 1921 pieces were retained in treasury vaults as Reserve Funds until they were melted during the mid-1930s. The 1921 double eagle remains one of the great rarities of the Saint-Gaudens series." It is worth noting that from 1922 until 1928, none of the Philadelphia issues is a prime rarity; in fact, dates such as the 1924, 1927, and 1928 are synonymous with type collecting. Only the 1921 double eagle, struck only to balance the Treasury's books and never meant to be seen by the public, stands out among the Philadelphia issues of the early to middle 1920s.

The 1921 double eagle is scarce in the aggregate and a condition rarity in Mint State, owing to the unusual pattern (in this gold series) of circulated coins making up a significant proportion of survivors. As an MS63 representative, this Select coin falls just outside the uppermost tier of survivors but provides a plenty rare prize for the dedicated Saint-Gaudens enthusiast. Striking softness on torch-hand and foot is as often seen for the issue, while softly frosted yellow-gold luster adds tints of peach and orange. The reverse is pleasingly preserved by MS63 standards, but the obverse has a grade-defining diagonal cut on the left (facing) side of the gown and smaller marks elsewhere. Nonetheless, the eye appeal is strong on the whole, making this a valuable survivor sure to be chased by collectors. Population: 10 in 63, 7 finer (11/12). PCGS# 9172, NGC ID# 26G2, CoinPlex ID# SGM1921

1927-S Twenty Dollar, MS67 Morse/Duckor Coin, Finest PCGS-Certified

5966 1927-S MS67 PCGS. CAC. Ex: Morse/Duckor. Like many other issues in the Saint-Gaudens series from the 1920s and 1930s, the 1927-S had a substantial mintage. In this case, 3.1 million pieces were produced in the San Francisco Mint in this year. However, almost the entire mintage was melted in the 1930s. In the 1940s, the 1927-S was considered the fourth-scarcest issue in the series, thought to be even more elusive than the 1927-D. From the original mintage, only 3,750 1927-S twenties were released through official channels, according to Dr. Charles W. Green.

Dealers in the 1930s and 1940s appear to have had a good grasp of the numbers available of Saint-Gaudens twenties on the market at that time. What they could not know, however, were the numbers of coins that had been exported to Europe and South America.

During the 10-year period we surveyed between 1935 and 1944, the 1927-S twenty only appeared in two of the 152 auctions examined. This extreme rarity in public auctions at the time underscores B. Max Mehl's (curiously worded) assertion in 1949: "I believe there are no fewer than three or four specimens known." Like the 1931 and 1932 twenties, the lowest price for the 1927-S during those early years was in Morgenthau's New York Collection in May 1939, where an example went begging at \$67. By 1944 the coin in the Bell sale brought \$500 with a \$125 catalog value. By the time of the Bell sale, all of the great rarities in the Saint-Gaudens series had turned up in public auction at least once. Two years later, the World's Greatest Collection 1927-S realized \$925 with a catalog value of \$175.

Then, after World War II, coins began to surface in the bullion and numismatic holdings of European banks. When most issues began to turn up, some in large numbers, former extreme rarities were downgraded to merely scarce in a few short years. In the 1950s one or two pieces at a time of the 1927-S began to show up in European gold holdings. But, unlike the 1922-S and 1926-S, it never appeared in quantity, and its rarity status has remained constant through the years.

Of the 249 pieces seen by both major services, 159 coins are in circulated grades from XF40 to AU58 (most in the latter grade), proving the 1927-S was publicly released, at least in small numbers, at the time of issue. However, the 1927-S is best known as an absolute rarity with perhaps only 140-160 individual coins surviving in mint condition. Of the Uncirculated coins known most are lower-end examples, seldom seen above MS62. At the upper end of Uncirculated, there is a small but important group of outstanding coins, perhaps as many as 14 to 16 pieces that grade MS65 to MS67. At the MS67 level there are three pieces, but the Duckor specimen is the only PCGS-certified coin (11/12). Garrett and Guth state that the Smithsonian example would grade MS67, but of course that Superb Gem is unavailable to collectors.

As with almost all 1927-S twenties, the visual focus of the present Duckor example is its bright, thick mint frost. Some are known with a satiny texture, but those are in the minority. The luster is even, light reddish-gold with the most notable variation being a single alloy spot in the right obverse field, a common trait on 1927-S twenties. The upper reverse also displays a subtle accent of lilac patina intermixed with the otherwise even reddish-gold. The strike details are strong to full on each side, and there is little evidence of the often-seen beveling on the rims, although slight irregularity is noted on the reverse. Abrasions are almost nonexistent, but for the sake of pedigree identifiers we will repeat those that have been named in previous auction appearances. A tiny mark occurs on the eighth ray on the obverse (counting from left to right), and a slightly curved scrape (most likely of Mint origin) is noted on the sun on the lower reverse that runs parallel to the edge. The extraordinary condition of this 1927-S is undoubtedly due to its unbroken pedigree since 1927. Since it was sold from the holdings of the Museum of Connecticut History in 1995, there have only been three owners: Phillip Morse, Dr. Steven Duckor, and the present consignor. A 1927-S twenty is always a focal point of any offering of Saint-Gaudens twenties. This is the finest coin known, one that has resided in two of the finest sets of this series ever assembled.

Ex: Treasurer of the U.S.; George Godard; Museum of Connecticut History (Heritage, 6/1995), lot 6027; Phillip H. Morse Collection (Heritage, 11/2005), lot 6698; Duckor Collection / FUN Signature (Heritage, 1/2012), lot 4645, which realized \$276,000. PCGS# 9188, NGC ID# 26GJ, CoinPlex ID# SGM1927S

Lustrous MS61 1929 Double Eagle 'Coin of the Crash'

5967 1929 MS61 PCGS. During the Roaring Twenties, far more investors were interested in paper profits than hard money — much to their detriment, if they were still in Wall Street shares during the stunning stock market crash of October 1929. Virtually none of the more than 1.7 million double eagles struck in Philadelphia that year ever left Treasury control, and only a few hundred examples are known today — far fewer than the number of collectors who want one. This is a more affordable example, abraded on the high points with wispy flaws in the fields but great apricot-to-gold luster. Housed in a green label holder. PCGS# 9190, NGC ID# 26GL, CoinPlex ID# SGM1929

1929 Twenty Dollar, MS64 Beautiful Color, Minimally Abraded

5968 1929 MS64 PCGS. The 1929 is best summed up in the opening paragraph of the Morse book on Saint-Gaudens tens and twenties:

"All of the issues from this date forward are great rarities in the Saint-Gaudens series. Of those five collectible issues (1929, 1930-S, 1931, 1931-D, and 1932), the 1929 is the most obtainable in terms of overall availability. Higher grade (MS63-64) coins are occasionally available, but Gems are rare."

The 1929 Saint-Gaudens twenty generally offers an excellent strike, generous luster, and attractive color that usually ranges from greenish-gold to yellow-gold. There are nonetheless few representatives at the Gem level, largely attributable to the excessive bag marks that dot the surfaces of most examples. Copper alloy spots are sometimes a factor as well. David Akers notes in the second edition of the *Handbook* that "most examples are noticeably abraded, although the occasional MS-64 with relatively smooth-looking surfaces is available. Exceptionally well-preserved 1929 Double Eagles are few and very far between."

This is a lovely reddish-gold example with significant portions of each side interspersed with lilac. Abrasions are minimal, and there are no alloy spots on either side. The strike details are strong throughout, just missing the full designation, with only slight softness noted on the high point of the eagle's breast. In terms of overall eye appeal this piece suggests an even higher grade. PCGS# 9190, NGC ID# 26GL, CoinPlex ID# SGM1929

Near-Gem 1929 Double Eagle Elusive Late Date

5969 1929 MS64 PCGS. The historical arc of the 1929 double eagle as a collectible coin is marked by periods of both underestimation and overestimation of the number of survivors. Its inclusion with the double eagles of 1930-1933 as the “Late-Date Saints” is partly a disservice; while the 1929 was a great rarity to collectors who sought an example after the mass meltings of the 1930s (see the J.F. Bell Collection of 1944, where the 1929’s price stacked up with later dates in the series), by the 1960s examples were being repatriated and the issue’s price was not keeping up with those of the 1930s.

Later on, though, multiple sources gave the wrong impression that the 1929 double eagle was more common than it really was. The so-called “England hoard of 1984,” an alleged group of 40 1929 double eagles found in that place and time, actually was a joke between dealers that made its way to Walter Breen, who published it as fact. In this century, *A Guide Book of Double Eagle Gold Coins* by Q. David Bowers radically overstated the coins’ prevalence in the marketplace; Bowers’ 2004 claim about the 1929 double eagle that “nearly 1,000 have been certified” clashes with a combined certified population of just 319 pieces as of (11/12).

As an MS64 representative, this 1929 double eagle lands in the heart of the grading range for the issue, and finer certified examples are condition rarities. Luster is bright, swirling apricot-gold with a few splashes of brighter yellow. Though several small marks and scrapes appear on each side, the coin has great arm’s-length eye appeal. PCGS# 9190, NGC ID# 26GL, CoinPlex ID# SGM1929

1930-S Twenty, MS64 Rarest of the Late-Date Saints

5970 1930-S MS64 PCGS. CAC. The 1930-S Saint-Gaudens double eagle is the second-rarest collectible business-strike issue of the series. Specialists have appreciated the rarity and importance of the 1930-S since the 1950s, but it remains an underrated issue in the minds of most numismatists today. The 1930-S has been overshadowed by the tremendous success of other dates like the 1921 and the 1927-D, both of which have sold repeatedly for more than 1 million dollars. However, the place of the 1930-S in the series hierarchy is becoming clearer, and we feel this date is due to shed its “sleeper” role and join the other elite issues of the series among the most valuable 20th century coins.

The 1930-S was among the last of the great rarities in the Saint-Gaudens double eagle series to appear on the numismatic scene. A recent survey of 152 auction sales conducted by 14 different firms between the years 1935 and 1944 failed to find any appearance of the 1930-S before the J.F. Bell Collection (Stack’s, 12/1944), lot 991. The famous Ultra High Relief and the vaunted 1927-D also made their first appearances in this sale, but all the other key dates appeared at auction on at least one occasion before this event. Even the currently uncollectible 1933 was offered nine months earlier, in the Flanagan Collection. The late emergence of the coin did not go entirely unnoticed at the time, as the lot realized \$475, but it lagged far behind the prices realized by other dates that we know to be more available today, like the 1931-D which brought \$1,100.

The elusive nature of the 1930-S became more apparent in the 1950s, when several hoards of double eagles surfaced in European banks. These finds included many dates that were previously considered extremely rare, but the 1930-S was not present in any of the holdings discovered in that period and its prestige increased accordingly. In fact, the only mention of the 1930-S being found in any foreign transactions that we are aware of was a group of four coins purchased by John Ford from Paul Wittlin in 1960. Obviously, this did little to alter the rarity ranking of the 1930-S in the long term, but it did have an immediate effect on the market price for the issue in the short term. Harvey Stack purchased all four of the coins from Ford, and when Stack’s offered a specimen in lot 1041 of the Wolfson Collection in October of 1962 the cataloger noted:

“**1930-S.** Uncirculated, with full mint bloom. Very rare and seldom available. This is the rarest San Francisco Mint Double Eagle of the St. Gaudens design. Had it not been for the fact that a few were discovered in Europe two years ago, the 1930 ‘S’ would be worth close to three times its present value. The last auction record for the coin was \$1,650.”

The lot realized a strong \$1,700, indicating that the market effects of the mini-hoard were already dissipating. The 1930-S has enjoyed continued success at auction over the years, and finally passed the 1931-D in the rarity rankings when a small group of coins of that date appeared on the market in 1984. David Akers estimates only 40-55 examples of the 1930-S remain extant in Mint State grades, with only a few specimens known in circulated condition.

We feel that this issue is poised to take a big step up in the market, and the discerning collector should bid accordingly. When this coin was last offered at public auction 13 years ago, it was described as: “The richly frosted surfaces are a few inconspicuous bag marks away from an even higher grade and the strike is exceptionally strong. Pale green-gold highlights at select angles interrupt the otherwise orange-gold coloration on both sides.”

Ex: Long Beach Signature (Heritage, 2/2000), lot 6942. PCGS# 9191, NGC ID# 26GM, CoinPlex ID# SGM1930S

1932 Double Eagle, MS66 Important Late-Series Rarity, None Numerically Finer

5971 1932 MS66 NGC. The 1932 Saint-Gaudens double eagle is the last collectible date in the series, as there is only one 1933 that is legal to own, the ex: King Farouk specimen that went to dealer Steven Fenton and sold in a 2002 Sotheby's auction for \$7.59 million. Ten other 1933s formerly in the possession of the Israel Switt-Joan Langbord family will apparently remain forever off the market.

The 1929- through 1932-dated double eagle issues are usually thought of as a subclass within the series, consisting of the 1929, 1930-S, 1931, 1931-D, and 1932. More than one reason explains such a classification. The 1928 Philadelphia issue is the last of the common, readily available, glorious-in-high-grade Saint-Gaudens twenties that collectors rightly often gravitate to for type purposes. The 1923-D plus the 1924-28 Philadelphia issues are among the most available members of the set in high grades.

In contrast, the 1929-33 issues date from the beginning of the Great Depression in 1929 through the Gold Recall of 1933 under President Franklin D. Roosevelt. While the mintage figures for the 1929, 1931, and 1932 Philadelphia issues are not especially noteworthy, both they and the low-mintage 1930-S and 1931-D never circulated in any meaningful way.

Mintage figures are one thing but, particularly in the case of large-denomination coins such as double eagles, *the number released* is another consideration altogether. Many of these late-date Saints were never used in commerce, and for some issues virtually the entire mintage, regardless of the amount minted, was melted within a few years. This is especially true of the post-1928 issues. In our catalog of the Duckor Collection (Heritage, 1/2012), lot 4648 — the 1929 issue — David Akers writes that “back in the 1940s, when dealers were really just starting to get a handle on the relative rarity of the various Saint-Gaudens issues (they knew mintage figures were of no use in that regard), the 1929 was thought to be much less rare than the 1931-D and 1930-S but otherwise comparable to both the 1931 and 1932.”

The 1931 and 1932 double eagles were considered as a pair not only chronologically but also in terms of rarity, usually appearing side-by-side in auction offerings from the late 1930s-early 1940s. It was not until 1947 that their relative rarity was discovered, based on the actual numbers released through the research of Dr. Charles W. Green. He wrote to legendary collector Louis Eliasberg in February 1947: “But the 1931 and 1932 double eagles have good reason for their scarcity for of the 1931 Philadelphia only 45 were put out, and of the 1932 Philadelphia only 110 were issued.” Finally, collectors had a yardstick by which to compare the 1931 and 1932 issues.

Today the 1932 Saint is considered the second-rarest overall of the five 1929-1932 issues except for the 1930-S, although the 1931 and 1932 are virtually neck-and-neck as the most available in Gem and Premium Gem condition. Akers says, “Strike and especially luster, color and overall eye appeal are nearly always first rate for examples of the 1932, possibly the best overall for any of the rare dates in the entire series.”

The Duckor Collection example (Heritage, 1/2012), lot 4652, was an extraordinary piece certified MS66+ by PCGS, the sole finest, which realized a remarkable \$184,000.

The present example is graded MS66 by NGC, one of nine submissions in this grade, and there are also two NGC grading events certified as MS66 ★. PCGS has seen eight submissions in MS66, plus the aforementioned Duckor coin in MS66+. It is highly doubtful that all 20 of these represent different examples. This piece shows the flashy luster the issue is renowned for. The surfaces are deeply frosted throughout both sides, creating excellent eye appeal. The color is a beautiful, consistent orange-gold. A few scattered marks are more prevalent on the obverse but do little to lessen this coin's broad aesthetic attraction. Census: 9 in 66, 0 finer (11/12).

PROOF SAINT-GAUDENS DOUBLE EAGLES

1908 Saint-Gaudens Twenty, PR67 First Year of the Matte Finish

5972 1908 Motto PR67 NGC. Matte proof double eagles were produced for the first time in 1908, all of them featuring the newer design with the motto IN GOD WE TRUST. The matte proof finish is prized by present-day collectors for its artistic European quality, but contemporary collectors preferred the old brilliant-finish proofs of earlier years. Anticipating an enthusiastic reception of the new style, the Mint accomplished a generous proof mintage of 101 pieces in 1908, but orders fell far short of the expected total. It is likely that many examples went unsold, and were subsequently melted after the end of the year. David Akers estimates the surviving population at 60-85 specimens in all grades.

The present coin is a magnificent Superb Gem, certainly among the finest known examples. The design elements are fully brought up, showing exquisite definition on the figure of Liberty and the eagle on the reverse. The columns of the Capitol building are individually countable and Liberty's torch hand shows all fingers sharply delineated. The pleasing khaki-gold surfaces are virtually free of shiny spots or other distractions. The coarse texture of the matte finish does not produce bright mint luster, but promotes an even medalllic appearance that focuses attention on the sharply detailed features of the design. This coin possesses incredible eye appeal to go with its high technical grade. NGC ID# 26GV, PCGS# 9205, CoinPlex ID# SGP1908

1912 Double Eagle, Matte PR67 None Certified Finer at Either Service

5973 1912 PR67 NGC. The matte proofs that debuted during the early years of the 20th century in America built on such coins struck at various European mints during the preceding few years, including the British Royal Mint's production of 1902-dated 11- and 13-piece matte proof sets celebrating the coronation of King Edward VII after the long reign of Queen Victoria.

The set was so unpopular with the British that it was the only matte proof set ever issued by the British Royal Mint.

The U.S. Mint in Philadelphia, after moving to new facilities in 1901, had moved to a new finish for proof gold coinage in 1902 and afterward, one that was semibrilliant or all-brilliant rather than the earlier deeply contrasted surfaces.

The introduction of new designs for the gold denominations beginning in 1907 with the Saint-Gaudens tens and twenties was a reason for the Mint to experiment with new surface finishes, and in any case, the new coinage designs were alleged to be unsuited to the old high-contrast textures.

But the matte proof finish that debuted in 1908 was equally detested by collectors on this side of the Atlantic. Playing defense, the Mint switched in 1909 and 1910 to a hybrid texture variously called Roman or satin finish. It was disliked more by most collectors, and from 1911 through the end of proof coinage in 1915 the Mint reverted to tinkering with variations on the matte theme.

The present 1912 double eagle graded PR67 is one of 12 submissions in this grade with none finer at NGC (11/12). The surfaces are a consistent, deep orange-gold color with a uniform, finely faceted texture. One thin scrape across Liberty's right (facing) breast is the only mentionable mark, although for pedigree purposes we also note a tiny pale reddish patch in the left obverse field. This is a thoroughly splendid example of the "caviar of U.S. numismatics."

From The Victoria Rose Collection. NGC ID# 26GZ, PCGS# 9209, CoinPlex ID# SGP1912

COMMEMORATIVE SILVER

1925-S California Half Dollar, MS68
Tied for Finest Certified

5974 1925-S California MS68 PCGS. Ex: Bruce Scher. Congressional legislation approved on February 24, 1925, authorized three commemorative half dollar issues, Vermont, California, and Vancouver. That legislation authorized as many as 300,000 California half dollars to be struck at the Mints (plural) of the United States. Today, we know that only 86,594 examples were distributed, and they were only struck in San Francisco.

This amazing Superb Gem is one of just five examples that PCGS has awarded the MS68 grade (11/12), exhibiting stunning surfaces with satin luster beneath delicate gold and iridescent toning. PCGS# 9281, NGC ID# 28JY, CoinPlex ID# COM1925SCALIF

Stunning PR66 Cameo 1892 Columbian Half
A Toned Yet Contrasted Beauty

5975 1892 Columbian PR66 Cameo PCGS. CAC. There are only four Cameo specimens of the 1892 Columbian half dollar in the combined certified population (11/12), and the coincidence of the grades — both NGC coins rate PR68 ★ Cameo and both PCGS pieces are PR66 Cameo — strongly points to resubmission. This is a jaw-dropping Columbian half of a level of beauty not seen at a Heritage auction since our July 27, 2002 offering of an NGC PR68 ★ Cameo example. The interplay between gold-green field-mirrors and gray device-frost fuels excellent contrast on this carefully preserved specimen, while the borders have deeper blue-green and violet elements. PCGS# 89295, CoinPlex ID# COP1892COLUMBIANCA

1922 Grant With Star Half, MS66 A Key to the Classic Commemorative Series

5976 1922 Grant With Star MS66 PCGS. CAC. Even though the 1922 Grant With Star half dollar is basically a manufactured add-on whose sole purpose was apparently to stimulate more sales of the new “variety,” the issue has also been a key to the popular “classic” silver commemorative series for decades, along with a couple of other issues. Gem coins are in strong demand among series completists, and they are rare at that grade level. The Premium Gem grade of the present coin sets it into a different class of conditional rarity: PCGS has seen only 33 submissions in MS66, plus one in MS66+ and four finer (11/12). Abundant luster permeates the surfaces of this beautiful coin, lightly pastel-toned in mint, lavender, and golden-gray tones. The sometimes-problematic cheek of General Grant is pristine here. A super example for a fine collection. PCGS# 9307, NGC ID# 28KC, CoinPlex ID# COM1922GRANTSTAR

1926-S Oregon Half Dollar, MS68 Tied for Finest Certified

5977 1926-S Oregon MS68 PCGS Secure. Ex: Bruce Scher. From start to finish, the Oregon Trail half dollar spanned more years than any other issue in the classic series of commemorative coins. The first pieces were minted in Philadelphia and San Francisco in 1926, and the last were minted at three mints, including Denver, in 1939.

Just five examples of the 1926-S have received the MS68 grade at PCGS (11/12). This Superb Gem has light champagne toning at the centers, with gorgeous peripheral russet, blue, and apple-green. Here is a sensational, sharply defined piece for the connoisseur. PCGS# 9341, NGC ID# 28KX, CoinPlex ID# COM1926SOREGON

1926 Sesquicentennial Half, MS66
Tied for Finest Certified

5978 1926 Sesquicentennial MS66 PCGS. Ex: Bruce Scher. In an era where a number of commemorative half dollars were issued to mark seemingly minor historical events, the 1926 Sesquicentennial half dollar recalled a truly national event, the July 4, 1776 signing of the Declaration of Independence. This premium Gem is an impressive piece that is tied for the finest certified at PCGS or NGC. Both sides have a base of delicate champagne toning that hosts remarkable variegated iridescence, exhibiting green, pink, and violet. Population: 8 in 66, 0 finer (11/12). PCGS# 9374, NGC ID# 28LM, CoinPlex ID# COM1926SESQUI

1953-S Washington-Carver Half, MS67
Tied for Finest Certified

5979 1953-S Washington-Carver MS67 PCGS Secure. Ex: Bruce Scher. The final issue in the classic commemorative series was the Washington-Carver series issued from 1951 to 1954. Authorized on September 21, 1951, these half dollars were issued to commemorate the lives and perpetuate the ideals and teachings of Booker T. Washington and George Washington Carver. Examples were coined at three mints from 1951 to 1954.

The 1952, 1953-S, and 1954-S issues had the largest mintages, including 88,020 of this 1953-S half dollar. This stunning example is tied for the finest certified. Both sides have deep cobalt-blue and iridescent toning with underlying frosty luster. Population: 5 in 67 (1 in 67+), 0 finer (11/12). PCGS# 9440, NGC ID# 28N2, CoinPlex ID# COM1953SWASHCARVER

1936 Wisconsin Half Dollar, MS68+ Tied for Finest Certified

5980 1936 Wisconsin MS68+ PCGS Secure. Ex: Bruce Scher. Originally part of the Northwest Territory as early as 1788, Wisconsin eventually established its own territorial government on July 4, 1836. The commemorative half dollar of 1936 marked the centennial Wisconsin Territory. The obverse features a badger on a log, the state emblem, along with arrows that represent the Black Hawk War of the 1830s. This amazing Superb Gem is tied for the finest certified, exhibiting brilliant silver luster and wisps of peripheral gold toning. Population: 25 in 68 (4 in 68+), 0 finer (11/12). PCGS# 9447, NGC ID# 28N6, CoinPlex ID# COM1936WISCONSIN

COMMEMORATIVE GOLD

1915-S Round Panama-Pacific Fifty, MS61 Looks Finer Than the Stated Grade

5981 1915-S Panama-Pacific 50 Dollar Round MS61 NGC.

For many collectors of American gold coinage, it would seem that the MCMVII High Relief double eagle, the famous Augustus Saint-Gaudens design, would be at the top of their want lists. But with all due respect to the "Saint," we suggest that the 1915-S Panama-Pacific gold coins might equally well top those want lists. Both pay tribute in their own ways to the artistic ideals of the ancient Greeks, while employing a modern American vocabulary.

However, there is no denying that the Panama-Pacific fifty dollar gold coins are far rarer than the MCMVII-dated pieces from eight years earlier. The net distributions of the round and octagonal fifties, net of melting, were only 483 and 645 pieces, respectively, while the usually seen figure nowadays for the High Relief Saints is 12,367 coins, or a mintage roughly 20 to 25 times larger than the commemoratives. Ranking the round and octagonal issues at number 26 among the *100 Greatest U.S. Coins*, Jeff Garrett and Ron Guth write:

"At one time, a complete set of Panama Pacific coins in the original frame was one of the most desirable items in United States numismatics. Boxed sets regularly traded for over \$100,000. The small boxes alone were worth over \$5,000 each. The copper frames traded in excess of \$20,000. The advent of coin certification changed the demand for original boxed sets. Today, most sets have been broken up with the coins individually graded by a major certification service. The original boxes without the coins are occasionally offered at auction and seldom bring more than \$2,000."

Today, the appearance of a single round or octagonal fifty dollar is a major event at auction. This is a bright orange-gold example that is held down in grade only by a few wispy hairlines. There are no overt marks on either side, and we suspect an eager collector will gladly step up with a strong bid for this attractive Round. NGC ID# 26HM, PCGS# 7451, CoinPlex ID# CGM1915SPANPACROUND

Panama-Pacific Round Fifty, MS65 Rarer of the Two 1915-S Large-Diameter Issues

5982 1915-S Panama-Pacific 50 Dollar Round MS65 PCGS. In addition to their extremely low mintages, part of the celebrity of the 1915-S Panama-Pacific fifty dollar coins today stems from the poor reputation of the numismatic promoter and huckster *par excellence*, Farran Zerbe. Zerbe (1871-1949) joined the ANA in 1900, serving as first vice president from 1904 to 1907 and president from 1907 to 1909. Despite this prestigious resume, Zerbe was responsible for the sour taste in collectors' mouths left by several early commemorative gold dollar issues. Take, for example, the 1903 Louisiana Purchase-McKinley and Jefferson gold dollars. Those first commemorative gold dollars were authorized to the extent of 250,000 pieces, of which 215,000 had to eventually be melted as unsold. Zerbe offered the coins for \$3 each — a price that collectors deemed excessive, at three times face value. Zerbe submitted articles and press releases to *The Numismatist*, touting the investment potential of the coins. Nonetheless, within a year of their issue, the coins' prices fell to \$2 or less. Bowers writes in *A Guide Book of United States Commemorative Coins*:

"All of this hoopla did not sit well with many collectors and dealers. In particular, Thomas L. Elder, a dealer whose business was just beginning to become important on the national scene, later wrote a virulent condemnation, stating that Zerbe, contrary to all standards of numismatic professionalism, was simply a huckster who engaged in misleading advertising and promotions."

The 1904-05 Lewis and Clark Exposition gold dollars were also associated unofficially with Zerbe, and sales were muted at best after the 1903 debacle. More than a decade later, when the 1915 Panama-Pacific Exposition rolled around, Bowers writes:

"Zerbe's reputation in the numismatic community was so poor that when the ANA decided to hold its annual numismatic convention in San Francisco in 1915, only a handful of members showed up, fewer than 20 in all — setting a record for poor attendance unequalled before or since."

None of Farran Zerbe's hucksterism was needed to sell these large-diameter gold pieces. For those with pockets deep enough, their inherent beauty was enough; yet, it also helped that the Panama-Pacific gold coins also celebrate the Panama Canal completion, a current event of monumental national importance. This Gem is a virtually perfect example of the rarest of all commemorative gold coins, and a fitting testament to the achievement. The surfaces exude bright mint frost and yellow-gold color. Exceptional quality.

From *The Richard P. Ariagno, M.D. Collection*. PCGS# 7451, NGC ID# 26HM, CoinPlex ID# CGM1915SPANPACROUND

1915-S Octagonal Pan-Pac Fifty, Unc Details Well-Preserved Surfaces

5983 1915-S Panama-Pacific 50 Dollar Octagonal — Cleaning — PCGS Genuine. Unc Details. Either a round or octagonal version of the 1915-S Panama-Pacific fifty dollar gold would form the capstone to a complete commemorative set, whether it includes only the 1903-1926 gold issues or comprises the complete silver collection as well.

Even though the round version of the Pan-Pac fifty is somewhat more elusive overall, due to lower sales that resulted in greater melting afterward, the octagonal version is the one many collectors prefer. Sculptor-designer Robert I. Aitken chose to place dolphins in the eight vertices at each corner of the octagon, front and back. The dolphins signify the joining of the Atlantic and Pacific oceans through the great Panama Canal; in addition, they commemorate the location of the festival itself, San Francisco, also known as the City by the Bay or Fog City. (Some contemporary pundits at the time the coins were issued joked that the design made it appear as though the Panama Canal had been constructed as a passageway for the dolphins.)

The respective numbers surviving, net of melting, of the round and octagonal fifty dollar pieces are well-known, 483 and 645 coins, respectively. Such figures position the pieces as among the lowest-mintage American coins of the entire 20th century, whether commemorative or not. The pieces are also stunning, the largest and heaviest gold commemoratives ever issued as part of the classic series, with a design aesthetic that makes them equally memorable artistically.

As indicated on the insert, the surfaces show the effects of light cleaning. When one tilts the coin under a light, faint hairlining is evident. However, this does not significantly impair the overall appeal of the surfaces or the intriguing design of this historic commemorative gold coin. MS62 1915-S Panama-Pacific Octagonal Fifty Dollar, Offered With Box

5984 1915-S Panama-Pacific 50 Dollar Octagonal MS62 NGC. Although the 1915-S Panama-Pacific round fifty dollar coins ended up with a smaller net distribution than their octagonal counterparts — more were melted of the round pieces, because less were sold — today, as apparently at their release, many numismatists and collectors prefer the unique octagonal design. The two are virtually identical, save for a slight size difference and the extra 16 dolphins in the eight corners around each side of the octagonals.

The obverse portrays the Greek goddess Minerva (Roman: Athena), who (according to the original publications associated with the Panama-Pacific Exposition) is “The Goddess of Wisdom, Skill, Contemplation, Spinning, Weaving and of Agriculture and Horticulture.” Carrying forward the “wisdom” theme, the reverse depicts an owl, “sacred to Minerva, the accepted symbol of wisdom, perched upon a branch of western pine.” The dolphins suggested “as they encircle the central field, the uninterrupted water route made possible by the Panama Canal.”

The original design of sculptor Robert I. Aitken also included a spider web, a feature to which Treasury Secretary William Gibbs McAdoo objected, among others. Fortunately, Aitken was able to make a few design tweaks, including the removal of the spider web, mollifying McAdoo and clearing the way for production of the coins.

Approval of the designs for the fifty dollar coins was widespread, even if few collectors could afford the outlay to actually buy an example. The August 1915 issue of *The Numismatist* comments in this regard:

“Numismatics has received a new impetus by the government’s issue of the Panama-Pacific coins. Unfortunately these are put out at double face, a handicap which is quite serious in the case of the \$50 pieces, and there are two of these, one round the other octagonal in memory of the slugs of the early settlers.”

This 1915-S fifty dollar is a pleasing, bright example with lovely mint luster. The only mark of note is located on Minerva’s helmet, with a couple of lesser edge marks noted on the obverse. Also offered in this lot is a single-coin cardboard holder for a fifty dollar octagonal piece with purple interior and gold lettering.

Coin Ex: The Emil Ross Collection (Heritage, 7/2011), lot 4429. NGC ID# 26HN, PCGS# 7452, CoinPlex ID# CGM1915SPANPAC OCT

1915-S Octagonal Panama-Pacific Fifty Dollar Lustrous Gem Example of This Remarkable Commemorative Gold Piece

5985 1915-S Panama-Pacific 50 Dollar Octagonal MS65 NGC.

The 1915 Panama-Pacific Exposition in San Francisco was a spectacle on a scale that the world had never seen before, a befitting commemoration of the monumental task of completing the Panama Canal joining the Atlantic and Pacific oceans. The 625 acres of exhibits, valued at \$50 million and costing that much more to build, included the Liberty Bell brought from Philadelphia, more than 250 groups of statuary sculpted by world-class artists, 65 acres of amusement concessions, an "art palace, the architecture of which is more beautiful than any part of ancient Greece, and which contains the largest and most comprehensive collection of pictures ever collected and shown in one place" (according to the official brochure), and an assembly line producing Model T Ford automobiles.

If one were in the mood for celebrity-watching, among the noteworthy attendees to the exposition were comedian-actors Charlie Chaplin and Fatty Arbuckle, "March King" John Philip Sousa, Buffalo Bill Cody, motion-picture director D. W. Griffith, and singer Al Jolson.

The gargantuan exhibition, rising like a phoenix from the ashes of the 1906 earthquake and fire, established San Francisco's modern-day reputation as a world-class city, among the most beautiful in the world. The 1915-S Panama-Pacific fifty dollar gold coins were a fitting commemoration of the monumental display, huge, medallion gold pieces that are the largest of the classic era of U.S. numismatics, with a historic beauty that harkens back to antiquity. To some numismatists' taste, the design of the pieces surpasses even the artistry of the legendary Augustus Saint-Gaudens. In fact, in the reference *100 Greatest U.S. Coins* the reader will find the MCMVII High Relief double eagle and the "MCMXV-S" Pan-Pac pieces on facing pages, ranked numbers 25 and 26, respectively.

This beautiful Gem embodies all the artistry put into these coins by Robert Aitken. The surfaces glow with soft mint luster and each side has lovely orange-gold patina. There are no obvious or distracting marks on either side. Three tiny planchet flakes behind the nose of Liberty are the only remotely usable identifiers for pedigree purposes.

1915-S Panama-Pacific Octagonal Fifty A Wonderful, Unimpaired MS65

5986 1915-S Panama-Pacific 50 Dollar Octagonal MS65 PCGS.

The 1915 Panama-Pacific Exposition was a dual observance, not only of the completion of the Panama Canal in 1914, but also a celebration of the quadrennial (more or less) of the discovery in 1513 of the Pacific Ocean by Spanish explorer Vasco Núñez de Balboa. There was a not-so-subtle subtext to the exposition, however, one of paramount importance to San Francisco and the local economy: The Panama-Pacific Exposition was also San Francisco's opportunity to exhibit itself as a city reborn after the great earthquake and fire of 1906, a great phoenix risen from the ashes of calamity.

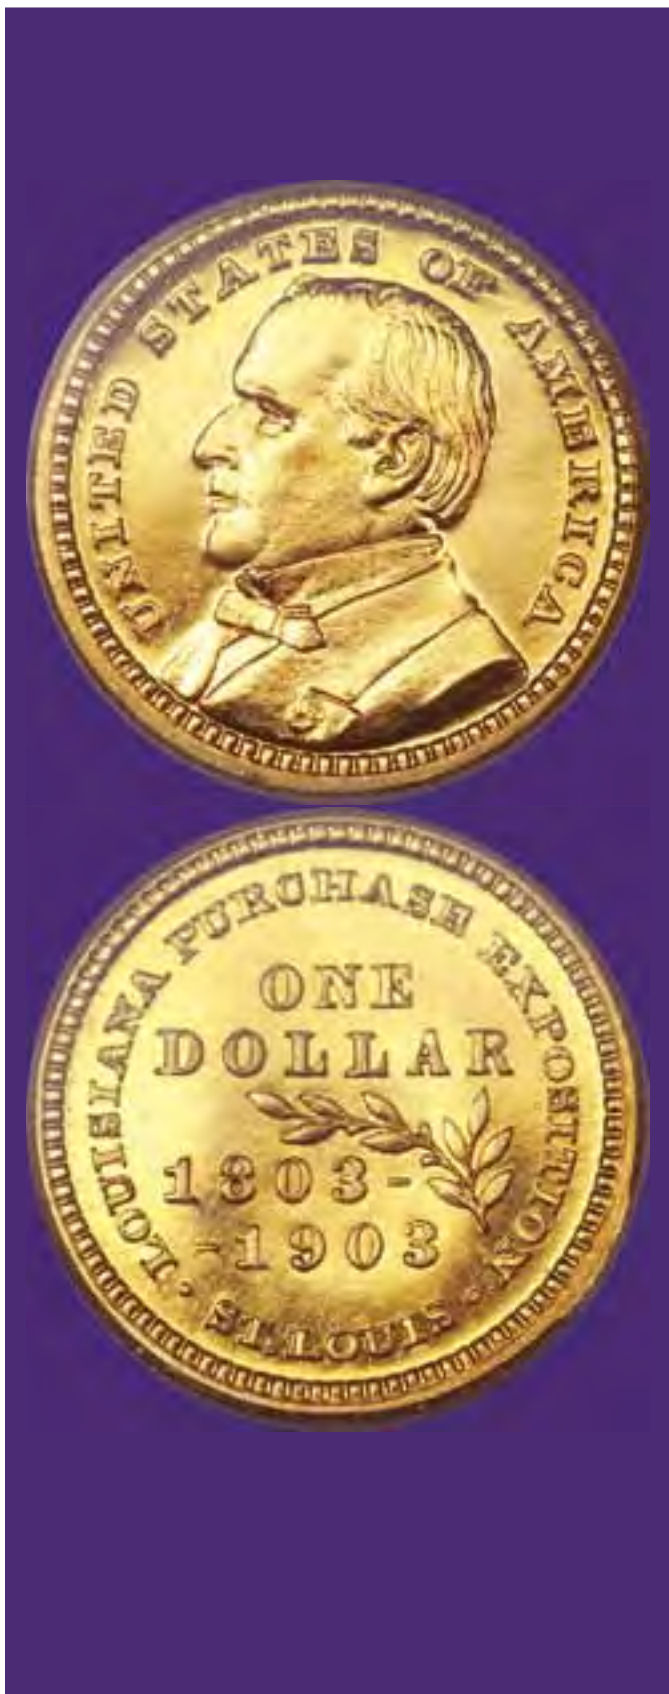

The 1906 earthquake and fire resulted in the loss of more than 3,000 lives according to modern estimates, the greatest natural disaster in California history, one that has been likened to Hurricane Katrina in recent times. San Francisco by the time of the 1915 exhibition was a city that showed virtually no remaining damage — but the rush to rebuild came at great cost. Although the initial building codes propounded after the earthquake were more stringent, they slowed overall construction and were relaxed after about a year, actually ending up looser than those existing before the earthquake. In the 1989 Loma Prieta earthquake, the largest since the 1906 temblor, damage was particularly heavy in San Francisco's Marina District, where four people died, 11 buildings were destroyed by fire or collapsed, and 63 damaged structures were condemned as unlivable. The damage was attributed both to land that was filled with rubble from the 1906 quake as well as sand and debris put down in preparation for the 1915 Panama-Pacific Exposition.

The 1915-S Panama-Pacific round and octagonal fifty dollar gold coins also had their roots in earlier ground, although with far happier outcomes. The design of both types harkens back to classical themes of the Athenians, while the shape of the octagonal coins is a tribute to the "slugs" or "ingots" coined by Augustus Humbert and the U.S. Assay Office of Gold in 1851-52, situated in San Francisco as well. Just as many of the earlier octagonal gold coins were melted to produce early federal gold coinage at the San Francisco Mint starting in 1854, so too were many of the round and octagonal Pan-Pac fifties melted as unsold, due to their high face value and relative unaffordability by most attendees to the 1915 exposition.

The size of these commemorative fifty dollar gold pieces was enormous at 2.5 ounces of gold in each one, and their size was equally large at 45 millimeters. This Gem has lovely, unimpaired mint frost. There are no marks of note, the only "defect" is a hook-shaped strike-through over Liberty's nose.

From The Richard P. Ariagno, M.D. Collection. PCGS# 7452, NGC ID# 26HN, CoinPlex ID# CGM1915SPANPACOC

PROOF COMMEMORATIVE GOLD

1903 McKinley Gold Dollar, PR65 Cameo
100 Proofs Minted

5987 1903 McKinley PR65 Cameo PCGS. CAC. As with the Columbian half dollars, the first classic silver commemoratives, the first classic *gold* commemoratives, the Louisiana Purchase gold dollars with both Jefferson and McKinley obverses also had a limited quantity of proofs struck, 100 of each design, for distribution to selected recipients. This Cameo Gem survivor of the latter design has unusually bold honey-gold mirrors and shining, frosted devices. Both preservation and eye appeal offer undeniable excellence. A great opportunity for the series enthusiast. Population: 3 in 65 Cameo, 1 finer (11/12). PCGS# 87483

TERRITORIAL GOLD

1851 Baldwin Ten Dollar, K-4, AU58+ Very Rare High Grade Survivor

5988 1851 Baldwin Ten Dollar AU58+ NGC. K-4, High R.6. The California firm of Baldwin & Co. produced a number of gold coins in 1850 and 1851, during the early years of the California gold rush. Their most famous issue is the Vaquero piece, also known as the Horseman, although the present style with the more traditional design with Liberty on the obverse and an eagle on the reverse is actually the scarcer variety of the two based on grading populations. Don Kagin writes in *Private Gold Coins and Patterns of the United States* that these pieces were struck from convex dies, giving a slightly dished appearance to the coin. This particular specimen does not exhibit that characteristic.

In the earliest years of the California Gold Rush, there were no truly disinterested parties — only those who were trusted and those who were not. While an assayer or coiner had the trust of others, it flourished; when that trust was gone, justly or not, no handler of gold could stay in operation for long. The firm of Baldwin & Co., successor to California State Assayer F.D. Kohler's business, learned just how fragile Gold Rush reputations could be, and at great expense. James King of William, the miner-banker-journalist, stirred up a proper hornet's nest with his mass publication of assay results for private coins by a variety of issuers. Don Kagin called this "the most notorious chapter in private gold coinage." The assays were conducted by Augustus Humbert, who could hardly be considered a disinterested party, but the Baldwin & Co. counter-assays from State Assayer Kohler were no more neutral, and King had "struck first," as it were. Rapid discounting and melting of the Baldwin pieces eliminated them from circulation. This mass melting created what are today major rarities in the territorial series.

This is an unusually high-end 1851 Baldwin ten dollar coin, one of only 12 different grading events at PCGS and NGC combined. As submission events often overlap at the two grading services it is likely that there is some duplication. This specimen is the only AU-58 of any designation at either service, with only a few graded higher. Its yellow-orange surfaces are generously lustrous, and only a touch of wear mingles with the striking softness evident on the highest areas of the design. Perhaps the most remarkable thing is that the coin is completely original, as if it were pulled from circulation shortly after issuance. It has never been cleaned or preserved, as have so many territorials, in search of a higher grade. The die break sometimes seen at star 4 on the obverse is absent here. Individually significant marks are few. The PCGS population in all grades is 7, and the NGC population is as follows: VF35, AU55, AU58+ (the present coin), MS60, and MS62. This coin is the second finest that Heritage has ever offered, trailing only the MS62 coin that we sold in August of 2007, demonstrating that opportunities to acquire these rarities are few and far between. Listed on page 383 of the 2013 *Guide Book*.

Ex: Thomas L. Elder's sale of the Dr. George Alfred Lawrence collection, June 28th 1929, at \$1550.00. This was a significant price at the time as the same sale contained AU examples of the Mormon Ten Dollar, Twenty Dollar, and Pikes Peak Mountain Twenty at \$1125, \$725 and \$900 respectively. PCGS# 10031

Very Rare C. Bechtler Quarter Eagle, MS62
K-11, 64 Grains, Uneven '22'

5989 (1837-42) C. Bechtler Quarter Eagle, 64G. 22C. MS62 NGC. K-11, R.6. All coins are products of their circumstances, and private coinages such as the Bechtler gold pieces of the southeastern United States show many of their influences in raw, unpolished ways. While the Bechtler coinage is silent on the more sordid side of the Piedmont gold rush — the infamous “Trail of Tears,” in its narrowest sense, refers specifically to U.S. forces’ removal of Cherokee from gold-containing lands and the subsequent thousand-mile forced march to present-day Oklahoma — coins such as this quarter eagle speak to later developments in the area’s nascent gold economy.

While Georgia-based Templeton Reid was the first notable private gold coiner of the Piedmont Gold Rush, the Bechtler family were metallurgical pioneers in North Carolina. As described in Donald Kagin’s *Private Gold Coins and Patterns of the United States*, Christopher Bechtler, Sr. was born in Phorzheim, Baden, in 1782. (Kagin refers to Baden, in present-day Germany, as a “Grand Duchy.” While this was true at the time of the Bechtler family’s immigration to the United States in 1829, at the time of Bechtler Sr.’s birth, Baden was a margraviate within the decaying Holy Roman Empire.) Bechtler Sr., an expert metallurgist, brought along his sons Charles and Augustus, as well as a nephew also named Christopher. Though they initially settled in the north — the family arrived in New York City and applied for citizenship and set up shop in Philadelphia — within a year of arrival, they bought land in Rutherford County in North Carolina and moved down there, where they began a coinage dynasty.

This 64-grain C. Bechtler quarter eagle is undated but was struck either just before or contemporaneously to the Charlotte Mint’s earliest years of operation. Its orange-gold surfaces are lightly abraded but unworn and considerably reflective, especially on the denomination side. The uneven placement of the paired “2” symbols (for 22 carats) underscores what must have been rough coinage conditions, though slightly rarer “Even 22” coins were struck at the same weight limit. Listed on page 373 of the 2013 *Guide Book*. PCGS# 10073

Impressive C. Bechtler Five Dollar, MS61
140 G, 20 C, RUTHERFORD, Rare K-17

5990 1834 C. Bechtler Five Dollar, 140 G, RUTHERFORD, Plain Edge MS61 PCGS. K-17, R.5. This private Carolina gold issue produced under the name of the eldest Bechtler (which he shared with his nephew) is rare, to be sure, but beyond such concerns, this is a coin with *character*. Both sides are primarily pale yellow-gold and distinctly reflective, flashing even at arm's length. The left reverse shows both prominent adjustment marks and plain striking weakness in the peripheral zone at CAROLINA; an overadjustment, perhaps? The obverse has its own quirks, thanks to coppery skeins of orange and crimson through the margins and splashed to a lesser extent on the interiors. An intriguing piece. Listed on page 365 of the 2013 *Guide Book*. Population: 2 in 61, 1 finer (12/12). PCGS# 10091

Select Mint State 1851 Humbert Fifty Dollar Lettered Edge, 880 Thous., No 50, K-2

5991 1851 Humbert Fifty Dollar, Lettered Edge, 880 Thous. MS63 NGC. K-2, R.5. The difference between an ingot and a coin is not always clear-cut. The *S.S. Central America* wreck of 1857 illustrates the two now-familiar extremes: the hefty assayers' ingots, such as the "Eureka" ingot, clearly were not intended as money, just as the rows upon rows of 1857-S double eagles recovered from the ocean floor clearly were. Going back a few years, however, were several issues in a "gray zone" that blurred the line between ingots and coins.

Both of the most prominent "money-ingots" were produced by assaying firm Moffat & Co., though they have significant differences as well as commonalities. The first Moffat & Co. issues to see use as currency were their small-format rectangle-face ingots of "20 3/4 Carat" fineness (equivalent to 864 or 865 fineness on a thousand-point scale) with the weight expressed in a dollar value at \$20.67 to the troy ounce of pure gold, not the number of troy ounces.

While unique examples of Moffat & Co. ingots with face values of \$9.43 and \$14.25 are in the Smithsonian Institution's National Numismatic Collection, the \$16.00 face value was issued in some quantity and survives in multiples today. The combination of a regular value and a trusted authority — by mid-1849, Moffat & Co. had a solid reputation as assayers for the nascent gold rush economy — made the \$16.00 ingots functional money, not long after the first round private gold coins were produced by Norris, Gregg & Norris in Benicia City.

Round private coins from Moffat & Co. followed later in 1849 and in 1850, but the post-statehood 1851 issues bearing the words UNITED STATES OF AMERICA officially were "ingots," not coins, with the octagonal shape chosen to make a distinction between traditionally round coins and these pieces. The earliest versions adhered to this quasi-fiction stringently, with both the fineness (880 thousands on two types, 887 thousands on another) and face value punched into the surface of the "ingot." The values in particular, expressed in "D" and "C" (dollar and cent terms) with spaces for each further convey the character of these pieces having the potential for variation from the fifty dollar baseline, though no such examples are known.

While later Moffat-and-Humbert collaborations enshrined regular denominations (the Reeded Edge versions of the octagonal fifty dollar "ingots" have the denomination FIFTY DOLLS. as an integral part of the design), they still existed in that uncomfortable space between coin and ingot, a contradiction that went unresolved in practice until the round Moffat-Humbert collaborations of 1852 and in theory until 1854 and the opening of the San Francisco Mint.

This is an uncommonly well-preserved example of the K-2 variety of Humbert fifty dollar with 880 fineness and no "50" on the reverse. Lustrous surfaces are largely apricot-gold but have significant reddish-violet aspects surrounding the lettering on the obverse. While the gold surfaces show their share of light abrasions and a planchet flaw interrupts the reverse pattern at 8 o'clock near the center, the high points do not show evidence of wear and the all-around eye appeal is strong. The *NGC Census Report* overstates the number of examples available in this fine grade because of resubmissions. Listed on page 376 of the 2013 *Guide Book*. PCGS# 10196

1851 Humbert Fifty Dollar, 'Target' Reverse
K-5, 880 Thous., XF40

5992 1851 Humbert Fifty Dollar, Reeded Edge, 880 Thous. XF40 NGC. K-5, Low R.5. The 1851-dated Humbert obverse with 880 THOUS. on the banner, "target" reverse design, and reeded edge. The bright yellow-gold example offered here is well struck overall, though the peripheral lettering, particularly at the upper obverse words UNITED STATES ASSAYER, shows weakness. It shows clear evidence of being in circulation, with wear focused on the high points of the obverse and a number of scattered abrasions and rim nicks. A handful of bumps are noted on the corners as well. Though these flaws are present, the luster and eye appeal are considerable, as is the desirability of this hefty and famous issue. Listed on page 379 of the 2013 *Guide Book*. PCGS# 10211

1852 Humbert Eagle, AU58
Very Rare 'K-10c' Reverse

5993 1852 Humbert Ten Dollar AU58 NGC. "K-10c," R.6. Unlisted in the classic Kagin reference, this rare reverse die shows the legend beginning AUGUSTUS HUMBERT, and the N in UNITED is centered between the O and F in OF on the line below. On the reverse, a bold die crack runs from the rim at 1:30 through the M in HUMBERT, the last S in STATES, the L in CALIFORNIA, and the 8 in the date 1852, gradually fading out below. Several of the letters in the legend are weak due to advanced die deterioration, and the A in STATES is nearly effaced. Die deterioration is prominent on the obverse as well, where the first three letters in STATES are weak, as are the left scroll border and portions of the ribbon the eagle bears in its beak. Contact marks and wear are minor overall, although the advanced die state makes actual wear look a bit more prominent than it in fact is. The surfaces show considerable luster remaining on yellow-gold surfaces with some smoke-gray and orange accents. Census: 8 in 58, 5 finer (10/12). Listed on page 379 of the 2013 *Guide Book*. PCGS# 10187

Mint State 1852 Humbert Ten Dollar
K-10a, Advanced Obverse Die State

5994 1852 Humbert Ten Dollar MS60 NGC. K-10a, Low R.4. On the reverse, the Y in ASSAYER is centered between NI in CALIFORNIA. The late state of the 1852 Humbert obverse die, showing extensive die crumbling on the letters of UNITED, a variant that Don Kagin called IUNITED — but that would imply a lack of the horizontal footer at the bottom of the U, while the opposite is true: The heavy die cracks make both the vertical ascenders and the horizontal footer of the U heavier than normal. Much of the bottoms of UNITED and STATES are connected by heavy die breaks, and the N is little more than a blob; the I in UNITED appears to be missing its upper serifs. Heritage cataloger Brian Koller writes in an article in the December 18, 2006, *Coin World* that the Humbert ten dollar pieces' "... method of die manufacture, with many hand-punched elements, puts them in a category similar to the Bechtler gold pieces of North Carolina and Georgia, which are currently collected (and listed in the *Guide Book*) by die variety." This is a beautiful and rare Mint State example with much luster appearing over highly attractive orange-gold surfaces. Listed on page 379 of the 2013 *Guide Book*. PCGS# 10187

1855 Kellogg & Co. Double Eagle, AU58
K-3b, Fill-In for the Nascent U.S. Mint

5995 1855 Kellogg & Co. Twenty Dollar AU58 NGC. K-3b, R.5. Short arrows, O of CO in Liberty's hair. The long-expected opening of the San Francisco Mint in 1854 failed to alleviate the sporadic shortages of gold coins in California of denominations smaller than the octagonal, bulky "slugs" or quintuple eagles. Kellogg & Co., as well as Wass, Molitor, stepped in to help fill the void with 1855-dated twenty dollar gold pieces. This piece displays a few scattered ticks and hits, but much of the original luster remains over beautiful deep orange-gold surfaces. The last 5 in the date is partially effaced on the flag, apparently as struck, or at least partially so. The reverse shows fewer marks overall than the obverse. Census: 16 in 58, 11 finer (11/12). Listed on page 387 of the 2013 *Guide Book*. PCGS# 10225

1849 Copper Die Trial, AU55
Massachusetts & California Company Five
Kagin 2-B

5996 1849 Massachusetts & California Copper Die Trial AU55 PCGS. Kagin 2-B, High R.7. There are two different versions of the Massachusetts & California Co. five dollar gold pieces. The first version, and the type offered here, has the denomination spelled FIVE D. and those are the die trials struck at the time of the Gold Rush. The second version was struck in the early 20th century, possibly by Stephen Nagy, and has the denomination presented as 5 DOLLARS. These versions are sometimes called Original and Restrike pieces. Obviously, the Original examples are more highly prized than the restrikes.

This specimen has been off the market for 40 years. Our consignor notes: "I have had the coin in my collection since 1972. Only two examples have been graded by PCGS. Mine was first — I submitted the coin to PCGS in 1999 for grading, and only one other has appeared since that time — also graded AU55."

Medium to dark olive surfaces appear on both sides with some splashes of lighter tan on this Choice AU specimen. A trace of wear and minor handling marks appear on each side of this pleasing piece. Here is an extremely important opportunity to acquire an elusive piece of California Gold Rush history. PCGS# 10230,

K-1 1849 Mormon Quarter Eagle, XF40

5997 1849 Mormon Quarter Eagle XF40 NGC. K-1, High R.5. While the first quarter eagles made from California gold were the famous CAL. commemoratives dated 1848, the initial coinage of quarter eagles in California gold *west of the Continental Divide* was a private coinage in Utah, made from metal brought to the Great Salt Lake Valley by Mormon soldiers-turned-miners who had been in California for the earliest gold discoveries in 1848. This example is faintly lustrous despite wear and has pale yellow-gold surfaces with deep oranges and violets at the rims, a confirmation that this piece was not, as the acronym on the obverse states, "pure gold." Isolated striking weakness renders the 1 in the date and the L in LORD invisible, but this remains an important artifact of American religious and economic history. PCGS# 10259

PATTERNS

K-5 1850 Mormon Five Dollar, VF35
Sole Mormon Issue of Year

5998 1850 Mormon Five Dollar VF35 NGC. K-5, High R.5. Rich orange-gold color with significant violet elements through much of the fields, an indicator of copper. The clasped-hands obverse motif and crowned eye on the reverse have their outlines intact, though the obverse shows a degree of rim merging that reaches the S in DOLLARS. Little "raw" California gold was available to sustain coinage production in Utah and non-Mormons found the coinage suspect, so the 1850 issue cut back from four denominations in 1849 to just one. Previously graded VF35 by PCGS; insert accompanies lot. Listed on page 389 of the 2013 *Guide Book*. PCGS# 10265

1851 Copper Seated Dollar Judd-132
Restrike, PR66 Brown Ex: Lemus

5999 1851 Dollar, Judd-132 Restrike, Pollock-159, Low R.7, PR66 Brown NGC. Ex: Lemus Collection. Both obverse and reverse dies feature the designs used to coin the 1851 silver dollar restrikes. The obverse can be distinguished from the original 1851 dies because the date is centered. On the original dies the date is slanted upward. Struck in copper with a reeded edge.

Mint Director James Ross Snowden responded to collector demand for the 1851 silver dollar by including it in his restrike program in 1859, but copper specimens did not appear on the market until several years later. The first auction appearance of Judd-132 was in the F.S. Edwards Sale (Edward Cogan, 10/1865), lot 1995. The lot sold for \$12, a considerable sum at the time. This issue has remained popular with collectors ever since and always causes excitement in its rare auction appearances.

The present coin was featured in the 195th Auction Sale (Bolender, 3/1959), lot 115. Bolender's partial description includes: "Excessively rare, only 4 or 5 minted. ... Only the second I have handled, in over 50 years of dealing. More than 100 times as rare as the 1851 dollar in silver which sells for over \$500." Since Bolender's time, a few more examples of Judd-132 have surfaced, but USPatterns.com estimates fewer than a dozen specimens exist.

Sharply struck, with fine detail visible on all design elements. There is a partial wire rim on both sides. Deep brown color is pleasingly mixed with subdued mint red, with cerulean-blue highlights. Outstanding eye appeal.

Ex: 195th Sale (Bolender, 3/1959), lot 115; The June Sale (Stack's, 6/1986), lot 434; Lemus/Queller Collection, Part Two (Heritage, 1/2009), lot 1536.

Dateless Flying Eagle Cent Pattern
PR62 Brown, Judd-179

6000 Undated Flying Eagle Cent, Judd-179, Pollock-207, Low R.7, PR62 Brown PCGS. Snow-1858 PT1b. 4.66 gm. The obverse shows the Flying Eagle device as introduced for circulation on the small cent in 1857, but there are no legends. The reverse is the regular issue High Leaves, Closed E cent of 1857. The date and country name are absent. Traditionally designated as a 1856 pattern, though "fleagle" expert Rick Snow believes the pattern was struck in 1858. The reverse is the same as the Snow-9 1856 cent struck for collectors during the late 1850s. Struck in pure copper with a plain edge. This specimen has a needle-sharp strike and deeply blended golden-brown and powder-blue toning. A minute obverse rim nick at 4 o'clock and a couple of faint hair-thin lines on the right obverse field identify the present piece. PCGS# 11783,

Undated Flying Eagle Cent, PR64 Brown
Judd-179, Snow-9 Reverse

6001 Undated Flying Eagle Cent, Judd-179, Pollock-207, Low R.7, PR64 Brown PCGS Secure. Snow-1858 PT1b. Similar to the regular issue Flying Eagle cent, except the obverse legends are absent. Although undated, this pattern is traditionally assigned with the 1856 varieties. Rick Snow believes that Judd-179 was struck in 1858, as part of a lengthy series of cent patterns produced that year. The reverse die was used to strike the "common" Snow-9, Judd-180. Struck in copper with a plain edge. This is a fully struck Choice proof whose deep mahogany-brown fields exhibit sea-green and cobalt-blue undertones. We note a small reverse rim flaw, likely a strike-through, at 9 o'clock. PCGS# 11783, CoinPlex ID# PAT1856J179BN

1863 Cent Pattern, PR65 Red and Brown L on Ribbon, Judd-301 Tied for Finest Certified

6002 1863 One Cent, Judd-301, Pollock-363, R.8, PR65 Red and Brown PCGS. Eagle Eye Photo Seal. The obverse features the regular Indian cent design of 1864, with the pointed bust truncation and Longacre's initial on the ribbon. The reverse was from a regular die used to strike proof cents in the 1868-1870 era. Struck in bronze, with a plain edge.

Research by Richard Snow indicates the extremely rare Judd-301 pattern cents were struck in the late 1860s, during Henry Linderman's first term as Mint Director. The same dies were used to strike patterns in copper-nickel, aluminum, and possibly orioide, as well. Judd-301 was unknown to most 19th century collectors, including Robert Coulton Davis, who wrote the first extensive work on patterns in 1885.

It was not until the following letter to the editor was published in the December 1903 edition of *The Numismatist* that knowledge of this issue became widespread:

"MY DEAR SIR: Please find space in December No. for a notice of my discovery of the little capital 'L' on a nickel cent of 1863. It is usually credited with making its first appearance on the 1864 bronze cent and is spoken of as 'L on ribbon,' etc.

"This little L is extremely small, but is intentionally there to record Longacre's artistic design of workmanship. It can be found by using a magnifying glass and looking under the middle of the last feather of the helmet and next to the hair. Also that a line drawn from 'A' in STATES to 'C' in AMERICA cuts through this letter 'L.' I cannot learn of any other example but this one of mine and it is a proof. It came from our old friend, Wm P. Brown, among a lot of proofs.

"Very truly yours,

"Wm. E. Hidden"

Three examples of Judd-301 have been traced in the literature, but PCGS lists four examples certified, one in PR63 Red and Brown, one in PR64 Red and Brown, and two in PR65 Red and Brown. Meanwhile, NGC lists two examples in their Census, one in PR64 Red and Brown and one in PR65 Red and Brown (11/12).

The present coin is a stunning Gem, at least tied for finest certified, providing the other PR65 coins in the population data are not resubmissions of this piece. The design elements are well detailed and the all-important L is visible with light magnification. The pleasing surfaces display a mixed patina of original red and cerulean-blue, with bright mirrors underneath. Tremendous eye appeal, the highest available technical grade, and intense historic interest make this coin a prize for the advanced pattern collector. PCGS# 70456, CoinPlex ID# PAT1863J301RB

1865 With Motto Seated Dollar in Copper
Judd-435, PR64 Red and Brown

6003 1865 One Dollar, Judd-435, Pollock-508, Low R.7, PR64 Red and Brown PCGS. CAC. Ex: Samuel Bergard Collection. The obverse die is the design adopted for regular-issue coinage of silver dollars in 1865. The reverse die is the design adopted for use in 1866, with a scroll containing the motto IN GOD WE TRUST added above the eagle's head. Struck in copper with a reeded edge. Probably a dozen or so examples of this scarce and popular With Motto issue are believed known. Each side shows significant amounts of original mint red, but it has mellowed just a bit. The devices are sharply struck throughout, and the obverse fields display horizontal striations that were not polished out of the die. PCGS# 70620, CoinPlex ID# PAT1865J435RB

1866 Washington Nickel in Lead
Judd-520, PR60

6004 1866 Five Cents, Judd-520, Pollock-547, R.7-8, PR60 PCGS. The obverse depicts George Washington, facing right, UNITED STATES OF AMERICA and the date at the margin. The reverse is the No Rays nickel design used from 1867 onward. Struck in lead with a plain edge. USPatterns.com has this to say about these oddities:

"This muling is believed to have been struck outside the mint from dies sold as scrap metal which were purchased by Joseph Mickley. Many of these coins ended up in the Crosby collection. It is not known if Mickley or Crosby was the actual minter of these coins."

This piece has a medallion alignment and shows evidence of heavy die rust on each side. The vertical reverse die crack is heavy. The surfaces are dark overall with a dig out of the field on each side. Only four pieces are known in lead.

Ex: R.K. Harris (Kreisberg-Schulman, 5/1958), lot 2496; Auction '89 (Stack's session, 8/1989), lot 1848; Bowers and Merena (9/1994), lot 932; ANA Signature (Heritage, 8/1996), lot 5011, where it brought \$3,520; Samuel Bergard Collection (Stack's, 7/2008), lot 4190, unsold; Keusch, Snow, & Del Zorro Collections (Stack's (11/2008), lot 3937, unsold. PCGS# 60717, CoinPlex ID# PAT1866J520

1867 Cent Struck in Nickel Judd-552, MS65 Only Three Pieces Confirmed Known

6005 1867 One Cent, Judd-552, Pollock-614, R.8, MS65 NGC. Listed as a regular dies trial piece, struck from the dies of a regular issue Indian cent. Struck in nickel with a plain edge. This is an extremely rare pattern issue with only three or four pieces believed known. It is also an issue that is not without controversy, as explained on the USPatterns.com website: "This may also be a mint error struck on leftover stock used to strike J406-J406A/P475-P476 or on misrolled nickel 5 cent piece stock. Only 3 or 4 are believed to exist including the illustrated example illustrated above which is a business strike and not a proof." The photo on the website appears to be this very coin.

The surfaces are without a doubt consistent with a business strike. The strike details are soft, as one would expect from a nickel planchet, and no attempt was made to polish the dies or planchet, thus the MS designation. Additionally, there are several die cracks present on the reverse. But one does have to wonder, how would nickel planchets be produced for a cent by accident? And if they were, surely there would be more than the three or four pieces known. Which brings up the question of intention. What was the intention when this coin was produced?

The surfaces display the usual even, light gray color of nickel. This piece is identifiable not only by the weakness of high-point definition, but also by a tiny spot located below the eye of Liberty. PCGS# 60762, CoinPlex ID# PAT1867J552

Experimental 1868 Aluminum Proof Set Cent Through Double Eagle, 16 Pieces Finest of Only Three Sets Known, Ex: Garrett

6006 1868 Complete 16-Piece Aluminum Pattern Proof Set, Cent Through Double Eagle, PR63-PR67 Cameo NGC. R.8 as a Set. This lot includes a complete 16-piece experimental proof set, illustrating all the denominations minted in 1868, struck in aluminum from regular dies. Also included is the original velvet-lined morocco presentation case that housed the coins when they were produced at the Philadelphia Mint.

1868 Indian Cent, Judd-612, PR66 ★ Cameo NGC. The design elements are richly frosted and sharply detailed, providing bold cameo contrast with the pristine reflective fields.

1868 Two Cent Piece, Judd-614, PR66 Cameo NGC. A sharply detailed Premium Gem with brightly reflective surfaces that show distinct elements of contrast with the frosty devices.

1868 Three Cent Nickel, Judd-621, PR67 Cameo NGC. The fields of this delightful Superb Gem show an unusual depth of reflectivity, causing the sharply detailed devices to stand out in exquisite cameo contrast.

1868 Three Cent Silver, Judd-622, PR65 Cameo NGC. A few hints of light gold and lavender toning enliven the mostly brilliant mirrored fields of this boldly contrasted Gem.

1868 Shield Nickel, Judd-636, PR63 Cameo NGC. This sharply detailed Select Cameo specimen displays deeply mirrored fields that show just a couple of minor contact marks near the lower-right obverse rim.

1868 Seated Liberty Half Dime, Judd-639, PR66 Cameo NGC. The deeply mirrored surfaces of this impressive Premium Gem are graced by light traces of champagne-gold and lavender patina, and the frosty design elements provide excellent field-device contrast.

1868 Seated Liberty Dime, Judd-649, PR66 Cameo NGC. Razor-sharp definition is evident on all design elements, and the deeply mirrored fields contrast starkly with the frosty devices.

1868 Seated Liberty Quarter, Judd-650, PR63 NGC. A few minor contact marks and hairlines are visible on close inspection, but they tend to get lost in the deep mirrors of this sharply detailed Select specimen.

1868 Seated Liberty Half Dollar, Judd-651, PR67 Cameo NGC. The design elements exhibit pinpoint definition throughout, and the deeply mirrored fields create a stunning black-on-white cameo flash when this magnificent Superb Gem is tilted in the light.

1868 Seated Liberty Silver Dollar, Judd-652, PR66 ★ Cameo NGC. The design elements of this spectacular Premium Gem are exquisitely detailed and richly frosted, creating a stunning cameo effect with the deeply reflective fields.

1868 Gold Dollar, Judd-653, PR66 Cameo. Pinpoint definition is apparent on all design elements, and the mostly brilliant fields show just a few hints of golden-tan toning to enhance the startling field-device contrast.

1868 Liberty Quarter Eagle, Judd-654, PR66 Cameo NGC. This spectacular Premium Gem possesses incredible eye appeal with deeply mirrored fields and boldly contrasted frosty design elements.

1868 Three Dollar Gold Piece, Judd-655, PR66 Cameo NGC. This well-detailed Premium Gem shows a little doubling on the 3 in the denomination, and the devices seem to float on the liquid mirrored fields.

1868 Liberty Half Eagle, Judd-660, PR64 Cameo NGC. A few minor hairlines in the obverse field are all that prevent a Gem designation for this sharply detailed and boldly contrasted Choice example.

1868 Liberty Eagle, Judd-664, PR65 Cameo NGC. This delightful Gem is deeply mirrored and sharply detailed throughout with readily apparent cameo contrast and outstanding eye appeal.

1868 Liberty Double Eagle, Judd-665, PR65 Cameo NGC. This majestic coin displays vivid cameo contrast between the sharply detailed frosty design elements and the deeply mirrored fields, with extraordinary eye appeal.

The experimental 1868 aluminum proof sets were produced at the request of Mint Director Henry Linderman, ostensibly for presentation to the Bank of England and other European entities, to demonstrate the advantages of aluminum as a coinage metal. However, it now seems more likely that the sets were actually intended as numismatic delicacies for sale or presentation to favored collectors and influential parties in this country. Four cased sets were officially requested, and we can trace the history of four sets in numismatic holdings in the United States, including one set in the possession of Hugh McCulloch, Secretary of the Treasury in 1868, and another in the collection of Mint Director Linderman himself. Officials at the Bank of England inform us that there is no record of a set being sent to their collection in the 19th century, and it seems unlikely that any sets were sent to other European destinations.

The 1868 aluminum proof sets have a fascinating but checkered history. In a scenario reminiscent of the curse of the legendary Hope Diamond, grave misfortune befell many of the owners of these coins, including bankruptcy, public disgrace, and early death. At one point in 1887, the U.S. government declared the coins illegal to own, and confiscated and destroyed one of the sets. Thankfully, the government has softened its position on pattern ownership in recent times, and the sets now sell readily, with no official interference. A roster of known 1868 aluminum proof sets is included below.

The set offered here is probably the finest known, overall. With one of the original four sets destroyed, and another impounded in the Eric Newman Foundation, only two sets are available to collectors today. The majority of the coins in this set are in higher grades than the corresponding coins in the other set, which Heritage handled in January 2007. This incredible proof set, with a combination of extreme rarity, breathtaking eye appeal, and highest available technical grade, should find a home in the finest pattern collection or Registry Set.

Roster of 1868 Aluminum Pattern Proof Sets

1. Philadelphia Mint; Mint Director Henry Richard Linderman in 1868; Linderman Collection (Lyman Low, 6/1887), lot 55; seized by the U.S. government, presumably destroyed.
2. Philadelphia Mint; Secretary of the Treasury Hugh McCulloch in 1868; McCulloch's heirs; Eric Newman; Eric P. Newman Educational Foundation and Museum.
3. Philadelphia Mint; William Fewsmith, before 1870; Fewsmith Collection (Ebenezer Locke Mason, 10/1870), lot 1381, bought in by Mason for \$102.50; Catalog of Several Collections (Mason, 2/1871), offered as separate coins in lots 703-718, not sold; Centennial Sale, Part V (John W. Haseltine, 9/1876), lot 571; unknown intermediaries; Waldo Newcomer; offered in Numismatic Gallery Monthly (Kosoff and Kreisberg), May 1950 edition at \$850; Commodore Perry Collection (Bowers and Merena, 1/1995), lot 1367; ANA Signature (Heritage, 7/1997), lot 7289; FUN Signature and Platinum Night (Heritage, 1/2007), lot 1353.
4. Philadelphia Mint; A Collection of American Coins and Medals (H.G. Sampson, 2/1882), lot 956; T. Harrison Garrett; Robert Garrett; John Work Garrett; Johns Hopkins University; Garrett Collection, Part I (Bowers and Ruddy, 11/1979), lot 396; Jascha Heifetz Collection (Superior, 10/1989), lot 3283; **the present set**.

Other Appearances

- A. A specimen reportedly sent to the Bank of England by Mint Director Linderman in 1868, not traced since.
- B. A specimen reportedly sent to the government of France by Mint Director Linderman, not traced since.
- C. George Woodside Collection (New York Coin & Stamp, 4/1892), lot 217, apparently retained by Woodside after the sale; purchased privately by Virgil Brand in 1895. This 16-piece aluminum set was not described as a cased set, and the eagle was a Judd-663 specimen, rather than the regular dies Judd-664 included in the regular cased sets requested by Linderman. Despite some similarities, we believe this set represents a different issue from the cased sets above, possibly assembled by Woodside piece by piece. The coins were probably dispersed individually when Brand's collection was parceled out.
- D. Mathew Stickney Collection (Henry Chapman, 6/1907), lot 540; Virgil Brand. Like the set in C above, this 16-piece lot was not described as a cased set, and it may not be the same issue as the sets requested by Linderman. Likewise, the coins were probably sold as individual pieces when Brand's collection was dispersed. Several collectors have attempted to assemble an 1868 aluminum proof set piecemeal in recent times. In the Arnold and Romisa Collections (Bowers and Merena, 9/1984), a partial set of 14 pieces was offered in individual lots. John Jay Pittman also attempted to assemble a set, and succeeded in acquiring 12 of the necessary issues, which were sold in David Akers' sale of his collection in October of 1997. The coins in these partial sets may be the remnants of the sets earlier owned by Stickney and Woodside.

From The Douglas Collection. (Total: 16 coins) PCGS# 60824, CoinPlex ID# PAT1868J612

1872 Aluminum Cent
Only Two or Three Known
Judd-1181, PR66 Cameo

6007 1872 One Cent, Judd-1181, Pollock-1322, R.8, PR66 Cameo PCGS. Regular dies trial piece for the 1872 proof cent, but struck in aluminum. All of the off-metal dies trial cents in copper (if it exists), copper-nickel, aluminum, and nickel are very rare. Only 2-3 aluminum strikes are believed known. This is the first example of this aluminum rarity we have offered. The USPatterns.com website explains the existence of these pieces this way: "Although described as regular dies trial pieces, these were deliberately struck for sale to collectors as part of complete off-metal sets." This is a bright, unoxidized example and truly a wonder to behold. The fields are deeply mirrored and the devices exhibit thick mint frost that yields the cameo effect. PCGS# 61452, CoinPlex ID# PAT1872J1181

1872 Commercial Dollar in Silver
Judd-1214, Richly Toned PR64
Ex: Queller

6008 1872 Commercial Dollar, Judd-1214, Pollock-1355, High R.7, PR64 PCGS. Ex: Samuel Bergard Collection. William Barber's lower relief copy of James Longacre's famous Indian Princess design. Liberty is seated facing left, supporting a Liberty pole and a globe inscribed LIBERTY. Two flags are behind, one of which exhibits 13 stars. At least four of the stars are widely repunched. The reverse has UNITED STATES OF AMERICA above an olive wreath. GOD OUR TRUST is below the wreath on a scroll, and within the wreath are the legends COMMERCIAL / DOLLAR / 420 GRs / 900 FINE. Struck in silver with a reeded edge. Approximately half a dozen examples are known of this variant. It also exists in silver with a plain edge (rare), copper with a reeded edge, copper with a plain edge. and aluminum (very rare).

Ex: Stack's (1/987), lot 537; Lemus-Queller Collection, Part Two / FUN Signature (Heritage, 1/2009), lot 1827, where it realized \$18,400. PCGS# 61485, CoinPlex ID# PAT1872J1214

1872 'Amazonian' Three Dollar in Copper Judd-1236, PR65 Brown

6009 1872 Amazonian Three Dollar, Judd-1236, Pollock-1378, High R.6, PR65 Brown NGC. William Barber's "Amazonian" design with Liberty on the obverse wearing a Phrygian Cap inscribed LIBERTY, thirteen stars around, and the date below. The reverse has a spread-winged eagle with UNITED STATES OF AMERICA and THREE DOL. around the margin. The "Amazonian" design has a reverse similar to that copied from William Barber's quarter, half dollar, and dollar patterns of this year. It is the only uniform design ever made for all six gold denominations, and is also the only pattern three dollar gold design. Struck in copper with a reeded edge. It is estimated that about a dozen are known, several of which are now gilt.

The six-piece Amazonian design covers all gold denominations from gold dollar through double eagle. It is unique in gold, and as such virtually uncollectible. However, a set can be assembled in copper. The collector who wants most of the look of a gold set without paying full freight for a gold Amazonian when it is infrequently offered also has the option of assembling a copper-gilt set.

This is a meticulously struck Gem that has rich orange-gold and ocean-blue patina. The reverse field shows wispy vertical striations, as made, and the dies are slightly rotated clockwise. In spite of the depth of color present, the fields display remarkable brightness and reflectivity. This is an impressive example of this rare and important pattern. Census: 1 in 65 Brown, 0 finer (11/12).

Ex: ANA Signature (Heritage, 8/2004), lot 8005. PCGS# 61508, Coin-Plex ID# PAT1872J1236BN

1874 Aluminum Twenty Cent by Bailly
Judd-1356, Bright PR66

1874 Nickel Twenty Cent Piece
Judd-1358, PR66
Ex: Bass, Pollock Plate Coin

6010 1874 Twenty Cents, Judd-1356, Pollock-1500, High R.7, PR66 PCGS. CAC. Ex: Denali Collection. The design is attributed to J.A. Bailly. The obverse features a seated figure of Liberty facing left, with 13 peripheral stars surrounding, and the date 1874 below. The reverse is similar to the type used on regular issue twenty-cent coins from 1875 to 1878, except that the terminal leaves on the olive branch overlap on the pattern pieces. Struck in aluminum with a plain edge. This majestic design was struck in silver, copper, and aluminum. Only a half dozen or so pieces are believed known in aluminum. This is the finest certified. The fields are deeply reflective and there is a slight haziness present on the reverse, while the obverse shows just the slightest oil-slick iridescence when closely examined. Each side is noticeably cameoed, but the coin is not designated as such. PCGS# 61660, CoinPlex ID# PAT1874J1356

6011 1874 Twenty Cents, Judd-1358, Pollock-1503, High R.7, PR66 PCGS. CAC. Ex: Denali Collection. The obverse depicts a seated figure of Liberty facing left and holding a liberty pole in her right hand. Her left hand rests on a globe and she is surrounded by agricultural produce. The reverse exhibits the denomination 20 CENTS within a wreath with the legend UNITED STATES OF AMERICA around the periphery. Struck in nickel with a plain edge. The nickel strikings of this design are even scarcer than the ones in aluminum. Only three are confirmed to exist, with the possibility of a possible fourth coin. The fields on this example are bright and the strike is strong throughout with significant mint frost over the devices. Mostly untuned.

Ex: Numismatics, Ltd., (8/12/1974); plate coin in Pollock; Bass I (Bowers and Merena, 5/1999), lot 1114. PCGS# 61662, CoinPlex ID# PAT1874J1358

1875 Twenty Cent Pattern in Nickel Judd-1410, PR63

6012 1875 Twenty Cents, Judd-1410, Pollock-1553, R.8, PR63 PCGS. The obverse is similar to the adopted die, although LIBERTY is incused rather than raised as on the regular issue coins. The unadopted pattern reverse expresses the denomination twice, TWENTY CENTS and 1/5 OF A DOLLAR. The verbose legend forces a simple wreath motif, similar to that of the issued three cent nickel. Struck in nickel with a plain edge. This is a popular twenty cent pattern, but it is usually found in silver or copper. Only one aluminum piece has been confirmed and there are only three or four nickel pieces believed known. Undoubtedly struck more than once, as this piece shows pinpoint striking details on each side and deeply reflective fields. Two small spots of corrosion serve as immediate identifiers on this piece. One is adjacent to the left side of the numeral 1 on the reverse, the other is near the rim between ES in STATES. PCGS# 61717, CoinPlex ID# PAT1875J1410

1876 Pattern Dollar, PR65 Red and Brown
Sailor Head, Judd-1465, Pollock-1616
High R.7, Only One Certified Finer

6013 1876 Sailor Head Dollar, Judd-1465, Pollock-1616, High R.7, PR65 Red and Brown NGC. CAC. The obverse features the "Sailor Head" of Liberty, with pearl beads on the coronet, the motto above, date below, an arc of seven stars on the left, and six on the right. An open laurel wreath surrounds the denomination on the reverse, with UNITED STATES OF AMERICA above, and E PLURIBUS UNUM below. Struck in copper, with a reeded edge.

A bill proposed by Representatives Richard Bland and William Kelley passed the House of Representatives in 1876, providing for the resumption of silver dollar coinage on a large scale. In response, Chief Engraver William Barber prepared a series of patterns for the prospective coinage, featuring different versions of his beautiful "Sailor Head" design. On August 11, 1876, Superintendent Pollock sent a specimen of Judd-1465 to Mint Director Henry Linderman for consideration as a possible design for the silver dollar. Linderman was enthusiastic, saying, "...altogether this Head of Liberty may be regarded as equal if not superior to any heretofore prepared at the Mint." The sponsoring bill was defeated in the Senate, and silver dollar coinage was delayed until 1878, when the famous Morgan dollar design made its debut.

Judd-1465 is a very rare issue, as USPatterns.com lists six coins on their roster of known specimens. One of those coins is impounded in the Mitchelson Collection, at the Connecticut State Library, and thus unavailable to collectors. Another specimen has been silver plated. This coin is probably tied for second-finest known with the former Bass Collection example, which is also graded PR65 Red and Brown by NGC. A single specimen has been certified as PR66 Red and Brown by NGC, and PCGS has graded only one specimen of Judd-1465, that in PR64 Brown (11/12).

The coin offered here is a spectacular Gem, with razor-sharp definition on all design elements and especially well-preserved surfaces. The deeply mirrored fields retain much of their original red color, mixed with pleasing shades of medium brown. Eye appeal is exceptional. This coin was off the market for many years before it recently surfaced, as it was part of the Magnolia Collection, offered by Spink Smythe in May 2011. The consignor of the Magnolia Collection was an elderly collector who reportedly stopped collecting seriously in the 1970s. Census: 2 in 65 Red and Brown, 1 finer (11/12). PCGS# 71787, CoinPlex ID# PAT1876J1465RB

1877 Morgan Half Dollar in Copper
Judd-1517, PR66 Red and Brown

6014 1877 Morgan Half Dollar, Judd-1517, Pollock-1681, R.6-7, PR66 Red and Brown NGC. The obverse shows Liberty (virtually identical to the Morgan dollar), facing left surrounded by a beaded circle. E PLURIBUS UNUM is above, the date 1877 is below, the reverse shows a defiant eagle facing right with upraised wings in the center. A beaded ring encircles the eagle, UNITED STATES OF AMERICA is at the top and sides, HALF DOLLAR completes the circle below. Struck in copper with a reeded edge. This is the first of four dies executed by George Morgan in 1877 and greatly resembles the obverse of the Morgan dollar. This is a splendid proof with bright mirrors in the fields that serve to enhance the rich purple and cobalt-blue toning on each side.

Ex: 1971 ANA (*Stack's*, 8/1971), lot 475; Lemus Collection, *Queller Family Collection Part Two / FUN Signature* (Heritage, 1/2009), lot 1876, where it brought \$21,000. NPCGS# 71855, CoinPlex ID# PAT1877J1517RB

1877 William Barber Copper Half Dollar
Judd-1525, PR63 Red and Brown

6015 1877 Half Dollar, Judd-1525, Pollock-1691, 1693, R.6-7, PR63 Red and Brown PCGS. This interesting design exhibits a bust of Liberty facing left. She wears a cap with a wide band inscribed Liberty. The cap is decorated with cereal grains, reminiscent of the familiar Morgan dollar design. On the busy reverse, a small heraldic eagle resides within a shield. This shield is encircled by bands with IN GOD WE TRUST and E PLURIBUS UNUM in gothic letters. UNITED STATES OF AMERICA and HALF DOLLAR in bold letters complete the statutory legends. Struck in copper with a reeded edge. Harry W. Bass, Jr. is credited with discovering the two variants of Judd-1525, Pollock-1691 and Pollock-1693. The final 7 in the date is placed higher in the field on Pollock-1691. The head of Pollock-1690, 1691 is probably the second head by William Barber of this type. Vivid navy-blue, orange, and forest-green colors enrich the sharply struck and carefully preserved surfaces. Star 9 is lightly repunched, and a pair of short lintmarks (as produced) are noted below only for pedigree purposes.

Ex: FUN Signature (Heritage, 2/2004), lot 8495; Simpson Collection / ANA Signature (8/2010), lot 3735. PCGS# 71865, CoinPlex ID# PAT1877J1525RB

1877 Copper Half Dollar by William Barber Judd-1533, PR63 Brown

6016 1877 Half Dollar, Judd-1533, Pollock-1700, R.8, PR63 Brown PCGS. The obverse shows William Barber's head of Liberty with a coronet of wheat and cotton, IN GOD WE TRUST above, the date below, seven stars left and six right. The reverse has an eagle on a pedestal with outstretched wings, E PLURIBUS UNUM on the perch, UNITED STATES OF AMERICA around most of the periphery, and HALF DOLLAR below. Struck in copper with a reeded edge. The date on this pattern shows a notable underpunch of a 1 beneath the 8, which was created when the date was initially started too far to the right. The surfaces are uniformly dark brown with an undertone of deep blue that is evident at certain angles. Lightly cleaned at one time; there are no mentionable contact marks on either side.

Ex: Elder's 17th sale; Virgil Brand; The Palace Collection (Farouk), (Sotheby's, 2/54); Dr. J. Hewitt Judd; Numismatic Enterprises (2/1966) ?; 1966 ANA (Abe Kosoff); Coronet Coin FPL; Lester Merkin (2/1971); Harry Bass, Part I (Bowers and Merena, 5/1999), lot 1234; FUN Signature (Heritage, 1/2007), lot 1541; FUN Signature (Heritage, 1/2008), lot 3481. PCGS# 61873, CoinPlex ID# PAT1877J1533BN

1877 Half Union, Copper Gilt Striking
Judd-1549, PR64+ Cameo
Small Head Variant

6017 1877 Fifty Dollar, Judd-1549 Gilt, Pollock-1722, Low R.7, PR64+ Cameo NGC. CAC. Ex: Simpson. The second of William Barber's designs for the fifty dollar gold piece, or half union. This is the Small Head version; however, the smallness of the head is only apparent when viewed next to the Large Head variant. The head of Liberty is a familiar one, and seen on other patterns through 1880. Thirteen stars surround Liberty (facing left) and the date 1877 is below. Both the date and stars are from double eagle punches and are noticeably smaller than one would expect from a coin of such size (50 mm). The reverse is essentially a Type Three twenty dollar in larger format with FIFTY substituted for TWENTY. However, the devices appear to have been punched into the working die individually. This is most apparent on the motto. IN GOD WE does not describe a perfect arc, and the D is double-punched and tilted to the right. Struck in copper and gilt with a reeded edge.

The design and execution of this denomination is obscure. The idea was to create a new denomination base. There were cents and half cents, dimes and half dimes, dollars and half and quarter dollars, eagles and the various fractions and multiples of that denomination, and two years after this pattern was struck another denomination was proposed, the stella, or four dollar gold piece. The union was proposed as a \$100 gold piece. The union never made it past the sketch phase; however, silver rounds have been recently struck with Barber's design and are quite impressive. The half union was struck in copper, copper-gilt, and gold. There are only two gold pieces, one each of the Large Head and Small Head variety. Both of the gold pieces are now in the Smithsonian, but the coins took a circuitous route to get there, via William Haseltine, Stephen Nagy, and William Woodin. That is an oft-told story that need not be repeated here.

The union denomination was unprecedented in U.S. numismatic history. The fifty dollar gold piece, or half union, had a relatively recent precedent in the 1851-52 "ingots" valued at fifty dollars from Gold Rush California. While there was a need for such a large-denomination gold coin in early California, there was no apparent need for such a federally authorized coin in 1877. The impetus seems to have come from Mint Director Henry Linderman, a coin collector himself and creator of many exotic patterns and rarities. Linderman's excesses finally came to the attention of Congress and he was slated to go before a Congressional committee in late 1878, but was too ill to attend. He died in January 1879, leaving many unanswered questions about his two terms as Mint Director.

Fewer than a dozen pieces of the Small Head half union are known, including examples in the Smithsonian and Connecticut State Library. Approximately half of the known pieces have been gilt, but it is not certain if the gilding was applied in the Mint or afterward. The gilding on this piece effectively simulates a gold striking. The layer of gold is almost complete over each side, just the slightest spotted chipping can be seen on the reverse. The fields show significant brightness from the proof finish on the underlying copper; so much so that the devices are noticeably contrasted against the mirroring in the fields. The orange-gold color is uniform throughout, and apart from the tiny chips in the gold finish on the reverse, there are no noticeable contact marks. Light haNGC ID# 26HN, PCGS# 61894, CoinPlex ID# PAT1877J1549GILT

1883 Transitional Nickel in Aluminum
Judd-1706, PR65

6018 1883 Liberty Head Five Cents, Judd-1706, Pollock-1910, High R.7, PR65 NGC. Ex: Exemplar Collection. The obverse is similar in design to the Liberty nickel adopted in this year, except the legend UNITED STATES OF AMERICA replaces the stars. On the reverse a wreath of corn, cotton, maple, and wheat surrounds a central inscription that reads PURE NICKEL. FIVE CENTS is separated above and below with seven stars left and six right. Struck in aluminum with a plain edge. About half a dozen are known in aluminum. This design was also struck in pure nickel, and one piece is known in non-magnetic nickel. Struck from a highly striated planchet, the fields are also highly reflective. The frosted devices impart a moderate cameo effect, but this is not designated on the insert. Problem-free and appearing much finer than the stated grade. PCGS# 62122, CoinPlex ID# PAT1883J1706

1883 Aluminum Transitional Nickel
Judd-1716, PR65

6019 1883 Liberty Head Five Cents, Judd-1716, Pollock-1921, High R.7, PR65 NGC. Ex: Exemplar Collection. The design is similar to the regular-issue 1883 No CENTS Liberty nickel, but LIBERTY is absent on the coronet, instead spread across the upper obverse rim. The stars are smaller and arranged 6 x 7. Struck in aluminum with a plain edge. The copper strikings of this design are the ones most commonly encountered. Only five pieces are listed in copper, and an estimated half dozen are believed known in aluminum. The surfaces are not striated or oxidized, but exhibit streakiness inherent in the aluminum itself, most likely from the extraction process. Still, the surfaces are bright and the fields nicely mirrored, with moderate mint frost seen over the devices. NGC ID# 26HN, CoinPlex ID# PAT1833J1716

1915 No-S Panama-Pacific Gold Dollar, PR62
Judd-1966, Plain Edge
Only Six Pieces Known
Two Plain Edge Pieces Struck

6020 1915 Panama-Pacific, Judd-1966, (formerly Judd-1793A-3), Pollock-2033, R.8, PR62 NGC. Regular issue for the Panama-Pacific gold dollar, but lacking the S-mintmark. Struck in gold with a plain edge. The Panama-Pacific dollar is a thoroughly modern coin, and a radical departure from previous Classical-styled coin designs. It directly refers to the thousands of workers needed to complete the Panama Canal. On the obverse a laborer is shown with an unadorned cap. The reverse design is noteworthy with its two dolphins, representing the joining of the Atlantic and Pacific Oceans. The coin was designed by Charles Keck, a sculptor who had served in the 1890s as an assistant to Augustus Saint-Gaudens.

There were 11 Pan-Pac gold dollars struck lacking the S-mintmark. The specific reason for the lack of the mintmark is unknown, but it has been widely attributed to the influence of Farran Zerbe. The Judd reference states: "... the majority of the pieces went into private hands, perhaps those of Zerbe himself or of Secretary of the Treasury William G. Mc Adoo."

Earlier editions of the Judd pattern reference listed the striking emission for these coins, based on the progression of three die cracks common to all 11 pieces. What we are most curious about was when this emission sequence was conducted. The most likely time to have conducted this was when all were together in 1954 in Cairo, as all the pieces are ex: Farouk. But we cannot find a first-hand account of this 11-coin examination. The numbering sequence from the seventh edition of Judd shows this coin to be the fourth impression (Judd 1793a-3), and it is one of only two Plain Edge pieces struck. Below is a partial roster of Reeded and Plain Edge specimens.

Reeded Edge Specimens:

First Impression. Judd-1965 (formerly Judd-1793a-1), reeded edge, PR63 PCCS. The first impression. Ex: *Pennsylvania Cabinet (Bowers and Merena, 11/1997), lot 1406, where it brought \$20,900.*

Second Impression. Judd-1965 (formerly Judd-1793a-2), reeded edge, PR62 NGC. Ex: *Virgil Brand; B.G. Johnson; Celina Coin Co.; A. Friedman; 1979 ANA Auction (NERCA, 7/1979), lot 1365; New Millennium Collection / New York Signature (Heritage, 11/2003), lot 11253, where it brought \$33,350.*

Sixth Impression. Judd-1965 (formerly Judd-1793a-5), reeded edge, PR65 NGC. Struck on a thin planchet and the finest known. Ex: *Pennsylvania Cabinet (Bowers and Merena, 11/1997), lot 1407, where it realized \$20,900.*

Ninth Impression. Judd-1965 (formerly Judd-1793a-8), reeded edge, PR64 NGC. Ex: *Voight and Lee Collections (Bowers and Merena, 3/1999), lot 65, where it sold for \$20,700.*

Plain Edge Specimen:

Fifth Impression. Judd-1966 (formerly Judd-1793a-4), plain edge, PR63 NGC. The Judd reference now assigns this plain edge version a different catalog number from the reeded edge coins. Ex: *Farouk Collection (Sotheby's, 2/1954), lot 288; 1979 ANA Sale (NERCA, 7/1979), lot 1369; ANA Signature (Heritage, 8/1997), lot 7353, where it brought \$8,750.*

This 20th century pattern rarity has bright yellow-gold surfaces. A few shallow rim nicks are seen on the obverse, and there is a noticeable wire rim around most of the reverse. This is a fleeting opportunity to acquire this major rarity. Only six other pieces have been certified, including the two Plain Edge pieces, with the finest being a PR65 (11/12).

From The Douglas Collection. PCGS# 62270, CoinPlex ID# PAT-1915J1793A

Richly Toned 1916 Walking Liberty Half Judd-1992 LIBERTY Right Pattern, PR55

6021 1916 Walking Liberty Half Dollar, Judd-1992, formerly Judd-1797, Pollock-2053, Low R.7, PR55 PCGS. The obverse is similar to the regular issue, but LIBERTY, with a tall T extending over the RY, is moved to the right obverse field, in back of the walking figure of Liberty and above IN GOD WE TRUST. The digits in the date are tall, tightly spaced, and thick. The reverse design is broadly similar to the regular issue, but there are many differences. UNITED STATES OF AMERICA is spread out in a wider arc along the periphery, with periods before and after. The extra room is provided by the moving of HALF DOLLAR to a second inner arc above the eagle and below STATES OF A, and E PLURIBUS UNUM, in small letters, is moved to the bottom rim. There is no AW monogram by the tip of the eagle's tail. Struck in silver with a reeded edge.

The Judd-1992 half dollar pattern represents a detour from the competition-winning obverse design by creator Adolph A. Weinman. It shifts the word LIBERTY from above her head to her right. Roger W. Burdette comments on this change in *Renaissance of American Coinage 1916-1921*, starting on page 51, and after reprinting a pertinent letter from the artist, offers these words on the artistic merits:

"Aesthetically, the revised obverse might have been superior to the original design, but for the thick, idiomatic lettering used for LIBERTY. Weinman was trying to squeeze the largest possible letters into the small space between the figure and the rim, and the T was a problem. The artist's solution was to extend the crossbar above, and over the R and Y creating a disproportionately large T. This allowed wider letters to be used, but made the T so prominent that it almost became the dominant visual element of the design: a viewer's eyes immediately focus on T rather than on the figure of Liberty."

After Chief Engraver Charles Barber put his "touches" on the design — and Philadelphia Mint Superintendent Adam Joyce undercut Barber in the name of art — the Walking Liberty half dollar went into production with the word LIBERTY around the upper obverse.

The Judd-1992 is unusual, not only as a 20th century pattern, but as a pattern that has survived in circulated or impaired condition more often than in the 60-70 Proof range. This high-relief piece too is lightly circulated, though considerable luminosity remains in fields richly toned gold-gray, peach, and violet. A touch of knife-rim at the margins points to the production difficulties encountered, not for the first time, when a fine artist of the early 1900s met the engraving department of the U.S. Mint.

Ex: Lemus Collection, Queller Family Collection Part Two / FUN Signature (Heritage, 1/2009), lot 1963. PCGS# 62290, CoinPlex ID# PAT1916J1797

MEDALS AND TOKENS

1902 New York Chamber of Commerce Medal Classic Tiffany 24K Gold Medal

6022 1902 Tiffany New York Chamber of Commerce Gold Medal, Uncirculated Uncertified. Gold, plain edge. Specific gravity 19.11 (990 fine). 76 mm, 5.5 mm thick, 403 gm (12.95 troy oz). This impressive gold medal depicts the new Chamber of Commerce building on the obverse, with a native American greeting an allegorical figure of Commerce on the reverse; behind, a globe depicts the Western Hemisphere.

The New York Chamber of Commerce was founded in 1768 and received a royal charter from King George two years later. This medal commemorates the dedication of the building that served the chamber from 1902 until 1980. Banker and philanthropist Morris Ketchum Jesup was president of the organization when the new building was dedicated. PCGS# 661902

MORGAN DOLLARS

- 6023 1878 8TF PCGS Genuine. VAM-14.20, R.7.** A Hit List 40 Variety. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has rim damage, altered surfaces, and has been cleaned. Minutely granular and lackluster with a stone-white obverse and a gunmetal-gray and powder-blue reverse. Two small, roundish marks are at 2 and 7 o'clock on the reverse rim. VAMworld.com states, "Ultra-rare with less than a dozen known. A huge premium coin." PCGS# 7068
- 6024 1878 8TF MS65 PCGS. VAM-4.** The date and ONE are nicely die doubled on this scarcer First Reverse VAM. VAM-17 appears to be the most common high grade 8TF variety. This nearly untuned Gem has a moderately prooflike obverse, and both sides are highly lustrous. The fields are gorgeously smooth and the cheek has only a few wispy grazes.
Ex: JTR Collection (Heritage, 3/2010), lot 1279, which realized \$1,207.50. PCGS# 7072, NGC ID# 253H, CoinPlex ID# M\$M18788TF
- 6025 1878 8TF MS65 PCGS. VAM-17.** The "Diagonal in 8" 8TF VAM. This minimally toned and lustrous Gem has mark-free fields and only faint facial grazes. Boldly struck and beautifully preserved. Both sides are lightly die doubled, common for this briefly issued design subtype.
Ex: Orlando FUN Signature (Heritage, 1/2010), lot 2794. PCGS# 7072, NGC ID# 253H, CoinPlex ID# M\$M18788TF
- 6026 1878 8TF MS65 PCGS. VAM-14.1A, R.5.** The scarce "Alligator Eye" VAM. Navy-blue, peach-gold, and lilac-red toning enriches the margins of this lustrous and crisply impressed silver dollar. No marks are remotely consequential, and the obverse is especially clean.
Ex: Orlando FUN Signature (Heritage, 7/2011), lot 3931. PCGS# 7072, NGC ID# 253H, CoinPlex ID# M\$M18788TF
- 6027 1878 8TF MS65 PCGS. VAM-18.** The date is strongly die doubled on this introductory subtype Gem. Cartwheel luster dominates brilliant and crisply struck surfaces. Minor facial grazes are all that limit the grade.
Ex: Sacramento Signature (Heritage, 3/2011), lot 3819, which realized \$2,012.50. PCGS# 7072, NGC ID# 253H, CoinPlex ID# M\$M18788TF
- 6028 1878 8TF MS65 PCGS Secure. VAM-21.** The "Broken R & B" variety, which refers to the bases of the R and B in PLURIBUS. Both sides are die doubled, but the doubling is more prominent on the reverse. This untuned and carefully preserved example has cartwheel luster on the obverse and a prooflike reverse. PCGS# 7072, NGC ID# 253H, CoinPlex ID# M\$M18788TF

1878 Eight Tailfeathers Silver Dollar Premium Gem VAM-21

- 6029 1878 8TF MS66 PCGS. VAM-21.** This magnificent silver dollar has peach-red borders and brilliant centers. Sharply struck and lustrous with nearly pristine surfaces. Both sides are nicely die doubled, as often seen on 8TF dollars. VAM-21 is known as the Doubled R & B variety due to the unusual appearance of those letters within PLURIBUS. Population: 34 in 66 (1 in 66+), 2 finer (11/12). PCGS# 7072, NGC ID# 253H, CoinPlex ID# M\$M18788TF

White MS66 1878 Silver Dollar Eight Tailfeathers VAM-14.2

- 6030 1878 8TF MS66 NGC. VAM-14.2.** This brilliant First Reverse Morgan dollar is remarkably free from marks and displays blazing cartwheel sheen. The strike is intricate throughout. The reverse is die doubled, most apparent near 4 o'clock. Among the finest examples of the introductory, briefly coined design subtype. Census: 19 in 66, 0 finer (12/12).
Ex: M.L. Moser Collection, #1 NGC Morgan Dollar Set. NGC ID# 253H, PCGS# 7072, CoinPlex ID# M\$M18788TF

**1878 8 Tailfeathers, MS66
Well Struck and Lustrous**

- 6031 1878 8TF MS66 PCGS. CAC. VAM-17** The "Diagonal in 8" 8TF VAM. A diagonal die chip in the lower loop of the first 8 identifies the VAM. Crescent multicolored toning occupies the left half of the obverse. This is a well struck, lustrous and minimally marked specimen. Population: 34 in 66 (1 in 66+), 2 finer (12/12). PCGS# 7072, NGC ID# 253H, CoinPlex ID# M\$M18788TF

- 6032 1878 7/8TF Strong MS65 PCGS. VAM-38.** A lustrous, precisely struck, and virtually brilliant Gem. Impressively unabraded, and very rare any finer. Five feathers are well centered beneath the prominent seven tail feathers.
From The Steve Reed Collection. PCGS# 7078, NGC ID# 2TXZ, CoinPlex ID# M\$M187878TFSTR

**White Prooflike Gem VAM-38
1878 7/8TF Silver Dollar**

- 6033 1878 7/8TF Strong MS65 Prooflike NGC. VAM-38.** This VAM variety features five tailfeather remnants beneath the prominent seven tailfeathers. The present brilliant Gem provides dazzling field reflectivity and beautifully preserved fields. Only faint grazes on the cheek deny an even finer third party grade. Most prooflike 7/8TF dollars grade MS62 through MS64, and Gems are decidedly rare.
From The Steve Reed Collection. NGC ID# 2TXZ, PCGS# 7079, CoinPlex ID# M\$M187878TFSTRPL

**1878 7/8 Tailfeathers Dollar, VAM-44, AU53
Tripled Die Obverse**

- 6034 1878 7/8F Tripled Blossoms AU53 PCGS. VAM-44, R.7.** A Top 100 Variety. Most specialists consider the VAM-44 to be the number one Morgan dollar variety, with the leaves and cotton bolls in the hair strongly die tripled. Slight doubling is also apparent on the eagle's legs. This lightly worn specimen is only lightly marked, and shows mild field reflectivity on its bright silver surfaces. PCGS# 133829

**MS64 Deep Mirror Prooflike
VAM-33 7 Over 8 Tailfeathers
1878 Silver Dollar**

- 6035 1878 7/8TF Weak MS64 Deep Mirror Prooflike PCGS. CAC. VAM-33, R.4.** Close to VAM-33A, and likely a later die state than VAM-33A. Clashed near the profile, as on VAM-33A, but no N from IN is near the neck, since the dies were lapped to reduce the clash marks. The lapping created the deep mirror prooflike finish. A brilliant near-Gem with a clean cheek and a bold strike. Minor field marks fail to challenge the grade.
From The Steve Reed Collection. PCGS# 97071, CoinPlex ID# M\$M187878TFWKDMPL

**1878 VAM-41 A Morgan Dollar
MS65 Deep Mirror Prooflike**

- 6036 1878 7/8TF Weak MS65 Deep Mirror Prooflike NGC. VAM-41A.** Both sides of this lovely Gem have deeply mirrored fields around the satiny white devices, imparting an excellent cameo appearance. The varieties of 1878 Morgan dollars have a cult-like following among VAM enthusiasts, and this piece will certainly be an active lot when it crosses the block. PCGS# 97071, CoinPlex ID# M\$M187878TFWKDMPL

**1878 VAM-123 Morgan, VF35
Spiked Eye**

- 6037 1878 7TF Spiked Eye, Reverse of 1878 VF35 PCGS. VAM-123.** A Hit List 40 Variety. A doubled eye lid appears on the obverse of this Morgan dollar variety, and it is highly popular with Morgan variety collectors. This lightly circulated example has pleasing pewter-gray surfaces with minimal marks. PCGS# 7074, NGC ID# 253K, CoinPlex ID# M\$M18787TFR1878

**1878 Morgan Dollar, MS66
Reverse of 1878, None Certified Finer**

- 6038 1878 7TF Reverse of 1878 MS66 NGC.** The 1878, 7 Tail Feathers Morgan dollar, with the Reverse of 1878, can be easily identified by the parallel top feather in the arrow fletching, which is slanted on the Reverse of 1879. This sharply detailed Premium Gem displays vibrant frosty mint luster, with a few hints of golden-tan and violet toning at the rims. Census: 23 in 66, 0 finer (11/12).
From The Steve Reed Collection. NGC ID# 253K, PCGS# 7074, CoinPlex ID# M\$M18787TFR1878

- 6039 1878 7TF Reverse of 1879 MS65 NGC. VAM-202.** The obverse exhibits die doubled stars and a lightly repunched date. This lustrous and crisply struck Gem displays stone-gray centers framed by butter-gold and ocean-blue margins.
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 6767, which realized \$2,357.50.
From The Steve Reed Collection. NGC ID# 253L, PCGS# 7076, CoinPlex ID# M\$M18787TFR1879

**1878 7 Tailfeathers Morgan, Reverse of 1879, MS66
Tied for Finest Known**

- 6040 1878 7TF Reverse of 1879 MS66 NGC.** The 1878 7 Tailfeathers Morgan dollar with the Slanted Arrow Feather Reverse of 1879 was clearly struck in the minority as compared to the Parallel Arrow Feather Reverse of 1878, even if precise mintage figures are unknown; Bowers estimates a ratio of less than 5:1 in his series *Guide Book*. This is a vibrant, frosty textured Gem whose originally toned surfaces reveal delicate golden-orange, magenta, and thalo-blue shadings gaining intensity toward the peripheral areas. There are no ill-defined features, and both sides are free of all but a few light grazes. NGC and PCGS combined have graded only 22 other examples at this level, with none finer (12/12).
Ex: New York Signature (Heritage, 7/2004), lot 7010.
From The Steve Reed Collection. NGC ID# 253L, PCGS# 7076, CoinPlex ID# M\$M18787TFR1879

**1878 Morgan Dollar, MS66
7 Tailfeathers, Scarcer Reverse of 1879**

- 6041 1878 7TF Reverse of 1879 MS66 NGC.** The 1878 Morgan dollar with the 7 Tail Feathers reverse is known in two distinct die varieties. The Reverse of 1879 is identified by the slanting top feather in the arrow fletching, and is much more difficult to locate than the Reverse of 1878, with parallel arrow feathers. This spectacular Premium Gem is sharply detailed throughout, and the well-preserved surfaces show a mix of frosty mint luster and prooflike reflectivity. Census: 14 in 66, 0 finer (11/12).
From The Steve Reed Collection. NGC ID# 253L, PCGS# 7076, CoinPlex ID# M\$M18787TFR1879

**1878 7 Tailfeathers, Reverse of 1879
MS64 Deep Mirror Prooflike
Nicely Contrasted**

- 6042 1878 7TF Reverse of 1879 MS64 Deep Mirror Prooflike NGC.** The frosted motifs stand out against the mirrored fields of this untuned near-Gem Morgan, especially when the coin is tilted under a light source. The design elements are generally well defined. Light grazes preclude Gem classification. Census: 8 in 64 Deep Mirror Prooflike, 1 finer (12/12). NGC ID# 253L, PCGS# 97077, CoinPlex ID# M\$M18787TFR1879DMPL

**1878 Morgan Dollar, MS64 Deep Mirror Prooflike
Elusive Reverse of 1879**

- 6043 1878 7TF Reverse of 1879 MS64 Deep Mirror Prooflike PCGS.** The Reverse of 1879, with its slanting top arrow feather, is much more elusive than its Reverse of 1878 counterpart. This sharply detailed Choice specimen displays deeply reflective brilliant fields, with just a hint of pale gold toning. A few minor contact marks do little to detract from the outstanding eye appeal. Population: 23 in 64 Deep Mirror Prooflike, 5 finer (11/12).
From The Steve Reed Collection. PCGS# 97077, NGC ID# 253L, CoinPlex ID# M\$M18787TFR1879DMPL

**White Deep Mirror Prooflike Near-Gem
1878 Third Reverse Silver Dollar**

6044 1878 7TF Reverse of 1879 MS64 Deep Mirror Prooflike PCGS. VAM-200, R.6. The M in UNUM is defective, and the D in UNITED has a die chip. Many silver dollar specialists focus on the plethora of 1878-dated VAM varieties. The present deeply mirrored near-Gem has a good strike and a brilliant appearance. A loupe reveals scattered minute contact. For all Reverse of 1879 dollars, the Population is 23 in 64 Deep Mirror Prooflike, 5 finer (11/12). PCGS# 97077, NGC ID# 253L, CoinPlex ID# M\$M18787TFR1879DMPL

6045 1878-CC MS65 PCGS. A frosty Gem, this piece possesses excellent eye appeal and outstanding luster. The borders display vivid gold and russet toning that further enhances the attractiveness. *Ex: New York Signature (Heritage, 6/2005), lot 5932.* PCGS# 7080, NGC ID# 253M, CoinPlex ID# M\$M1878CC

6046 1878-CC MS65 PCGS. Nearly brilliant, though this fully struck and lustrous Carson City dollar displays traces of tan toning. Upon first glance the surfaces appear to merit an even finer grade, but we note a hair-thin obverse mark between 12 and 3 o'clock. Certified in a green label holder. PCGS# 7080, NGC ID# 253M, CoinPlex ID# M\$M1878CC

6047 1878-CC MS65 PCGS. CAC. VAM-11. A Top 100 Variety. Lustrous and intricately impressed with a hint of tan patina here and there. A nicely preserved example of the popular "Lines in Wings" Carson City VAM. The variety is undesignated as it is encased in an old green label holder. PCGS# 7080, NGC ID# 253M, CoinPlex ID# M\$M1878CC

6048 1878-CC MS65 PCGS. CAC. Bold yellow toning is noted at the upper obverse and lower reverse rims, but the rest of this Carson City dollar is lustrous silver-gray. Excellent inner detail. Housed in a green label holder. PCGS# 7080, NGC ID# 253M, CoinPlex ID# M\$M1878CC

6049 1878-CC MS65+ PCGS. CAC. Bright cartwheel luster is silver with a touch of frost enhancing well-defined central devices. A great example from the star of the Carson City Mint's famous run of Morgan dollars. PCGS# 7080, NGC ID# 253M, CoinPlex ID# M\$M1878CC

**Premium Gem 1878-CC Morgan Dollar
Attractive Deep Toning**

6050 1878-CC MS66 PCGS. This deeply toned Carson City Morgan dollar represents the first year of the design, an issue that is always in demand from mintmark type collectors. A sharply detailed Premium Gem, this coin displays vivid shades of golden-brown, gray, and turquoise patina, with satiny mint luster underneath. PCGS# 7080, NGC ID# 253M, CoinPlex ID# M\$M1878CC

6051 1878-CC MS66 Prooflike PCGS. The silver flash on this Premium Gem is stunning, though the depth of the mirrors falls just short of the next level. Boldly struck devices impress with their frost. Population: 10 in 66 Prooflike, 0 finer (12/12). PCGS# 7081, NGC ID# 253M, CoinPlex ID# M\$M1878CCPL

6052 1878-CC MS63 Deep Mirror Prooflike PCGS. Frosty devices rise from genuinely deep mirrors on this first-year Carson City Morgan dollar. The obverse is lightly abraded, including reed marks that underlines the PLU of PLURIBUS. Housed in a green label holder. PCGS# 97081, NGC ID# 253M, CoinPlex ID# M\$M1878CCDMPL

6053 1878-CC MS63 ★ Deep Mirror Prooflike NGC. CAC. The untuned surfaces of this Select Morgan display nice field-device contrast. This is a sharply struck piece with great eye appeal, evident from the coveted Star designation. Census: 22 in 63 ★ Deep Mirror Prooflike, 37 ★ finer (12/12). NGC ID# 253M, PCGS# 97081, CoinPlex ID# M\$M1878CCDMPL

6054 1878-CC MS64 Deep Mirror Prooflike ANACS. VAM-11. A Top 100 Variety. "Lines in Wing," two bold and almost bar-like die polishing scratches, join the eagle's left (facing) wing with the nearby leg. Thickly frosted devices are silver, as are the immediately surrounding mirrors, but orange and blue patina occupies much of the margins. Housed in a small-format holder. PCGS# 40438

**MS66+ Morgan
Only Five Finer NGC-Graded Examples**

- 6055 1879 MS66+ PCGS. CAC.** A stunning Premium Gem, this piece approaches the finest 1879 Morgan dollars ever certified. PCGS has only graded one Superb Gem and NGC has only graded five such coins (11/12). Both sides have frosty silver luster with brilliant and untoned surfaces. Only a few light grazes are present. PCGS# 7084, NGC ID# 253S, CoinPlex ID# M\$M1879

**Gem Deep Mirror Prooflike 1879 Morgan
Only One Finer NGC-Graded Example**

- 6056 1879 MS65 Deep Mirror Prooflike NGC.** The mirrors and frost on this outstanding Gem are equally impressive. The surfaces are mostly brilliant with a ring of gold and iridescent toning along the border. Though the 1879 Morgan dollar is readily available in most grades, Gems are challenging, as are Deep Mirror Prooflike pieces. Those two factors rarely come together. This is one of just three MS65 Deep Mirror Prooflike coins known to NGC, with only one finer (11/12).
Ex: ANA San Francisco Signature (Heritage, 7/2005), lot 6710.

MS64+ 1879 Carson City Morgan

- 6057 1879-CC MS64+ PCGS. CAC.** Unlike other dates such as the 1881-CC and 1885-CC, the 1879-CC Morgan dollar had low representation in the Treasury holdings and later GSA auctions. As a result, despite a sizable mintage, by Carson City standards, of more than three-quarters of a million pieces, there are far fewer pieces at the upper grade levels available than for dates of similar vintage. This high-end near-Gem displays frost on Liberty on the obverse with the fields retaining a high degree of reflectivity. The reverse is toned primarily in shades of gold and apricot; however attractive shades of blue, green, and red appear near the upper rim. PCGS# 7086, NGC ID# 253T, CoinPlex ID# M\$M1879CC
- 6058 1879-CC Capped Die AU58 NGC. VAM-3.** A Top 100 Variety. Faint golden-gray toning visits this partially lustrous key date Carson City dollar. Light abrasions are noted near the second U in PLURIBUS. The peak of the 1 is repunched, in addition to the better known reverse with die chips throughout the mintmark. NGC ID# 253T, PCGS# 7088, CoinPlex ID# M\$M1879CCCAP

**Uncirculated 1879-CC Silver Dollar
Capped Die, VAM-3A**

6059 1879-CC Capped Die MS61 ANACS. VAM-3A. A Top 100 Variety. Designated as VAM-3 within the old small-sized ANACS holder, since the VAM-3A die state was unlisted prior to January 2012. Two die gouges on the upper right reverse identify this elusive VAM. The present lustrous key date Carson City Morgan displays apricot, lilac, and jade-green toning. The left obverse displays scattered tiny marks. NGC ID# 253T, PCGS# 7088, CoinPlex ID# M\$M1879CCCAP

**1879-CC Morgan Dollar, MS63
Capped Die, VAM-3**

6061 1879-CC Capped Die MS63 PCGS. VAM-3. A Top 100 Variety. Rich satin luster bathes this gently toned key date Dollar. The strike is not completely brought up in the centers, as is usual for the variety, and a few faint hairlines are detected. The center of the cheek is clean, although a few small marks are near the jaw. Select Mint State 1879-CC Dollars are insufficient in number to satisfy the many collectors of the series. PCGS# 7088, NGC ID# 253T, CoinPlex ID# M\$M1879CCCAP

**1879-CC Morgan Dollar, MS63
VAM-3, Capped Die Reverse**

6060 1879-CC Capped Die MS63 PCGS. VAM-3. A Top 100 Variety. The Capped Die variety is also known as a Large over Small Mintmark variety, with the original small CC partially effaced before the new punch was incorporated. This Select Mint State piece, while hosting numerous trivial handling marks, exhibits frosty silver luster and brilliant, untuned surfaces. PCGS# 7088, NGC ID# 253T, CoinPlex ID# M\$M1879CCCAP

**Capped Die 1879-CC Dollar, MS63
Popular Semikey Issue**

6062 1879-CC Capped Die MS63 NGC. CAC. VAM-3. A Top 100 Variety. A lustrous and essentially untuned example of the popular semikey Carson City issue. Minor grazes on the portrait are all that limit the grade. The "Capped Die" Large Over Small CC variety was shunned during the 1970s, since collectors preferred a clear Carson City mintmark. Times have changed and the variety has become highly popular due to its scarcity and numismatic interest. *From The Richmond Hill Collection.* NGC ID# 253T, PCGS# 7088, CoinPlex ID# M\$M1879CCCAP

1879-O Morgan Dollar
Very Rare Deep Mirror Prooflike Gem

- 6063 1879-O MS65 Deep Mirror Prooflike NGC.** The 1879-O Morgan dollar claims a nominal mintage of just under 2.9 million pieces, making the issue reasonably available in most grades. Few examples are seen with prooflike surfaces, however, and Deep Mirror Prooflike specimens are very rare at the Gem level. This delightful specimen displays razor-sharp definition on all design elements, and the richly frosted devices stand out in stark contrast to the deeply reflective fields. A few minor contact marks do little to detract from the outstanding visual appeal. Census: 4 in 65 Deep Mirror Prooflike, 0 finer (11/12).
From The Steve Reed Collection. NGC ID# 253V, PCGS# 97091, CoinPlex ID# M\$M1879ODMPL

Gem 1879-S Morgan Dollar, Reverse of 1878
Only One Finer Coin at PCGS

- 6064 1879-S Reverse of 1878 MS65 PCGS.** The Reverse of 1878 is identified by the parallel top feather in the arrow fletching. This issue is quite elusive in the context of the series and probably accounted for about 500,000 pieces of the reported 9.1 million coin mintage for the year. This immaculate Gem is well-detailed, with brilliant surfaces and vibrant mint luster on both sides. Population: 47 in 65, 1 finer (11/12).
From The Steve Reed Collection. PCGS# 7094, NGC ID# 253W, CoinPlex ID# M\$M1879SR1878

- 6065 1879-S MS67+ PCGS. CAC.** Strongly struck with gold-orange patina at the rims and silver interiors. Delicate frost graces the high points of decently detailed central devices. Exquisitely preserved. PCGS# 7092, NGC ID# 253X, CoinPlex ID# M\$M1879S

1879-S Morgan Dollar, MS68
Among the Finest Certified

- 6066 1879-S MS68 PCGS.** The 1879-S comes in two major varieties. The 2nd Reverse Variety has a parallel top arrow feather, and the 3rd Reverse has a slanting top arrow feather. This exquisite MS68 coin is of the latter variety. Faint reddish-tan gravitates to the peripheries of this highly lustrous example, and an exacting strike imparts crisp delineation to the design elements. Immaculate preservation characterizes both sides. Population: 84 in 68 (3 in 68+), 0 finer (11/12).
From The Steve Reed Collection. PCGS# 7092, NGC ID# 253X, CoinPlex ID# M\$M1879S

**1879-S Morgan Dollar, MS67 Deep Mirror Prooflike
Tied for Finest Certified**

- 6067 1879-S MS67 Deep Mirror Prooflike NGC.** A totally white coin that shows superb contrast and excellent quality. Examination of the fields and devices will note only the faintest signs of the contact, and this coin has bold visual appeal. Scarce so well preserved and apparently as nice as this date is found. Census: 2 in 67 Deep Mirror Prooflike, 0 finer (11/12).
From The Steve Reed Collection. NGC ID# 253X, PCGS# 97093, CoinPlex ID# M\$M1879SDMPL

- 6068 1880 MS66 NGC.** Attractive yellow-gold toning appears at large portions of the peripheries, with splashes of iridescent shades of teal and mauve present. The coin is well-struck and displays brilliant luster. This is a very attractive Premium Gem example. Census: 39 in 66, 0 finer (12/12). NGC ID# 253Y, PCGS# 7096, CoinPlex ID# M\$M1880

**1880 Morgan Dollar
MS65 Deep Mirror Prooflike
Only One Finer at PCGS**

- 6069 1880 MS65 Deep Mirror Prooflike PCGS.** This Deep Mirror Prooflike Morgan silver dollar is nearly the finest certified, with exactly one finer DMPL coin graded at PCGS, and one other at NGC. Both sides have excellent contrast with brilliant silver surfaces. Population: 30 in 65 Deep Mirror Prooflike, 1 finer (12/12). PCGS# 97097, NGC ID# 253Y, CoinPlex ID# M\$M1880DMPL

**Gem Deep Mirror Prooflike
1880 Silver Dollar**

- 6070 1880 MS65 Deep Mirror Prooflike NGC.** Fire-red and ocean-blue borders invigorate the rims of this flashy and nicely struck Gem. The fields and devices are brilliant. Well preserved, and much rarer in DMPL format than its 1880 San Francisco counterpart. Certified in a prior generation holder. Census: 9 in 65 Deep Mirror Prooflike, 1 finer (12/12). NGC ID# 253Y, PCGS# 97097, CoinPlex ID# M\$M1880DMPL

- 6071 1880-CC 8 Over Low 7 MS65 PCGS. CAC. VAM-6.** A Top 100 Variety. The top stroke of the 7 crosses the upper loop of the second 8 rather than filling in its higher half. This lightly toned silver example has generous frost across the well-defined central devices. PCGS# 7104

- 6072 1880-O MS64 PCGS.** Micro O. Lustrous and brilliant with a good strike and a few delicate grazes on the cheek. Common in typical Mint State, but due to indifferent long-term bag storage, the 1880-O is surprisingly rare as a Gem and even Choice examples are scarce. PCGS# 7114, NGC ID# 2543, CoinPlex ID# M\$M1880O

- 6073 1880-O MS64 PCGS.** Micro O. Dynamic cartwheel luster sweeps this nearly brilliant Choice New Orleans silver dollar. A few faint gray freckles are scattered. The fields are splendidly smooth, and the cheek displays only moderate marks. PCGS# 7114, NGC ID# 2543, CoinPlex ID# M\$M1880O

- 6074 1880-O MS64 NGC.** Micro O. A lightly toned and thoroughly lustrous New Orleans near-Gem. The centers show minor softness but the remainder of the designs are well struck. Only minor grazes limit the third party grade. NGC ID# 2543, PCGS# 7114, CoinPlex ID# M\$M1880O

- 6075 1880-O MS64 NGC.** Micro O. A trace of gold toning visits the centers of this lustrous and sharply struck New Orleans silver dollar. Impressively unabraded for the MS64 level, and an excellent value relative to the few certified finer. NGC ID# 2543, PCGS# 7114, CoinPlex ID# M\$M1880O

- 6076 1880-O MS64 PCGS.** Micro O. An untuned and lustrous silver dollar with a clean reverse and scattered light obverse grazes. The centers show minor lightness of impression. A better date in the present grade. PCGS# 7114, NGC ID# 2543, CoinPlex ID# M\$M1880O

- 6077 1880-O MS64 PCGS. CAC.** Micro O. Brilliant and lustrous with a good strike and well-preserved fields. The cheek exhibits minor grazes. The 1880-O is a common date in circulated grades but is conditionally scarce in quality Mint State. PCGS# 7114, NGC ID# 2543, CoinPlex ID# M\$M1880O

- 6078 1880-O MS64 PCGS. CAC.** Medium O. Mildly dusky tan-gray toning graces this lustrous and precisely struck Choice New Orleans representative. Only incidental contact is present. Though collectible as a near-Gem, the '80-O is a formidable condition rarity any finer. PCGS# 7114, NGC ID# 2543, CoinPlex ID# M\$M1880O

Choice Prooflike 1880-O Dollar
